## Academic Calendar

### FALL 2002

- **Classes begin**: August 26, Monday
- **Labor Day holiday**: September 2, Monday
- **Fall recess**: October 18, Friday
- **Thanksgiving recess**: November 27-29, Wednesday-Friday
- **Classes end**: December 4, Wednesday
- **Reading and exam period**: December 5-13
  - **Reading days**: December 5, 7-8, 11
  - **Exam days**: December 6, 9-10, 12-13

### SPRING 2003

- **Classes begin**: January 14, Tuesday
- **Martin Luther King holiday**: January 20, Monday
- **President’s Day holiday**: February 17, Monday
- **Town Meeting recess**: March 4, Tuesday
- **Spring recess**: March 17-21, Monday-Friday
- **Honors Day**: April 25, Friday
- **Classes end**: April 30, Wednesday
- **Reading and exam period**: May 1-9
  - **Reading days**: May 1, 3-4, 7
  - **Exam days**: May 2, 5-6, 8-9
- **Commencement**: May 18, Sunday

Academic Calendar information for upcoming years is available on-line at: www.uvm.edu/~facsen/?Page=calendars.html&SM=calendar.html

---

### Notes:

Refer to the policy on Class Attendance in the Academic and General Information section for information regarding observance of religious holidays and participation in intercollegiate athletics.

The Schedule of classes offered through Continuing Education may differ from this Academic Calendar. Refer to Continuing Education publications.

Students at The University of Vermont are responsible for knowing and complying with all requirements for their respective degrees as stated in the catalogue.

The University of Vermont reserves the right to make changes in the course offerings, degree requirements, charges, and regulations, and procedures contained herein as educational and financial considerations require, subject to and consistent with established procedures and authorizations for making such changes.

Although its legal title is The University of Vermont and State Agricultural College, the University is known to its students and alumni as UVM. This popular abbreviation is derived from the Latin *Universitas Viridis Montis*, University of the Green Mountains.

The colors of the University are green and gold.
The mascot is the catamount.

Requests for a catalogue, an application form, or information concerning admissions policies and procedures, room and board, and tuition may be addressed to:

**Director of Admissions**  
University of Vermont

UNIVERSITY MISSION

The mission of the University of Vermont is to create and share knowledge. UVM prepares its students to live productive, responsible, and creative lives through a high quality, liberal education. As a research university, UVM endorses the intrinsic value of the creation of new knowledge and promotes the application of relevant knowledge to benefit the State of Vermont and society as a whole.

As a research university, UVM is distinguished by the comprehensiveness of its academic mission, its range of graduate and undergraduate programs, and its commitment to research-based lifelong learning. As a community of scholars, students, both undergraduate and graduate, are involved in the generation of knowledge. As a member of its local and global community, the University has an obligation to share its knowledge, to assist with relevant applications of that knowledge, and to understand and respond to a changing and diverse world.

THE UNIVERSITY: A BRIEF HISTORY

Chartered in 1791, the same year that Vermont became the fourteenth state in the union, The University of Vermont was established as the fifth college in New England. Much of the initial funding and planning for the University was undertaken by Ira Allen who is honored as UVM’s founder.

The University of Vermont was the first college or university in the country to have it plainly declared in its charter that the “rules, regulations, and by-laws shall not tend to give preference to any religious sect or denomination whatsoever” — a clear assertion of Vermont’s commitment to equality and enlightenment.

Nine more years passed before, in 1800, the University was finally set in motion with a president-professor and a handful of students.

UVM was founded in a day when U.S. colleges and universities existed primarily to educate men for the professions, especially for the ministry. Yet, in studying University history, Professor Emerita Betty Bandel discovered that “this small institution located in a frontier community of New England became a pioneer in the kind of practical education which later became the basis for the establishment of the land-grant universities — those institutions which made it possible for the sons and daughters of average citizens to aspire to a college education.” For example, she noted that the University is believed to be the first nonmilitary institution to have offered engineering courses.

The University pioneered in yet another area of society, that of giving women equal status with men in higher education. In 1871, the University defied custom and admitted two women as students and four years later was the first institution in the country to admit women to full membership in the scholarly society, Phi Beta Kappa.

Tucked in the northwest corner of the Ira Allen Chapel grounds is a memorial to a late nineteenth century graduate of this University, Philosopher John Dewey, whose ideas about practical education are still debated with passionate vigor.

The first building was subscribed by citizens of Burlington and, when fire destroyed that edifice in 1824, its successor, for which General Lafayette laid the cornerstone, was again made possible by the citizens of Burlington. That building, the Old Mill, was only the first in a long line to be made possible by private philanthropy. The list includes all but one of the buildings on University Row: Ira Allen Chapel, Billings, Williams, Old Mill, and the Royall Tyler Theatre. Morrill Hall, the first UVM building to be provided by State funding, did not come until 1907.

Nearly all state universities function as departments of government, and the faculty and staff are state employees. In Vermont, the University is an “instrumentality” of the State and its Board of Trustees balances both the public and private sectors. The Board is composed of 25 members: nine self-perpetuating, nine elected by the State Legislature, three appointed by the Governor, and two members of the student body. The President of the University and the Governor of the State serve as ex officio members of the Board.

During 2001-2002, 7,472 students were enrolled in the eight undergraduate colleges and schools — the Colleges of Agriculture and Life Sciences, Arts and Sciences, Education and Social Services, and Engineering and Mathematics, and the Schools of Allied Health Sciences, Business Administration, Natural Resources, and Nursing — and 1,082 were enrolled in the Graduate College and 386 in the College of Medicine. In addition, 1,120 students enroll in courses offered by Continuing Education. The University employs over 3,000 full- and part-time faculty and staff.

The campus of The University of Vermont is located in Burlington, the State’s largest city. Within a greater Burlington area of 132,000 people, the city with its population of 35,000 enjoys magnificent views of Lake Champlain and the Adirondack Mountains to the west and Vermont’s Green Mountains to the east. Burlington is located approximately 200 miles northwest of Boston, 300 miles north of New York City, and 100 miles south of Montreal.

THE GRADUATE COLLEGE

The Graduate College serves the needs of college graduates who desire continued professional development and a broader and more thorough knowledge of scholarship and research in their chosen fields. The College offers master’s degree programs in over 70 fields of study and doctoral degree programs in 20 fields. In some departments, selected undergraduate students may participate in Accelerated Master’s Degree Programs. For detailed information regarding graduate programs, degree requirements, and Graduate College regulations and procedures, refer to the Graduate College Catalogue available from the Graduate Admissions Office, 333 Waterman Building. Information is also available through www.uvm.edu/gradcoll/.

Persons applying to and enrolled in graduate programs are expected to be familiar with the general regulations of the Graduate College and with the specific degree requirements in their chosen fields of study. Questions pertaining to matters other than admission to graduate programs may be directed to the Graduate College Dean’s Office, 333 Waterman.

COLLEGE OF MEDICINE

The UVM College of Medicine is one of the oldest and most respected medical schools in the nation. Since its establishment in 1822, the College’s mission has been the education of undergraduate and medical students. This
has evolved to include the education of residents, graduate students, and postdoctoral fellows, as well as continuing medical education of health professionals in the state, region, and the nation. During the past 30 years the College’s mission has embraced cutting-edge health research, accessible high quality patient care, and community/public service. Physicians educated or trained at the UVM College of Medicine and its affiliated health care organization — Fletcher Allen Health Care — are a vital part of the region’s health care work force, accounting for nearly half of Vermont’s physicians.

**CONTINUING EDUCATION**

Continuing Education provides innovative credit and non-credit programs in a variety of settings, educational formats, technology options, and locations. Noncredit offerings include community education “short courses” as well as a full range of seminars, workshops, conferences, teleconferences, and video products on topics of current interest to college graduates and their peers. The Lane Series presents concerts and theatre productions for an audience of students, faculty, staff, and the community at large. Continuing Education courses are offered by UVM faculty and approved adjunct faculty. Additional information is available on-line at learn.uvm.edu.

**UNIVERSITY EXTENSION**

UVM Extension is one of the doors to The University of Vermont for Vermonters. Extension faculty and program staff, located on-campus and in all regions of the state, offer up-to-date information to help Vermonters make informed choices, answer questions, and solve problems.

Extension provides a two-way link between the University and the people of the state—using knowledge and research to meet their needs and bringing back to the University the real-life questions and concerns needing further research. Areas of priority are agriculture; community resources and economic development; natural resources and environmental management; nutrition, food safety, and health; and youth and family development.

**LIBRARIES AND MEDIA SERVICES**

The main unit of the University libraries, Bailey/Howe Library, provides services, print, and electronic resources relating to the humanities, social sciences, and many of the sciences. This library houses the largest book, periodical, and map collection in Vermont. It is a depository for U.S. and Canadian government publications, and provides a full service Patent and Trademark Depository Library. The Special Collections Department includes a comprehensive collection of Vermont materials, the Wilbur Collection, rare books, literary and historical manuscripts, and the papers of many individuals associated with the state and federal governments. A separate Chemistry and Physics library is located in Cook Physical Sciences Building. Collections relating to medicine and the health sciences are housed in the Dana Medical Library.

Most library holdings are accessible through the online catalog Voyager and the gateway to information sources, SAGE. Many additional resources and information about the Libraries can be accessed through the Libraries web page http://sageunix.uvm.edu. Sage provides access, in a fully integrated way, to Voyager, on-line indexes, full text magazines and reference works, and the World Wide Web.

The Library Research Annex (LRA), located just beyond Police Services (directly east of the corner of East Avenue and Carrigan Drive), contains many older and less used books, periodicals, government documents as well as the UVM archives.

**ROBERT HULL FLEMING MUSEUM**

The Fleming Museum is an important art center and multicultural resource for the UVM community. It houses a collection of more than 18,000 works, including American and European paintings and works on paper, American decorative arts and costumes, and outstanding collections of art and artifacts from African, ancient Egyptian, Pacific, and Native American cultures. In addition to the permanent galleries, changing exhibitions are shown throughout the year. This year’s special exhibitions include: an exceptional collection of 15th-19th century Chinese paintings, landscape paintings by 19th-century Vermont artist Charles Louis Heyde, and drawings by the renowned American artist Thomas Eakins. Lectures, workshops, films, performances, and exhibition openings are held in conjunction with exhibitions and are free to UVM students, faculty, and staff.

The Fleming Museum provides access to the collections and exhibitions for study and research. Undergraduate and graduate students from the departments of art, history, English, education, and anthropology have assisted with the production of exhibitions, art classes for children, and community family day. Interns receive academic credit for their work. Over 40 work study students each semester work in the Museum in the areas of education, public relations and marketing, security, and exhibition design and construction.

Stocked with books, posters, and items related to the exhibitions, the Museum Store is an inviting resource at gift-giving time. The Fleming has more than 700 members, with a student membership category available.

**THEATRE**

The Royall Tyler Theatre is the home for the season of plays presented by the Department of Theatre. Our season is made up of three main stage productions, a holiday play for children, and an evening of one-act plays directed, performed, and designed entirely by students.

The Department of Theatre, in collaboration with the University Resident Theatre Association (URTA), brings professional guest artists — performers, directors, designers — to work side-by-side with students on our main stage productions.

The arts are vital to individuals as well as civilizations, and the Department presents the fruits of the artistic work of students and faculty alike. Within the context of a liberal arts college, the theatre program in the classroom and on the stage and public platform attempts to expose its audience to its theatrical heritage. A rich curriculum is enhanced by an adventurous production schedule. The Department also offers courses and activities in public speaking and debate, the excellence of which are nationally recognized. All members of the UVM community are encouraged to participate in these programs and to share the Department’s commitment to vital living theatre.

**MUSIC**

Opportunities for participation and appreciation are available for students with strong musical interests. The University Choir, Choral Union, and Catamount Singers are open by audition to students seeking participation in cho-
ral ensembles. The University Band, Jazz Band, Vermont Winds, Brass, Tuba, and Percussion ensembles, Trombone Choir, and University Orchestra provide performance opportunities for instrumentalists. All perform in various public presentations during the year. On occasion, the Choir and Choral Union have been invited to perform with the Vermont Symphony Orchestra; the University Pep Band performs at athletic events, and the Band mounts a spring tour. The University Orchestra presents several varied concerts of standard orchestral literature plus concertos featuring outstanding music students or combines forces with the vocal ensembles for presentation of major choral works.

In addition to the larger ensembles, faculty and senior recitals, special departmental concerts, and guest artists are scheduled throughout the school year. Individual instruction on all orchestral instruments, piano, organ, harpsichord, guitar, and voice may be arranged (contact the Music Department office for specific information).

The offices of the Music Department are located in the Music Building on Redstone Campus. An important feature of this facility is its beautiful recital hall, which houses the C.B. Fisk organ, one of the finest instruments in the Northeast. The Music Department serves as a showcase for the musical talents of the music majors and the faculty, as well as for those students seeking musical activity as a part of their extracurricular life on campus.

THE GEORGE BISHOP LANE ARTISTS’ SERIES

Established in 1955 with a generous gift from the Lane family, the Lane Series features a diverse season of performing arts events including classical music, early music, opera, theatre, jazz, and folk music. Each year brings a variety of artists – from established international favorites to promising new talent.

Serving as a link among many constituencies, the Lane Series finds its audience, volunteers, and advisors from the students, faculty, and staff of UVM as well as the community at large. In addition to the presentation of performances, the Lane Series ensures students and public direct interaction with performers through master classes, workshops, residencies, lectures, and receptions.

The offices of the Lane Series serve as advisors and volunteers many hours of service; corporate and private sponsors throughout the state provide financial support.

The Lane Series is a part of Continuing Education. The offices are located at 30 South Park Drive in Colchester, VT (802) 656-4455. Tickets are available by calling the Campus Ticket Store (802) 656-3085. The Lane Series offers $5 student rush tickets at the venue on the night of events.

LAWRENCE DEBATE UNION

The Lawrence Debate Union (LDU) provides an opportunity for interested students to participate in intercollegiate debating. LDU members attend debate tournaments throughout the nation, each year engaging in over 400 debates at more than a dozen tournaments. Competition of this caliber teaches skills of efficient research, rigorous thought, and effective communication. The program is designed to develop the abilities of both the experienced debater and the beginner. Outstanding performers receive recognition in the form of annual awards. The LDU sponsors a weekly television show (Flashpoint), the annual World Debate Institute Summer programs, and the world’s largest debate instruction website (http://debate.uvm.edu).

MORGAN HORSE FARM

The Morgan Horse Farm in Weybridge, Vermont, 35 miles south of the main campus, has been a shrine for Morgan horse lovers for more than a century. The Morgan breed dates back to 1789 when the first small but powerful stallion was born to a mare owned by school teacher Justin Morgan.

The Morgan Farm was established in 1878 by Joseph Battell of Middlebury who compiled the first volume of the Morgan Horse Registry and constructed the farm landmark, an ornate Victorian barn with mansard roof.

In 1907, Battell deeded the farm to the U.S. Government, which in 1951 turned the farm over to The University of Vermont.

The farm has become a laboratory for UVM students and the focal point for Morgan Horse lovers around the world. The farm continues to host thousands of visitors annually.

A versatile, highly intelligent horse, the Morgan is Vermont’s State Animal. The Morgan Horse Farm is conducting crucial research on reproductive physiology and the breeding program at the Morgan Farm has produced numerous blue ribbon winners at the National Morgan Horse Show.

HONORARY AND RECOGNITION SOCIETIES

Honorary and recognition societies at The University of Vermont recognize student contributions to the UVM community and their leadership in campus life.

University honorary societies include Boulder Society, which acknowledges outstanding senior men; and TOWERR, which acknowledges outstanding senior women.

National honorary societies represented on campus are as follows:

The Phi Beta Kappa Society established the Vermont Alpha Chapter at the University in 1848 and the local chapter was the first in Phi Beta Kappa to initiate women into membership. Initiates are chosen on the basis of high scholastic standing with emphasis on a broad distribution of liberal studies. This is interpreted to mean course work in all seven College of Arts and Sciences distribution categories including intermediate-level foreign language study. Membership criteria are published on the Web; interested students and advisors should consult the chapter president.

Mortar Board is a national society for senior women and men. Although membership in Mortar Board comes as a high honor for a UVM student in recognition of outstanding service, scholarship, and leadership, it is also a challenge for continued unselfish service in the best interests of the college campus.

Golden Key National Honor Society recognizes the top fifteen percent of juniors and seniors in all fields of study. The society emphasizes scholarship and community service.

The Society of the Sigma Xi, established in 1945, initiates those who have proven their ability to do research in one of the sciences, including students who have a high scholastic standing.

The alpha chapter of Nu Delta Epsilon was established at UVM in 1993. It is the first national honor society to recognize non-degree students who excel academically and exhibit a strong commitment to higher education and personal achievement.

Other national honorary societies include: Alpha Omega Alpha, medicine; Alpha Zeta, agriculture; Beta Gamma Sigma, business administration; Kappa Delta Pi, educa-
tion; Sigma Theta Tau, professional nursing; Tau Beta Pi, engineering; Omicron Nu, home economics; Delta Sigma Rho-Tau Kappa Alpha, debating; Phi Alpha Theta, history; Psi Chi, psychology; Eta Sigma Phi (Iota Chapter), classical studies; Alpha Kappa Delta, sociology; Sigma Phi Alpha, dental hygiene; Lambda Alpha, anthropology; Chi Epsilon, civil engineering; Xi Sigma Pi, forest resources; Ethan Allen Rifles, outstanding students in the Reserve Officers’ Training Corps; Champlain Sabres, a military fraternity; and Phi Eta Sigma, outstanding first-year students.

**ACCREDITATIONS**

The University of Vermont is accredited by the New England Association of Schools and Colleges, Inc., a nongovernmental, nationally-recognized organization whose affiliated institutes include elementary schools through collegiate institutions offering postgraduate instruction.

Accreditation of an institution by the New England Association indicates that it meets or exceeds criteria for the assessment of institutional quality periodically applied through a peer group review process. An accredited school or college is one which has available the necessary resources to achieve its stated purposes through appropriate educational programs, is substantially doing so, and gives reasonable evidence that it will continue to do so in the foreseeable future. Institutional integrity is also addressed through accreditation.

Accreditation by the New England Association is not partial but applied to the institution as a whole. As such, it is not a guarantee of the quality of every course or program offered or the competence of individual graduates. Rather, it provides reasonable assurance about the quality of opportunities available to students who attend the institution.

Inquiries regarding the status of an institution’s accreditation by the New England Association should be directed to the administrative staff of the University. Individuals may also contact the New England Association of Schools and Colleges, 209 Burlington Road, Bedford, MA 01730-1433, (781) 271-0022.

Specific academic program accreditations include:

**ALLIED HEALTH SCIENCES**

- Biomedical Technologies
  - Medical Laboratory Science—National Accrediting Agency for Clinical Laboratory Science
  - Nuclear Medicine Technology—Joint Review Committee on Educational Programs in Nuclear Medicine Technology
  - Dental Hygiene—American Dental Association
  - Physical Therapy—American Physical Therapy Association

**ARTS AND SCIENCES**

- Chemistry—American Chemical Society
- Speech-Language Pathology—American Speech-Language-Hearing Association
- Clinical Psychology—American Psychological Association

**BUSINESS ADMINISTRATION**

- American Assembly of Collegiate Schools of Business

**EDUCATION**

- Athletic Training Education Program—Commission on Accreditation of Allied Health Programs
- National Council for Accreditation of Teacher Education
- Social Work—Council on Social Work Education
- Teacher Education—Vermont Department of Education

**ENGINEERING AND MATHEMATICS**

- Engineering Programs (Mechanical, Electrical, Civil)—Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology, Inc.

**MEDICINE**

- Liaison Committee on Medical Education, American Medical Association-Association of American Medical Colleges

**NATURAL RESOURCES**

- Forestry—Society of American Foresters

**NURSING**

- National League for Nursing Accrediting Commission
Admission to the University

The University of Vermont selects those students who demonstrate the greatest potential for academic success at the University based on prior academic performance. Academic performance for all applicants will be measured based on the criteria outlined under “General Admissions Criteria.”

GENERAL ADMISSIONS CRITERIA

The University of Vermont selects those students who demonstrate the greatest potential for academic success at the University based on prior academic performance.

Recognizing the University’s focus on engagement with local, state, national and global communities, admission policies focus on achieving geographic balance; variety of experience and background; and cultural/economic diversity within the fabric of its student population. As a state-assisted university, The University of Vermont has a special commitment to Vermont residents, a commitment reflected by ensuring that Vermont students receive priority consideration in the admissions process. Our commitment to forging a diverse educational community is manifested in a special effort to recognize and meet the educational needs of members of ALANA (African American, Latino, Asian, and Native American) populations.

Determining potential for a student to benefit from a UVM education lies at the heart of the work of the University’s Office of Undergraduate Admission. This determination is based on a blending of the academic record with other attributes in a student’s background. A candidate for admission must demonstrate an ability to perform at a high level scholastically. For a first-year student, this is determined by performance in high school and on standardized examinations. Transfer and non-traditional candidates will be evaluated on the results of completed college-level course work, standing at previous institutions, and/or other educational credentials appropriate to student age and educational history. At a minimum, candidates for admission are expected to complete the entrance requirements established by the UVM faculty to ensure exposure to broad fields of intellectual inquiry; some programs require further study in areas relevant to professional development. Additionally, to form a comprehensive view of a student’s candidacy, University admission staff gauge the rigor of a student’s program by reviewing breadth of study and course levels (e.g. Honors and AP course work); measure the student’s relative standing in the graduating class through grade point average, class rank, or other indices; observe trends in the student’s performance over time; and assess the competitive nature of the high school and/or college environment. Standardized test scores are viewed as one of several indicators of student academic potential and not as a single criterion for admission to the University.

Beyond academic credentials, other characteristics and experiences in a student's background are reviewed in making an admission decision – particularly when the academic record in isolation is not decisive. Required student essays, recommendations, and other evidence of the student’s life experiences are examined to more fully understand the student’s potential to succeed and contribute at UVM. All achievements, both academic and non-academic, will be considered in the context of the opportunities an applicant has had, hardships or unusual circumstances faced, and the response to these. Evidence of special talents, community service, imagination and tenacity are also considered indicative of promise for future contributions to the life of the University and to its mission. Admission decisions are made without regard to family financial circumstances, although University financial aid and scholarship funding is deployed on the basis of academic merit as well as financial need.

Although University Admissions staff makes final admission decisions, consultation with academic unit representatives precedes any decision for a student whose credentials may not be clear and decisive. Admission policies are made by the Department of Admission in collaboration with the schools and colleges that constitute The University of Vermont and are subject to review by The University of Vermont Faculty Senate and the Board of Trustees.

Minimum Entrance Requirements

At a minimum, candidates for all majors at UVM are expected to have met the following requirements prior to entry.

<table>
<thead>
<tr>
<th>Requirement</th>
</tr>
</thead>
<tbody>
<tr>
<td>4 years of English</td>
</tr>
<tr>
<td>3 years of Mathematics (Algebra I, geometry, Algebra II, or equivalent courses)</td>
</tr>
<tr>
<td>3 years of social science</td>
</tr>
<tr>
<td>2 years of natural or physical science</td>
</tr>
<tr>
<td>2 years of the same foreign language</td>
</tr>
</tbody>
</table>

Course work not completed at the high school level may be fulfilled by equivalent college-level academic work.

In general, one semester of college work is considered the equivalent of one year of high school study.

Any exceptions to these requirements are made on a case-by-case basis.
Requirements and Recommendations by UVM College/School

Each of the University’s undergraduate colleges and schools reserves the right to set additional requirements for their majors and to recommend courses of study beyond the minimum presented below.

College of Agriculture & Life Sciences

**Required courses:** 1 year of biology and 1 year of chemistry for science majors

**Recommended:** All candidates to the College of Agriculture & Life Sciences are strongly encouraged to take 1 year of physics and at least 1 year of college preparatory math beyond Algebra II (calculus is preferred) in addition to biology and chemistry.

College of Arts & Sciences

**Recommended:** Candidates are evaluated on the breadth and depth of their academic record, and performance in courses across the span of liberal arts disciplines. Candidates are strongly encouraged to present 4 years of mathematics, including trigonometry and to continue foreign language study during their junior and senior years.

Business Administration

**Required:** 1 year of college preparatory mathematics (trigonometry or pre-calculus preferred) beyond Algebra II.

**Recommended:** Potential business students are strongly encouraged to enroll in science course work beyond the minimum requirement. Overall performance in mathematics courses is an important factor in the admissions decision.

College of Education & Social Services

**Recommended:** Candidates for the Human Development and Family Studies and Social Work programs are encouraged to complete 1 year of biology. Candidates in all teacher education programs are strongly encouraged to pursue mathematics and science course work beyond the minimum requirement.

Students applying to teacher licensure majors must present solid mathematics preparation for the PRAXIS teacher certification examinations.

College of Engineering & Mathematics

**Required:** 1 year of chemistry and 1 year of physics for all majors.

4 years of mathematics is required including trigonometry.

For majors in Computer Science Information Systems, 1 year of college preparatory/advanced math beyond Algebra II.

**Recommended:** Candidates to Electrical, Civil, and Mechanical Engineering should present a strong mathematics and science background, including trigonometry and advanced algebra.

Mathematics background and performance is a critical factor in the admission of students to the Computer Science Information Systems, Statistics, Engineering Management, and Mathematics majors.

School of Natural Resources

**Required:** 1 year of biology as part of the science requirement

**Recommended:** Students applying to the School of Natural Resources are urged to present a fourth year of college preparatory math and to continue taking science courses.

College of Nursing and Health Sciences

**Required:** For Biomedical Technologies majors: 1 year of biology and 1 year of chemistry; 4 years of math, including trigonometry.

**Recommended:** For all candidates to the College of Nursing and Health Sciences, including transfer students: proficiency in physics, biology, chemistry, and mathematics through trigonometry.

Application Deadlines, Notification Dates, and Enrollment Deadlines

(The deadlines noted below are postmark dates)

**Spring Semester**

**November 1** – First-year, Transfer, and Evening University candidates. Notification is on a rolling basis no later than the end of December. Payment of a $300 acceptance fee as proof of intention to enroll is generally due 20 days beyond the date of the letter of admission or by a date printed in the application materials.

**Fall Semester**

**November 1** - Early Action and Early Decision deadline for first-year candidates only. Notification is in late December.

Candidates admitted under Early Decision must pay a $300 acceptance fee as proof of intention to enroll by January 15.

Early Action candidates have until May 1 to pay the fee.

**January 15** – Regular First-Year candidates. Notification is in late March. A $300 acceptance fee is due May 1 as proof of intention to enroll.

**April 1** – Transfer and Evening University candidates. Notification is on a rolling basis no later than the middle of May (assuming the candidate provides all supporting materials in a timely fashion).

Please contact the Admissions Office regarding submission of applications beyond the stated deadline. Requests will be considered on a case-by-case, space available basis.

International students should adhere to all application deadlines. Notification is on a rolling basis.

Candidates to the RN/BSN should contact the School of Nursing to obtain an application; admission to this program is on a rolling basis.

Application and Supporting Materials

To review an application and render a decision, the Admissions Office must receive the following by the appropriate deadlines:

- **The Application for Admission** completed and signed by the student. Use of one of the electronic options available on the web at www.uvm.edu/admissions is encouraged. Candidates may also use the Common Application, available online at www.commonapplication.org or from a local high school guidance department. If using the Common Application, please complete the supplemental form required by UVM.

- **A non-refundable $45 application fee** to the University of Vermont via check or money order or credit card (see the form bound into the Application for Admission). For candidates for whom the fee poses a financial hardship, fee waivers are available from a guidance counselor, another person familiar with the financial situation, or from the Admissions Office.

- **Official transcripts** from all secondary and (for transfer students) postsecondary course work. Candidates may not ignore any previous academic work and are expected to provide a full, accurate accounting of the academic record. Only transcripts forwarded from the issuing agency are considered official.
• Standardized testing results  (First-Year Candidates only)
  The University requires first-year candidates to submit results from either the Scholastic Assessment Test (SAT I) or ACT from the American College Testing Program. UVM’s code for the SAT I is 3290 and 4322 for the ACT. For further information regarding these tests, contact a high school guidance office or go directly to the following web sites: www.collegeboard.org or www.act.org.

• Letter of recommendation  All candidates must present at least one letter of recommendation. First-year students are encouraged to obtain a recommendation from either a guidance counselor or current teacher. Additional letters are welcome.

• Essays  UVM requires one extended essay as part of the admissions process.

• Music Majors  Candidates for the Bachelor of Music, Bachelor of Arts in Music, and Bachelor of Music Education must contact the Music Department at 802 656-3040 to arrange for an audition or to submit an audition tape before the application deadline. Tapes become property of UVM and will not be returned.

Matriculation Status

The Admissions Office requires proof of high school graduation or equivalent for all candidates entering degree programs at UVM.

High school graduates must submit a final high school transcript. Recipients of the General Education Development (GED) Certificate should have an official score report forwarded to the Admissions Office in addition to official transcripts of any previous high school or college-level work completed.

The University of Vermont welcomes applications from students who plan to complete high school in three years, provided all entrance requirements and other admissions criteria have been met. Three-year graduates are asked to submit written proof of support from the high school indicating that the school district has approved early graduation and is prepared to issue a diploma.

UVM welcomes applications from home-schooled students. Students are required to meet all the entrance requirements outlined in this catalogue, to submit standardized test results (First-Year candidates only), to document academic work covered by the curriculum, and provide proof of graduation. Home-schooled students must supply the Admissions Office with a copy of the information forwarded by the teacher to the state education department. If entrance requirements cannot be determined from this information, the teacher will be contacted to confirm completion. Official college transcripts are required for any college-level course work. CLEP (College Level Examination Program) results may be used to demonstrate background in required areas. An official transcript of any course work taken at a local high school is also required.

Acceptable Proof of Graduation:

  • High School Diploma (Some home-schooled students receive a diploma from their area secondary school.)
  • General Education Development (GED) certificates and state certificates
  • A Certificate of Completion of a home-study program if the program is recognized by the student’s home state.
  • For transfer students only: If a formerly home-schooled student has completed two years of college course work comparable to UVM course work and has met all entrance requirements, no proof of graduation is required.

ADMISSIONS PROGRAMS

Early Decision  is a program open to first-year candidates who have identified UVM as their first choice. Applications for the fall are due in the Admissions Office by November 1 and notification is in late December. Candidates admitted under Early Decision commit themselves to attending the University and are required to pay the Acceptance Fee and Advance Tuition Deposit by January 15. Withdrawal from the Early Decision contract is possible only if a proposed financial aid award is inadequate.

Candidates denied under Early Decision may not reapply for the fall semester.

Early Action  Students applying for first-year status who wish to learn of their admission decision by late December may apply by November 1 under the Early Action program. Candidates admitted under Early Action have until May 1 to pay an Acceptance Fee and Advance Tuition Deposit and are not making a commitment to attend the University.

Early Action applicants are offered admission if their academic records are very strong. Some Early Action candidates will be deferred until the Admissions Office has reviewed all first-year applicants for fall admission. A small number of candidates will learn in late December that they have been denied admission.

For new students, some scholarship preference will be given to those students applying under Early Decision or Early Action programs.

New England Regional Student Program  The University of Vermont participates with the other public two- and four-year institutions of higher education in the six New England states in the New England Regional Student Program, an option aimed at increasing educational opportunities for the region’s students.

New England residents who enroll in UVM programs open to them under the New England Regional Student Program are charged 150 percent of in-state tuition.

UVM programs offered for the 2002-03 academic year are:

  • Botany to residents of MA;
  • Canadian Studies to residents of CT, MA, NH, and RI;
  • Classical Languages (Greek and Latin) to residents of CT and RI;
  • Forestry to residents of CT and RI;
  • Latin to residents of CT and RI;
  • Russian to residents of CT, ME and RI.

For a full listing of programs and policies, contact the New England Board of Higher Education, 45 Temple Place, Boston, MA 02111, (617) 357-9020.

Guaranteed Admission Program (GAP)  The Guaranteed Admission Program provides an avenue of entry to the University of Vermont for students who are not yet ready to enter an undergraduate degree program. The Guaranteed Admission Program provides advising services and guarantees admission after successful completion of approved academic credit courses taken through Continuing Education. The program is administered cooperatively by Continuing Education, Undergraduate Admissions, and the deans’ offices of the colleges and schools within UVM.

To qualify for the Guaranteed Admission Program students must have a high school diploma or GED. Students will complete a minimum of 18 semester credits in ap-
proved courses as well as courses for the proposed major and general education requirements. Any admissions requirements lacking from high school must also be completed. A grade point average of 3.0 must be maintained. Students in the program have the option of applying for admission at any time as regular applicants. Admission is only guaranteed, however, to those students who have successfully completed their contract course work. Please refer to admission deadlines.

A few majors may have additional restrictions or may not be accessible through the Guaranteed Admission Program. Please contact the Office of Undergraduate Admissions or Continuing Education for a list of these programs.

Students should call the Continuing Education Office at (802) 656-2085 or (800) 639-3210 to schedule an appointment with an advisor. A high school transcript as well as a transcript for any previous college work should be provided at the appointment.

The advisor will discuss the program and begin the process of determining the courses needed to complete the contract. If a student has earned previous credits, a copy of his/her transcripts will be forwarded to the Office of Transfer Affairs to determine which courses will transfer to UVM upon admission.

UVM Evening University Students can enter a baccalaureate program in any of six majors by taking classes which start after 4:00 p.m.

Students may earn a degree in Art (Studio Concentration), English, Psychology, Mathematics, and Sociology. A minor in Women’s Studies is also available. An Evening University student earns the same degree as any other baccalaureate candidate who attends UVM.

The UVM Evening University is backed by evening support services for students, including advising, registration, information about financial aid, and other administrative services. Evening University students can access these services through the Continuing Education Student Services Office from 8:00 a.m. until 5:00 p.m. Monday through Thursday, and from 8:00 a.m. to 4:30 p.m. on Friday.

The application deadline for the fall semester is April 1. For the spring semester the deadline is November 1.

UVM College of Agriculture and Life Sciences/Tufts University School of Veterinary Medicine B.S./D.V.M. Program

First-time, first-year candidates who meet rigorous eligibility criteria may apply for admission to the seven-year Bachelor of Science/Doctor of Veterinary Medicine program offered jointly by UVM’s College of Agriculture and Life Sciences and the Tufts University School of Veterinary Medicine. Students accepted in the program will complete three years of study (approximately 90 credit hours) at UVM with a major in either Animal Sciences or Biological Sciences. A grade-point average of 3.25 must be maintained at UVM to guarantee entry to the Tufts University D.V.M. program. After successful completion of the first year in the Doctor of Veterinary Medicine program, candidates are awarded the Bachelor of Science degree from The University of Vermont.

If accepted into the joint program, students may elect to attend Tufts, may continue for a fourth year at UVM and graduate before entering the Tufts University School of Veterinary Medicine, or they may elect to take a year off before entering Tufts.

Students must apply to UVM by January 15 and the B.S./D.V.M. program by February 1. Both applications should be sent to the Admissions Office at UVM. The fee for filing a University of Vermont application is $45; there is a fee of $60 for filing the Tufts University application.

Candidates are screened initially by the UVM Admissions Office. The documents of those applicants considered admissible to UVM are then forwarded to the Tufts University School of Veterinary Medicine for review. Tufts University shares its decisions with the Admissions Office at UVM. UVM notifies candidates of their status at both institutions. Due to the timing of these processes, candidates may learn of admissions decisions from UVM before learning of their status at Tufts. Candidates will learn of their status at both institutions by April 1.

Spaces in the Tufts University School of Veterinary Medicine are limited. Thus an excellent student may gain admission to UVM but be denied admission to the Tufts University School of Veterinary Medicine. A student in this situation may still complete a preveterinary program at The University of Vermont and apply for admission to veterinary schools, including the Tufts University School of Veterinary Medicine, upon graduation from UVM.

For information regarding admission to UVM’s College of Agriculture and Life Sciences, please consult information contained in that section of the UVM Catalogue and in the UVM Viewbook. Successful candidates to this program should present:

1. An excellent background in high school biology, chemistry, and mathematics. Course work in AP Biology, AP Chemistry, and AB Calculus is encouraged.
2. Standardized test scores at or above the 80th percentile nationally.
3. A high school class rank in the top ten percent where class rank is available. Candidates attending schools where rank is not computed must demonstrate a high level of academic achievement.
4. Some appropriate animal and/or veterinary experience.

To receive a UVM/Tufts University application packet, please contact the Admissions Office, University of Vermont, 194 South Prospect Street, Burlington, VT 05401-3596 (802) 656-3370.

For information about University of Vermont course work for the joint UVM/Tufts University Program, please consult the College of Agriculture and Life Sciences section of the catalogue.

TRANSFER STUDENT ADMISSIONS

The University welcomes applicants who have demonstrated success at other institutions of higher education and who have met all University-wide entrance requirements either in high school or in college. For the purpose of admission, a transfer candidate is one who has taken college-level courses for credit after completion of secondary school.

Residents of Vermont receive preference in transfer admission. Out-of-state residents are admitted on a space-available, competitive basis.

In making transfer admission decisions, the Admissions Office reviews all academic information available: official transcripts of all college-level work and the high school record (or General Education Development Certificate). Submission of standardized test scores such as the SAT I or the ACT is optional for transfer candidates. If submitted, test scores may help in making an admission decision.

Transfer candidates are subject to the minimum entrance requirements outlined for first-year candidates. Any entrance requirement not fulfilled in high school can be met by an equivalent semester-long college course.
For transfer candidates who have earned under 30 college-level credits, the quality of the high school record remains an important evaluation tool. After 30 earned credit hours, the college grade-point average and course selection are the most important factors in a decision. The Admissions Office still needs to see the high school record to determine if all University-wide entrance requirements have been met.

The minimum grade point average requirement for all transfer candidates is a 2.5 (C+) average on a four-point scale. Generally, to be competitive a 3.0 average or above is recommended.

**Transfer Credit Policy**

The Office of Transfer Affairs reviews each college-level course taken by transfer candidates accepted for admission. A written evaluation is sent to each transfer candidate indicating the status of each course. To receive transfer credit, a course must have been taken at an accredited college or university for credit; it must be comparable in content, nature, and intensity to a course offered at UVM; and the grade earned must be comparable to a “C” or higher as indicated on an official transcript. The dean of the college or school determines the applicability of the transfer course(s) to the student’s degree requirements at the University.

All transfer credit remains provisional until the transfer student successfully completes one semester of coursework as a degree student at UVM. The UVM grade-point average reflects only course work taken here. Grades from other institutions are not calculated into the UVM GPA and will not appear on a UVM transcript.

Credit through the Advanced Placement Program (AP) of the College Board is granted as a specific university course, or courses, with scores of 4 or 5. Scores of 3 are acceptable for some exams. Official AP score reports must be sent directly to the Office of Transfer Affairs. AP course equivalencies are determined by the faculty of the corresponding subject area and are awarded by the Office of Transfer Affairs. AP credit is assigned a UVM course equivalency and applicability to the degree program is determined by the student’s dean’s office.

Courses taken on a college or university campus while a student is still in high school may be eligible for transfer credit. Students should contact the Office of Transfer Affairs for assistance in determining transferability of these courses.

College-level courses taken through high school cooperatives, such as Syracuse Project Advance (SUPA), do not transfer to UVM. Students who participate in high school cooperative programs and wish to pursue credit must take a nationally-standardized examination to demonstrate college-level subject mastery. Advanced Placement Examinations (AP), which can be taken while still in high school, or College Level Examination Placement (CLEP), would serve as recognized standardized examinations. A third option is the UVM Credit by Exam. Contact the Office of Transfer Affairs to see what specific subject areas are covered by these exams.

Further questions regarding transfer credit should be addressed to the Office of Transfer Affairs, 360 Waterman Building, University of Vermont, Burlington, VT 05405.

**INTERNATIONAL STUDENT ADMISSIONS**

The University welcomes the applications of international students.

**Academic Documents**

International applicants must submit official transcripts of all secondary and postsecondary education, including final examination results. If documents are not in English, certified translations are required. Information regarding certified translation services can be obtained at the applicant’s embassy or through NAFSA: the Association of International Educators, 1875 Connecticut Ave., NW, Suite 100, Washington, DC 20009-5728, (202) 462-4811; www.nafsa.org.

**Transfer Credit for International Students**

International students who have attended postsecondary institutions in their home country may be eligible for UVM credit under the Transfer Credit Policy guidelines. International students should submit comprehensive course descriptions and outlines, translated in English, to the Office of Transfer Affairs, 360 Waterman Building, Burlington, VT 05405, USA. Submission of these materials prior to enrollment helps the Office of Transfer Affairs prepare a full credit evaluation prior to enrollment at UVM. All translations must be certified by the school of record, or by an official government translation agency with the seal of the college over the translation. Translations must accompany all original documentation.

**Standardized Tests**

Students applying as first-year candidates must present scores from either the Scholastic Assessment Test (SAT I) or the American College Testing Program (ACT). If English is not the first language, the Test of English as a Foreign Language (TOEFL) is also required. Because the University does not offer an intensive English as a Second Language (ESL) program, the Admissions Office requires a minimum TOEFL test score of 550 (213 on the computer version). For information about test dates and sites for SAT and TOEFL exams, contact the Educational Testing Service in Princeton, NJ (609) 771-7100; www.ets.org.

**English as a Second Language (ESL) Programs**

The University of Vermont offers a few English-as-a-Second-Language courses intended to ease the transition to studying and living in an English-speaking environment. Interested students with TOEFL scores below the recommended minimum may want to consider transferring to the University of Vermont after studying at a U.S. college or university that offers intensive ESL preparation, although UVM will consider candidates on a case-by-case basis.

The ESL intensive program located the closest to the University of Vermont is at Saint Michael’s College, an accredited institution of higher learning in nearby Winoooski, Vermont. For full information about Saint Michael’s College, write to the School for International Studies, Saint Michael’s College, Winoooski, VT 05404 (USA Telephone: 802 654-2000, extension 2300; Telex 51092990013, VT, SMC WINO).

For further information concerning available programs, contact: NAFSA: Association of International Educators, 1875 Connecticut Ave. NW, Suite 100, Washington, DC 20009-5728; www.nafsa.org.

**Financial Support for International Students**

The University offers a few partial tuition scholarships to international students each year. Most international students pay the full cost of attending UVM; and those attending on nonimmigrant student visas are charged out-of-state tuition rates. All international students are considered; no additional application is required. These are merit-based scholarships.

**Form I-20**

The I-20 document is used to obtain a student visa and can only be issued when the student provides certification that sufficient financial support is available to cover educational expenses for the duration of stay in the U.S.
Two pieces of information are required for financial certification:
1. A letter or statement from the bank (or supporting agency) indicating an exact currency amount and its U.S. dollar equivalent that demonstrates the availability of adequate funding for at least the first year of studies.
2. A signed letter from the sponsor (family member or agency) indicating that the funds in that bank account will be used to support educational expenses at the University of Vermont. For more information, contact Sarah Strouse, Office of International Education, L/L, B-161, Faculty Box 8, Burlington, VT 05405. Phone: (802) 656-4296. Fax: (802) 656-8553. E-mail: strouse@zoo.uvm.edu; www.uvm.edu/~oies.

Graduate Study at the University of Vermont International students interested in pursuing a graduate degree at the University of Vermont should contact: Graduate College Admissions Office, Waterman Building, University of Vermont, Burlington, VT 05405, (802) 656-3160.

NONTRADITIONAL STUDENT ADMISSIONS
The Admissions Office recognizes that candidates who have been out of formal schooling for a period of five years or more have life experiences that are different from traditional-age students.

While nontraditional candidates are expected to present strong academic credentials for admission, they can write to the Admissions Office to request a waiver of the standardized test score requirement, may adjust application essays to reflect their experiences, and may substitute a letter of recommendation from an employer or friend in lieu of the guidance counselor recommendation.

As with every applicant for admission, however, nontraditional candidates are required to present official documents of all academic work, including high school transcript and/or General Education Development certificate (GED). The Admissions Office looks for previous academic performance that would predict success at the University. Nontraditional applicants who are missing one or two requirements are reviewed on a case-by-case basis; if a record is otherwise acceptable, the Admissions Office may offer admission with a clause requiring completion of missing requirements prior to enrollment or concurrent with the UVM degree program. UVM does not grant college credit through portfolio assessment. Nontraditional candidates may explore credit options through the College Level Examination Program (CLEP) or through UVM’s Credit by Examination.

Reapplying to the University
Applicants denied admission for a given semester may reapply for the following semester. Anyone reapplying must re-submit an application form, update any academic information, and send the appropriate application fee. Essays may be adjusted to reflect applicant’s recent activities. These individuals should contact the Admissions Office to discuss academic work that would improve their chances for admission.

Under certain conditions, candidates offered admission who choose not to attend in a given semester can defer entry for up to two semesters with permission of the Admissions Office. After that period or if the admitted candidate failed to request deferred admission, another application and fee must be filed for review by the Admissions Office.

Former degree students at the University of Vermont who withdrew for any reason must see the dean of his/her former UVM college or school to request re-entry. The Admissions Office does not readmit former degree students.

RESIDENCY REGULATIONS
In-State Status Regulation
The Vermont Legislature has established a lower rate of tuition for students who are Vermont residents. These regulations define eligibility requirements for in-state status classification. All students at the University of Vermont shall be assigned an in-state or out-of-state status classification consistent with these regulations. Vermont domicile must be established for a student to be eligible for in-state status. Please refer to the following page for more information: www.uvm.edu/~uvmppg/ppg/student/regulation.html.

ARTICULATION AGREEMENTS
Community College of Vermont/University of Vermont
CCV/College of Arts and Sciences
Students who have completed an associate’s degree at the Community College of Vermont can be accepted to the University of Vermont’s College of Arts and Sciences under the following conditions:
- Students must complete a minimum of 60 transferable academic credits pre-approved by UVM’s Office of Transfer Affairs.
- Students must present a CCV grade-point average of 2.5 (on a 4.0 scale) or better.
- Candidates for the Articulation Agreement must meet UVM’s minimum entrance requirements prior to CCV graduation.
- CCV students must initiate their degree program at UVM within two years of completing the CCV associate’s degree.
- While at CCV interested students must sign a letter of intent to enroll at UVM.

CCV/College of Education and Social Services
Students who have completed a minimum of 30 transferable credits based on the transfer credit policy of the University of Vermont can be accepted into the College of Education and Social Services. The agreement includes the programs in Human Development and Family Studies, Social Work, Teacher Education programs in Art, Early Childhood Education, and Secondary Education.
- This agreement became effective in Fall 2001.
- Students must present a CCV grade point average of 2.5 (on a 4.0 scale) or better.
- Candidates must meet UVM’s minimum entrance requirements or have prior approval from the College of Education and Social Services.
- To be eligible under the terms of the Articulation Agreement, CCV students must initiate their degree program at UVM within two years of completion of their courses at CCV. Faculty at both institutions will
cooperatively certify students as eligible under the terms of the agreement.

- Co-advisement by the appropriate CESS and CCV advisors is essential. Through co-advisement, CCV students may gain secure permission to enroll in beginning-level CESS courses at UVM while enrolled at CCV.
- While at CCV, interested students must sign a letter of intent to enroll at UVM.

**The Process Starts at CCV** Current or prospective CCV students interested in this option should meet with a CCV advisor early in their college career to develop an Articulation Plan that outlines course work and ensures completion of any UVM requirements in English, foreign language, mathematics, science, and social sciences. At this time, students will provide transcripts of all previous academic work. This allows the CCV advisor to review the record and assess UVM entrance requirements and CCV course placement.

**Admissions Process at UVM** CCV Articulation candidates are encouraged to meet with a transfer counselor in the UVM Admissions Office to ensure course transferability. Candidates are asked to submit a completed Application for Admission and all financial aid forms by the stated UVM deadlines.

CCV students who have signed the Articulation Agreement do not pay UVM’s application fee. Articulation candidates should include a brief statement in the UVM Application for Admission indicating they are applying under this option.

Candidates for UVM admission must submit official copies of all college course work attempted for credit, including the Community College of Vermont transcript. An official high school transcript is required only for candidates who must prove completion of all UVM entrance requirements prior to CCV entry.

UVM Admissions will review articulation student applications for the minimum GPA and entrance requirements. Offers of admission will be sent to those meeting the established criteria. To become a matriculated student at UVM, CCV articulation students must pay an acceptance fee/advance tuition deposit by a date stipulated in the admission letter.

Candidates whose GPAs fall below the minimum will be reviewed by UVM on a case-by-case basis. Those denied acceptance are encouraged to meet with a transfer counselor at UVM to review future options.

**For more information:** For a current list of transferable CCV courses and UVM equivalents, contact a CCV Advisor or a Transfer Advisor in UVM’s Office of Admissions.

Recipients of a CCV associate’s degree prior to 1999 may contact the UVM transfer advisors for general transfer information.

CCV graduates interested in UVM programs outside the College of Arts and Sciences and the College of Education and Social Services are encouraged to meet with a UVM transfer counselor to discuss their academic history and potential for transfer admission.

**New Hampshire Community Technical College of Claremont/Nashua/University of Vermont School of Nursing RN-BS-MS Program**

Students who have completed the two-year Associate Degree in Nursing at NHCTC with a minimum of 62 semester hours of credit will be guaranteed admission to UVM’s School of Nursing under the following conditions:

- Students must have a 2.5 (on a 4.0 scale) cumulative grade point average or better.
- Students must meet the School of Nursing’s entrance requirements prior to graduation from NHCTC.
- To be eligible under this agreement, students must initiate their degree at UVM within two years of graduation from NHCTC.
- Candidates applying to the University of Vermont under this agreement do not pay the application fee.
- All students who do not meet the above conditions can apply for transfer admission and be reviewed on a case-by-case basis.

For more information about this agreement and course equivalencies, please contact the UVM School of Nursing at 802-656-3830.

**St. Michael’s College and UVM Articulation Agreement**

St. Michael’s College (SMC) and the University of Vermont in the fall of 1994 established an articulation agreement for a Dual Degree Program in Engineering (“the Program”). This agreement guarantees students who meet specified criteria admission to a prescribed program of study in engineering at UVM. Upon successful completion of the Program and degree requirements, students receive a Bachelor of Arts or Bachelor of Science degree from SMC and a Bachelor of Science degree in the appropriate engineering area from UVM. **Students will normally complete the Program in five years.**

The academic advising, admission, transfer of credits, enrollment, and monetary conditions in this agreement applicable to students will be carried out in accordance with the following policies and procedures.

1. Initial application to the Program will be made to SMC.
2. Students will enroll in the Program by declaring a pre-engineering major at the time of admission to SMC to permit them to complete all prerequisites in a reasonable time (see SMC catalogue for pre-engineering program).
3. Students may register for any of the options in the Civil, Electrical, or Mechanical Engineering programs.
4. Students enrolling under this Program will be considered SMC students throughout the duration of the Program. Once admitted to UVM according to the policies of this Agreement, they also become UVM students for the remainder of the Program.
5. For the first three years the host institution for students in the Program will be SMC, and for the last two years the host institution will be UVM. Tuition and fees will be paid to the host institution according to its normal policies (including residence status, financial aid, etc.) Tuition for courses taken at the other institution will be paid by the host institution transferring funds based on an agreed upon amount per credit hour.
6. While students are enrolled at a host institution they will be independently responsible for appropriate fees at the other institution on a per use basis.
7. Students in the Program will make a formal application to UVM by April 1 in the spring semester of their third year at SMC. Interested students should contact the pre-engineering advisor at SMC by November of the third year for information about the application process.
8. Students will matriculate at UVM and will be accepted to the appropriate engineering program at UVM once they have met the following requirements: (a) completion of at least 60 credits at SMC with an overall minimum GPA of 3.0 (only grades of C of above will count towards the 60 credits); (b) completion of Part I of the required pre-engineering courses at SMC, as specified in the Agreement (see SMC catalogue); and (c) comple-
All students who do not meet the above conditions

For acceptance, students must meet the following requirements for both programs.

- Students must have a grade point average of 3.0 (on a 4.0 scale) or better.
- Students must meet the minimum entrance requirements for the University of Vermont.
- To be eligible under the articulation agreement, Union County CC students must initiate their degree program at UVM within two years of completing the Union County CC degree.
- Candidates applying to the University of Vermont under this agreement do not pay the application fee.
- All students who do not meet the above conditions can apply for transfer admission and be reviewed on a case-by-case basis.

For more information about this agreement and course equivalencies, please contact the agreement coordinator in the College of Agriculture and Life Sciences at 802-656-1397.

**ADMITTED STUDENT INFORMATION**

**Acceptance Fee and Advance Tuition Deposits** To reserve a space in the class or semester admitted, students should send the Admissions Office an acceptance fee and advance tuition deposit for $300 made payable to The University of Vermont.

First-time first- and second-year students are required to live in on-campus housing. Students admitted under Early Decision commit to attending UVM and must pay the tuition deposit by January 15. Transfer candidates and all candidates admitted for the spring semester will have a payment deadline printed with their acceptance materials. Housing is not guaranteed for transfer students.

A full refund of the acceptance fee and advance tuition deposit can be requested up to the payment deadline. After the payment deadline and up until the first day of classes, $100 of the payment is refundable.

**Orientation** All entering first-year students are required to attend a two-day orientation session in June. At Orientation, new UVM students meet with a faculty advisor, select their first semester classes, and learn about living options in the residence halls. Information packets are mailed to incoming students’ home addresses once they pay the acceptance fee and advance tuition deposit. Transfer students attend a session just prior to the beginning of the fall semester.

Transfer or first-year students entering in the spring semester receive information about a special spring orientation session once they pay the deposit.

**Housing** First-year and second-year students are required to live in on-campus housing. Entering students explore living options at orientation and are allowed to list residence hall preferences. The Department of Residential Life mails room assignments prior to the beginning of each semester.

**Class Registration** The academic advisor at Orientation helps prepare the first semester class schedule. First-year students entering fall semester register for classes at June Orientation. First-year students entering in the spring and transfer students entering either semester meet with an academic advisor at an Orientation session and may need to formally register for classes at that time.

**Immunization and health history forms** are sent directly to newly-admitted students and are due in the Center for Health and Wellbeing – Student Health/Medical Clinic by June 30 of the year of entry. Vermont state law requires proof of two doses of live measles vaccine after the student’s first birthday.
Student Expenses

The student expenses outlined in the following paragraphs are anticipated charges for the academic year 2002-03. Changing costs may require adjustment of these charges before the beginning of the fall semester. Please refer to our web page for current information: http://www.uvm.edu/~studentfinances.

UNDERGRADUATE TUITION AND FEES

APPLICATION FEE
A nonrefundable application fee of $45 is charged each applicant for admission to a University degree program.

ACCEPTANCE FEE AND ADVANCED TUITION PAYMENT
All new undergraduate applicants who have been accepted by the University are required to pay $300 in order to reserve a place in the next enrolling class. Regular first-year students accepted for the fall semester must pay the deposit by May 1. Most transfer students admitted for the fall must pay the deposit within two weeks of the offer of admission. Students admitted in January for the spring semester may have less than two weeks in which to pay the deposit. A portion of the fee is for initial advising, selection of courses, and personal orientation to the campus, a requirement for all incoming undergraduate degree students. The remainder will be applied to the initial semester’s tuition bill.

If a newly admitted student who has paid the required deposit subsequently chooses not to attend the University, the student will receive a $100 refund if the University is notified in writing prior to the beginning of the semester for which the student was admitted. If the University is notified after the beginning of the semester, the entire deposit is forfeited.

ESTIMATED YEARLY EXPENSES
Listed below are estimated expenses (excluding transportation, laundry, and spending money) based on the regular tuition for undergraduate students followed by an explanation of these charges.

Note: Students and families who are borrowing funds for educational purposes may have additional expenses, such as loan origination fees.

TUITION
Vermont Residents: $347 per credit hour through 11.5 hours. From 12-18 credit hours — $4,160 per semester plus $347 per credit hour for each hour in excess of 18 hours.

Nonresidents: $867.00 per credit hour through 11.5 hours. From 12-18 credit hours — $10,405 per semester plus $867.00 per credit hour for each hour in excess of 18 hours.

Note: Courses taken for audit are also included in determining the number of credit hours for which a student is billed.

HOUSING CHARGES

Room and Board: All housing agreements include both room and board and are legally binding for the nine-month academic year. Each occupant is liable for the yearly rent, one half to be paid each semester.

The University meal plan offers several options. Payment for the plan selected is made in two equal installments paid at the beginning of a semester. The University’s food service system includes not only dining halls but also the various campus snack bars, restaurants, and grocery stores.

Questions regarding food services should be directed to the University Dining Services/Marriott, Robinson Hall, Redstone Campus.

Students not required to live on campus who wish to cancel a housing agreement must do so in writing. Students cancelling before July 1 will be assessed a $50 penalty and from July 1, but before September 2002, a $150 penalty. Unless specifically authorized by the Office of Residential Life, no room cancellations will be honored after the beginning of the fall semester.

COMPREHENSIVE STUDENT FEE

This fee is used to cover the operating, capital costs, and improvements of the Library, Student Center, Athletic Complex, Center for Health and Wellbeing, and Campus Transportation services.

INTER-RESIDENCE ASSOCIATION (IRA) FEE

A $20 per year ($10 per semester) fee is charged to each resident to be used for activities within the residence hall system.

STUDENT INSURANCE (Optional)

Students have the option of purchasing a Student Accident and Sickness Insurance Policy through the University. This policy provides coverage for many services not included in the health fee as well as hospitalization benefits. To participate in this program, the student must pay a modest annual premium plus the health fee for the two semesters of the academic year. Students not covered by the health insurance policy of a parent, guardian, or spouse must purchase the Student Accident and Sickness Insurance Policy.
STUDENT GOVERNMENT ASSOCIATION FEE

Undergraduate degree students enrolled in four or more credit hours are charged a fee of $100 per year ($50 per semester). This fee is allocated by the Student Government Association toward the support of student organizations and student activities.

FEES FOR PART-TIME STUDENTS

A comprehensive fee is charged to all part-time students enrolled in four but less than 12 credit hours in a semester, as follows:

<table>
<thead>
<tr>
<th>Hours Enrolled</th>
<th>Fee</th>
</tr>
</thead>
<tbody>
<tr>
<td>4</td>
<td>$58</td>
</tr>
<tr>

<td>86</td>
</tr>
<tr>
<td>8</td>
<td>96</td>
</tr>
<tr>
<td>9 to 11.5</td>
<td>104</td>
</tr>
</tbody>
</table>

All undergraduate degree students enrolled in four or more credit hours in a semester pay the full Student Government Association fee.

BOOKS AND SUPPLIES

The estimated yearly cost of books and supplies at $670 is a low average. Some particular curricula may require one-time purchases which will change this amount.

Students in the College of Engineering and Mathematics and School of Business Administration should add about $100 for computer software to their estimated yearly costs for books and supplies.

Dental Hygiene students should add approximately $1,500 for an instrument kit and clinical attire in the first year that will be collected during the first week of the fall semester.

Physical Therapy students will be responsible for the cost of medically-required vaccinations, transportation, and living expenses (including room and board) during clinical affiliation periods. All Physical Therapy students are required to carry professional liability insurance prior to enrolling in the clinical experience.

Nuclear Medicine Technology and Radiation Therapy students should add about $85 for lab coats and other related expenses.

Professional Nursing students should add about $250 for clinical attire, professional liability insurance, health screening, vaccinations, and other related expenses in the second semester of the sophomore year and about $300 in the beginning of the junior year.

Students enrolled in art courses should expect to incur a lab or materials cost roughly equivalent to the cost of books in other courses. In certain courses, instructional materials are purchased in bulk by the department and costs are prorated among students at a far lower rate than if they were purchased individually.

OPTIONAL FEES

Locker-Towel Fee

All students enrolled in physical education activity courses and others who wish to have an assigned locker must pay a locker-towel fee each year or any portion thereof. This fee provides a locker and a clean towel after each use of the gymnasium facility.

UNIQUE FEES

College of Engineering and Mathematics and School of Business Administration

All new first-year and transfer students entering programs in the College of Engineering and Mathematics and the School of Business Administration are required to purchase a microcomputer. Details on the costs and the machine specifications are provided to the student at the time of admission. Students eligible for financial aid can have the cost of the microcomputer acquisition and maintenance built into their financial aid package.

Credit by Examination

A fee of $50 per credit hour will be charged for administration of special tests in areas for which academic credit may be received. This fee must be paid in advance.

Fees for Courses in Music Performance Study

Private instrumental and voice lessons, group voice classes, and group beginning piano classes are available each semester. Private lessons are one-half hour or one hour (for one or two credits) over a 15-week period. Group lessons consist of two 50-minute classes per week over a 15-week period (one credit).

$185 per credit will be charged each student (for one or two credits). This is in addition to the tuition charged and will be part of normal billing.

Any student enrolled in excess of 18 credit hours will be charged only the $185 per credit hour for private lessons and not for additional tuition charges for the Music Performance Study course. Any other University course(s) that result in more than 18 credit hours of enrollment will be subject to the additional applicable per credit hour tuition charges.

School of Natural Resources Summer Field Courses

The tuition for the School of Natural Resources Summer Field Courses will be at the Summer Session credit hour rate. In addition, there may be charges for field expenses.

School of Nursing

An additional fee of approximately $28 annually will be charged each student for membership in the National Student Nurses Association and will be part of normal billing.

Additional Fees for Special Courses

Occasionally, a special fee will be charged in addition to the fee for tuition to cover long distance travel expenses, special equipment, arrangements, or skilled consultants. Students will be notified of this fee through the registration process.

Study Abroad

A $400 administrative fee will be assessed for those students participating in Study Abroad programs/activities with the exception of the Buckham Overseas Studies Program.
Financial Services

returning students in the spring by the Office of Student Specific information is mailed to parents of incoming and who desire to budget annual costs in monthly installments. The University offers a Monthly Payment Plan to parents BUDGETED PAYMENT www.uvm.edu/studentfinances. Policies information on the following web page: http:// Please refer to the Payment Information and Financial date will be charged a late payment service charge. Students who do not settle their accounts by the due outstanding balance. If this is done, any additional collection fees, legal fees, and other costs and charges necessary for the collection of this debt will be added to the outstanding balance. If a student leaves the University for any reason with an outstanding balance and this balance is not settled in a timely manner, the University may turn the account over for the collection of this debt will be added to the account. A $50 fee must be paid to allow reenrollment. The University reserves the right to withhold registration material, the diploma, degree, and all information regarding the record, including transcript, of any student who is in arrears in the payment of tuition, fees, or other charges, including, but not limited to, student loans, dining and housing charges, telephone toll charges, and parking fines. If a student leaves the University for any reason with an outstanding balance and this balance is not settled in a timely manner, the University may turn the account over for collection. If this is done, any additional collection LATE PAYMENT SERVICE CHARGE Students who do not settle their accounts by the due date will be charged a late payment service charge. Please refer to the Payment Information and Financial Policies information on the following web page: http:// www.uvm.edu/studentfinances.

BILL ADJUSTMENT AND REFUND POLICIES

ACCEPTANCE FEE AND ADVANCE TUITION PAYMENT FOR NEW STUDENTS

A newly admitted undergraduate student who decides not to attend, and who notifies the University in writing prior to the first day of classes, will receive a refund of $100 of the $300 payment (acceptance fee of $186 and advance tuition payment of $114) that was required to reserve a place in the class.

CANCELLATION, WITHDRAWAL, MEDICAL WITHDRAWAL, SUSPENSION, DISMISSAL

A student who cancels, withdraws for personal or medical reasons, is suspended, or is dismissed will receive an adjustment of charges in accordance with the following schedule. Medical withdrawals require approval of the University Student Health Center.

- 100% tuition and fees credit adjustment prior to the end of the first two weeks of classes.
- 50% tuition and fees credit adjustment through the third week of the semester.
- 25% tuition and fees credit adjustment through the fourth week of the semester.
- No adjustment after the fourth week of the semester.

Due to federal requirements, financial aid recipients who withdraw during the semester will receive their refund based on current federal guidelines. Note: The effective date of any cancellation or withdrawal is the date the student initiates the withdrawal process either in writing, in person or over the phone. In no case will an adjustment be made after the first day of classes of the following semester.

CHANGES IN CREDIT HOUR LOAD

A student who adds courses during the semester will be billed additional tuition and fees applicable to the adjusted credit hour load. A student who drops courses during the semester will receive a tuition credit based upon the effective date as described above. A student who withdraws from a course during the semester will receive a tuition credit based upon the effective date as described above. However, the course will remain on the student’s record.

REFUND OF OTHER CHARGES

Room and meal plan payments will be refunded on a prorated basis.

DEATH

In the case of a student’s death, tuition, room, and fees will be fully refunded for the semester during which the death occurs. Unused meal points will be refunded.

Diagnostic Evaluation

In certain instances, students may be assessed a fee for diagnostic testing. Additional information can be obtained from the Office of Specialized Student Services.

PAYMENT OF OBLIGATIONS

The Touchtone registration system will generate charges based on enrolled credit hours. All tuition, fees, and room and board charges are payable in full upon notification. Degree students who enroll in advance for courses will receive itemized statements of applicable semester charges at their permanent addresses about a month prior to the commencement of classes, with instructions to settle in full by a specific date (generally three weeks before classes begin). Advanced payments are accepted; checks should be made payable to The University of Vermont. Any checks or payments received by the University may be applied to any outstanding balances.

Students who cannot meet their financial obligations because of unusual circumstances should contact the Student Office of Student Financial Affairs as soon as possible before the payment due date. Students who are allowed a Monthly Payment Plan or a postponement of all or a portion of their financial obligation will be charged a $75 Monthly Payment Plan service charge per semester or $130 for a year plan.

Students who have not satisfactorily completed financial arrangements by the announced due date may have their enrollment cancelled. Disenrollment will automatically place a registration hold on a student’s account that will prevent re-enrollment until the student has contacted Student Accounting to discuss the account. A $50 fee must be paid to allow reenrollment.

The University reserves the right to withhold registration material, the diploma, degree, and all information regarding the record, including transcript, of any student who is in arrears in the payment of tuition, fees, or other charges, including, but not limited to, student loans, dining and housing charges, telephone toll charges, and parking fines.

If a student leaves the University for any reason with an outstanding balance and this balance is not settled in a timely manner, the University may turn the account over for collection. If this is done, any additional collection fees, legal fees, and other costs and charges necessary for the collection of this debt will be added to the outstanding balance.

LATE PAYMENT SERVICE CHARGE

Students who do not settle their accounts by the due date will be charged a late payment service charge. Please refer to the Payment Information and Financial Policies information on the following web page: http:// www.uvm.edu/studentfinances.

BUDGETED PAYMENT

The University offers a Monthly Payment Plan to parents who desire to budget annual costs in monthly installments. Specific information is mailed to parents of incoming and returning students in the spring by the Office of Student Financial Services.
Financial Aid and Scholarships

The University has many programs to help finance a UVM education. These include financial aid awards for students with a demonstrated need for financial assistance and Scholarship awards for students whose academic achievements and other accomplishments and qualities promise to enrich the University in exceptional ways. Please visit our website at: http://www.uvm.edu/financialaid/?Pagesuimscholarship.html.

FINANCIAL AID

In order to ensure that the financial aid application process is understandable and accessible, each applicant is assigned to a “service-team” within the Financial Aid Office. Whenever a student has a question about his or her financial aid status, he or she may call upon the members of the service team who will be familiar with the applicant’s particular circumstances.

Eligibility

Students who wish to be considered for assistance in meeting their University expenses with student loans, grants, or employment should consider applying for federal, state, and University financial aid. To be eligible for financial aid, a student must be a U.S. citizen or a permanent resident. (Limited financial aid funding is available for international students; inquiries should be made to the Scholarship Coordinator in the Admissions Office.) To be considered for aid, a student must also be enrolled at least half-time (six credits) in a degree program. Audited credits or Credits by Examination cannot be considered as part of the credits in determining financial aid eligibility.

Application Procedures

Incoming first-year and transfer students who wish to apply for aid may do so by completing and mailing the Free Application for Federal Student Aid (FAFSA) after January 1st; and providing any verification documentation requested by the UVM Office of Financial Aid. Preference is given to those students who submit their applications by March 1. Applications submitted after that date will be processed in chronological order, subject to the availability of funds. In addition to following the procedures listed above, all students should apply to their state financial aid grant agency for assistance. Vermont students should apply to the Vermont Student Assistance Corporation (VSAC), P.O. Box 2000, Champlain Mill, Winooski, VT 05404.

The Financial Aid Package

The University of Vermont participates in all federal and state financial aid programs and must adhere to their requirements. Additionally, the University makes available a variety of grant and loan opportunities from its own operating and endowment funds. While federal and state aid is based exclusively on student need, eligibility for University funds is based on student need and on the strength of the applicant’s academic record. Applicants will be considered for all aid programs for which they are eligible. Aid is most often awarded in combinations or “packages” of the various types of aid. Almost all awards will include some student loan.

Student loans are available to all students regardless of need in the form of Unsubsidized Federal Stafford Loans. To be considered, however, a student must APPLY for aid. After a determination of eligibility has been made by the Financial Aid Office, students will be notified if they qualify for “need-based” aid or for an Unsubsidized Federal Stafford Loan.

In the awarding of UVM institutional financial aid funds, a student’s academic record is taken into consideration. Federal and state financial aid funds are allocated solely on the basis of student and parent financial need.

Satisfactory Academic Progress Standard for Financial Aid Recipients

In order to maintain eligibility for federal Title IV financial aid, matriculated undergraduate and graduate students must progress at a rate that ensures completion of their degree programs within a reasonable time frame. Beginning with the first semester of study in a degree program at The University of Vermont, a federal financial aid recipient is required to accumulate earned hours totaling at least 75 percent of the number of hours attempted. Each student’s progress will be measured at the end of each year of attendance to ensure adherence to this standard.

Beginning with the third academic year (after the achievement of 60 credit hours), all students must have attained at least a 2.0 overall cumulative grade-point average in order to continue to qualify for assistance.

Any student not meeting the standard described above will be placed on Financial Aid Probationary Status for a one-year period (during which aid eligibility will be maintained). Should the student not meet the required credit standard or cumulative grade-point average standard by the end of that probationary year, the student’s eligibility for additional federal financial aid will be withdrawn until the required standard has been met. Institutional aid will be suspended until eligibility for federal aid has been restored. Following federal guidelines transfer credits are not part of this calculation.

Students whose aid is withdrawn for not maintaining academic progress according to the standard outlined above may appeal their loss of aid by writing to their financial aid service team. The decision to withhold aid eligibility may be overridden by the Director in conjunction with the Financial Aid Appeals Committee in circumstances which warrant special consideration. Such circumstances may include medical emergencies or family crises which resulted in the student’s not meeting the stated requirements.
Financial Aid Refund Policy
A student who cancels, withdraws due to personal or medical reasons, is suspended or is dismissed will receive an adjustment of charges in accordance with the following schedule. Medical withdrawals require approval of the University Student Health Center.

- 100% tuition and fees credit adjustment prior to the end of the first two weeks of classes.
- 85% tuition and fees credit adjustment through approximately 30 percent of the semester.
- 60% tuition and fees credit adjustment through approximately 60 percent of the semester.
- No adjustment after the 60 percent point of the semester.

Note: The effective date of any cancellation or withdrawal is the date the student’s dean receives such notification in writing. The dean may recommend to the Registrar that an exception be made to this policy only in extenuating circumstances. In no case will an adjustment be made after the first day of classes of the following semester.

Changes in Credit Hour Load
A student who adds courses during the semester will be billed additional tuition and fees applicable to the adjusted credit hour load. A student who drops courses during the semester will receive a tuition credit based upon the effective date as described above. A student who withdraws from a course during the semester will receive a tuition credit based upon the effective date as described above. However, the course will remain on the student’s record. Financial aid will be reviewed and adjusted for any changes to the course load.

SCHOLARSHIPS
Thanks to the generosity of UVM alumni, parents, and friends, a number of scholarships are available to students whose experiences and backgrounds promise to enrich the larger university community. While many of these scholarships are based on a combination of need and merit, several scholarships are offered exclusively on the basis of academic achievements and potential for success at UVM. Examples of scholarships available to new students include:

The Vermont Scholars Program Each year, UVM names a select group of outstanding Vermont high school students as Vermont Scholars, an academic honor that carries a four-year partial scholarship. To qualify, candidates generally rank in the top ten percent of their graduating class and present superior scores on the Scholastic Assessment Test (SAT I). Comparable ACT scores are acceptable.

A committee comprising members of the University community reviews all qualified applicants and bases final selection on such factors as secondary school record, recommendations, admissions essays, extracurricular participation, and academic potential. Scholarship recipients are notified by mid-March. Vermont Scholars receive between $1,250 and $8,000 annually in scholarship and grant assistance, depending on need. The scholarship is renewable up to four years (eight semesters) provided a 3.00 cumulative grade-point average is maintained.

The Green and Gold Scholars Program recognizes the academically strongest student at each accredited high school in Vermont with 4-year, full tuition scholarships, currently valued at over $33,000. At the end of the academic year, the Principal of each school submits a nominee who has completed the 11th grade at the end of the school year. The primary criteria for determining a nominee is limited to academic performance in high school, including rank in class, grade point average, rigor of course work and standardized testing. Green & Gold nominees are awarded four-year full tuition scholarships upon admission to the University. The scholarships are renewable annually providing that the recipient maintains a 3.00 overall grade point average and makes satisfactory progress toward degree completion while in attendance at the University.

UVM Community Service Award The UVM Community Service Award is available for Vermont residents who have a demonstrated commitment to community and public service. The University Scholarship Committee selects those students that have a proven track record of community service. Community Service Scholars receive between $1,000 and $8,000 annually in scholarship and grant assistance, depending on need. Recipients must maintain at least a 2.50 cumulative grade-point average and continue to perform community service while at the University.

Presidential Scholarship Vermont out-of-state students with a superior record of scholastic achievement are eligible for consideration for UVM Presidential Scholarships. Letters of recommendation, secondary school record, and extracurricular participation are among the criteria used in making scholarship selections. Presidential Scholars receive a merit scholarship for four years (eight semesters) providing they maintain a cumulative 3.00 grade-point average and continue to make satisfactory progress toward the completion of their degree requirements. Scholarship values vary according to the academic record of the recipients.

How to Apply for UVM Scholarships
There is no separate application process for most UVM-based scholarships. The wealth of information provided in the Admissions application is used in matching students with available scholarships. Additionally, students must file the Free Application for Federal Student Aid (FAFSA) in order to be considered for need-based scholarships. Students will be notified if additional information is needed to apply for a specific scholarship.

Other Scholarship Resources:
- The Financial Aid Office, located at 330 Waterman Building, dedicates a scholarship resource workspace that can be utilized by any entering or returning UVM student. Resources such as scholarship and grant search books, a computer for reviewing free scholarship websites, and records on a small number of scholarship opportunities forwarded to UVM from outside sources are available for interested students.
- VSAC (The Vermont Student Assistance Corporation) offers a guide to scholarships for Vermont students available in UVM’s Financial Aid Office or contact VSAC toll-free at 1-800-642-3177.
- The Army ROTC Program offers an opportunity for students to earn a degree of their choice and possibly qualify for an officer’s commission. Two-, three- and four-year scholarships are available worth up to $17,000 for tuition and books as well as $206/month for up to ten months.
- Veterans are encouraged to consult the UVM Registrar’s Office regarding G.I. Bill benefits in education.
- Many organizations within home communities offer a wide range of scholarships to needy and deserving students. Check with schools and communities for these opportunities.
Student Services

A student’s commitment to strong academic performance coupled with healthy out-of-class pursuits forms the basis for a successful college experience. The units listed and described in this section are meant to acquaint students with some of the offices, services, and programs that offer support for student endeavors, needs, and interests. More detailed information is available in the UVM student handbook, The Cat’s Tale, which can be accessed on the internet http://www.uvm.edu/~dosa/handbook/.

Computing and Information Technology

The Division of Computing and Information Technology (CIT) provides computing, networking, and telephone service for the UVM community. CIT support includes the following:

- Full Internet access, including electronic mail and Web access. The UVM network is available throughout campus, including residence hall rooms. Off-campus students have a choice of free basic dial-up access, or specially priced full Internet access. UVM is a member of the Internet 2 Consortium.

- A variety of servers and host systems. Students use an IBM AIX (Unix) server cluster named “Zoo” for e-mail, Web publishing, statistics, geographic information systems, and research. From the time students are admitted, they are eligible for Zoo accounts.

- Computing labs equipped with Macintosh, Windows, and X-Windows (Unix) workstations. Labs are staffed by consultants and equipped with software for word processing, spreadsheets, statistics, scientific visualization, and a powerful geographic information system. All labs are networked to UVM’s host systems as well as to national and international resources available through the Internet. For advanced computing needs, the Academic Resource Facility (the ARF) is equipped with specialized hardware for exploring and developing computing, visualization, and multimedia applications.

- Sales and service for the Macintosh and Windows personal computers from major vendors. Students can purchase Macintosh and Windows computers from the UVM Microcomputer Services Depot (see http://cit.uvm.edu/mcsv/ for details). These systems are configured to work on the UVM network and come with the most comprehensive support UVM provides.

- A digital telephone system, including voicemail for all on-campus students, faculty, and staff.

- Free publications, tutorials, consulting support, and a help line.

- E-Business for students, faculty, and staff, including Web registration, billing, and grade reports.

- Support for the WebCT e-learning platform, where many courses and course components are offered online.

Many other University departments provide specialized computing resources designed to meet the needs of specific programs.

Contact CIT by sending e-mail to cit@uvm.edu, or visit our Web site at http://cit.uvm.edu.

Academic Support Programs

Academic Support Programs offer a range of services to support students’ academic success, including study skills and subject-area tutoring with emphasis on introductory courses and writing assistance in any discipline. Supplemental Instruction (SI) assists students in large lecture courses. In SI sessions, small groups of students meet after class to review course material and learn how to apply study skills to specify subjects.

Any student currently enrolled in classes at UVM is eligible to use Academic Support Program services. The office is centrally located at 244 Commons, Living/Learning Center. For more information, stop by or call the office at (802) 656-4075. The extended office hours are Monday to Thursday 8 a.m. to 9 p.m.; Friday 8 a.m. to 5 p.m.; Sunday 6 p.m. to 9 p.m.

TRIO Program TRIO includes two project dedicated to the educational and cultural advancement of its participants:

- Project STAY (Services To Advance Yourself) is a student services project that provides academic support to 225 UVM undergraduate students through the above Co-op programs and through classes, mentoring, laptop lending and graduate school programs and more.

- Upward Bound provides academic and cultural support to 60 Vermont high school students.

Participants in the TRIO projects must be first generation college students; have limited income; and/or (for Project STAY) have a documented disability.

Services for Students with Disabilities Services and accommodations for students with disabilities are coordinated by three offices: ACCESS works with students with physical disabilities (visual, hearing, mobility, and/or manual dexterity impairments), learning disabilities, and attention deficit disorders; the Counseling Center serves students with psychological disabilities; and the Student Health Center provides services for students with ongoing medical conditions.

Students are encouraged to inform the staff of the appropriate certifying office of any needed services or accommodations well in advance of each semester. Current and comprehensive documentation of disability will be required. For further information, contact:

ACCESS, A170 Living/Learning Center, (802) 656-7753, TTY 656-3865.

Counseling Center, 146 South Williams Street, (802) 656-3340.

Student Health Center, 425 Pearl Street, (802) 656-3350.

Career Services

Career Services provides UVM students with assistance in exploring and implementing their career goals. There are four major components in this effort: understanding one’s own strengths and career needs, discovering related work and educational options, validating those options through related experience, and pursuing specific post-graduate goals. The Career Services Office is located in E Building, Living/Learning; the web address is http://career.uvm.edu.

Career Assessment Students often want assistance in identifying their strengths and career needs, and in discovering the best major for them or the kind of employers and openings that might be good options. Career Counselors administer assessment tools, lead workshops and
meet individually with students to help them set goals related to career, graduate school or even undergraduate major interests. To see a career counselor, call ahead on the day you wish to stop by with quick questions for a Same-Day Consultation (M-F 1:30-4:30 p.m. and Wednesdays 5-7 p.m. during Fall and Spring semesters) or plan ahead for an hour-long Career Counseling Appointment.

Discovering Options. Surveys of UVM graduates, publications on careers related to certain majors, and books on careers in specific interest areas (such as environment, media, sports, human services, health) are available in the Career Library in Living/Learning. Every year, students can attend workshops and panels, presented by UVM grads, discussing options for students in any number of majors. At Career Services you will also find contact names of over 800 participants in UVM Career Connections, a network of UVM alumni who have volunteered to provide information to students interested in working in their fields or geographic locations.

Getting Experience. At UVM, we want all students to test their interests in particular fields by getting experience before they graduate. Because employers are expressing interest in hiring college graduates who have relevant work skills, there is even more reason to get experience before finishing a baccalaureate degree. To support students’ needs in this area, many campus leadership and research opportunities are available. Career Services has also developed a number of useful programs and services.

Federal Work Study. Job openings are managed through Career Service. Students who have received a Work-Study award through the Office of Financial Aid can use their employment to gain valuable skills and test their career interests. Openings range from medical photographer to editorial assistant, from technology consultant to dance instructor, and from environmental field worker to research assistant. These positions are located on campus as well as off-campus in non-profit agencies.

Career Internships. Are local, regional, national, and international openings catalogued at Career Services. Available to students from any major, at any time in their academic careers, the internship listings cover a wide range of fields. Most of these openings are unpaid; students who are interested in earning academic credits must make arrangements within their academic departments.

The Cooperative Education program is nationally sanctioned and allows students to alternate full- or part-time paid employment with periods of classroom education. Coop provides in-depth experiences (6-18 months) as close to campus as Burlington and as far away as Boston, Minnesota, and Florida. Participating students usually major in computer science, engineering, math, or business.

Natural Resources Internships. Are paid or unpaid experiences designed in collaboration with the faculty in the School of Natural Resources and environmentally-related employers in business and non-profits. Academic credit is available for SNR students. Call (802) 656-3003 for more information.

The Service Learning Internship Program provides opportunities for credit-bearing internships. While students serve real needs in the community, they link their experiences with structured academic learning. Options include openings in health and human services, law and justice, government and legislative, arts, environmental, and educational settings. These experiences vary in length and can be local, national or international. Staff provide coordination and support throughout the students’ experiences.

The Student Employment Services. Posts summer and part-time job openings of interest to UVM students.

Pursuing Goals. Career Services staff are available in workshops and individually (through appointments and same-days) to assist students with implementing goals.

Employment workshops are held each semester to teach students job search skills such as resume writing, interviewing, developing networks and contacts, and building a comprehensive job search strategy. UVM Career Connections advisors often act as contact and referral sources for job seekers. To provide students with 24-hour access to job openings and information about employers, Career Services has a Web site at http://career.uvm.edu.

Our On-Campus Interviewing program, which posts hundreds of jobs annually, brings organizational representatives from small, medium, and large, local, regional, and multinational employers to UVM to conduct job interviews with UVM students. In addition, Career Services hosts job fairs each academic year, including the Technical Career Fair in the fall, the Career Expo in the winter, and the Summer Jobs Internship Fest in the spring.

Because employers do not always have time to post a job and wait for applicants, UVM offers students the opportunity to register for our Resume Referral Service. To sign up, students fill out a brief form indicating their interests and skills, provide us with resumes, and give us permission to mail them out. Participants are then entered into our database which can be queried when quick requests for resumes are received. An additional option is to register with and submit a resume to eXperience.com, a web-based tool that connects job seekers with a wide variety of regional, national and international employers. Call 802-656-3450 for more information on how to participate in either of these programs.

Searching for a job in government, human services, advocacy organizations, and other nonprofit groups can be daunting. The Non-Profit Employment advisor provides assistance to undergraduates and alumni on careers, job search skills, and networking strategies in the public interest sector. Information on local, regional, national, and international nonprofit employers and fellowships are available in our Career Library, and hundreds of post-graduation public interest employment opportunities are posted annually.

Preprofessional/Graduate School Advising. Supports students interested in law, medicine, dentistry, optometry, podiatry, and osteopathy, and other graduate programs. Intended to supplement faculty advising, the career center provides registration materials for the required graduate and preprofessional examinations and application services, as well as reference materials that index funding sources, evaluate schools, and explain application procedures. Career counselors assist students in honing their interests and setting goals relative to graduate education and beyond. The Premed and Prelaw Advisor and faculty members of the Premed and Prelaw committees assist students in planning their undergraduate curricula and gaining admission to programs.

Multicultural Programs

CENTER FOR CULTURAL PLURALISM

The Diversity & Equity Unit at the University of Vermont, headed by the Senior Advisor to the President, is comprised of four departments:

- The ALANA Student Center
- The Center for Cultural Pluralism
• The Office of Lesbian, Gay, Bisexual, Transgender, Questioning and Ally Services
• The Women’s Center

The Unit provides training, services and programs in support of the University’s commitment to the admission, hiring and retention of a diverse community of faculty, staff and students.

The currency of value in education for the 21st Century must include multicultural competencies in order to produce graduates equipped to be leaders and change agents in a pluralistic world. Staff in the Diversity and Equity Unit work collaboratively with all members of the educational community to help the University of Vermont achieve these goals.

The ALANA Student Center is located on the University of Vermont’s Redstone Campus and its facilities include a kitchen, conference room, computer lab, and a community room. The building is available to students 24 hours a day.

The mission of the Center is to provide support for African American, Latino/a, Asian American, Native American (ALANA) students by nurturing their academic, cultural, emotional and social development. The Center’s staff further strives to promote community awareness and help create a just multiracial campus climate. The ASC staff works closely with the Office of the Vice President for Student Affairs, Career Services, Residential Life, and Admissions as well as academic departments. The Center is concerned with quality of life issues for ALANA Students because of the profound effect such issues have on the academic success of students of color at predominately white institutions.

Office hours are 8:00-4:30 Monday through Friday. For further information, please call: (802) 656-3819.

The Center for Cultural Pluralism supports the development of the skills of critical analysis and intercultural awareness in relationship to social justice issues. Its mission is to provide resources and assistance in the delivery of quality multicultural education in order to equip faculty, staff and students with the competencies necessary to function in a diverse world.

The focus for the Center includes the following areas: academic, administrative/staff, student affairs and community outreach. The Center is the major coordinator of activities that support UVM’s efforts to provide a campus climate based on equity, respect for all, and the understanding of social justice philosophy. In direct support of this goal the Center for Cultural Pluralism is involved in formal education, professional development, programming, funding support, and support services as related to these four areas. It offers a central meeting place – a “Cultural Hub” – where individuals and organizations working on multicultural awareness and social justice meet and interact with one another. The Center provides classroom space and houses the following organizations: English as a Second Language Program, Office of Conflict Resolution, Cooperative Campus Ministries, Hillel, LGBTQ&A Services and Asia Program faculty.

Open from 8 a.m. to 4:30 p.m. Monday through Friday, the Center supports and initiates educational and social events. The Art Gallery hosts exhibits featuring work that address cultural diversity or social justice themes. The Resource Library has print and video on multicultural topics available to University and community members. Five meeting spaces can be reserved by calling (802) 656-8818 during office hours. Visitors are always welcome.

The Office of Lesbian, Gay, Bisexual, Transgender, Questioning and Ally Services exists to assist the University of Vermont in meeting the needs of LGBTQ&A staff, students and faculty for full inclusion and representation in the University community. LGBTQ&A Services staff provide consultation and training to all departments of the University as needs are identified as well as in targeted areas of importance to LGBTQ&A students, staff and faculty. The Office articulates LGBTQ&A issues and perspectives in decisions regarding University policies and programming and promotes awareness and understanding among all members of the University community.

The Office and staff also serve as a point of coordination for the LGBTQ&A community on campus by fostering and supporting LGBTQ&A programming and by managing a LGBTQ&A listserve and web page.

A full-time Coordinator, graduate interns and work-study students staff the office, which includes a resource lending library. It is located on the third floor of the Center for Cultural Pluralism at 461 Main Street and may be reached at (802) 656-8637. Scheduled hours are 9:00 to 5:30, M-F, but may vary according to availability of staff.

The Women’s Center is open to all members of the UVM and Burlington communities. The Center focuses on educational programming, resource development and referrals, outreach, and advocacy on issues affecting women. Responding to students, faculty and staff, the Center works to ensure a hospitable campus climate for women and other under-represented groups. Programming is also done in collaboration with local agencies and community groups. The Center provides leadership development for students through employment, internships, and volunteer opportunities.

In addition, a Victim Advocacy Program, funded by the Department of Justice, provides free and confidential assistance to any member of the University community who believes he/she has been a victim of gender violence, on or off campus. Based at the Women’s Center, the program is a collaborative effort with local victims service agencies, the School of Nursing and the College of Medicine. Support, direct services and referrals, for males and females, as well as their friends and families, are offered.

The Women’s Center provides a meeting place for classes and for groups working toward gender equity and cultural diversity. The Center has a lending library and a fully-equipped kitchen for use by individuals or groups. The phone number for the office is 656-7892.

Campus Life

OFFICE OF STUDENT LIFE

The work of Student Life begins with new students’ Orientation to the University, continues by assisting students in planning co-curricular experiences, and extends to numerous recognition programs for graduating seniors. More information is available on-line at http://www.uvm.edu/~dosa/studact/, or from the Student Life Office in Billings Student Center. Programs supported by the Office of Student Life include:

Orientation and Parent Relations Orientation provides the official welcome to parents and students to the University through summer orientation programs and Homecoming and Family Weekend in the fall. Orientation programs challenge students to explore numerous dimensions of campus life and to get significantly involved in the University and local community.
Leadership Programs engage students in experiential leadership education. Central programs include leadership classes (EDHI 213 and 214), the Emerging Leaders Program, Women as Leaders Workshops Series, Leadership Recognition, KUDOS! Leadership TREK, and campus-wide leadership retreats.

Greek Life Fraternity and sorority life is an important option for many UVM students. This area of endeavor supports the activities of the Interfraternity Council, the Panhellenic Council, Order of Omega (the Greek academic honor society), the Greek Judicial Board, individual chapters, the Greek Alumni Advisory Council, and the Fraternity Manager’s Association. Currently there are 10 fraternities and five sororities.

Community Service and Volunteer Programs The spirit of community service is an integral part of campus life for many UVM students, faculty, and staff. This area includes Community Service TREK (for new students), the broad-ranging efforts of Volunteers in Action (VIA – a consortium of 13 individual community service programs), Hearts and Hands, Alternative Spring Break, Make a Difference Day, Community Serv-a-thon, Community Works and many other links with the local community.

Outdoor Programs Vermont provides a wonderful classroom for students interested in enhancing their outdoor leadership skills, adventure-based education and learning, and in simply getting out and enjoying the mountains, rivers, and lakes. Major aspects of Outdoor Programs at UVM include the Wilderness TREK program (for new students), the Outing Club, the climbing walls located in the gym, weekend trips, and a comprehensive outdoor leadership development program.

Billings Center, managed by Student Life, is a hub of activity each day throughout the school year. Billings houses a number of student organizations and provides a space for meetings, lectures, films, and other campus programs. The Department of Student Life, the Student Government Association, The Cynic, WRU-V FM, Student Legal Service, VIA, and many other organizations are located in Billings Center. Also in Billings, Cook Commons and the Round Room provide easy access to campus dining service.

STUDENT GOVERNMENT ASSOCIATION (SGA)
The Student Government Association, the primary student governing organization, assumes responsibility for voicing student concerns and interests in the governance activities of the University community. It recognizes and funds approximately 100 student organizations. More information on SGA is available at http://www.uvm.edu/~sga.

ATHLETICS AND RECREATIONAL SPORTS
The University sponsors 22 varsity sports at various participatory levels. All full-time undergraduate students are eligible to try out for varsity sports and are encouraged to participate in all levels of sports activities.

Varsity Athletics Athletic eligibility is determined through the Athletic Compliance Eligibility Office. All varsity athletes must comply with all appropriate rules and regulations of The University of Vermont, NCAA, and those of the playing conferences with which UVM is affiliated. Each prospective student-athlete and current student-athlete must receive an individual eligibility clearance from the Athletic Compliance/Eligibility Office which may include the need for a physical exam. He/she must also receive appropriate clearance from the UVM Student Health Center prior to participating in any intercollegiate activity including practice, pre-season conditioning, and contests.

The athletic policies of the University are developed by the Director of Athletics in conjunction with the Athletic Council, an advisory board to the President composed of faculty, students, and alumni. Athletic affiliations are maintained with the NCAA, AMERICA EAST, and ECAC.

Opportunities exist in the traditional seasonal sports for all students who are eligible to compete. In the fall, the programs offered to men include soccer, cross-country running, golf, and tennis. The programs offered in the fall to women include field hockey, soccer, cross-country running, and tennis. Winter programs include basketball, ice hockey, skiing, and swimming for both men and women. The spring programs for men include baseball, lacrosse, and tennis. Women’s spring programs include softball, lacrosse, tennis, and indoor and outdoor track.

Programs range in strength from the national level to the regional and New England level. All prospective students interested in obtaining information concerning a particular varsity sport should contact the coach of that sport.

Club Sports A variety of club sports, from Rugby to Equestrian and Cycling teams, offer UVM students recreational activity as well as competition with other colleges and universities.

Recreational Sports The Recreational Sports Program offers over 20 intramural sports and special events throughout the academic year. Recreational facilities are available every day to provide students the opportunity to participate in activities that interest them. For specific program information, contact the Recreational Sports Office, (802) 656-4483, or visit www.uvm.edu/~recsports/recsports.

Health Services
CENTER FOR HEALTH AND WELLBEING
The Center for Health and Wellbeing offers counseling, medical and women’s clinics, nutritional counseling, physical therapy and athletic medicine, a health promotion program, a drug and alcohol education program, laboratory services, and 24-hour emergency telephone advice (802) 656-3350. Visit our website for more complete information — http://www.uvm.edu/~dosa/chw.

Counseling Over a thousand students use the services of the Counseling Center each year for improving academic success, for mental health counseling, and personal growth work. All records in the Counseling Center are confidential, the names of clients are not available without the student’s permission. The staff consists of women and men of varying backgrounds, ethnicity, ages, and physical abilities. Students taking six credits or more are eligible for services.

The Counseling Center is accredited by the International Association of Counseling Services and adheres to the code of ethics of the American Psychological Association. Counseling is located in an historic brick house on the corner of Main Street and South Williams, (802) 656-3340.

Student Health/Medical and Women’s Health Clinics
The Clinics are available to all students (except those in the College of Medicine) for primary and preventive health care. Most of these services are covered by the comprehensive student fee. Students entering the University are required to furnish the Center with a complete immunization record, to include two valid measles (Rubeola) vaccinations, and a medical history. A physical exam is not required.

**Health Insurance** The University makes available to students an optional health insurance plan that provides hospitalization and some outpatient benefits. Full-time students who do not provide proof of adequate health insurance at the time of registration will be required to purchase the University-sponsored plan.

The Burlington area has a large and sophisticated medical community of which the Center for Health and Wellbeing is a part. Students requiring consultations are referred to specialists in the area. When necessary, hospitalization is usually arranged at Fletcher Allen Health Care, a teaching hospital located on the edge of the main campus. Note: The University Health Center (UHC) is not the UVM Center for Health and Wellbeing.

**Residential Life**

The mission of the Department of Residential Life is to create an atmosphere within the University of Vermont residential system that facilitates the growth and development of all students. This includes providing a safe and secure environment that fosters healthy, inclusive community building among all residents – supporting and emphasizing academic success. We are committed to, and intentional about, providing students a range of experiences within their living environment. Desired outcomes of these experiences include:

- The development of a sense of belonging
- The acquisition of knowledge and skills
- The development of critical thinking skills
- The ability to make ethical choices
- The acceptance of self-responsibility

Community councils complement the department’s mission, represent student opinions, and provide educational and social programs for their constituents.

**Student Rooms**

The campus is divided into seven complexes. Each student room is equipped for comfortable residence hall living. Double rooms have two beds, two desks and chairs, bureau space for each student, two closets, and blinds or shades on the windows. Bookshelves are provided in some rooms. Students provide their own bed linen, towels, pillow, wastebaskets, and lamps. Laundry facilities are provided in the complexes.

**Residential Technology**

All residence hall rooms are wired for access to the Internet and UVM’s campus cable television system. For more information please visit the Residential Life website or call (802) 656-3808.

**HOUSING**

All students are encouraged to reside in one of a variety of housing options, ranging from theme-based suites in our Living/Learning Center to substance-free living in Redstone Hall.

**Undergraduate Housing**

All first-time, first-year students are required to live on-campus for four matriculated semesters. Over 200 staff members in Residential Life are committed to making on-campus living experiences as productive and rewarding as possible.

Exceptions to living on-campus will be heard prior to June 1 for First-year or Second-year students:
- Residing at home with parents or legal guardians
- Who claim independent financial status in accordance with the guidelines provided by the UVM Financial Aid Office
- Married or united by civil union
- Who have dependent children

Housing for return students is determined by a lottery held each spring. Second-year students who are members of a sorority or fraternity and want to live in their sorority or fraternity house must submit their request through their President and Chapter Advisor to Department of Student Life by mid-March.

Students living in the residence halls must have room and meal plan contracts. Contracts are binding for the full academic year unless canceled for due cause with the approval of the Department of Residential Life. In August, new students will receive notification of their housing assignments. Rooms may not be occupied until the date specified. Students are expected to leave the residence halls no later than 24 hours after their last examination or by 8:00 p.m. on the last day of final examinations.

The Department of Residential Life is located in Robinson Hall on Redstone Campus. Please call (802) 656-3434 with questions.

**Upper Division and Graduate Housing**

Housing at Trinity Campus – right next to the UVM campus – is a housing option for graduate, non-traditional and some transfer students and is designed to respond to the various and special needs of this student population. There are 100 single rooms; each furnished with a bed, dresser, desk and closet. The contract is for a nine-month period, with separate options for the summer. Please contact the Ethan Allen Housing Office for further information, (802) 654-1735 or email nwright@zoo.uvm.edu.

**Student Family Housing**

There are 115 University-owned apartments designated for student families located just outside Winoozi at Fort Ethan Allen. About five miles from campus on Route 15, the apartments are close to shopping centers, hospital, and educational institutions. These apartments have several amenities.

Detailed rental information may be obtained from the Ethan Allen Housing Office, 14 Ethan Allen Avenue, Fort Ethan Allen, Colchester, Vermont 05446, (802) 654-1735.

**INTER-RESIDENCE ASSOCIATION (IRA)**
The Inter-Residence Association represents students living in UVM residence halls. The council, with its executive board and representation from each residence complex and ongoing committees, offers programs and services and provides leadership for residence hall students. The Association represents residential student interests to other constituencies within the University community and the greater Burlington area.

Veterans Advising and Benefits
The University provides support and advising to any veteran or dependent eligible for benefits under Federal Law, Chapters 30, 31, 32, 34, 35, or 106. Students eligible for these benefits should contact the Registrar’s Office at least one month prior to registration each semester. Students wishing to register for benefits should be prepared to present their certificates of eligibility.

It is important that all veterans and dependents keep in contact with the University for the latest information regarding benefits and requirements. Also, those students involved in the Veterans Program should contact the University in the event of any change in credit load, dependency status, address, or major. The phone number is (802) 656-2045.
Academic and General Information

This section offers a summary of regulations and procedures. In addition to the information presented here, the rights and responsibilities of students and University policy on these and other matters are explained in full in the The Cat's Tale, available online at www.uvm.edu/~dosd/Handbook/. Students are responsible for meeting all requirements for their respective degrees as stated in the catalogue and for complying with the following regulations and procedures.

ACADEMIC ADVISING

Academic Advising is a process in which students seek and receive guidance with academic program planning, usually from a faculty advisor. Meaningful educational planning is compatible with a student's life goals, therefore academic advising encompasses discussion of life goals and assistance with the developmental process of life goals clarification. The ultimate responsibility for making decisions about educational plans and life goals rests with the individual student. Assistance with the clarification of life goals is not limited to the academic advising relationship, and may include staff in areas such as career development, residential life, and counseling.

For academic advisors, assisting students in the clarification of life goals means helping students explore and define their educational and career goals in an atmosphere of mutual respect and learning. Advising, while non-prescriptive, encourages students to think critically, seek out resources, and develop action steps. The desired result is that students will feel a sense of connection with the advisor and a sense of guidance, while realizing personal responsibility for exploring options and making decisions.

Academic Advisors remain alert to any barriers to student academic performance and guide students to address these appropriately. The advisor needs to be able to refer student to appropriate academic and support services to enhance both their student experience and their academic success. Faculty advisors are expected to initiate contact with each advisee during a student's first two semesters on campus and when a new advisee is assigned to the advisor (includes newly declared majors and transfer students). After the first two semesters, maintaining regular contact with the advisor is the responsibility of the advisee. The advisor will be prepared to meet with and listen to his/her advisees on a regular basis. Advisor and advisee share responsibility equally for the success of the advising relationship.

Advising Resources

In addition to an assigned faculty advisor, a variety of other advising resources are available to undergraduates. The Learning Cooperative represents a collaborative effort on the part of academic and student affairs offices to improve the ability of students to benefit fully from their academic experiences. The Learning Coop supplements the academic environment by providing developmental instruction in writing, reading, and study skills, works with students to develop good learning strategies for challenging courses, and maintains a campus-wide tutoring program.

Prehealth Advising assists undergraduate students with the admissions requirements for dental and medical school. A library of resource materials is maintained which includes literature on alternative health careers, school catalogues, and premedical education journals.

Prelaw Advising is provided by the UVM Prelaw Committee and assists students by sponsoring meetings and panel discussions regarding career options in law. Advising also provides specific information on applying to law schools. A current collection of law school catalogues is maintained for interested students.

PreVeterinary Advising is available to discuss plans for graduate school and employment in animal science career areas. A selection of catalogues, pamphlets, and other related literature is maintained.

International Student Advising is provided through the Office of International Education to assist international students with personal and academic problems, as well as matters relating to immigration and social and cultural adjustment. A special pre-orientation program, prior to the beginning of the fall semester, provides new international students with an introduction to the University and the Burlington community. An active campus International Club provides an opportunity for international students to contribute to campus life and to make friends outside the classroom. Other clubs with an international focus, such as the Overseas Development Network, are also available. Students planning to study abroad should also consult the Office of International Education which is located at B161, Living/Learning Center.

Multicultural Student Advising at the ALANA Student Center provides broad based support aimed at ensuring the success of Multicultural students at UVM. Services include: academic advising; linking students to resources and opportunities on campus; tutoring; peer mentoring; social and cultural networking. Students may elect to take part in The Summer Enrichment Scholarship Program. A pre-first year opportunity that offers an academic experience (6 credits) and provides an introduction to campus and college life before the official start of the school year.

Career Services assists students who are exploring a variety of potential career options early while in their academic majors. A library of career information and school catalogues is maintained.

Continuing Education Advising assists nondegree students, nontraditional students, and evening degree applicants on course selection, how to apply for a degree program, general information about UVM academic resources, and career and life planning. The advisors work with individuals who are returning to school after raising a family or working outside the home, who are considering a career change, or who have recently graduated from high school. A series of free workshops on topics of interest to adult learners are also offered. Teamming up with the Learning Co-op, UVM Continuing Education helps students "learn how to learn" with free tutoring integrated into several evening introductory-level courses each semester.

TYPES OF ENROLLMENT

Degree Students

Students who have presented appropriate credentials for
admission and have been accepted as students in a degree program. The following four actions apply only to degree students.

**Intercollege Transfers**  Degree students may transfer to another college/school within the University. To do so, a student must complete a Change of Major form and obtain the approval of the deans of the two units involved. Students wishing to transfer must have a cumulative GPA of 2.0. A cumulative GPA of 2.5 is required for transfer admission into teacher licensure programs in the College of Education and Social Services. Transfers will be approved only if space is available and may be conditional upon students satisfactorily completing requirements set out by the new college/school.

In the case of veterans receiving educational benefits through the Veterans Administration, the change must be brought to the attention of the Registrar’s Office, 360 Waterman Building, where a Change of Program or Place of Training Form #22-1955 must be completed and submitted for approval to the Veterans Administration.

**Readmission to the University**  Degree students who have left the University for one semester or more must write to their dean to request readmission. Students must apply for readmission by October 31 or March 31 preceding the appropriate semester of return.

**Withdrawal from the University**  Degree students who wish to withdraw from the University must first notify their academic dean in person or writing.

**Leave of Absence**  A leave of absence means that a student in good standing, who is eligible for continued enrollment, ceases to be enrolled and is guaranteed readmission.

1. Students submit a written application for a leave of absence to their college/school prior to the beginning of the semester that the leave will take effect. To be confirmed, leave forms must be signed by both the student and their dean.

2. Leaves are granted for a finite period of time, and normally may not exceed four semesters. A leave normally may not be granted to students on academic trial or disciplinary probation.

3. While on leave, the students status is temporarily inactivated. A leave of absence guarantees an individuals readmission only if the student confirms intent to return by the closing date for a normal readmission application (October 31 and March 31 preceding the appropriate semester). A leave does not guarantee housing upon the students return.

4. Unused financial aid will not be carried over. Upon readmission, students must reapply for financial aid according to Office of Financial Aid policies and procedures in effect at that time.

**Nondegree Students**

This category applies to students who have presented minimum credentials and have been permitted to undertake limited course work up to six credit hours, or two courses, per semester for a purpose other than the earning of a degree. Approval from the Dean of Continuing Education is necessary for a student to exceed the six-credit maximum. Credits earned by nondegree students who later apply and gain admission to a degree program will be evaluated and, if appropriate, will be accepted toward completion of their degree.

Nondegree students may enroll for a maximum of six credits or two courses per semester in the day program.

Selection of courses for those having long-range plans of earning a degree in the daytime program should be made on the basis of information given in this catalogue. Students interested in making a formal application for admission to the University should contact the Admissions Office.

Students presently enrolled and in good standing at another institution may take courses at UVM to transfer to their institutions. These visiting students are considered nondegree students and should contact Continuing Education for information and registration material.

Before completing 30 credits of course work through the evening program or summer session, degree-bound students should consult with an advisor at Continuing Education, submit an application for formal admission to UVM, and then should consult with the appropriate dean’s office to structure further courses into a degree program.

All nondegree students who would like assistance in planning educational programs and selecting courses should contact Continuing Education, (802) 656-2085.

**REGISTRATION**

Degree students must register for the next semester at the designated time, unless excused in advance by their dean. Registration instructions are on the web at http://registrar.uvm.edu. Written approval of the student’s dean is required to register for more than 18 credit hours.

Students with disabilities, who are in receipt of appropriate medical certification from the Director of the Student Health Center, are eligible for continued registration. Students with disabilities may take courses at UVM to transfer to their institutions. These visiting students are considered nondegree students and should contact Continuing Education for information and registration material.

Any credits earned at the University of Vermont are transferable to another institution at the discretion of the receiving school.

**Course Add/Drop**

Courses may be added or dropped only during the first ten instruction days of the semester. After the first five instruction days the instructor may not allow the course to be added if material may not be made up (e.g., laboratories) and if the absence of this work would seriously affect the quality of the students educational experience.

Drops will only be allowed after the tenth day of instruction if a student was enrolled by administrative error and did not attend the class. The disposition of such cases is handled by the Registrar’s Office.

---

**Class Standing**

The designation of a student’s class shall be determined by the number of academic credits completed. The designations are as follows:

**Bachelor's degree:**

| First-year | 0-26.9 Credit Hours |
| Sophomore  | 27.0-56.9 "         |
| Junior     | 57.0-86.9 "         |
| Senior     | 87.0 and over "     |

**Associate degree:**

| First-year | 0-26.9 Credit Hours |
| Senior     | 27.0 and over       |
Course Withdrawal

From the eleventh day of instruction to the end of the ninth week of classes, students may withdraw from courses. To do so, students must complete a Course Withdrawal Form, consult with their advisor, and obtain the instructor’s signature. The student must deliver the form to the Registrar’s Office no later than 4 p.m. on Friday of the ninth week of classes. Students give a copy to their dean for information purposes. A grade of W will be assigned by the instructor(s) and recorded on the student’s permanent record.

Between the end of the ninth week and the last day of classes, students may withdraw from one or more courses only by demonstrating to their college/school studies committee, through a written petition, that they are unable to continue in the courses(s) due to circumstances beyond their control. Such petition must contain conclusive evidence, properly documented, of the illness or other situation preventing completion of the course(s). Acceptable reasons do not include dissatisfaction with performance or expected grade, with the course or instructor, or desire to change major or program. If the petition is approved, a grade of W will be assigned by the instructor(s) and recorded on the student’s permanent record. If the petition is denied, the instructor(s) will assign a final grade (A-F) in accordance with the same criteria applied to all other students in the course(s).

Withdrawn courses are included in the number of credits used for billing purposes. No withdrawals will be permitted after the last day of classes. In all instances, withdrawal grades remain on the permanent academic record, but will not affect the grade-point average.

Retroactive Academic Adjustment

The University will consider requests for late withdrawal and retroactive academic adjustments when those requests are accompanied by appropriate information. To receive consideration, a student or his/her authorized representative must submit to his/her dean’s office a completed Consultation Form for Medical Withdrawal and Incompletes. Forms are available in deans’ offices.

Students may appeal the academic adjustment decision of their school or college to the Provost’s Office. If the appeal is based upon a certified disability and recommended as an appropriate accommodation, students may appeal the academic adjustment decision of their school or college as outlined in Policies and Procedures for Students with Disabilities under the section entitled “Protocol for Dispute Resolution.” All appeals must be submitted in writing.

Decisions regarding adjustments to academic records are distinct and separate from refunds. Any refund, including tuition, financial aid awards, fees, room, and board, will follow federal and institutional guidelines. The effective date for any refund will be the date that the completed form was received by the academic dean’s office. Questions regarding refunds should be directed to the Controller’s Office.

Independent Study Courses

Independent study is a course taken for credit, which is tailored to fit the interests of a specific student, and which occurs outside the traditional “classroom/laboratory setting.”

Independent study is carried out under the direct supervision of a faculty member having expertise in a particular area of investigation. Consequently the project will be done in the department primarily responsible for the field of study. Prior to enrollment in independent study, students must obtain the approval of their advisor, faculty sponsor, and the faculty sponsor’s department chairperson.

Independent study may be taken for variable credit. The amount of credit to be granted should be mutually agreed upon by the student and the faculty sponsor prior to registration. When a project is to cover more than one term, the designation XC (extended course), rather than incomplete, should be used on the final grade sheet for the first term of work.

Academic units offering independent study will be responsible for administering such work. Specific guidelines, which define the responsibilities of both faculty and student for administering the independent study, are noted below. Alternative guidelines that incorporate these basic points are acceptable.

Guidelines:

a. The success of an independent study project is often related to the amount of advance planning expended on the project. Consequently, planning for the project should, whenever possible, be initiated in the semester before the course is taken.

b. By the end of the add/drop period, students will be required to submit to their faculty sponsor a specific plan which must include, but not be limited to, the following:

   i. The project title.
   ii. A statement of justification, indicating why independent study is being selected and the reason for undertaking the project, its importance, and how it relates to other work done by the student.
   iii. A clear and complete statement of project objectives.
   iv. A concise statement of the plans and methods to be used in order to accomplish each objective.

c. During the first full week of classes the student and the faculty sponsor will meet and prepare a document which includes the following:

   i. A schedule of dates when the student and faculty member will meet and discuss progress, including a time plan indicating when various parts of the work are projected for completion.
   ii. A list of those ways in which documentation of work can be shown.
   iii. A plan for evaluation, which will include the specific work to be submitted for evaluation on the project, and a statement of criteria to be used for evaluation, will also be included.

d. It is the responsibility of the faculty supervisor to ensure that all the provisions outlined above have been satisfactorily accomplished. Copies of all documents and schedules mentioned must be filed with the department chairperson by the end of the add/drop period. Faculty sponsors should retain the completed projects, along with faculty evaluations, for review, if necessary, by appropriate school/college committees.

Undergraduate Enrollment for Graduate Credit

Senior undergraduates may enroll for up to six graduate credit hours at UVM under the following circumstances: courses must be available for graduate credit; total enrollment including the graduate course must not
4. In every course in which a final examination is given, the course must not be computed as part of the bachelor's degree. Permission to seek graduate credit must be obtained from the Graduate Dean in writing by the dean of the undergraduate college/school. Graduate credit can be used only at UVM if the course is judged appropriate by the student's advisor for the particular graduate program.

**Accelerated Master's Degree Programs**

A number of departments and programs provide opportunities for selected undergraduates to participate in Accelerated Master’s Programs (AMPs). This option is available for admission to graduate programs in Animal and Food Sciences, Biology, Biomedical Technology, Biostatistics, Computer Science, Education (Curriculum and Instruction and Professional Education), History, Materials Science, Mathematics, Mechanical Engineering, Microbiology and Molecular Genetics, Nursing, Public Administration, and Statistics. The AMP allows early admission to graduate studies with up to six concurrent credits double-counted toward the bachelor’s and master’s degrees.

**EXAMS AND GRADING**

**Examinations**

Hour Tests:

1. One or more hour tests are usually given during a semester in each course. These are scheduled by the faculty member within the class periods assigned for the class.

2. In a course which has several sections meeting at different hours, a common test for all sections may be given only by arrangement with the Registrar. A schedule of such tests is made up at the beginning of the semester.

3. Attendance at hour tests scheduled outside the normal meeting time of the class shall not have precedence over attendance at other scheduled activities or other important commitments of the students concerned. Faculty members must be prepared to give a make-up test for those unable to be present at the time set.

4. University academic responsibilities have priority over other campus events. Attendance at (1) regularly scheduled classes have priority over specially scheduled common hour examinations, (2) common hour examinations have priority over attendance at other activities.

Final Exams:

1. The examination period at the end of each semester is set by the official University calendar.

2. Final examinations shall be given only during the regular examination period except by permission of the dean of the college/school on request of the chairperson of the department. No examination (regular or final) shall be given during the last week (the last five instructional days) of the semester except lab exams given in courses with specific lab sections.

3. The time and place of each final examination are determined by the Registrar and a schedule is circulated and posted. Any change in the scheduled time or place may be requested by the chairperson of the department concerned when conditions seem to warrant such special arrangement. Decision on such requests rests with the Registrar.

4. In every course in which a final examination is given, every student shall take the examination unless excused by the instructor.

5. Students having a conflict in their final examination schedule must notify the faculty concerned of such conflict not later than the close of business one week prior to the last day of classes for the semester in which the conflict arises.

6. Students who are absent from a final examination for any reason must report that fact and the reason, in person or in writing, to their instructor within 24 hours. If the absence is due to any situation beyond the reasonable control of the student (e.g. illness or family tragedy), the instructor must provide the student with the opportunity to complete the course requirements. At the instructor’s discretion, this may be an examination or some other suitable project. The instructor may require evidence in support of the student’s reason for absence.

7. If the absence is not reported as provided above, or is not excused by the instructor, the examination is regarded as failed.

8. No student shall be required to take three or more final examinations in one 24-hour period.

9. Unless a mutually agreeable alternative time can be reached by the student and the instructor, the scheduled make-up will occur the next day after the regularly scheduled examination. These considerations are subject to the following constraints: all exams will be given in the final exam period and all conflicts must be resolved before the start of the final exam period.

10. Students will select which of the three examinations they wish to take at an alternative time. In cases where the instructors in all three sections feel it is impossible to give the examination at an alternative time, and all conflicts are in the same academic unit, the appropriate dean’s office, in consultation with the faculty involved, will establish which of the three examinations will be taken as a make-up. If the unresolved conflict involves more than one college, the deans of the units in question will resolve the matter. If the deans involved cannot reach agreement, then a person from the Provost’s Office will establish which of the three examinations will be taken as a make-up.

11. All final examination materials should be retained for at least one month after the final examination session in case any questions arise concerning grades and to afford students the opportunity to review their graded final examination papers if they wish to do so.

**Grades**

Grades are reported and recorded as letter grades. Student grade-point averages (GPA) are calculated from quality point equivalents noted here:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Points per Credit Hour</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>4.00</td>

</table>

In certain instances, grades are assigned that will appear on the transcript, but will not be used in grade-point calculation. These grades are:
The **XC** grade is assigned when the nature of the coursework makes it unreasonable or impossible for the student to complete the required work within the regular semester.

**AU:** Students wishing to regularly attend a course, but not receive credit, may register as an auditor, with the approval of the dean and the instructor. Auditors have no claim on the time or service of the instructor. Students must meet minimum levels of performance set by the instructor at the time of registration in order to receive an audit grade. Tuition is charged at the applicable rate. Under no circumstances will changes be made after the add/drop period to allow credit for courses audited.

**INC** grades may be assigned when coursework is not completed for reasons beyond the student’s control. Incompletes require the approval of the student’s college/school dean. The incomplete course requirement will be satisfied at the earliest possible date, but not longer than the beginning of the corresponding semester of the next academic year. In cases of laboratory assignments, the student must complete all work the first time that the laboratory experience is offered again. Instructors will fill out an incomplete card and forward it to the student’s dean and include the reason for the incomplete as well as the completion date agreed to by the student and instructor. It is the student’s responsibility to learn from the dean’s office whether the request has been approved, the date of completion, and, from the instructor, the nature of all outstanding requirements.

Incompletes may be approved for the following reasons: Medical, personal tragedy or academic. In all instances, students must contact the appropriate deans’ office to obtain necessary applications information.

**P/NP:** Degree program students, not on academic trial, are permitted to take up to six courses (three courses for two-year students; or as many courses as they have semesters remaining for future transfer students) on a pass/no pass basis, beginning in their sophomore year (second semester of the first year for two-year students). Courses in the student’s major department, either for the major or for the degree, and electives within the distribution requirements of a department may not be taken on a pass/no pass basis. This option may be used without condition for free electives. It also may be used for physical education (activity) courses, whether taken to fulfill a requirement or as electives, and shall not be counted as a part of the six standard courses described above.

Students must complete all work normally required in these courses to receive full credit toward graduation for passing them. The instructor will not be informed of the students status and the Registrar will record grades of D or higher as PASS and grades of F as NO PASS. The grade submitted by the instructor will not become available to the student nor to any third party.

To apply, a PASS/NO PASS Request Form, obtained from the Registrar’s Office, must be approved by the student’s academic advisor and submitted to the Registrar’s Office during the first two weeks of the semester. Requests to be removed from that status must be filed during the same period. Any question about a course or courses being appropriately elected as pass/no pass for a student will be resolved by the student’s college/school dean.

**S/U** is used in courses where the A-F grade is inappropriate, such as in seminars, internships, practica, etc. The student will receive the appropriate credit hours toward graduation for the S grade, but not for the U grade. Courses using this grading system are so indicated in the catalogue description. The S/U is available only on a whole course basis and is available for courses that count towards degree requirements.

**Grade Appeals**

Students who feel that they have received an unfair grade should first contact the Registrar’s Office to verify that the grade submitted by the instructor is the same as that printed on the grade report. If the grade has been reported correctly, a student shall next contact the instructor, department chair, and dean of the college/school in which the course is offered (in that order) to discuss the matter. A decision to change a grade can be made only by the instructor.

Grade changes must be made by the instructor and approved by the student’s dean by the end of the first month of the following semester unless an extension is granted by the student’s dean.

**Dean’s List**

Dean’s List status is awarded to full-time undergraduate students with a cumulative grade-point average of not less than 3.0 who stood in the top 20 percent of each class of their college/school during the preceding semester. The deans’ lists are published at the beginning of each semester. Full-time enrollment in this case shall be a minimum of 12 credit hours in courses in which grades of A, B, C, D, or F can be given.

In addition, each semester a Continuing Education Honors List recognizes the top 20 percent of nondegree students who have had a long association with UVM and achieved a high cumulative grade-point average.

**Repeated Courses**

Students who repeat a course only receive credit once for the course. The grades for all occurrences of the course remain on the permanent academic record and all are included in computing the cumulative grade-point average.

**Academic Reprieve Policy**

The Academic Reprieve Policy is designed to make it possible for former UVM students, whose academic performance when first enrolled was below standard, to resume their studies without the encumbrance of the grades previously earned.

The Academic Reprieve Policy is available to returning students who have not been enrolled at UVM or any other accredited institution of higher education for a period of at least three calendar years.

Former students returning to the University may request the application of the Academic Reprieve Policy only once in their career at UVM. The established procedures and criteria for admission or readmission apply to students applying for an Academic Reprieve.
The dean of the college/school in which the student is enrolled at the time of initial eligibility for the application of the Academic Reprieve Policy shall determine eligibility for, and application of, the policy. Eligible former students must file a petition with the appropriate dean requesting reprieve of all prior course work at the University, either at time of admission or reenrollment or before the close of the first semester of re-enrollment. The Reprieve Policy includes all previous UVM work and does not allow the students to pick and choose individual courses for reprieve. All courses with grades below passing are ignored, credit hours for courses passed are carried forward, but the grades are not figured in the new grade-point average, which begins again at zero.

Any person electing the reprieve option is required to complete a minimum of 30 additional regularly graded credits at UVM before a degree may be awarded (15 regularly graded credits for the associate degree); these credits are not open to the pass/fail option. Those electing the reprieve option may qualify for honors at graduation only on the same basis as any transfer student, i.e. completion of 60 or more regularly graded credits at UVM (50 or more regularly graded credits for the associate degree programs).

Persons electing the reprieve option will be required to meet degree requirements of the catalogue in effect on the date of the student’s application for readmission.

The Reprieve Policy applies solely to regular undergraduate degree programs. Graduate programs are specifically excluded.

Low Scholarship

Following are the general University regulations relating to low scholarship. The Studies Committee of each college/school may determine more stringent requirements. Students with questions regarding their academic standing should consult their college/school dean.

“On Trial”: This is an intermediate status between good standing and dismissal in which students remain enrolled according to stated academic conditions of their college/school.

Students are placed “on trial” by their dean or designated committee of their college/school. Special academic conditions may be set in each case. Normally the period of “trial” status is one semester.

This policy applies in the following instances:

(1) Students, having been dismissed for low scholarship, are placed “on trial” upon readmission.

(2) Students may placed “on trial” if in any semester they have failed one-half or more of their semester hours, but have been permitted to continue in college/school.

(3) Students whose records have been consistently below the graduating average or generally unsatisfactory in any semester may be placed “on trial” or continued “on trial” even though they do not come within the provisions that apply to “Separation.”

Separation: Students are dismissed from UVM if they receive grades below passing in one-half or more of their semester hours in any semester, unless they are allowed to continue by action of the designated committee.

Students who fail to meet the condition of their trial or whose record has been unsatisfactory and consistently below the graduation average may be dismissed for low scholarship even though they do not come within the “On Trial” provisions.

Students dismissed for low scholarship must address their application for readmission to their college/school and receive written approval from their dean before enrolling in any University course.

Student dismissed for disciplinary reasons must receive written approval from the Vice President for Student Affairs before enrolling in any University course.

Transcripts

An official transcript is the reproduction of a complete, unabridged permanent academic record validated with the University seal, facsimile signature of the Registrar, and date of issue. A rank-in-class entry is made upon completion of undergraduate degree requirements.

Students and alums may obtain an official transcript of their permanent academic record by writing the Office of the Registrar, 360 Waterman Building. Please allow a minimum of one week for normal processing and three weeks following the end of a semester. Transcripts are not released when there is indebtedness to the University.

WAYS TO EARN CREDIT

Transfer of Credit

Students seeking to transfer academic credit may do so only for courses that are taken at accredited institutions and are comparable in content, nature, and intensity to courses taught at The University of Vermont. Credit is not given for grades lower than C. To insure transferability of courses to be taken elsewhere, degree students must secure prior approval for each course in writing from Transfer Affairs. Questions regarding credit transfer should be directed to the Office of Transfer Affairs, 360 Waterman.

Credit by Examination

A degree student may, under the following conditions, receive credit for a course by taking a special examination and paying the special examination fee charge of $50 per credit hour. The examination fee must be paid prior to taking the examination.

A request for such an examination must be made in writing at least one month before the date of the examination, and it must be approved by the student’s advisor, the chairperson of the department in which the course is given, and the dean, in that order. The student must neither have audited, previously received a grade or mark, nor have attempted a prior special examination in this course at UVM or at any other institution of higher education. Only specific University courses may be challenged using special examination. Readings and Research, Honors Research, etc., are specifically excluded. Special Topics may be challenged only if that course is offered during the semester in which the special examination is being requested. The student may not take a special examination in a course whose content is presupposed by other courses the student is currently enrolled in or has already taken. In cases of uncertainty, the department chairperson shall decide whether it is appropriate for the student to take a special examination for credit in a particular course. Upon passing the special examination, as determined by the examiner and the chairperson of the department in which the course is given, the student receives credit, but not a grade, for the course. Credit by examination forms are available in the Office of the Registrar, 360 Waterman Building.

College-Level Examination Program (CLEP)

The University considers credit for most of the 30 specific...
subject CLEP exams providing the student has not previously attempted a similar course of study at a college level. Scores acceptable for credit are comparable to attaining a level of accomplishment equal to a B in a graded course situation. Individual exams may earn a student three, six, or eight semester hours of credit depending on the nature and scope of the material covered. Credit is not granted for the general exams.

Credit granted for CLEP Examinations may be applied toward distribution requirements and to the total semester hours specified for a particular degree program when approved by the dean of the college/school in which the student is subsequently a candidate for a degree. Information about CLEP and application forms are available at the Office of Transfer Affairs, 360 Waterman Building.

Credit for Calculus
Credit will be given for Math. 21, or Math. 22 and Math. 121, according to the following guidelines.

May receive credit for Math. 21 provided the student:
1. Has not taken the advanced placement test in mathematics; and
2. Has not attempted Math. 21 for credit at UVM; and
3. The average of the grades received in Math. 22 and Math. 121 is B or better; and
4. Received a B or better in Math. 121.

May receive credit for Math. 22 provided the student:
1. Has not taken the advanced placement test in mathematics; and
2. Has not attempted Math. 22 for credit at UVM; and
3. Received a B or better in Math. 121.

Academic Learning Integrated with Volunteer Experience (ALIVE)
Through this program, the University of Vermont offers college credit to members of AmeriCorps*VISTA (Volunteers in Service to America). VISTA members participating in ALIVE earn up to nine undergraduate or graduate credits in a variety of disciplines for structured reflection of their service experience. VISTA scholars will attend workshops, create portfolios and work with faculty advisors during residency weekends on campus. It will not detract from their time serving in communities. UVM will annually award six scholarships to Vermont VISTA scholars who participate in ALIVE.

Credit for Military Service
University of Vermont degree students may have their military service record reviewed for possible transfer credit. Veterans should present form DD 214 to the Office of Transfer Affairs; active duty personnel should have form DD 215 sent directly from the educational officer on the base. Army personnel seeking credit other than Physical Education should have an AARTS transcript sent directly from: AARTS Contractor Representative, Educational Testing Service, P.O. Box 2819, Princeton, NJ 08540. All documents except form DD 214 should be sent directly to the Office of Transfer Affairs, University of Vermont, 360 Waterman Building, Burlington, VT 05405. Students should contact the Office of Transfer Affairs for more information.

DEGREE REQUIREMENTS
Degrees are conferred on the recommendation of the colleges/schools. Specific degree requirements may be found in the catalogue sections devoted to the respective colleges/schools.

To be eligible for graduation, a student must have attained a cumulative grade-point average sufficient to meet the minimum requirements for the college/school in which the student is officially enrolled. Beginning with the class of 1984, the minimum grade-point average for graduation is 2.00. Grades in courses accepted for transfer credit are excluded in computing this average.

Every degree candidate must have taken 30 of the last 45 credit hours (15 of the last 30 for two-year students) in residence at the University before being awarded their degree. An exception to this rule exists for those students who have completed three years of premedical study in the University and are awarded their degrees after successful completion of one year of study in any approved college of medicine. Other exceptions to this rule may be made only upon decision of the dean or the appropriate faculty committee of the student’s college/school. To qualify for a second bachelor’s degree, the candidate must have fulfilled all the requirements for the degree and must have taken a full year of course work, usually 30 hours, in addition to that taken to qualify for the first degree.

Two physical education credits, normally completed during the first or sophomore year, are required of all undergraduate students in four-year programs. These credits will be included in the total number of hours required for graduation. Students may opt to take physical education on a pass/no pass basis. Medical examinations are required of all new students. Those with serious conditions may be given restricted work or may be excused by the Director of the Student Health Center.

Students pursuing two-year degree programs shall be required to complete one credit of physical education course work.

Students 25 years of age or older at time of admission or readmission are exempt from physical education requirements.

University Honors
The bachelor’s and associate’s degrees may be conferred with honors, by vote of the Faculty Senate, in recognition of general high standing in scholarship. Three grades are distinguished and indicated by inscribing on the diploma the words cum laude, magna cum laude, or summa cum laude.

Honors are determined in the following manner: Within the graduating class of each college/school, students in the top one percent will receive summa cum laude; the following three percent will receive magna cum laude; the next six percent will receive cum laude. The total number of honors awarded will not exceed ten percent of the graduating class of each college/school.

Honors will be calculated on all grades received at UVM. To be considered, a student must have taken at least 60 hours (30 hours for two-year programs) at UVM in which a letter grade of A, B, C, D, or F has been awarded.

STUDENT RESPONSIBILITY
Classroom Code of Conduct
Faculty and students will at all times conduct themselves in a manner that serves to maintain, promote, and
enhance the high quality academic environment befitting the University of Vermont. To this end, it is expected that all members of the learning community will adhere to the following guidelines:

1. Faculty and students will attend all regularly scheduled classes, except for those occasions warranting an excused absence under the University Attendance Policy (e.g., religious, athletic, and medical).

2. Students and faculty will arrive prepared for class and on time, and they will remain in class until the class is dismissed.

3. Faculty and students will treat all members of the learning community with respect. Toward this end, they will promote academic discourse and the free exchange of ideas by listening with civil attention to comments made by all individuals.

4. Students and faculty will maintain an appropriate academic climate by refraining from all actions that disrupt the learning environment (e.g., making noise, ostentatiously not paying attention, and leaping and reentering the classroom inappropriately).

**Attendance Policy**

Students are expected to attend all regularly scheduled classes. The instructor has the final authority to excuse absences. It is the responsibility of the instructor to inform students of his or her policy for handling absences and tardiness, and the penalties that may be imposed. Notification should be done both verbally and in writing at the beginning of each semester.

It is the responsibility of the student to inform the instructor regarding the reason for absence or tardiness from class, and to discuss these with the instructor in advance whenever possible. The instructor has the right to require documentation in support of the student’s request for an excuse from class. If an out-of-class exam is scheduled which conflicts with a regularly scheduled class, the regularly scheduled class has priority.

The instructor has the right to disenroll any student who fails to attend a scheduled course by the third instructional day of a semester or the second scheduled class session of a course, whichever comes later, unless the student has notified the instructor and has been excused. To disenroll students the instructor must notify the Registrar, who will remove the student’s name from the class list and the course from the student’s schedule. The student is responsible to determine whether or not she or he is enrolled in a class.

*When a student is unable to attend class for a health reason, the student may give permission for the instructor to discuss the situation with a representative from the Center for Health and Wellbeing. As with all absences, the faculty member has final authority to excuse students from classes.

**Athletic-Academic Conflicts**

Students participating in inter-collegiate athletics should plan their schedules with special care, recognizing the primary importance of all of their University academic responsibilities. Each semester, members of UVM varsity and junior varsity teams are responsible for documenting in writing any conflicts between their planned athletic schedule and the class schedule to their instructors by the end of the second full week of classes. Students and instructors should then discuss potential conflicts between course requirements and intercollegiate competitions. When an unavoidable conflict exists, the student and instructor should seek a resolution which permits the student to address the course requirement and participate in the athletic competition. The instructor has final authority on this matter.

**Religious Holidays**

Students have the right to practice the religion of their choice. Each semester students should submit in writing to their instructors by the end of the second full week of classes their documented religious holiday schedule for the semester. Faculty must permit students who miss work for the purpose of religious observance to make up this work.

**Freedom of Expression and Dissent**

The University of Vermont is a place to learn and to teach. It is not a cloister — it does not live in a vacuum. It is both in the world and of the world. Its mission is to educate people for leadership in society. (Board of Trustees, May 1969)

Fundamental to our entire philosophy is our firm belief that rights guaranteed by the First and Fourteenth Amendments to the Constitution of the United States must be protected on the campus as elsewhere and that local, state, and federal laws must prevail on campus. Becoming a member of the University community in no way abrogates or compromises the rights, which the Constitution of the United States guarantees to all persons.

Within the University setting as within society at large, the exercise of one’s rights must be tempered by recognition of the rights of others. For example, the exercise of free speech may unreasonably infringe upon the right to learn. The laws of society and the mission of the University establish the framework within which disagreement, dissent, demonstration, and advocacy may, indeed, must, occur. For humankind to progress, the educational process must be dynamic even if fraught with controversy, for change cannot take place until the first question is raised. The discovery of new propositions or new solutions also may be followed by passionate advocacy. Such advocacy must never replace the continued pursuit of the University’s essential purpose of learning and teaching.

It is within this context that the University rejects the use of, or the threat of force as a means of resolving differences. Violence is both unnecessary and inappropriate for those who have access to reasoned discourse and is unacceptable within an institution dedicated to reason. The University officer responsible for implementing the Policy Statement on Freedom of Expression and Dissent, when students are involved, is the Vice President for Student Affairs. In all cases, the designated officer shall attempt to resolve the situation through efforts of persuasion. The University must, if efforts at persuasion have failed, resort to the use of any legal remedy deemed necessary. Those engaged in unlawful disruption, consequently, may expect appropriate responses from either University or other law enforcement authorities or both.

A full statement of the policy is in The Cat’s Tale, available online at www.uvm.edu/~dosa/handbook. Each student is responsible for knowing and observing this policy.

**Academic Discipline**

The University expects each student to maintain high standards of personal conduct and social responsibility at all times both on and off campus. As responsible citizens, all students are required to observe and to share in the support of University regulations. Any student who fails to uphold these standards is subject to disciplinary action.

The disciplinary authority of the University is vested in the President. In such cases as the President considers proper, this authority may be delegated to the several deans and to appropriate judicial bodies. The continuance of each student, the receipt of academic credits, graduation, and the conferring of any degree or
the granting of any certificate are strictly subject to the
disciplinary powers of the University. The University is
free to cancel a student’s registration at any time on any
grounds if it considers such action to be for the welfare of
the institution.

Policy on the above matters is explained in detail in The
Cat’s Tale, available online at www.uvm.edu/~dosa/
handbook. Each student is held responsible for
knowledge and observance of these rules and regulations,
including those concerned with academic honesty.

**Academic Honesty**

The principal objective of the policy on academic honesty is
to promote an intellectual climate and support the
academic integrity of the University of Vermont. Academic
dishonesty or an offense against academic honesty includes acts that may subvert or compromise the
integrity of the educational process. Such acts are serious
offenses that insult the integrity of the entire academic
community.

Offenses against academic honesty are any acts that would
have the effect of unfairly promoting or enhancing one’s
academic standing within the entire community of
learners which includes, but is not limited to, the faculty
and students of the University of Vermont. Academic
dishonesty includes knowingly permitting or assisting any
person in the committing an act of academic dishonesty.

The policy distinguishes between minor and major
defenses. Offenses purely technical in nature or in which
the instructor does not perceive intent to achieve
advantage are deemed minor and are handled by the
instructor. Major offenses are those in which intent to
achieve academic advantages is perceived.

A full statement of the policy can be found in The Cat’s
Tale, online at www.uvm.edu/~dosa/handbook. Each
student is responsible for knowing and observing this
policy.

**UNIVERSITY RESPONSIBILITY**

Many courses involve instruction in and the use of various
types of power equipment, laboratory apparatus, and
specialized facilities. The University takes every
precaution to provide competent instruction and
supervision of such courses. It is expected that students
will cooperate by following instructions and exercising
precaution. In case an accident resulting in personal
injury does occur, the University can assume no
responsibility.

**Notification of Rights Under FERPA for Post-Secondary Institutions**

The Family Educational Rights and Privacy Act (FERPA)
affords students certain rights with respect to their
education records. These rights include:

1. The right to inspect and review the student’s
education records within 45 days of the day the
University receives a request for access. Students
should submit to the registrar, dean, head of the
academic department, or other appropriate official,
written requests that identify the record(s) they wish
to inspect. The University official will make
arrangements for access and notify the student of the
time and place where the records may be inspected.
If the records are not maintained by the University
official to whom the request was submitted, that
official shall advise the student of the correct official
to whom the request should be addressed.

2. The right to request the amendment of the
student’s education records that the student believes
are inaccurate or misleading. Students may ask the
University to amend a record that they believe is
inaccurate or misleading. They should write the
University official responsible for the record, clearly
identify the part of the record they want changed,
and specify why it is inaccurate or misleading. If the
University decides not to amend the record as
requested by the student, the University will notify
the student of the decision and advise the student of
his or her right to a hearing regarding the request
for amendment. Additional information regarding the
hearing procedures will be provided to the
student when notified of the right to a hearing.

3. The right to consent to disclosures of personally
identifiable information contained in the student’s
education records, except to the extent that FERPA
authorizes disclosure without consent. One
exception which permits disclosure without consent
is disclosure to school officials with legitimate
educational interests. A school official is a person
employed by the University in an administrative,
supervisory, academic or research, or support staff
position (including law enforcement unit personnel
and health staff): a person serving on the
Board of Trustees; or a student serving on an official
committee, such as a disciplinary or grievance
committee, or assisting another school official in
performing his or her tasks. A school official has a
legitimate educational interest if the official needs to
review an education record in order to fulfill his or
her professional responsibility.

4. The right to file a complaint with the U.S.
Department of Education concerning alleged
failures by the University of Vermont to comply with
the requirements of FERPA. The name and address
of the office that administers FERPA:

Family Policy Compliance Office
U.S. Department of Education
600 Independence Avenue, SW
Washington, DC 20202-4605

**Name and Address Exclusion**

The Family Educational Rights and Privacy Act of 1974
grants to all students the right not to have personal
information contained in the records of the University
released to any individual, agency, or organization. UVM
feels that the following constitutes such information.

Name
Address (including e-mail address)
Telephone number
Dates of attendance
Class
Previous institution(s) attended
Major field of study
Enrollment status
Awards
Honors (including Dean’s list)
Degree(s) conferred (including dates)
Past and present participation in officially-recognized
sports and activities
Physical factors (height, weight of athletes)
Date and place of birth

Students who do not wish to have the above information
released should fill out an information exclusion card at the
Registrar’s Office.
Academic Options

In addition to the areas of study detailed in the following sections of the catalogue, a number of curricular options are available which provide unique opportunities for UVM students. Students interested in a curriculum focusing on the environment and environmental problems will be interested in the options described in the following section “Studying the Environment.”

Education Abroad

The Office of International Education (OIE), located in Room B161 of the Living/Learning Center, is an advising and resource center for students interested in a year, semester, or summer overseas study experience. Study Abroad Advisors maintain extensive information about overseas programs, institutions, and volunteer opportunities. They, in conjunction with UVM Transfer Affairs, help students identify programs appropriate to their needs and arrange credit approval from UVM. All students intending to study overseas and receive transfer credit from UVM are required to visit the OIES and to complete the Study Abroad Approval Form prior to departure. Contact the OIES for deadlines. Official approval is required for students to be guaranteed that their programs of study are eligible for transfer credit and that any financial aid will apply. There is a $400 study abroad fee for semester and year-long programs and a $200 fee for summer programs.

To be approved to study abroad, students must:
1. Have a minimum cumulative GPA of 2.5, or between 2.0 and 2.5 with a minimum semester average of 2.5 for each of the last two semesters prior to studying abroad.
2. Meet the admissions criteria of a University approved study abroad program. University approved programs include those programs on the UVM Approved List.

Students with a GPA above 2.0 who do not qualify under point one above may petition their academic dean for permission to study abroad. Students seeking such permission should request an Academic Eligibility Form from the Office of International Education to be signed by their academic dean.

Students who have been dismissed or are on academic trial are generally not eligible to participate in study abroad programs. Such individuals are encouraged to consult with their individual deans’ offices regarding their interpretation of this policy. Under no circumstances will a student on disciplinary suspension the semester before studying abroad, and/or the semester they are scheduled to study abroad, receive official UVM approval for overseas study.

SPONSORED PROGRAMS

The Buckham Overseas Studies Program in England is a scholarship program at the University of Kent, Canterbury, administered by the College of Arts and Sciences and funded through a generous endowment from the Buckham family. The program runs for the full academic year and is designed to provide an opportunity for up to 20 exceptional English majors to spend their junior year at a modern university in an ancient British city. Living and studying in a fully integrated way with English students, the UVM students earn up to 32 credits. Cost of participation, including tuition, transportation, room and partial board, does not normally exceed the costs incurred during a year on the UVM campus.

To apply to the program, a student must be an English major with a cumulative and an English GPA of 3.0 and have earned at least 60 credit hours (including English 85 and 86) by the time the scholarship begins. For further information, contact Prof. Helen Scott, Department of English, 417 Old Mill, (802) 656-1151.

UVM TRAVEL STUDY PROGRAMS

UVM offers several short-term travel study programs. Most of these UVM faculty-led programs are three-credit courses offered during the summer or January break. Previous program locations have included Mexico, England, South Africa, Finland, Honduras, the West Indies, Indonesia, Costa Rica, and Cuba. These programs are open to degree students and individuals who have already obtained college degrees. For a complete listing and fee information, visit the Continuing Education website http://uvnce.uvm.edu.

UVM EXCHANGE PROGRAMS

UVM participates in a number of exchange programs with institutions around the world. In an exchange program, all UVM participants pay UVM in-state tuition and fees (and frequently, UVM room, and board) and exchange places with a student from a foreign institution. Exchange programs are a good financial value. These programs provide direct immersion into the academics and culture of the country. Although most exchange programs require a good command of the host language, many offer programs entirely in English.

UVM/University of Western Australia Exchange Program: This program in Perth, Australia, was developed by UVM’s School of Natural Resources (SNR), and SNR students will receive priority placement to pursue three-credit studies in natural resources. Courses are also offered in business, arts and sciences, agriculture, Asian studies, and Aboriginal studies. For more information, contact Jan Spencer in SNR or the OIE.

UVM/University of Belgrano Exchange Program: This program in Buenos Aires, Argentina can accommodate various levels of non-native Spanish speakers and students can choose courses in Spanish language and literature, culture, history, economics, and politics. For more information, contact Catherine Connor, Department of Romance Languages, or the OIE.

UVM/University of Lapland Exchange Program: This exchange program in Finland is designed especially for Social Work majors and offers UVM students the opportunity to study social work in English. For more information, contact Stanley Witkin, Social Work Department, or the OIE.

UVM/Sussex Exchange Program: This exchange is located at the University of Sussex in Brighton, England. Sussex is well recognized for both its humanities and social science offerings as well as its science and engineering programs. Twenty percent of the Sussex student body is international. For more information, contact Professor George Moyser, Department of Political Science, or the OIE.

UVM/Augsburg Exchange Program: This exchange is with the Universitat Augsburg, Bavaria, Germany. The UVM student needs to have a solid command of the German language and be pursuing German or European Studies. For more information, contact Professor Dennis Mahoney, Department of German and Russian, or the OIE.
International Student Exchange Program (ISEP): This program enables UVM students to study in 46 different countries in Europe, Asia, Australia, Canada, Africa, and Latin America. Many sites offer instruction in English, as well as in the language of the host country. For more information, contact the Office of International Education.

Kansai Gaidai Exchange Program: Students interested in Japanese language and culture may spend a semester or year studying at this university near Osaka, Japan. For more information, contact Professor Tomiko Hayashi, Area and International Studies, or the OIE.

UVM/Vienna Exchange Program: Students interested in international business may spend a semester or year studying at the Wirtschafts Universität Wien, Vienna, Austria. All courses are taught in English. For more information, contact the School of Business Administration, or the OIE.

UVM/Edith Cowen Exchange Program: This exchange program located in Perth, Australia was developed by UVM’s School of Nursing. This provides opportunity for nursing students to take classes in their major overseas. For more information contact Rycki Maltby, School of Nursing, or the OIE.

UVM/Stockholm Exchange Program: This exchange program with the Stockholm Institute of Education, Stockholm, Sweden, provides opportunities for preK-3 education students to study for the spring semester. For more information, contact Dale Goldhaber, College of Education and Social Services, or the OIE.

UVM-AFFILIATED STUDY ABROAD PROGRAMS

Institute for French Studies in Paris: This option provides full-year and semester programs in Paris in a high-quality, all-French immersion program. Courses are offered in French, history, political science, European studies, economics, and art history at ISP and L’Institut d’Etudes Sociales, la Sorbonne—Paris IV, and l’Institut National des Langues et Civilisations Orientales. Credit-bearing internships in French businesses, international organizations, fashion, art galleries, museums, and schools are possible. The program offers a wide variety of living arrangements and French student peer-advisors. UVM financial aid (but not tuition remission) may be applied to program costs. For information and applications, contact the Department of Romance Languages, UVM.

Semester Program in Grenoble, France, in International Marketing: This program provides an opportunity for students interested in international business, economics, and trade to participate in an English-speaking program while gaining exposure to France’s history, language, and culture. For more information, contact the School of Business Administration, 209 Kalkin Hall, UVM.

Junior-Year-in-Salzburg Program: Administered by the University of Maine, this academic-year program at the University of Salzburg, Austria, is open to qualified UVM undergraduates in all major fields. Basic requirements are completion of sophomore year; two years of college-level German with an average of B; and good academic standing (a cumulative average of 2.5). For information, contact Prof. Helga Schreckenberger, Department of German and Russian, UVM.

The Swedish Program: Sponsored by the University of Stockholm and a consortium of participating American colleges and universities (of which UVM is a member), this non-profit program focuses upon organizations and public policy in every social science discipline. Its curriculum is thematically specific, interdisciplinary, and relevant to the host country (Sweden). For more information, contact Professor Anthony Magistrale, English Department, 400 Old Mill, or the OIES.

OTHER POPULAR STUDY ABROAD PROGRAMS

The following programs are just a few of those on the UVM Approved List. These programs have been especially popular among faculty, staff, and students. For a complete Approved List, contact the Office of International Education, or refer to the OIE website www.uvm.edu/~oie.

American Institute for Foreign Study (AIFS): A publicly owned company, AIFS Inc. is a nationwide organization that provides comprehensive overseas study and travel programs in Argentina, Australia, Austria, the Czech Republic, England, France, Holland, Ireland, Italy, Japan, the Netherlands, Russia, South Africa, and Spain.

Boston University: Boston University offers academic-year, semester, and summer study abroad opportunities in 13 countries on six continents. Several of the program sites provide students with an integrated internship component for a portion of their academic experience and credit. Other program sites feature direct enrollment options in local universities for advanced language students.

Institute for the International Education of Students: This nonprofit organization sponsors programs in Argentina, Australia, Austria, China, England, France, Germany, Ireland, Italy, Japan, and Spain. Semester, year, and summer options are available.

School for International Training (SIT): SIT is an accredited college of World Learning Inc., which was founded in 1932 as The U.S. Experiment in International Living. More than 50 experiencedly-focused programs are offered in over 40 countries, including the continents of Africa, Asia, and South America. All programs include a Life and Culture Seminar, a Methods and Techniques of Field Study Seminar, an Independent Study Project, a home-stay opportunity, and, if appropriate, an intensive language study.

The Living/Learning Center

The Living/Learning Center is an academic resource whose mission is to create an environment for students to integrate their academic studies and their residential experiences. To expand the intellectual horizons of students, the Center encourages faculty, staff, and student programs that foster innovative and interdisciplinary academic experiences that bring the intellectual life of the University in close alliance with the students’ lives outside the classroom. Even program sponsoring educational activities to which the entire UVM community is invited, making the Living/Learning Center a focus of campus cultural and intellectual activity. An evening’s activities might include a sign language workshop, conversational Russian, artistic performances, gallery exhibits, faculty lectures, or a presentation by one of the Center’s programs. In addition to being an academic and student support unit, the Living/Learning Center is also a residence, housing 588 students, as well as faculty and administrative offices, including the Center for Career Development and the Learning Cooperative.

The foci of the Living/Learning Center are the 30 to 35 academic programs, each of which is a year-long plan of course work, independent study, seminars, field trips, and other special activities which support a specific program theme. Recent programs include: Africa House, Geology and Ecology of the Lake Champlain Basin, La Maison Francaise, Creative Writing, The Art of Photography, and Women in Science. Programs are designed and directed by students or college members and reflect educational interests of the program leaders and participants. The Center provides a unique environment for each of the University schools and colleges to offer particular curricular elements in an atmosphere which fosters broad opportunities for intellectual discourse.
The first-year, sophomore, junior, and senior students who reside in the Center live with fellow program members in five, six, or seven-person suites adjoining a living room and private bathroom facilities. This fosters close friendships and communication among the program members. Suites are located in each of the five interconnected buildings, as are classrooms, laundry rooms, common living rooms and kitchens, as well as apartments for resident faculty and their families. The Center has a reading room/reference library, microcomputer laboratory, music practice rooms, a grocery store, dining hall, preschool, an audiovisual room, Post Office, a central lounge with fireplace, and an art gallery. Through the efforts and expertise of accomplished staff artists, the Center has pottery and photography studios that provide direct program support for the Living/Learning Center community, as well as providing all members of the University community with the opportunity for informal instruction and access to the facilities and equipment.

The Living/Learning Center contributes to the University’s mission in its emphasis on the integration of the personal, professional, and intellectual growth of the student. The Center further encourages programs with interdisciplinary, international, and multicultural themes that promote creative excellence. The Living/Learning Center offers the opportunity to be part of a community of people; students, faculty, and administrative staff, who share the goal, work and excitement of improving the breadth and quality of their University experience. To learn more about the Center, visit our web site at http://www.uvm.edu/learning/LearningCenter or e-mail us at living.learning@uvm.edu.

Preprofessional Options

Premed and Predental options are available to all students, regardless of major. Advising is coordinated through UVM Career Services, and students are strongly encouraged to consult the Premed/Predental advisor early on and throughout their college career. See http://career.uvm.edu/students/Pre-med.html.

Prelaw advising is available at both UVM Career Services and through several department faculty and staff in the College of Arts & Sciences. See http://career.uvm.edu/students/PRELAW/.

Accelerated Degree Programs

UVM offers accelerated degree and combined bachelor’s and master’s programs in several areas. These include, but are not limited to, the following:

- 3+3 Veterinary Medicine Program Students receive a combined BS/DVM from UVM's College of Agriculture and Life Sciences and Tufts University. Students apply during their application for undergraduate admission to UVM.
- 3+3 Law School Program Students receive a combined BA/JD from UVM and Vermont Law School. Arts and Sciences students may apply to the program after completion of the first year at UVM.
- Five-Year Combined BS/MS in Computer Science Computer Science students apply at the end of the junior year at UVM.
- Accelerated Licensure/Master’s in Secondary Education Education students apply during their junior year at UVM.
- 3+3 BS/MPT Physical Therapy Program Students may apply at the time they submit their undergraduate application to UVM, or students in the following categories may apply during their junior year: any arts and sciences major; nutritional science majors; biological science majors.
- 4+1 MBA Program Available to business majors and business minors. Students apply in their junior year.

Consult the Graduate College catalogue or appropriate dean’s office for information about these or other accelerated degree programs.

Undergraduate Research

Undergraduate students assist faculty in research in a broad range of fields. Several programs provide research grants for undergraduate students. Notable examples include the HELIX (Hughes Endeavor for Life Science Excellence) and SUGR/FAME (Stimulate Undergraduate Research Experience with Faculty Mentoring) programs. Students are encouraged to consult their dean’s office or faculty advisor(s) regarding these and other research opportunities.

Military Studies

Army Reserve Officers' Training Corps (ROTC) Program

The Army ROTC program offers men and women the opportunity to develop leadership and management skills that lead to an officer commission as a second lieutenant in the United States Army, Army Reserve, or Army National Guard.

Department Course Offerings The four-year Military Studies program at UVM consists of a two-year Basic Course (first-year and sophomore year) and a two-year Advanced Course (junior and senior year).

Interdepartmental Course Offerings The Military Studies Department also offers one-credit courses in related fields on behalf of the UVM Department of Physical Education including: PEAC Course 014-Orienteering, Course 017-Military Fitness, and Course 019-Backpacking. These courses are open to all UVM students. Students incur no military obligation for taking these courses.

Army ROTC Scholarships and Financial Aid Scholarships: Two-, three-, and four-year Army ROTC Scholarships paying up to $17,000 per year are available to qualified applicants. Application for the four-year Army ROTC scholarship is made during the high school senior year by applying electronically at www.armyrotc.com. All other Army ROTC scholarship applications are made through the Department. Note: Private UVM Army ROTC Alumni Scholarships and loans are also available for ROTC students.

Financial Aid: Non-scholarship contracted junior and senior students can earn up to $2,750 a year through simultaneous participation in Army ROTC and the Vermont National Guard. For more information on other Vermont National Guard benefits, contact the Army ROTC Dept. at 656-5757.

Subsistence Allowance All contracted scholarship and non-scholarship cadets receive a living stipend for 10 months of the school year – 1st year as Sophomore – $250 a month; Junior = $300; Senior = $350. Students receive travel allowances to and from all required military schooling away from the University. Those who attend advanced summer camp will receive approximately $750.

The offices of the Department of Military Studies are located at 128 University Heights, (802) 656-2966. E-mail: uvmrotc@zoo.uvm.edu. UVM ROTC homepage: www.uvm.edu/rotc.

Continuing Education

Continuing Education’s programs, available on campus, in the workplace and around the state, meet the needs of
Certificate in Healthcare Management

A cohesive series of courses focus on the education needs of healthcare professionals with management responsibilities. Program content crosses healthcare disciplines and offers training necessary to make critical management decisions. Students enrolled in this advanced-level certificate have access to a broader array of faculty and academic disciplines than if they enrolled in a more disciplined specific management training program.

Certificate in Computer Software

The Department of Computer Science and Continuing Education jointly offer a software certificate that requires five courses (15 credits) in approved computer courses at UVM. The curriculum includes an introduction to commonly used application software packages and programming courses involving both high- and low-level computer languages. The certificate enables students to receive acknowledgment of college credit in computer software and to determine their aptitude in computer science.

Postbaccalaureate Pre-Medical Preparation Program

A sequence of courses gives people with a bachelor’s degree in a nonscience area the preparation they need for admission to medical and other health professional schools. Those interested in applying should pay careful attention to the specific requirements of the schools of medicine, dentistry, veterinary, or other health science programs to which they intend to apply. The required courses in laboratory sciences and mathematics are accessible through a combination of day and evening courses. Prospective medical school applicants receive individual advisement through all phases of the medical school application process.

Study Assisted Program

The Learning Cooperative and UVM Continuing Education offer courses each semester which include free tutoring services and assistance with study skills. This collaborative service gives new and returning students academic support as they reenter the academic environment.

SUMMER PROGRAMS

During May through mid-August, hundreds of credit courses are offered. Summer University courses provide opportunities to get ahead, catch up, focus on pre-med requirements, participate in an internship, study abroad, and explore new topics. In addition, Summer University meets the professional education needs of teachers and school administrators, engineers, business managers, human services professionals, nurses, and school librarians.

Special attention is given to providing undergraduate courses that are in high demand during the academic year. In addition, there are field courses, on-line courses, special seminars, and intensive workshops. Summer University provides a financial advantage through lower tuition. A FOCUS catalogue of courses is available in March in print as well as online at learn.uvm.edu.

For more information about day and evening summer courses: (802) 656-2085 or (800) 639-3210 or visit learn.uvm.edu.

Note: Undergraduate students should verify with their advisor and dean that any CE course would be applicable to their degree program. Students not officially admitted to the Graduate College who wish to enroll for more than six graduate credits in one semester must receive permission from the Graduate Dean.

COURSES AND PROGRAMS AVAILABLE STATEWIDE

Through the use of distance technologies, many graduate and professional courses and programs are available statewide. Courses are available online or are taught live on campus and are delivered by interactive television to various sites around Vermont. For more information, call 800-639-3210 or 802-656-2085 or visit online at learn.uvm.edu.
NON-CREDIT COURSES AND PROGRAMS

Continuing Education offers noncredit learning opportunities for UVM students, alumni, and their peers in business and professions. National conferences, symposia and workshops provide access to new information developed through University research, explore contemporary issues, and teach career skills. Detailed information on programs is available from Continuing Education, 800-639-3210 or 802-656-2085 or visit online at learn.uvm.edu.

Student Exchange: New England State Universities

The six New England land-grant universities (Universities of Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut) participate in an exchange program to enable students at the subdegree level to take advantage of a course or combination of courses not available at the home institution. In order to participate in the program, state university students must:

1. Identify a course or combination of courses related to their area of academic interest and not available on the home campus.
2. Receive permission from the appropriate university exchange authorities at both the sending and receiving institutions.
3. Meet minimum eligibility requirements which include the following: In general, students must be in good standing and have at least a 2.50 grade-point average; must be degree candidates; and must be at least first semester sophomores (application may be made as early as the second semester of the first year). There is no upper limit in terms of class standing on participation.

Exchanges may not exceed a total period of two academic semesters, but these need not be taken consecutively. Summer sessions are not considered part of the exchange program. Course work approved by the student’s host institution and completed satisfactorily is fully transferable to the home institution. Transferability of grades and inclusion in grade-point averages are subject to home institutional policy.

The student will pay normal tuition and required fees to the home institution and room and board (where applicable) to the host institution. Students on financial aid must contact their home institution’s financial aid office to determine eligibility for continued scholarship assistance.

Participation in the exchange program will not affect a student’s residence status either at the home or host institution, nor does participation improve or prejudice possibilities for transfer.

For information, contact the Office of the Provost, 349 Waterman Building, University of Vermont.
Studying the Environment

One of the distinctive features of UVM is its focus on studying the environment and environmental problems. Students interested in these issues have a rich array of choices. Many of these are within specific disciplines, but others offer the opportunity for multidisciplinary study. UVM has several multidisciplinary degree programs.

Environmental Studies is a curriculum offered to students from four different colleges and schools (Agriculture and Life Sciences, Arts and Sciences, Education and Social Services, and Natural Resources) and is coordinated within the Environmental Program.

Two distinct degree programs are offered in Environmental Sciences. The program in the College of Arts and Sciences provides a basic Environmental Sciences major with emphasis in biology, chemistry, or geology. The School of Natural Resources and the College of Agriculture and Life Sciences jointly offer an Environmental Sciences major with applied emphases in water resources, environmental analysis and assessment, conservation biology and biodiversity, ecological design, environmental resources, and agriculture.

The College of Engineering and Mathematics offers students the opportunity to pursue a degree in Environmental Engineering.

Environmental Studies

Environmental Studies is a University-wide undergraduate curricular option offering students several challenging academic programs. Directed by the Environmental Program in cooperation with several colleges and professional schools, this option is one of UVM’s most distinctive and popular academic programs — unique nationally in its breadth and interdisciplinary nature.

Students entering UVM may apply for admission to Environmental Studies through several of the undergraduate divisions. Choice of the appropriate college or school will depend on the individual’s interests, career and educational objectives, and selection of one of the program options outlined below.

The Environmental Program involves students and faculty from throughout the University, as well as community professionals, recognizing that study of the environment must draw upon all academic disciplines and professional fields. The activities of the Program include undergraduate education, research, and community service programs dedicated to the study and improvement of the cultural and natural environments essential to the quality of life on earth.

The Program serves a wide range of environmental interests, with its primary mission being undergraduate education, and its primary focus the individual student. Working closely with the faculty, each student plans an individualized program that combines a broad, comprehensive understanding of the environment with depth in a specific discipline or profession. Major concentrations can be in the natural or technical sciences, the humanities or arts, the social sciences or professions, or broadly interdisciplinary.

Many graduates continue their education in graduate or professional schools; others work in public and private sectors in highly diverse fields throughout Vermont, the nation, and in countries around the globe.

Program offices and a Student Services Center are located in The Bittersweet, where students are encouraged to visit with the staff and faculty regarding their academic plans, to gain assistance with research or action projects, and to seek information about academic programs, internships, international study opportunities, graduate studies, and future careers.

DEGREE PROGRAMS

The Bachelor of Science degree in Environmental Studies is awarded through the College of Agriculture and Life Sciences and the School of Natural Resources.

The Bachelor of Arts degree in Environmental Studies is awarded through the College of Arts and Sciences.

DEGREE REQUIREMENTS

Students must complete the distribution and credit-hour requirements of their college or school and one of the following programs. Incoming students will be assigned an advisor in the Environmental Program who will assist in selecting a major or minor program.

CURRICULUM

The curriculum in Environmental Studies offers students several alternatives leading to an individualized program of studies. The Major in Environmental Studies provides a unique academic program for the student seeking an interdisciplinary major leading to the B.S. or B.A. degree, with opportunity for Honors Studies. The Minor in Environmental Studies fulfills the minor requirement for students in the College of Arts and Sciences and is available as an elective minor in other schools and colleges. For selected students, a double major offers the opportunity for combining interdisciplinary studies with a traditional major.

MAJOR IN ENVIRONMENTAL STUDIES

This interdisciplinary major offers students the opportunity to combine studies in several disciplines and professional fields. In addition to a core of interdisciplinary courses, each student’s program includes an individually-designed plan of study directed toward newly-developing careers and graduate study programs. It is equally suited to the student seeking a broad liberal education with an environmental emphasis and to the student focusing on a particular science, humanities, social studies, or technical discipline.

The Major in Environmental Studies is a selective program for qualified students with well-conceived academic goals. Admission to the major (regardless of declared major at the time of admission to UVM) requires submission of an application to the Environmental Program during the sophomore year, approval of the Director, and successful completion of Environmental Studies 151. In addition to course requirements, this major includes a required senior research thesis or project that may qualify for program, college, or school honors recognition. Requirements for Secondary Education majors differ. Consult the appropriate sections of this catalogue for the exact requirements of each college or school.
Environmental Studies Major Core

Required Courses:  Credit Hours
Intro. to Environmental Studies (ENVS 1)  4
International Environmental Studies (ENVS 2)  4
Intermediate Environmental Studies (ENVS 151)  3
Research Methods (ENVS 201)  3
Senior Project and Thesis (ENVS 202/203)  6 - 12
(Planned and designed in ENVS 201; credit arranged in consultation with senior thesis advisor)

Individually-Designed Program
Individually-designed program of studies  18 - 30
(Intermideate and advanced courses, including courses in natural sciences, humanities, social sciences, and international studies)

Students are strongly encouraged to undertake internships, independent projects, study abroad, and cross-cultural experiences.

MINOR IN ENVIRONMENTAL STUDIES
For students in several colleges and schools, this program combines the basic interdisciplinary skills and perspectives necessary for the understanding of environmental issues with the curriculum of a traditional disciplinary major.

In addition to two introductory Environmental Studies courses and at least three intermediate or advanced ENVS courses, students complete a major in a related discipline or professional field.

Students in the College of Arts and Sciences may elect this minor to fulfill the minor requirements in that college. Minor programs are available on an elective basis in most other schools and colleges.

Consult appropriate sections of this catalogue for the exact requirements of each college or school.

COLLEGE OF EDUCATION AND SOCIAL SERVICES
TEACHER EDUCATION STUDENTS
Students enrolled in Early Childhood, Elementary Education, Family and Consumer Services and Physical Education may complete the major concentration in Environmental Studies as a fulfillment of the liberal arts and sciences major requirement.

Environmental Studies is not a Vermont State Department of Education approved endorsement area for Secondary Education.

Environmental Sciences

Students with an aptitude for science and an interest in the quality of the environment can choose alternate pathways in pursuing a major in Environmental Sciences at UVM. The College of Arts and Sciences offers a science education with an emphasis on basic science approaches to understanding the environment. The School of Natural Resources and the College of Agriculture and Life Sciences jointly offer a science-based education emphasizing the application of scientific skills and knowledge in addressing complex environmental problems.

Environmental Sciences: School of Natural Resources or College of Agriculture and Life Sciences

The School of Natural Resources and the College of Agriculture and Life Sciences jointly administer an Environmental Sciences major intended to provide students with the fundamental knowledge and hands-on experience needed to identify, analyze, and solve “real world” environmental problems arising from human activities. This major is specifically tailored for students interested in pursuing careers as knowledgeable and skilled environmental scientists or advanced students in graduate programs.

Students have a unique opportunity to “earn while they learn” through credit-bearing internships with government agencies or private companies (for details, consult the Internship Coordinator, Room 355, Aiken Center for Natural Resources). Students interested in research can participate with our faculty in nationally- and internationally-recognized environmental research programs.

Excellent academic advising is demonstrated strength of both the School and the College.

Five specially created Environmental Sciences courses designed to augment basic biology, chemistry, and mathematics courses serve as the foundation of the SNR/CALS Environmental Sciences major:

- ENSC 1 Introduction to Environmental Sciences
- ENSC 101 Pollutant Movement Through Air, Land and Water
- ENSC 130 Global Environmental Assessment
- ENSC 201 Recovery and Restoration of Altered Ecosystems
- ENSC 202 Ecological Risk Assessment

In order to provide flexibility yet assure some depth of knowledge, students explore a particular aspect of Environmental Sciences through advanced study in one of several advising tracks. Students can select:

- Water Resources — effects of pollutants on the structure and function of aquatic ecosystems.
- Environmental Analysis and Assessment — techniques for measuring environmental impacts and managing environmental data.
- Environmental Design — use of ecological systems to improve environmental quality.
- Agriculture and the Environment — impacts of agriculture on the environment and strategies for minimizing environmental degradation.
- Conservation Biology and Biodiversity — endangered species and ecosystems, and strategies for conserving the diversity of the earth’s life forms.
- Environmental Resources — environmental processes in air, soil, and water.

Students can also propose a self-designed track in a particular area of interest such as energy and the environment.

DEGREE REQUIREMENTS

Students must complete the distribution and other requirements of either the College of Agriculture and Life Sciences (CALS) or the School of Natural Resources (SNR) in addition to the following specific requirements of the Environmental Sciences curriculum.

A. Environmental Sciences basic science/quantitative courses:

- Biology 1, 2, Principles of Biology
- Chemistry 31, 32, Introductory Chemistry
- Chemistry 42, Intro. Organic Chemistry
- Geology 55, Environmental Geology or Plant and Soil Sciences 161, Intro. to Soil Science
- Math. 19, 20 (or 13, 14), Calculus
- Natural Resources 140, Nat. Res. Biostatistics or Statistics 141, Basic Statistics

*Two of these courses simultaneously fulfill School of Natural Resources general education requirements.
B. Special foundation courses: Environmental Sciences 1, 130, 101, 201, 202.

C. Advising track requirements (14 credits) in any one of:
Water Resources, Environmental Analysis and Assessment, Ecological Design, Agriculture and the Environment, Conservation Biology and Biodiversity, or Environmental Resources. Detailed lists of courses for each advising track and requirements for the self-designed track are available in the Dean’s Offices in both the College of Agriculture and Life Sciences and the School of Natural Resources.

Internships and Undergraduate Research. Experiential learning is strongly recommended. Students enroll in Environmental Sciences 195 (Internship) or Environmental Sciences 196 (Independent Research) for up to six hours each. Three credit hours from either of these experiences may be used to meet a portion of the 14 credit-hour requirement for an Environmental Sciences advising track. Both courses require a formal proposal and the approval of the Program Director.

Consult the sections of the catalogue on the College of Agriculture and Life Sciences and the School of Natural Resources for a description of the specific requirements of the programs.

Environmental Sciences:
College of Arts and Sciences

The basic Environmental Sciences major in the College of Arts and Sciences provides students with a modern environmental science degree in the context of a liberal arts college. It is tailored for students who want an interdisciplinary science degree that is centered around environmental issues. It emphasizes basic approaches to understanding the environment and environmental problems. Students completing this major will have the scientific background necessary to compete in the job market for environmental science, or to continue with advanced studies in a graduate degree program. This major emphasizes flexible course choices at the upper level, guided by co-advisors from different departments who work with each student individually.

During the first two years, the major draws on a core curriculum of basic science courses in biology, chemistry, and mathematics. This core is designed so that students can easily flow between other science majors, such as Biology, Geology, and Chemistry. At the upper division level, students work closely with faculty advisors to develop a set of science courses that will meet their particular needs and career goals.

Learning through experience and advising are integral parts of this major. To experience environmental research first hand, an independent research project or honor thesis is completed in the senior year. Co-advisors help with research and also with choices of courses and career plans.

At the upper division level, students can be general in their choice of courses or three areas of concentration allow students to specialize their training.

- **Environmental Biology** – ecological and molecular analysis of endangered populations, conservation biology, conservation genetics, and ecology.
- **Environmental Geology** – earth science, geomorphology, and the analysis of ground water.
- **Environmental Chemistry** – analytical methods for measuring and monitoring air, ground, and water pollutants.

Consult the College of Arts and Sciences section of the catalogue for specific requirements for the major.

DEGREE REQUIREMENTS

The Environmental Sciences major within the College of Arts and Sciences is jointly administered by the Biology and Geology Departments. Students must complete the distribution and other requirements of the College of Arts and Sciences, in addition to the following Environmental Sciences curriculum.

A. Core courses:
   - Biology 1, 2, Principles of Biology, or Biology 11, 12
   - Chemistry 31, 32 (or 35), Intro. Chemistry
   - Chemistry 42, 141, or 143, Intro. Organic Chemistry
   - Math. 19, 20 (or 21), Calculus

B. Environmental Studies 1 or 2, Introduction to Environmental Studies.

C. Technology course (one of the following in second year):
   - Statistics 141 or 211, Statistics
   - Chemistry 121, Quantitative Analysis
   - Chemistry 221, Instrumental Analysis
   - Biology 205, Advanced Genetics Lab.
   - Biology 267, Molecular Endocrinology
   - Geology 255, Geohydrology
   - Civil Engineering 150, Environmental Engineering

D. Concentration requirements: With co-advisors students choose three advanced courses (one with advanced lab if not taken above and one at the 200 level) for a generalist approach or concentration.

Undergraduate Research. An independent research project is an important requirement of the major. Students enroll in Biology 198 or Geology 198 (Undergraduate Research) or Honors 298, 299 (Honors in Biology) or Honors 226, 227 (Honors in Geology). These courses require a formal proposal and final report.

ENVIRONMENTAL ENGINEERING

Refer to the engineering curricula for a description of the requirements for the Environmental Engineering option offered by the College of Engineering and Mathematics.
The College of Agriculture and Life Sciences

The programs of the College of Agriculture and Life Sciences (CALS) emphasize life sciences, agriculture and food systems, environmental protection, and the preservation of healthy rural communities. The College is committed to providing educated professionals knowledge to help solve important societal problems, and to insure a sustainable, vital healthy Vermont and globe.

The College performs the four public functions which include teaching, conducting research, disseminating information to the public, and performing related services. These four areas of work are performed by CALS in cooperation with the Agricultural Experiment Station, and The University of Vermont Extension.

The College faculty strive for excellence in undergraduate education as evidenced by a sustained and eniable record of University teaching award winners. The College emphasizes the importance of each individual student and promotes significant student-faculty interaction. Students are provided with a firm foundation in the social and life sciences in order to excel and meet the challenges in future professional careers. Faculty and peer advisors provide a broad range of support, to help students develop high-quality academic programs that meet individual needs.

Opportunities abound for off-campus experiences such as internships, independent study, and study abroad. Graduates of the College are successfully meeting the requirements to pursue advanced education. Career choices are broad, but focus primarily in agribusiness, dietetics, international and rural development, agriculture, veterinary and human medicine, biotechnology, nutrition, research and teaching, horticulture, and botany.

Academic majors are enhanced by the on-campus and field facilities, labs, and research for which the College is renowned. Many CALS faculty working through the Experiment Station conduct mission-oriented, applied agricultural research, and faculty encourage undergraduate research.

The College of Agriculture and Life Sciences welcomes applications from international students. The specific procedures and requirements are listed in the Admissions section presented earlier in the catalogue.

The Office of the Dean of the College is located in Rooms 106 and 108 in Morrill Hall.

DEGREE REQUIREMENTS

All programs in the College of Agriculture and Life Sciences lead to the Bachelor of Science degree and require:

A. The successful completion of a minimum of 120 credit hours of course work plus two credit hours in physical education.
B. A minimum cumulative grade-point average of 2.00.
C. Completion of the CALS Core Curriculum (see below)
D. Completion of AGRI 195, “New Beginnings” by all first semester first-year students in the College of Agriculture and Life Sciences.
E. One course addressing race relations and ethnic diversity for all (incoming first-year, incoming transfer and internal transfer) CALS students. Students may enroll in EDSS 011, the one-credit Race and Culture course, or may choose from a CALS faculty-approved list of alternative 3-credit courses: ALANA 51, ALANA 55, SOC 19, SOC 31, SOC 118, SOC 119, ANTH 187, EC 153, GEOG 60, HST 60, HST 68, POLS 29, POLS 129, CMSI 160, ENG 57. Students choosing the 3-credit course option satisfy 3 of the 6-credit social science distribution requirement.
F. All courses as specified in individual program majors.

The applicability of courses to specific areas is based on content and not departmental label. Courses taught in the College of Agriculture and Life Sciences can be used to fulfill knowledge core curriculum requirements; however, they must be taken outside the department in which the student’s program of study is located. Applicability of courses to fulfill requirements rests with the student’s advisor and, if necessary, concurrence of the Dean of the College.

Students in the College of Agriculture and Life Sciences may not take more than 25 percent of their course credits in the School of Business Administration.

ORGANIZATION

The College’s instructional units include six departments: Animal Science; Botany and Agricultural Biochemistry; Community Development and Applied Economics; Nutrition and Food Sciences; Microbiology and Molecular Genetics (a department shared with the College of Medicine); Plant and Soil Sciences; and interdepartmental programs in Biological Sciences Biochemistry, Environmental Sciences, and Environmental Studies.

DEGREE PROGRAMS

The Bachelor of Science degree is awarded for the following programs:

Agricultural and Resource Entrepreneurship
Animal Sciences – concentration in:	Dairy Production/Farm Management
Equine Science
General Animal Science
Preveterinary/Preprofessional Science
Biochemical Science
Biological Sciences
Botany
Community Development and International Development
Dietetics
Environmental Sciences
Environmental Studies
Microbiology
Molecular Genetics
Nutrition and Food Sciences – concentration in:	Nutrition Education
Nutrition and Food Sciences
Sports Nutrition
Plant and Soil Science – concentration in:	Agroecology
Horticulture
Environmental Soil Science
Self-Designed Major
Sustainable Landscape Horticulture
Undecided

The Bachelor of Science degree is awarded for the following programs:

Agricultural and Resource Entrepreneurship

CALS CORE CURRICULUM
(http://www.uvm.edu/~jleonard/CALS/core.html)

A. Knowledge

Students develop a fundamental base of knowledge that will serve as a foundation for lifelong learning.

1. Science: Students use the scientific method to understand the natural world and the human condition.
   a. Physical and Life Sciences: Competency may be met by satisfactory completion of two courses in such subjects as: anatomy, animal science, biology, botany, chemistry, ecology, entomology, food science, forestry, geology, genetics, microbiology, nutrition, physics, physiology, plant science, and soil science.
   b. Social Science: Competency may be met by satisfactory completion of two courses in such subjects as: anthropology, community development, economics, geography, history, political science, public policy, psychology, and sociology.

2. Humanities & Fine Arts: Students develop an understanding and appreciation for the creative process and human thought. Competency may be met by satisfactory completion of two courses in such subjects as: classics, history, literature, music, philosophy, religion, language, theater.

3. Quantitative Skills: Students demonstrate the ability to understand and use numbers.
   a. Mathematics: Students demonstrate the use of numbers for problem solving. Competency may be met by satisfactory completion of Math 9 or higher.
   b. Statistics: Students demonstrate the use of numbers for data analysis and inference. Competency may be met by satisfactory completion of Statistics 111 or higher or NR 140.
   c. Quantitative Skills Application: Students apply mathematics or statistics skills in a course relevant to their major. Competency may be met by satisfactory completion of one course that utilizes principles from math or statistics.

4. Critical Thinking Skills: Students demonstrate ability to comprehend, judge, and present written/oral arguments and to solve problems. Students learn how to distinguish between fact, conjecture, and intuition.

5. Interpersonal Skills: Students demonstrate the ability to work well with other people by understanding and using skills of leadership, conflict resolution, and group process. Competency may be met by satisfactory completion of any course or series of courses that includes leadership, working in diverse groups, conflict resolution, and group process.

B. Skills

Students develop abilities and use tools to effectively communicate, analyze, problem solve, think critically and work with others.

1. Communication Skills: Students express themselves in a way that is easily understood at a level that is appropriate for the audience.
   a. Oral: Students show confidence and efficacy in speaking before a group. Competency may be met by satisfactory completion of AGRI 183 (or equivalent) or AGRI 195 where primary focus is public speaking, and an additional course or series of courses in which students present a minimum of three graded speeches, in total, to a group.
   b. Written: Students effectively communicate in writing. Competency may be met by satisfactory completion of any English writing course and an additional course or series of courses that uses the writing process (redrafting) for a minimum of three graded papers in total.

2. Information Technology: Students demonstrate mastery of technology for communication, data gathering and manipulation, and information analysis. Competency may be met by satisfactory completion of AGRI 85 (or equivalent) or AGRI 195 and an additional course or series of courses that uses computers for a minimum of two applications in total.

3. Quantitative Skills: Students demonstrate the ability to understand and use numbers.

   a. Mathematics: Students demonstrate the use of numbers for problem solving. Competency may be met by satisfactory completion of Math 9 or higher.
   b. Statistics: Students demonstrate the use of numbers for data analysis and inference. Competency may be met by satisfactory completion of Statistics 111 or higher or NR 140.
   c. Quantitative Skills Application: Students apply mathematics or statistics skills in a course relevant to their major. Competency may be met by satisfactory completion of one course that utilizes principles from math or statistics.

4. Critical Thinking Skills: Students demonstrate ability to comprehend, judge, and present written/oral arguments and to solve problems. Students learn how to distinguish between fact, conjecture, and intuition.

5. Interpersonal Skills: Students demonstrate the ability to work well with other people by understanding and using skills of leadership, conflict resolution, and group process. Competency may be met by satisfactory completion of any course or series of courses that includes leadership, working in diverse groups, conflict resolution, and group process.

C. Values

Students are exposed to values that are expressed through relationships with community, the environment, and themselves that are consistent with the mission of the College of Agriculture and Life Sciences and the University of Vermont campus compact known as “Our Common Ground.”

1. Citizenship & Social Responsibility: Students develop an understanding, appreciation and empathy for the diversity of human experience and perspectives. Students are exposed to solving problems for a community and contributing to the common good. Competency may be met by satisfactory completion of EDSS 11 (or equivalent) and one other course or series of courses that exposes students to these values.

2. Environmental Stewardship: Students develop a sensitivity for the interconnected relationship between human beings and the natural world and the responsibility for stewardship of the environment. Competency may be met by satisfactory completion of two courses or a series of courses that expose students to these values.

3. Personal Growth: Students develop an understanding and appreciation of a healthy lifestyle and a love for learning that will lead to continuous growth and development throughout their life-span. Students continue to improve self by developing and affirming the values of respect, integrity, innovation, openness, justice, and responsibility. Competency may be met by satisfactory completion of AGRI 195, two credits of physical education, and one other course or series of courses that exposes students to these values.

REGULATIONS GOVERNING ACADEMIC STANDARDS

The College of Agriculture and Life Sciences (CALS) Studies Committee reviews the semester grades of all students in the college whose semester or cumulative grade-point average falls below the 2.00 minimum, as well as the academic progress of all students placed on academic probation the previous semester. Detailed information may be obtained from the CALS Student Services Office, 106 Morrill Hall, (802) 656-2980.

Guidelines A student whose semester grade-point average falls below a 2.00 will be placed “on trial” and will be given a target semester average to achieve by the end of the following semester. A student whose semester grade-point average is below a 1.00, or who fails to achieve the stated target average while “on trial,” may be placed on “intermediate trial,” Any student with a prolonged history of poor grades, including students who consistently fail to achieve the target semester average, may be placed on “final trial.” A student who does not achieve the target semester grade-point average while on “final trial” is a candidate for dismissal from the University.

Appeal A student may appeal a dismissal by submitting a written appeal to the CALS Studies Committee within two
working days of the receipt of the dismissal letter. The student will be asked to appear in person before the Studies Committee to appeal the case.

**Continuing Education and Readmission** A student who has attempt to improve his/her grades. To gain readmission to the College, the student must achieve no less than a 2.67 semester average on the six credits. Dismissed students may enroll in six credits at another institution, and should work with the Office of Transfer Affairs to insure transferability.

**COLLEGE HONORS PROGRAM**

The College Honors Committee promotes and encourages independent study by recognizing those students who especially excel in their creative, innovative, responsible, and independent pursuit of study. Honors Committee Guidelines for student projects may be obtained in the Student Services office in Morrill Hall or they are available on the CALS web page at http://www.uvm.edu/cals/awards/honors.htm.

Independent study can be an important aspect of a student’s education. Undergraduate research, independent projects, and internships or field practica are examples of independent study which benefit students as they pursue graduate study or seek employment. Over the years a number of undergraduate research projects have been published in well-known scientific journals; and manuals, videotapes, and other products of special projects have been incorporated into classes to enhance the learning environment in the College.

The completed study, in a form appropriate to the area of study, is evaluated first by a departmental review committee. Independent studies of the highest quality will be chosen for College Honors by the Honors Committee. Students are recognized at College Honors Day.

**JUSTIN MORRILL HONORS PROGRAM**

The Justin Morrill Honors Program in the College of Agriculture and Life Sciences (CALS) is a four-year program designed for highly qualified and motivated students desiring an academically challenging undergraduate experience in the broad areas of the life sciences and agriculture. Justin Morrill Scholars will be engaged in honors studies throughout their academic careers to include first-year seminars conducted by renowned scholars from the University of Vermont and other institutions. They will enroll in special honors courses in the college and will have the opportunity to do independent research with faculty from CALS and across campus. Cultural events and field trips will complement the strong academic component. Entering first-year students with outstanding academic records will be invited to participate in the program. Scholars will be required to maintain a minimum grade point average of 3.5, participate in program activities, enroll in honors classes and successfully complete a Senior Honors Thesis. Matriculated students in CALS who demonstrate academic excellence during the course of their program may also apply to become a Justin Morrill Scholar.

**PREPROFESSIONAL PREPARATION**

Students striving for admission to professional colleges, such as dentistry, medicine including naturopathic, chiropractic, osteopathic, and veterinary medicine, can meet the undergraduate requirements for these programs through enrollment in the College of Agriculture and Life Sciences. Upon admission, each student will be assigned a faculty advisor knowledgeable in preprofessional preparation. Competition for admission to professional schools is very keen, and a superior academic record throughout an undergraduate program is necessary to receive consideration for admission. Due to the intense competition, only a small percentage of those first-year students declaring an interest in professional schools are admitted after completion of the baccalaureate. Consequently, students must select a major, in an area of their choice, to prepare them for a career other than medical sciences. The preprofessional requirements will be met concurrently with the major requirements for the B.S. degree. Students interested in human medical sciences often enroll in either biochemistry, biological sciences, nutrition and food sciences, microbiology or molecular genetics. Those interested in veterinary medicine usually enroll in animal science or biological sciences.

Each student prepares a four-year program of courses, with the guidance of a faculty advisor, to meet requirements for a B.S. degree in their major. It is recommended that students complete the following courses to meet minimum requirements of most professional schools. It is the responsibility of each student to contact the professional schools of choice to determine the exact entrance requirements.

**Human Medical and Dental Schools:**
- Biology with laboratory: Biology 1, 2
- Chemistry with laboratory: inorganic Chemistry 31, 32
  organic Chemistry 141, 142
- Physics with laboratory: with math Physics 11/21, 12/31
  with calculus Physics 31/21, 42/31
- Mathematics (requirement varies) Math. 19, 20
- Humanities, Social Sciences, Languages Students must complete the minimum College requirements in this area that includes English composition and speech. Advanced composition and additional courses in this area are encouraged as time allows.

**Veterinary Medical Schools:**
- All of the courses listed above under Human Medical Schools plus:
  - Biochemistry Ag. Biochemistry 201/202
  - Written English English 50 or 53
  - Genetics Botany 132 or Biology 101
  - Microbiology Micro. and Mol. Genetics 101
  - Nutrition Animal Sciences 43
- Several schools require a course in introductory animal sciences, vertebrate embryology, or statistics. Students should consult their advisor regarding specific requirements for the various veterinary schools.

Finally, both human and veterinary medical schools want to see a history of interest in medicine. It is important for students to work with physicians or veterinarians and gain first-hand knowledge of their chosen profession. Volunteer or paid work in hospitals, nursing homes, or emergency centers is important. Commercial farm experience is also valuable for preveterinary students.

Students applying to the College of Agriculture and Life Sciences who express an interest in medicine or preveterinary medicine should present evidence of high performance in high school level science and mathematics courses, plus additional supporting documentation such as high SAT scores, strong letters of recommendation, and a motivational summary statement.

**PREVETERINARY HONORS PROGRAM**

The College of Agriculture and Life Sciences and Tufts School of Veterinary Medicine offer a seven-year B.S./D.V.M. program to selected honors students. Students who
meet rigorous eligibility criteria may enroll for three years of study at UVM majoring either in Animal Science or Biological Sciences. After completion of about 90 credits with a minimum GPA of 3.25 each year, the student enters Tufts School of Veterinary Medicine. The student will be awarded a B.S. degree from The University of Vermont following the successful completion of the first year of the D.V.M. program at Tufts. The successful student will earn a D.V.M. degree from Tufts School of Veterinary Medicine after the fourth year at Tufts.

Prospective students must apply to both UVM and Tufts University. Both applications may be obtained from the UVM Admissions Office. Candidates’ files are first reviewed at Vermont, and admissible student applications are then forwarded to Tufts for their evaluation. Students will be notified of the results of these reviews through the UVM admissions process. Absolute standards may vary from year to year, but this is an intensive program with limited places. We expect that successful candidates will have:

1. Excellent grades in high school biology, chemistry, physics, and mathematics. It will be advantageous to have completed or be enrolled in AP (advanced placement) biology, AP calculus, and AP chemistry.
2. Standardized test scores at or above the 80th percentile nationally.
3. A class rank in the top ten percent of their high school class.
4. Some appropriate animal and/or veterinary experience.

It is important to recognize that some excellent students may not be admitted to the joint B.S./D.V.M. because of space limitation. These students may be admitted to UVM as preveterinary students and complete four years at UVM, graduate with a B.S. degree, and apply to any of the veterinary schools in the nation. There are many options to meet individual educational goals.

For information regarding admissions and applications to this exciting new program, see the Admissions section of this catalogue and contact the Admissions Office, 194 S. Prospect Street, Burlington, VT 05401-3596. For specific program information contact Dr. Karen Plaut, Chair, Animal Science, College of Agriculture and Life Sciences, 102 Terrill Hall, UVM, Burlington, Vermont 05405, 802/656-0155.

**BIOLOGICAL SCIENCES CORE**

Students who have strong academic ability in the sciences and are excited about the future, concerned with contemporary issues, and want a challenging, dynamic career should consider the Biological Sciences major (see our Web page for opportunities: http://www.uvm.edu-biosciences/biosci.html). This program is designed to provide flexibility in developing a strong and broad background in the biosciences. Students can take advantage of the entire array of University course offerings by selecting basic and applied biology courses from departments within the College (Animal Science, Botany, Nutrition and Food Sciences, Microbiology and Molecular Genetics, and Plant and Soil Science) and across the campus (Anatomy and Neurobiology, Forestry, Natural Resources, Pathology, Pharmacology, Molecular Physiology and Biophysics, Wildlife and Fisheries Biology, and Biology). Selection of courses is not limited to CALS.

The Biological Sciences Program is interdisciplinary and draws on the expertise of faculty from five departments within the College. Each student is assigned a personal faculty advisor who helps the student select courses, develop career plans, and establish contacts in the field. The core program is rigorous and designed to provide a broad exposure to different aspects of biology in the first and second years. Students refine their developing interests and specializations during the remaining two years by selecting electives and courses that fulfill the requirement for the B.S. degree in Biological Sciences in a manner that complements the student’s interests. Alternatively, students transfer, as late as the beginning of their third year, to one of the traditional, biologically-based departments of CALS to complete their degree.

In addition to the general College requirements listed previously, the Biological Sciences core requires satisfactory completion of: BSCI 195, Biology 1, 2; Math. 19, 20 or Math 21, 22; Chemistry 23, 42 or Chemistry 31, 32 and 141, 142; Botany 132 or Biology 101 (genetics); and Microbiology and Molecular Genetics 101. Course descriptions are presented under the appropriate departments.

**MAJORS: DEPARTMENTAL REQUIREMENTS**

**Animal Science**

Domestic animals play a major role in our lives through agriculture, recreation, biomedical science, and companionship. The mission of the Department of Animal Science is to provide a high quality, broad-based education emphasizing domestic animals and their interactions with humans.

Our graduates enter the veterinary or other professions, biomedical science, the agribusiness industry, companion animal care and breeding, zoos and aquaria, or education. Additionally, many students use a B.S. in Animal Science as a stepping stone to careers in business and commerce. To provide the necessary flexibility to achieve this diversity students work closely with faculty advisors to individualize their programs.

To facilitate and reduce the costs of veterinary education of excellent students, the Department of Animal Sciences and the Tufts University School of Veterinary Medicine have established a highly competitive seven-year B.S./D.V.M. program. For further information on this highly competitive option contact the Department of Animal Science directly at (802) 656-2070. Some limited veterinary scholarships are also available for upper-level students.

For students interested in dairy production, the UVM/VTC Dairy Farm Management 2 + 2 Program provides Vermont residents with scholarships and the opportunity to earn a B.S. after a two-year Associate’s Degree in Dairy Farm Management from the Vermont Technical College.

An option for the outstanding student with an interest in a graduate degree is the Accelerated Master’s in which students commence study for their master’s degree in their senior year and have the potential to obtain a B.S./M.S. in a five-year period.

The Department of Animal Science actively encourages participation in undergraduate research, internships, and study abroad. By combining classroom, laboratories, and practical experience students maximize their performance in a friendly environment and develop responsibility for and control over their education.

**ANIMAL SCIENCE** The program deals with a range of options from basic sciences through companion and zoo animal care to farm management. Although programs are highly individualized by students working with the advisors, there are four basic options:

**Preveterinary/Preprofessional Science:** This is the option for students most interested in the basic sciences who prob-
ably intend to enter veterinary, professional, or graduate school. It provides the necessary background in science as well as the opportunity for advanced study related to production and companion animals.

**Equine Science:** Specialized courses are offered on the care, management, breeding, training, and health of horses. The world-famous Morgan Horse Farm at Middlebury, about 45 minutes from campus, is also part of the Department and offers opportunities for study and research. Students may also enroll in equine courses at the Miner Agricultural Research Institute in Chazy, New York.

**Dairy Production:** Designed for the student seeking an in-depth training in dairy herd management with strong links to agribusiness and an emphasis on experiential learning. Can be integrated with the two-year Associate Degree program in Dairy Management as a four-year program.

**General Animal Science:** Under this option, students design a program to suit their needs, or keep a broader-based program to meet a particular career goal. For example, this option is often used by students who have an interest in human/animal interactions, animal welfare, and companion animals. The student and advisor select a combination of basic science, production, or companion animal courses and balance these with courses available elsewhere in the College or University. Usually involves an internship experience.

**Core Courses for All Animal Science Majors**

- Animal Sciences 1, 43, 110, 122, 141, 281, plus two additional Animal Science courses.
- Biology 1
- Chemistry 23 or 31
- Chemistry 26 or 42 or 141
- Computer Science 2 or New Beginnings AGRI 195
- A genetics course (Biology 101 or Botany 132)
- Math. 9 or higher
- Statistics 111 or 141 or 211

Additional courses are selected with the help of the advisor.

In addition, each student must complete all College and University requirements for graduation.

Biochemistry

Biochemistry is the basic science that explores the chemical and physical properties of living organisms and the chemical changes that occur in these organisms. It is integral to the study of multiple disciplines within the life- and biomedical-sciences, including biology, chemistry, microbiology, genetics, anatomy, physiology, pharmacology, nutrition and food sciences, animal sciences, botany, and plant sciences. The Bachelor of Science in Biochemistry degree is an interdisciplinary undergraduate degree program offered through the College of Agriculture and Life Sciences (CALS) and the College of Arts and Sciences (CAS) in conjunction with the College of Medicine (COM). It draws upon a broad set of University resources from CALS, CAS, and COM to provide students with a modern science-based education designed to emphasize fundamental knowledge of chemistry and biology along with advanced courses specializing in biochemistry and related life- and biomedical-sciences. The Biochemistry curriculum offers students with a strong academic ability in the sciences an opportunity to explore upper-level courses in areas of modern biochemistry and is designed to meet the needs of students wishing to compete in the job market at the B.S. degree level as well as students planning to continue with advanced studies in a graduate or professional degree program.

Students may apply to the program either through CALS or CAS, which vary in their college distribution requirements. In CALS, students are required to fulfill the Core Competencies in knowledge, skills, and values, with emphases on science, humanities and fine arts, communication skills, information technology skills, quantitative skills, critical thinking skills, interpersonal skills, citizenship & social responsibility values, environmental stewardship values, and personal growth values. In CAS, students are required to fulfill distribution requirements in foreign language, fine arts, literature, humanities, social sciences, and cultural diversity. In addition to these college distribution requirements, all students must take a core set of basic courses in the sciences and mathematics in their first two years followed by advanced courses in biochemistry, chemistry, and/or molecular biology in their third and fourth years. As biochemistry is a “hands-on” science, involvement of students in undergraduate research projects, most of which qualify as honors projects, is strongly encouraged. Each student within the Biochemistry degree program is assigned a faculty advisor from the program’s faculty and the College in which the student is pursuing his/her degree. This faculty advisor works closely with the student to develop their academic interests, degree requirements, and career goals.

In addition to the CALS or CAS college distribution requirements, the Biochemistry core requires satisfactory completion of BIO 1 1, 2 or BIOL 11, 12; MATH 21, 22; PHYS 31, 42 with 21/22; CHEM 35, 36; CHEM 143, 144; CHEM 221; CHEM 162; CHEM/BIOC/MMG 205; CHEM/BIOC/MMG 206; CHEM/BIOC/MMG 207; CHEM 282; BOT 132 or BIO 101; MMG 102 or BIO 103; and advanced Biochemistry electives.

**Possible Four-Year Curriculum**

**Biochemistry**

- **Core Courses**:
  - CHEM 161; CHEM 162; CHEM/BIOC/MMG 205
  - CHEM/BIOC/MMG 206; CHEM/BIOC/MMG 207
  - CHEM 282
  - BOT 132 or BIO 101
  - MMG 102 or BIO 103
  - Advanced Biochemistry Electives

**Electives**: 5-6

Students have many opportunities to interact closely with faculty through field, lab and research experiences. Areas of student research interest include ecology, evolution, cell and molecular biology, growth and development, and physiology (see our departmental web page for a list of completed student projects). Popular study opportunities include our biennial trip to Costa Rica and student-initiated research projects at our internationally known Proctor Maple Research Center or at the Pringle Herbarium, the third largest plant collection in New England. To learn more about our undergraduate program, visit the Botany Department web site at www.uvm.edu/plantbio/index.html.

**Options for our Majors:** Our students select from three concentrations: General Botany, Plant Molecular Biology, and Ecology and Evolutionary Biology of Plants. Basic courses that are required for all the concentrations, and additional courses specific for each concentration are listed below. Students may petition the department to substitute similar courses for those listed. Study of a modern foreign language is encouraged for those attracted to the many international career opportunities in plant biology.

**Basic Course Requirements (29-32 hours)** — required for all concentrations:

- Biology 1, 2
- Botany 104, 132
- Chemistry — see specific concentration
- Math 13, 14 or 19, 20 or 21, 22
- Physics — one semester with laboratory
- Statistics — one course (141, 211, or NR 140)

**General Botany Concentration:** This concentration offers broad training at all levels of plant biology ranging from molecular biology to plant communities. Students have the flexibility to study plants from many perspectives and to understand how the diverse areas are interrelated. Students, in consultation with a faculty advisor, can choose courses that meet their individual needs and interests. Students are encouraged to perform undergraduate research working directly with departmental faculty on laboratory or field projects in plant biology.

In addition to the basic course requirements for our departmental major (listed above), this concentration has the following requirements and electives:

**Concentration Requirements (29 hours):**

- Botany 108 or 109, 160
- Chemistry 31, 32, 141, 142
- Physics — one additional semester, with laboratory

**Concentration Electives (1-20 hours)**

- Botany — 5 additional courses, at least two of which are at the 200 level.

**Ecology and Evolutionary Biology of Plants:** This concentration offers broad training in organismal biology, with emphasis on population and physiological ecology, community structure and function, and plant evolution and diversity. Students choose from a menu of options in fulfilling most requirements; this flexible curriculum enables students to select from a wide range of courses while achieving proficiency in the ecology and evolution of plants. Students are encouraged to initiate an independent research project with one of our faculty.

In addition to the basic course requirements for our departmental major (listed above), this concentration has the following requirements and electives:

**Concentration Requirements (28 hours):**

- Botany 108, 109, 160
- Chemistry 31, 32, 141, 142

**Concentration Electives (12-24 hours)** — At least six courses
from the following, at least two of which must be 200-level Botany courses.
Ag. Biochem 201, 202
Biology 102, 203, 238, 254, 264, 270
Botany 117, 205, 209, 213, 223, 232, 234, 241, 260, 261
Env. Sci. 101, 201
Forestry 21, 129, 121, 122, 225, 228, 234
Geography 81
Geology 1, 55, 151, 101
MMG 220
Nat. Res. 220, 224, 260
Plant and Soil Sci. 151, 161, 215

Plant Molecular Biology: This concentration focuses on the inner workings of plants at the molecular, cellular, and organi

Concentration Electives (8-15 hours) – at least four courses from the following list:
Ag. Biochem 201, 202
Animal Sci. 230
Botany 109, 117, 205, 256, 257
Biology 263, 265
Botany 261
Chemistry 31, 32 or 35, 36, 141, 142
MMG 101, 102
Physics – an additional semester with lab (31/42 or 11/12)

Concentration Requirements (40 hours):

A. General CALS distribution requirements.
B. Core distribution requirements for major (also fill distribution requi
C. Environmental Sciences minimal basic science/quantitative courses (also fill distribution requirements): Bio-

Communication Skills
Hours
English 1 3
AGRI 183 or other approved course* 3
One additional communications course (either oral or written) 3

Quantitative Skills
Math 19 3
Statistics 141 3
AGRI 085* 3

Science
Two courses in physical or natural science 6-8
Arts and Humanities (two courses) 6

Social Science
Political Science 21 3
Economics 11 3

Physical Education 2

College Requirements
New Beginnings 6
Cultural Diversity 1-3

*First year students take New Beginnings in place of AGRI 183 and AGRI 085. Transfer students take AGRI 183 and AGRI 085 in place of New Beginnings.

CDAE Core courses – Both majors: CDAE 002, CDAE 015, CDAE 061, CDAE 102, CDAE 127, CDAE 157, CDAE 166, CDAE 255, ECON 171, ECON 172, and Internship/service learning requirement.

Required courses for Agricultural and Resource Entrepreneurship major: BSAD 065, CDAE 167, CDAE 168, CDAE 264, CDAE 266, and CDE 267.

Required courses for Community and International Development major: Students must complete 6 of the following 8 courses: CDAE 146, CDAE 171, CDAE 218, CDAE 287, CDAE 290, CDAE 251, CDAE 272, and CDAE 273.

The Department also offers five minors: Agricultural and Resource Entrepreneurship; Applied Design; Consumer Affair

Environmental Sciences

Students may major in Environmental Sciences through the College of Agriculture and Life Sciences, the College of Arts and Sciences, or the School of Natural Resources. For general information about the curriculum, see the Environmental Sciences section.

Environmental Sciences majors through the College of Agriculture and Life Sciences must fulfill the following require-

A. General CALS distribution requirements.
B. Core distribution requirements for major (also fill distribution requirements): Animal Sci. 1, 230; Comm. Dev. and Appl. Er. 2; Plant and Soil Sci. 11; Botany 160; Micro. and Molec. Genetics 101.
C. Environmental Sciences minimal basic science/quantitative courses (also fill distribution requirements): Biology 1,2; Chemistry 31, 32; Chemistry 42*; Geology 55 or Plant and Soil Sci. 161**; Math. 19, 20; Nat. Res. 140 or Statistics 141.
**Students should consider taking Chemistry 141/142.**

**Plant and Soil Sci. 161 is required for many advanced PSS courses in several curricular concentrations; most students should take this course.**

**Environmental Sciences foundation courses:** ENSC 1, 101, 130, 201, 202.

**Concentration requirement,** 14 credit hours in one of the following:
- Water Resources, Environmental Analysis and Assessment, Ecological Design, Agriculture and the Environment, Conservation Biology and Biodiversity, Environmental Resources. Detailed lists of courses for each concentration are available from the Program Director and the Office of the Dean.

**Environmental Studies**
The Major in Environmental Studies is an interdisciplinary program available to qualified students upon approval of the Director of the Environmental Program.

Environmental Studies students majoring through the College of Agriculture and Life Sciences must complete a minimum of 122 credit hours, including two hours of physical education, with a minimum GPA of 2.0, and fulfill the following requirements: (1) the general CALS distribution requirements; (2) the Environmental Studies Major Core and the Individually-Designed Program: 30 credit hours of approved environmentally-related courses at the 100 level or above, including three hours at the 200 level, with at least one course in each of the following areas — natural sciences, humanities, social sciences, and international studies (may be fulfilled by study abroad experience).

**Microbiology and Molecular Genetics**
Undergraduates who undertake studies in the Department of Microbiology and Molecular Genetics receive instruction in the classroom and in state-of-the-art teaching and research laboratories. The Department offers either a Microbiology or a Molecular Genetics major or minor as well as courses in the areas of molecular genetics, general, clinical, and environmental microbiology, virology, and immunology which are available to students in other programs. Numerous research opportunities provide undergraduates with close interactions with faculty at the cutting edge of microbiology using molecular genetics technology. The Microbiology and Molecular Genetics core courses total 55 credits. The courses comprising the core are: biology, biochemistry, genetics, inorganic and organic chemistry, mathematics, general microbiology, molecular genetics, physics, and statistics. In addition to the core requirements departmental majors take a minimum of 15 credit hours from an array of approved elective courses including undergraduate research. As their core requirements, minors take microbiology, molecular genetics, and genetics plus additional credit hours of courses as required. Students interested in the Accelerated Masters Program should contact the Department.

Outstanding students with an interest in a graduate degree may apply to enter the Accelerated Masters Program of the Department. In this program students commence study for their master’s degree in their senior year and have the potential to obtain a B.S. / M.S. in a five-year period. See Minors in this section.

**Nutrition and Food Sciences**
The Department of Nutrition and Food Sciences (NFS) prepares students to enter the rapidly expanding field of dietetics, food science, nutrition, health, and fitness. Nutrition and Food Science, unique fields of study, are rooted in the physiological, chemical, and biochemical sciences but are comprehensive in scope since they integrate knowledge learned in the social and psychological sciences. The faculty in the department believe that excellence in teaching, research and undergraduate student advisement are critical components of their responsibility to undergraduate education. Through formal course work, field experience, and independent research, students prepare themselves in the biochemical, psychological, and socioeconomic aspects of diet, nutrition and foods. Thus NFS majors are able to meet the current and future needs in nutrition and food science and assume innovative, leadership roles in society and industry.

The course credits earned in NFS provide background in preventive and therapeutic nutrition as well as nutrient requirements for human growth, development, health, and fitness throughout the life cycle. Other courses focus on the physical, chemical, and nutritional properties of food, food safety, and consumer aspects of food related to socio-economic status, life style, cultural beliefs, and health. Although a series of courses providing knowledge in these areas is required of all majors, each student has a generous amount of free elective credits to pursue personal interests.

It is possible for students to meet the requirements for more than one program option (for example, Dietetics majors are also double majors in Nutrition and Food Sciences) or combine a major in this department with another area of study (e.g. Athletic Training). In addition, department majors may elect to meet the undergraduate requirements needed for admission to medical schools (including naturopathic, chiropractic, or osteopathic) or graduate school in nutrition, food science, sports nutrition, or family and consumer sciences.

Depending on current interests and future plans, majors may select one of four department options:

**Dietetics:** Dietetics is a profession concerned with the science and art of human nutritional care, an essential component of human health science. The Didactic Program in Dietetics is currently granted approval by the Commission on Accreditation for Dietetics Education of the American Dietetic Association, 216 W. Jackson Blvd., Chicago, IL 60606-6995, 312/899-5400. This program prepares students for careers as Registered Dietitians by providing the undergraduate requirements needed to apply to dietetic internships.

To become a Registered Dietitian, students must complete our Didactic Program in Dietetics; complete an ADA approved supervised practice/internship program and pass the National Registration Examination for Dietitians. Dietetics majors are also double majors in Nutrition and Food Sciences. This double major prepares graduates to counsel people about the preventive and therapeutic role of nutrition in the maintenance of health and fitness.

**Nutrition and Food Sciences:** This customized major is designed to provide a strong background in preventive nutrition, food science, and basic science, with an opportunity to integrate course work in medical, biochemical, biological, physiological, psychological, and sociological sciences or business. This option can prepare students for careers in the commercial food processing industry or in professions where the knowledge of food and beverage, nutrient content of foods, eating behavior, and the role of food in society is critical. The demand for qualified professionals with education and training in the food science arena greatly exceeds the number of
II. Department Core Requirements for all Majors

have biology (one year), chemistry (two years), and physics (one year) of the MPT program, the student will be awarded the Bachelor of Science degree in Nutrition and Food Sciences.

Through appropriate selection and advisement, students in either DIET or NFS may meet the undergraduate requirements needed for admission to medical school (including naturopathic, chiropractic, or osteopathic) or graduate school in nutrition, food science, sports nutrition, or family and consumer sciences (see the Master of Arts in Nutrition and Food Sciences).

Course requirements for all Department Majors

I. General Education Studies for all Majors

A. Communication Skills
   English 1 (or equivalent) 6
   Speech: AGRI 183 (or equivalent) 6

B. Fine Arts and Humanities
   Two unspecified courses 6

C. Social Science Core
   Psychology 1 6
   Sociology 1 or 109, or Social Work 47 6

D. Analytic Sciences Core*
   Biochemistry 201 and 202 20
   Anatomy and Physiology 19-20 20
   Biochemistry 201 and 202 20
   Computer Science: AGRI 85, or Statistics 111 (or equivalent) 9
   Mathematics 9 or higher 9
   Chemistry 23 (or 31); 42 (or 141) 9
   Sociology 1 or 109, or Social Work 47 9

E. New Beginnings, AGRI 195 6
   Cultural Diversity 1-3

F. Physical Activity
   Two unspecified courses 2

*Students planning to attend medical or graduate school should have biology (one year), chemistry (two years), and physics (one year); plus calculus (one year) is recommended.

II. Department Core Requirements for all Majors

A. Dietetics
   NFS 123, 150, 250, 260, 261, 262, 263;
   Business Administration 120. 25
   Electives 20-42

B. Nutrition and Food Sciences
   1. Nutrition and Food Sciences
      In consultation with the student’s academic advisor, select four additional didactic courses, at least two of which must be at the 200 level. 25
      Electives 33-55

For Athletic Training add EDPE 23, 46, 157, 158, 166, 167, 185, 186, 187, 188, 200, PEAC 28

III. Department Major Requirements

A. Dietetics
   NFS 123, 150, 250, 260, 261, 262, 263;
   Business Administration 120.
   Electives

B. Nutrition and Food Sciences
   1. Nutrition and Food Sciences
      In consultation with the student’s academic advisor, select four additional didactic courses, at least two of which must be at the 200 level.
      Electives

For Athletic Training add EDPE 23, 46, 157, 158, 166, 167, 185, 186, 187, 188, 200, PEAC 28

Plant and Soil Science

The Plant and Soil Science program allows students to expand their knowledge of science and apply it to plant production, landscape design, and to environmental issues related to plants and soils. The faculty represent the disciplines of agronomy, horticulture, entomology, plant pathology, and soil science. Our program provides a unique, interdisciplinary opportunity for studying plant/soil ecosystems that are managed for food, feed, or fiber production, for landscape purposes, or for recycling/waste utilization.

The program integrates classroom and field experiences and incorporates relevant environmental, social, and economic issues into the curriculum. Faculty help students develop individualized courses of study to match their interests and career goals. The following are areas of concentration within the program:

Agroecology: A goal of this concentration is to develop a knowledge base and skills to critically analyze and address issues related to sustainable agriculture.

Horticulture: This concentration provides students with the knowledge and skills needed for challenging careers in the “green” industry and in the production of fruits and vegetables.

Environmental Soil Science: Students learn how the soil affects the transport and remediation of environmental contaminants in both natural and agricultural ecosystems.

The Plant and Soil Science faculty are actively involved not only in teaching but in research that is targeted at solving agricultural and environmental problems. Students are encouraged to become involved in on-going research projects or to develop independent learning experiences with the guidance of a faculty member. In addition, opportunities exist for off-campus internships that provide valuable work experience and insights into professional careers.

Required Core Courses (18-20 hours):

Plant and Soil Science 11, 106, 161, 162; Botany 4; Botany 104, 117; Inorganic Chemistry 23 or 31; Organic Chemistry 26, 42, or 141; Math, 9 or equivalent; Statistics 111, 141, 211 or Natural Res. 140; plus a minimum of 18 credits made up of at least six additional courses in Plant and Soil Sciences at the 100 level or above, excluding PSS 195, 196, 197, 198, so as not to include independent studies and special topics unless approval is obtained from the student’s advisor.

For more complete information see our home page at http://pss.uvm.edu.

Sustainable Landscape Horticulture

Sustainable Landscape Horticulture provides a professional education in the use and care of trees, shrubs, lawn grasses, and other plants in the human environment.

The program integrates professional training in landscape design and the plant sciences with courses in business and the liberal arts. The emphasis is on the preparation of students for the changing future and a variety of careers in the expanding field of Sustainable Landscape Horticulture. Students are encouraged to participate in internships related to their studies.

This interdisciplinary program is coordinated by the Department of Plant and Soil Science; student majors in the program are therefore enrolled in Plant and Soil Science.
Sustainable Landscape Horticulture

Required Core Courses:
Plant and Soil Science 11, 106 or 107, 125, 131, 132, 145, 161, 162; Forestry 21; Comm. Dev. and Appl. Econ, 61, 166, or Business Administration 120; Botany 4; Botany 104 or Forestry 295; Botany 117 or Forestry 254; Botany 160 or Forestry 120 or Natural resources 103; Natural Resources 25; Chemistry 23; Math. 10; Statistics 111, 141, 211 or Natural Res. 140.

The Self-Designed Major

Undergraduate students have the opportunity to define a personalized program of study when their personal educational objectives fall outside curricula defined by departments and programs of the College. The requirements for a Self-Designed Major are specified in a “Guide for Proposal Development and Submission,” available through the Student Services Dean’s Office in 108 Morrill Hall. Each student is asked to formulate their own program of study by working in association with a faculty advisor and the committee of faculty which oversees the major. Designing a major requires examination of personal goals and acquiring information about formal courses and other possible learning experiences (e.g. internships, independent studies, special topics studies, and independent research). The information is then formulated into a package of proposed course work and other learning experiences.

The objective is to design a coherent and unique plan of study to meet the specific learning needs of the student and by which the student will achieve an advanced state of skills, knowledge, and values in their chosen field. The student must justify the designed package in two ways: (1) value to the student; (2) uniqueness and deviation from curricula already available. The Self-Designed Major usually comprises about 60-100 credits of study in the junior and senior years (after the College core requirements have been fulfilled).

The design of the Major is itself an intensive learning experience; therefore, students should plan to spend some time each week over the course of one semester while self-designing the Major.

MINORS

SPECIFIC MINOR REQUIREMENTS

Any student in the College interested in enrolling in one of the following minors should contact the department administering the program. If accepted, the student will be assigned a “minor advisor” from that department who must approve all program plans and course selections.

Students in the College may enroll, on a space available basis, in minors listed under the School of Natural Resources and in minors offered campus wide.

Agricultural and Resource Entrepreneurship: 15-16 credits including CDAE 166, 167, 168, and 266, plus one course (3-4 credits) from the following restricted electives: CDAE 157, 264, or 267.

Animal Science: Five courses with a minimum of 15 credit hours including Animal Science 1; two courses selected from 43, 110, 122, 141, 205, 215 or 216; two courses selected from 113, 115, 117, 118, 161, 163, 213, 214, 220, 230, 231 or 233. At least three credits must be at 200 level or above.

Applied Design: Nine credits in required courses: CDAE 15; 1 or 16; 101 or 231 plus two additional elective courses at or above the 100 level, approved by the student’s advisor to define an applied design focus for a total of 15 credits.

Biological Science: Biology 1 and 2 plus a sequence of three semester courses (nine to 12 credits) in the biological sciences selected with advice of the faculty advisor and approved by the program chair. The courses are selected to provide a relevant extension of the student’s major program into the biological sciences.

Botany: At least 15 hours of course work to include Botany 4 or Biology 1 or 2; plus three additional courses in Botany, at least one at the 200 level.

Community and International Development: A total of 15 credit hours with nine from required courses CDAE 2, 61, and 171; and six hours from a list of restricted electives as follows: CDAE 166, 167, 196, 218, 237, 253, 255, 272, 273, or 296.

Consumer and Advertising: Fifteen credits including CDAE 15, 127, 128, 183, and an advisor-approved elective.

Consumer Affairs: 15 credits including CDAE 127, 128, 157, and 159, plus one of the following restricted electives: CDAE 102, 250, or 255. Note: CDAE majors must take CDAE 250 as their “elective.”

Consumer Economics: Fifteen credit hours including 9 credits in required courses CDAE 127, 157 and 255; and six credit hours from restricted electives: CDAE 102, 128, 158, 159, 250.

Environmental Studies: Seventeen hours of Environmental Studies including 1, 2; nine hours at the 100 level or above, with at least three hours at the 200 level and may include one non-ENVS course with the approval of a student’s advisor and Program Director.

Microbiology: Core requirements are MMG 101 and 102, Botany 132, plus an additional six credit hours of MMG courses chosen from MMG 195/196, 201, 203, 211, 220, 222, 223, 225, 295/296 depending on student needs.

Molecular Genetics: Core requirements are MMG 101, 102, 211, and Botany 132, plus an additional six credit hours of MMG courses chosen from MMG 195/196, 201, 203, 223, 225, 295/296 depending on students needs.

Nutrition and Food Sciences: A total of fifteen credit hours in Nutrition and Food Sciences, 9 credit hours consisting of 43, 53, 143, and six credits of NFS courses from the following: 63, 123, 150, 153, 165 or any 200-level course approved by the student’s minor advisor that will define a particular focus. Independent study, field experience and undergraduate research cannot be counted in this total.

Plant and Soil Science: Sixteen credits including Plant and Soil Science 10 or 11, 161, plus an additional 9 credits in Plant and Soil Science courses at the 100 level or above.

Small Business: Fifteen-six credits including 12 credits in required courses CDAE 166, 167, 168, 266; one course three-four credits from the following restricted electives: CDAE 157, 169, 264, 267.

Sustainable Agriculture: Fifteen hours including nine in required courses ASCI 230 or CDAE 208, CDAE 61 and PSS 152; three or four credits from the following restricted electives: ASCI 110, 113, 115, 118, 213, 214, 215, 220, 231, 233, 234, 264 or CDAE 171, 205, 218, 272, 273 or PSS 106, 161, 122, 123, 124, 125, 127, 138, 141, 145, 154, 210, 215, 217, 221, 232; and a three- to six-credit hour internship: AGRI-SPECIAL TOPICS, ASCI 197 or 297, CDAE 196, or PSS 197 or 297.
The College of Arts and Sciences

The College of Arts and Sciences at UVM combines the advantages of a small liberal arts college and the resources of a major research institution. It provides students with a sound liberal education through close interaction with nationally and internationally noted scholars. This close interaction helps students acquire knowledge and scholarly discipline that enables them to think critically about issues they will confront in their professional and personal lives. The College’s academic programs acquaint students with the intellectual, cultural and aesthetic heritage of our complex world. Our programs also seek to prepare students for entry into rewarding careers in a variety of fields and for advanced study that may be prerequisite to other opportunities. More and more professional schools, corporate managers and graduate schools seek individuals who have a fine liberal arts background.

In UVM’s College of Arts and Sciences students are encouraged to develop depth and breadth of knowledge, and critical thinking and communication skills that are the hallmarks of a liberal education. Students begin developing these skills in a first-year seminar, and as they complete degree requirements they have the opportunity to explore a wide range of disciplines spanning literature, the humanities, the fine arts, foreign languages, the natural and social sciences and mathematics. The College offers over forty majors from which students may choose.

The offices of the Dean of the College of Arts and Sciences are located in Waterman Building.

ORGANIZATION AND DEGREE PROGRAMS

The Bachelor of Arts degree program may be completed with an approved major in one of the following fields:

- Anthropology
- Area & International Studies
- Art History
- Art – Studio
- Biology
- Botany
- Chemistry
- Classical Civilization
- Communication Sciences
- Computer Science
- Economics
- English
- Environmental Studies
- French
- Geography
- Geology
- German
- Greek
- History
- Latin
- Mathematics
- Music
- Philosophy
- Physics
- Political Science
- Psychology
- Religion
- Russian
- Sociology
- Spanish
- Theatre
- Women’s Studies
- Zoology
- Individually Designed
- Major
- Studio
- Music Performance
- Music Theory

The Bachelor of Science degree program may be completed with an approved major in one of the following fields:

- Biology
- Chemistry
- Environmental Sciences
- Geology
- Geology
- Greek
- History
- Latin
- Mathematics
- Music
- Philosophy
- Physics
- Political Science
- Psychology
- Sociology
- Spanish
- Theatre
- Women’s Studies
- Zoology
- Individually Designed
- Major
- Studio
- Music Performance
- Music Theory

FIRST-YEAR PROGRAMS

The first year of university-level study is challenging. The College of Arts and Sciences offers students two programs that help them complete the first year successfully and acquire the skills and background necessary for success throughout their university careers.

In their first semester, students are encouraged to enroll in the Teacher-Advisor Program (TAP), which is designed to help students begin a successful liberal arts education. TAP combines interactive courses with careful academic advising. In TAP seminars, students approach significant issues from a variety of points of view, develop their critical thinking, and improve their skills in oral and written communication. Students’ TAP instructors are also their academic advisors and help first-year students discover their interests and reach academic goals. TAP courses all satisfy the College’s distribution requirements. Typical topics for TAP courses include “Science as a Way of Knowing,” “Coming to America: Autobiography and Ethnicity,” “Geology and Ecology of Lake Champlain,” “Rationality: Belief in God,” and “Student Movements in the Twentieth Century.” More than forty different courses like these are available to first-year students each year.

As students enter their second semester, it is important for them to continue developing the critical thinking, speaking and writing skills cultivated in TAP, and also to reflect on their choices of majors and minors. Our second-semester program, STEP (Sophomore Transition and Engagement Program) is designed to facilitate the transition into the sophomore year. Courses encourage the intellectual shift from a broad exposure to the liberal arts to in-depth study in a particular field. STEP courses are available in all disciplines and are interactive, with significant writing, speaking, or other kinds of engagement that cultivates critical thinking skills.

The combination of TAP and STEP will allow you to get your university education off to a strong start.

THE JOHN DEWEY HONORS PROGRAM

The John Dewey Honors Program brings together academically committed students who seek an especially challenging and creative undergraduate experience. John Dewey Scholars participate in seminars with other honors students from across the liberal arts, take one or more honors-level courses in their majors and complete their senior year with an honors thesis or creative project. A variety of special seminars and cultural, social, and service activities round out the program. John Dewey scholars have an honors advisor to help them design the best possible schedule of courses, and are given priority enrollment for courses. The Honors Program lounge offers students a quiet space for studying and socializing.

A select group of first-time, first-year students is invited to join the program each year. In addition, students who do well during their first year at the university may apply for admission to the program at the beginning of their sophomore year. Students who successfully complete the program graduate as John Dewey Scholars and receive College Honors as well.
PREPROFESSIONAL PREPARATION

Whether you are interested in medical, dental or law school, or graduate work in other fields, the College of Arts and Sciences offers you excellent opportunities to complete your preprofessional education.

Medicine and Dentistry: Minimum requirements for entry into medical and dental schools include one year each of biology, general chemistry, organic chemistry, physics and calculus. Increasing numbers of medical and dental schools also are requiring a year of English, work in the humanities, social sciences, and languages. There is however no required or preferred major. As long as you complete the courses required by your chosen professional schools, you may pursue any undergraduate major in UVM’s College of Arts and Sciences. Medical and dental schools are primarily concerned with the overall scope and quality of undergraduate work. Only about half the first-year students in medical or dental schools have majored in a science, for example. Thus, you should follow your true interests and work to achieve the academic standing necessary for. Your academic advisor will help you plan your program. In addition, the Center for Career Development coordinates pre-medical and pre-dental advising, and has information about the requirements of specific medical and dental schools.

Because the UVM College of Arts & Sciences offers the advantages of a small liberal arts college within a comprehensive university, students have the opportunity to do research with faculty who are nationally and internationally recognized leaders in their fields. We have an excellent record of placing graduates in medical and dental schools. Among the institutions where recent pre-medical graduates are now studying are Albert Einstein College of Medicine, Baylor, Boston University, Columbia, Cornell, Dartmouth, Hanaman Hospital and the Mayo Clinic, while pre-dental graduates are studying at Boston University, Columbia, NYU, Northwestern, and University of Pennsylvania.

Law: A significant number of UVM students consider attending law school immediately or a few years after graduation. UVM is successful in placing its graduates in leading law programs around the country, including at Yale University, New York University, Columbia University, and the University of Michigan.

Arts & Sciences students have the opportunity to participate in the accelerated BA/JD Program with Vermont Law School. The Program allows exceptionally qualified students to complete both a Bachelor of Arts in the College of Arts and Sciences and a Juris Doctor at Vermont Law School in six rather than seven years. For application and program information, contact the program Coordinator, Professor Howard Ball, Department of Political Science, 656-6263, or the College of Arts and Sciences, 656-3166.

The University of Vermont provides guidance to its pre-law students through the Center for Career Development and a Faculty Pre-Law Advisory Committee. We begin working with students as soon as they express an interest in law and provide guidance throughout the undergraduate career.

Unlike pre-medical programs, where students must take a prescribed set of courses, there is no pre-law curriculum. “What law schools seek in their entering students is not accomplishment in mere memorization,” states the Association of American Law Schools, “but accomplishment in understanding; the capacity to think for themselves, and the ability to express their thoughts with clarity and force.” The Association does not prescribe a specific course of study to prepare undergraduates for law school, but rather suggests a broad approach to liberal arts including work in English, humanities, logic, mathematics, social sciences, history, philosophy, and the natural sciences.

Graduate Study in Other Fields: In addition to medical, dental or law school, Arts and Sciences students pursue graduate education in a variety of fields ranging from ethnomusicology to journalism or immunology. Recent UVM College of Arts and Sciences graduates have been accepted at such institutions as the University of Wisconsin, Brandeis, Harvard, University of Michigan, Yale, New York University, Princeton, Cornell, Berkeley, Tufts, and Duke.

Secondary Teaching: Students in the College of Arts and Sciences who are interested in becoming eligible to teach in secondary grades (7-12) should review the College Education and Social Services section titled Teacher Education. All requirements must be fulfilled as listed in the CESS Secondary Education State Approved program and not simply the sequence of Professional courses. The requirements are also available at http://www.uvm.edu/cess/stservices

REQUIREMENTS FOR THE BACHELOR OF ARTS DEGREE

A. A student must earn a cumulative grade-point average of 2.0 in a program comprised of a minimum of 122 semester hours to include two hours of physical education activities. Students 25 years of age or older at the time of admission to the University or students with a documented medical condition which precludes participation in such activities are exempt from the physical education requirement and must present a total of 120 hours of academic credit.

Of the 122 hours of credit required, students electing a minor offered by the College must complete 96 hours in courses offered by departments and programs in the College of Arts and Sciences. The remaining 24 hours may be taken in courses offered by any academic unit at The University of Vermont. Students electing an approved minor offered by another school or college of the University (a cross-college minor), must complete 84 hours in courses offered by the departments and programs in the College of Arts and Sciences. The remaining 36 hours of credit, to include courses required for the minor, may be taken in courses offered by any academic unit of The University of Vermont.

No more than eight hours of Military Studies credit may apply toward the degree. Courses taken on a pass/no pass basis may not be used toward completion of any requirement listed below under sections C and D and E.

B. A student must be matriculated in the College of Arts and Sciences and in residence at The University of Vermont during the period in which he or she earns 30 of the last 45 hours of academic credit applied toward the degree.

C. A student must complete the following courses which comprise the general and distributive requirements for the Bachelor of Arts degree. All courses used to satisfy these requirements must carry at least three hours of credit and may not be taken on a pass/no pass basis.

General Requirements

1. Non-European Cultures: One course, other than a foreign language, which deals with non-European cultural traditions. The course selected to satisfy this requirement may also be used to fulfill the distributive requirement, but one course cannot be used to satisfy both General Requirements 1 and 2.
2. Race Relations and Ethnic Diversity in the United States:
One course which addresses centrally the question of race relations and ethnic diversity in the U.S. 5 The course selected to satisfy this requirement may also be used to fulfill the distributive requirement, but one course cannot be used to satisfy both General Requirements 1 and 2.

Distribution Requirements
Six of the seven categories must be completed. No more than two courses from the same department may be used to satisfy the distribution requirement. No single course may satisfy more than one category, except that a foreign language course which fulfills the literature category simultaneously fulfills the category of foreign language. Courses which satisfy major and minor requirements may also be used to satisfy distribution requirements.

1. Foreign Language: One course numbered 52, or in Latin, 51 and 52, or one course numbered 100 or above (except Spanish 105). A student who has achieved a score of 4 or better on an appropriate Advanced Placement Test will be exempt from this requirement. 3 Exemption will also be granted to those students who achieve a score of 650 or better on the appropriate CEEB Achievement Test and who pass oral and written tests administered by the appropriate foreign language department.

2. Mathematics: One course numbered 13, 14, 17 or above or Statistics 51 or above. A student who has achieved a score of 4 or better on the Calculus AB or a score of 3 or better on the Calculus BC Advanced Placement Tests will be exempt from this requirement.

3. Fine Arts: One course in Studio Art or Art History, Music, Theatre, or Film.

4. Literature: One course selected from a list of approved offerings in Classics, English, French, German, World Literature, Greek, Italian, Latin, Russian, and Spanish. 5

The following courses have been approved for this category for the 2002-03 academic year: Anthropology 21, 23, 24, 64, 128, 160, 161, 162, 163, 165, 166, 167, 170, 175, 177, 179, 189; Art 8, 146, 185, 187, 188, 192, 285; Classics 145; English 61, 72, 173, 174; French 289; Geography 1, 51, 56, 151, 154, 178; History 9, 10, 49, 41, 45, 46, 50, 51, 62, 65, 149, 141, 149, 156, 151, 152, 161, 163, 164, 240, 241, 250, 252; Music 15; Philosophy 3, 121, 122, 221; Political Science 157, 168, 170, 174, 175, 177, 179; Religion 20, 21, 130, 131, 132, 144, 145, 240; Sociology 171, 213, 272; World Lit 145.

The following courses have been approved for this category for the 2002-03 academic year: All ALANA Studies courses; Anthropology 160, 64, 169, 187; Communication Sciences 160, Economics 155, English 57, 166, 167, 168, 170; Geography 60, History 68, 169, 187, 188, 189, Political Science 29, 129; Psychology 269; Religion 90, 128; Sociology 19, 31, 118, 119, 219; Art 295 “Working With Culturally Diverse Sources” and Art 295 “Cultural Transformations” will meet this requirement. Anthropology 187 is cross-listed with Sociology 119, WILT 16, 116.

6. Speech courses will not satisfy the Fine Arts requirement. 7

Fine Arts courses may be used to satisfy the Fine Arts requirement if their cumulative credit hour total is equal to or greater than three.

Speech courses will not satisfy the Fine Arts requirement.

7. The following courses have been approved for this category for the 2002-03 academic year: Classics 37, 42, 153, 155, 156; all English courses except: 1, 4, 30, 35, 53, 101, 102, 103, 104, 108, 109, 111, 112, 113, 114, 115, 118, 119, 120; all French courses numbered 111 or above except 191, 201, 209, 211, 215, 216, 292, 293, 294, 295, 296; all World Literature courses; all German courses numbered above 100 except: 103, 104, 121, 122, 201, 202, 215; all Greek courses numbered above 200; Italian 157, 158; all Latin courses numbered above 100 except 111, 112, 255; all Russian courses numbered above 100 except: 101, 121, 122, 141, 142, 161, 221, 222, 225, 271; all Spanish courses numbered 149 or above except: 201, 202, 210, 290, 291, 292, 293, 294, 295, 296.

8. The following courses have been approved for this category for the 2002-03 academic year: all Art History, History, Philosophy, Religion courses; ALANA Studies 55, 159; Classics 21, 23, 24, 35, 121, 122, 149, 154, 157, 158, 159, 221, 222, Greek 203, 205; Latin 255; Political Science 41, 141, 142, 143, 144, 146, 241, 242, 243, 249.

REQUIREMENTS FOR THE BACHELOR OF SCIENCE DEGREE

A. A student must earn a cumulative grade-point average of 2.0 in a program comprised of a minimum of 122 credit hours. A student must earn a cumulative grade-point average of 2.0 in the major field. No more than 45 hours of credit in the major field may be used toward completion of the 122 hours of credit required for graduation. At least one-half of the credit hours used toward the major requirements must be taken at the University of Vermont. Of these, at least 12 credits must be at or above the 100 level. Application of credits earned elsewhere to completion of the major is subject to approval by the appropriate department chairperson or program director. No courses applied toward satisfaction of major requirements may be taken on a pass/no pass basis.

B. A student must complete an approved major in the College of Arts and Sciences by satisfying the requirements specified by the department or program supervising the major and by maintaining a cumulative grade-point average of 2.0 in the major field. No more than 45 hours of credit in the major field may be used toward completion of the 122 hours of credit required for graduation. At least one-half of the credit hours used toward the major requirements must be taken at The University of Vermont. Of these, at least 12 credits must be at or above the 100 level. Application of credits earned elsewhere to completion of the major is subject to approval by the appropriate department chairperson or program director. No courses applied toward satisfaction of major requirements may be taken on a pass/no pass basis.

C. A student must complete a minor approved by the College of Arts and Sciences in a field other than the major by satisfying the requirements specified by the department or program supervising the minor. 6 Also, a student must maintain a cumulative grade-point average of 2.0 in the minor field. Completion of a second major will satisfy the minor requirement. As with the major, at least one-half of the credit hours used toward completion of the minor requirements must be taken at The University of Vermont, and application of credits earned elsewhere to completion of the minor is subject to approval by the appropriate department chairperson or program director. No courses applied toward satisfaction of the minor requirements may be taken on a pass/no pass basis.

The following courses have been approved for this category for the 2002-03 academic year: all Anthropology courses; Economics 19, 291; all Political Science courses except: 41, 141, 142, 143, 144, 146, 241, 242, 243, 249; Vermont Studies 52, Women’s Studies 73.

*Only course may be applied toward completion of both a major and a minor requirement.

The minor grade-point average will be calculated from the first set of courses which satisfy the minor requirements. However, if a student’s grade-point average in these courses falls below 2.0, and there are additional courses which are approved for inclusion in the minor, a student may elect to drop for purposes of the grade-point average calculation, one course graded below C and to replace this course with an approved alternate.
A. A student must earn a cumulative grade-point average of 2.0 in a program consisting of a minimum of 122 semester hours of academic credit for a Music Theory Concentration, or 125 semester hours of academic credit for Music Performance Concentration. Of these hours of required credit, two hours must be associated with physical education activities. Students 25 years of age or older at the time of admission or students with a documented medical condition which precludes participation in such activities are exempt from the physical education requirement and must present a total of 120 hours of academic credit applied toward the degree.

B. A student must be matriculated in the College of Arts and Sciences and in residence at UVM during the period in which he or she earns 50 of the last 45 hours of academic credit applied toward the degree.

C. A student must complete the General Requirement Race Relations and Ethnicity in the United States, the Distributive Requirement, and the following requirements as well as:

D. A student must complete an approved Major in the College of Arts and Sciences by satisfying the requirements specified by the department or program supervising the major, and by maintaining a cumulative grade-point average of 2.0 in the major field. No more than 50 hours of credit in the major field may be used toward completion of the 122 hours of credit required for graduation. At least one-half of the credit hours used toward the major requirements must be taken at UVM. Of these at least 12 credits must be at or above the 100 level. Application of credits earned elsewhere toward completion of the major subject to approval by the appropriate department chairperson or program director. No courses applied toward satisfaction of the major requirements may be taken on a pass/no pass basis.

Bachelor of Science (with optional minor) degree. A student electing this degree program must satisfy all of the requirements specified in sections A, B, C, and D (above), as well as:

E. A student must complete an approved minor in a field other than the major by satisfying the requirements specified by the department or program supervising the minor and by maintaining a cumulative grade-point average of 2.0 in the minor field. Students electing a minor offered by the College must complete 96 hours in courses offered by any academic unit at The University of Vermont. Students electing an approved minor offered by another school or college of the University (a cross-college minor) must complete 84 hours in courses offered by the departments and programs in the College of Arts and Sciences. The remaining 36 hours of credit, to include courses required for the minor, may be taken in courses offered by any academic unit of The University of Vermont. At least one-half of the credit hours used toward completion of the minor requirements must be taken at The University of Vermont, and application of credits earned elsewhere toward completion of the minor is subject to approval by the appropriate department chairperson or program director. No courses applied toward satisfaction of the minor requirements may be taken on a pass/no pass basis. No more than two of the courses from section C distribution requirements may be applied toward the completion of the minor requirements.

Requirements for the Bachelor of Music Degree

A. A student must earn a cumulative grade-point average of 2.0 in a program consisting of a minimum of 122 semester hours of academic credit for a Music Theory Concentration, or 125 semester hours of academic credit for Music Performance Concentration. Of these hours of required credit, two hours must be associated with physical education activities. Students 25 years of age or older at the time of admission or students with a documented medical condition which precludes participation in such activities are exempt from the physical education requirement and must present a total of 120 hours of academic credit applied toward the degree.

B. A student must be matriculated in the College of Arts and Sciences and in residence at UVM during the period in which he or she earns 50 of the last 45 hours of academic credit applied toward the degree.

C. A student must complete the Distributive and General Requirements identical to that required for the Bachelor of Arts degree.

D. A student must complete a Major with a concentration in either theory or performance by satisfying the requirements specified by the department, and by maintaining a cumulative grade-point average of 2.0 in the major field. An admission audition, junior standing jury examination, and senior recital are also required for the performance concentration. At least one-half of the credit hours used toward the major requirements must be taken at The University of Vermont. Of these, at least 12 credits must be at or above the 100 level. Application of credits earned elsewhere toward completion of the major is subject to approval by the appropriate department chairperson or program director. No courses applied toward satisfaction of major requirements may be taken on a pass/no pass basis.

Bachelor of Music (with optional minor) degree. A student electing this degree program must satisfy all of the requirements specified in sections A, B, C, and D (above) as well as:

E. A student must complete an approved minor in a field other than the major by satisfying the requirements specified by the department or program supervising the minor and by maintaining a cumulative grade-point average of 2.0 in the minor field. Students electing a minor offered by the College must complete 96 hours in courses offered by departments
and programs in the College of Arts and Sciences. The remaining 24 hours may be taken in courses offered by any academic unit at The University of Vermont. Students electing an approved minor offered by another school or college of the University (a cross-college minor) must complete 84 hours in courses offered by the departments and programs in the College of Arts and Sciences. The remaining 36 hours of credit, to include courses required for the minor, may be taken in courses offered by any academic unit of The University of Vermont. At least one-half of the credit hours used toward completion of the minor requirements must be taken at The University of Vermont, and application of credits earned elsewhere toward completion of the minor is subject to approval by the appropriate department chairperson or program director. No courses applied toward satisfaction of the minor requirements may be taken on a pass/no pass basis.

INTERNSHIPS

Arts and Sciences students are encouraged to do internships and may count up to 12 hours of internship credit towards their B.A. or B.S. Full information on internships and the regulations governing them is found in the Arts and Sciences Internship brochure, available in 304 Waterman.

REGULATIONS GOVERNING INDEPENDENT STUDY

A student may receive credit for a project or program of independent study which is supervised by an academic department or program within the University. Such independent study projects may be carried out under registration in courses entitled Readings and Research or Internship. All such projects must conform to University guidelines for independent study. There is no limit on the number of independent study credits which may be earned, but prior approval by the Committee on Honors and Individual Studies is required if a student wishes to elect nine or more such credits in a single semester.

REGULATIONS GOVERNING COLLEGE HONORS

A. The College Honors program, designed for the superior student with unusual initiative and intellectual curiosity, provides an opportunity for the pursuit of a two-semester, six-credit (3-3) independent research, scholarly, or creative project under the direction of a faculty sponsor. A student in the College of Arts and Sciences may apply for College Honors in a particular subject if, at the end of the junior year, he or she has a grade-point average of at least 3.20 and has been on the Dean’s List for three semesters. The program must have been approved by the sponsoring department and by the Committee on Honors and Individual Studies. All application materials must be turned in to the Committee by September 30 of the candidate’s senior year. Students must present a satisfactory written report and pass an oral examination upon completion of the honors project. Students who wish to consider undertaking a College Honors project during the junior year should contact the Office of the Dean for information concerning the circumstances in which such an exceptional arrangement is possible. College Honors credit will be counted toward the 45-hour limit (50-hour limit for B.S. candidates) in the major.

B. Some departments in the College, including Economics, English, History, Mathematics, Political Science, Religion, and Sociology, sponsor Departmental Honors programs. Participation in these programs is limited to those students who are specifically recommended by their department. Each department will define what is required to earn Departmental Honors. A student who successfully completes this program is granted a degree with Departmental Honors. These programs are administered directly by the sponsoring department and information concerning them may be obtained from faculty advisors.

C. Students may also earn College Honors through the John Dewey Honors Program, a three-year course of study. Ground work for the senior honors thesis is laid with John Dewey Honors seminars in the sophomore and junior years. In their senior year, John Dewey Scholars complete College Honors as described in Section A above. Application is restricted to students with a G.P.A. of 3.2 or higher, and must be made during the second semester of the first year. For further information, contact the College.

REGULATIONS GOVERNING STUDY ABROAD

Students should refer to the general University regulations and procedures pertaining to Study Abroad. For Arts and Sciences students the following additional policies pertain to the application of credit earned in a Study Abroad program:

A. Regardless of the number of credits accepted in transfer by the University, a maximum of 16 credits earned in a one-semester Study Abroad program will be applied toward satisfaction of degree requirements. For year-long programs, a maximum of 32 credits will be applied toward the degree.

B. Students must complete 30 of the last 45 hours of degree credit in residence at UVM. One-half of the hours applied toward the satisfaction of major requirements, including 12 hours at the 100 level or above, must be completed at The University of Vermont. One-half of the hours applied toward the satisfaction of minor requirements must be completed at The University of Vermont.

C. Under no circumstances will a student in the College of Arts and Sciences be permitted to enroll in a University-sanctioned Study Abroad program while on trial.

REGULATIONS GOVERNING TRANSFER INTO THE COLLEGE

A student who wishes to transfer into the College of Arts and Sciences from another college or school at the University must comply with the Intercollege Transfer policy in the section on Academic and General Information. Applications for internal transfer may be submitted to the Office of the Dean at any time, and they will be reviewed on a continuous basis.
REGULATIONS GOVERNING ACADEMIC STANDARDS

The following criteria for academic trial and dismissal, while making allowances for the student in the first semester, are designed to encourage academic work of quality at least equal to the minimum which is required for graduation.

Trial

A. A student who earns a semester grade-point average higher than that which merits dismissal but below 2.00 is placed on trial. In order to avoid dismissal from the University, a student who has been placed on trial must in the following semester earn a 2.00 semester average, enroll in all courses for a letter grade, and maintain a program of 12 or more credit hours. No student will be removed from trial until both the semester and cumulative averages are at least 2.00. A student who is on trial may not enroll in a University-sanctioned study abroad program.

B. First-Year Students. Following the first semester of enrollment, a student who earns a semester grade-point average higher than that which merits dismissal, but below 1.67, is placed on trial and must in the following semester satisfy the same probationary requirements as described above. All first-year students who have a cumulative grade-point average which is below 2.00 after completion of the second semester will be placed on trial.

Dismissal

C. A student who does not satisfy the conditions of trial, or who earns a semester grade-point average of 1.00 or lower, or who earns failing grades in one-half of the semester credit hours attempted (excluding courses in physical education and military studies) will be dismissed for low scholarship. The period of dismissal is one year. Dismissed students must receive written approval from the Arts and Sciences Dean’s Office before enrolling in any University course.

Readmission Following Dismissal

D. A dismissed student who presents evidence of his/her ability to perform satisfactorily may be considered for readmission on trial. A student who has been dismissed for a second time will not be considered for readmission on trial until at least three years have elapsed. Further information regarding readmission may be obtained from the Office of the Dean.

MAJORS: DEPARTMENT REQUIREMENTS

Bachelor of Arts, Bachelor of Science, and Bachelor of Music requirements are found under the appropriate department headings.

INDIVIDUAL DESIGN MAJOR

The IDM is a nondepartmental, interdisciplinary major for those Bachelor of Arts candidates whose academic interests are not met by the major programs currently offered by the College. An IDM may not be a program of narrow professional training. Rather, it must lead to an intensive investigation of some broad area of human knowledge which is not covered by a single departmental discipline. During the senior year, IDM majors engage in a three-credit tutorial for which they complete a paper or an equivalent project which demonstrates the essential coherence of the major. A College Honors project (six credits) may be substituted for the tutorial requirement. Application to pursue an IDM should be approved by the Committee on Honors and Individual Studies before the end of the candidate’s junior year. No more than 18 hours of the proposed major may be completed at the time of application. Additional information about the IDM program is available in the Office of the Dean.

ANTHROPOLOGY

Thirty hours in Anthropology including 21, 24, 26, and 128; 225 or 228 (recommended for the junior year) and five additional courses of which three should be at the 100 level and at least one at the 200 level.

AREA AND INTERNATIONAL STUDIES PROGRAM

Entering students are invited to consider the option of concentrating in Area and International Studies. Courses in several academic disciplines can be combined so as to focus on a particular area of the world, thus providing an opportunity to test generalizations against the particular reality of a geographical area and its people.

Undergraduates who major in Area and International Studies usually accumulate sufficient credit to enable them also to fulfill department requirements in one of the social sciences, humanities, or foreign languages.

Major programs are available in the following five areas: Asia, Canada, Latin America, Russia/East Europe, Europe (Western, Northern, Mediterranean). Minor programs are also available in these areas, as well as in Africa and the Middle East.

The approach to undergraduate education combines exposure to the traditional disciplines with integrative knowledge and appreciation of a foreign culture and thus combines the broad liberal arts education with a more specific area competence.

During their first and sophomore years, students who plan to major in Area and International Studies should take the required foreign language courses as well as beginning courses in the humanities and social sciences which are prerequisites for subsequent required courses and also meet the general distribution requirements.

Students interested in concentrating in Area and International Studies are urged to contact the Director.

Specific requirements of the individual programs follow:

Asian Studies

In selecting courses from the Asian Studies listing, students must consult with an appropriate Asian Studies advisor and demonstrate in their choices thematic and/or geographic coherence.

The Asian Studies major consists of at least 33 credit hours in courses from the Asian Studies listing (see Courses of Instruction; Asian Studies) to include the following:

A. Completion of two years’ (normally 16 hours) study of a language of the geographic subarea of concentration. No more than 16 hours of language study may be counted toward the major. For students who have demonstrated fluency in the language of the subarea of concentration (for instance, native speakers of the language), the language requirement will be waived. Such students will still be required to complete the 33-credit hour requirement.

B. The remaining credit hours must include at least nine hours at the 100 level and three hours at the 200 level. These hours must be selected from at least three academic disciplines. Language courses may not be used to fulfill this requirement.

...
Note: Courses significantly but not entirely on Asia may be counted toward a student's major requirements only if papers or projects relevant to their Asian subarea or their Asian thematic focus have been completed. The Dean's Office must receive written approval from the advisor in order for these courses to be counted toward the major.

Students who major in Asian Studies and minor in an Asian language may overlap only one course as stipulated in the section on Distribution Requirements.

**Canadian Studies**

The Canadian Studies major requires at least 30 credit hours to consist of the following:

A. Three required courses: Area and International Studies 91, Introduction to Canada; History 66, Canadian History: 1867 to the Present; Area and International Studies 296, Seminar on Modern Canada.

B. Seven additional courses, of which at least six must be at the 100 level or above, and of which at least five must be chosen from the following 100 percent Canadian content list: AIS 195, 196, 259; Anthropology 167; Art 180, 282 (when topic is Canadian); Bus. Admin. 294; English 157, 158; French 293, 285; Geography 52, 210; Geology 272, 273 (when this field course goes to Canada); History 65, 265, 165; Pol. Sci. 173.

C. Majors will study French language through the intermediate level (French 52) or higher.

Majors are strongly encouraged to acquire an intermediate/advanced proficiency by completing at least French 201. Majors pursuing intermediate/advanced proficiency should consult with the Canadian Studies faculty of the Romance Languages Department to determine an appropriate plan of study.

**Latin American Studies**

A. Twelve hours selected from the following five courses: Anthropology 161; History 62, 63; Geography 56; Political Science 174.

Two additional semester courses selected from Area and International Studies, 195, 194, 195, 196, 197, 198; History 161, 163, 164, 262; or from courses recommended by the Program of Latin American Studies.

B. Plus six hours of advanced Spanish (Spanish 142, 279, 281, 286, 287, 293, 294).

C. An additional 12 hours from related courses chosen in consultation with advisor.

**Russian/East European Studies**

A. 30 hours of required courses to include the following: Two courses from HIST 27, 137, 138; ECON 116; POLS 172; WLIT 118; two courses at the 100 level or above in Russian; three additional courses in the major, chosen in consultation with a consultant or advisor in the major.

B. Recommended courses: Area and Int’l Studies 91.

The program also offers an interdisciplinary Individual Design Major in Russian/East European Studies and Business. The program of study must be planned with a member of the Russian/East European Studies faculty.

Required courses (35 hours):

Two courses in Russian at the intermediate level; four courses in Economics including 116; one Russian/East European Area Studies course other than those in Economics; two courses in Business Administration; two approved electives at the 100 level or above.

**European Studies (Northern, Western, Mediterranean)**

A total of 33 hours in approved European Studies courses to include nine hours at the 200 level. No more than 12 hours may be taken from any one discipline. Only 15 hours of transfer credit may be applied toward the major. Students must consult closely with their European Studies advisor in the development of a coherent program of courses.

A. European Studies seminar: Senior research project: All seniors must complete a research project for at least three credits on a subject focused on northern, western, or Mediterranean Europe and approved by the European Studies subcommittee. This requirement can be fulfilled by International Studies 291 (European Studies Seminar); International Studies 234 and 235 (Honors/International Studies); International Studies 297 or 298 (Advanced Readings and Research). Students should expect to use their competency in a European language (other than English) in this research project where relevant. Upon request, the European Studies subcommittee may approve a research project done in conjunction with a 200-level seminar offered by one of the college's departments.

B. European culture and thought: Twelve hours from the approved list to include six hours at the 100 level or above.

**Art:** 5, 6, 148, 149, 155, 158, 161, 164, 165, 170, 172, 174, 177, and 179 or 282 (when the content is European); **Classics:** 24, 35, 35, 37, 42, 153–159; **English:** 21, 22, 25–28, 85, 86, 102, 103, 121, 122, 124, 125, 127, 128, 129, 130, 133, 134, 141, 142, 146, 152, 153, 154, 221, 222, 241, 242; **Film:** 5, 6, 107, 161; **French:** 111, 112, 225, 226, 235, 245, 246, 247, 253, 256, 265, 266, 275, 276, 290, 291, 292; **German:** 104, 121, 122, 155, 156, 201, 213, 214, 225, 226, 237, 238, 247, 248, 251, 252, 263, 264, 271, 273, 275, 276, 278, 279, 281, 282; **Greek:** all courses above 100 level; **Italian:** 121, 122, 157, 158; **Latin:** all courses above 100 level; **Music:** 11, 12, 111–114; **Philosophy:** 101, 102, 105, 107, 133, 140, 151, 160, 269; **Political Science:** 141, 142, 146; **Religion:** 22, 111, 116, 122, 124, 173, 224, 226, 228, 280; **Spanish:** 141, 235, 236, 237, 245, 246, 265, 276, 277, 293, 299, **Theatre:** 136, 137, 138; **World Literature** 11, 14, 17, 18, 24, 35, 87, 95, 96, 111, 114, 117, 118, 122, 153-156.

C. European history and society: Twelve hours from the approved list to include six hours at the 100 level or above.

**BSAD:** 236; **Economics:** 113; Geography: 55, 155; **History:** 13, 14, 19, 21–27, 85, 86, 120–136, 139, 185, 186, 190, 191, 221, 222, 224–228, 285; **Political Science:** 171, 257, 276, 287.

D. European language: Six hours of a European language other than English at or above the 100 level. Students who fulfill nine or more hours of their “Culture and Thought” requirement through the study of any one such language must fulfill this requirement in a second European language other than English.

Note: Other equivalent courses within each area may be accepted with permission of the Director of European Studies.

**ART** Students may major in one of the following:

**Studio Art:** Thirty hours in Studio Art, including nine hours in foundation courses (to include Art 3 and two from 1, 2, 4) with three different instructors; 15 hours at the 100 level (only three of which may be 197; six of which may be 195) with two different instructors, including courses in the areas of two-dimensional study (drawing, painting, printmaking, photography, film, and video) and
of three-dimensional study (sculpture, ceramics, fine metals); and six hours at the 200 level, three of them in the senior year; nine hours of Art History, including two of the following: 5, 6, or 8; and one of the following: 140, 170, 172, 174, 177, 179, 180, and 199 when approved for this requirement (permission depends upon topic; check with Art Department).

Note: A Studio Art major may not take more than one Evening Division course per semester in Studio Art.

**Art History:** Thirty hours in Art History, including six hours from 5, 6 and 8; 12 hours to include three hours from each of four different categories (196 courses in these categories also qualify): Ancient and Medieval (146, 148, 149, 155), Early Modern European (158, 161, 164, 165), Modern, American, and Canadian (170, 172, 174, 177, 180), Asian (185, 187, 188, 192), Other Non-Western Traditions, New Approaches to Art History, and Contemporary Art (140, 179, 189, 199); 12 additional Art History hours, to include at least one course (three hours) numbered 282 or above to be taken during the junior or senior year, preferably during the senior year. Six hours of Studio Art; the study of a foreign language through 51–52.

French or German is strongly recommended for students considering eventual graduate work in Art History.

For Art Education, see College of Education and Social Services.

**Biology**

Students may select either of two degree programs:

*Bachelor of Arts:* Chemistry 31, 32 or 35, 36 to be taken the first year if possible; 141, 142; Physics 11 or 31 in combination with 21 (and Physics 12 or 42 in combination with 22 recommended); Math. 19, 20; or 21, 22. Thirty-two hours of biology including introductory biology (Biology 11, 12 or 1B, 2B is preferred, but 1A, 2A is accepted), 101, 102, 103, 104 and three additional courses (including at least one course with laboratory) in one of several concentrations. One course may be taken from outside the Department from approved offerings of the biologically-oriented departments. A list of courses in each concentration is provided below. For a list of approved offerings in other departments, consult the Biology Department Office. College honors will not count toward the major. **NOTE:** Most professional schools (e.g. medicine, dentistry, veterinary, physical therapy) require the multiple of Physics 12 or 42 in combination with 22.

*Bachelor of Science:* Chemistry 31, 32 or 35, 36 to be taken the first year if possible; Chemistry 141, 142; Physics 21, 22 in combination with 11, 12, or preferably 31, 42; Math. 19, 20 or 21, 22. Statistics 141 or 211. Forty-six hours of biology including introductory biology (Biology 11, 12 or 1B, 2B is preferred, but 1A, 2A is accepted), 101, 102, 103, and 104. Of the remaining 23 hours in 200-level courses, no more than 11 hours may be taken outside the Department. Up to six hours of Biochemistry 301, 302 and/or up to six hours for Biology 197, 198 or Honors 208, 209 will be accepted as credit toward the 23 hours in 200-level courses. A list of the courses in the several concentrations is provided below. For a list of approved offerings in other biologically-oriented departments, consult the Biology Office.

**Environmental Biology:** This concentration is appropriate for students with interests in Ecology, Evolution, Conservation Biology, or Animal Behavior. Biology 102 is required of all Biology majors. Other recommended courses in this concentration include, but are not restricted to: Biology 203, 206, 208, 217, 238, 246, 254, 255, 264, 270, 295.

**Professional Biology:** Students with interest in the medical, veterinary, dental, and allied health fields may choose from the following courses: Biology 205, 212, 217, 219, 223, 246, 254, 265, 295, and Honors 208, 209. In addition, students may take approved courses offered by other biologically-oriented departments.

**Cell and Molecular Biology:** This concentration serves students with interests in Cell, Molecular, and Developmental Biology. Students may choose from: Biology 205, 212, 223, 231, 263, 265, 267, and Honors 208, 209. In addition, students may take approved courses offered by other biologically-oriented departments.

**General Biology:** This concentration serves students who wish a very broad training in life science, including zoology. After consultation with their Biology Department faculty advisor, students take a variety of courses drawn from the approximately three dozen offered by the Biology Department or from other approved courses in life science. See the Biology Department for a listing.

**Neurobiology:** This concentration focuses on molecular and cellular aspects of the nervous system. Funding from the Howard Hughes Medical Institute allows students to take courses offered by faculty of three departments. Three courses are required, Biology 261 and 295 (Neurobiology Lecture and Neurobiology Laboratory) and PSYC 221 (Physiological Psychology). Students may also take ANNB 202, PSYC 121, 220, 223, PHRM 290 as well as other advanced courses in cell and molecular biology.

**Botany**

Math. 21, 22; or Math. 21 and Statistics 141 or 211; or Math. 19, 20 and Statistics 141 or 211; Physics 21, 22, and 11, 12 or preferably 31, 42; Chemistry 42 or preferably 141, 142; Biology 1, 2; Biology 101 or 132, 104, 107, 108, and 109 or 160; two additional semester courses in Botany, at least one at the 200 level. Six credits of modern foreign language are strongly recommended. Students may petition the department to substitute other courses for certain requirements in the planning of individual programs.

**Chemistry**

Students may select either of two degree programs:

*Bachelor of Arts:* Students choose to concentrate in one of three areas: General, Biomolecular, or Environmental Chemistry. All three are acceptable degrees for continuation to a variety of advanced degree programs in Chemistry or other sciences as well as Medicine, Veterinary Science, Law, or Business.

*General Concentration:* Chemistry 33, 36 (or 31, 32 or 31, 36), 121, 131, 143, 144 (or 141, 142; or 141, 144), 146, 161, 162, 167, 201, 202, 212, 282; Math. 21, 22; Physics 21, 22, 31, 42.

*Biomolecular Concentration:* Chemistry 33, 36 (or 31, 32; or 31, 36), 121, 131, 143, 144 (or 141, 142; or 141, 144), 162, 167, 201, 204, 292; Math. 21, 22; Physics 21, 22, 31, 42; Biology 1, 2 (or 11, 12), 103; and one of the following: Biochemistry 212, 320, 321 or Pharmacology 328.

*Environmental Concentration:* Chemistry 33, 36 (or 31, 32; or 31, 36), 121, 131, 143, 144 (or 141, 142; or 141, 144), 161 or 162, 167, 201, 221, 282; Math. 21, 22; Physics 21, 22, 31, 42; and two courses from the following, at least one of which must be Civil and Environmental Engineering 252 or 253; Civil and Environmental Engineering 150, 252, 253, Geology 233, 234, 253, or 255.

*Bachelor of Science:* Students pursuing a Bachelor of Science degree in Chemistry complete an extensive set of courses including research and biochemistry, providing them with a degree which is certified by the American Chemical Society. The B.S. degree is particularly good preparation for graduate school in Chemistry.

Chemistry 33, 36 (or 31, 32; or 31, 36), 121, 131, 143, 144 (or 141, 142; or 141, 144), 146, 161, 162, 167, 201, 202, 204, 221, 282; six hours of advanced chemistry-related course work, which must include 3 hours of Chemistry 291 or equivalent; Math. 21, 22; Physics 21, 22, 31, 42.
CLASSICS. Student may major in:

Latin: Thirty hours in courses above 100, among which 111, 112, and Classics 122 are required and one course in literature in translation above 100 and one course in Greek above 100 are applicable; a second foreign language, at least through the intermediate level, is recommended.

Greek: Thirty hours in courses above 50, among which 111, 112, and Classics 121 are required and one course in literature in translation above 100 and one course in Latin above 100 are applicable; a second foreign language, at least through the intermediate level, is recommended.

Classical Civilization: 36 hours consisting of 30 in the Major Discipline and 6 in Related Courses. Of these 36 hours, 12 must be at the 100-level or above. Major Discipline. All courses in Classics, Latin, Greek, Ancient History, and Ancient Art are applicable, of which 1 course in Ancient Art (Art 146, 148, or 149) and any 2 courses in Ancient History (Classics 21, 23, 121, 122, 149, 221, 222) are required. Related Courses: For a list of approved related courses in Fine Arts, Humanities, Social Sciences and Natural Sciences, students should consult with the Classics department. Foreign Language: Fulfillment of the language distribution requirement of the College of Arts and Sciences is required, preferably with Latin or Greek.

COMMUNICATION SCIENCES: 80, 90, 94, 101, 105, 160 or 162, 164, 208 or 215, 262, 271, 272; Biology 4; Psychology 161; Statistics 111 or 141 and six hours from the following: Anthropology 128, 178; English 104; Philosophy 110; Sociology 120, 141, 229; Psychology 207.

COMPUTER SCIENCE: Students may select among three degree programs in Computer Science: the Bachelor of Arts degree, described below, is offered through the College of Arts and Sciences. Additionally, a Bachelor of Science is offered through the College of Engineering and Mathematics, with majors in either Computer Science or in Computer Science and Information Systems (students interested in the Bachelor of Science degree are referred to the descriptions under the College of Engineering and Mathematics).

Bachelor of Arts: Computer Science 21, 26, 100, 101, 103, 104, 224 or 243, 292, and three additional computer science courses at the 200-level or above, for at least nine additional credits, not more than three credits of which may be independent study; Mathematics 19-20 or 21-22 (Math. 21-22 are recommended), 54; Statistics 151; the distribution requirement in natural science must be satisfied, and it is recommended that this requirement be fulfilled with a two-semester laboratory science sequence.

ECONOMICS: Thirty-three hours in Economics and three hours in Mathematics as follows: Economics 11, 12; Math. 19, three courses numbered Economics 60-160 or 194-196, two of which must be numbered 110 or higher; the methods and theory courses in Economics numbered 170, 171, 172; and three Economics courses numbered 210 or higher. No more than three credits from Economics 297, 298 (Readings and Research) may be applied towards the major. Students are urged to take Math. 19 early in the program.

ENGLISH: Thirty-three hours at the level of 11 or above, including 86 (85 is recommended for first-year students planning to major in English); at least twenty-one hours at or above the 100 level, at least three of which must be from courses numbered 201-282 (Senior Seminars). A total of nine hours of Film may be counted toward the major. Of the credit hours above 100: (a) at least three hours must be in writing or in critical theory or in study of the English language (listed in Departmental offerings as Category A; usually courses numbered 101-120 and 201-212, but courses with other numbers may also fulfill Category A; check Departmental offerings for each term); (b) at least six hours must be in literature before 1800 (listed in Departmental offerings as Category B; usually courses numbered 121-134 and 221-222, but courses with other numbers may also fulfill Category B; check Departmental offerings for each term); and (c) at least three hours must be in 19th-century literature (listed in Departmental offerings as Category C; usually courses numbered 141-147 and 241-242, but courses with other numbers may also fulfill Category C; check Departmental offerings for each term). Students are urged to take Math. 19 early in the program or one World Literature course may count toward the major. No more than nine hours of English 117, 118, 119 and/or 120 will count toward the fulfillment of major requirements.

ENVIRONMENTAL SCIENCES: Introductory biology (Biology 11, 12 or 1B, 2B is preferred, but 1A, 2A is accepted); Chemistry 31, 32 (or 35, 36); Math. 19, 20 (or 21); Chemistry 22, 24, 26, 28, 29; Environmental Studies 1 or 2; one course among the list of technology-based courses (Statistics 141 or 211; Chemistry 121 or 221; Biology 205 or 267; Geology 255; Civil and Environmental Engineering 150); 12–15 credits in a broad selection or in a concentration chosen with co-advisors to include at least one semester of research or honors. Concentrations include Environmental Biology, Environmental Geology, Environmental Chemistry.

*Chemistry 42 is not allowed for either the Chemistry or Biology concentration.

ENVIRONMENTAL STUDIES: Thirty-eight hours including Environmental Studies 1, 2, 151, 201, and six hours of 202 and/or 203; plus an Individually-Designed Program containing 18 hours of approved environmentally-related courses at 100 or higher level, including three hours at the 200 level, six hours of Environmental Studies courses, with at least one course in each of these areas* — natural sciences, humanities, social sciences, and international studies (may be fulfilled by study abroad experience). The courses of the Individually-Designed Program combine, along with the senior project and thesis, to provide a coherent major for the student.

*Students are cautioned that courses approved in these areas by Environmental Studies might not fulfill the distribution requirements in the College of Arts and Sciences.

FRENCH: Thirty-three credits in French numbered 100 or above of which fifteen credits must be at the 200-level. Required courses: French 101 and French 111 or 112. Literature requirement: twelve credits (including 111 or 112). Culture requirements: three credits (104, 105 or 292).

Note: Only three credits of Readings and Research (197, 198) and Advanced Readings and Research (297, 298) may be counted toward the major.

GEOGRAPHY: Ten courses (thirty hours), which must include: 2 or 43, 60 or 73, 81; any one regional course (from 51, 52, 55, 56, 57, 90, 92, 151, 154, 155, 162, 163, 164, 190, 199); any three courses at the 100-level; any one course at the 300-level.

GEOLOGY: Students may select either of two degree programs: the Bachelor of Arts and the Bachelor of Science. Within each degree program, students may select the Solid Earth or Environmental Geology concentration. Upper level elective courses within the Geology Department are divided into three categories: Solid Earth, Surface Processes, and Geochemistry/Earth systems. Students
must fulfill distribution requirements within these categories as indicated below.

Surface Processes: 151, 153, 155, 255, 195, 196
Geochemistry/Earth Systems: 210, 233, 234, 235, 195, 196

Bachelor of Arts:

Solid Earth Concentration: One Geology course below 100 level, 101, 102, 260. At least three credits of field experience are highly advisable (Geology 197, 198, 201, field camp or field-based thesis). Three Solid Earth courses, one Surface Process course, one Geochemistry/Earth Systems course. Two courses in Geology or approved science, mathematics, engineering, or statistics courses at the 100 level or above selected in consultation with Geology advisor, Math. 19, 20, or 21, 22; Chemistry 31 and 32 (or 35 and 36); Physics 11, 21 (12, 22 also strongly recommended).

Environmental Geology Concentration: One Geology course below 100 level, 101, 102, 260. At least three credits of field experience are highly advisable (Geology 197, 198, 201, field camp or field-based thesis). Three Surface Process courses, one Solid Earth course, one Geochemistry/Earth Systems course. Two courses in Geology or approved science, mathematics, engineering, or statistics courses at the 100 level or above selected in consultation with Geology advisor, Math. 19, 20, or 21, 22; Chemistry 31 and 32 (or 35 and 36); Physics 11, 21 (12, 22 also strongly recommended).

Bachelor of Science:

Solid Earth Concentration: One Geology course below 100 level, 101, 102, 260. At least three credits of field experience are required (Geology 197, 198, 201, field camp or field-based thesis). Three Solid Earth courses, two Surface Process courses, one Geochemistry/Earth Systems course. Two additional courses in Geology or approved science, mathematics, engineering, or statistics courses at the 100 level or above selected in consultation with Geology advisor, Math. 21, 22 or 19, 20, 22; Chemistry 31 and 32 (or 35 and 36); Physics 21, 31 and 22, 42 or 21, 31 and 125; Statistics 141.

Environmental Geology Concentration: One Geology course below 100 level, 101, 102, 260. At least three credits of field experience are required (Geology 197, 198, 201, field camp or field-based thesis). Four Surface Process courses, two Solid Earth course, one Geochemistry/Earth Systems course. Two additional courses in Geology or approved science, mathematics, engineering, or statistics courses at the 100 level or above selected in consultation with Geology advisor, Math. 21, 22 or 19, 20, 22; Chemistry 31 and 32 (or 35 and 36); Physics 21, 31 and 22, 42 or 21, 31 and 125; Statistics 141.

GERMAN Thirty hours of German courses at the 100 level or above, including 155, 156; 281 or 282; two courses of world literature or English; and two courses of European or German history.

HISTORY Thirty-three hours including six hours of any approved sequence of courses at the introductory level (90), nine hours at the intermediate level (100), and three hours at the advanced level (200). They must also include 15 hours of concentration in one of the Department’s three areas of study (Western Hemisphere; Europe; Africa/Asia/Latin America) and six hours in each of the others. The 15-hour concentration must include one course at the intermediate level and one seminar at the advanced level. (The Western Hemisphere concentration must include three hours in Canadian or Latin American history.)

MATHEMATICS Mathematics majors may choose from three concentrations. Students interested in any of these three concentrations should consult an advisor in the Mathematics and Statistics Department. A Handbook for Majors is available from the department office.

Mathematics: Math. 21, 22, 121 and 52, 124, plus 18 additional credits in Math./Statistics courses at 100 level or above, with at least 12 hours numbered 200 or higher.

Statistics: Computer Science 21. Thirty-three hours of Mathematics/Statistics courses numbered 21 or higher, including Math. 121 and 124, and Statistics 141, 143 or 211, 151 or 251, 201, 221 or 227, 241 or 261, and 281 or 293. At least 12 hours must be at the 200 level or higher.

Applied and Interdisciplinary Mathematics: This concentration combines a major in applied mathematics with an approved minor that emphasizes the application of mathematics. Such minors include various disciplines in the physical, life, and earth sciences, the social sciences, and business. A student may expand the approved minor to form a double major with mathematics. The requirements for this option are: (a) Math. 21, 22, 121, CS 21, Math. 124, 230, and 257; (b) at least nine additional hours in mathematics, statistics, or computer science courses numbered 100 or above, at least three of which must be in mathematics or statistics, at least six of which must be numbered 200 or above; (c) an approved minor. Parts (b) and (c) must form a coherent program that has the written approval of the student’s faculty advisor in the Mathematics and Statistics Department.

MUSIC Students may apply to either the Bachelor of Arts or Bachelor of Music programs. Arrangements for auditions should be made with the Music Department. Those admitted as first-year students or sophomores to either degree programs are considered Candidates in the program. Admission as Majors is made at the beginning of the junior year following formal review procedures during the second semester of the sophomore year.

All students in programs which require a senior recital, including students transferring into these programs, must pass a junior standing examination at the end of the sophomore year, or before junior standing can be achieved in the case of transfer students. All students approaching a senior recital must pass a faculty audition covering all of the music to be included on the recital six weeks prior to the date of the recital.

One foreign language through the intermediate level is required of all students.

Bachelor of Arts: Forty hours in Music. Majors will take the following core courses: 11, 12 (history); 31, 32, 131, 132 (theory); and 133, 134 (theory lab); plus eight hours of performance study and ensemble in any combination (excluding Music 5-8).

All students will elect nine additional hours — at least three at the 200 level — in one of the following three categories, plus three hours in a category different from that of the chief concentration.

(a) Theory: 231-235
(b) History: 111-114, 211-214
(c) Performance: 251-253, 256

A mixture of categories may be possible in consultation with a departmental advisor.

Music majors with a concentration in categories (a) or (b) must attain intermediate level on a single instrument chosen from the department’s offerings.

Concentration in category (c) requires an appearance each semester in departmental recitals, passing a junior standing examination at the end of the sophomore year, and a solo recital in the senior year.
Majors must have, or acquire, piano skills sufficient to pass the piano proficiency examination, in addition to the eight hours of performance and ensemble study.

**Bachelor of Music:** This degree, with a concentration in performance or theory, is the initial preparatory collegiate music degree, designed for highly talented students who wish to pursue a career in music as performers, scholars, or private teachers. To earn the degree, they must demonstrate not only technical competence but also a broad knowledge of music and musical literature, sensitivity to musical style, and an insight into the role of music in society. Candidates with a strong sense of commitment ordinarily continue their studies through postgraduate work before they are fully qualified as professionals. Admission as a Candidate in the Performance major program requires an audition with the Music Department. Acceptance as a Major requires passing the junior standing examination. The final graduation requirement is a senior recital. Admission to the Theory major requires successful completion of a comprehensive theory examination at the end of the sophomore year. Transfer students with advanced standing must also pass this examination before they can be accepted as Theory majors. The curriculum consists of the following courses:

<table>
<thead>
<tr>

For Music Education see College of Education and Social Sciences.

**PHILOSOPHY** Thirty hours including: (a) 101 and 102; (b) a total of at least four 200-level courses in Philosophy. Students considering graduate work are urged to take Philosophy 13 and to study a foreign language.

**PHYSICS** Students may select either of two degree programs:

- **Bachelor of Arts:** Thirty-two hours in Physics, including 31 with 21, 42 with 22, 128 with 130, 201 or 202, 211, 213, 273; mathematics through 121 and three hours of approved mathematics electives; Computer Science 21. An additional laboratory science is strongly recommended.

- **Bachelor of Science:** All courses in core and all courses in one of the listed options. Core: Physics 31 with 21, 42 with 22, 128 with 130, 211, 213, 214 and 273; Math 21, 22, 121, 271 and 272 or 124 and 130; Chemistry 31 and 32; Computer Science 21. Options: (a) Pure Physics: Physics 201, 202, 265, twelve hours of approved physics electives. (b) Mechanical Engineering: ME 12, 14, 40 with 44, 42, 101, 111, and 143; CE 1; EE 100. (c) Civil & Environmental Engineering: CE 1, 10, 100, 150, 170 and 173; ME 12, 40 with 44; EE 100. (d) Electrical Engineering (Signals and Systems): EE 3, 4, 81, 82, 120, 121, 171, 174, 275 and one course from 276, 277, 295; recommended elective Statistics 270. (e) Electrical Engineering (Circuits and Devices), EE 3, 4, 81, 82, 120, 121, 131, 163, 183, 184, 221.

**POLITICAL SCIENCE** Thirty hours in Political Science:

1. Four (12 hours) core courses (21, 41, 51, 71).
2. Eighteen hours at the advanced (100 or 200) level, three hours of which must be at the 200 level, subject to the following restrictions:
   a. Students must complete at least one advanced (100 or 200) course in three different subfields.
   b. Of these 18 hours at the advanced (100 or 200) level, students must complete at least 12 of those hours, including three hours at the 200 level, in regular UVM political science courses (e.g., excluding study abroad, transfer credit, readings and research).

Note: Internships will not count toward the 30 hours required for the major.

**PSYCHOLOGY** Students may select either of two degree programs: the Bachelor of Arts or the Bachelor of Science. Within the Bachelor of Science degree program, students may select either the traditional Psychology concentration or the Biobehavioral concentration.

- **Bachelor of Arts:** Thirty-five hours including: (1) 1, 109, 110, 119; (2) three of the following: 121, 130, 152, 161; (3) one course from each of the following categories A, B, and C: (A) 205, 206, 207, 208, 213, 220, 221, 222, 223; (B) 230, 231, 233, 234, 235, 236, 237, 239, 240, 241, 254*, 257*, 261, 262, 263*, 265, 266, 268; (C) 250, 251, 252, 253, 254*, 255, 257*, 259, 263*; (4) one additional course at/above 100 level.

Category B or C, but not both.

- **Bachelor of Science:** Forty-four hours of psychology including 1, 109, 110, 119, 121, 130, 152, 161, and upper division psychology courses as described below; Math. 13, 14, or 19, 20 or 21, 22; biology courses as indicated below; and at least three additional hours in an approved science or statistics. For a list of approved offerings in science and statistics, consult the Psychology Department Office. Students opting for a Bachelor of Science degree in Psychology must also complete the College of Arts and Sciences distribution requirements for a B.S. degree and they may not use psychology courses as fulfilling the social sciences category.

- **Traditional Concentration:** This concentration is most appropriate for students wishing a broader training in psychology, often in preparation for graduate school. Required courses include: Biology 1, 2; one course from each of the following categories A, B, and C: (A) 205, 206, 207, 208, 215, 220, 221, 222, 223; (B) 230, 231, 233, 234, 236, 237, 239, 240, 241, 254*, 257*, 261, 262, 263*, 265, 266, 268; (C) 250, 251, 252, 253, 254*, 255, 257*, 259, 263*. The remaining hours must be psychology courses at or above the 100 level. Independent research is encouraged and these hours may be counted towards the total 44 hours required. A minor in mathematics, statistics, or biology is strongly recommended.

Category B or C, but not both.

- **Biobehavioral Concentration:** Students who are interested in behavioral neuroscience and related medical fields, including premedicine preparation, should select this concentration. Required courses include: Biology 1B,
2B; three category A courses, one from each of the following subcategories (i) 221 or 222, (ii) 205 or 220, (iii) 206 or 223; and one course from 207, 208, 215, 230, 231, 233, 234, 236, 237, 239, 240, 241, 250, 251, 252, 253, 254, 255, 257, 259, 261, 262, 263, 265, 266, 268. The remaining hours must be psychology courses at or above the 100 level. Independent research is encouraged and these hours may be counted towards the total 44 hours required. A science minor is strongly recommended.

RELIGION Thirty-six hours in Religion, including 100 and 201; one course chosen from the 20-27 range; one course from the 101-109 range (comparative); one course from the 110-130 range (Biblical traditions); one course from the 130-149 range (Asian traditions); an additional course at the 200 level. Religion 130 may count for either the Biblical or Asian traditions requirement, but not for both. Up to six hours in related courses may be substituted. A list of approved courses is available from the Religion Department.

RUSSIAN Thirty hours of courses in Russian at the 100 level or above among which at least one course must be Russian literature in translation (WLIT 118); one additional course in English literature or world literature; one Russian history course; and two additional courses chosen from among the listings of the Russian and East European Area Studies Program. All course work to be chosen in consultation with the student's major advisor.

SOCIOLOGY Thirty-four hours in Sociology including Sociology 1; 100 and 101; three hours in each of three different areas at the 100-level (total nine hours); and three hours in each of the three different areas at the 200 level (total nine hours). It is recommended that 1, 100, and 101 be completed before the start of the junior year. 1 and 100, or 1 and 101, or instructor's permission is a prerequisite for enrollment in any 200-level course. Students planning to concentrate in a particular area of study are strongly encouraged to take an additional 200-level course in that area. Students planning postgraduate training in Sociology or related areas are strongly encouraged to take at least two courses from the advanced Theory/Methods area (274, 275, 279). Areas and their approved courses are: Crime, Law, and Deviance: 115, 118, 214, 216, 217, 255, 258; Social Inequality: 119, 122, 132, 219, 232, 239, 240, 254; Social Change and Development: 102, 103, 105, 163, 171, 203, 205, 206, 207, 211, 213, 272; Culture, Institutions, and the Individual: 109, 141, 150, 151, 161, 209, 225, 247, 250; 283, 284; 285, 286; The Life Course: 120, 154, 161, 221, 222, 223, 229; Theory and Methods: 274, 275, 279.

MINOR REQUIREMENTS

Please note that a "c" indicates that the minor is NOT available to students pursuing degree programs not offered by the College of Arts and Sciences.

ALANA STUDIES

In selecting courses from the ALANA (African, Latino, Asian, Native American) Studies listing for a minor, students should consult with an appropriate ALANA Studies advisor and demonstrate that their course of study will have a U.S. multicultural dimension.

A total of 12 credit hours of which 12 hours of which must be at the 100 level or above, selected from the following: Courses 51, 55, 95, 96, 158, 159, 191, 192, 195, 196, 277, 295, 296, 297, 298. Anthropology 160, 164, 169, 187; Economics 13; English 57, 66, 167, 170; Geography 60; History 60, 68, 158, 169, 187, 188, 189; Music 2, 44; Natural Resources 6; Political Science 129; Religion 80; Social Work 167; Sociology 19, 31, 119, 219; World Literature 16, 116, or appropriate Special Topics or seminar courses chosen in consultation with an ALANA Studies advisor.

ANTHROPOLOGY

Social Anthropology: 21; two 100-level topical courses plus one 100-level "peoples" course, or one topical and two "peoples" courses; and any 200-level course except 200, 210, 297, 298.
**Area and International Studies**

**African Studies:** A total of 18 credit hours (six courses), at least nine of which must be at the 100 level or above, and which must include the following:

A. Anthropology 162
   Geography 51
   History 40

B. Two courses chosen from among the following:
   - Community Development and Applied Economics 2, 272
   - Anthropology 170, 177, 179, 283
   - BSAD 237
   - *Education (EDFS) 206
   - French 289
   - Geography 177
   - History 140
   
   or appropriate Special Topics or seminar courses, chosen in consultation with the African Studies Program advisor.

*Students may count these courses towards fulfillment of the minor requirements only if individual projects, relevant to the African area, have been arranged in consultation with the African Studies advisor.*

C. International Studies 197 (Readings and Research on an African Topic under the direction of participating faculty members — to be arranged in consultation with the African Studies advisor) or International Studies 195 (Special Topics Seminars, taught by participating faculty members).

**Asian Studies:** In selecting courses from the Asian Studies listing, students must consult with an appropriate Asian Studies advisor and demonstrate in their choices thematic and/or geographic coherence. Such courses must also accord with the following requirements:

Eighteen hours in courses from the Asian Studies listing (see Courses of Instruction; Asian Studies) including at least two courses in an Asian language, and at least one course in each of two other academic disciplines. At least eight credit hours must be at the 100 level or above. For students who have demonstrated fluency in an Asian language relevant to the other courses they have chosen for their minor concentration (for instance, native speakers of the language) the language requirement will be waived, and courses from a third academic discipline will be substituted.

**Canadian Studies:** Eighteen hours to include International Studies 91 or History 66 (History 65 upon approval of advisor), and 15 hours to be chosen from the Canadian content list (see major listing for approved courses) of which at least 12 hours must be at the 100 level or above. Students will fulfill the language requirement with French.

**Latin American Studies:**

A. Students who are not Spanish majors: 18 hours (six courses)
   1. Completion of Spanish 52 or above (three hours).
   2. Completion of five of the following courses: Anthropology 161; History 62 or 63, 161, 163, 164 or 262; Geography 56; Political Science 174; Spanish 142, 279, 281, 286, 287, 293, or 294; International Studies 195 or 196.

B. Students who are Spanish majors: 18 hours (six courses)
   1. Completion of one of the following courses: Spanish 279, 281, 286, 287, 293, or 294.

2. Completion of five of the following courses: Anthropology 161; History 62 or 63, 161, 163, 164 or 262; Geography 56; Political Science 174; International Studies 195 or 196.

**Middle East Studies:** Eighteen hours (six courses) to include: Completion of the College language distribution option or the transfer of equivalent credits. Familiarity with an appropriate Middle East language, e.g. Hebrew, Arabic, Turkish, Farsi, etc., is strongly recommended; History 45; four courses taken from the following groupings, but no more than one course from Group B and no more than one course below the 100 level:

- Group A: Anthropology 166, 170; Art 146, 188; Economics 180; Geography 158; History 125, 149; Religion 114, 116; Political Science 157, 209, 279 (when the topic is Middle East).
- Group B: English 172; Geography 51; History 40, 140; Math. 161.

**Russian/East European Studies:** Twenty hours to include Russian 51, 52 or its equivalent, and four courses from the following: Economics 116; World Literature 118; History 27, 137, 138; Political Science 172.

**European Studies:** Eighteen hours to include three hours at the 200 level from both European culture and thought and European history and society areas; and six hours at the 100 level or above from the European language area.

**Note:** See the European Studies major requirements for list of approved courses.

**Art**

**Studio Art:** Eighteen hours, including six hours at introductory level of which at least three hours must be in 1, 2, 3, or 4. Twelve hours at the 100 level or above.

**Art History:** Eighteen hours, including six hours from 5, 6, and 8, 12 hours of 100-level courses or above.

**Biology** Biology 1, 2; three courses at the 100 level or higher chosen from courses acceptable for the Biology major, at least one of which must include a laboratory. One course may be taken from the advanced offerings of other biologically-oriented departments. Consult the Biology Department for a list of approved courses.

**Botany** At least 15 hours of course work to include Botany 4 or Biology 1 or Biology 2; plus three additional courses in Botany, at least one at the 200 level.

**Chemistry**

A. Chemistry 31, 32 or 35, 36.

B. One of the following sequences:
   1. Chemistry 141, 142* and one of the following: 121, 131, 160, 161, 162, 221 (with instructor permission).
   2. Chemistry 161, 162, and one of the following: 42, 141.

*143, 144 can be used in place of 141, 142.

**Classics**

**Latin Language and Literature:** Fifteen hours of Latin at 51 or above, to which three hours from the following are applicable: Classics 122, 153, 154, 155, 156, 158, 159.

**Greek Language and Literature:** Fifteen hours of Greek at 51 or above, to which three hours from the following are applicable: Classics 121, 153, 154, 155, 156, 157, 158.

**Classical Civilization:** Eighteen hours, including six hours of Greek or six hours of Latin at the level of 51 or above, and 12 hours from the following (of which at least nine hours must be above 100): Classics 21, 23, 24, 33, 35, 37, 42, 121, 122, 149, 153, 154, 155, 156, 157, 158, 159; Art 146, 148, 149; all Classics, Latin, or Greek courses to include special topics courses (95, 96, 195, 196, 295, 296).
**+COMMUNICATION SCIENCES** 80, 90, 94, 101, 105, 208 or 215.

**COMPUTER SCIENCE** Eighteen hours in Computer Science to include 100 or 103, 104, and three additional hours at the 100 level or above.

**EAST ASIAN LANGUAGES**

- **Chinese:** Fifteen credit hours of Chinese with at least eight of those hours at or above the 100 level, including 102 or its equivalent. Three credit hours at or above the 100 level in Chinese linguistics or literature may be substituted for three credits of language study beyond 102 or its equivalent.
- **Japanese:** Fifteen credit hours of Japanese with at least eight of those hours at or above the 100 level, including 102 or its equivalent. Three credit hours at or above the 100 level in Japanese linguistics or literature may be substituted for three credits of language study beyond 102 or its equivalent.

**ECONOMICS** Eighteen hours including Economics 11, 12; and four courses numbered 20-196, three of which must be numbered 110-196.

**+ENGLISH** Eighteen hours including six hours taken from one of the following sequences: 21-22, 23-24, 25-26, 27-28, or 85-86; and a minimum of nine credits at the 100 level or above.

**FILM STUDIES** Eighteen hours, including Art 140; Film 5 or 6; six credits from Film courses at the 100 level to include 107; three credits from English 110, 152, 163, Psychology 163, Sociology 43, Theatre 50; three credits from Film courses at the 200 level.

**ENVIRONMENTAL SCIENCES**

- **Chemistry emphasis:** Chemistry 31, 32; 121 or 42; and two additional upper-division non-chemistry courses chosen in consultation with co-advisor.
- **Biology emphasis:** Biology 1, 2 or 11, 12; 102, and two additional upper-division non-biology courses chosen in consultation with co-advisor.
- **Geology emphasis:** Geology 55, 101, 155, and two additional upper-division non-geology courses chosen in consultation with co-advisor.

**ENVIRONMENTAL STUDIES** Seventeen hours in Environmental Studies consisting of 1, 2, and nine hours at the 100 level or above, including three hours at the 200 level. (Of the nine hours, one non-ENVS course at the appropriate level may be substituted with the approval of the student’s advisor and the Environmental Program.)

**FRENCH** Eighteen hours in French numbered 100 or above. Required courses: French 101; and three of the following four: 104, 105, 111, 112. Six of the 18 credits must be in courses at the 200 level. Readings and Research (197, 198) or Advanced Readings and Research (297, 298) may not be counted toward a minor.

**GEOGRAPHY** Five courses (fifteen hours) which must include: one course from this array: 1, 2, 43, 60, 73, 81; any one regional course (from 51, 52, 55, 56, 57, 90, 92, 151, 154, 155, 162, 190, or 192); any three courses at the 100-level or above.

**GEOLOGY** One Geology course below 100 level, 101, 102; plus six additional hours at the 100 level or above.

**GERMAN AND RUSSIAN**

- **German:** Five courses at the 100 or 200 level, one of which must be 155 or 156.
- **Russian:** Russian 51, 52; four courses in Russian at the 100 or 200 level.

**HISTORY** Eighteen hours of history including three hours in any course at the introductory level (00), plus nine hours at the intermediate level (100) or advanced level (200). These must also include six hours in each of two of the department’s areas of study (Western Hemisphere; Europe; Africa/Asia/Latin America).

**INDIVIDUAL DESIGN MINOR** The ID Minor must consist of at least 18 hours of course work, of which at least nine hours must be at the 100 level or above. No more than nine hours completed prior to application for the ID Minor may be applied to the 18 hours required for the proposed minor. No courses in the student’s major department may be applied to the 18 hours required for the minor. An application must be submitted to the Committee on Honors and Individual Studies for approval. Applications may be found in the Dean’s Office, College of Arts and Sciences.

**ITALIAN** Eighteen hours in courses taught in the Italian language and numbered 100 or above. Readings and Research (197, 198) or Advanced Readings and Research (297, 298) may not be counted toward a minor.

**ITALIAN STUDIES** Eighteen credit hours as chosen from among the following categories: (1) Italian content (classes taught in the Italian language numbered 100 or above); (b) significant Italian content (Art History 149, 161, 164, 282 [when the topic is Italian]; Classics 122; English 122, World Literature 13, 113; Geography 158; History 124, 125; Latin 51, 52, 101, 102, 111, 112, 155, 156; all 200-level courses in Latin literature; Music 11); (c) partial Italian content (Art History 5, 6, and the following where the content is partially Italian: 155, 165; Classics 25, 155, 156, 159; English 125; Film 107, 161; Geography 55, 155; History 24, 25, 26; Political Science 141, 142; Music 12). At least six hours must be taken from category (a) and no more than six credit hours from category (b) may be applied from any one discipline. No more than three credit hours from category (c) may be applied to this minor.

**MATHEMATICS**

- **Pure Mathematics:** Math. 21 (or equivalent), 22, 52 or 121, and nine additional credits in Mathematics courses numbered 100 or above. Computer Science or Computer Engineering majors may substitute Math. 54 for 52. The course plan for a Mathematics minor must be approved by a Mathematics faculty advisor.

- **Applied Mathematics:** Fifteen hours of mathematics courses numbered 52 or higher, including one of 230, 237, 271.

**MUSIC** Twenty hours including six in Music History (11, 12), six in Basic Musicianship (31, 32), two in Performance Study (151, 152) or Ensemble (161-165, 171-179) in any combination, plus six in History, Theory, or Performance/Ensemble at the 100 level or above.

**PHILOSOPHY** One course from 101, 102, 140; one course from 201, 202, 240; and 12 additional hours in Philosophy, at least three of which must be at the 100 level or above.

**PHYSICS** Seventeen hours including 31 with 21, 42 with 22, 128 with 130, and three additional hours at the 200 level excluding 201 and 202. Note: Mathematics through 121 is needed for 128.

**POLITICAL SCIENCE** Eighteen hours in political science, including nine hours from the “core” courses (21, 41, 51, 71), and nine hours at the level of 100 or above. Of the nine hours at the 100 level or above, students must complete at least six hours in regular UVM political science courses (e.g., excluding study abroad, transfer credit, readings and research). Internships will not count toward the eighteen hours required for the minor.
+PSYCHOLOGY  Nineteen hours including 1, 109, plus 12 hours at the 100 level or above, including at least three hours at the 200 level.

RELIGION  Eighteen hours in Religion including: one introductory course from the 20-27 range; 100; one course from 101-109 range; one intermediate level course on a particular religious tradition (from 110-149); one course at the 200 level; an additional Religion course.

SOCIOLOGY  Eighteen hours in sociology including Sociology 1; either 100 or 101; three hours in each of two different areas at the 100-level (total six hours); three hours at the 200-level (total three hours). (See Sociology major requirements for list of approved area options.) It is recommended that 1 and 100 or 1 and 101 be completed before the start of the junior year, 1 and 100, or 1 and 101, or instructor’s permission, is a prerequisite for enrollment in any 200-level course.

GERONTOLOGY  The minor in Gerontology consists of enrollment in any 200-level course. courses used to meet the requirements of the minor should constitute a coherent program and will be selected in consultation with the student’s minor advisor. A list of current course offerings suitable for the minor, including special topics courses in individual departments, is available from the Department of Sociology or the Center for the Study of Aging.

SPANISH  Eighteen hours in Spanish above 100, including: Language: six credits from 101, 201, 202; Literature: six credits (3 of those credits must be in Spanish 140); Electives: six additional credits from courses numbered above 202. Readings and Research (197, 198) or Advanced Readings and Research (297, 298) may not be counted toward a minor.

STATISTICS  Students must have a minor advisor in the Statistics Program and are required to complete:
A. Fifteen hours of Statistics courses, of which at least nine must be at the 100 level or above. One of the following introductory courses is required: 111, 141, 143 or 211. No more than six credits of Statistics 11, 51, 111, 140, 141, 143, or 211 may be applied toward the minor. (Note that credit will not be given for both 11 and 111, or for more than one of 111, 140, 141, and 143, without prior special permission from the Statistics Program.)
B. Math. 19 or 21, or the equivalent.
C. Statistics 201, or Computer Science 16 or higher.

THEATRE  Nineteen hours to include: 10, 150, 151; two credits of 190; and two of the following: 20, 30, 40.

SPEECH  Eighteen hours to include 12 hours from Speech 11, 111, 112, 283-4 or Theatre 5; and six hours from Speech 214 or 283-4, or Sociology 141.

VERMONT STUDIES  Eighteen hours (at least five courses), of which at least nine hours must be at the 100 level or above. As an interdisciplinary minor, it must include at least fifteen hours from departments outside the major. Completion of Vermont Studies (VS) 52, three of the following VS courses: 55, 64, 92 or 192, 123, 160, 184, and two additional courses from an approved list chosen in consultation with the Vermont Studies advisor.

WOMEN’S STUDIES  Eighteen hours of course work to include WST 73, 273 and six hours at the 100 level or above to be chosen with the approval of the Women’s Studies Committee or the consent of a Women’s Studies advisor. Students may take a maximum of nine hours in any one discipline toward the minor. Not all sections of a multisection course will necessarily meet Women’s Studies approval for the minor. (Students should consult the course listings each semester for further details.)

ZOOLOGY  Biology 1 and 2; three courses at the level of 100 or above, chosen from courses within the Biology department, at least one of which must include a laboratory.

CROSS-COLLEGE MINORS

The following minors must be completed in the following format. They have been approved by the College of Arts and Sciences and will fulfill minor requirements for Bachelor of Arts, Bachelor of Science, and Bachelor of Music candidates. No other minor in this catalogue will fulfill the minor requirement.

EDUCATION AND SOCIAL SERVICES

Human Development and Family Studies: Eighteen hours including HDFS 5, 60, 65; three 100- or 200-level HDFS courses, except 291, 296. This minor cannot be the sole minor for sociology or psychology majors but is acceptable as a second minor, especially for persons interested in careers involving work with families and youth.

NATURAL RESOURCES

Forestry: A minimum of 16 credit hours is required, with at least nine of these hours at the 100 level or above. Required courses for non-SNR majors: 1 or 73; 21; and additional Forestry courses to total 16 credit hours.

Recreation Management: Nine hours from 1, 50, 138, 153, 157, 158, 181; and six hours from 230, 235, 240, 255, 258, 282.

Wildlife Biology (WFB): Fifteen hours to include WFB 130, 174; 271 or 273 and the remaining hours from 131, 175, 176, 185, 187, 224, 271, 272, 273, 274, 275, 279, 285, 287.

AGRICULTURE AND LIFE SCIENCES

Animal Science: Five courses with a minimum of 15 credit hours, including Introductory Animal Science (ASCI 1), two courses in Core Science including ASCI 43, 110, 122, 141, 205, 215, 216, and two courses selected from Applied Sciences including 113, 115, 117, 118, 134, 135, 161, 211, 220, 230, 231, 233, 234, 263, 264. At least 8 credits must be at the 100 level, 3 of which must be at the 200 level. Acceptance into this program is by application only. Contact Dept. of Animal Science, 102 Terrill, for more information.

Applied Design: Fifteen hours including nine in required courses CDAE 15, 16, or 1; 231 or 101. After completing the required courses that will enhance problem-solving and visualization skills, student select two additional courses that will define a particular focus within design. The student’s advisor must preapprove the two focus courses. Nine of the 15 hours must be at the 100 level or above. The Applied Design minor is not available to students majoring or minoring in Studio Art.

Small Business (CDAE): 61, 166, 167, 168, 266.

Consumer and Advertising: Fifteen hours including CDAE.
15, 127, 128, 183, and an advisor approved elective.

**Consumer Economics**: Fifteen credits including 9 in required courses CDAE 127, 157, 255; six hours from the following restricted electives: CDAE 102, 128, 159, 250.

**Microbiology and Molecular Genetics**: Core requirements are MMG 101 and 102, plus Botany 132, plus an additional six credit hours of MMG courses chosen from 195, 201, 203, 211, 220, 222, 223, and 225 depending on students needs.

*A student may minor in Microbiology and Molecular Genetics upon permission of the departmental Undergraduate Affairs Committee and assignment of a minor advisor within the department who will direct the student’s program plan and course selection.

**Nutrition and Food Sciences (NFS)**: A total of 15 credit hours in NFS courses including 43, 53, 143; and six credits of NFS courses from the following: 63, 123, 150, 153, 163, 163 or any 200-level course approved by the student’s advisor that will define a particular focus. *Note*: Independent Study and Field Experience and undergraduate research cannot be used toward the minor. **Arts and Sciences students must select at least eight credits of NFS course work at or above the 100 level.**

**Plant and Soil Science**: Sixteen hours including PSS 10 or 11, 161, plus any three additional PSS courses at the 100 level or above.

**Sustainable Agriculture**: Fifteen hours to include: CDAE 61, CDAE 208, PSS 152, one elective at 100 or 200 level in ASCI/CDAE/PSS (see list of approved electives in Department or Dean’s Offices) and three to six hours of internship at 100 or 200 level in AGRI/ASCI/CDAE/PSS.

*Note*: Students should take their four academic courses before they design their internship experience. Thus the internship will serve as a culminating event in this program of study. The College of Arts and Sciences requires their students to receive a letter grade for internships taken in minor programs of study.

**Allied Health Sciences**

**Molecular Diagnostics (BMT)**: Fifteen-sixteen hours to include: 242, 244, BMED 281, 293, 297, and one elective from BMT 4, 54, 123, or MLS 222, 231, or 255. Prerequisites are Chemistry 31, 32 or 23; 141, 142 or 42; Biology 1, 2 or Anatomy and Physiology 19–20; a 2.5 in these courses. Acceptance into this program by application only and limited to six new students per year. Contact Department of Biomedical Technologies, 302 Rowell, for more information.

**Business Administration**

**Accounting (BSAD)**: 65 (or 60 and 61) 161, 162, 164, 168. Prerequisites are Economics 11, 12; Math. 13, 19 or 21; Statistics 141; a 2.0 in these courses. Acceptance into this program by application only. Contact Student Services, School of Business Administration, 218 Kalkin, for more information.

**Business Administration (BSAD)**: 65 (or 60 and 61), one course from 120, 132, 141, 150, 173, 180 and two additional courses numbered 100 – 299. Prerequisites are Economics 11, 12; Math. 13, 19 or 21; Statistics 111 or 141; a 2.00 in these courses. Acceptance into this program by application only. Contact Student Services, School of Business Administration, 218 Kalkin, for more information.

The following Arts and Sciences Minors are available to students not pursuing degree programs offered by the College of Arts and Sciences:

**Anthropology**

Sociolinguistics**

**Alana Studies**

**Area and International Studies**

African Studies
Asian Studies
Canadian Studies
European Studies
Latin American Studies
Middle East Studies
Russia / East European Studies

*Students must receive departmental approval.*
The College of Education and Social Services

The College of Education and Social Services (CESS) offers programs in Human Development, Social Work, and Teacher Education (Art, Early Childhood Education PreK-3, Elementary, Family and Consumer Sciences, Middle Level, Music, Physical Education, and Secondary Education). First-year students may elect an Undecided major while exploring the above options within the College. Students who have completed one year of course work at UVM and who demonstrate interest in an area of study related to CESS offerings may pursue an Individually Designed program. All programs require course work in the liberal arts and sciences along with professional preparation through course work and internships in school and community settings.

The College, through the Physical Education Program, offers an Athletic Training concentration. Students who are enrolled in a degree program at UVM may apply.

Enrolled UVM students wanting to transfer may secure an application at the Office of Student Services (528 Waterman Building) in the College of Education and Social Services. Students enrolled in appropriate programs in other colleges may apply to complete teacher licensure requirements for Secondary Education while they remain in their home college. Information and applications for admission to the Teacher Education program are available in the Secondary Education Office, 405A Waterman.

The College of Education and Social Services and the Community College of Vermont have Articulation Agreements for the following programs: Human Development, Social Work and Teacher Education programs in Art, Early Childhood and Secondary Education. Refer to the Articulation Agreement information in the Admissions section of this catalogue.

DEGREE REQUIREMENTS

Programs in the College of Education and Social Services lead to four bachelor’s degrees.

Bachelor of Science. The programs listed below lead to this degree.

  - Human Development and Family Studies. This program examines the way people grow and develop, form relationships and families, and learn to cope with the common and uncommon events of life.
  - Social Work. The principal educational objective of the program is to prepare students for beginning social work practice with individuals, families, small groups, organizations, and communities.
  - Teacher Education/Early Childhood Education PreK-3. The Early Childhood program offers licensure for birth through grade 3.
  - Teacher Education/Family and Consumer Sciences (7-12). The Family & Consumer Sciences program offers licensure for grades 7-12.

Bachelor of Science in Art Education.

Teacher Education/Art Education (K-12). The College works cooperatively with the Art Department in the College of Arts and Sciences to offer a program in Art Education which leads to both degree and licensure for grades K-12.

Bachelor of Science in Education.

Individually Designed Major. Earn degree not licensure.

Teacher Education/Elementary (K-6). The Elementary Education program offers licensure through grade 6.

Teacher Education/Middle Level (5-8). The Middle Level Education program offers licensure for grades 5-8.

Teacher Education/Physical Education (K-12). Students who pursue the teacher education program are prepared for teaching grades K-12.

Teacher Education/Secondary (7-12). The Secondary Education program offers licensure for grades 7-12.

Bachelor of Science in Music Education.

Teacher Education/Music (K-12). The College works cooperatively with the Music Department in the College of Arts and Sciences to offer a program in Music Education which leads to both degree and licensure for grades K-12.

In addition to the undergraduate degree programs, the College offers a five-year certificate, the Postbaccalaureate Teacher Preparation Program. This program is for individuals who have earned a B.S. or B.A. and now desire to be licensed to teach.

DEGREE REQUIREMENTS

Students must meet standards and requirements for each program approved by the College Academic Affairs Committee, the College faculty, the Dean, and the University Academic Affairs Committee. All programs nationally accredited meet the standards of their professional group: Social Work by the Council on Social Work Education (CSWE); Athletic Training concentration, available through Physical Education, by the Commission on Accreditation of Allied Health Education Programs (CAAHEP); Teacher Education programs (Art, Early Childhood, Elementary, Family and Consumer Sciences, Middle Level Music, Physical Education and Secondary Education) by the Vermont State Department of Education and by the National Council for Accreditation of Teacher Education (NCATE).

Copies of the degree requirements for each program are available in our Student Services Office (528 Waterman), on the web at www.uvm.edu/~cess/stservices, and are also provided to students during Orientation sessions.

Upon arriving at the University, students receive anOrientation Advising Packet which explains how the requirements can be fulfilled during a four-year period. Discussions with advisors provide students with information needed to plan the time span for program completion which meets their needs. Students who enroll in the College of Education and Social Services are expected to become very familiar with the degree requirements for their programs.

Criminal Record Check (CRC) Requirement

Students who matriculate in the College of Education and Social Services should expect to complete a Criminal Record Check (CRC) as a prerequisite for working in schools and agencies. Evidence of a Criminal Record may prevent students from being eligible to fulfill the field placement/teaching internship requirement.
Human Development and Social work majors may be required by individual agencies to complete the CRC to be eligible for an internship in a specific agency. It is also important to note that membership in professional associations upon graduation, at least in the case of most social work associations, typically requires a criminal background check as does employment in an ever-increasing number of human service agencies.

Students enrolled in the Teacher Education programs are required to complete the CRC to be eligible for the public school teaching internship and may also be required to complete the CRC during the sophomore and junior years. Each individual school makes the determination concerning the sophomore and junior experiences, but it is a State requirement that all students complete the CRC for eligibility to student teach.

The cost for fingerprints and FBI processing is covered by each individual student and is subject to change.

**Disciplinary Action Related To Academic Performance**

Disciplinary actions, such as placement on trial, disenrollment, or dismissal are designed to encourage high level academic work from students. The CESS guidelines are more stringent than those for the University and students, including first-year and new transfer students, can be dismissed without first being placed on trial.

A student is subject to academic disciplinary action, including dismissal from the University, if (a) his or her semester or cumulative average falls below 2.0; or (b) if he or she has failed six or more credit hours of course work in a given semester.

A student who has a cumulative grade-point average of 2.0 or higher, but too low to meet specific program requirements, will be warned of pending disenrollment. Also, students who do not follow course requirements or who have not earned an appropriate grade point average for their program will be warned of pending disenrollment. If at the end of two subsequent semesters the student has failed to meet the requirements (courses and/or gpa) of his/her program, he/she will be disenrolled from the College. Also, students who do not follow the course requirements of their program will also be warned of pending disenrollment.

Students who are placed on trial rather than being dismissed and who do not meet the conditions of trial will then be dismissed.

Students with “on-trial” status will not be allowed to participate in their senior internship, and they will not be eligible to graduate.

**Programs of Study**

Human Development and Family Studies, Individually Designed, Social Work and Teacher Education (Art, Early Childhood, Elementary, Middle Level, Music, Physical Education and Secondary Education.)

**HUMAN DEVELOPMENT AND FAMILY STUDIES PROGRAM**

The Human Development and Family Studies program focuses on individual and family development across the life span. Students learn basic and applied concepts of human development and acquire skills in working with individuals and families of different ages and backgrounds in a variety of settings. Field experience is required of all students.

Students in Human Development and Family Studies complete General Education requirements in Behavioral and Social Sciences, Communication Skills, Humanities, Physical and Biological Sciences and Multicultural Electives. They also enroll in a sequence of courses and field experiences designed to provide a comprehensive understanding of individual and family development across the life span. These courses are arranged in two blocks: the introductory core and the advanced core.

The introductory core in Human Development and Family Studies involves three components. The first, Introduction to Human Development I, II and Introduction to Field Experiences, provides students an introduction to the topics pursued in the major, how they relate to everyday life settings, how knowledge in the discipline is gained, and the types of skills necessary to both acquire and use this knowledge. The second component in the introductory core is a course covering individual development across the entire life span. Students learn what is typical of individuals at different points in their lives and the various factors, such as gender and social class, that account for these differences. The third component in the introductory core is a two-semester course dealing with the impact of families and other social institutions such as the school system on individual development. A course on Human Relations and Sexuality completes the introductory core.

The advanced core in Human Development and Family Studies consists of a series of advanced seminars and a field experience. All majors take seminars in Developmental Theory and Family Ecosystems. Four additional advanced seminars must be selected in consultation with an advisor. The field experience requires 15 to 20 hours per week. Students choose a placement from a variety of public and private local agencies. Field placement sites have included museums, affirmative action agencies, the court system, battered women’s shelters, centers for abused and neglected children, city and state government agencies, local business and industry, child-care settings, hospitals, senior-citizen centers, and human service agencies.

Human Development and Family Studies is also available as a major concentration for students in the Early Childhood, Elementary, Family and Consumer Sciences, and Physical Education licensure programs, and as a cross-college minor.

INDIVIDUALLY DESIGNED PROGRAM

Students enrolled in the College of Education and Social Services who are interested in an area of study, which isn’t offered as one of the current options, may propose an individually designed program of study. Specific criteria and degree requirement information are available in 528 Waterman.

SOCIAL WORK PROGRAM

The Social Work Program provides education for social work practice based on a liberal arts education in the social sciences and humanities. The program is fully accredited by the Council on Social Work Education. Throughout the program of study, students gain the knowledge, values, and skills necessary to provide social services and to effect social change in institutions and the community.

The Bachelor of Science degree in Social Work requires a minimum of 122 approved credit hours, 60 credits of which are general education components from the six approved academic areas (Arts and Letters, Mathematics, Science, Social Sciences, Humanities, Health and Physical Education), including two credits for physical education activities and one credit for Race and Culture Studies. Additionally, students are required to take at least one course that focuses substantially on issues concerned with Africa, Asia, the Middle East, or countries known as the Third World.

The student in consultation with his/her advisor, selects elective courses which will provide the opportunity to develop individual interests. Additional courses in computer science, economics, education, history, philosophy, political science, psychology, sociology, statistics, special education, and women’s studies are recommended. Students who intend to pursue a Master of Social Work (MSW) degree are strongly advised to take a course in statistics.

A committee of Social Work faculty may review students' progress periodically throughout the four years. Students may be asked to participate in that process if the faculty deems necessary.

Students must complete the required liberal arts courses with a minimum grade of C--; completion of the introductory Social Work courses (SWSS 2, 3, 5, 47, 48, 167) with a minimum grade of C; completion of the upper level Social Work courses (SWSS 164, 165, 166, 168, 169, 171, 172, 173, 174) with a minimum grade of B and an overall GPA in all courses of 2.0.

SOCIAL WORK PROGRAM

Typically students apply for SWSS 173 Field Experience in the spring of Junior year. Application for the Field requires consultation with the student’s advisor to determine that all introductory and intermediate professional and required courses have been successfully completed. The process includes a written statement that describes the student’s interests and qualifications. The advisor and student also review professional readiness issues, including strengths, conduct, maturity, and areas to strengthen. When there are concerns about a student’s field readiness, these concerns will be reviewed by the Undergraduate Program Committee, and recommendations will be made.

In the senior year, students spend approx. 15 hours/wk. over two semesters (450 total hours) as interns in a public or private social service agency. Within the same year, students must take SWSS 168, 169, 171, 172, 173, and 174.

Students must complete one elective (advisor approved) related to issues of Third World Countries.

TEACHER EDUCATION

The Teacher Education programs include Art, Early Childhood, Elementary, Family and Consumer Sciences, Middle Level, Music, Physical Education and Secondary Education. All students are required to meet specific criteria for admittance into the professional portion of the program and for a teaching internship placement as well as for a recommendation for licensure.

Requirements for Teacher Preparation Programs

Candidacy The professional programs begin with the student enrolling in the College of Education and Social Services as a candidate for licensure. Candidacy status is the stage prior to acceptance into the professional education sequence and, for some programs, may also be available to students enrolled in other colleges at UVM.
Intercollege Transfer  Students transferring to the College of Education and Social Services for the Teacher Education programs are required to have a minimum overall grade point average of 2.5 or higher and it must be possible to earn an overall average of 3.0 before reaching program completion.

Academic Major  All students who enroll in the Teacher Education programs are required to complete a 30 hour (minimum) major in the liberal arts and sciences. The options are listed on the chart. It is essential for students to complete many liberal arts and sciences requirements during the first two years of their program. Copies of the requirements are available through the Office of Student Services, 528 Waterman and on the web at www.uvm.edu/~cess/stservices.

Students in Secondary Education complete a major (minimum 30 hours) and a minor (minimum 18 hours) or a broadfield major (minimum 48 hours) from a very specific list of options (see chart).

Students in Middle Level Education complete an Individually Designed Interdisciplinary Major Concentration (IDIMC).

Students in Early Childhood, Elementary, Family and Consumer Sciences, and Physical Education complete a 30 hour (minimum) major concentration and have the option of selecting a specific discipline or creating an Individually Designed Interdisciplinary Major Concentration (IDIMC).

Portfolio Development and Professional Licensure  In accordance with the Standards for Vermont Educators (Vermont State Board of Education, 1991), students seeking a license to teach must develop documentation that they can perform in ways that address State standards. Each candidate must assemble that documentation in a preprofessional portfolio according to program guidelines. While students have candidacy status, they should maintain a file which includes all materials from courses completed so that selected items can be included in the portfolio.

Application to Teacher Education  Candidates who want to pursue teaching as a career apply to the teacher education program of their choice. Applications are available in each departmental office. Once the candidate’s application is complete, the program faculty will review the materials which include a record of academic performance at UVM, recommendations from University and public school faculty, evidence of superior course work, passing scores on PRAXIS I as determined for Vermont, and other pertinent sources of information. All students must apply for acceptance into the teacher education segment of their program. Students are required to complete this application and gain acceptance before being eligible to enroll in the professional education courses. This includes: CESS students who are already enrolled as candidates in the teacher education programs; students who transferred to the CESS; and students in other colleges on campus who plan to maintain their primary affiliation with their home college while completing the SDE approved requirements in the CESS.

Students who meet the criteria and are eligible will be accepted. CESS students who do not meet the criteria for admission to Teacher Education will receive a warning of pending disenrollment letter. Students who are warned of pending disenrollment should meet with the program coordinator and determine if program completion is an option.

Students must submit passing scores on PRAXIS I. If all three areas (reading, writing, math) have not been passed, the student may appeal for conditional acceptance.

Application to Student Teaching  If a candidate’s application to a teacher education program is approved, the candidate completes a sequence of professional education courses and applies during the junior year to intern as a student teacher senior year. The candidate submits his/her portfolio and application to student teach to the Program Coordinator. The application lists the current set of criteria that permit a candidate to qualify for student teaching. Included among the criteria are a record of strong academic performance in program and University courses, recommendations from education faculty, and evidence of superior course work and passing scores on PRAXIS I as determined for Vermont, and also passing scores on PRAXIS II if required for the specific endorsement. Once admitted to student teaching, the student must successfully complete the interview process and be accepted by an approved public school teacher/administrator before being placed for student teaching. After placement, the student will carry out an internship under the guidance of an approved cooperating teacher and department supervisor. Student teachers will be placed in Professional Development Schools or Partnership Schools. Although many students remain in the Burlington area, not all can be placed close to campus. Effort is made to accommodate student preference regarding placement site and the semester during which student teaching will occur. All students should be prepared to student teach in either the fall or spring semester of their senior year. Candidates must meet specific requirements to be recommended for licensure. These requirements are available in the Office of Student Services, 528 Waterman.

Note: Students who are not admitted to student teaching may appeal through the College Student Affairs Committee.

Application for Licensure  Students who successfully complete a Teacher Education program are eligible to apply for licensure. The Licensing Newsletter which explains this process is available in 528 Waterman as well as on the web at www.uvm.edu/~cess/stservices. Applications for licensure are available in 528 and from the Vermont State Department of Education (802-828-2445).

Teacher Assessment-PRAXIS  Undergraduate Students: Students are required to submit passing scores for PRAXIS I (refer to chart) as part of their application to the professional portion of their Teacher Education program. If all three areas have not been passed, the student may appeal for conditional acceptance. Passing scores must be received by the program for all three content areas of PRAXIS I before the student is eligible for a teaching internship placement.

Teaching endorsements as listed on the chart require passing scores on PRAXIS II. Science endorsements require passing scores on both General Science as well as the specific area (e.g. Chemistry, Biology, etc.). Endorsement areas which have both multiple choice and a constructed response (essay) options require a passing score in one option for PRAXIS II.

Students who are required to complete PRAXIS II for their first endorsement area should note that they may be expected to provide passing scores to be eligible for program completion and graduation.

PBTP and Licensing Masters: Applicants will provide passing scores on PRAXIS I & PRAXIS II (if required for endorsement) before being admitted to the program. Students who receive conditional acceptance must provide passing scores for PRAXIS I & PRAXIS II (if required for endorsement) before being eligible for a teaching internship placement.
Teacher Education/Art Education
(Kindergarten through Twelve)

The program in Art Education qualifies candidates to teach art in grades K through 12. Students fulfill course requirements in general education, professional art education, professional education courses, studio art, art history, and related subjects. Graduates satisfy College of Education and Social Services requirements for teacher licensure and participate in coursework in the Art Department in the College of Arts and Sciences. The program allows sufficient additional advanced courses as recommended by the Art Department for admission to graduate school.

Students must be enrolled in the College of Education and Social Services. Those admitted as first-year students or sophomores to the Art Education Program are considered Candidates in the Program. Admission as Majors is made at the beginning of the junior year following formal review procedures during the second semester of the sophomore year.

Students must meet with their advisors and get approval to set up student teaching and accompanying courses prior to enrolling in student teaching.

A minimum of 124 approved semester hours is required for the degree including three semester hours of teaching reading for teacher licensure.

Students are responsible for obtaining information regarding teacher licensure and degree requirements from the Office of Student Services, 528 Waterman.

Refer to Requirements for Teacher Preparation Programs presented earlier in this section.

**Teacher Education/Early Childhood Education (Early Childhood Education PreK-3)**

The program is designed to provide students with the perspectives and skills necessary to work with young children from birth through grade three in inclusionary, developmentally appropriate settings. These include the abilities to: (a) facilitate children’s development of literacy, quantification, and inquiry skills; (b) offer instruction in an integrated day format; (c) assess educational progress from a portfolio perspective; (d) use educational materials in an open-ended fashion; and, (e) recognize and respect the diversity of family structures within our society.

The program involves a large field-based component and makes significant use of the Campus Children’s Center and elementary schools as practicum sites. Graduates of the program are eligible for licensure from the State of Vermont.

The PreK-3 Professional Preparation Sequence involves three components. The first is a course in Child Development and a course in Family Relations. The child development course introduces students to the concepts that form the practical and theoretical foundation of the program’s educational approach. The family relations course provides students a foundation in family dynamics and parent-child relationships and serves to emphasize the important links between children’s home and school experiences. These two courses are taken prior to formal admission into the PreK-3 program.

The second component is a three-part professional practices sequence. This sequence provides students a first exposure to the rationale, practices, and procedures used in the provision of developmentally appropriate educational experiences for young children. The sequence includes opportunities for observation and hands-on work with children, opportunities to assist teachers in the provision of developmentally appropriate educational experiences and to discuss with teachers and other professionals the issues surrounding the provision of developmentally appropriate educational experiences.

The professional practices sequence is structured as three course blocks, taken sequentially. The first block course deals with techniques for observing and documenting children’s development; the second deals with developmentally appropriate educational practices for children through age six (preschool/Kindergarten); and the third for children between the ages of six and eight years (grades one through three). A significant portion of this professional practices sequence takes place in one or more preschools and elementary schools.

The third component is a two-semester student teaching sequence across the birth to eight-year age (preschool through grade three) range. This student teaching experience provides the opportunity to develop, implement, and assess (both in a cooperative and an independent fashion) developmentally appropriate educational practices. One experience would be in the Campus Children’s Center and the other would be in a child centered, inclusionary grade K-3 setting.

The course of study consists of 128 credits which are divided into eight categories.

- **Major concentration in a liberal arts and sciences discipline**
- **General Education courses**
- **Professional Preparation Sequence**
- **Health and Physical Education modules**
- **Race and Culture course**
- **CESS multicultural requirement**
- **Physical Education activities**
- **Electives**

(The number of electives depends on the degree of course overlap in the General Education, major concentration, and the multicultural requirements.)

### Teacher Education/Elementary Education (Kindergarten through Six)

The elementary education program prepares teachers for assignments in grades kindergarten through six. The Bachelor of Science in Education is awarded upon satisfactory completion of the approved program which includes a planned sequence of professional courses, field experiences, and a full-semester internship experience.

The Elementary Education Program is a designed sequence of professional course work that achieves coherence from its theme "teaching all children strategically in diverse communities." Embedded in a state known for its progressive schooling traditions, Elementary Education students have ample opportunity to learn about and practice the art and science of teaching. Through a web of unique relationships with area schools, Elementary Education majors build friendships with a diverse variety of children by the second year of their professional program. Several features distinguish the program:

**Blocked Professional Course Work** Grounded in a theoretical orientation that seeks to limit the necessity for piecemeal education, faculty of the program have designed course work that fits together in naturally occurring curricular blocks: literacy (reading/writing, children’s literature, mathematics), inquiry (social education, science, visual and performing arts), and the professional internship (student teaching, classroom management, and portfolio development).

**Integrated Fieldwork** Professed theory about teaching is constantly exposed to the reality of public school practice. Each curriculum block has field experience attached to it. Students are thus placed in situations where theory and practice reside in reciprocal tension.

**Authentic Assessment** The State of Vermont requires a results-oriented demonstration of teaching competence to qualify for the teaching license. The Elementary faculty have built in portfolio driven authentic assessments at every step of the professional program. Interns thus learn the portfolio process from the inside out and are able to apply it to themselves while learning to apply it within their public school classes.

**Full Inclusion** The State of Vermont has the highest rate of inclusion of learners with special challenges in the regular classroom setting. Being educated at UVM means elementary education students learn about and practice the application of instructional adaptations for learners of exceptional need.

**Elementary Education Curriculum** The elementary education curriculum includes a general education component of 60 credits from the academic areas outlined earlier. Included in the 60 hours must be two semester hours of physical education activities. Students are required to complete an approved major concentration, consisting of at least 30 hours of study in a liberal arts and sciences discipline. Specific information may be obtained from advisors or from the Office of Student Services, 528 Waterman. In addition to the major concentration and professional education requirements, certain courses are recommended to meet specific state and national requirements in elementary education.

Full-time students enroll in 12 to 18 credits. Elementary education students enroll in the required education courses each semester, along with several additional required courses.

#### Requirements for Teacher Preparation Programs

Students are required to complete a student teaching internship application in their junior year before being assigned a placement as seniors. Students will be notified by the Professional Education Office of a general meeting and are expected to attend to initiate this process. Students will follow requirements specified in the Application to Teacher Education. Students will not be permitted to enroll in advanced education courses until they have been accepted to teacher education. The above courses include:
### Teacher Education / Middle Level Education (Five through Eight)

The organizing theme of the Program is “Education for High Achievement and Personal Efficacy.” The Program provides a minimum of four supervised internships whereby university students participate in the most highly successful middle level school programs that are within reasonable commuting distance.

Students who satisfactorily complete the program earn a minimum of 127 credit hours of study across three areas: General Education, Academic Concentration, and Professional Studies. This design ensures that each student achieves a balance of academic and professional preparation to meet the expectations and challenges associated with teaching at any level. During the students’ first year they enroll in a required two-semester advising course, EDML 10 “Introduction to Teaching,” where faculty guide them in devising an eight semester plan that is balanced across three areas of study. Those three areas are briefly described below.

**General Education** Students earn at least 39 credits in liberal arts and sciences from an array of disciplines such as: English, Mathematics, Social Science, History, Political Science, Humanities, Diversity, Art and Physical Education. Six credits are designated as Electives. Most of these courses are generally completed during the first three to four semesters, and since students sometimes transfer from one program to another, these credits easily transfer to other degree programs in the College of Education and Social Services as well as other colleges within the University.

**Academic Concentration** Every UVM student chooses an academic major referred to as a “major concentration.” Students enrolled in the Middle Level Program organize their concentration around two disciplines in order to accomplish the middle level licensure requirement for two teaching areas. This design is referred to as an IDIMC (Individually Designed Interdisciplinary Major Concentration), and it consists of 18 credits in each of two disciplines for a total of 36 credits. For example, one student might choose to combine Science and Art while another decides on Mathematics and Social Studies. These academic combinations enable a student to teach in multiple areas as a member of a middle level team consisting of two to five or more teachers. Program advisors and students work closely together, especially over the first two years, to design an IDIMC that accommodates the student’s interests and fits the needs of middle level teachers.

**Professional Studies** Courses that concentrate on the professional work of teaching, span all four years. These studies are grounded in theory, research and policies associated with the very best practices in middle level education. Studies of young adolescent learning and development, teachers and teaching, literature for young adult readers, special education and technology are taken in the first two years as Pre-Professional Requirements. These courses include a minimum of one field placement with a middle level team of teachers. More heavily field-linked courses in curriculum, pedagogy, assessment, team organization, literacy, mathematics, and evaluation and assessment are taken the last two years. Required professional courses over four years total of 52 credits.

**Fieldwork** The faculty is committed to providing students as much field experience as possible and practical. Four courses (EDML 56, 160, 170, 185) are primarily field-based, and in the course of taking these courses students will enjoy working with teachers on four different teaching teams. Emphasis is placed on high levels of integration between campus-based learnings and field experience to insure that students are

<td>7 or 7</td>
</tr>
</tbody>
</table>
sufficiently oriented and prepared for the real work of exemplary middle level schools.

**Cohort** Cooperation and collaboration among teachers is a hallmark of middle level teaching teams. That same spirit is given emphasis through building a cohort of middle level teacher education students who receive group advising, who take courses together, and who participate in professional activities such as school events and professional conferences. Additionally, the Middle Level Teacher Education Program includes a Teacher Advisory Committee composed of exemplary middle level teachers from area schools who consult with students and faculty about the Program, field placements, job searches and other issues related to advancing one’s professional development and beginning career.

**Professional Portfolio** In the aforementioned EDML 10 course, students are introduced to the process of documenting and preserving samples of their professional work and development. These samples are maintained in individual portfolios that grow cumulatively semester by semester. A final Professional Portfolio is assembled during the student teaching semester to more fully define the professional background and aspirations of the novice teacher. These final portfolios constitute completion of the Program, and they are valuable to seniors reflecting on their preparation and accomplishments as well as beginning a job search. These full portfolios are drawn upon to create a more succinct “presentation portfolio” for use in interviews. Seniors also receive faculty guidance in creating resumes and applying and interviewing for teaching positions. The demand for teachers well prepared for teaching middle level schools is such that the portfolio is an excellent and comprehensive way to present one’s candidacy.

Refer to Requirements for Teacher Preparation Programs presented earlier in this section.

**Teacher Education/Music Education (Kindergarten through Twelve)**

The curriculum in music education leading to the degree of Bachelor of Science in Music Education is recommended to students who have sufficient training and natural musical ability to justify a career in music. Prospective students must audition before entering the program. Those admitted as first-year students or sophomores to the Music Education program are considered Candidates in the program. Admission as a Major is made at the beginning of the junior year following formal review procedures during the second semester of the sophomore year. Graduates are qualified for positions as instructors and supervisors of music in public schools.

A typical, but not all-inclusive, program outline follows:

<table>
<thead>
<tr>
<th>FIRST YEAR</th>
<th>Fall</th>

Students are required to complete a student teaching internship application before being assigned a placement.

### Senior Year

**Fall** |
- Ensemble | 1 –
- MUS 256 Perform Study: Senior Recital | 2 –
- EDSC 203 Soc., Hist., & Phil. Found. of Ed. | 3 –
- MUS Pedagogy | 1 –
- MUS 041 Basic Electronic Music | – 3
- EDSC 226 Teaching Internship | – 12
- MUS 253 Private Lessons | – 2
- Gen. Ed.; Electives | 9 –

**Spring**
- A minimum of 124 approved semester hours is required for the degree including three semester hours of teaching reading for teaching licensure. Students must pass the piano proficiency examination prior to student teaching. Students are responsible for obtaining information regarding teaching licensure and degree requirements from the Office of Student Services, 528 Waterman.

Pedagogy classes are taken as available.

Refer to Requirements for Teacher Preparation Programs presented earlier in this section.

### Teacher Education/Physical Education

#### (Kindergarten through Twelve)

The Physical Education Program qualifies candidates for licensure to teach in grades K-12. Course work around the program theme, Moving and Learning, includes a series of courses designed to provide a background to the field of physical education. Special courses assist the student in the development of physical education program content and teaching skills important in providing developmentally appropriate programs of physical education to children and youth in today’s schools. Laboratory experiences in schools throughout the program aid students in recognizing the relationship between theory and practice.

Courses in general education and professional education as well as liberal arts and sciences major/major concentration are also required. A major concentration is Exercise and Sport Science available to students in the Physical Education program.

A typical but not all-inclusive program outline follows:

#### First Year

**Fall** |**Spring**
---|---
- EDPE 021 Foundations of Phys. Ed. | 3 –
- EDPE 157 Care & Prevent Athletic Injury | – 3
- PEAC 125 Team Sports 1 | 1 –
- PEAC 050 Individual Sports | 1 –
- PEAC 126 Team Sports 2 | – 1
- PEAC 070 Racquet Sports | – 1
- EDHE 046 Personal Health | 3 –
- Major Concentration | 3 6
- Gen. Ed.; Electives | 6 6

#### Senior Year

**Fall** |**Spring**
---|---
- EDPE 240 Motor Skill Learning & Control | – 3
- EDSC 215 Reading in Secondary Schools | 3 –
- EDFS 203 Soc., Hist., & Phil. Found. of Ed. or EDSC Elective | 3 –
- EDPE 181 Student Teaching | – 12
- EDPE 182 Student Teacher Seminar | – 2
- Major Concentration | 6 –
- Gen. Ed.; Electives | 3 –

### Junior Year

**Fall** |**Spring**
---|---
- PEAC 190 Dance | – 1
- PEAC 105 Outdoor Recreation | – 1
- Major Concentration | 6 6
- Race & Culture | – 1
- ANPS 019 Human Anatomy & Physiology | 4 –
- ANPS 020 Human Anatomy & Physiology | – 4

* or evidence of American Red Cross Basic Emergency Response certification

### Sophomore Year

**Fall** |**Spring**
---|---
- PEAC 070 Private Lessons | – 2
- EDSC 203 Soc., Hist., & Phil. Found. of Ed. or EDSC Elective | 3 –
- EDPE 220 Sport in Society | 3 –
- EDPE 260 Adapted Physical Activity | 3 –
- EDPE 166 Kinesiology | – 3
- EDPE 240 Motor Skill Learning & Control | – 3
- Gen. Ed.; Electives | 3 3

Students are required to complete a student teaching application before being assigned a placement.

### Student Services

Refer to Requirements for Teacher Preparation Programs presented earlier in this section.

### Athletic Training Concentration

An Athletic Training Concentration is offered in physical education and is approved by the Commission on Accreditation of Allied Health Education Programs (CAAHEP). Upon completion of the concentration and 800 clinical experience hours, students are eligible to sit for the National Athletic Trainers’ Association Board of Certification (NATABOC) national examination.

Certified athletic trainers are highly trained health professionals qualified to work in a number of settings on the health problems of active individuals. Working closely with physicians and other allied health professionals, their work includes the prevention, recognition, and immediate treatment and rehabilitation of injuries related to active participation.

Admission to the program is granted upon successful completion of 60 hours of directed observation, preadmission course work, overall GPA, and an interview with the program faculty. Students are required to submit a formal application to the program director. Accreditation standards limit the number of students accepted each year. Students must be enrolled in a degree program at UVM to be eligible for enrollment in the Athletic Training concentration. It is often combined with the Teacher Education/Physical Education program. For more information, call (802) 656-4456.

### Placement Admission

Students who transfer to the University of Vermont often have command of the entry-level competencies required for admittance into the Athletic Training Education Program (ATEP). As more students are transferring to UVM with prior athletic training academic experience, an avenue for Advanced Placement into the ATEP is warranted. Students spend numerous hours observing in clinical settings, assisting in high school or college athletic training programs and have taken basic athletic training courses. It is therefore appropriate for the students who demonstrate prior athletic training experience.
Two semester hours of physical education activities must be included.

Academic Major and Minor Components (Major minimum of 30 credits, minor minimum of 18 credits or broadfield major of 48-52 credits). Students who successfully complete their Teacher Education programs are recommended for licensure with a first endorsement in their major, and may apply directly to the State Department of Education for an endorsement to also teach their minor. Students are therefore encouraged to select a minor which is also a licensure area. (Approved majors and minors are listed in the Academic Majors box appearing earlier in this section.)

Professional Education Component (42 credits) By the time students begin the professional education component of their program as juniors, they should have completed most of their general education requirements and be well into their academic major (15-18 credits completed) and their academic minor (six-12 credits completed). Students need to plan to complete the remainder of their requirements as they complete the following phases of the professional education component:

Following completion of this first phase, students must submit their Initial Portfolio and their application to the Teacher Education Program. The Initial Portfolio documents learning, professional knowledge, collegiality, advocacy and accountability. Provided the Initial Portfolio is assessed as satisfactory, the student has achieved passing scores on PRAXIS I, has a minimum 2.5 GPA overall, 2.5 in his or her major, and was successful in EDFS 203, EDSC’ 207 and 209 (3.0 or better), the student is accepted into Teacher Education and may begin work on the second phase of the program.

II. Designing and Adapting Instruction: EDSC 215, 216 and subject methods.

Subject methods for major: EDSC 225 (Social Studies), EDSC 227 (Science), EDSC 240 (English), EDSC 257 (Mathematics), or EDSC 259 (Foreign Languages). During the spring semester prior to the academic year in which students plan to student teach, they must submit an application for student teaching placement. All students seeking a student teaching placement must achieve passing scores on PRAXIS II. Internship Portfolios may again be submitted to document work toward achievement of Standards for Vermont Educators. Students must have an overall GPA of 3.0, and a minimum GPA of 2.75 in their major prior to student teaching. Following a successful faculty review of a student’s records, he or she is nominated for a placement. Students must complete the interview process and be approved for placement by the school in order to be confirmed for student teaching. Students complete a semester of full-time student teaching as the third phase of the program. (In some cases, students must arrange to live off-campus during the student teaching semester.)

III. Achieving Results in Schools: EDSC 226, 230.

As students complete their degree program, they must submit their Licensure Portfolios which document Learning, Professional Knowledge, Collegiality, Advocacy and Accountability. Recommendation for licensure is based on successful completion of student teaching, an overall grade-point average of 3.0, as well as on submission of a satisfactory Licensure Portfolio. Information about application and assignment procedures for the Secondary Education Program may be obtained from 405A Waterman Building. Students are responsible for obtaining information regarding the process and requirements, and for notifying the office as to changes in their status, address, or intentions for completion of their program.

Electives All students in the College of Education and Social
Services are required to enroll in an education course both semesters of their first year. Students need to plan to supplement these education electives with additional electives from the College of Education and Social Services or from other colleges, schools, and departments within the University as needed to complete 124 credit hours prior to graduation.

A typical, but not all-inclusive, program outline follows:

**FIRST YEAR**
- Fall: EDSC 050-Exploring Education 3
- Spr: Major 3
- Minor 3
- PEAC 1
- Race & Culture 1
- EDSP 005 3
- Gen. Ed. 6

**SOPHOMORE YEAR**
- Fall: Major 3
- Minor 6
- PEAC 1
- EDSC 011 3
- EDSC 197 (or other field based elective) 3
- Gen. Ed. 9

**JUNIOR YEAR**
- Fall: EDSC 207-Adolescent Learning from a Behavioral & Cognitive Perspective 3
- EDSC 209-Practicum in Teaching 3
- EDFS 203-Soc., Hist. & Phil. Found. of Ed. 3
- EDSC 215-Reading in Secondary Schools 3
- EDSC 216-General Methods for Sec. Teachers 3
- Special Methods 3
- Major 6
- Minor 3

**SENIOR YEAR**
- Fall: EDSC 226-Teaching Internship 12
- EDSC 230-Teaching for Results 3
- Minor 6
- Gen. Ed.; Electives 4

**Language Proficiency**
A Language Proficiency Test is required for the Secondary Education Foreign Language majors.

**Speech/Theatre:** All students must demonstrate competence in the area of speaking by taking a speech or theatre course or by submitting evidence of competence (go to 405A Waterman Building for more information).

**Postbaccalaureate Teacher Preparation Program**
The Postbaccalaureate Teacher Preparation Program is designed for individuals who have a bachelor’s degree from an accredited four-year institution and who want to become licensed to teach in Vermont. The basic program fulfills the professional education requirements for state licensure. Areas and levels of licensure include: Grades K-12 — Art, Music, Physical Education; Grades K-6 (elementary) — general Elementary Education, Grades 7-12 (secondary) English, Foreign Language, Mathematics, Science (Animal Sciences*, Biological Science, Chemistry, Earth Science, and Physics), Social Studies (Anthropology, Economics, Geography, History, Political Science, and Sociology).

*Animal Sciences is an alternate route for Biology Endorsement.

Applicants to the Postbaccalaureate (Postbac) Teacher Preparation Program must meet the following entrance criteria:

1. Hold a bachelor’s degree from an accredited institution of higher education.
2. Possess a general education background based on those studies known as liberal arts which embrace the broad areas of social and behavioral sciences, mathematics, biological and physical sciences, the humanities, and the arts.
3. Demonstrate a commitment to the teaching profession.
4. Have a minimum overall GPA of 2.5 in undergraduate course work.
5. For elementary candidates: Previous coursework must include 30 semester hours in a single liberal arts discipline.
6. For middle level candidates: Previous coursework must include two approved areas of concentration, with 18 credits in each.
7. For secondary candidates: Previous coursework must include a minimum of 30 semester hours with a minimum GPA of 2.75 in one of the academic areas listed below to meet Vermont state licensure requirements for the major academic concentration.

Secondary Education also has a master’s degree option. See the Graduate College catalogue for further information.

**Accelerated Licensure Master of Education Program for Secondary Education**
UVM students who are in their third year of study for the bachelor’s degree may apply to the Accelerated Licensure Master of Education program. Requests for further information and application forms may be obtained by contacting the PBTP Coordinator, Department of Secondary Education, 405A Waterman Building. Refer also to the Graduate College catalogue.

**Cross-College Minor**

**Human Development and Family Studies.** This minor cannot be the sole minor for sociology or psychology majors but is acceptable as a second minor, especially for persons interested in careers involving work with families and youth.

**Minor in Special Education**
The minor in special education is for students wishing to learn about and work with students with disabilities and to obtain an understanding of special education. Students apply to the minor through contacting the Special Education Program in the Department of Education. A total of 18 hours (6 courses) of coursework is required, at least 9 hours of which must be at the 100 level or above.

Course offerings cover the areas of foundations of special education, assessment practices, and methods for supporting students with disabilities in general education classrooms.

Students may apply their coursework to becoming certified in special education.
The College of Engineering and Mathematics

The College offers stimulating, professionally-oriented programs for students interested in careers in computer science, engineering, and mathematics. Computer science develops creative problem-solving ability, along with essential skills in current programming and computing environments. It offers the flexibility to gear studies toward business, science, engineering, mathematics, and the arts. Engineering education combines the study of mathematics and the physical, life, and engineering sciences with application to the analysis and design of equipment, processes, and complete systems. The breadth and flexibility of the engineering programs provide a sound background for engineering practice in public or private domains, for graduate study in engineering and science, and for further professional study in such fields as business, law, or medicine. Engineering management, offered in cooperation with the School of Business Administration, combines a basic education in an engineering discipline with the study of management concepts and techniques. Mathematics and statistics are designed to train students in critical thinking, problem solving, and sound reasoning, while developing a strong level of technical competence and a substantial breadth of exposure to other fields. Bachelor of Science degrees in each of these disciplines provide distinctive recognition based on challenging course work, valuable field experience, and intensive student-faculty interaction.

DEGREE PROGRAMS

The following Bachelor of Science degrees are offered in the College. Various options in each degree are described under the individual degree program.

- Civil Engineering
- Electrical Engineering
- Engineering Management
- Mathematics
- Mechanical Engineering

The Bachelor of Science degree program may be completed with an approved major in one of the following fields:

- Computer Science
- Computer Science and Information Systems
- Statistics

ACADEMIC STANDARDS

In order to continue as a major in the College of Engineering and Mathematics, a student must achieve a 2.0 cumulative grade-point average at the end of the semester in which 60 cumulative credit hours have been attempted. No more than three repeated course enrollments are allowed during this 60-credit period. In the case of transfer students, applicable transfer credits will be included in determining the 60 credit hours, but grades in these courses will not be included in the grade-point average.

Students who receive a cumulative or semester grade-point average of less than 2.0 will be placed on trial. Students who have failed half their course credits for any semester, or who have had two successive semester averages below 2.0, or three successive semesters in which their cumulative grade-point average falls below 2.0, are eligible for dismissal.

To receive a degree, students must have a minimum cumulative average of 2.0. Students must complete 30 of the last 45 hours of credit in residence at UVM as matriculated students in the College of Engineering and Mathematics. Additional degree requirements are specified for each major.

No more than three grades of D, D+, or D- in the courses normally taken as part of the junior and senior curriculum in the student’s major program will be acceptable. Requirements in each department are specified by the respective program curriculum committees.

A course may not be taken for credit if it is a prerequisite to one for which credit has already been granted, except by permission of the student’s advisor.

Only two credits of physical education will count toward the total credits needed.

Students must comply with the degree requirements as stated in a single catalogue edition in place during the time they are enrolled. The catalogue edition to be followed is the one in effect at the time the student enrolls at UVM, unless the student requests in writing to follow an edition that is published subsequently during his/her enrollment at UVM. Students may not mix requirements from different catalogues.

First year students: Student who receive a cumulative GPA less than 1.67 after the first year are in danger of not being able to complete a degree in the College of Engineering and Mathematics. These students will be required to reassess their academic direction with the aid of their advisor and the Academic Dean.

MINORS, HONORS THESIS AND CO-OP PROGRAMS

Minor in Computer Science  A Computer Science Minor consists of 18 credits in computer science to include 100 or 103, 104, and three additional credits at the 100 level or above. Some Computer Science courses require additional prerequisites.

Minor in Electrical Engineering  A minor in Electrical Engineering consists of at least 19 credit hours in Electrical Engineering courses distributed as follows: 3, 81, 4, 82, plus at least nine credit hours numbered above 101. Prerequisite courses for the minor are Math. 21, 22, 121, 271 (or 230) as well as Physics 31, 21, 42, and 22. Each student in the minor program will be assigned an Electrical and Computer Engineering faculty advisor who will assist the student in developing an individualized plan of study. The plan of study of the minor must be approved by the Electrical and Computer Engineering faculty advisor.

Minor in Mathematics

Pure Mathematics: Math 21 (or equivalent), 22, 52 or 121, and nine additional credits in Mathematics courses numbered 100 or above. Computer Science or Computer Engineering majors may substitute Math 54 for 52. The course plan for a mathematics minor must be approved by a mathematics faculty advisor.

Applied Mathematics: Fifteen hours of mathematics courses numbered 52 or higher, including one of 230, 237, 271.
Minor in Statistics  A Statistics Minor consists of 15 credits of statistics courses, acquiring calculus knowledge equivalent to Math. 19 or 21, and gaining computer experience equivalent to Statistics 201 or a computer programming course (CS 16 or higher). Not more than seven credits of Statistics 11/51/111/140/141/143/211 may be counted.

The course plan for the Statistics Minor must be approved by a Statistics faculty advisor. Contact the Statistics Program Director for complete guidelines.

Honors Thesis Program
The undergraduate thesis program, designed for the superior student with unusual initiative and intellectual curiosity, provides an opportunity to pursue a special program without the restrictions of classroom routine. The honors thesis program consists of reading, research, design, or creation in a curricular area of the student's choice, leading to a written thesis. At the time of graduation, the student's transcript and the graduation program will be appropriately denoted with "Honors Thesis" and the title of the thesis, provided that honor's level performance has been demonstrated.

The student must be matriculated in the College at the time of application for the thesis program and have a cumulative grade-point average of at least 3.0 for sophomore and junior work. The curriculum committee of the area offering the thesis course establishes the mechanics for thesis review and awarding of the grade. The thesis proposal must be approved by the College of Engineering and Mathematics Studies Committee prior to the Add/Drop deadline of the student's first semester or summer session of matriculation into the honor's thesis program. This should allow two semesters or a full summer and one semester of planned effort for the thesis research.

A thesis committee consists of at least three UVM faculty, at least two of whom are from the offering area. The chair of the committee, a permanent UVM faculty member, is also from the offering area. This committee serves to advise the student, approves of the thesis proposal before its submission to the Studies Committee, and approves of the oral defense of the thesis. The course grade is assigned by the committee chair based on consultation with the thesis committee. Six credits of effort are expected for the thesis, normally as three credits each in two semesters. Some programs within the College require senior projects as part of their prescribed curriculum. Such projects can provide alternative opportunities to students interested in a design or research challenge.

Cooperative Education Program
A cooperative education (CO-OP) program is offered to students with cumulative grade-point averages placing them in the upper half of their class. Before acceptance, each candidate must be interviewed and approved by the program coordinator and the prospective employer. The program lets students apply their learning to a full-time, paid position in a business, industrial, or government setting.

Computer Science Curricula
Students may select either of three degree programs in Computer Science: The Bachelor of Science degree, with a major in Computer Science, and the Bachelor of Science degree, with a major in Computer Science and Information Systems, are offered through the College of Engineering and Mathematics and are described below. Additionally, a Bachelor of Arts degree, with a major in Computer Science, is offered through the College of Arts and Sciences. A non-degree Certificate and an Accelerated Masters' program are also available.

Certificate in Computer Software: A non-degree certificate in Computer Software is offered jointly with the Division of Continuing Education. Requirements for the Certificate are 15 credits in approved computer software courses, to include CS21 with a grade of C or better in each.

Bachelor of Arts, Computer Science Major: Requirements for this degree are described under the College of Arts and Sciences section of this catalogue.

Accelerated B.S./M.S. Program: A five-year combined Bachelor of Science plus Master of Science in Computer Science program is available. Consult the Graduate Catalog for details.

Bachelor of Science, Computer Science Major: A minimum of 124 credits (122, if the student is exempt from PEAC) are required as follows:

- Computer Science: 21, 26, 100, 101, 103, 104, 201, 224 or 243, 292, plus 15 additional credits (five courses) of 200-level courses (not more than three credits of which may be independent study);
- Mathematics: 21, 22, 54, two of (121, 124, 173, 271);
- Statistics: 141 or 211 (recommended), 151;
- Four courses of laboratory science electives, selected from the following six:
  - Biology: 1, 2
  - Chemistry: 31, 32
  - Physics: 31 (with 21), 42 (with 22)

Note: Specific science courses are required for certain minors.

- English 1;
- Six credits (two courses) of Social Science Electives selected from: ALANA, Anthropology, Economics, Geography, History, Political Science, Psychology, Sociology, Women's Studies, or other advisor-approved electives;
- Six credits (two courses) of Humanities and Fine Arts Electives selected from: Art, Classics, Drama, Film, Language, Literature, Music, Philosophy, Religion, Speech, or other advisor-approved electives;
- 15 additional credits in advisor-approved electives in Humanities, Social Sciences, and Arts, to include either AH 95, AGRI 95, or one course approved by the College of Arts and Sciences as a course in non-European Cultures or Race Relations and Ethnicity, as specified under General Requirements in the College of Arts and Sciences section of this catalogue;
- 12 additional credits in advisor-approved free electives (excluding PEAC);
- Two credits of PEAC (see Academic and General Information for exceptions); and
- Completion of a University-approved minor (excluding Computer Science); courses used to fulfill other requirements may be used to satisfy minor requirements.

A sample course sequence can be found through http://www.cs.uvm.edu/.

No grade below a C- in any computer science course will be accepted, except as free elective credit.

Bachelor of Science, Computer Science and Information Systems Major: A minimum of 128 credits (126, if the student is exempt from PEAC) are required as follows:

- Computer Science: 14, 21, 26, 100, 101, 103, 104, 292,
plus nine additional credits (three courses) of 200-level courses (not more than three credits of which may be independent study);

- Business Administration: 60, 61, 120, 132, 141, 143, 144, 150, 173, 180;
- Economics: 11, 12;
- Mathematics: 19 and 20, or 21 and 22 (recommended sequence), 54;
- Statistics: 141;
- One laboratory science sequence, selected from the following three:
  - Biology: 1, 2
  - Chemistry: 31, 32
  - Physics: 31 (with 21), 42 (with 22)
- English 1;
- Nine credits (three courses) of Social Science Electives selected from ALANA, Anthropology, Economics, Geography, History, Political Science, Psychology, Sociology, Women's Studies, or other advisor-approved electives;
- Nine credits (three courses) of Humanities and Fine Arts Electives selected from: Art, Classics, Drama, Film, Language, Literature, Music, Philosophy, Religion, Speech, or other advisor-approved electives;
- 15 additional credits in advisor-approved free electives (excluding PEAC);
- Two credits of PEAC (see Academic and General Information for exceptions); and

- All students must complete either AH 95, AGRI 95, or one course approved by the College of Arts and Sciences as a course in non-European Cultures or Race Relations and Ethnicity, as specified under General Requirements in the College of Arts and Sciences section of this catalogue; a course used to fulfill other elective or distribution requirements may be used to fulfill this requirement.

A sample course sequence can be found through http://www.cs.uvm.edu/.

No grade below a C- in any computer science or business administration course will be accepted, except as free elective credit.

**Note:** This program is intended to fulfill the course requirements for eligibility for advanced standing in the MBA program at UVM.

**Engineering Curricula**

The College of Engineering and Mathematics offers professional programs in Civil, Electrical, and Mechanical Engineering accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology (ABET). Interdisciplinary engineering programs offered by the College include Engineering Management offered in cooperation with the School of Business Administration.

Engineering involves decision making and problem solving in order to analyze, design, and create devices or systems or processes to solve human problems. Engineering education at UVM provides a thorough grounding in the engineering sciences and engineering design. Engineering design is developed and integrated in each student's program and culminates in a required major design experience which draws upon prior course work and which focuses on the issues and expectations of professional practice.

Courses in the humanities and social sciences (HSS) are required in engineering programs to broaden the student's understanding of humankind and relationships in human society. HSS electives may not be taken on a pass/fail basis. Sixteen to 18 credit hours, depending upon the major, must be selected from the list presented here:

**Approved Humanities Courses**

- Anthropology: all courses* except 200, 201, 290
- Art: all Art History courses*
- Botany: 6
- Chinese: all courses*
- Classics: all courses* (including Greek and Latin)
- Community Devel & Applied Econ: 2, 61, 102, 156, 157, 171, 205, 208, 218
- Economics: all courses* except 170, 270
- English: all courses* except 1, 50, 117, 118, 119, and 120
- Environmental Studies: 1, 2, 100, 178
- French: all courses
- Geography: 1-2, 51-57, 60, 73, 151, 154, 155, 170-179
- German: all courses*
- Hebrew: all courses*
- History: all courses*
- Human Development & Family Studies: 5, 20, 60, 61, 65
- Italian: all courses*
- Japanese: all courses*
- Music: all History or Literature courses*
- Natural Resources: 2, 6
- Nursing: 15, 20, 140
- Philosophy: all courses*
- Political Science: all courses* except 181
- Psychology: 1, 15, 119, 130, 132, 151, 163, 230, 231, 233, 234
- Public Administration: 296
- Recreational Mgmt.: 30
- Religion: all courses*
- Russian: all courses*
- Social Work: 2, 47, 48, 165, 166, 167
- Sociology: 1-57, 101-171, 202-272
- Spanish: all courses
- Theatre: 1, 41, 150, 151
- Vermont Studies: 52, 64, 123, 160, 184
- Women's Studies: all courses*

*Special topics, seminars, honors, reading and research, or internships are not normally considered appropriate HSS electives.

Students in Civil Engineering, Engineering Management, Electrical Engineering and Mechanical Engineering must include a three-credit cultural diversity course as one of their required humanities and social sciences courses. A course must be selected from the list of cultural diversity courses presented here:

- All ALANA Studies courses; Anthropology 21, 23, 24, 64, 128, 160, 161, 162, 163, 165, 166, 167, 170, 172, 175, 179, 180, 187 (cross-listed with SOC 119); Art: 8, 146, 185, 187, 188, 192, 285, 295, "Working with Culturally Diverse Sources", 295 "Cultural Transformations"; Classics 145;
- Communication Sciences 160; Economics 153; English 57, 61, 166, 167, 168, 170, 172, 173; French 289; Geography 1, 51, 56, 60, 151, 154, 173; History 9, 10, 40, 41, 45, 50, 51, 62, 63, 68, 140, 141, 149, 150, 151, 161, 163, 164, 168, 169, 178, 188, 189, 240, 241, 250, 252; Music 15; Philosophy 5, 121, 122, 221; Political Science 29, 129, 157, 168, 170, 174, 175, 177, 179; Religion 20, 21, 80, 128, 130, 131, 132, 134, 141, 145, 230; Sociology 19, 31, 118, 119 (cross-listed with ANTH 187), 171, 213, 219, 272; World Literature 6, 116, 145.

It is possible for engineering students to extend their undergraduate curriculum beyond the typical four-year schedules outlined on the following pages. Those who
would like to complete requirements over a longer time period must meet with their faculty advisor to plan how this can be done.

Engineering students can become affiliated with their respective national professional engineering societies: the American Society of Civil Engineers, the Institute of Electrical and Electronics Engineers, the American Society for Engineering Management, and the American Society of Mechanical Engineers. Each of these organizations has an authorized student chapter at UVM. Engineering students demonstrating high scholarship attainment, combined with exemplary character, are recognized by membership in the Vermont Alpha Chapter of Tau Beta Pi, the national engineering honor society. In addition, all engineering students may become affiliated with the student chapter of the Society of Women Engineers. These student organizations present opportunities for students to conduct activities similar to those of the national societies.

**TYPICAL FIRST-YEAR CURRICULUM FOR ENGINEERING STUDENTS**

First-year engineering students generally* have one of two schedules:

**SCHEDULE ONE**

<table>
<thead>
<tr>
<th>FALL</th>
<th>SPRING</th>
</tr>
</thead>
<tbody>
<tr>
<td>Math 21</td>
<td>4</td>
</tr>
<tr>
<td>Math 22</td>
<td>4</td>

</tr>
<tr>
<td></td>
<td>17</td>
</tr>
</tbody>
</table>

* Exceptions are: Electrical Engineering 3; Mechanical Engineering Option 3.

**Students must take English 1 in either the first or second semester. Students should take an HSS course during the semester in which English 1 is not taken.

Civil and Environmental Engineering

The curriculum in Civil Engineering leading to the degree of Bachelor of Science in Civil Engineering offers instruction in environmental engineering, hydraulics and hydrology, soil mechanics, structural engineering, and transportation engineering, as well as in the engineering sciences, mathematical sciences, natural sciences, humanities, and the social sciences.

There are two options leading to the degree of Bachelor of Science in Civil Engineering: General Civil Engineering and Environmental Engineering. The degree requires a minimum of 130 semester hours, plus two credits of physical education activities.

The goal of the curriculum is to prepare students for a variety of opportunities for their future in the profession. Students are encouraged to prepare for life-long learning to enhance their choices for further study or for employment in a global marketplace for engineering professionals. The curriculum also focuses on environmentally-responsible engineering practices.

Engineering design is developed and integrated in each student’s program and culminates in a required major design experience which draws upon prior course work and which focuses on the issues and expectations of professional practice.

No more than three grades of D, D+, or D– will be acceptable in all required courses in engineering and engineering science including design and professional electives as stated in the curricula below for the junior and senior years.

**OPTION 1 – General Civil Engineering**

^1 Science electives are: BIOL 1A, 2A; CHEM 32, 42, 141; GEOL 1; NR 276; PSS 264.

^2 Required Humanities course: students must elect one from the list of approved cultural diversity courses in the College of Arts and Sciences in the areas of either Non-European Cultures or Race Relations and Ethnicity in the U.S.

^3 Design Electives are CE 141, 142, 161, 175, 181, 230, 250, 251, 253, 256, 258, 260, 261, 264, 265, 280, 283.

^4 Professional Electives are all Design Electives plus CE 171, 191, 192, any CE 200 level course, Natural Resource 278.

^5 May be replaced by CE 172, Steel Design.

**Electrical and Computer Engineering**

The curriculum in Electrical Engineering leading to the degree of Bachelor of Science in Electrical Engineering offers instruction in electrical and electronic circuits, electromagnetics, semiconductor devices, signal and system analysis, communications, digital systems, as well as in physical and life sciences, humanities, and social sciences.

There are four options leading to an ABET accredited degree of Bachelor of Science in Electrical Engineering: General Electrical Engineering, Computer Engineering, Biomedical Engineering, and Premedical Engineering. The degree requires a minimum of 130 semester hours for Option 1, 128 semester hours for Option 2, 130 for Option 3, and 130 credit hours for Option 4. In addition, two credits of physical education activities are required.

All students must elect one course from the list of approved cultural diversity courses as one of their required humanities and social sciences courses.

Students may pursue a cross-college or departmental minor provided that they fulfill all Electrical Engineering degree requirements.

Engineering design is developed and integrated in each student’s program and culminates in a required major design experience which draws upon prior course work and which focuses on the issues and expectations of professional practice.

An accelerated master’s degree program leading to an M.S. in Materials Science is available. For specific program requirements refer to the Graduate College Catalogue.

No more than three grades of D, D+, or D– will be acceptable in all required courses in engineering, basic science, and computer science including all technical electives as stated in the catalogue for the junior and senior years.

Engineering Management

A curriculum in Engineering Management leading to the degree of Bachelor of Science in Engineering Management is offered in cooperation with the School of Business Administration. Engineering management is a broad discipline concerned with the art and science of planning, organizing, directing, and controlling activities that have a technical component. Designing, producing, selling, and servicing products in the marketplace require managers who possess both an ability to apply engineering principles and a skill in managing technical projects and people in technical jobs. The curriculum is designed to provide a basic education in an engineering discipline with the study of management concepts and techniques. The curriculum incorporates the equivalent of one-half year of study in the area of the humanities and social sciences. Candidates for this degree must earn a minimum of 128 semester hours, depending upon the engineering option selected, plus two credits of physical education activities. Engineering Management students are reminded that they must choose one HSS elective from the list of approved cultural diversity courses in the College of Arts and Sciences.

OPTION 1: Civil Engineering

(131-132 hours)

1st 2nd

SOPHOMORE SEMESTER
CE 1, Statics 3 –
CE 10, Surveying 4 –
Economics 11, Prin. of Economics – 3
Math. 121, Calculus III 4 –
BSAD 60, Financial Acctng. – 4
Math. 271, Applied Math. – 3
BSAD 61, Managerial Acctng. – 4
Physics 42, with 22, EM & Mod. Phys. – 5
ME 12, Dynamics – 3
ME 14, Mechanics of Solids – 3

Mechanical Engineering

The curriculum in Mechanical Engineering leading to a degree of Bachelor of Science in Mechanical Engineering offers instruction in design, solid and fluid mechanics, materials, manufacturing processes and systems, as well as in engineering, life and physical sciences, humanities, and social sciences.

There are three options leading to the degree of Bachelor of Science in Mechanical Engineering: (1) General Mechanical Engineering (126 semester hours); (2) Biomedical Engineering (127 semester hours); (3) Premedical Engineering (137 semester hours). In addition, all options require two credits of physical education activities.

Engineering design is developed and integrated in each student's program and culminates in a required major design experience with draw upon prior course work and which focuses on the issues and expectations of professional practice.

No more than three grades of D, D+, or D– will be acceptable in all required courses in engineering, basic science, and computer science including all technical electives as stated in the Catalogue for the junior and senior years.

Mathematics and Statistics Curricula

The College of Engineering and Mathematics offers programs in several areas of the mathematical sciences and their applications. The curriculum leads to the Bachelor of Science degree in Mathematics. The Applied and Interdisciplinary Mathematics option combines a major in applied mathematics with an approved concentration in an allied field that emphasizes the application of mathematics. The Statistics Program offers a major in Statistics within this degree.

Accelerated master’s programs in Mathematics, Statistics, and Biostatistics are also offered. These programs allow students to earn both their B.S. and M.S. degrees in as little as five years. Details are given in the following sections for Mathematics and Statistics.

A Handbook for Mathematics and Statistics Majors, available from the Mathematics and Statistics department office or the Undergraduate Mathematics Student Organization, provides additional information on the mathematics and statistics degree programs, honors in mathematics and statistics, mathematics and statistics courses, advising and other support for students, extracurricular activities, career options, and other material of interest to potential majors. For further information see http://www.emba.uvm.edu/EM/Math.

Basic Curriculum
Statistics: Math. 21, 22, 121, 124; CS 21; and one of Stat. 141, 143 or 211, 151 or 251, 201, 221 or 227, 241 or 261, and 281 or 293.

Applied and Interdisciplinary Mathematics: Math. 21, 22, 121; CS 21; Math. 124, 230, and 237.

In addition to the Basic Curriculum above, candidates for the degree of Bachelor of Science in Mathematics must complete the following requirements A, B, C, and D.

A. Major Courses
Mathematics: A minimum of 21 additional hours in Mathematics, Statistics, or Computer Science courses numbered 100 or above. At least 12 hours must be in courses numbered 200 or above and no more than 12 hours may be chosen from Computer Science.
Statistics: An additional six credit hours of Statistics, so that the total credits earned in Statistics is at least 24 hours. A minimum of two additional hours in Mathematics, Statistics, or Computer Science courses numbered 100 or above, so that a total of at least 45 credits in the basic and major courses is earned. A total of 18 credit hours in the combined basic curriculum and majors courses must be taken at the 200 level and no more than 12 hours can be taken in Computer Science.

Applied and Interdisciplinary Mathematics: A minimum of 18 additional hours in Mathematics, Statistics, or Computer Science courses numbered 100 or above, of these 18 hours, 6 must be in Mathematics or Statistics, and must be numbered 200 or above.

B. Allied Field Courses
Allied fields include the following:

Twenty-four hours selected from the following Allied Fields:

1. Physical Sciences
2. Biological Sciences
3. Medical Sciences
4. Engineering
5. Computer Science

Each student in consultation with his or her advisor must plan a sequence of Allied Field courses consistent with his or her professional and personal goals. A student interested in pursuing intensive studies in an area not specifically listed is encouraged to plan a program with his or her advisor and submit it to the appropriate departmental committee for review and approval. The requirements are as follows:

Mathematics: Twenty-four hours selected from the above list of Allied Fields. Of these 24 hours, at least six must be in courses numbered 100 or above, and at least six must be taken in fields (1) to (5). Courses used to satisfy requirement A above may not be used to satisfy this requirement.

Statistics: Twenty-four hours selected from the above list of Allied Fields, including at least one laboratory experience in science or engineering. Of these 24 hours, at least six must be in courses numbered 100 or above and at least six must be taken in fields (1) to (5). Courses used to satisfy requirement A above may not be used to satisfy this requirement.

Applied and Interdisciplinary Mathematics: At least seven courses with a concentrated focus in an allied field. The major courses in requirement A and the Allied Field courses in requirement B must form a coherent program that has the written approval of the student’s faculty advisor in the Mathematics and Statistics Department. When appropriate, and with the written approval of the advisor, at most three courses can overlap requirements A and B.

C. Humanities and Social Science Courses

(References used to satisfy requirement B above may not be used to satisfy this requirement.)

English 1, and 21 hours of courses selected from categories I, II, and III listed below. These 21 hours must be distributed over at least two categories, and at least six hours must be taken in each of the two categories chosen. Statistics majors must include Speech 11.

1. Language and Literature

D. Total Hours

A minimum of 120 semester hours is required, plus two hours in physical education activities. First-year students must include the one-hour Race and Culture course, EDSS or another course approved by the College of Arts & Sciences as meeting the “Race Relations and Ethnic Diversity in the United States” requirement.

E. Grades

No more than three grades of D, D+, or D– in the 200/300 level Mathematics and Statistics courses used to satisfy the “Core Curriculum” and “Major Courses” requirements will be acceptable.

Mathematics

The mathematics curriculum is quite flexible. It is designed to provide a sound basic training in mathematics that allows a student to experience the broad sweep of mathematical ideas and techniques, to utilize the computer in mathematics, and to develop an area of special interest in the mathematical sciences.

In addition to the Bachelor of Science degree described here, the Department of Mathematics and Statistics also offers a Bachelor of Arts degree in the College of Arts and Sciences. A faculty advisor from Mathematics will assist students in determining which degree program best suits their individual needs and plans. Some of the career plans for which a well-designed major in mathematics can provide ideal preparation are highlighted below.

Recommendations for Major Courses

In consultation with their advisor, students should choose an area of interest within the mathematics major and plan a coherent program that addresses their interests in mathematics and its applications. This area might be one of those listed below, or it might be another area suggested by the student. As a guide, students interested in one of the areas would typically take at least three courses in that area, including all of the courses marked with an asterisk (*). In addition, students should take courses from at least two other areas. Because of its centrality in mathematics, students should make sure that they take at least one course listed under Classical Mathematics. In following these recommendations, a course listed in more than one area is meant to be counted only once.

1. Classical Mathematics. Classical mathematics encompasses those areas having their roots in the great traditions of mathematical thought, such as geometry and topology, mathematical analysis, algebra and number theory, and discrete mathematics. Courses in this area include the following: Math. 141, 151, 173, 236, 240, 241*, 242, 251*, 252, 253, 257, 260, 264, 273, 331, 353.

2. Applied Mathematics. Applied Mathematics involves the use of mathematical methods to investigate problems originating in the physical, biological, and social sciences and engineering. Mathematical modeling, coupled with the development of mathematical and computational solution techniques, illuminates mechanisms which govern the problem and allows predictions to be made about the actual physical situation. Current research interests of the faculty include biomedical mathematics, fluid mechanics and hydrodynamic stability, asymptotics, and singular perturbation theory. Courses in this area include the following: Math. 230*, 236, 237*, 238, 240, 272, 273, 274.

3. Computational Mathematics. Computational mathematics involves both the development of new computational techniques and the innovative modification and application of existing computational strategies to new contexts where they have not been previously employed. Intensive computation is central to the solution of many problems in areas such as applied mathematics, number theory, engineering, and the physical, biological and natural sciences. Computational mathematics is often interdisciplinary in nature, with algorithm development and implementation forming a bridge between underlying mathematical results and solution of the physical problem of interest. Courses in this area include the following: Math. 173, 230, 237*, 238, 274, Statistics 201.

4. Theory of Computing. The mathematical theory of computing deals with the mathematical underpinnings allowing effective use of the computer as a tool in problem solving. Aspects of the theory of computing include: designing parallel computing strategies (graph theory), analyzing strengths and effectiveness of competing algorithms (analysis of algorithms), examining conditions which ensure that a problem can be solved by computational means (automata theory and computability), and rigorous analysis of run times (complexity theory). Courses in this area include the following: Math. 173, 223, 224+, 243, 273, 325, Computer Science 346, 357.

5. Mathematics of Management. Mathematics of Management involves the quantitative description and study of problems particularly concerned with the making of decisions in an organization. Problems are usually encountered in business, government, service industries, etc., and typically involve the allocation of resources, inventory control, product transportation, traffic control, assignment of personnel, and investment diversification. Courses in this area include the following: Math. 173, 221*, 222, 230, 236, 273, Statistics 141 or 211, Statistics 151 or Math. 207, Statistics 224, 241, 253.

6. Actuarial Mathematics. Actuaries use quantitative skills to address a variety of problems within business environments, and especially within the life insurance industry. Two professional organizations sponsor qualifying examinations and grant recognition to actuaries in the U.S. and Canada. A unique feature of the actuarial profession is that formal training is typically completed after graduation “on-the-job.” Students planning an actuarial career can prepare for and complete some actuarial examinations prior to graduation. Several departmental courses serve as preparation for the examinations: Math. 21, 22, 121, and 124 for the first examination; Statistics 141 or 211, [Statistics 151 or Math. 207]*, and [Statistics 241 or 261] for the second examination; Statistics 221 or 231, 225, and 253 for the third examination; Math. 221, 222, and Statistics 252 for the fourth examination; and Math. 237 for the fifth examination.

7. Probability and Statistical Theory. Probabilistic reasoning is often a critical component of practical mathematical analysis or risk analysis and can usefully extend classical deterministic analysis to provide stochastic models. It also provides a basis for statistical theory, which is concerned with how inference can be drawn from real data in any of the social or physical sciences. Courses in this area include the following: Math. 222, 241, 242, (Statistics 151 or Math. 207)*, Statistics 241*, 252a, 252b, 261, 262, 270.
A minor in Statistics can be earned by taking a total of 15 credits of Statistics courses, Math. 19 or 21 or equivalent, and Statistics 201 or Computer Science 16 or above. Note that Mathematics majors can minor in Statistics as well. Not more than seven credits of Stat. 11/51/111/140/143/211 may be counted toward the total Stat. credits in the minor.

Statistics majors may also minor in Mathematics by completing MATH 21, 22, 52 or 121, and 9 more credits in mathematics at the 100+ level. Since Statistics majors normally take MATH 21, 22, 121 and 124, they just need two more mathematics courses at the 100+ level.

Students earning the B.S. in Mathematics may earn a double major in Mathematics and Statistics by meeting the requirements of the Statistics major and earning an additional 18 credits in Mathematics, to include one of Math. 141, 241, 151 or 251.

Further details on the Statistics major and minor curricula may be obtained from the Director of the Statistics Program. The Handbook for Mathematics and Statistics majors, available from the Mathematics and Statistics department office, also provides a wealth of useful information.

**Premedical Concentration in Statistics.** Each student electing the Premedical Concentration in Statistics will fulfill the general requirements for the Statistics major. Statistics 290 is recommended as an important elective for students interested in medicine or allied health. In addition, the premedical concentration should include as a minimum two years of chemistry with laboratory (Chemistry 31, 32, or 35, 36, 37, 38, and 141, 142), at least one year of physics with laboratory (Physics 21, 31, 22, 42 or 21, 31, 125), and at least one year of biology with laboratory (Biology 1, 2). Exposure to medical research problems will be provided through supervised experiences in the College of Medicine Biometry Facility.

**Concentration in Quality.** Students interested in methods of quality control and quality improvement are encouraged to develop a concentration in quality. Regularly offered courses include Statistics 224 and 265. Related courses to consider include Business Administration 178 and others in the Production and Operations Management and Quantitative Methods area of Business Administration. Also, special topics courses in Total Quality Management have been offered as Statistics 95 (summers) and Statistics 295. Project experience in industrial quality control or in health care quality can be gained in Statistics 191 and 281, or 295-294.

**Accelerated Master’s Programs.** A master’s degree in Statistics or in Biostatistics can be earned in a shortened time by careful planning during the junior and senior years at UVM. For example, the M.S. could be earned in just one additional year, because six credits of undergraduate courses can also be counted concurrently towards the M.S. degree requirements. Students should discuss this possibility with the Statistics Program Director as soon as they think they may be interested in this program. Also consult the Graduate College catalogue.
The College of Nursing and Health Sciences

The College of Nursing and Health Sciences (CNHS) offers undergraduate and graduate programs in a variety of health care disciplines. The entry-level degree programs prepare the student for initial entry into clinical or laboratory practice and the pursuit of further education. The curricula include rigorous academic preparation and extensive field experience at selected facilities. The graduate programs prepare students for advanced practice in the health care disciplines and to assume leadership roles in practice, education, and research. The faculty of the CNHS is committed to excellence in teaching, the conduct of research that extends knowledge and contributes to the science of each discipline, and public service to improve the health care of citizens of state, national and global communities.

The following entry-level degree programs are offered: Associate Degree program in Dental Hygiene; Bachelor of Science degree programs in Biomedical Technology; Medical Laboratory Science; Nuclear Medicine Technology; Nursing; and Radiation Therapy; and the Master of Physical Therapy degree program. Graduates of the entry-level professional programs are eligible to sit for the appropriate licensure examination and enter practice or otherwise seek employment in the commercial/industrial sector. All of the professional programs needing accreditation and/or state approval for licensure eligibility have achieved and maintain such status. The Radiation Therapy program does not require accreditation and is not accredited at this time.

Non entry-level graduate programs leading to a Master of Science degree include: Biomedical Technology; Movement Science and Rehabilitation; and Nursing (advanced population-focused nursing, adult health nursing, primary care nursing, and an accelerated RN-BS-MS track). The Biomedical Technology program emphasizes biomedical research and applications. Both the Movement Science and Rehabilitation and Nursing graduate programs are designed to enhance the clinical and/or academic background of licensed health care professionals and/or prepare them for advanced practice and research.

More information about the College, its mission and philosophy, faculty, and programs can be found under the appropriate academic program headings on the UVM website (http://www.uvm.edu/) and in the Graduate Catalogue.

ORGANIZATION

The College consists of four departments: Biomedical Technologies; Dental Hygiene; Nursing; and Physical Therapy.

UNDERGRADUATE DEGREE PROGRAMS

Associate in Science degree programs:
Dental Hygiene

Bachelor of Science degree programs:
Biomedical Technology
Medical Laboratory Science

Nuclear Medicine Technology
Nursing
Radiation Therapy

DEGREE REQUIREMENTS

Requirements for admission, retention and graduation are detailed below for each of the undergraduate degree programs. The College of Nursing and Health Sciences reserves the right to require the withdrawal of any student whose academic record, performance, or behavior in the professional programs is judged unsatisfactory. All candidates for admission and continuation must be able to perform the essential clinical as well as academic requirements of CNHS programs. These requirements include: the capacity to observe and communicate; sufficient motor ability to perform physical diagnostic examinations and basic laboratory and clinical procedures; emotional stability to exercise good judgment and to work effectively in stressful situations; and intellectual ability to synthesize data and solve problems. CNHS students must be able to meet these technical standards either with, or without, reasonable accommodations. Some professional licensing examiners, clinical affiliates and/or potential employers may require students and graduates to disclose personal health history, substance abuse history, and/or criminal convictions, which may, under certain conditions, impact eligibility for professional examinations, licensing, clinical affiliation, and/or employment. Some programs have additional clinical requirements such as CPR certification.

RESPONSIBILITIES

There are some special responsibilities associated with clinical education. Students are responsible for their own transportation to and from clinical sites, and where relevant, the costs of housing for clinical experiences. All students must carry professional liability insurance during clinical rotations. The University is not responsible for medical costs resulting from injury during clinical rotation, or during any other curricular activity, unless this injury is due to negligence by the University. The Center for Health and Wellbeing, UVM Student Health, offers a student insurance plan for students who need health insurance.

Applicants to the College’s clinical programs must realize there is always an element of risk through exposure to infectious disease. Faculty and clinical staff make every effort to educate all students in appropriate modes of infection control in order to minimize these risks. Hepatitis B immunization series and a tetanus booster within the last 10 years are required prior to beginning the clinical experience. Additional immunization requirements for nursing students are listed in the Department of Nursing Undergraduate Student Handbook. Immunizations will be available through the Student Health Center for a discounted fee. In our experience, health insurance coverage for immunization varies. If and when coverage is provided, pre-authorization by the insurance provider is usually required.

AREAS OF STUDY

Biomedical Technologies

Programs in the Department of Biomedical Technologies lead to Bachelor of Science degrees in Biomedical Technology, Medical Laboratory Science, Nuclear Medicine Technology, and Radiation Therapy. A core curriculum of approximately 40 credit hours serves students in all four programs. A cross-college minor in Molecular Diagnostics is available within the department. In addition to these undergraduate offerings, a Master of Science degree is offered by
the department. The courses of study for each undergradu-
ate degree program, the Accelerated Master’s Program, and
and the Molecular Diagnostics minor are described below. Gradu-
ates of all four programs are prepared for immediate em-
ployment, as well as to pursue post-baccalaureate education in
the life sciences or professional education in medicine. Courses in
the humanities and basic sciences are taken in the
department and throughout the University, including
the College of Medicine. Requirements for admission are the
same as the general University requirements, with the addi-
tion that applicants must have taken high school biology,
mathematics through trigonometry, and chemistry; physics is
highly recommended.

**Bachelor of Science.** A minimum of 127 semester credit hours
including two credit hours of physical education, an overall
grade-point average of 2.0, and a 2.0 GPA in professional
courses are required for graduation in all four areas of study.

Departmental Honors. A student of at least junior standing
whose minimum grade-point average is 3.0 in professional
and basic science courses is eligible for invitation by the faculty
to participate in the departmental honors program. Students
who accept the invitation will be required to complete one of the
following options: (1) participation in at least two senior
level specialty seminars with completion of an independent reading thesis; (2) completion of an independent research project. Excellent and committed work will be required for a student to be granted Departmental Honors.

**BIOMEDICAL TECHNOLOGY** This four-year curriculum
leading to the baccalaureate degree prepares students for
careers in biomedical research. All students pursuing this
degree option are required to complete an approved cross-
college minor, as well as a research internship. The student’s
major course of study blends basic science course work with
intensive laboratory experiences. Special emphasis is placed
on the application of molecular diagnostics to the health
sciences industry.

**Approved Minors.** Students in the Biomedical Technology
degree program are required to complete a cross-college minor.
Students should contact the department administering
the minor program and fill out the application. If
accepted, the student will be assigned a “minor advisor” from
that department who must approve all program plans and course selections. Students wishing to pursue a minor not
listed should contact their advisor. With permission, stu-
dents may complete a concentration in clinical microbiol-
ogy, hematology or chemistry in place of a minor. The
concentration requirements are available in the depart-
ment. The following have been approved:

**Accounting.** Prerequisites are Economics 11, 12, Math. 19 or
21, Statistics 111 or 141. Requirements are Business Admin-
istration 65 or 60, 61, plus 161, 162, 164, 168.

**Business Administration.** Prerequisites are Economics 11,
12, Math. 19 or 21, Statistics 111 or 141. Requirements are
Business Administration 65 or 60, 61, plus three courses from
120, 132, 141, 150, 173, 180.

**Computer Science.** Requirements are 18 hours in computer
science to include at least nine hours at the 100 level or
above. Note: Careful planning of prerequisite math courses
will be required.

**Consumer Economics.** Requirements are Community De-
velopment and Applied Economics 58, 157, 158, 159, 127 or
155, plus one from 127, 128, 150, 151, 158, 291 or 296. Fifteen
credit hours are required.

**Microbiology.** Requirements are MMG 101, 102, Botany 132
plus six hours from MMG 195, 201, 203, 211, 220, 222, 223,
or 225.

**Molecular Genetics.** Requirements are MMG 101, 102,
211, Botany 132, plus three hours from MMG 195, 201,
203, 223, 225.

**MEDICAL LABORATORY SCIENCE.** This four-year cur-
riculum leading to the baccalaureate degree is accredited by
the National Accrediting Agency for Clinical Laboratory
Sciences.

The clinical laboratory scientist is involved in the develop-
ment, performance, and evaluation of laboratory tests that
lead to assessment of health status, diagnosis of disease, and
monitoring of therapeutic treatment. The clinical labora-
tory experience is obtained at Fletcher Allen Health Care -
Vermont’s Academic Medical Center (FAHC) - and the
Vermont State Health Department Laboratories.

On completion of the baccalaureate program, graduates are
eligible for national certification.
Upon consultation with an advisor, students may follow an individualized curriculum that can lead to certification in one of the clinical laboratory specialties (Microbiology, Chemistry, Hematology, or Immunology).

Cytotechnology Option: The Department of Biomedical Technologies, in cooperation with the School of Cytotechnology at Fletcher Allen Health Care, offers a 3+1 option to the Medical Laboratory Science degree program with specialization in Cytotechnology. Cytotechnology involves the diagnosis of human disease through microscopic study of cells. The primary function of a cytotechnologist is to prepare and evaluate a variety of cellular samples for the presence of cancer and precancerous lesions. The program is accredited by the Committee on Accreditation of Allied Health Education (CAAHEP).

Requirements for admission are the same as those for the Medical Laboratory Science curriculum. Admission to the University does not guarantee acceptance into the FAHC School of Cytotechnology. A separate application process for the senior year is required during the junior year. On completion of the baccalaureate program, graduates are eligible to take the national certification exam. The minimum requirements for the first three years at the University include 20 semester hours of biological science, eight semester hours of chemistry, and three semester hours of mathematics. Students may follow the medical laboratory science curriculum with appropriate substitutions or may satisfy the requirements through other majors. Recommended biological science courses include a combination of the following: general biology, anatomy-physiology, genetics, microbiology, histology, parasitology, cell biology, and embryology.

A minimum of 33 credit hours in the senior year and a total of 127 credit hours are required for the B.S. degree.

NUCLEAR MEDICINE TECHNOLOGY This four-year curriculum leading to the baccalaureate degree is accredited by the Joint Review Committee on Educational Programs in Nuclear Medicine Technology. Nuclear medicine technology is the medical specialty concerned with the use of small amounts of radioactive materials for diagnosis, therapy, and research. Though many other diagnostic techniques are available, nuclear medicine uniquely provides information about both the structure and function of virtually every major organ system.

RADIATION THERAPY
Radiation Therapy is the medical specialty that uses high energy radiations (x-rays, gamma rays, electron beams, etc.) in the treatment of disease. Radiation therapists are responsible for daily treatments, providing support for patients as they cope with their disease, and contributing as vital members of the medical team responsible for the patient’s treatment plan.

Note: The above list of clinical affiliations is subject to change.

Students who already have the Associate in Science degree in Radiation Therapy may apply for transfer into the baccalaureate program. Requirements are a total of 127 credit hours for graduation including approved transfer credits from their Associate degree. Additional required courses for the baccalaureate degree are Chemistry 23 (or 31 and 32), Physics 11 and 12, Allied Health 120, Pathology 101, Biomedical Technology 293, Biomedical Technologies 295, and 12 credit hours of special topics (Biomedical Technologies 299) in the concentration areas of dosimetry, topographical anatomy, patient care, treatment planning, and quality assurance. These independent studies will be coordinated by the student’s advisor.

CROSS-COLLEGE MINOR
The Department of Biomedical Technologies offers a cross-college minor in Molecular Diagnostics. The minor emphasizes the applications of molecular biology techniques to diagnostic testing. The program of study includes 15-16 credit hours of both didactic and laboratory experiences. Prerequisite courses include at least one semester each of general and organic chemistry and two semesters of biology, or anatomy and physiology. Acceptance into the program requires the completion of the prerequisite courses with a GPA of 2.5 or better. An application is required for admission and may be obtained in 302 Rowell Building.

Required Courses: Immunology (BMT 242), Immunology Laboratory (BMT 244), Molecular Applications (BMED 281), Research Concepts (BMED 293), Undergraduate Research (BMED 297); plus 3-4 credit hours from BMT 4, 34, 54, 123, MLS 222, 231, 255.
ACCELERATED MASTER'S PROGRAM. A master’s degree in Biomedical Technology can be earned in a shortened time by careful planning in the junior and senior years at UVM. Students should discuss this possibility with the Department Graduate Program Director as soon as they think they might be interested in this program. For example, the M.S. could be earned in one additional year, as six credits of undergraduate courses may also be counted concurrently towards the M.S. degree requirements.

Applications and further information may be obtained from the Graduate Program Director in the Department. Also consult the Graduate College catalogue for further information.

Dental Hygiene

The Department of Dental Hygiene offers a two-year curriculum leading to an Associate in Science degree and a Certificate in Dental Hygiene.

The program is accredited by the Commission on Dental Accreditation of the American Dental Association. Graduates are eligible to write the National Board Examination in Dental Hygiene. The program meets requirements for licensure determined by most states.

Requirements for admission to Dental Hygiene are the same as for the general University. Applicants are welcome to visit the department to discuss dental hygiene with faculty and students.

The courses of study are designed to give the student a well-rounded foundation in basic sciences, specific knowledge in dental sciences, and an understanding of the humanities. Clinical experience is obtained in the Department’s dental hygiene clinic where patients of all ages present with a variety of clinical problems. Dental hygiene students also have an opportunity to increase their communication skills through oral health education presentations in area schools.

The dental hygiene curriculum is highly structured, and semester course loads are heavy. Students who have the opportunity to complete liberal arts and/or basic science courses prior to entering the program are encouraged to do so. Further guidance can be obtained by calling or writing to the departmental office. First-year Dental Hygiene students should add approximately $1,800 for an instrument kit and clinical attire.

A typical full-time program of studies follows:

A minimum of 71 approved credit hours, including one hour of physical education, and a minimum grade-point average of 2.0 are required for the Associate in Science degree in this curriculum. A grade of C or better is required for all professional courses.

Nursing

The Department of Nursing offers an undergraduate educational program to prepare qualified individuals for the practice of professional nursing and a graduate program for advanced nursing practice. The undergraduate program leads to the Bachelor of Science degree and is approved by the Vermont State Board of Nursing and accredited by the National League for Nursing Accrediting Commission (61 Broadway, 33rd Floor, New York, NY 10006; 800-664-1656, Ext. 153). Graduates of the program are eligible to apply for registered nurse licensure.

**Bachelor of Science:** Applicants must meet the general admission requirements for the University. Financial Aid is available in the form of scholarships, loans, awards, and employment (see section on Financial Aid). A minimum of 127 approved semester hours is required for the Bachelor of Science degree. A grade of C is required in selected cognate nursing prerequisite courses (see Student Handbook for details). A grade of C or better is required in all nursing major courses. A minimum 2.9 overall grade-point average is required for graduation. Full-time and part-time plans of studies are available. Students are encouraged to purchase a personal computer. Specifications for hardware and software requirements may be found in the Nursing Department’s Handbook for Undergraduate Students.

The required courses in the humanities and sciences complement the preparation for nursing as well as contribute to a well-rounded education. Graduates are eligible to apply for licensure as registered nurses and have the foundation for continued formal study in nursing at the master’s and doctoral levels.

The curriculum, conducted in four academic years, provides balance in general and professional education. Courses in the sciences - biological, physical, social, and humanities - serve as a foundation for the nursing courses.

The Bachelor of Science degree with a major in nursing is awarded upon completion of a minimum of 127 credit hours (125 if the student is over 25 years of age) in full or part-time study. The major components of the curriculum are: required non-nursing courses, elective courses, and major nursing courses. Students must successfully achieve:

- 59 credit hours of major nursing courses;
- 56 credit hours of required non-nursing courses (54 if excluding the physical education requirement); and
- 12 credit hours of elective courses.

A three-credit “Race and Culture” course is required prior to graduation.

**BS Program for Registered Nurses:** The program for registered nurses has been designed in light of changes in the health care delivery system and to better serve the registered nurse returning to school. In this program, the Bachelor of Science degree with a major in nursing is awarded upon completion of a minimum of 127 credit hours (125 if the student is over 25 years of age) in full or part-time study. The major components of the curriculum are: required non-nursing courses, elective courses, and major nursing courses. The curriculum plan may vary for each student depending on the type and number of credits transferred to UVM. The focus of the baccalaureate program component is on health and health promotion for individuals, families, groups, and communities; and the factors that influence delivery of health care services. The program is an RN-BS-MS accelerated program, with an option for students to “step out” after completion of the baccalaureate requirements with a B.S. degree. Separate application is required for the graduate program.

The baccalaureate nursing courses are available on-line, through interactive TV, or in a traditional classroom setting and include:

**Transfer to Nursing:** Individuals planning to seek admission to the MPT program are urged to call the School of Nursing (802-656-3830) for more detailed information and to arrange for a personal interview prior to applying for admission.

**Graduate Studies:** Students interested in master’s preparation in nursing may obtain information on admission and curricula in the Graduate Catalogue, available in the offices of the Graduate College.

**Physical Therapy (Master of Physical Therapy)**

The Department of Physical Therapy offers a three-year graduate program, leading to a Master of Physical Therapy (MPT) degree. Prior to entry, a minimum of three to four years of undergraduate study is required (see below). Note that two options are available to students considering entry into the MPT program:

**Postbaccalaureate Option:** Students may opt to complete their baccalaureate degree, making application to the MPT program during their senior year, or sometime thereafter. Postbaccalaureate candidates also are encouraged to apply. For students who choose this option, the total length of post-baccalaureate study in the MPT Program is three years.

**Combined Curriculum (3+3) Option:** For students who meet the criteria, we offer a guaranteed admission program to the Master of Physical Therapy program. Through this program, entering first-year undergraduates are guaranteed a space in the MPT program at the end of three years at UVM, provided they meet certain eligibility requirements. High school students who wish to pursue physical therapy at UVM may begin their college career by selecting from the following undergraduate majors: all 42 majors in the College of Arts and Sciences; and either of two majors, Nutrition and Food Sciences or Biological Science, in the College of Agriculture and Life Sciences. Those students who opt to complete the requirements for their undergraduate major in three years, and who were not initially guaranteed admission may apply to the MPT program during their third year. If admitted to the MPT program, students will begin their first year of graduate study during their fourth year. After successful completion of this first year of graduate study, students will be awarded the baccalaureate degree in their undergraduate major. Thereafter, following successful completion of their second and third years of graduate study, students will be awarded the Master of Physical Therapy. For students who choose this option, the total length of study is six years. For details regarding the MPT program, please see the Graduate College Catalogue, or contact the Department of Physical Therapy, University of Vermont, 305 Rowell Building, Burlington, VT 05405, (802) 656-3252, or www.uvm.edu/~sahs/pt.html.
The School of Business Administration

The mission of the School of Business Administration is to educate Vermont, national, and international students for careers in management, to conduct research that extends knowledge and contributes to the effectiveness of teaching and learning, to forge productive links with business and not-for-profit organizations, and to develop faculty capabilities to interpret and respond to significant changes in management education, research, and practice. In its education, research, and service programs, the School is committed to our special responsibility to serve the citizens of Vermont.

The program integrates forward-looking professional studies with rigorous studies in the liberal arts and sciences by graduating business candidates who

- know how to think critically, learn independently, and search for and integrate new information;
- understand what managers do, how businesses operate, and how markets behave;
- understand how knowledge is created;
- use knowledge, creative abilities, and analytical skills to frame and solve management problems;
- have strong communication skills;
- use information technologies to improve individual and organizational performance;
- have a sense of history, familiarity with great world literature and an understanding of global economic, political and technological developments;
- appreciate the diversity of cultures, values and ideas.

During their first two years, students build the conceptual and analytical base for studying the art and science of management. They partially complete general education requirements and learn required skills for upper level business courses. Students take business field courses and business discipline concentration courses in their junior and senior years.

The School of Business Administration cooperates with the College of Engineering and Mathematics in offering a B.S. in Engineering Management.

The undergraduate and graduate programs offered by the School are accredited by AACSB International: The International Association to advance collegiate schools of business.

The offices of the School of Business Administration are located in Kalkin Hall.

DEGREE PROGRAM

Bachelor of Science in Business Administration – with concentrations in:

- Accounting
- Finance
- Marketing
- Entrepreneurship
- International Management
- Management and the Environment
- Management Information Systems
- Production and Operations
- Human Resource Management

DEGREE REQUIREMENTS

Students must comply with the degree requirements as stated in a single catalogue edition in place during the time they are enrolled. The catalogue to be followed is the one in effect at the time a student enrolls at UVM, unless the student requests in writing to follow a catalogue that is published subsequently during their enrollment at UVM. Students who have a separation from the University of three years or more must meet the requirements of the current catalogue at the date of readmission.

A minimum of 122 approved semester hours is required for the degree of Bachelor of Science in Business Administration. At least 50% of course work must be taken in subjects that are not business or upper level economics. A cumulative grade point average of 2.0 is required. Additional grade requirements exist for basic business core, business field, and business discipline concentration courses.

Students must complete 30 of the last 45 hours of credit in residence at UVM as a matriculated student.

Academic Standards

Students will be placed on trial if their semester or cumulative average is less than 2.0. They will remain on trial until both semester and cumulative averages reach at least a 2.0, or until they are dismissed.

Full-time students are eligible to be dismissed in three situations: (1) failure of at least half of their course credit for any semester; (2) three successive cumulative grade-point averages below a 2.0; (3) two successive semester averages below a 2.0. (For dismissal purposes, part-time students' semester averages are calculated using at least 12 consecutive credits. Also, cumulative grade-point averages will not be considered as a basis for dismissal until at least 12 credit hours have been completed, unless over half of courses attempted are failed.)

A student eligible to be dismissed will be dismissed unless there are circumstances supporting an extension of trial status.

BUSINESS COURSE REQUIREMENTS

Basic Business Core

(24-26) credit hours

To be completed by the end of the sophomore year with a grade-point average of 2.0.

- Math 19 and 20; or Math 21
- Economics 11 and 12
- Statistics 141
- BSAD 40, 60, 61

Business Field Courses

(24 credit hours)

To be completed beginning junior year, with a grade-point average of at least 2.0.

Quantitative Methods, BSAD 129, 132, 141, 150, 173, 180, 191. Students must have junior status and have completed the Basic Business Core before taking Business Field courses.

The Quantitative Methods course is selected from among BSAD 170, 174, 177, 178, 266, 270, 272, or Statistics 131, 195, 201, 221, 223, 224, 225, 231, 253, 257 or 253. BSAD 191 is taken in the senior year.

Business Discipline Concentration

(12) credit hours

To be completed with a grade point average of at least 2.0

The student must complete at least 12 hours in Business Administration courses numbered 100 or above beyond those required for the Business Field courses. One approach is to concentrate these courses in one of the areas of Accounting, Entrepreneurship, Finance, Human Resource Management, Management and the Environment, Management Information Systems, Marketing, International Management, or Productions and Operations Management. Students may also complete a self-designed program.
The specific requirements for each Discipline Concentration are available from the Student Services Office in 218 Kalkin Hall. A faculty member teaching in the discipline of the concentration must approve any exception to these requirements.

**GENERAL EDUCATION REQUIREMENTS**

The General Education Requirement framework is based on six field blocks.

**The Six Fields are:**

1. **Arts and Humanities** – Art, Classics, Film, History, Music, Philosophy, Religion, Theatre.
2. **Writing and Speaking** – English courses in writing and offerings in Speech.
3. **Social Sciences** – Anthropology, Environmental Studies, Geography, Political Science, Psychology, Sociology, Women’s Studies.
5. **Area and International Studies** – African Studies, Asian Studies, Canadian Studies, European Studies, Latin American Studies, Middle East Studies, Russian/East European Studies.
6. **Language and Literature** – Chinese, American Sign Language (in CMSI), English Literature, French, German, World Literature, Greek, Italian, Japanese, Latin, Russian, Spanish.

**Basic General Education Core**

(18-20 credit hours)

Six courses. One from each of the following:

1. United States or Global History from History 9, 10, 11, 12, 19, or 68.
2. English course that emphasizes practice in writing from English 1, 50, 53, 120.
3. Social Science from any discipline in field 3 above.
4. Natural Science that includes a laboratory or field experience from Astronomy 5 and 23, 5 and 24; Biology 1, 2; Botany 4; Chemistry 20, 23, 31, 35; Geology 1, 4, 55; Natural Resources 1; Physics 11 and 21, 31 and 21.
5. Area and International Studies from any discipline in field 5 above.
6. Language or Literature from any discipline in field 6 above.

Cross-listed courses may count for only one Basic General Education Core requirement.

**General Education Field Concentration**

(at least 12 credit hours)

Students must complete at least 12 credits in any one of the six general fields listed above. They may take any combination of courses within the field. For example, in the Social Sciences field, two Political Science courses, a Sociology course and a Women’s Studies course might make up the field concentration.

One course from the Basic General Education Core may be used as one of the General Education Field Concentration courses.

History of Science (HST 85, 86) can count toward General Education Field Concentrations in either field 1 or field 4.

**General Education Discipline Concentration**

(at least 12 credit hours)

Students must accumulate 12 credits in a single discipline. The discipline may not be in the field chosen for the general education field concentration. Community Development & Applied Economics, and ECON, may not be chosen as the discipline concentration.

Disciplines are specific academic areas, not broad fields. For example, Religion is a discipline in field 1. If Religion is chosen, there is no restriction on course level.

The student may not include Philosophy and Art classes, even though they are in the same field.

One course from the Basic General Education Core may be used as one of the General Education Discipline Concentration.

As a general rule, two discipline concentration courses must be numbered 100 or higher. Exceptions: (1) if a language is chosen, at least one course must be numbered 51 or higher; (2) if Mathematics or Computer Science is chosen, at least two courses must be numbered 21 or higher; (3) if a Natural Science is chosen, there is no restriction on course level.

Caution: In some disciplines, there may not be sufficient courses or space in courses for a discipline concentration to be an option. Currently these include, but may not be limited to, Speech, Studio Art, and American Sign Language. Check with the department if there are any questions.

Students may submit a petition to the Undergraduate Studies Committee to seek approval on an exception basis to pursue a self-designed General Education Discipline Concentration. The petition should provide a rationale for the combination of courses proposed. Submit petition in 101 Kalkin Hall.

**Race Relations and Ethnic Diversity in the U.S.** (3 credit hours)

One three-credit course that addresses the question of race relations and ethnic diversity in the U.S. Courses that fill this requirement are approved by the College of Arts and Sciences. The course selected to satisfy this requirement may also be used to fulfill another general education requirement. Otherwise, an elective course must be used to meet the requirement.

**Physical Education** (2 credit hours)

All students are required to complete two credits in Physical Education Activities. No more than two credits will count toward the 122 hours required for graduation. Students who enter the University at age 25 or older may waive the two credits of PEAC.

**Electives**

**General Education Electives**

Students will take additional courses in subjects so that at least half of their course work is outside of Business Administration and Upper-level (100 level or above) Economics.

**Other Electives**

Students take additional electives, either inside or outside of Business to achieve the total 122 credit hours required for their degree.

**Restrictions on Electives**

1. No credit will be granted for a course that is assumed prerequisite knowledge for a course previously completed.
2. No credit will be granted for a course that substantially duplicates material in courses offered in Business Administration or in other previously completed courses.
3. No credit will be granted for Physical Education credits beyond the two credits that are required.

**COURSE OF STUDY**

Here is one illustrative schedule for the program.

(Number shown are credit hours.)

General Education or Electives 6 6

SENIOR YEAR

Business Discipline Concentration Courses 6 6
General Education or Electives 9 6
BSAD 191, Business Policy 3 3

SPECIAL PROGRAMS

Professional Accounting Program

Students planning to sit for the CPA examination should complete the Professional Accounting Program: BSAD 17, 18, 161, 162, 164, 168, 266, 267. Completion of the Professional Accounting Program satisfies the Business Discipline Concentration requirement. BSAD 286 may be used to satisfy both the Quantitative Methods requirement and the Professional Accounting Program requirement.

Completion of the professional accounting program fulfills the academic requirements to sit for the CPA examination in the State of Vermont. The requirements to sit for the CPA examination vary among states, therefore students who plan to sit for the examination in a state other than Vermont are advised to contact the state’s Board of Accountancy to obtain current requirements. (See http://www.aicpa.org for addresses and additional information).

International Management

Students interested in International Management are expected to spend the spring semester of their junior year studying abroad.

The University has formal arrangements with universities in Grenoble, France, and Vienna, Austria. Courses are taught in English.

It is also possible for students to spend a semester at other international universities. International Management students need to complete BSAD 120, 150, and 180 before going abroad.

Preprofessional Work Programs

Students are encouraged to participate in preprofessional work opportunities. These opportunities include internships and cooperative education (CO-OP) programs. For both of these programs students must first successfully complete the Basic Business Core.

Cooperative Education

CO-OP opportunities are coordinated and supervised through Career Services. If a full-time CO-OP work experience is done during a regular semester, students will need to take classes in a summer session.

Internships

Internships may involve part-time work during the academic year, or summer work. The time required of an internship and whether or not it is a paid experience depends on the employer.

Credit may be available for demonstrated academic learning in relation to a preprofessional work experience. A faculty member in each area of business will be designated each semester to work with students and grade the written assignments. To enroll for credit, students must have a minimum of junior standing, completion of Basic Business Core, a related Business Field Course with a grade of B, and a cumulative grade-point average of 3.0. If these requirements are met, students should talk with the assigned faculty member in their field of study to discuss the written assignments required for credit and to obtain approval. Once the internship is approved, students must enroll in BSAD 194 to receive internship credit. Business students may not earn Business practicum or internship credit through other academic units.

MINORS

Students Majoring in Business

Students majoring in Business Administration are not required to have a minor to meet degree requirements; however, a business student may choose to have a minor outside of Business. The department issuing the minor sets the requirements and determines if the student is eligible to minor in their program. The student must contact the appropriate department to obtain more information.

Non-Business Students

Two different minors are available in the School of Business Administration for non-business majors: Business or Accounting. An application is required and may be obtained at the Student Services Office, 218 Kalkin Hall. Acceptance into the minor program requires completion of the prerequisite courses with a GPA of 2.0 or better in these courses. Admission may be more restrictive if applications exceed the capacity of the program.

Prerequisites: Economics 11, Economics 12, Mathematics 13, 19 or 21, Statistics 111 or 141. Students must have basic microcomputer literacy, including a working knowledge of word processing and spreadsheet software. Students lacking this basic knowledge are responsible for attaining it through course work, self study, tutorials, or workshops.

Business Minor Requirements:

Accounting: BSAD 60 and 61 or BSAD 65.

Other Business requirements: Three business field courses (numbered 100–299), at least one of which must be from the following list: BSAD 120, 132, 141, 150, 173, or 180.

One year MBA opportunity: A student minoring in Business Administration may complete an MBA at UVM in one year after earning a bachelor's degree if: (1) BSAD 60 and 61 are completed; (2) three of BSAD 120, 132, 150, 173, and 180 are selected to meet the minor requirement; (3) the other two courses on this list are taken as electives; and (4) the student applies and is admitted to the MBA program under regular criteria.

Accounting Minor Requirements:

Introductory Accounting: BSAD 60 and 61 or BSAD 65. Students must earn at least a 2.0 in each introductory accounting course taken to continue with an accounting minor. If a 2.0 is not achieved, a student may switch to a general Business Minor.

Upper Level Accounting Requirements: BSAD 161, 162, 164, and 168. A student must earn a 2.0 average in these four courses to earn an accounting minor.

TRANSFER TO BUSINESS ADMINISTRATION

Students planning to transfer to the School of Business Administration from another college or school on campus must comply with the Intercollege Transfer policy. Applications may be obtained in the Student Services Office at 101 Kalkin Hall.
The School of Natural Resources

In the School of Natural Resources, excitement for discovery and a commitment to life-long learning are central. Our emphasis on the integration of natural science and cultural perspectives reflects the interdisciplinary context in which ecosystem management, resource planning, and environmental concerns must be addressed. We believe that there is a strong interplay between teaching and scholarship and that each is vital to the other.

The School of Natural Resources seeks to cultivate an appreciation and enhanced understanding of ecological and social processes and values aimed at maintaining the integrity of natural systems and achieving a sustainable human community. We pursue this goal by generating and broadly disseminating knowledge and by challenging students, colleagues, and citizens to acquire knowledge, skills, and values to become innovative, environmentally responsible, and accountable leaders.

We are actively committed to diversity - biodiversity in natural communities and cultural diversity in human communities. Individual and professional responsibility, as well as scholastic excellence, are emphasized within the School’s supportive atmosphere. Faculty members are conscientious advisors, and students communicate frequently with them for guidance in clarifying educational, career, and personal goals. While these programs prepare students for a variety of positions in natural resources and the environment, graduates are also well prepared to pursue careers or advanced study in other professions.

The Office of the Dean of the School is located in the George D. Aiken Center for Natural Resources.

DEGREE PROGRAMS AND OPTIONS

The Bachelor of Science degree is awarded for the following programs:

- Environmental Sciences
  - Agriculture and the Environment
  - Conservation Biology and Biodiversity
  - Ecological Design
  - Environmental Analysis and Assessment
  - Environmental Resources
- Water Resources
- Environmental Studies
- Forestry
- Natural Resources
- Resource Planning
- Resource Ecology
- Integrated Natural Resources
- Recreation Management
  - Private Outdoor Recreation and Tourism
  - Public Outdoor Recreation
- Wildlife and Fisheries Biology
  - Fisheries Biology
  - Wildlife Biology

Undecided: Students interested in studying the environment and natural resources, but who wish to postpone their decision on a specific major, enroll in Undecided-Natural-Resources.

Honors Program and Aiken Scholars

The SNR Honors Program is a two- or three-year experience that students are invited to join based on their academic performance at the University. Selection is based on either achievement of Dean’s List for two semesters and a minimum cumulative GPA of 3.2 or nomination by a faculty sponsor. At minimum, SNR Honors students participate in one Honors seminar course during the spring semester of their sophomore year, enroll in a research methods course in the junior year, and conduct an independent or team research project under the guidance of a faculty member during their senior year. Their projects provide valuable experience in designing, implementing, and reporting results of research.

Aiken Scholars: Students with outstanding high school records are admitted to the School of Natural Resources as Lola Aiken Scholars and invited to participate in a special fall seminar open to Aiken Scholars only. Those who then achieve Dean’s List for fall semester are automatically nominated by the dean for the SNR Honors Program.

Internships and Cooperative Education

Experiential learning is encouraged. The School offers students assistance in securing summer, part-time, and permanent employment in natural resources fields. Well-developed internship and cooperative education programs award academic credit for contracted work experiences. These opportunities to explore and confirm career interests, to develop professional contacts and exposure, give graduates a competitive edge when they enter the job market.

Travel Courses and Field Studies

The School of Natural Resources relies heavily on Vermont’s natural landscapes - its mountains, lakes, fields, and forests - to provide students hands-on experience studying ecology and ecosystem processes. In addition, SNR offers a variety of intensive field courses during vacation breaks and summer session that provide students the opportunity to study the ecology of the Great Smoky Mountains and coastal plain of the southeastern U.S. (FOR 126), wildlife of Florida or south Texas (WFB 176/177), environmental research in the Chesapeake Bay region (ENS 25), ecotourism and environmental interpretation in Costa Rica or Sub-Saharan Africa (RM 188), regional examples of sustainable forest management and practices (FOR 185) and the aquatic ecology of large lakes (NR 255) from the deck of the Melosira, UVM’s research vessel.

Accelerated Master’s Program

This program affords Forestry students interested in Public Forest Administration the opportunity to obtain both an undergraduate B.S. degree in Forestry and a Master’s in Public Administration degree in a total of five years, rather than the traditional six-year minimum. Further information is available from the offices of the Forestry Program and the MPA Program.

DEGREE REQUIREMENTS

Students must be matriculated in the School of Natural Resources and in residence at The University of Vermont during the period in which they earn 30 of the last 45 hours of academic credit applied toward the degree.

Students must earn a cumulative grade-point average of 2.0 or above.
Students must complete a program of study which includes:
1. SNR core curriculum.
2. SNR general education courses.
3. SNR major requirements.
4. University requirement in Physical Education Activities (two credits).

**SNR CORE CURRICULUM**

SNR’s core curriculum provides a common environmental and natural resources experience for all students. The innovative seven-course sequence creates an integrated foundation upon which the individual majors in the School are constructed. Core courses focus on the underlying fundamentals from which natural resources disciplines have evolved and the application of these fundamentals to problems or issues in the natural world and society. The core courses also promote development of thinking, communications, problem solving, and analytical skills. Faculty from all undergraduate programs teach in the core.

The SNR core curriculum represents a body of knowledge, skills, and values that the faculty believe is central to the study of natural resources and the environment. Seven courses are required:

NR 1 and NR 2 provide an introduction to the study of natural resources and the environment from natural and social science standpoints, respectively. At the completion of these courses, students should (1) have a basic understanding of the School’s integrated approach to natural resources and the environment, (2) be better prepared to make informed decisions about their academic majors, and (3) be prepared to advance to an intermediate level of study in natural resources. The intermediate courses in the sequence, NR 103 and NR 104, emphasize ecosystems and social systems, respectively. They are linked through a one-credit interdisciplinary problem analysis module, NR 105. The last two courses focus directly on integrated and holistic management. In NR 205, students integrate natural and social science to understand environmental management principles and policies. In NR 206, the capstone course taken senior year, students are challenged to synthesize and apply the interdisciplinary knowledge, skills, and values they have learned to contemporary natural resources and environmental issues.

**GENERAL EDUCATION COURSES**

SNR general education requirements are designed to enhance a student’s ability to assimilate and analyze information, think and communicate clearly, and respect multiple perspectives. These requirements are flexible in order to encourage creativity in meeting educational goals. Two sets of courses are stipulated:

**Five courses in required areas:**

1. Writing - English 1, 50, or 53
2. Speaking - Speech 11, Theatre 5, AGRI 183, or NR 185 (Speaking & Listening)
3. Race and Culture - NR 6 or EDSS 11
4. Mathematics - Math. 9 or higher (but not Math. 17)
   *Choice varies depending on major.
5. Statistics - NR 140, Statistics 111, 141, or 211
   *Choice varies depending on major.

**Three courses in a self-design sequence:**

Each student defines a personal learning objective and selects at least 9 credits from departments outside SNR to meet that objective. This sequence of courses must be approved in advance*.

*Before completion of four semesters or 60 credit hours; time-frame may be extended for transfer students.

**MAJOR REQUIREMENTS**

**Environmental Sciences**

The Environmental Sciences major provides students with the fundamental knowledge and hands-on experience to identify, analyze, and solve “real world” environmental problems arising from human activities.

A total of 122 credits are required for the degree. Required courses: BIOL 1, 2; CHEM 31, 32; **CHEM 42; GEOL 55 or PSS 161; *MATH 19, 20 (or 13, 14); *NR 140 or STAT 141; ENSC 1, 101, 130, 201, 202; 14 credits in one of the following advising tracks - Water Resources, Environmental Analysis and Assessment, Ecological Design, Agriculture and the Environment, Conservation Biology and Biodiversity, or Environmental Resources. Students may also elect a self-designed track in a particular area of interest.

**Environmental Studies**

Environmental Studies is an interdisciplinary major which combines required core courses with a self-designed program of study chosen to meet individual learning goals. The Environmental Studies core courses include perspectives of the sciences, social sciences, and humanities in local, national, and global contexts.

A total of 122 credits are required for the degree. Required courses: ENVS 1, 2, 151, 201, 202; 30 hours of approved environmentally-related courses* at the 100 or 200 level, including three hours at the 200 level, with at least one course in each of four areas - natural sciences, humanities, social sciences, and international studies (may be fulfilled by a study abroad experience).

**Forestry**

The Forestry major provides students with an education in ecologically responsible forestry, emphasizing the complex landscapes of the northeastern United States. Students develop their abilities to coordinate and manage all aspects of sustainable forestry through an education that combines a strong foundation in natural and social sciences with hands-on field-based classes, internships, research experiences, and forest management projects. The curriculum is integrative, technologically current, science-based, and is accredited by the Society of American Foresters.

Students supplement a core of required Forestry and related courses with a student-proposed, faculty-approved area of concentration** such as forest ecosystem health, forest ecology, consulting forestry, public forest administration,
or international development. The concentration represents at least 12 credit hours and may be self-designed, an appropriate University minor, or a natural resource oriented study abroad experience.

A total of 126 credits are required for the degree.

Required courses: BOT 4; CHEM 25; *MATH 18; NR 25, *140, 224; PSS 161; FOR 21, 73, 81; 121, 122, 158, 182, 223, 272; a course in forest health; **; 12 additional credits in area of concentration.

• Must be endorsed by the student's advisor and approved by the Forestry faculty prior to the last four semesters of study.
• At least 12 credits are to be at the 100-level or higher.
• Transfer students with 45 or more credit hours are exempt from FOR 81.

* Also fulfills SNR general education requirement.

** Field intensive course offered only during the summer session.

Natural Resources – Resource Planning

The Resource Planning curriculum provides fundamental understandings of interactions among individuals, communities, and society with nature, resources, and the environment. It allows students to select courses around specific individual interests such as natural resource planning and community, policy and economic dimensions of resource planning, and international dimensions of resource planning.

A total of 122 credits are required for the degree.

Required courses: PSYC 1; CDAE 2; POLS 21 or 41; SOCI 1 or 11; PHIL 4 or CDAE 156; ANTH 21 or GEOG 1; EC 12 or CDAE 61. 27 additional credits in Option Electives to be chosen from approved list in consultation with student’s academic advisor. Any course substitution request must be approved prior to the end of the add/drop period for the semester in which the student enrolls in the substitute course.

Natural Resources – Resource Ecology

The Resource Ecology curriculum explores the biology and ecology of plants and animals in both aquatic and terrestrial systems and allows students to select courses around specific individual interests.

A total of 122 credits are required for the degree.

Required courses: BIOL 1, 2; GEOL 1 or PSS 161; *MATH 13 or 19; *NR 140; CHEM 23 or CHEM 31, 32; CHEM 26 or CHEM 42 or CHEM 141,142; NR 25; NR 143 or FOR 146; PHYS 11 or 31; 24 additional credits in Option Electives to be chosen from approved list in consultation with student’s academic advisor. Any course substitution request must be approved prior to the end of the add/drop period for the semester in which the student enrolls in the substitute course.

* Also fulfills SNR general education requirement.

Natural Resources – Integrated

Integrated Natural Resources (INR) is a self-designed major. INR is the right choice for students who have strong interests in natural resources and the environment, clear academic direction, and the motivation to develop a well-focused, personally meaningful course of study. Working closely with a faculty advisor, the student builds on a solid foundation of natural resources courses to create an individualized program that combines course work from disciplines within and outside the School.

A total of 122 credits are required for the degree.

Required courses (minimum nine credits): Students elect from a list of approved courses at least one course in each of three areas - biology/ecology; NR courses in social sciences and communications; and quantitative and analytical methods. These courses are in addition to those taken to fulfill SNR general education requirements.

Individualized Program of Study Option (minimum 39 credits); The student develops an individualized Program of Study composed primarily of intermediate-level School of Natural Resources courses (ENVS, ENSC, FOR, NR, RM or WFB prefixes). This may include no more than 15 credits outside the School and no more than 6 credits below the 100-level. With careful selection of courses, students develop concentrations such as Solid Waste Management, Environmental Education, Resource Management, Resource Planning, Resource Conservation, International Resource Issues, and Resource Spatial Analysis. All programs of study must be endorsed by the advisor, then approved by the faculty. If not approved, the student may not continue in the INR option and must seek another major. The program of study is to be completed by the end of the sophomore year (60 credits). Transfer students with more than 60 credits must have a program of study approved as part of the transfer application. It is expected that transfer students will be active in the program for at least two years (four semesters) after transferring into the INR option. Any course substitution request must be approved prior to the end of the add/drop period for the semester in which the student enrolls in the substitute course.

Recreation Management

The Recreation Management major integrates the study of environmentally based tourism and hands-on management of outdoor recreation resources. Students may major in Public Outdoor Recreation or Private Outdoor Recreation and Tourism. Public recreation resources include parks, forests, wilderness areas, and other outdoor recreation environments at the local, regional, state, and federal government levels. Private resources include ski areas, campgrounds, resorts, and other natural resource-based recreation facilities. The program permits specialization in several types of private recreation businesses, including ski resorts.

A total of 126 credits are required for the degree.

Courses required for all Recreation Management majors:

• One course in humanities (History, Philosophy, Religion, Classics)
• One course in communications (Art, Music, Theater, Art History, foreign language, English literature)
• One course in social sciences (Anthropology, Economics, Geography, Political Science, Psychology, Sociology)
• One laboratory course in natural sciences (Biology, Physics, Chemistry, Botany, Zoology, Geology)

Private Outdoor Recreation and Tourism option: Required courses: RM 1, 50, 157, 158, 191, 230, 258; three courses selected from RM 138, 153, 235, 240, 255; and nine additional credits of professional electives to be chosen from approved list.

Public Outdoor Recreation option: Required courses: RM 1, 138, 153, 191, 235, 240, 255; three courses selected from RM 50, 157, 158, 230, 258; and nine additional credits of professional electives to be chosen from approved list.

Wildlife and Fisheries Biology

The areas of wildlife biology and fisheries biology deal with the management and conservation of animal populations that range from species that are common enough to be hunted/fished to species that are endangered. Management
strategies may include manipulation of populations directly or indirectly through alteration of habitat. Courses emphasize applied ecology and provide hands-on experience in labs and field trips. All Wildlife and Fisheries Biology majors complete the same core of courses during the first year. As sophomores, students elect either the Wildlife Biology or the Fisheries Biology option. Required courses in the major satisfy educational requirements of the U.S. Office of Personnel Management for entry-level positions in these fields.

A total of 122 credits are required for the degree.

Courses required for all majors: *MATH 13, 19, or 21; *NR 140; BIOL 1, 2; CHEM 23; CHEM 26 or 42; BIOL 101 or BOT 132; NR 25; FOR 121; GEOL 1 or PSS 161; WFB 161, 174.

Wildlife Biology option: Required courses: FOR 21; WFB 130, 131**, 150**; BOT 109; BIOL 217; three courses (one must have a lab) selected from NR 224; WFB 271/272, 273/274, 275, or 279.

Fisheries Biology option: Required courses: PHYS 11/21 or 12/22 or PHYS 96, Green Mountain Physics; WFB 232; NR 250/251; NR 260/WFB 272; NR 270 or WFB 279; six additional hours selected from NR 270, NR 280, BIOL 264, BOT 234, WFB 271, WFB 279, WFB 286.

* Also fulfills SNR general education requirement.
** Field intensive courses offered only during the summer session.

MINOR REQUIREMENTS

The Bachelor of Science degree in Natural Resources does not require completion of a minor. However, many students in the School of Natural Resources do complete minors, either within the School or in other departments across campus. Interested students should contact the chair of the minor program or department.

Environmental Studies: The minor requires 17 credit hours of Environmental Studies courses consisting of 1, 2, and nine hours at the 100-level or above, including three hours at the 200-level. Of the nine hours, one non-ENVS course at the appropriate level may be substituted with approval of the student’s advisor and the Environmental Program.

Forestry: Applications for the minor must be filed no later than June 1 of the year preceding graduation. A minimum of 16 credit hours is required, with at least nine at the 100-level or higher.

Required courses: FOR 1* or 73; FOR 21; additional FOR courses to total 16 credits.

*Students in the School of Natural Resources may not count FOR 1 towards completion of a Forestry minor.

Recreation Management: The minor requires a planned course of study which will provide a substantive introduction into the field of recreation management. Interested students should contact the Program Chair. A total of 15 credit hours are required. A minimum of nine credits are to be selected from RM 1, 50, 138, 153, 157, 158, 181. A minimum of six credits are to be selected from RM 230, 235, 240, 255, 258, 282.

Wildlife Biology: Applications for the minor must be filed no later than June 1 of the year preceding graduation or of the completion of the requirements for the minor. A minimum of 15 credit hours is required in prescribed and elective courses. Required courses: WFB 130, WFB 174; WFB 271 or 273. Elective courses: WFB 131, 150, 176, 185/186, 187/188, 272, 273, 274, 275, 279, 285/286, 287/288; NR 224.

Courses of Instruction

The University reserves the right to change course offerings at any time.

The departments and areas of instruction are arranged alphabetically, and the college/school in which each is located is indicated.

A student who lacks the stated prerequisites for a course may be permitted to enroll by the instructor. Such students must inform the instructor that they lack the prerequisites, and the instructor will make appropriate efforts to ascertain that they are properly qualified.

Courses are divided into three levels: introductory, intermediate, and advanced. Where appropriate, a department may limit enrollment in a particular course. Such limitations, other than class size, must be explicitly stated.

Courses numbered from 1-99 are introductory courses. Introductory courses emphasize basic concepts of the discipline. In general, they presuppose no previous college work in the subject. The only exceptions to this rule are those cases in which there is a two-semester introductory sequence. In such cases, the second semester course may have the first semester course as a prerequisite.

Courses numbered from 100-199 are intermediate courses. An intermediate course covers more advanced material than that treated in introductory courses. Students will be expected to be familiar with the basic concepts of the subject and the course will present more difficult ideas. Intermediate courses will generally be more specialized than introductory courses. An intermediate course will always have a minimum prerequisite of three hours prior study in the discipline or in another specified discipline.

Courses numbered from 200-299 are advanced courses. An advanced course presents concepts, results, or arguments which are only accessible to students who have taken courses in the discipline (or, occasionally, in a related discipline) at the introductory and intermediate levels. Prior acquaintance with the basic concepts of the subject and with some special areas of the subject will be assumed. An advanced course will always have a minimum prerequisite of three hours prior study at the intermediate level in the discipline, or in a related discipline, or some specified equivalent preparation.

Some, but not all, 200-level courses carry graduate credit. Graduate students must refer to the UVM Graduate Catalogue which lists all courses carrying graduate credit. Seniors who wish to take a course for graduate credit must receive permission through the office of their dean prior to enrolling in the course.

Some departments make further subdivisions of courses at some levels. Where this applies, an explanation can be found at the beginning of the department’s list of courses.

Two numerals separated by a comma (as in 17, 18) indicate that the separate semester courses may be taken independently for credit. Two numerals separated by a hyphen (as in 17-18) indicate that the semester courses may not be taken independently for credit, and, unless otherwise stated, they must be taken in the sequence indicated. In cases where two numerals are separated either by a comma or by a hyphen, the odd-numbered course will be taught in the fall and the even-numbered course in the spring.

The number of credit hours per semester is stated in each course description. For some courses, the course title is followed by a pair of numerals connected by a hyphen and enclosed in parentheses as in (2-3); this form indicates the number of class hours respectively of lecture and laboratory.

African Studies

COLLEGE OF ARTS AND SCIENCES
Prof. Gordon, Director

See Area and International Studies for special topics course listings.

Agriculture (AGRI)

COLLEGE OF AGRICULTURE AND LIFE SCIENCES
85 Computer Applications in Agriculture and Life Sciences
Use of computer operating systems, programming languages, electronic communications, word processing, spreadsheet modeling and graphics, and internet software related to the agricultural and life sciences. Three hours.

95 Introductory Special Topics One to three hours.

125 Teaching Assistant Development TA’s develop skills in areas of leadership, group dynamics, interpersonal effectiveness, and assertiveness as group facilitators in Beginnings course. Prerequisite: Sophomore standing, permission. Three hours.

183 Communication Methods Introduction to informational and persuasive public speaking. Developing individual and group oral communication skills through giving and critically analyzing presentations. Three hours.

195 New Beginnings Introduction to campus resources, identification of students’ interests, goals, skills, and values to provide better understanding of themselves and become acquainted to college life. Integration of computer technology and oral communication with orientation. Required for all first-year students in CALS. Three hours.

195,196 Special Topics Appropriate for interdepartmental and interdisciplinary topics in Agriculture and Life Sciences. Permission of Dean’s Office. Credit as arranged.

ALANA Studies (ALAN)

COLLEGE OF ARTS AND SCIENCES
Prof. Donald A. Grinde; Associate Professor Willi Coleman, Chairperson; Assistant Professors Bernard, Gennari.

(ALANA: African, Latino, Asian, Native American.)

51 Introduction to ALANA Studies Survey of the experience of ALANA peoples in the U.S. as well as a theoretical analysis of issues of race, culture, gender, and diverse traditions in the American multicultural setting. Three hours.

55 Racism and American Culture Survey and analysis of racism in the development of American institutions and its effects upon ALANA groups and societies. Three hours.

95, 96 Introductory Special Topics See Schedule of Courses for specific titles. Three hours.

158 American Multicultural Heritage History and culture of ALANA groups, their role in and contributions to the American cultural heritage. Prerequisite: 51 or 35 or having
previously satisfied the College of Arts and Sciences Race and Ethnicity requirement. Three hours.

159 American Cultural Images of ALANA Peoples
Comparative study of ALANA groups and the stereotypical and archetypal impressions projected on peoples of color in American society. Prerequisite: 51 or 55 or having previously satisfied the College of Arts and Sciences Race and Ethnicity requirement. Three hours.

191, 192 Field Experience, Internship
Prerequisites: Junior standing, six hours of 100-level courses in appropriate field and program permission (a contract must be obtained from and returned to the ALANA Studies program during preregistration). Three hours.

195, 196 Intermediate Special Topics
Intermediate courses or seminars beyond the scope of existing ALANA offerings. See Schedule of Courses for specific titles. Prerequisite: Sophomore standing. Three hours.

269 Cross-Cultural Psychology: A Clinical Perspective
(Same as PSYC 269) Introduction to issues posed for psychologists in their work with ALANA (African, Latino/a, Native and Asian American) and international populations. Critical appraisal of readings, research and case studies. Prerequisites: PSYC 1, 109. Three hours.

277 Seminar in ALANA Studies
Interdisciplinary examination of theories on the position of ALANA peoples in U.S. culture and society. Emphasis on relationship between race, class, gender, and ethnicity. Prerequisite: Six hours in ALANA Studies; admission to ALANA Studies minor program. Three hours. (Not offered for graduate credit.)

295, 296 Advanced Special Topics
Advanced courses or seminars on topics beyond the scope of existing departments. See Schedule of Courses for specific titles. Prerequisite: Junior standing. Three hours. (Not offered for graduate credit.)

297, 298 Independent Study in ALANA Studies
Special topics in consultation with ALANA Studies faculty. Prerequisites: Permission of program director; junior standing. Three hours. (Not offered for graduate credit.)

Anatomy and Neurobiology (ANPS; ANNB)

COLLEGE OF MEDICINE
Professors Eckenstein, Forehand, Maue, May, Nishi, Parsons (Chairperson); Associate Professors C. Cornbrooks, Fiekers, Jaworski, Vizzard; Research Assistant Professor Braas, Rand; Research Associate: White; Lecturers E. Cornbrooks, Ezerman, Fonda, Salo, Wright.

19-20 Undergraduate Human Anatomy and Physiology (3-3)
Two-semester course with credit given only upon completion of both semesters. Structure and function of human body using cadaver dissections, histological material, and physiological experiments. Required of all Medical Lab Science, Nursing, Nutritional Sciences, Dental Hygiene, Radiation Therapy, Nuclear Medicine Technology, and Physical Education students; others with instructor’s permission. Prerequisite: 19 for 20. Four hours.

197, 198 Undergraduate Research
Individual laboratory research under guidance of faculty member. Prerequisite: Departmental permission. Three or six hours.

201 Human Gross Anatomy (3-6)
Lectures and detailed regional dissections emphasize functional anatomy of major systems (e.g. musculoskeletal, cardiovascular, nervous). Required of Physical Therapy students; others with departmental permission. Five hours.

202 Human Neuroscience (6-6, March-May)
Structural basis of human nervous system function: spinal reflex organization, sensory and motor systems, clinical examples, brain dissection, cell biology of neurons and glia, membrane excitability, and synaptic transmission. Required of Physical Therapy students; others with departmental permission. Five hours. Undergraduate/Graduate credit.

261 Neurobiology (Same as BIOL 261)
Focus on molecular and cellular aspects of the nervous system. Electrical signaling, synaptic transmission, signal transduction, neural development, plasticity and diseases. Prerequisites: BIOL 105 or ANPS 19 & 20. Three hours. Undergraduate/graduate credit.

Animal Science (ASCI)

COLLEGE OF AGRICULTURE AND LIFE SCIENCES

Professors Bramley, Carver; Associate Professors Gilmore, Greene, McFadden, Nichols, Plant (Chairperson); Assistant Professors Hsueh, Kerr, Knapp, Smith, Zhou; Lecturers Davis; Research Associate Barlow; Adjunct Professors Swinnen, Thomas; Extension Instructor Delaney; Adjunct Assistant Professors Ballard, Kelleman, Koch, Levine; Adjunct Instructors Paradis, Ross, Shaw-Bloom.

1 Introductory Animal Sciences (3-3)
An overview of the genetics, nutrition, reproduction, and management of livestock and recreation species; introduction to animal behavior, animal disease, and biotechnology. Four hours.

4 Dairy Cattle Judging (2)
Principles of dairy cattle judging demonstrated and practiced using live animals. Two hours.

6 Introduction to Companion Animal Care and Management (3)
Scientific principles of nutrition, breeding, and selection, health, management practices, pet therapy, and animal bonding. Primary emphasis on cat and dog. Three hours.

43 Fundamentals of Nutrition I, II
Comprehensive study of specific nutrients in terms of their availability, function, and utilization in mammalian species. Prerequisites: High school chemistry and biology. Three hours.

110 Animal Nutrition, Metabolism, and Feeding (3-3)
Principles of meeting the nutrient requirements of animals, especially as they relate to the practical problems of formulation and production systems. Prerequisite: 43. Four hours.

113 Livestock Production (2-3)
Organization and operation of livestock enterprises. Theory and application of feeding and breeding and management programs and principles. Prerequisite: 110. Three hours.

115 Introduction to Equine Studies (3-3)
Overview of the scientific and practical application of equine management and selection principles. Housing, nutrition, herd health, reproduction, and career opportunities. Four hours.

117 Horse Health and Disease (3)
Discusses the basic anatomy and physiology of the horse, common equine diseases and problems, their diagnoses, prevention, and treatment. Prerequisites: 1, a biology course or instructor permission. Three hours.

118 Animal Health (3)
A study of small and large domestic animal diseases. Natural response to disease, methods of diagnosis, control, and treatment. Prerequisites 1, a biology course or instructor permission. Three hours.

119 Equine Training Techniques
Behavior modification and training of the young horse under saddle and in the cart. Introduction to interdisciplinary directions open to the equine athlete and to conditioning programs associated with these options. Three hours.

121 Equus
A hands-on equine management experience. Students perform horse duties, recordkeeping, and make financial and management decisions on a horseboarding
operation. Prerequisites: Sophomore standing; instructor permission. Two-four hours.

122 Animals in Society/Animal Welfare (3) Designed to heighten awareness and understanding of human-animal relationships in society, agriculture, and science. Prerequisite: Sophomore standing. Three hours.

134–135 CREAM (Co-operative for Real Education in Agricultural Management) A two-semester course in which students perform the work and make the financial and management decisions associated with the CREAM dairy herd. Prerequisites: Sophomore preferred; Sophomore/Junior standing; instructor permission. Eight hours.

141 Anatomy and Physiology of Domestic Animals (3–3) A comprehensive review of the structure and function of domestic animals, emphasizing those of economic importance. Differences between mammalian and avian species are discussed. Prerequisites: Biology 1, a chemistry course or instructor permission. Four hours.

143 Forage Crop Management (See Plant and Soil Science 143.) Alternate years, 2002/03.

161 Laboratory Animal Health and Disease (3) An introduction to laboratory animal science and welfare covering animal care and management, the correct performance of experimental procedures, and the regulatory and legislative framework governing it. Prerequisite: 1, a biology course or instructor permission. Three hours.

171 Zoos, Exotics, and Endangered Species (3) From gorillas to golden lion tamarins, how animal attitudes, activities, utilization, and management strategies impact wild and captive animal populations. Prerequisite: 1 or instructor permission. Three hours.

195, 196 Field Experience Professionally-oriented field experience under joint supervision by faculty and business or community representative. Prerequisite: Department chair’s permission. Total credit towards graduation cannot exceed 15 hours.

197, 198 Undergraduate Research Research activity under direction of qualified staff member. Must have faculty member approval. Written proposal and report required. Prerequisites: Junior standing; Departmental Chair’s permission. One to three hours.

205 Equine Reproduction and Management (3) In-depth investigation of equine reproduction and physiology, mare and stallion endocrinology, breeding techniques, processing semen, embryo transfer parturition, neonatal foal care, and marketing in the equine industry. Prerequisites: 1, 115 or instructor permission. Three hours.

211 Summer Experience in Farm Management (30 hr/week) A work-study program on the modern practices associated with farm management. Taught at Miner Institute, Chazy, NY. For students with a strong interest in farm management. Prerequisites: Junior, senior, or graduate standing; departmental permission. Four hours. (Not offered for graduate credit.)

213, 214 Dairy Herd Management (3-3) Organization and management of the dairy herd. Practical application of feeding, reproduction, milking, and general management principles. Prerequisites: Junior standing or instructor permission. Four hours.

215 Physiology of Reproduction (3-3) Fundamental principles of the physiology of reproduction with emphasis on, but not limited to, farm animals. Prerequisite: 120 or instructor permission. Four hours.

216 Endocrinology (3) Physiology of endocrine and autocrine/paracrine systems and growth factors. Prerequisite: Course in both biology and physiology; one course in anatomy desirable. Three hours. Alternate years.

220 Lactation Physiology Physiological mechanisms that control and affect lactation in domestic and laboratory animals with emphasis on dairy cattle. Includes mammary anatomy, development and health, and milk synthesis. Prerequisites: One chemistry course and one course in anatomy and physiology, or instructor’s permission. Three hours. Undergraduate/graduate credit.

230 Agricultural Policy and Ethics Examines American agriculture and policies from various perspectives — historical, political, ecological, technological, social, economic, and ethical. Emphasis on contemporary issues, policy options, future developments. Prerequisite: Junior standing or permission. Three hours.

231 Advanced Ruminant Nutrition and Dairy Cattle Feeding (2) Integration of microbial growth and fermentation with metabolism to define nutrient requirements in ruminant animals and application to current feeding practices in dairy production systems. Prerequisite: 110. Two hours. (Not offered for graduate credit.)

233 Dairy Cattle Breeding (2) Setting breeding goals, making selection and mating decisions; balancing opposing forces to maximize genetic progress, and understanding the underlying genetic principles. Prerequisites: A genetics course, a statistics course, and permission. Two hours. (Not offered for graduate credit.)

234 Advanced Dairy Management (15) An intensive, residential program at the Miner Institute providing an in-depth experiential program in the management of the dairy herd. Prerequisites: 110, 134 or 135 or equivalents. Fifteen hours. (Not offered for graduate credit.)

263 Clinical Topics in Companion Animal Medicine (3) The use of case studies in companion animal medicine to develop clinical, analytical, and diagnostic studies. Prerequisites: 118, 141, junior standing. Three hours.

264 Clinical Topics in Livestock Medicine (3) An advanced study of diseases in cattle, sheep, goats, and pigs, emphasizing disease detection, pathobiology, treatment and prevention. Prerequisites: 118, 141, junior standing. Three hours.

272 Advanced Topics in Zoos, Exotics, and Endangered Species (3) An exploration of modern zoo philosophy and ethics and the extent of human intervention necessary for the preservation of endangered species. Prerequisite: 171 or instructor permission. Three hours.

281 Animal Sciences Career Seminar Discussion and workshop activities exploring careers in animal and food sciences. Includes resume preparation and interview training. Prerequisite: Junior standing ASCI major. One hour.

282 Animal Sciences Graduate Seminar Reports and discussions of problems and special investigations in selected fields. One hour, required each year for graduate students.

297, 298 Special Topics in Animal Science Written courses in seminars or topics beyond the scope of existing offerings. See Schedule of Courses for specifics. Prerequisite: Department chair’s permission. May enroll more than once for maximum of 15 hours.

Anthropology (ANTH)

COLLEGE OF ARTS AND SCIENCES

Professors Gordon; Associate Professors Leavin, Pastner, Petersen (Chairperson); Assistant Professor Blom, Shea, Vivanco.

21 Human Cultures Introduction to cultural anthropology focusing on the life ways of non-Western societies and how anthropologists study them. Three hours.
23 Anthropology of Third World Development A survey of the role of applied anthropology in the understanding and analysis of development efforts to alleviate (mostly) third world problems. Three hours.

24 Prehistoric Archaeology Examination of the origins and development of culture from the earliest human fossils through the appearance of civilization; the nature of archaeological data and interpretations. Three hours.

26 Physical Anthropology Introduction to the study of the evolution and racial differentiation of humanity. Three hours.

64 Native Americans of Vermont Vermont’s native peoples from their earliest appearance in the region until today. Archaeological and ethnographic data reviewed in the broader perspective of aboriginal Northeastern cultural history. Three hours. Alternate years.

77 Crisis Cults and Crisis Movements Examination of prophetic, millenarian and revolutionary sects and movements emphasizing non-Western, nonindustrial societies. Special movements viewed in their cultural context. Three hours. Alternate years.

95, 96 Introductory Special Topics See Schedule of Courses for specific titles.

128 Linguistic Anthropology Introduction to the anthropological study of language, focusing on language and communication as they pertain to how we become human and what makes us human. Prerequisite: 21. Three hours.

160 North American Indians Ethnographic survey of major native American cultures of Mesoamerica and the U.S. against background of aboriginal culture history, and problems of contact with European cultures. Prerequisite: 21. Three hours. Alternate years.

161 Cultures of South America Ethnographic survey of major native American cultures south of Mesoamerica against background of aboriginal culture history, and their relation to present day culture spheres. Prerequisite: 21. Three hours. Alternate years.

162 Cultures of Africa Ethnographic survey of representative native societies of sub-Saharan Africa and major colonial/immigrant minorities emphasizing changes resulting from colonialism, independence, and modernization. Prerequisite: 21. Three hours. Alternate years.

163 South Pacific Cultures Survey of major cultural areas of the South Pacific including problems of prehistory, contact with Western colonialism, and contemporary life. Prerequisite: 21. Three hours. Alternate years.

165 Peoples of South Asia Culture and social organization of peoples of Pakistan, India, Bangladesh, and Sri Lanka. Theoretical issues in anthropological analysis of these societies discussed. Prerequisite: 21. Three hours. Alternate years.

166 Peoples of the Middle East Culture and social organization of peoples living in lands from Morocco to Afghanistan, including a consideration of Islam. Prerequisite: 21. Three hours. Alternate years.

167 Native Peoples of Canada Traditional life-ways of the native peoples of Canada, Indian, and Inuit; contemporary issues in native life in Canada. Prerequisites: 21 or Geography 52 or History 65 or 66. Alternate years.

168 The French in North America Cultural patterns of French people in Canada, New England, and Louisiana with particular references to the problems of persistence and change. Prerequisite: 21 or International Studies 91 or 92. Three hours. Alternate years.

169 Latinos in the United States Survey of peoples of Latino/Hispanic descent living in the U.S. Course examines their similarities and differences in history, ethnic identifica-
tion and cultural practices. Prerequisite: 21. Three hours.

170 Pastoral Nomads Examination of social and economic organization of migratory herding peoples against a backdrop of environmental pressures and participation in larger social systems. Prerequisite: 21. Three hours. Alternate years.

171 Anthropology in the Round: The Anthropology of Sculpture Seminar/practicum covering the social context and roles of sculpture cross-historically and cross-culturally. Students create a sculpture based on documented anthropological and historical sources. Prerequisite: 21, any Art History course or instructor’s permission. Three hours.

172 Women, Society, and Culture Cross-cultural treatment of women which emphasizes the interrelationships between female status, social organization, and ideological systems. Prerequisite: 21. Three hours. Alternate years.

173 Ethnography of Art Analysis of the art of tribal and non-Western peoples of Africa, Oceania, and North American Indians, emphasizing the relation of art to social and ideological systems. Prerequisite: 21. Three hours. Alternate years.

178 Sociolinguistics Exploration of language and nonverbal interactions as cultural activities. Focus on rules and patterns people display appropriate to communication and social interaction. Prerequisite: 128. Three hours.

179 Cultural Ecology (Same as Geography 179.) Interrelationships of social groups and their natural environments and resource bases, with primary emphasis on nonindustrial cultures. Prerequisite: 21 or Geography 1. Three hours. Alternate years.

180 Psychological Anthropology Cross-cultural study of the individual in a sociocultural context examining cognition and culture, symbols, alternative states of consciousness, human sexuality, deviance and madness, and ethnotherapy. Prerequisite: 21. Three hours. Alternate years.

181 Law, War, and Disorder Introduction to the anthropology of law and conflict management emphasizing the cultural fora and social organization of disputes and efforts to deal with conflict. Prerequisite: 21. Three hours.

187 Race and Ethnicity (Same as Sociology 119.) Description and analysis of ethnic, racial, and religious groups in the U.S. Examination of social/cultural patterns in the larger society and in these groups themselves. Prerequisite: 21. Three hours.

188 Historical Archaeology Survey of field, lab, and archival research methods; specialized studies of material culture; selected topics on ethnicity in the Americas, gender and status. Prerequisite: 24. Three hours. Alternate years.

189 Aging in Cross-Cultural Perspective Aging from an anthropological perspective. Topics include the biology of aging; aging in hunting, pastoral, fishing, and horticultural societies; aging in contemporary ethnic America. Three hours. Prerequisites: 21 or Sociology 20. Alternate years.

190 ISSP Thesis Independent study for students enrolled in Integrated Social Sciences Program; final product is thesis. Prerequisite: Enrollment in ISSP courses.

195, 196 Intermediate Special Topics See Schedule of Courses for specific titles.

197, 198 Readings and Research

200 Field Work in Archaeology Methods and techniques of archaeological investigation in field situations and the laboratory analysis of data. Prerequisites: 24, one 100-level course in anthropology or history, instructor’s permission. Three to six hours. Summers only.
201 Practicum and Internship Supervised service or research integrating theoretical and practical anthropological issues. Prerequisite: Nine hours of anthropology.

210 Archaeological Theory Development of archaeology from the 19th century to the present including concepts of form, space and time, intellectual attitudes, current systems theory, and research strategies. Prerequisites: 24, one 100-level anthropology course; or Historic Preservation 201; or graduate standing in Historic Preservation Program, or History 121, 122, or 149. Three hours. Alternate years.

220 Development and Applied Anthropology Seminar examines the application of anthropological knowledge and methodologies to alleviate social problems around the world, with a special focus on the cultural politics of expertise. Prerequisites: Anth 23, three 100-level courses, or instructor's permission. Three hours. Alternate years.

225 Anthropological Theory Schools of anthropological thought examined in relation to data on non-Western societies and the historical and social context in which the anthropologist works. Prerequisites: 21, one 100-level course. Three hours.

228 Social Organization Examination of the basic anthropological concepts and theories used in the cross-cultural analysis of kinship and marriage. Prerequisites: 21, one 100-level course. Three hours.

230 Museum Anthropology The cultural context of selected archaeological and ethnographic collections at Fleming Museum; cataloguing, conservation, research, and interpretation of objects; exhibition design and ethical issues. Prerequisites: Junior standing; Anthropology, Art History, Studio Art majors and minors. Three hours. Alternate years.

233 Colonialism The concepts, ideologies, and practice(s) of colonialism within a sociocultural and historical context emphasizing the cultures of the colonizer and the colonized and the interaction thereof. Prerequisites: 21, one 100-level course, or 21, six hours in the social sciences. Three hours. Alternate years.

234 Microethnography Tape recorders and video cameras used to explore human patterns of communication; specifically phonemic, paralinguistic, haptic and kinesic detail, as well as ethnographic semantics. Prerequisite: 128 or Linguistics 101. Three hours.

235 Methods of Ethnographic Field Work Examination of theoretical and ethical premises of field work methodology with practical experience in participant observation, interviewing, the genealogical method, and the recording of data. Prerequisite: Twelve hours of anthropology. Three hours. Alternate years.

235, 236 Advanced Special Topics See Schedule of Courses for specific titles. Prerequisites: 21, one 100-level course.

237, 238 Advanced Readings and Research Prerequisite: Junior or senior standing. One to three hours.

HONORS – ARTS AND SCIENCES

234, 235 Honors/Area and International Studies Contact Department for specific requirements. Three hours each.

Also see specific course listings under Canadian Studies, Latin American Studies, Asian Studies, African Studies, European Studies, and Russian and East European Studies.

Art (ART)

COLLEGE OF ARTS AND SCIENCES

Professors Davison, Higgins, Lyman (Chairperson), McIntyre, Owen, Owre, Selly; Associate Professors Brennan, Carter, Fenger-Stephany, Mierse, Schneider, Thompson; Assistant Professors Marmor, Instructor Peters.

STUDIO ART

1 Drawing Introductory study of visual experience through drawing and its transformation of the three-dimensional visual world onto a two-dimensional surface. Emphasis varies with instructor. Three hours.

2 Two-Dimensional Studies A studio course exploring through classroom projects how we perceive space and how we work with materials and concepts to organize two-dimensional surfaces. Three hours.

3 Three-Dimensional Studies Introductory study of the manipulation and actual space in diverse media. Emphasis varies with instructor. Three hours.
4 Introduction to Film/Video Production  Introduction to the principles and properties of four-dimensional media, including the mechanical and electronic phenomena behind the creation of a moving image. Three hours.

11 Introduction to Fine Metals  Emphasizes design in the third dimension. Basic metal fabrication techniques, soldering, forming, forging, fusing, and casting. Drawing required. Three hours. Fall semester only.

95 Introductory Special Topics  See Schedule of Courses for specific titles.

111 Fine Metals  Continuation of three-dimensional fabrication with work in chasing, repousse, casting, stone setting, and more complex methods of construction. Design and drawing required. Prerequisite: 111. Three hours. Fall semester only.

113 Clay: Hand Building  Investigation of surfaces and three-dimensional forms. Focus on variety of construction methods, surface treatment, and firing techniques. Related clay and glaze technology. Prerequisites: 1 or 2, and 3. Three hours.

114 Clay: Wheel Throwing  Development of throwing skills and the capacity to create a range of forms. Investigation of surface treatment techniques such as slip painting and glazing. Low-fire and stoneware firing. Related clay and glaze technology. Prerequisites: 1 or 2, and 3. Three hours.

115 Intermediate Drawing  Intensive investigation of drawing and elements related to the discipline. The figure used to introduce drawing exercises dealing with contour, gesture, color, and compositional geometry. Prerequisite: 1 and 2. Three hours.

116 Drawing From the Figure  Drawing from the model, emphasizing in-depth studies in different media. Prerequisite: 1 and 2. Three hours.

121 Painting  Painting as an investigation of color, space, and visual perception using traditional motifs and exploring individually developed directions. Prerequisites: 1 or 2. Three hours.

131 Printmaking: Etching  Basic procedures in zinc plate printing stressing design and technical control of aquatint, etching, drypoint, and embossment. Prerequisites: 1 or 2. Three hours. Offered alternate semesters.

132 Printmaking: Silkscreen  Basic procedures in stencil printing stressing design and technical control of stencil cutting, glue and tusche resist, and photo-silkscreening. Prerequisites: 1 or 2. Three hours. Offered alternate semesters.

133 Printmaking: Lithography  Basic procedures in planographic printing from stone, stressing design and technical competence. Intensity of investigation varies with individual student. Prerequisites: 1 or 2. Three hours.

137 Photography  Photographic processes as methods of seeing, emphasizing visual discovery through informed manipulation of materials. Students explore light, camera, photosensitive materials relating to photographic realities. Prerequisite: one of the following: 1, 2, 3, 4. Three hours.

138 Color Photography  Exploration of color films, cameras, and color printing processes as a means for recording, enhancing, and expressing students’ subjective experiences. Prerequisite: one of the following: 1, 2, 3, 4. Three hours.

139 Animation  Techniques of single frame filmmaking, including drawing on film, producing a flipbook, animating a repetitive form, a two-dimensional sequence, and a three-dimensional sequence. Prerequisite: any two of the following: 1, 2, 3, 4. Three hours.

141 Sculpture  Exploration of manipulative materials. Prerequisite: 3. Three hours.

142 Art From Scraps  Students explore in a series of projects how discarded objects and materials from everyday life, the “found object” tradition, can become the materials for sculpture. Prerequisite: 2 and 3. Three hours.

143 Intermediate Film/Video Production  Exploration of the principles and properties of sound and moving image through projects in synchronous sound filmmaking and live studio production. Prerequisites: 4 and either 1, 2, or 3, or instructor permission. Three hours.

144 Digital Art  Exploration of the computer as an artistic medium, focusing on a variety of approaches for creating and displaying imagery. Prerequisite: 2. Three hours.

145 Graphic Design  The application of graphic design principles to practical problems, including the impact of popular design on society, exploration of visual elements in contemporary printing processes. Prerequisite: 1 or 2. Three hours.

147 Visual Environment  Exploration of public spaces, structures, architectural detail, landscaping, roadways, lighting, etc. Field trips; meetings with planners and architects; projects. Prerequisites: 1, 2, or 3. Three hours.

191 Field Experience, Internship  Prerequisites: Junior standing, six hours of 100-level courses in appropriate field, departmental permission (a contract must be obtained from and returned to the Art Department during preregistration). Three hours.

195 Intermediate Special Topics  Intermediate courses or seminars on topics beyond the scope of existing departmental offerings. See Schedule of Courses for specific titles.

197 Readings and Research: Tutorial in Studio Art  Independent/individual research in studio art. Prerequisites: Junior standing, six hours of studio art courses at 100 level, departmental permission (a contract must be obtained from and returned to the Art Department during preregistration). Three hours.

213 Advanced Ceramics  Advanced investigations of methods exploring content, form, surface, and color of ceramics and elements related to the discipline. Prerequisite: 113 or 114. Three hours.

215 Advanced Drawing  Intensive investigation of drawing and elements that relate to that discipline. Emphasis on conceptual method, contemporary techniques, and both objective and nonobjective source material. Prerequisite: 115 or 116. Three hours.

221 Advanced Painting  Advanced explorations of painting emphasizing issues of scale, materials, and techniques both traditional and contemporary, and their relationship to both the discipline and current issues. Prerequisite: 121. Three hours.

237 Advanced Photography  Continuation of 137, further exploring the implications of photography and encouraging students to use the medium to better understand their relationships to the world. Prerequisite: 137 or 138. Three hours.

241 Advanced Sculpture  Advanced investigation of sculpture. Students work on individual projects under supervision of instructor. Periodic group discussion and analyses of work in progress. Prerequisite: 141. Three hours.

244 Advanced Digital Art  Advanced exploration of the computer as an artistic medium for creating imagery. Focus on using the computer to animate images and integrate sound. Emphasis on conceptual issues in digital art. Prerequisite: Art 144. Three hours.

281 Advanced Studies in Studio Art  Work in close consultation with faculty sponsor on a specific and advanced project. Prerequisites: Senior standing, major or qualified minor in studio art, departmental permission (a contract must be obtained from and returned to the Art Depart-
ment during preregistration), six hours of 100-level courses in topic of contract. Three hours.

283 Advanced Seminar in Studio Art Advanced seminar for senior studio art majors covering a range of topics. Prerequisite: Senior standing, major in studio art, instructor’s permission. Three hours. (Not offered for graduate credit.)

295 Advanced Special Topics in Studio Art Advanced work in existing departmental offerings. Prerequisite: Instructor’s permission only. Three hours.

HONORS – ARTS AND SCIENCES

204, 205 Honors/Studio Art Contact Department for specific requirements. Three hours each.

ART HISTORY

5 Western Art: Ancient through Medieval Introduction to the visual arts, primarily painting, sculpture, and architecture in the Western world from prehistoric through Gothic. Three hours.

6 Western Art: Renaissance to Modern Introduction to the visual arts, primarily painting, sculpture, and architecture in the Western world from Renaissance to present. Prerequisite: It is recommended that Art 5 be taken before 6. Three hours.

8 Asian Art Introduction to the artistic traditions and major architectural monuments of India, China, Japan, and Southeast Asia. Three hours.

96 Introductory Special Topics Introductory courses or seminars on topics beyond the scope of existing departmental offerings. See Schedule of Courses for specific titles.

140 History of Optical Media As Art Theory and development of the art of “optical media,” photography, film, and video. Emphasis on discovery and explication of technical, aesthetic, and expressive properties. Prerequisite: One of the following: Art 6, Film 5, Film 6. Three hours.

146 Egypt and the Ancient Near East The development of sculpture, painting, and architecture in the cradles of Western civilization: Mesopotamia, and Egypt. 3000-300 B.C. Prerequisite: 5. Three hours.

148 Greek Art Development of painting, sculpture, architecture, and related arts in Greek lands from 3000-30 B.C. Prerequisite: 5. Three hours.

149 Roman Art Examination of the artistic experiments made by Roman painters, sculptors, and architects from 3rd century B.C. to 5th century A.D. Prerequisite: 5. Three hours.

155 Topics in Medieval Art Selected aspects of European art from the end of the Roman Empire through the Gothic period. Material and emphasis vary with instructor. May be repeated for credit with instructor’s permission. Prerequisite: 5. Three hours.

158 Northern European Art 1400-1600 Netherlandish and German art of the period. Special attention to Jan van Eyck, Rogier van der Weyden, Hugo van der Goes, Dürer, Bosch, and Bruegel. Prerequisite: 5. Three hours.

161 Italian Renaissance Painting Painting in Italy from Gothic innovations of Giotto and Duccio through establishment of 15th century Renaissance style to the High Renaissance works of Leonardo da Vinci, Raphael, and Michelangelo. The development of Venetian painting. Prerequisite: 5. Three hours.

164 Italian Renaissance Sculpture Sculpture in Italy from its Gothic sources through the Renaissance period. Special attention to Ghiberti, Donatello, and Michelangelo. Prerequisite: 5. Three hours.

165 Topics in European Art, 1600–1800 Selected aspects of the painting, sculpture, and architecture of the Baroque, Rococo, and/or Neo-Classical periods. Material and emphasis vary with instructor. May be repeated for credit with instructor’s permission. Prerequisite: 6. Three hours.

170 Topics in Modern Art Selected aspects of the painting, sculpture, and architecture of Europe and North America during the 19th and 20th centuries. Material and emphasis vary with instructor. May be repeated for credit with instructor’s permission. Prerequisite: 6. Three hours.

172 19th Century European Painting Examination of major movements in European painting from Neo-Classicism and Romanticism through Post-Impressionism. Prerequisite: 6. Three hours.

174 20th Century Art A survey of movements and new media in European and American painting, sculpture, mixed media, performance, and the influences of film and photography on traditional media. Prerequisites: Three hours of art history and preferably 172 or 181. Three hours. Alternate years.

177 19th and 20th Century Architecture and Design The theory and practice of building and design from the early 19th century to the recent past. Prerequisites: 6 or a course in Historic Preservation. Three hours.

179 Topics in Contemporary Art A study of selected examples of recent and current art and/or architecture. Material and emphasis vary with instructor. May be repeated for credit with instructor’s permission. Prerequisite: Three hours of Art History. Three hours.

180 North American Art 1600–1900 Painting, sculpture, and architecture in the U.S. and Canada from colonial beginnings (Hispanic, Franco, Anglo) to WWI. Emphasis on the development of nationalist sensibilities as they emerge from European sources. Prerequisites: 6 or International Studies 91 (Canada). Three hours.

185 Japanese Art Architecture, sculpture, painting, prints, and decorative arts and their relationship to Japanese culture. Prerequisites: Three hours in art history or one of the following Asian Studies courses: Geography 58, History 151, Religion 21, 132, 141. Three hours. Alternate years.

187 Chinese Painting History of Chinese painting, emphasizing the landscape painting of the 11th to 17th centuries. Prerequisite: Six hours in art history, three at the 100 level or instructor’s permission. Three hours. Alternate years.

188 Indian Painting Mural, manuscript, and miniature painting from India from 5th to 19th century. Topics to include: courtly and religious patronage and regional styles. Prerequisites: Three hours of art history or instructor’s permission. Three hours.

189 Topics in Non-Western Art Selected aspects of the art of an area not covered in our regular European, American, and Asian courses. Material and emphasis vary with instructor. May be repeated for credit with instructor’s permission. Prerequisite: Three hours in Art History. Three hours.

190 Field Experience, Internship in Art History Prerequisites: Junior standing, six hours of 100-level course work in appropriate field, departmental permission (a contract must be obtained from and returned to the Art Department during preregistration). Three hours.

192 Intermediate Special Topics in Asian Art See Schedule of Courses for specific titles. Prerequisite: Three hours in Art History or Asian Studies. Three hours.

196 Intermediate Special Topics Intermediate courses or seminars on topics beyond the scope of existing departmental offerings. See Schedule of Courses for specific titles.

198 Readings and Research Prerequisite: Departmental permission. Three hours.

199 Topics in Gender, Ethnicity, and Art Study of selected aspects of gender, “race,” or ethnicity in art, and/or of
the contributions of women or ethnically diverse people to the visual arts. Material and emphasis vary with instructor. May be repeated for credit with instructor’s permission. 
Pre-requisite: Three hours in Art History. Three hours.

201 Architecture, Landscape, and History (See Historic Preservation 201.) Pre-requisites: Six hours advanced studies in art and architecture, permission. Three hours.

202 Seminar in Western Art Selected topics in Western Art. See Schedule of Courses for specific offerings each semester. Pre-requisites: Six hours of 100-level Art History courses, including three hours in the area of the seminar; junior or senior standing. Three hours.

285 Seminar in Asian Art Pre-requisites: One of the following: Art 8, 185, 187, 188 or 196 (Asian); three additional hours of 100-level courses either in art history or Asian Studies.

296 Advanced Special Topics See Schedule of Courses for specific titles.

HONORS – ARTS AND SCIENCES

206, 207 Honors/Art History Contact Department for specific requirements. Three hours each.

Asian Studies

COLLEGE OF ARTS AND SCIENCES Professor Seybolt, Director

The following courses are among the course offerings; see department listings for specific descriptions. “E”, “S”, indicates courses on East and South, subareas of Asia respectively. Also see Area and International Studies for special topics listings.

Courses entirely on Asia: Anthropology 165 (S); Art 8 (E, S), 185 (E), 187 (E), 188 (S), 192 (E, S), 285 (E, S); Chinese 1, 2 (E), 51, 52 (E), 101, 102 (E), 171, 172 (E), 201, 202 (E); History 50 (E), 51 (E), 150 (E), 151 (E), 152 (E), 250 (E), 252 (E); Japanese 1, 2 (E), 51, 52 (E), 101, 102 (E), 201 (E), 202 (E); Philosophy 3 (E), 121 (E), 122 (E), 221 (E); Political Science 170 (S), 175 (E), 176 (E); Religion 21 (E, S), 131 (S), 132 (E, S), 134 (S), 141 (E), 145 (E), 240 (E, S), World Literature 110 (E).

Courses significantly on Asia: Anthropology 101 (E, S), 163 (S); Education (EDFS) 206 (E, S); Geography 1 (E, S, W); Music 15 (E, S); Political Science 125 (E), 256 (E), Psychology 237 (E, S); Religion 20 (E, S), 101 (E, S), 104 (E, S), 108 (E, S), 168 (E, S).

Astronomy (ASTR)

COLLEGE OF ARTS AND SCIENCES Professor Rankin, Lecturer Manley

5 Exploring the Cosmos Survey of ancient astronomy, planets and moons, stars and their evolution, galaxies and quasars, and Big-Bang cosmology. Includes night sky observations. Three hours.

23 Astronomy Lab I: Measuring the Sky Measurements of the properties of the planets, stars, and galaxies using graphical analysis, computer simulations and photographs. Pre-requisites: Concurrent enrollment or credit in ASTR 5. One hour.

24 Astronomy Lab II: Imaging the Sky Sky observations using binoculars, optical and radio telescopes. Observations are recorded with drawings, photographic film, and digital imaging devices. Some dark room work. Pre-requisites: Concurrent enrollment or credit in ASTR 5. One hour.

51 The Birth and Death of Stars A survey of stellar astronomy and evolution in our Milky Way galaxy. Stellar populations and the interstellar medium. The local group of galaxies. Pre-requisites: ASTR 5 or other introductory science course. Three hours.

55 The Big Bang Ancient cosmologies, beginning of time, origin of matter, cosmic background radiation, antimatter and dark matter, the expanding universe and origin of structure. Pre-requisites: ASTR 5 or other introductory science course. Three hours.

57 History and Practice of Ancient Astronomy A cross-cultural survey of astronomical practices of ancient peoples. Sky watching, time reckoning and calendar making. Constellations, astrological practices, and planetary theories. Pre-requisites: ASTR 5 or other introductory science course. Three hours.

257 Modern Astrophysics (Same as Physics 257) Pre-requisites: One 100-level course in physical science or engineering. Three hours.

Biochemistry (BIOC)

COLLEGE OF MEDICINE Professors Collen, Catronoe, Hart, Long, Mann (Chairperson), P. Tracy; Associate Professors Franklyn, Morrical; Assistant Professors Daugherty, Everse, Hondal, Lyons; Research Associate Professor Butenus, Mason; Adjunct Professors Bovill, Kelm, Solob; R. Tracy; Adjunct Assistant Professor Borger.

191, 192 Undergraduate Research Participation in a research program currently being pursued by a faculty member of department. Written report due at end of each semester. Pre-requisites: Chemistry 31, 32 or 35, 36. Some programs may require additional courses in chemistry. Credit as arranged, up to four hours per semester.

205 Chemistry of Biomolecules (Same as CHEM 205; MMG 205)

212 Biochemistry of Human Disease Molecular approach to genetic, metabolic, and infectious diseases; recombinant DNA technology and medicine; molecular biology of cancer. Pre-requisites: Chemistry 42 or 141. Three hours.

Biological Sciences (BSCI)

COLLEGE OF AGRICULTURE AND LIFE SCIENCES Professors Barrington, Bramley, Burke, Careon, Johnson (Director), Kindstedt, Ross, Schaeffer, Vogelmann, Wallace; Associate Professors Carrier, Galmartin, Hoffmann, Pederson, Pintauer, Plaut, Tierney, Ward; Assistant Professors Doublé, Harris, Kern, Knapp, Lewis, Modsky, Starrett; Lecturers Paris, Silverstein, Tessmann.

195 Biological Sciences Seminar Presentations and discussion of selected topics by students, staff, and invited guests. Required attendance for all first-year students. Two semester.

197, 198 Undergraduate Research Special study and research activity under direction of qualified staff member. Requires written proposal and final project report. Pre-requisites: Research advisor and program chairperson approval. Credit as approved with maximum of six hours for undergraduate program.

Biology (BIOL)

COLLEGE OF ARTS AND SCIENCES Professors Goodnight, Heinrich, Schall, Stevens, Van Houten
1A, 1B* Principles of Biology Principles of cellular biochemistry, cell biology, genetics and evolution. Topics presented: biochemistry; metabolism, cell structure and function; respiration; photosynthesis; molecular, Mendelian and population genetics; microevolution. Credit not given for both 1 and 11. Four hours.

*Section B is for science majors with concurrent enrollment or credit in Chemistry 31.

2A, 2B* Principles of Biology Principles of organismal biology; nature of scientific inquiry, plant form and function, pollination ecology, animal phylogeny illustrated by comparative anatomy and physiology; animal behavior. Credit not given for both 2 and 12. Four hours.

*Section B is for science majors with concurrent enrollment or credit in Chemistry 32.

3 Human Biology For nonscience majors. Selected biological topics relevant to humans, such as cancer, human genetics, environmental toxicants; biological concepts necessary for understanding these problems. Three hours.

4 The Human Body Introduction to basic human anatomy and organ system physiology emphasizing normal homeostatic mechanisms and the changes that accompany common disorders and diseases. Three hours.

6 Evolutionary Biology For nonscience majors. The process of biological evolution; evidence for evolution; mechanisms of evolutionary change; origin of adaptations; evolution of behavior; social and reproductive behavior. Three hours.

9 Science as a Way of Knowing History of scientific method and its application to generation of knowledge. How science seeks to understand the origin and diversity of life. Lab research project. Three hours.

11 Exploring Biology Exploring biology from cells to organisms. Topics include origins of life; ancestral organisms; uni- and multi-cellular energetics; evolution of respiration and metabolism; and the genetic code. Prerequisites: Biology/Zoology, Environmental Sciences (A&S) majors only, others by permission; concurrent enrollment or credit in Chemistry 31 or 32. Credit not given for both 1 and 11. Four hours.

12 Exploring Biology An evolutionary perspective to exploring biology. Topics include patterns of inheritance; Darwinian evolution; evolution of biodiversity; ecology of organisms; human effects on biological systems. Prerequisites: Biology/Zoology, Environmental Sciences (A&S) majors only, others by permission; enrollment or credit in Chemistry 31 or 32. Credit not given for both 2 and 12. Four hours.

95, 96 Introductory Special Topics See Schedule of Courses for specific titles.

101 Genetics Study of the basis of inheritance, covering topics from classical genetics to modern molecular studies. Analysis of genetic data emphasized. Prerequisites: Biology 31, 32, organic chemistry recommended. Three hours.

102 Environmental Biology (3-3) Ecosystem and community structure; population growth; species interactions and niche dynamics; population and chromosomal genetics; speciation in fossil records; ecology of animal behavior; applied ecology. Prerequisites: 1, 2; Math. 19 or 21. Four hours.

103 Cell Function and Structure (3-3) Molecules, structures, and physiology of cell membranes; energy transformations; nuclear and cytoplasmic events; extracellular matrix; cell signaling; and cell types and fates. Prerequisites: Biol 1, 2 or 11, 12; Chem. 31, 32; (Chem 141, Biol 101 recommended). Four hours.

104 Comparative Animal Physiology (3-3) Physiology of organs and organ systems in animals emphasizing basic principles of physiology common to all forms. Prerequisite: 103 recommended. Four hours.

191, 192 Research Apprenticeship Participation in a faculty research project. Suitable for students in first through junior years. Students must follow all departmental guidelines. Prerequisite: Departmental permission. One-three hours.

193, 194 Internship in Biology Professional experience, containing a substantial academic component, with an off-campus organization or campus unit other than Biology Department. Prerequisite: Departmental permission. Three hours.

195, 196 Intermediate Special Topics See Schedule of Courses for specific titles.

197, 198 Undergraduate Research Individual laboratory research under faculty guidance. Students must follow departmental guidelines or be disenrolled. Six credits given only with presentation in department Research Day or approved venue. Prerequisite: Junior or senior standing, departmental permission. Three or six hours.

202 Quantitative Biology Mathematical concepts applied to biological problems such as growth, metabolism, temperature effects, kinetics, and graphic interpretation of data. Statistics not treated. Prerequisite: At least one intermediate level course in biology, Math. 9, or instructor’s permission. Three hours.

203 Population Ecology Analysis of growth, regulation, and interrelations of biological populations in theoretical, laboratory, and natural systems. Prerequisite: Biology 102. Three hours.

205 Advanced Genetics Laboratory Lecture/discussions alternated with laboratories to provide experiences with genetic techniques. Bench work and data analysis emphasized. Prerequisite: 101. Two or four hours.

206 Immature Insects Evolution, morphology, taxonomy, and natural history of immature insects. Laboratory covers some morphology, but is predominantly identification. Prerequisites: Junior standing; major or minor in Biology. Four hours.

208 Morphology and Evolution of Insects (2-4) Interrelationships, fossil history, comparative anatomy of major insect groups. Morphology and way of life of representatives of important insect orders and classes of arthropods. Prerequisite: 102 or 104. Four hours.

209 Field Zoology (2-4) Collection, identification of invertebrates; September field work. Half of student’s collection is general, identified to family; half is one or two groups identified to species. Prerequisite: 102 or 104. Four hours.

212 Comparative Histology (2-4) Anatomy of tissues, chiefly vertebrate. Tissue similarities and specializations of organs among the various groups of animals in relation to function. Prerequisite: 104. Four hours.

217 Mammalogy (3-3) Classification, identification, morphology, evolution, and distribution of mammals. Prerequisite: 102. Four hours.

219 Comparative and Functional Vertebrate Anatomy (2-4) Structure, function, and phylogeny; survey of evolutionary and functional trends; investigation of the structure of all chordate groups. Prerequisite: 104. Four hours. Alternate years.

223 Developmental Biology An analysis of the cellular, subcellular, molecular, and genetic mechanisms that operate during oogenesis and embryogenesis in invertebrate and vertebrate organisms. Prerequisites: 101, 103. Three hours.
225 **Physiological Ecology**  Processes by which animals cope with moderate, changing, and extreme environments. *Prerequisites:* 102, 104. Three hours.

238 **Winter Ecology**  Natural history and winter adaptation of plants and animals of western Maine. Field work during winter break; oral and written report completed during spring semester. *Prerequisite:* Permission of instructor. Three hours.

246 **Ecological Parasitology**  Parasite-host interactions examined with evolutionary perspective. Topics include the origin of parasites, evolution of virulence, and ecological consequences of parasitism. Laboratory includes original experiments. *Prerequisite:* 102. Three-four hours.

254 **Population Genetics**  The forces that change gene frequencies in populations are examined. Topics include Hardy-Weinberg-Castle equilibrium, selection, mutation, migration, genetic drift, and quantitative genetics. *Prerequisites:* 102; calculus and statistics recommended. Four hours.

255 **Comparative Reproductive Physiology**  Various means by which animals reproduce. Special emphasis on the embryological origin and evolutionary relationships of sex cell differentiation. *Prerequisite:* 104. Three hours.

263 **Genetics of Cell Cycle Regulation**  Molecular events during the cell cycle; mutants defective in cell cycling; comparison of normal and transformed (cancer) cell cycling. *Prerequisite:* 101 or instructor’s permission. Three hours. Alternate years.

264 **Community Ecology**  Theoretical and empirical analyses of community structure. Topics include population growth, metapopulation dynamics, competition, predation, species diversity, niches, disturbance succession, island biogeography, and conservation biology. *Prerequisites:* 102; at least junior standing. Three hours.

265 **Developmental Molecular Genetics**  Current topics in developmental genetics explored through lectures and discussions of current literature; emphasis on molecular approaches. *Prerequisites:* 101. Three hours. Alternate years.

267 **Molecular Endocrinology**  Study of hormone action at the cellular and molecular level. *Prerequisite:* 101. Four credits.

268 **Medical Entomology**  Examines the arthropod vectors of temperate and tropical diseases that affect human health, using an ecological and a systems approach. *Prerequisites:* 102 or instructor permission. Three-four hours.

269 **Plant-Animal Interactions**  Ecological and evolutionary interactions among plants and animals. Topics include herbivory, pollination, seed predation, biocontrol, and effects of global climate change. *Prerequisites:* Biology 1, 2 or 11, 12; Biology 102 recommended. Three hours.

270 **Speciation and Phylogeny**  Contributions of modern research in such fields as genetics, systematics, distribution, and serology to problems of evolutionary change. *Prerequisite:* 101 (102 recommended). Three hours. Alternate years.

276 **Behavioral Ecology**  Adaptive significance of behavior in natural environments. Evolutionary theory applied to behavior and tested with field data. *Prerequisites:* 102 or instructor permission. Three hours.

281 through 284 **Seminar**  Review and discussion of current zoological research. Attendance required of Biology graduate students. Seniors in zoological research programs may enroll. Without credit.

285 **John Dewey Honors Course in Biology**  Advanced Biology course for John Dewey Honors Students with Biology/Zoology/Environmental Sciences Majors. Requires enrollment in approved 200-level course and includes additional assignments. *Prerequisites:* Departmental permission. Zero credit hours. Satisfactory/Unsatisfactory.

295 through 299 **Advanced Special Topics**  See Schedule of Courses for specific titles.

### HONORS – ARTS AND SCIENCES

208, 209 **Honors/Biology**  See page 61 and contact Department for specifics. Six credits given only with presentation in department Research Day or other appropriate venue. Three hours.

### Biomedical Technologies (BMT)

**SCHOOL OF ALLIED HEALTH SCIENCES**

- **Professor Huot; Associate Professors Wilke, Izzo (Interim Chair); Reed; Assistant Professors Vichi; Lecturers Ball, Griffin, Kellogg; Lecturer Emeritus Marschke; Clinical Professor Roland; Clinical Associate Professors Goodwin; Clinical Assistant Professors Bron, Wadsworth; Clinical Instructors Barber, Birch, Bruce, Bushor, Cruickshank, Doretti, DiFranco, Durrett, Elgert, Giroux, Hammond, Hard, Harvey, Jarvis, Kokolowski, Lew, Morgan, Molloy, Nelson, Poulsen, Purchase, Reardon, Reid, Relation, Standage, St. Laurent, Tumilowicz, Westenfeld; Associate Professor Emeritus Lachapelle.**

1. **First Year Seminar**  Discussion of relevant issues in the Biomedical Sciences. Topics include public health, cancer prevention, radiation science, and health and well-being. S/U grading. One hour.

2. **Medical Terminology**  Terminology related to medical science and hospital services. Fall and spring. One hour.

3. **Introductory Radiologic Science (3-0)**  Introduction to ionizing radiation, emphasizing its interaction with matter, its effect on the human body, and methods of protecting patients and technologists. Three hours.

4. **Human Blood Cells**  Lecture and laboratory experiences in cells of the blood, their quantitation, physiology, and alterations in disease. Spring. Three hours.

5. **Principles of Microbiology**  Lectures and laboratory experiences dealing with the structure, physiology, and control of microorganisms, in particular those of medical importance. Spring. Four hours.

6. **Phlebotomy**  Basic techniques in blood collection, including choice of anticoagulants, equipment, sterility, and protection from blood-borne pathogens. One-half hour.

7. **Health Care Ethics**  A study of ethical principles and applications used to help resolve dilemmas in health care delivery. Introduction to ethical decision-making models used in the practice of modern health care. *Prerequisite:* Sophomore standing or above, or instructor’s permission. Three hours. Fall semester.

123 **Introduction to Clinical Chemistry**  Lectures and laboratory experiences introduce basic principles in the quantitative analysis of body fluids; test results are correlated with clinical case studies. *Prerequisite:* Chemistry 23 or 31 and 32. Fall. Four hours.

229 **Seminar: Clinical Chemistry**  Discussion of recent advances in clinical chemistry. One hour.

239 **Seminar: Hematology**  Discussion of recent advances in hematology. One hour.

242 **Immunology**  Concepts of the human immune system. Topics covered include: cellular and humoral immunity; immunoglobulin and T-cell receptor structure and
function; autoimmunity; hypersensitivity; tumor immunology; immunodeficiency. Prerequisite: One semester of biochemistry. Three hours.

244 Immunology Laboratory Laboratory exercises that utilize techniques which elucidate antigen-antibody reactions. Techniques covered include: agglutination; precipitation; immunodiffusion; fluorescence; cell labelling and quantitation; ELISA applications. Fall. One hour.

249 Seminar: Immunology Discussion of recent advances in immunology. One hour.

259 Seminar: Clinical Microbiology Discussion of recent advances in clinical microbiology. One hour.

269 Seminar: Immunohematology Discussion of recent advances and practices used in transfusion medicine. Spring. One hour.

291–292 Biomedical Technologies Honors See “Departmental Honors” and contact the Department for specific requirements.

295 Principles of Education and Management Introduction to theories of education and management. Fall. Three hours.

296 Senior Seminar Review of case studies for clinical correlation. Fall. Two hours.

299 Special Topics Courses or seminars beyond scope of existing departmental offerings. Prerequisite: Departmental permission. Variable credit.

BIOMEDICAL TECHNOLOGY (BMED)

281 Molecular Applications Lecture and laboratory course focused on application of molecular biology techniques to diagnostic testing and biotechnology. Techniques include Northern and Western blot analysis, In situ hybridization, tissue culture, immunoassay development and use. Prerequisites: Chemistry 31, 32 or 23; 141, 142 or 42; Biology 1, 2 or Anatomy and Physiology 19, 20. Fall. Four hours.

284 Undergraduate Research I Laboratory course in research methodologies. Prerequisite: Instructor’s permission. Three hours.

285 Undergraduate Research II Advanced laboratory course in research methodologies. Prerequisite: 284, instructor’s permission. Three hours.

286 Undergraduate Research III Research projects sponsored by faculty. Prerequisite: 285, instructor’s permission. Three hours.

293 Research Concepts Discussion of research methodology including analysis of primary scientific literature. Spring. One hour.

297 Undergraduate Research Research projects sponsored by faculty. Prerequisite: Instructor permission. Spring, fall. Variable credit.

298 Undergraduate Research Seminar Current literature related to student research project will be presented and discussed. Students will be required to present a seminar on their research project. Prerequisites: 284, 285, 286 or 297, advanced standing. Spring. Three hours.

MEDICAL LABORATORY SCIENCE (MLS)

170 Medical Cytology Practicum Development of diagnostic expertise (speed and accuracy) through the daily evaluation of slides of gynecologic and nongynecologic materials. Spring. Twelve hours.

171 Medical Cytology I Identification of cells and concepts of cell growth and differentiation. Biology and cytopathology of the female genital tract. Patient management and specimen collection techniques introduced. Four hours.

172 Medical Cytology II Biology and cytopathology of the nongynecologic body systems. Prerequisites: 171, 173. Cytology Lab I. Four hours.

173 Medical Cytology Lab I Microscopic study and recognition of normal and abnormal cellular manifestations in gynecologic materials. Four hours.

174 Medical Cytology Lab II Microscopic study and recognition of normal and abnormal cellular manifestations in the nongynecologic body systems. Prerequisites: 171, 173. Four hours.

175 Cytology Seminar Interesting case reports and journal review articles are developed and presented in written and oral form. Two hours.

179 Cytology Techniques Handling and processing of cellular specimens. Includes collection, fixation, smear preparation, cytocentrifuge, staining, and safety techniques. Summer. Three hours.

201 Body Fluid Analysis Lectures and laboratory experiences focusing on the complete analysis of urine, cerebral spinal fluids, serous fluids, synovial fluid, and other human body fluids. Majors only. Spring, fall. One hour.

200 Clinical Practicum: Chemistry Experiences with chromatography, immunoassays, random access analyses, and a variety of manual and automated test systems. MLS majors only. Fall, spring. Three and one-half hours.

202 Advanced Clinical Chemistry Two-part course detailing testing techniques including chromatography, electrophoresis, nephelometry, electrochemistry, and automation; clinical case studies on the pathophysiology of diseases when abnormal chemistry test results are present. Lab focuses on troubleshooting and problem solving. Prerequisite: One semester of biochemistry. Spring. Variable credit. Three to three and one-half hours.

230 Clinical Practicum: Hematology Experiences in clinical analysis of blood cells in the FAHC laboratories. MLS majors only. Fall, spring. Two hours.

231 Pathophysiology of Blood Cells Advanced theory and analysis of blood cell physiology and related pathology. Concepts of hemostasis and clinical assessment methods. Prerequisite: One semester of biochemistry. Fall. Three hours.

250 Clinical Practicum: Microbiology Practical experiences at Fletcher Allen Health Care. MLS majors only. Fall, spring. Two hours.

255 Advanced Clinical Microbiology Advanced instruction in the study of clinically significant microorganisms, infectious disease process, and laboratory methods used for the isolation and identification of microorganisms from clinical specimens. Fall. Prerequisite: One semester of biochemistry. Three hours.

256 Parasitology Lectures and laboratory experiences in the identification of parasitic organisms and their relationship to disease. MLS majors only. Fall, spring. One hour.

260 Clinical Practicum: Immunohematology Clinical experiences in operation of a hospital transfusion service and regional reference laboratory. MLS majors only. Fall, spring. One and one-half hours.

262 Advanced Immunohematology Advanced theory and experience related to human blood groups and transfusion practice. Prerequisite: One semester of biochemistry. Spring. Four hours.

NUCLEAR MEDICINE TECHNOLOGY (NMT)

51 Principles of Nuclear Medicine Lecture and laboratory experiences to introduce the theories and practice of nuclear medicine technology. Three hours. Fall.

52 Nuclear Medicine Radiopharmacy The radiopharmaceutical aspects of nuclear medicine technology, including
radiation physics, safety, tracer principles, and dosimetry. Prerequisite: Biomedical Technologies 4. Three hours.

75 Medical Imaging Techniques Introduction to radiographic anatomy and the various imaging techniques presently available to include magnetic resonance imaging (MRI), positron emission tomography (PET), ultrasound, etc. Two hours. Fall.

153 Nuclear Medicine Clinical Procedures I Principles of diagnostic imaging procedures emphasizing the nuclear medicine technologist’s role in patient care and preparation, radiopharmaceutical selection, image acquisition, and data processing and analysis. Prerequisite: 52. Three hours. Fall.

155 Instrumentation I Nuclear medicine instrumentation, with emphasis on planar imaging devices, computer, and technical considerations of radiation physics, safety, tracer principles, and dosimetry. Prerequisite: 52. Three hours. Fall.

156 Instrumentation II Advanced nuclear medicine instrumentation with emphasis on state-of-the-art imaging devices. Prerequisite: 155. Three hours. Spring.

163 Nuclear Medicine Clinical Practicum I Students observe and participate in Fletcher Allen Health Care’s Nuclear Medicine Department. NMT majors only. One hour. Fall.

164 Nuclear Medicine Clinical Practicum II Students participate in routine imaging procedures emphasizing patient care, positioning, and instrumentation. NMT majors only. Prerequisite: 163. Two hours. Spring.

263 Advanced Nuclear Medicine Clinical Practicum III Experience in advanced clinical and pharmacological procedures. NMT majors only. Prerequisite: 164. Three hours. Fall.

264 Nuclear Medicine Internship Full-time clinical experience at an affiliated institution. NMT majors only. Prerequisite: 263. Fifteen hours. Spring.

RADIATION THERAPY (RADT)

52 Principles of Radiation Therapy Introduction to the practice and theory of radiation therapy through lectures and discussions. Two hours. Spring.

144 Seminar: Patient Care Issues Topics will include new treatment modalities, outreach programs, coping with disease, etc. RADT majors only. Prerequisite: Junior standing. S/U grading. One hour.

173 Clinical Laboratory: Radiation Therapy Introduction to the clinical environment through activities which include patient care and handling, immobilization techniques, therapy unit calibrations and manipulation, etc. RADT majors only. Prerequisite: 52. Two hours. Fall.

174 Clinical Practicum: Radiation Therapy Students participate and observe in the Fletcher Allen Health Care Radiation Therapy Department. RADT majors only. Prerequisite: RADT 173. Two hours. Spring.

175 Medical Imaging Introduction to radiographic anatomy and the various imaging techniques presently available to include magnetic resonance imaging (MRI), positron emission tomography (PET), ultrasound, etc. Two hours. Fall.

176 Clinical Radiation Oncology The various types of neoplasms, methods of diagnosis of treatment, and elementary pathology are presented. RADT majors only. Prerequisites: Anatomy and Physiology 19–20, concurrent enrollment in RADT 174. Spring. Three hours.

223 Clinical Practicum: Radiation Therapy A continuation of RADT 174 emphasizing increasing clinical capabilities. RADT majors only. Prerequisite: 174. Three hours. Fall.

274 Clinical Internship: Radiation Therapy Students are assigned to approved clinical education sites to observe and increase their participation in the clinical environment. Evaluations based on defined clinical objectives and competencies to be completed by the clinical and University faculty. RADT majors only. Prerequisites: Successful completion of all previous required major courses and concurrent enrollment in RADT 280. Spring. Fourteen hours.

275 Dosimetry Treatment plan verification using three-dimensional computer models, simulation data, and knowledge of treatment unit capabilities. RADT majors only. Prerequisites: Physics 11 & 12, BMT4. Fall. Two hours.

277 Techniques in Radiation Therapy Instructs students in the theory and clinical application of radiotherapeutic techniques. RADT majors only. Prerequisites: Concurrent enrollment in 275 and 223. Fall. Four hours.

280 Quality Assurance and Treatment Planning The integration of clinical oncology, radiobiology, dosimetry, and treatment planning, and how they affect patient outcomes. RADT majors only. Spring. Three hours.

Botany and Agricultural Biochemistry (BOT)

COLLEGE OF AGRICULTURE AND LIFE SCIENCES

Professors Barrington, Vogelmann (Chairperson), Worley; Associate Professors Carrier, Hoffmann, Hughes, Mofsky, Torney; Assistant Professors Harris; Research Associate Professor Lintilhar; Research Assistant Professors Perkins, Struttan, Wei; Lecturers Olivetti, Paris, Poleman.

AGRICULTURAL BIOCHEMISTRY (AGBI)

191 Biochemistry of Nucleic Acids (2) Structure, function, and properties of nucleic acids, nucleoproteins, and enzymes or proteins that act on nucleic acids. Emphasis on experimental approach. Prerequisite: 10 or equivalent or instructor’s permission. Two hours. Alternate years.

195 Special Topics Prerequisite: Instructor’s permission.

197, 198 Undergraduate Research Prerequisite: Departmental permission. One to three hours.

201 General Biochemistry (3-3) Broad coverage of biochemistry including principles of analytical biochemistry. Prerequisite: Chemistry 42 or 141. Three hours and lab (one hour) as AGBI 202.

202 General Biochemistry Laboratory (0-3) Introduction to techniques and equipment used for the isolation and quantitative analysis of amino acids, proteins, carbohydrates and DNA enzymes in biological materials. Prerequisite: Credit for or concurrent enrollment in 201. One hour.

220 Molecular Biology (3-3) Structure and biological function of nucleic acids, proteins, and enzymes. Emphasis on optical, electrophoretic, and ultracentrifugal methods. Prerequisites: 201 and 202 or instructor’s permission. Three hours and lab (one hour) as AGBI 221.

221 Molecular Biology Laboratory (0-3) Laboratory practice in protein characterization by disc electrophoresis and isoelectric focusing. DNA separation and characterization by agarose gel electrophoresis, restriction digests, polymerase chain reaction, and Southern blots. Prerequisite: Credit for or concurrent enrollment in 220. One hour.

230 Advanced Biochemistry (3-3) Study of metabolic cycles emphasizing research methods involving radioisotopes and chromatography. Prerequisites: 201 and 202 or 220 and 221 or instructor’s permission. Three hours and lab (one hour) as AGBI 231.

231 Advanced Biochemistry Laboratory (0-3) Laboratory
experimentation emphasizing chromatography. Introduction to modern GLC and HPLC techniques, protein secondary structures, and enzyme isolation, purification, and characterization. Prerequisite: Credit for or concurrent enrollment in 250. One hour.

250 Plant Biochemistry (2) Study of specific biochemical principles unique to plants concentrating on the biochemistry of plant cell walls, photosynthesis, and secondary metabolites. Prerequisite: 201. Two hours. Alternate years, 2001-02.

295 Special Topics Prerequisite: Instructor’s permission.

BIOLOGY (BIOL)

1A, 1B* Principles of Biology Principles of cellular biochemistry, cell biology, genetics and evolution. Topics presented: biochemistry; metabolism, cell structure and function; respiration; photosynthesis; molecular; Mendelian and population genetics; microevolution. Four hours.

*Section B is for science majors with concurrent enrollment or credit in Chemistry 31.

2A, 2B* Principles of Biology Principles of organismal biology; nature of scientific inquiry, plant form and function, pollination ecology, animal phylogeny illustrated by comparative anatomy and physiology; animal behavior. Four hours.

*Section B is for science majors with concurrent enrollment or credit in Chemistry 32.

252 Molecular Genetics (See Botany 252.)

BOTANY (BOT)

4 Introduction to Botany (3-3) Structure, function, and reproduction of plants. Fundamental aspects of plant science with implications of botanical knowledge needed for applied plant sciences. Credit not given for both Botany 4 and Biology 1. Four hours.

6 The Green World Evaluation of the impact of plants on the aesthetic, cultural, social, medical, and religious lives of peoples of the world. Botany and Biological Science majors will not receive credit for Botany 6 as part of program distribution requirements. Three hours.

104 Physiology of the Plant Body (3-3) Study of the plant as a whole, growth and development, water and mineral relations, environmental factors, and regulatory processes. Prerequisites: One year of plant or biological science, beginning chemistry recommended, or instructor’s permission. Four hours.

108 Morphology and Evolution of Vascular Plants (3-3) Evolutionary relationships of vascular plants as inferred from plant structure, ecology, geography, and reproductive biology. Synthesis includes both fossil and extant groups. Prerequisite: 4 or Biology 1, 2. Four hours. Alternate years.

109 Systematics and Phylogeny (3-3) Classification; evolution of flowering plants; characterization and recognition of major families; species and generic concepts; biosystematics; taxonomic keys; preparation of herbarium specimens. Prerequisite: 4 or Biology 1, 2. Four hours.

117 Plant Pathology (3-2) Diagnosis, life history, control of diseases caused by fungi, viruses, bacteria, nematodes, parasitic plants, and environmental factors. Physiology, biochemistry, and genetics of host-parasite interaction. Prerequisite: 4 or Biology 1, 2. Four hours. Alternate years.

132 Principles of Genetics Introduction to transmission and molecular genetics with reference to prokaryotic, animal, and plant systems. Prerequisites: Biology 1, 2; Chemistry 31, 32. Three hours.

160 Plant Ecology (3-3) interactions among plants and their environment. Topics covered include individuals, populations, communities, and ecosystems. Field methods and experimental design covered; ecological applications. Prerequisite: Botany 4 or Biology 1, 2; Math. 19 or 21 recommended. Four hours.

193, 194 College Honors (For Arts and Sciences seniors.)

197, 198 Undergraduate Research and Apprenticeships Individual projects under direction of a faculty member. Project may involve original research, readings, or apprenticeships. Prerequisites: Junior or senior standing, departmental permission. One to six hours.

205 Mineral Nutrition of Plants Role of essential elements for plant growth including classical and modern approaches to the study of ion availability and transport. Prerequisite: 104. Three hours.

209 Biology of Ferns Evolutionary biology; a survey of New England ferns and discussion of their phylogenic relationships; current research emphasizing morphological, biogeographical, genetic, and phytochemical aspects of speciation. Prerequisite: 108; 101 or 132 recommended. Three hours. Alternate years.

213 Plant Communities (2-2) Plant sociology; structure and organization of the plant community; sampling methods and analysis of data; climatic and edaphic factors; field work. Prerequisite: 109 or departmental permission. Three hours.

223 Fundamentals of Field Science (3-3) Pattern and process in natural systems. Weekly discussion of unifying questions in science. Field labs teach sampling and analysis of vegetation, soils, and animals. Prerequisite: Graduate standing or several university courses in earth sciences, life sciences, and chemistry. Three hours.

232 Botany Field Trip Trips to selected environments outside Vermont, led by faculty members representing different fields of botany. Overall, integrated approach to ecology, structure, and function. One hour.

234 Ecology of Freshwater Algae (3-3) Community, population and physiological ecology of algae. Topics include taxonomy; diversity; distribution and seasonal succession; productivity and grazing; growth kinetics; and competitive and synergistic reactions. Prerequisites: Botany 160 or Natural Resources 103 or Biology 102. Three hours. Alternate years.

241 Tropical Plant Systematics Principles and methods of angiosperm phylogeny. Recent systematic and evolutionary research on flowering plants; survey of tropical flowering plant families. Student presentations on recent research. Prerequisite: 109. Four hours. Alternate years.

251 Principles of Light Microscopy for Biologists Introduction to the optics, construction, and care of the light microscope. Theory of phase and interference contrast, fluorescence, and video methods. Prerequisite: One year of physics or permission. One hour.

252 Molecular Genetics: Regulation of Gene Expression in Eukaryotes How cells control the flow of genetic information from gene into active gene product. Distinctions between quiescent and active genes, mechanisms of genetic communication/regulation. Prerequisites: Biology 101 or Agricultural Biochemistry 201 or Biochemistry 301, or equivalent; others by instructor’s permission. Three hours.

254 Genetics of Fungi Understanding the classical and molecular genetics of fungi with respect to their contributions in agriculture, basic genetics, biotechnology, industry, recombinant DNA, and gene expression. Prerequisites: Biology 101, or Agricultural Biochemistry 201 or Biochemistry 301 or equivalents; others by instructor’s permission. Three hours. Alternate years.

256 Advanced Plant Genetics Review of major topics in higher plant genetics and cytogenetics. Designed to be applied to the systematics, breeding, and gene engineering of higher plants. Prerequisite: 132 or Biology 101. Three hours.
Physiology of the Plant Cell (3-2) Detailed study of photosynthesis, plant cell membrane function, and plant cell growth. Prerequisites: 104, Chemistry 141, 142 or Chemistry 42, Physics 11, 12 or 31, 42. Four hours. Alternate years.

Biology of the Fungi Taxonomy, genetics, physiology, ecology, and economic importance of the fungi. Representatives of each major group are explored with respect to the above. Includes microbiological technique and laboratory culture of the fungi. Prerequisites: 101 or 104 or 132 or permission. Four hours. Alternate years.

Plant Population Biology Study of how environmental and life-history characteristics of plants determine the dynamics and evolution of populations. Prerequisites: Biology 102 or Botany 160 or instructor permission. Three hours.

Special Topics For advanced students within areas of expertise of faculty. Aspects of ecology, physiology, genetics, cytology, biochemistry, pteridology, paleobotany, phytobiology, membrane physiology, and cell biology. Prerequisite: Departmental permission.

HONORS – ARTS AND SCIENCES

Business Administration (BSAD)

SCHOOL OF BUSINESS ADMINISTRATION

Professors DeWitt, Gardon, Savitz, Shalack; Associate Professors Avery, Cats-Baril, Dempsey, Gatti, Jesse, Kraushaar, McIntosh, Noordermeer, Parke, Sankula; Assistant Professors Battelle, Bonfield, Harrison, Ratnasigum, Vanden Bergh; Visiting Assistant Professors Golann, Lucas; Lecturer Woodman.

Note: In many business courses, students are required to use microcomputer applications to complete assignments. The extent of computer use in a particular course is dependent on the nature of the course and the instructor. Students are assumed to be able to use standard microcomputer applications or to acquire that knowledge through course work in computers, self study, tutorials, or workshops.

BUSINESS ENVIRONMENT

Business Law Concepts of law as related to business, including law of contracts, sales, bailments, and negotiable instruments, business and laws of agency, partnerships, and corporations. Prerequisite: Sophomore standing. Three hours.

Legal and Political Environment of Business Interaction of business and society. Emphasis on business roles in the complex and dynamic, legal, political, and social environment. Prerequisites: Economics 11, 12, junior standing. Three hours.

Business Policy Processes of total enterprise strategy formation, implementation, and performance measurement. Uses and limits of techniques for strategy analysis. Strategic change and the job of the general manager. Prerequisite: Senior standing. Three hours.

Business Process Improvement Familiarizes students with the basic conceptual issues of continuously improving business processes to compete more effectively on quality, time, and cost. Prerequisite: Junior standing. Three hours.

Internship Independent research under faculty supervision, in connection with a preprofessional work experience. Written requirements include a substantive analysis of an aspect of the internship, linking it with the academic curriculum. Prerequisites: Completion of the Basic Business Core courses; at least one Business Field Course, cumulative GPA of at least a 3.0; permission of the School of Business Administration. Three hours.

Special Topics Specialized or experimental courses offered as resources permit.

Independent Study Independent investigation designed by the student as a means of applying prior course work to a specialized problem. Well suited for senior projects. Prerequisite: Permission of BSAD Undergraduate Studies Committee.

Advanced Special Topics Advanced courses on topics beyond the scope of existing departmental offerings. See Schedule of Courses for specific titles and prerequisites. Prerequisite: Senior standing. One to three hours.

ACCOUNTING

Financial Accounting Introduction to generally accepted accounting principles and techniques regarding corporations, partnerships, and proprietorships as they apply to income determination and financial position presentation. Prerequisite: Sophomore standing. Four hours.

Managerial Accounting Introduction to use of accounting for planning, cost behavior and control, and decision making. Prerequisite: 60 or 65. Four hours.

Fundamentals of Accounting Overview of the financial accounting model and basic managerial accounting concepts, including accounting for service, merchandising and manufacturing companies, financial Statement components (assets, liabilities and equity), cost analyses, and budgeting. Prerequisite: Sophomore standing. Business Administration majors will not receive credit for BSAD 65. Four hours.

Intermediate Accounting Principles, concepts, techniques, and issues involved in accounting for the assets, liabilities, and owners equity and their related effect on income determination of an enterprise. Prerequisites: 60 for 161, junior standing; 161 for 162. Three hours.

Introduction to Federal Taxation Examination of the Internal Revenue Code primarily regarding individuals and property transactions. Tax research methodology, and the taxation of corporate and partnership income, are introduced. Prerequisites: 60 or 65, junior standing. Three hours.

Cost Accounting Accounting for inventory valuation and income determination, nonroutine decisions, policy making and long-range planning. Prerequisite: 61, junior standing. Three hours.

Financial Statement Analysis A study of the concepts and techniques underlying corporate financial statement analysis, emphasizing business equity valuation. Prerequisites: 180 or 308. Three hours.

Accounting and the Environment An examination of the critical role of accounting in implementing and assessing the firm’s environmental strategy. A variety of accounting issues are addressed through readings and case studies. Prerequisite: Junior standing, 61 or 65 or concurrent enrollment in 308. Three hours.

Advanced Accounting Accounting for partnerships, special sales contracts, parent-subsidiary relationships, fiduciary relationships, and governmental units. Prerequisite: 162. Three hours.

Auditing Independent and internal auditing. Topics include standards, ethics and legal responsibilities of the profession, financial statements, audit concepts, and techniques, and the audit option. Prerequisite: 162. Three hours.

ENTREPRENEURSHIP

Entrepreneurship Understanding of the business challenges that confront entrepreneurs and their approaches to opportunities. Emphasizes real-world informa-
tion gathering and integrated approaches needed for entrepreneurial success. **Prerequisite:** Junior standing and strong personal motivation. Three hours.

**138 New Venture Creation I** Students develop business plans for their own new business ideas. Evaluate market and financial feasibility and develop strategy and business objectives for the new venture. **Prerequisite:** BSAD 137 or permission of the instructor plus strong personal motivation. Six hours.

**139 New Venture Creation II** Continuation of BSAD 138. Students develop detailed and integrated operational business plans to support the business concept, strategy and objectives developed in BSAD 138. **Prerequisite:** BSAD 138. Three hours.

**FINANCE**

**180 Managerial Finance** The financial function in the corporation. Techniques for evaluating current use of resources and proposed resource acquisitions or dispositions. **Prerequisites:** 61 or 65, Economics 12, Statistics 141 or 111, junior standing. Three hours.

**181 Intermediate Financial Management** Examines key areas of financial decision making. With cases and problems, issues such as capital budgeting, leasing, mergers, and acquisitions examined. **Prerequisite:** 180. Three hours.

**183 International Financial Management** Theories and practices of international financial management examined. Topics investigated include: systems of international exchange, spot and forward markets, and expropriation and exchange risk. **Prerequisite:** 180. Three hours.

**184 Financial Institutions and Markets** Study of level and structure of interest rates and characteristics of financial institutions and markets. Topics include market vs. natural rate of interest, interest rate structure, behavior of interest rates. **Prerequisite:** 180. Three hours.

**282 Security Valuation and Portfolio Management** Examination of theories and evidence on the investment decision process including operations of equity securities markets, market efficiency, financial asset prices, and portfolio management. **Prerequisites or Corequisites:** 181 and 184 or 308. Three hours.

**285 Options and Futures** Financial derivatives — options, futures, and swaps. Topics include: structures of the markets for exchange traded and over-the-counter derivatives; identification and exploitation of arbitrage opportunities; use and misuse of derivatives to hedge risk in both financial and product markets. **Prerequisites or Corequisites:** 181 and 184 or 308. Three hours.

**HUMAN RESOURCE MANAGEMENT**

**120 Principles of Management and Organizational Behavior** Fundamentals of management, organization theory, behavior, and interpersonal communication in a transnational context. **Prerequisite:** Junior standing. Three hours.

**121 Selected Topics in Organization Behavior** Focuses on ways in which individuals and work groups within organizations can be better utilized as organizational resources. **Prerequisite:** 120. Three hours.

**123 Collective Bargaining and Conflict Resolution** Focuses on union-employer relations and on developing the student’s negotiation skills. Topics include the union contract, the causes of strikes, and the techniques for resolving conflict. A bargaining simulation is incorporated. **Prerequisite:** 120. Three hours.

**127 International Management** Reviews special problems in the management of human resources in a global economy. Focuses on cultural differences, a comparison of labor-management systems in a number of countries, the role of multinational corporations, and the impact of foreign enterprises on employment practices in host countries. **Prerequisites:** 120; senior standing. Three hours.

**222 Human Resource Management** Critical examination of contemporary problems in human resource management; including job analysis, recruitment, training and employee development, health and safety, compensation, performance appraisal, and related topics. **Prerequisite:** 120; senior standing. Three hours.

**226 Current Issues in Management and Organizational Theory** Subjects may include training and development, selection and recruitment, and affirmative action. **Prerequisite:** 120. One to three hours.

**INTERNATIONAL MANAGEMENT**

The following courses may apply toward a concentration in International Management: BSAD 127, 183, 258, and special topics courses.

**MANAGEMENT INFORMATION SYSTEMS**

**40 Information Technology and Management** Introduction to use of technology and computers in decision-making functions of management. Includes coverage of information technology, computer software applications, and programming. Credit cannot be received for Computer Science 2 after completion of BSAD 40. Three hours.

**141 Management Information Systems** Integrates computer hardware and software concepts with a classical methodology for developing business information systems. Presents the relevant factors in the development of information systems. Discusses the problems of analyzing, designing, and implementing such systems. **Prerequisites:** Statistics 141 or 111, Math. 20 or 21, BSAD 40 or Computer Science major, junior standing. Three hours.

**142 Structured Business Programming** Fundamental principles of business computer programming. Topics include: the constructs of structured programming, modular development, sequential and nonsequential access techniques. Exercises include data editing, reporting, file updating. An on-line program development mode is used. Credit cannot be received for both CS 14 and BSAD 142. **Prerequisite:** 141. Three hours.

**143 Structured Analysis and Design of Business Systems** In-depth study of business information system development cycle emphasizing analysis and design phases. Structured analysis and design techniques used to develop models of business information systems. Case studies such as payroll, inventory, accounts receivables, order entry, billing. **Prerequisite:** 141. Three hours.

**144 Data Base Development and Administration** Data base system development cycle from analysis to design, implementation, and administration. Central focus on complex data structure modeling, data base implementation and administration. A project involving analysis, design, and implementation required. **Prerequisites:** 141, 143, or instructor’s permission. Three hours.

**145 Managing the Information System Resource** Theory and practice of managing resources of an organization’s information system. Responsibilities and interactions of upper level, function area, and information system managers emphasized. Topics include project selection and control, staffing, organizing, planning, and managing the information system function. **Prerequisites:** 120, 143, concurrent enrollment in 144, or instructor’s permission. Variable 3-4 hours.

**146 Local Area Networks for Work Groups and Small Business** Planning and installation of local area networks (LANs). Covers fundamental principles of telecommunications and networking with application to both peer to peer and client
server networks. (Offered summer session only). Prerequisites: BSAD 141 and instructor permission. Corequisite: BSAD 147. Three hours.

147 Local Area Networking Lab Laboratory to accompany BSAD 146. Install, configure, and test two different network systems in a simulated small business setting; include basic network services. (Offered summer session only). Prerequisite: BSAD 141 or instructor permission. Corequisite: BSAD 146. One hour.

MARKETING

150 Marketing Management The place of marketing in our economy. Analysis of the market structure by function, institutions, and commodities. Consumer and organizational activities reviewed. Prerequisites: Statistics 141 or 111, Economics 11, 12; junior standing. Three hours.

152 Business to Business Marketing Exploration and analysis of the marketing of goods and services to organizations. Topics include organizational buying, market segmentation, positioning, pricing, communication, physical distribution and customer service, and sales management. Prerequisite: 150. Three hours.

153 Consumer Behavior Exploration and analysis of research evidence from marketing and behavioral science relevant to a theory of consumer behavior. Emphasis also given to research methodologies. Prerequisite: 251 (co-requisite of 251 when 153 and 251 offered same semester). Three hours.

155 Marketing Communications Emphasizes the coordination of advertising and sales promotion into cohesive, single-minded promotional programs. Stresses the need to integrate promotional activity into the overall marketing strategy. Prerequisite: 150. Three hours.

157 Current Marketing Developments Analysis of both present and future changes affecting marketing theory and practice. Topics include social changes, functional and institutional marketing system changes. Individual research projects required. Prerequisite: 150. Three hours.

159 Marketing Planning and Programming The use of advanced cases to aid in the formulation of overall policies and planning strategies for marketing programs. Topics include product planning and channel selection. Prerequisite: 150 and one other marketing course. Three hours.

251 Marketing Research The role of research in marketing information framework. Emphasis on survey research, data collection, and analysis. Experimental designs also examined. Prerequisites: 150. Three hours.

252 Marketing Research Practicum Market research field project. Students design survey instruments, collect and analyze data, and present results to clients in a business environment. Prerequisite: 251. Three hours.

258 International Market Analysis Examines the cultural, economic, historic, and political factors that affect the analysis of foreign markets. Specific attention is given to the processes by which market entry decisions are developed and implemented. Prerequisites: Senior or graduate standing; BSAD 150 or permission of instructor. Three hours.

PRODUCTION AND OPERATIONS MANAGEMENT AND QUANTITATIVE METHODS

170 Business Forecasting Methods Looks inside the crystal ball at major forecasting methods (Smoothing, Regression, Econometric, Box-Jenkins, Combined), and analyzes elements of good forecasting practice in an organization. Extensive use of PC forecasting packages. Prerequisites: Statistics 141, Economics 11, 12; junior standing. Three hours.

173 Production and Operations Analysis Study of methods used in planning, analysis, and control of production and service processes. Topics include forecasting, scheduling, production and inventory control, sequencing, line balancing, learning curves, and networks. Prerequisites: Math. 20 or 21, Statistics 141, junior standing. Three hours.

174 Manufacturing Planning and Control Study of systems to plan and control flows of materials through manufacturing. Topics include production, materials, and capacity planning; master scheduling; shop-floor control, and just-in-time production. Prerequisite: 173 or senior standing in Engineering or Mathematics. Three hours.

175 The Management of Technology (Same as Engineering Management 175.)

177 Decision Analysis Thinking through difficult decisions. Course utilizes case studies and professional software to analyze decision making, design decision models and perform risk analyses. Prerequisites: Statistics 141; junior standing. Three hours.

178 Quality Control Analysis and design of systems for obtaining quality in operations. Statistical process control (SPC) emphasized, along with current management philosophies and concepts. Prerequisites: Math. 20 or 21, Statistics 141 or equivalent; junior standing. Three hours.

270 Quantitative Analysis for Managerial Decisions Application of management science methods to managerial decision making, emphasizing modeling and use of solution results. Topics include mathematical programming, waiting-line analysis, and computer simulation. Prerequisites: Math. 20 or 21, Statistics 141. Three hours.

272 Discrete Simulation Discrete simulation using monte-carlo techniques and the GPSS simulation processor; mathematical modeling of systems; control systems; validation and sensitivity analysis. Prerequisites: Statistics 141 or 151, senior standing. Three hours.

273 Integrated Product Development (Same as Mechanical Engineering 265, Statistics 265.) Project-based course focusing on the entire product life cycle. Team dynamics, process and product design, quality, materials, management, and environmentally-conscious manufacturing. Prerequisite: Senior standing. Three hours.

Canadian Studies

COLLEGE OF ARTS AND SCIENCES

Prof. General, Director

The following courses are among the course offerings; see department for specific description. Also see Area and International Studies for special topics listings.

Anthropology 128, 167, 178; Area and International Studies 91, 197, 198, 295, 296; Art 180, 282 (when the topic is Canadian); Business Administration 234; English 137, 138; French 283, 293; Geography 52, 210; Geology 272 (field course goes to Canada), 273; History 65, 165, 265; Political Science 71, 173, 273; Sociology 31, 96, 132.

Chemistry (CHEM)

COLLEGE OF ARTS AND SCIENCES

Professors Allen, Flanagan, Geiger, Matthews (Chairperson), Strauss; Associate Professors Goldberg, Landry, Leenstra, Madalengoitia; Assistant Professors Friestad, Gordon, Hughes, Petruce.

Note: Credit cannot be given for: 31 and also 23 or 25 or 35; 32 and also 36; 23 and also 25; 23 and also 35; 26 and also 28; 26 and also 42 or 44; 25 and also 35; 28 and also 42 or 44; 42 and also...
19 Mathematical Preparation for General Chemistry  Designed to fill in gaps, largely mathematical, in students' backgrounds and preparation for introductory chemistry. Enrollment by permission. No credit. Meets only during first four weeks of semester.

20 Chemical Principles and Contemporary Applications (3-3) Lecture plus lab. Designed for nonscience majors. An integrated approach to principles of chemistry within context of contemporary technological issues. Four hours.

23 Outline of General Chemistry (3-3) One-semester survey of principles and concepts of general chemistry, designed primarily to meet needs of students in agricultural and health sciences. Four hours.*

25 Outline of General Chemistry One-semester survey of principles and concepts of general chemistry, designed primarily to meet the needs of students in agricultural and health sciences. NO LABORATORY. Three hours.*

28 Outline of Organic and Biochemistry Broad overview of most important facts and principles of organic and biochemistry and interrelationships between these branches of chemistry. *Prerequisite: 31 or 23. Four hours.*

31, 32 Introductory Chemistry (3-3) Basic course in principles and concepts of general chemistry. These courses, or Chemistry 35, 36 serve as suitable prerequisites for 100-level courses in Chemistry. *Prerequisite: 31 or 35 for 32. Four hours.

35, 36 General Chemistry (3-3) General chemistry for students with a strong background in physical sciences. Recommended for students concentrating in physical sciences. *Prerequisites: One year of high school chemistry, concurrent enrollment or background in calculus. High school physics recommended; 31 or 35 required for 36. Four hours.

39, 40 Introduction to Research (0-6) Overview of methods, areas, and instrumentation of modern chemical research, including hands-on laboratory experiences and written and oral presentations of a research project. *Prerequisite: score of 4 or 5 on the AP Chemistry examination or permission of department. Two hours each.

42 Introductory Organic Chemistry (3-3) Concepts for understanding chemistry of structurally simple organic compounds of everyday importance. These principles applied to more complex molecules such as polymers and biologically important compounds such as proteins, lipids, and carbohydrates. (Does not satisfy medical school entrance requirements for undergraduate preparation in organic chemistry.) *Prerequisite: 51 or 23. Four hours.

44 Introductory Organic Chemistry Concepts for understanding chemistry of structurally simple organic compounds of everyday importance. These principles applied to more complex molecules such as polymers and biologically important compounds such as proteins, lipids, and carbohydrates. (Does not satisfy medical school entrance requirements for undergraduate preparation in organic chemistry.) NO LABORATORY. *Prerequisite: 31 or 23 or 25. Three hours.

95, 96 Introductory Special Topics See Schedule of Courses for specific titles.

121 Quantitative Analysis (3-3) Theory and practice of volumetric and gravimetric analysis. Theoretical discussion of indicators, buffers, pH, etc. Introduction to data analysis, spectrophotometry, and chromatography. *Prerequisite: 32 or 36. Four hours.

131 Inorganic Chemistry Symmetry, group theory, molecular structure; valence shell; MO, crystal field, and ligand field bonding models; solid state, electron deficient, acid-base, and simple organo-metallic systems. *Prerequisite: 142 or 144. Three hours.

141, 142 Organic Chemistry (3-3) Survey of properties and reactions of organic compounds with consideration of bonding, stereochemistry, mechanisms, principles of reactivity, spectroscopy, syntheses, and utilization. Designed for pre-medical, pre-dental, and pre-veterinary students and for those majoring in biological and physical sciences. *Prerequisites: 31, 32 or 35, 36. Four hours.

142, 144 Organic Chemistry for Chemistry Majors (3-3) Survey of principles and reactions of organic chemistry for chemistry majors. *Prerequisites: 31, 32 or 35, 36. Four hours.

146 Advanced Organic Laboratory (0-6) Laboratory practice in separation, purification, synthesis, identification, spectroscopy, and physical organic techniques as applied to organic compounds. For Chemistry majors. *Prerequisite: 144. Two hours.

160 Physical Chemistry for Biological Science Students Aspects of physical chemistry most pertinent to work in biological sciences: acid-base equilibrium, theory of solutions, thermodynamics and kinetics. *Prerequisites: 32 or 36, Physics 42. Three hours.

161 Physical Chemistry Elementary quantum chemistry, bonding, spectroscopy, and statistical mechanics. *Prerequisites: 32 or 36; Physics 42, Math. 121 or Chem. 167. Three hours.

162 Physical Chemistry Properties of gases and solutions; thermodynamics and kinetics. *Prerequisites: 32 or 36; Physics 42, Math. 121 or Chem. 167. Three hours. Note: Chemistry 162 may be taken before 161.

167 Physical Chemistry Preparation (1-0) (Same as Math. 167.) Review of relevant mathematical and physical concepts as applied to physical chemistry. *Prerequisites: 32 or 36; Math. 22. One hour.

195, 196 Intermediate Special Topics See Schedule of Courses for specific titles.

201 Advanced Chemistry Laboratory (1-6) Laboratory and discussion only. Laboratory problems requiring modern analytical, physical, and inorganic synthetic techniques. *Prerequisites: 146, credit for or concurrent enrollment in 161 or 162 and 221. Three hours.

202 Advanced Chemistry Laboratory (0-6) Laboratory only. Laboratory problems requiring modern analytical, physical, and inorganic synthetic techniques. *Prerequisites: 201. Two hours.

205 Biochemistry (3-0) Introduction to chemistry and structure of biological macromolecules; examination of mechanisms of chemical processes in biological systems including enzyme catalysis, biosynthesis, regulation, and information transfer. *Prerequisite: 142 or 144. Three hours. Cross-listing: BIOC 205; MMG 205.

206 Biochemistry II (Same as BIOC 206; MMG 206) Continuation of Biochemistry I. Biochemistry of nucleic acids; nucleic acid based processes, such as replication and transcription; cellular information transfer, genomics, and proteomics. *Prerequisites: 205. Three hours.

207 Biochemistry Lab (Same as BIOC 207; MMG 207) Introduction to biochemical tools, including spectrometry, chromatography, and electrophoresis; natural and recombinant enzyme isolation; assays of DNA-modifying enzymes; computer-based structure/function exercises. *Prerequisites: 205 or 206. Two hours.
214 Polymer Chemistry Polymer size and weight distributions. Kinetic models for step polymerization, addition polymerization, copolymerization. Physical properties, characterization of polymers in the solid state and in solution. Prerequisites: 144, 162. Three hours. Alternate years.

221 Instrumental Analysis Systematic survey of modern methods of chemical analysis. Fundamental principles and applications of spectroscopy, electrochemistry, and separation techniques. Prerequisites: Credit for or concurrent enrollment in 161 or 162. Three hours.

222 Advanced Analytical Chemistry In-depth coverage of selected modern instrumental methods of chemical analysis, emphasizing most recent developments in spectroscopy, electrochemistry, and separation techniques. Prerequisite: 221. Three hours.

223 Mass Spectrometry This course covers basic aspects of modern mass spectrometry instrumentation and techniques as well as specific applications relevant to the students in the course. Prerequisites: 142 or 144 and 221 or instructor’s permission. Three hours. Undergraduate/graduate credit.

225 Electroanalytical Chemistry Principles of modern electrochemical analysis focusing mainly on finite current methods — voltammetry, polarography, chronocoulometry, cyclic voltammetry, etc. Introductory to modern operational amplifier instrumentation. Double layer theory and electron transfer kinetics. Prerequisite: 221. Three hours. Alternate years.

227, 228 Special Topics in Analytical Chemistry Selected topics of current interest in analytical chemistry. New techniques and methodologies, especially in chemical instrumentation. Credit as arranged.

231 Advanced Inorganic Chemistry Advanced group theory; electronic transitions in metal complexes and spectroscopic analysis; inorganic substitution and electron transfer mechanisms; homogeneous and heterogeneous catalytic processes; bioinorganic chemistry. Prerequisite: 131. Three hours.

234 Organometallic Chemistry Systematic survey of synthesis, properties, structures, bonding, and reactions of both main group and transition series organometallic compounds. Variation of structure and metal-carbon bond stability throughout periodic system. Prerequisite: 231. Three hours. Alternate years.

236 Physical Inorganic Chemistry Fundamental physical basis for spectroscopic techniques and other observable phenomena important to field of inorganic chemistry. Topics include ligand field theory, magnetism, magnetic resonance, Mössbauer spectroscopy, and optical activity. Prerequisites: 161, 231. Three hours. Alternate years.

237, 238 Special Topics in Inorganic Chemistry Areas of current interest involving inorganic systems such as bioinorganic, solid state and polymers with unusual properties. Credit as arranged.

241 Advanced Organic Chemistry Stereochemistry, reactivity criteria, reaction mechanisms, and synthetic methods stressed. Reactive intermediates such as carbanions, carbocations, carbenes, and free radicals used to systematize mechanistic discussions. Prerequisites: 142, 162. Three hours.

242 Advanced Organic Chemistry Detailed mechanistic descriptions of processes which may include enolate reactions and stereochemical considerations, addition processes such as halogenation, cycloadditions, hydroboration, hydride and metal-ammonia reductions, annelations such as biomimetic cyclizations, oxidation processes, rearrangements, eliminations, and examinations of approaches to multistep syntheses. Prerequisite: 241. Three hours.

253 Practical NMR Spectroscopy Introduction to high resolution pulsed Fourier transform nuclear magnetic resonance spectroscopy. Chemical shifts, scalar coupling, relaxation, molecular symmetry considerations, chemical exchange effects. Prerequisites 142 or 144, 161. Three hours.

257, 258 Special Topics in Organic Chemistry Advanced level discussion of specific topics in organic chemistry of current interest such as photochemistry, carbenes, bioorganic chemistry, magnetic resonance, etc. Credit as arranged.

262 Chemical Thermodynamics Systematic study of application of thermodynamics to chemical problems. Concepts of statistical thermodynamics introduced. Prerequisites: 161, 162. Three hours. Alternate years.

263 Introduction to Quantum Mechanics General considerations of quantum mechanics. Development of techniques pertinent to application of quantum mechanics to chemical problems. Prerequisites: 161, 162. Three hours. Alternate years.

265 Statistical Mechanics Development of statistical mechanics and its application to problems of chemical interest. Prerequisites: 161, 162; 263 recommended. Three hours. Flanagan. Alternate years.

267, 268 Special Topics in Physical Chemistry Advanced discussion of physical chemistry and chemical physics, group theory, solid state, molecular orbital theory, irreversible thermodynamics, kinetics and mechanisms, solution theory, calculations, spectroscopy. Credit as arranged.

282 Senior Seminar Oral and written presentation of a subject of current chemical interest. Prerequisite: Audit of 381. One hour.

291 Undergraduate Research Special study in inorganic, analytical, physical, or organic chemistry with an assigned staff member. Findings submitted in written form. Prerequisite: Departmental permission. Credit as arranged with maximum of four hours per semester and 12 hours for the undergraduate program.

295, 296 Advanced Special Topics See Schedule of Courses for specific titles.

HONORS – ARTS AND SCIENCES

212, 213 Honors/Chemistry See page 61 and contact Department for specific requirements. Three hours each.
Chinese (CHIN)

COLLEGE OF ARTS AND SCIENCES

Visiting Assistant Professor Yin; Lecturer Sun.

1. 2 Elementary Chinese A study of Mandarin Chinese designed to give the beginning student the fundamental grammar and vocabulary for speaking, reading, and writing the modern national language. Four hours.

51, 52 Intermediate Chinese A continuation of 1, 2 designed to enable the student to converse in everyday Chinese, and to read and write simple texts. Prerequisite: 2 or equivalent. Four hours.

95, 96 Introductory Special Topics Introductory courses on topics beyond the scope of existing departmental offerings. See Schedule of Courses for specific titles. One-three hours.

101, 102 Advanced Chinese Structured readings with emphasis on sentence structures, vocabulary expansion, and increased fluency in self-expression. Prerequisite: 52 or equivalent. Three hours.

105, 106 Intermediate Special Topics See Schedule of Courses for specific titles. One-three hours.

160 Advanced Conversation and Composition To improve oral and written proficiency through reading newspapers and short stories, discussion, and composition. Prerequisite: 102 or equivalent for 201; 201 for 202. Three hours.

295/296 Advanced Special Topics Advanced courses or seminars on topics beyond the scope of existing departmental offerings. See Schedule of Courses for specific titles. Prerequisite: CHIN 202 or equivalent. One to three hours.

WORLD LITERATURE

110 Chinese Literature in Translation Selected topics in Chinese Literature. Readings and discussion are in English. No knowledge of Chinese language is required. Prerequisite: One course in literature or Asian Studies concentrating on East Asia. Three hours.

Civil and Environmental Engineering (CE)

COLLEGE OF ENGINEERING AND MATHEMATICS

Professors Belzoua (Chairperson), Hemenway, Laible, Pinder; Associate Professors Hayden, Olson; Assistant Professors Hession, Rizzo, Sadeh; Research Assistant Professors Eppstein.

1 Statics (3-0) Fundamentals of statics; composition and resolution of forces; the analysis of force systems in two and three dimensions; and centroids and moments of inertia. Prerequisite: Math. 22. Three hours.

2 Graphic Design (3-0) Computer-aided and hand generation of: geometric shapes; dimensioning; pipe drafting; foundations and structures; survey plots; graphs and charts; topography; and highway geometry.

10 Surveying (3-0) Plane surveying methods including distance and angle measurements, levelling, traverse surveys and adjustments, propagation of errors in surveying measurements, and topographical mapping. Prerequisite: Math. 21, Computer Science 16 or 21. Three hours.

11 Computer-Based Tools for Civil Engineering An introduction to the basics and applications of advanced computer-based tools, including MATLAB, remote sensing, geographic information systems (GIS), and global positioning system (GPS). Prerequisite: Math 22, CS 21. Four hours.

12 Surveying Laboratory (0-3) Laboratory exercises in surveying applications: distance, angle, elevation, traverse, and topography. Prerequisite: Taken concurrently with, or following, 10. One hour.

15 Pollution and Solutions (3-0) Introduction to environmental issues and potential solutions. Emphasis on problem solving: description, decomposition, research, analysis, and performance evaluation. Three hours.

100 Mechanics of Materials (3-0) (Same as Mechanical Engineering 14.) Stress, strain, temperature relationships, torsion, bending stresses, and deflections. Columns, joints, thin-walled cylinders. Combined stresses and Mohr’s circle. Prerequisites: 1, Math. 121, Mechanical Engineering 12 or concurrent enrollment. Three hours.

101 Mechanics of Materials Laboratory (1-3) Experimental stress analysis methods; fundamental properties of metals, plastics, and wood; effects of size, shape, method, speed of loading, and strain history on these properties. Prerequisite: 100. Two hours.

125 Engineering Economics and Decision Analyses (3-0) Comparing engineering alternatives; economic evaluations including costs, returns, taxes, and depreciation; project optimization with linear/non-linear models; scheduling; risk and reliability analyses by simulation. Prerequisites: Math. 20 or 22, junior standing. Three hours.

140 Transportation Engineering (3-0) Analysis of transportation systems; technological characteristics; the transportation planning process and techniques of travel modeling and forecasting for both urban and rural areas. Prerequisite: 10, junior standing in CE, or instructor’s permission. Three hours.

142 Structural Roadway Design (3-0) Properties of construction materials; design of mixes; analyses of pavement performance; structural design of pavements; highway earthwork, drainage, and construction techniques. Prerequisites: 141, 180. Three hours.

150 Environmental Engineering (3-0) Basic phenomena and theoretical principles underlying water supply, air and water pollution control, and industrial hygiene. Prerequisites: Chemistry 31 or 25, Math. 22. Three hours.

151 Water and Wastewater Engineering (2-3) Functional design of water supply systems and wastewater management facilities; population projections, estimation of water and waste quantities, sewers, distribution systems, treatment facilities; governmental regulations. Prerequisites: 150, 160. Three hours.

154 Environmental Analytical Practice (1-4) Analytical procedures used in measuring environmental parameters (includes BOD, COD, Alkalinity, Coliform). Fundamental methods applied to actual waste samples and subsequent data analysis. Prerequisites: 150; Chemistry 31, 32. Two hours.

160 Hydraulics (3-3) Mechanics of incompressible fluids; flow meters; flow in closed conduits and open channels; elements of hydraulic machinery; laboratory studies of flow and hydraulic machinery. Prerequisite: Mechanical Engineering 12. Four hours.

161 Water Resource Engineering Design (3-0) Formulation of water resource projects; development of design methods for: surface water, risk, storage, and control structures, open channels, and drainage systems; design project. Prerequisite: 160. Three hours.

170 Structural Analysis 1 (3-3) Analysis of statically determinate beams, frames, and trusses; expected loads, reactions; influence lines; moving loads; geometric methods
for displacement calculations; introduction to matrix analysis for trusses. Prerequisites: 100, Computer Science 16. Four hours.

171 Structural Analysis 11 (3-0) Statically indeterminate structural analysis by consistent deformation and stiffness methods; determinations of deflections by energy methods; matrix analysis for frame structures and computer-aided analysis. Prerequisite: 170. Three hours.

172 Structural Steel Design (3-0) Theory and design of steel structures including flexural members, axially loaded members and combined stress members; design of composite members; and plastic analysis and design. Recommended Corequisite: 171. Three hours.

173 Reinforced Concrete (3-0) Analysis of stresses in plain and reinforced concrete members; design of reinforced concrete structures; and theory of prestressed concrete. Prerequisite: 171. Three hours.

175 Senior Design Project (0-3) Comprehensive design projects will integrate the multiple areas of specialization in civil engineering. Student teams will prepare and present designs to professional review panels. Prerequisite: Senior standing in CE. Three hours.

176 Senior Design Seminar (1-0) Guest lecturers from private practice discussing professional issues; integration of multidiscipline teams from student design projects; and oral and written presentations. Co-requisite: One design elective; senior standing. One hour.

180 Geotechnical Principles (3-3) Identification, description, and physical properties of soils; characteristics of natural deposits; stress distribution, permeability, consolidation, shear strength, and stability of soils; laboratory testing of particulate systems. Prerequisite: 100. Four hours.

181 Geotechnical Design (3-3) Evaluation of subsoil conditions and earth pressures; design of retaining walls, substructures for buildings and bridges, and caissons. Prerequisite: 180. Four hours.

191, 192 Special Projects (3-0) Investigation of special topics under guidance of faculty member. Library investigations, unique design problems, laboratory and field studies. Prerequisites: Senior standing, departmental permission. Three hours.

193, 194 College Honors

195 Special Topics Prerequisite: Senior standing in Civil or Mechanical Engineering.

226 Civil Engineering Systems Analysis (3-0) Linear programming, dynamic programming, network analysis, simulation; applications to scheduling, resource allocation, routing, and a variety of civil engineering problems. Prerequisite: Senior or graduate standing in CEE or instructor permission. Three hours.

241 Traffic Operations & Design Advanced concepts of traffic engineering and capacity analysis; highway and intersection capacity; traffic analysis and simulation software; design and application of controls. Prerequisites: CE 140. Three hours. Undergraduate/graduate credit.

248 Hazardous Waste Management Engineering Management of hazardous and industrial waste from generation to disposal; emphasis on pollution prevention within industry; waste minimization, recovery, reuse, treatment technologies; environmental regulations, risk assessment, costs and public policy; group projects. Prerequisites: Senior standing in engineering or sciences. Three hours.

249 Solid Wastes (3-0) Significance of solid wastes from municipal, industrial, agricultural, mining; optimization and design of collection, disposal, recycle systems; sanitary landfills, incineration, composting, material recovery. Prerequisites: Chemistry 25, Physics 25. Three hours.

251 Environmental Facilities Design — Wastewater (2-3) Design of wastewater conveyance and treatment facilities; sewage treatment plant design; equipment selection. Prerequisite: 151. Three hours.

252 Industrial Hygiene (3-2) Industrial hygiene problems; effects of pollutants on health; threshold limit values; emphasis on the engineering evaluation of hazard and control techniques. Prerequisites: Chemistry 25, Physics 25. Three hours.

253 Air Pollution (3-0) Sources of air pollution, methods of measurement, standards, transport theory and control techniques used. Emphasis on source measurement and contaminant control design. Prerequisites: Chemistry 25, Math. 21. Three hours.

254 Environmental Quantitative Analysis (3-3) Chemistry and microbiology of water quality management; diffusion, equilibria, reaction kinetics, acids and bases, colloids, enzymes, bacterial physiology, pollution indicator organisms; laboratories demonstrate standard techniques. Prerequisites: Chemistry 31 or 25, Math. 22. Four hours.

255 Physical/Chemical Processes for Water and Wastewater Treatment Theory of physical/chemical processes for treating waters and wastewaters; reactor dynamics, mass transfer, adsorption, ion exchange, precipitation/coagulation, sedimentation, filtration, membrane processes; bench-scale and pilot-scale experimentation. Prerequisites: 150, 151, 154 or equivalent or permission of instructor. Three hours.

256 Biological Processes for Water and Wastewater Treatment Theory and application of biological processes for treating industrial and domestic wastewaters and contaminated ground water; microbiological considerations; aerobic and anaerobic processes; reactor design, in-situ bioremediation; bench-scale and pilot-scale experimentation. Prerequisites: 151 and 154 or equivalent or permission of instructor. Three hours.

259 Measurement of Airborne Contaminants (2-3) Quantifying airborne contaminants from processes and ambient levels. Laboratories demonstrate calibration and measurement, stack sampling and ambient air monitoring, and specific contaminant generation and measurement. Prerequisite: 252 or 253. Three hours.

260 Hydrology (3-0) Theory of precipitation, run-off, infiltration, and ground water; precipitation and run-off data; and application of data for use in development of water resources. Prerequisites: 160, Statistics 141. Three hours.

261 Open Channel Flow (3-0) Application of the laws of fluid mechanics to flow in open channels; design of channels and transition structures including riprap and culverts; gradually-varied flow problems. Prerequisite: 160. Three hours.

265 Ground Water Hydrology (3-0) Principles of ground water hydraulics, well characteristics, aquifers, and use of numerical methods to solve ground water flow problems. Prerequisites: Calculus III and programming experience or instructor’s permission; graduate standing or senior Civil Engineering standing. Three hours.

272 Structural Dynamics Vibrations, matrices, earthquake engineering, stability and wave propagation. Prerequisites: Senior or graduate standing in Engineering or physical sciences, or instructor permission. Three hours. Crosslist: ME272.

280 Applied Soil Mechanics (3-0) Use of soil mechanics in evaluation of building foundations, braced excavations, earth structures; lateral earth pressures, pile foundations, caisson foundations, slope stability, and construction problems. Prerequisite: 180. Three hours.

283 Designing with Geosynthetics (3-0) Geotextiles,
geogrids, geonets, geomembranes, geocomposites, geopipes. Design for separation, reinforcement, filtration, drainage, erosion, control, liners. Applications in transportation, drainage, solid waste containment. Material testing, behavior. Prerequisite: 180. Three hours.

295 Special Topics Content is dictated by expanding professional interest in newly developing, or recently developed, technical areas in which there is particular need or opportunity. Three hours. Prerequisite: Senior or graduate standing.

Classics (CLAS)

COLLEGE OF ARTS AND SCIENCES
Professors Ambrose (Chairperson), R. Rodgers, B. Saylor Rodgers; Assistant Professors Bailly, Usher; Adjunct Assistant Professor Cirignano, Kling, P. Smith; Visiting Assistant Professor B.T. Walsh.

GREEK (GRK)
There are no prerequisites to any Greek course. Students who have previously studied Greek should consult the department.
The first two semesters of a foreign language are excluded from the 45-hour limit on courses from a single department that can be counted toward the 122 hours required for the Bachelor of Arts degree.

1, 2 Elementary Greek Four hours.

3 Self-Paced Greek Fundamentals of Classical Greek through tutorial instruction, credit dependent on amount of material learned. May be repeated for credit. No credit with 1 and 2. Up to eight hours.

51, 52 Intermediate Greek Review of syntax. Fall semester: Readings from Plato, Herodotus, and Euripides. Spring semester: Readings from Homer. Three hours each course.

95, 96 Introductory Special Topics Introductory courses or seminars on topics beyond the scope of existing departmental offerings. See Schedule of Courses for specific titles.

111, 112 Greek Prose Style Readings in literary prose analyzed stylistically and imitated in composition. Required of Greek majors. Three hours.

195, 196 Intermediate Special Topics Intermediate courses or seminars on topics beyond the scope of existing departmental offerings. See Schedule of Courses for specific titles.

197, 198 Readings and Research

201 Greek Orators Selected speeches of Lysias and Demosthenes. Three hours. Alternate years, as needed.

202 Greek Comedy Two plays of Aristophanes. Three hours. Alternate years, as needed.

203 Greek Historians Thucydides, Books I and II; selections from Herodotus and Xenophon’s Hellenica. Three hours. Alternate years, as needed.

204 Greek Tragedy Sophocles’ Antigone, and Euripides’ Medea, or two equivalent plays. Three hours. Ambrose. Alternate years, as needed.

205 Greek Philosophers Dialogues of Plato with attention to language and dialectical method; Aristotle, Xenophon or Presocratic philosophers may be read. Three hours. Alternate years, as needed.

206 Greek Epic Reading in the Iliad and Odyssey. Problems of epic composition and language together with mythological and historical background. Three hours. Alternate years, as needed.

227 Greek Lyric Poetry A study of early Greek personal, elegiac, and choral poetry from Archilochus to Pindar, including Sappho and Alcaeus, Simonides and Bacchylides. Prerequisites: Two years of college Greek or equivalent. Three hours. Alternate years, as needed.

295, 296 Advanced Special Topics Advanced courses or seminars on topics beyond the scope of existing departmental offerings. See Schedule of Courses for specific titles.

HONORS – ARTS AND SCIENCES

230, 231 Honors/Greek Contact Department for specific requirements. Three hours each.

LATIN (LAT)
There are no prerequisites to any Latin course. Students who have had two years of high school Latin normally enroll in Latin 3 or Latin 51. Those who have had more normally enroll in Latin 101. Students with two years of high school Latin may take Latin 1 for credit only by departmental permission and only if the two years were taken two years prior to entrance into the University.
The first two semesters of a foreign language are excluded from the 45-hour limit on courses from a single department that can be counted toward the 122 hours required for the Bachelor of Arts degree.

1, 2 Elementary Latin For students who present less than two years of high school Latin. Four hours.

3 Self-Paced Latin Fundamentals of Classical Latin through tutorial instruction, credit dependent on amount of material learned. Maybe repeated for credit. No credit with 1 and 2. Up to eight hours.

51, 52 Intermediate Latin Fall semester: Selections from Cicero and other prose authors. Spring semester: Selections from Vergil and Ovid. Three hours each course.

95, 96 Introductory Special Topics Introductory courses or seminars on topics beyond the scope of existing departmental offerings. See Schedule of Courses for specific titles.

101, 102 Survey of Latin Literature Selections from principal Roman authors. Three hours.

195, 196 Intermediate Special Topics Intermediate courses or seminars on topics beyond the scope of existing departmental offerings. See Schedule of Courses for specific titles.

197, 198 Readings and Research

203 Republican Prose Extensive reading in Caesar and Sallust, and in the speeches of Cicero. Three hours. Alternate years, as needed.

204 Epic Poets Extensive reading in Lucretius, Vergil, Ovid, and others. Three hours. Alternate years, as needed.

227 Roman Lyric Poets Selections from the works of Catullus, Horace, Propertius, and Tibullus. Three hours. Alternate years, as needed.

251 Roman Letters Letters of Cicero, Horace, and Pliny. Three hours. Alternate years, as needed.

252 Comedy Two plays of Plautus and Terence. Study of the precursors of this literary form. Three hours. Alternate years, as needed.

253 Roman Oratory Selections from Cicero’s De Oratore, Orator, Brutus, and from his speeches. Historical development of forensic and other rhetorical canons. Three hours. Alternate years, as needed.

255 Historians of the Empire Historians of the Empire. Augustus, Res Gestae; Tacitus, Annals, I–IV; selections from Suetonius and Ammianus Marcellinus. Three hours. Alternate years, as needed.

256 Satire Selections from Horace, Persius, Juvenal, Petronius. Study of the development of this literary form. Three hours. Alternate years, as needed.

271 Silver Latin Extensive reading of post-Augustan authors not included in other advanced courses. Three hours. Alternate years, as needed.
295, 296 Advanced Special Topics Advanced courses or seminars on topics beyond the scope of existing departmental offerings. See Schedule of Courses for specific titles.

HONORS – ARTS AND SCIENCES

236, 237 Honors/Latin See page 61 and contact Department for specific requirements. Three hours each.

CLASSICS (CLAS)

Courses entitled "Classics" are not foreign language courses. All readings are in English and no prior knowledge of Greek and/or Latin is required.

15 From Letters to Literature Topics in script, literacy, books, libraries, cultural expression, preservation and access from ancient Mesopotamia to the age of printing and the era of electronic information. Three hours.

21 Classical Greek Civilization (Same as History 21.) A study of the "Golden Age of Pericles," the course covers the whole of Athenian society from art to war, culminating in the trial of Socrates. Three hours.

22 Etymology Derivation of English words from Greek and Latin bases. Training in analysis of unfamiliar words, special attention to scientific vocabulary. Three hours.

23 Classical Roman Civilization (Same as History 22.) Growth of the Roman Empire; political and social disruption in the Roman world from the second century B.C.E., through the first century C.E. Three hours.

24 Myths and Legends of the Trojan War Homeric epics, Virgil's Aeneid, selections from tragedy dealing with the Trojan War and Greco-Roman cultural identity. Examples from art and archaeology supplement the literary theme. Three hours.

35 The End of the Roman Republic Participants describe the Republic's end. Caesar justifies conquest and civil war; Catullus and Sallust reveal a society in turmoil; Cicero documents first-century politics: political gangs, bribery, and violence. Three hours.

37 Early Roman Empire: Literature in Translation Poetry and prose in the first century C.E. (the age of Augustus, Nero, Trajan), emphasizing varieties and limitations of political and literary freedom. Three hours.

42 Mythology (same as WLIT 42.) Greek myth in literature, art, and music from antiquity to modern times. No prerequisites. Three hours. Spring semester.

95, 96 Introductory Special Topics See Schedule of Courses for specific titles.

121 History of Greece (Same as History 121.) Political and social developments of ancient Greece: birth of democracy, conflict of autonomy and hegemony, federal states, invention of "otherness," spatial and cultural restraints on citizenship. Prerequisites: History 9 or Classics 21 (History 21) or appropriate work in Classics. Three hours.

122 History of Rome Expansion of Rome in Italy and conquest of the Mediterranean world: cultural conflict, development of a unifying national identity, and the foundation of European states. Prerequisites: History 9 or Classics 23 (History 22) or appropriate work in Classics. Three hours.

145 Comparative Epic (Same as WLIT 145.) Interdisciplinary introduction to epic poetry and performance, from Gilgamesh and the Homeric poems to the Kalevala traditions of Finland to the griot poetry and music of West Africa. Prerequisite: Sophomore standing. Three hours.

149 History of the Ancient Near East Survey of primary civilizations of Egypt and Mesopotamia and the secondary cultures of Anatolia, Syria-Palestine, Assyria, and Persia. Prerequisites: History 9 or Classics 21 (History 21) or appropriate work in Classics. Three hours.

153 Greek Drama Plays of Aeschylus, Sophocles, Euripides, and Aristophanes in their historical and cultural setting. Prerequisite: Sophomore standing. Three hours.

154 Stories and Histories (Same as WLIT 154.) Creation and development of genres which the Greeks and Romans used to represent true narratives about people or events, especially the development of historical writing. Prerequisites: Sophomore standing, three hours in Classics. Three hours.

155 Ancient Epic Homer, Apollonius, and Vergil, as well as readings selected from other Greek and Latin epic (including epyllia) and didactic poetry. Prerequisite: Sophomore standing. Three hours.

156 Greek and Roman Satiric Spirit Comedy, satire, epigram and prose fantasy as vehicles for political, social, and literary criticism in the Greco-Roman world. Prerequisite: Sophomore standing. Three hours.

157 Greek Feminism (Same as History 157, Women's Studies 157.) The construction of the status of women in ancient Greek society. Readings include lyric, tragic, and comic poetry, piety, oratory, novel, and nonliterary documents. Prerequisites: Sophomore standing, three hours in literature, history, anthropology, or sociology. Three hours.

158 Greco-Roman Political Theory History of Greco-Roman political thought and political reality, as revealed by lawgivers, philosophers, politicians, and historians. Prerequisite: Sophomore standing. Three hours.

161 Plato (Same as Philosophy 108.) A survey of Plato's works, including the "early," "middle," and parts of the "late" dialogues. Emphasis will be laid on reading the dialogues themselves. Prerequisites: One course in Philosophy or one course in Classics (Greek Culture), or Greek. Three hours.

195, 196 Intermediate Special Topics See Schedule of Courses for specific titles.

197, 198 Readings and Research

221, 222 Seminar in Ancient History Selected aspects of Near Eastern, Greek, or Roman History (e.g. trade and colonization, imperialism, social and political institutions, cultural and intellectual developments). Prerequisites: Junior, senior, or graduate standing, 12 hours of history. Three hours.

295, 296 Advanced Special Topics See Schedule of Courses for specific titles.

See also: Art 148 (Greek Art) and Art 149 (Roman Art); European Studies.

For the Teaching of Latin, see Secondary Education 259.

Prizes from endowed funds are awarded to outstanding graduating seniors and outstanding students in sophomore Latin.

HONORS – ARTS AND SCIENCES

214, 215 Honors/Classics Contact Department for specific requirements. Three hours each.

Communication Sciences (CMSI)

COLLEGE OF ARTS AND SCIENCES

Professors Guitar, McCauley, Prelock (Chairperson); Associate Professor Roberts.

1 Elementary American Sign Language I Fundamentals of expression and understanding of American Sign Lan-
guage, including grammar, facial markers, body classifiers, vocabulary, and fingerspelling. Elements of Deaf Culture are also explored. Three hours.

2 Elementary American Sign Language II Continuation of fundamentals of expression and understanding of American Sign Language, including grammar, facial markers, body classifiers, vocabulary, and fingerspelling. Elements of Deaf Culture are also explored. Prerequisites: 1 or equivalent experience. Three hours.

20 Introduction to Disordered Communication Survey of language, speech, and hearing disorders, emphasizing the importance of understanding such disorders as a part of the fuller understanding of human behavior. Three hours.

51 Intermediate American Sign Language Continuation of 1, 2 designed to foster further development of proficiency in American Sign Language and appreciation of Deaf Culture. Prerequisites: 2, or equivalent experience. Three hours.

80 Introduction to Linguistics Introduction to biological, cognitive, and cultural bases of human communication through language, and to modern linguistic theory. Assignments provide opportunities for critical thinking and writing. Three hours.

90 Phonetics Linguistic, acoustic, and articulatory phonetics applied to the description of speech. Stresses use of the International Phonetic Alphabet with English, foreign languages, and disordered speech. Three hours.

94 Development of Spoken Language Speech and language acquisition interpreted in light of current learning and cognitive theory, linguistic theory, and methods of linguistic analysis. Three hours.

95, 96 Introductory Special Topics Introductory courses or seminars on topics beyond the scope of existing departmental offerings. See Schedule of Courses for specific titles.

101 Speech Science Structure and function of the respiratory, phonatory, and articulation systems of the vocal tract utilized for production of speech. Models of speech production emphasized. Four hours.

105 Hearing Science Study of processes of human hearing emphasizing sound, acoustics, psychoacoustics, perception of speech, and the anatomy and physiology of the hearing mechanism. Prerequisite: 80 or permission. Three hours.

125, 126 Clinical Experience A supervised exposure to clinical practice in speech-language pathology. Students gain experience as assistants in the University Speech-language clinic. Prerequisite: Six hours in Communication Sciences. Three hours.

160 Intercultural Communication Exploration of communication between individuals of different races, socioeconomic status, ethnic groups, genders, and occupations. Emphasis on culturally-based misunderstanding, conflict, and resolution. Three hours.

162 American English Dialects (Same as English 105) Class will examine dialects of American English and the methodology of dialectology with focus on Vermont speech and the social meaning of dialect variation. Three hours.

164 Structure of the English Language Using descriptive linguistic theory, this course examines basics of English grammar with emphasis on hands-on examples. Also includes exploration of politicization of English grammar. Prerequisites: 3 hours English or CMSI. Three hours.

195, 196 Intermediate Special Topics Intermediate courses or seminars on topics beyond the scope of existing departmental offerings. See Schedule of Courses for specific titles.

197, 198 Readings and Research

208 Cognition and Language (Same as Psychology 208) Study of cognition and language in terms of mental representation models; contemporary models of memory, as well as capacity theories of language comprehension and production. Prerequisite: Psychology 109 or 101 or Statistics 101 or 141. Three hours.

213 Cognition and Aging (Same as Psychology 213) Changes in both sensory and cognitive aspects of aging, including changes in vision, hearing, perception, learning, and memory. Prerequisite: 208 or permission of instructor. Three hours.

262 Measurement of Communication Processes Introduction to the scientific method and measurement principles used in group and single-case research on communication and as applied to persons with communication disorders. Prerequisites: 80, 101, 105; Statistics 111 or 141. Four hours.

271 Audiological Assessment Examination of basic parameters in measurement of hearing. Pure tone testing, masking, impedance, and speech evaluations. Prerequisite: 105 or instructor's permission. Three hours.

272 Auditory Habilitation of Hearing Impaired Children Survey of the handicapping effect of hearing disorders on the developing child and the principles of rehabilitation utilized for treatment of this disorder. Prerequisites: Fifteen credits in Communication Sciences, including 94, 271. Three hours.

281 Cognitive Neuroscience The structure and organization of the human central nervous system as relative to higher cognitive and linguistic behaviors. Prerequisites: Nine hours at the 200 level; Biology 4. Three hours.

282 Medical Speech-Language Pathology Overview of populations and terminology specific to practice within medical settings. Topics include motor speech, aphasia, dementia, swallowing, laryngectomy/voice, cognition, and tracheostomy/ventilator dependence. Prerequisites: Nine hours in Communication Sciences or instructor’s permission. Three hours.

283 Swallowing Disorders Introduction to normal and disordered swallowing function across the life span including etiologies, signs/symptoms of dysphagia, diagnostic procedures and treatment within an interdisciplinary model. Prerequisites: Nine hours in Communication Sciences or instructor’s permission. Three hours.

284 Augmentative Communication An introduction to development and selection of augmentative/alternative communication strategies and systems for persons with severe communication challenges. Prerequisites: Nine hours in Communication Sciences or instructor’s permission. Three hours.

285 Collaborative Intervention within School Settings Introduction to a transdisciplinary approach to collaborative, curriculum-based assessment and intervention for students with special needs in school settings. Prerequisites: Nine hours in Communication Sciences or instructor’s permission. Three hours.

287 Early Language and Communication Intervention Research in normal and disordered language, cognition, and social development is applied to interventions for children, birth to age 5, with language and communication problems. Prerequisite: 94. Three hours.

293, 294 Seminar Prerequisite: Instructor’s permission. Variable credit.

295, 296 Advanced Special Topics Advanced courses of seminars on topics beyond the scope of existing departmental offerings. See Schedule of Courses for specific titles.

299 Autism Spectrum Disorders: Issues in Assessment & Intervention Assessment and intervention considerations in
.communication, social interaction and play, selection and use of evaluation tools, and implementation of intervention strategies for children with autism. Three hours. Undergraduate/graduate credit.

HONORS – ARTS AND SCIENCES

216, 217 Honors/Communication Sciences Contact Department for specific requirements. Three hours each.

Community Development and Applied Economics (CDAE)

COLLEGE OF AGRICULTURE AND LIFE SCIENCES

Professor Kolodinsky (Chairperson); Associate Professors Ferreira, Ford, Pelsue, Petrillo, Schmidt; Assistant Professors Liang, Sue, Wang; Lecturers Ashman, Baker, Becker, Patterson; Extension Associate Professor Trent; Extension Associate Professor Trent; Extension Assistant Professor Parsons; Visiting Professor Schramm.

1 Drafting and Design Drawing Basic drafting methods and procedures of architectural, three-view, oblique, isometric, and perspective drawings. Creating freehand pictorial presentation drawings. Three hours.

2 World Food, Population, and Development Agricultural development emphasizing natural and economic phenomena and the effect of food supplies on population trends and policies. Three hours.

6 Energy Alternatives (3–0) Concepts of energy, work, and power. Energy conversion, utilization, and conservation. Alternatives to fossil fuels including solar, wind, biomass, etc. Energy systems for rural areas. Three hours.

15 Design Strategies Introduction and analysis of aesthetics and function of design in the context of communications and marketing, the built environment and community development. Three hours.

15 Sketching and Illustration (1-4) Techniques of sketching, color rendering, and scale drawing in relation to nature forms, the human figure, and interior space. Preparation of portfolio. Prerequisite: 15. Three hours. Spring.

30 Design Studio Skills: Woodworking Common methods, processes, materials, and equipment employed in transforming wood into useful products. Three hours.

61 Principles of Agricultural, Resource and Community Development Economics Introduction to principles of microeconomics and their application to food and agricultural markets, resource management, and community development. Three hours.

101 Computer-Aided Drafting and Design (CADD) Using a computer to create, manipulate, and record drafting and design concepts, symbols, and conventions to prepare technical and/or presentation drawings. Prerequisite: 1 or instructor’s permission. Three hours.

102 Sustainable Community Development Introduction to perspectives and methods used to develop healthy communities that are economically, socially, and environmentally sustainable with rural and urban, U.S. and international examples. Prerequisites: CDAE 61 or equivalent, and by permission. Three hours.

110 Entrepreneurial Industrial Production (1-4) Principles, concepts, methods employed in organizing capital, labor, tools, machines for producing products. Students function as labor source and mass produce and market a product. Prerequisites: 30 or 35 or 166, or instructor’s permission. Three hours.

117 History of Costume (See Theatre 41.) Prerequisite: Art 6 or Theatre 1. Three hours. Fall.

125 Retail Management Examination of a variety of retail contexts emphasizing practices and techniques necessary for successful operation: the retail mix, merchandising, and related developments in retailing. Prerequisite: Sophomore standing. Three hours. Fall.

128 The Consumer and Advertising Examination of advertising strategy and how it impacts consumers and the economy. Extensive application of critical analysis to actual advertising campaigns from development through evaluation. Prerequisite: Junior standing. Three hours. Fall.

131 Light Frame Buildings (3-0) Site planning, building planning, material selection, Functional and structural considerations including heating, ventilating, and insulation. Consideration of environmental relationships. Prerequisite: 6 or Math. 9 or 10. Three hours.

156 Law, Ethics, and Responsibility The roles of law and ethics in guiding the actions of individuals and organizations, and the impact of those actions on others, including consumers, employees, communities, and developing countries. Prerequisite: Sophomore standing. Three hours. Spring.

158 Personal and Family Finance An examination of personal and family financial management concepts and topics within various income levels and stages in the life cycle. Prerequisites: Economics 11 or equivalent. Three hours. Fall.

159 Consumer Assistance Program Jointly sponsored by UVM and Vermont Attorney General. Under supervision of an attorney, students respond to phone and mail requests for consumer information and handle consumer complaints. Prerequisite: Sophomore standing. Three to six hours.

166 Introduction to Agricultural and Resource Entrepreneurship Introduction to the theory and practice of organizing and operating an agricultural or resource-based business. Emphasis on business development, operation, financing, marketing, and social responsibility. Prerequisite: Sophomore standing. Three hours.

167 Financial Management for Agricultural and Resource Entrepreneurs Financial management concepts for agricultural and resource-based businesses, with emphasis on interactions between business and personal financial decisions faced by entrepreneurs. Prerequisites: BSAD 65, CDAE 166 or permission. Three hours.

168 Marketing for Agricultural and Resource Entrepreneurs Marketing concepts and methods and their applications in agricultural and resource businesses. Focus on development of marketing plan and its use in guiding business operations. Prerequisites: CDAE 61, 166. Three hours.

169 Small Business Computer Application Using the microcomputer to accomplish tasks specific to small businesses. One credit modules may include spreadsheets, databases, presentations, mapping markets, WWW, project management and local area networks. Prerequisites: 85 or
equivalent. One to six hours.

170 Solar Strategies for Building Construction Passive, active, and hybrid heating; photovoltaic electric systems. Physical principles, site evaluation, component and system analysis, materials selection, and design of low-cost systems. Prerequisite: Math 10 or permission. Three hours.

171 Community and International Economic Transformation Models of economic development, including constraints to economic transformation and policy approaches and strategies for promoting social welfare and sustainable development. Prerequisites 2, 61 or equivalent. Three hours.

175 Farm Credit Fellowship Practicum/Seminar Acquaints students who have a strong interest in farm management and farm finance with financial intermediaries serving agriculture. Prerequisite: 167. Three hours.

180 Real Estate Appraisal Basic concepts and methods of measuring real estate values. Prerequisites: 61 or equivalent, or instructor’s permission. Three hours.

191 Special Problems Independent projects under direction of a faculty member. Includes undergraduate teaching assistance. 291 number for juniors and seniors only. Prerequisites: Permission. One to six hours (maximum).

195 Special Topics Lectures or readings on contemporary issues in Community Development and Applied Economics. Enrollment may be more than once, up to 12 hours.

196 Field Experience/Practicum Professionally-oriented field experience under joint supervision by faculty and business or community representative. Total credit toward graduation in 196 and 296 cannot exceed 15 hours. Prerequisites: Permission. One to 15 hours.

205 Rural Communities in Modern Society The changing structure and dynamics of rural social organization in context of modernization and urbanization. Emphasis on rural communities in the U.S. Prerequisite: Six hours of sociology. Three hours.

207 Markets, Food, and Consumers Learn how producers, processors, wholesalers, cooperatives, retailers, consumers, and governments affect the movement of food and fiber products through the production-marketing chain. Prerequisite: 61 or equivalent. Three hours.

208 Agricultural Policy and Ethics An examination of American agriculture and policies from various perspectives — historical, political, ecological, technological, social, economic, and ethical. Emphasis on contemporary issues, policy options, and future development. Prerequisites: 61 or equivalent, permission. Three hours. Fall.

210 Seminar in Small Business Marketing and Entrepreneurism Students learn through participation in a series of guest lectures and field trips, the challenges, opportunities, and strategies faced and employed by small business entrepreneurs in the area of marketing. Prerequisite: 168 or 207. Three hours. Spring. (Not offered for graduate credit.)

218 Community Leadership, Organization, and Institutional Development Role of civic engagement, leadership, and social and political institutions in a community development context. Special attention given to problems of formulation and implementation of alternative change strategies. Prerequisites: Jr. standing, CDAE 102, or permission. Three hours.

231 Applied Computer Graphics Directed research, planning, design, technical experimentation, production and evaluation for computer-generated design application. Prerequisite: 15 or permission. Three hours. (Not offered for graduate credit.)

237 Economics of Sustainability Economic analysis that integrates natural resource and community planning for sustainable development at local, national and international levels. Examples include land use, sustainable agriculture and green business. Prerequisites: 61 or equivalent, or permission. Three hours.

250 Applied Research Methods Methods used in the collection and analysis of qualitative and quantitative data. Critical review of literature, and data collection, analysis, and interpretation for descriptive, inferential, and evaluation research. Prerequisites: Statistics 141 or permission. Four hours.

251 Contemporary Policy Issues in Community Development In-depth study of contemporary community development policy issues such as affordable housing, land use and sprawl, alternative energy, environmental sustainability, effective community planning, social and environmentally responsible business. Prerequisites: CDAE 102 or permission. Three hours.

255 Applied Consumption Economics Analysis and application of micro-economic principles as they relate to consumers, including consumption and saving, investments in human capital, market work, household production, and leisure choices. Prerequisites: ECON 172. Three hours.

258 Consumer Policy: Issues and Analysis Examination and analysis of contemporary issues underlying a variety of consumer policies such as health care, income inequality, and consumer protection. Prerequisites: 254 or permission, Political Science 21 or similar course. Three hours. Spring. (Not offered for graduate credit.)

264 Risk Analysis and Forecasting Procedures Analytical concepts and skills and their applications in risk analysis related to agricultural and resource markets focusing on decision making processes. Prerequisites: STAT 141, CDAE 61, MATH 19, or instructor’s permission. Three hours. Undergraduate/graduate credit.

266 Decision Making for Agricultural and Resource Entrepreneurs Quantitative decision-making methods and applications in agricultural and resource businesses. Major topics include linear programming, risk and uncertainty, inventory decisions, and e-commerce. Prerequisites: CDAE 166, Math 19, and AGRI 85 or CS 2. Three hours. Undergraduate/graduate credit.

267 Strategic Planning for Agricultural and Resource Entrepreneurs Applications of marketing, finance, and management strategies. Drafting a simulated business plan for rural entrepreneurs and economic development. Prerequisites: ARE majors or minors, or with instructor’s permission; senior standing. Four hours. Undergraduate/graduate credit.

272 International Economic Development International trade, finance, investment and development theories and policies for community development. Prerequisites: Jr. standing, CDAE 102 or instructor’s permission. Three hours. Undergraduate/graduate credit.

273 Project Planning and Development National, community and private sector project development. Focus on planning methods and policy instruments, sectoral linkages, and contributions to the economy as a whole. Prerequisite: 171 or instructor’s permission. Three hours. Undergraduate/graduate credit.

291 Special Problems Independent projects under the direction of a faculty member. Includes undergraduate teaching assistance. Prerequisite: Departmental permission. Students may enroll more than once for a maximum of 12 hours. One to six hours.
292 Seminar Reports, discussions, and investigations in selected fields. May enroll more than once up to six hours. One to three hours.

295 Special Topics Lectures or readings on contemporary issues in Community Development and Applied Economics. Enrollment may be more than once, up to 12 hours.

296 Field Experience/Practicum Professionally-oriented field experience under joint supervision by faculty and business or community representative. Total credit toward graduation in 196 and 296 cannot exceed 15 credits.

297, 298 Undergraduate Research Work on a research problem under direction of a staff member. Findings submitted in written form as prescribed by the department. Prerequisite: Senior standing. Three hours.

Computer Science (CS)

COLLEGE OF ENGINEERING AND MATHEMATICS

Associate Professors Snapp, Wu (Chairperson); Assistant Professors Damon, Eppstein, Lee, Ling; Lecturers Douglas, Erickson, Pechenick, Redmond; Research Assistant Professor Zhang; Research Professor Yu.

2 Microcomputer Applications Software (2-2) Popular applications software packages: word processors, spreadsheets, databases. Emphasis on hands-on experience. Prerequisite: Two years high school algebra. May not be taken for credit after receipt of credit for any CS course numbered 11 or higher. Three hours.

3 Concepts of Computer Systems Introduction to computer systems, components, system software, editors, utilities and language processors, programming, problem solving, applications. May not be taken for credit concurrently with, or following receipt of credit for, any CS course numbered higher than 3. Prerequisite: Two years high school algebra. Three hours.

5 Introductory Special Topics Prerequisite: Instructor’s permission. Hours variable. May not be taken for credit after any CS course numbered 16 or higher.

14 Visual Basic Programming Programming in the MS Windows environment using forms, objects, methods, functions, and code. Creation of regular applications and customized office suite applications. Prerequisites: 2 or Business Administration 40, or instructor permission. Three hours.

16 Programming in MATLAB for Engineers and Scientists (3–2) Problem solving, computer programming, and the use of standard numerical methods in the context of engineering and scientific applications using MATLAB. Prerequisite: Math. 21; or Math. 10 (or equivalent, with instructor permission) and concurrent enrollment in Math. 21. Four hours.

21 Computer Programming I Introduction to algorithmic problem solving. Designed to provide a foundation for further studies in computer science. Credit not given for more than one in the pair CS 11, 21. Prerequisite: Math. 10 or a strong background in secondary school algebra and trigonometry. Four hours.

26 Computer Programming II Introduction to more advanced programming concepts that provide a foundation for further study in computer science. Topics include data structures and algorithms, concepts of style, design, documentation, testing and debugging techniques. Prerequisites: 21. Three hours.

48 Introduction to Web Development Provides strong foundations in HTML, working with images, beginning Java Script programming, and web design so that the student can create a functional web site. Prerequisites: Basic familiarity with computer use. Three hours.

95 Special Topics Prerequisite: Instructor’s permission. Hours variable.

100 Object-Oriented Programming Object-oriented software analysis, design, and programming using a modern object-oriented programming environment. Topics include encapsulation, information hiding, inheritance, and polymorphism. Prerequisite: 26. Three hours.

101 Computer Organization Introduction to computer system organization including performance, assembly language, machine-level data representation, arithmetic for computers, processor datapath control, memory, and input/ output. Prerequisite: 26. Three hours.

103 Programming Languages Systematic treatment of principles underlying the features and implementation of programming languages. Contrast of traditional procedural languages and at least one nontraditional language. Prerequisite: 26. Three hours.

148 World Wide Web Design and implementation of web pages to support forms, queries, active server pages, authentication, and security. Electronic commerce on the web. Prerequisite: One semester of computer programming, and CS 48 (or equivalent knowledge of Java Script and HTML). Three hours.

195 Special Topics Prerequisite: Instructor’s permission. Hours variable.

201 Operating Systems Supervisory and control software for multiprogrammed computer systems. Processes synchronization, interprocess communication, scheduling, memory management, resource allocation, performance evaluation, object-oriented systems, case studies. Prerequisites: 103, 104. Three hours.

202 Compiler Construction Practice in design and implementation of translators for ALGOL-like languages. Regular and context-free grammars, parsing, code generation for stack and register machines. Interpreters. Run-time storage administration for block-structured languages. Prerequisites: 103, 243. Three hours.

204 Database Systems Techniques for processing very large collections of data. Secondary storage. Database design and management. Query languages and optimization. Database recovery. Prerequisites: 101, 104; 201 recommended. Three hours.

205 Software Engineering Treatment of software engineering problems and principles, including documentation, information hiding, and module interface specification syntax and semantics. Requires participation in a team project. Prerequisite: 100, 104. Three hours.

224 Analysis of Algorithms (Same as Math. 224) Introduction to both analytical and experimental techniques in algorithm analysis. Basic algorithm design strategies. Introduction to complexity theory. Prerequisites: 103, 104. Math. 173 recommended. Three hours.

231 Bioinformatics (Same as MMG 231)

1 Introduction to Dental Hygiene  Principles of dental hygiene, orientation to clinical practice, and preclinical experience. Four hours.

2 Introduction to Clinical Dental Hygiene  A continuation of 1 with early clinical experience. Prerequisites: 1, Anatomy and Physiology 19. Two hours.

11 Oral Tissues I  Introduction to the morphology and physiology of the oral tissues. Three hours.

12 Oral Tissues II  Continuation of 11 emphasizing head and neck anatomy and oral embryology. Prerequisites: 11, Anatomy and Physiology 19. Three hours.

61 Radiography  Study, demonstration, and practice of fundamentals of intraoral radiographic technique. Recognition of radiographic appearance of common oral disorders. Prerequisites: 1, 11, Anatomy and Physiology 19 or permission. Two hours.

62 Community Oral Health  Discussion and project participation in the planning, development, and implementation of dental health education, public health dentistry, and the private practice of dentistry. Three hours.

91 Dental Materials  Study and manipulation of the materials commonly used in dental practice. Prerequisites: 2, 12 or permission. Two hours.

141 Clinical Dental Pharmacology  Introduction to clinical pathology and pharmacological management in the treatment of dental patients. Prerequisites: 2, 12. Three hours.

143 Periodontics  Morphologic and functional aspects of the supporting structures, recognition and therapy for diseases of the periodontium. Prerequisites: 2, 12, Anatomy and Physiology 20. Three hours.

146 Oral Pathology  Functional and organic diseases of the oral cavity and their clinical management. Prerequisite: 143 or permission. Two hours.

181 Senior Clinic and Seminar  Clinical practice with patients from simple to more difficult cases, both children and adults. Prerequisites: 2, 12, 61, Anatomy and Physiology 20. Four hours.

182 Senior Clinic and Seminar  Continuation of 181. Prerequisites: 143, 181. Four hours.

195 Special Topics  Prerequisites: Instructor’s permission.

Economics (EC)

COLLEGE OF ARTS AND SCIENCES

Professors Gibson; Associate Professors Gedeon, Knodell (Chairperson), McRae, Rizvi, Seguino, Thomson, Woolf; Assistant Professors Brooks, Scidmore; Lecturer Sawders.

All courses in the Department of Economics carry three hours of credit unless otherwise stated or arranged.

Not all courses are offered every semester; for complete information, consult the Schedule of Courses printed each semester. The Department also publishes a brochure of extended course descriptions each semester.

Courses numbered 11-96 are introductory courses. All of these courses may be applied towards the minor, and all except 20 towards the major, in Economics.

11 Principles of Macroeconomics  Introduction to economic concepts, institutions, and analysis, particularly as related to the economy as a whole.

12 Principles of Microeconomics  Study of individual economic units with particular emphasis on market interactions among firms and households. Prerequisite: 11.

20 Economic Problems  Exploration of a current economic issue. Topics vary and may include international trade, debts and deficits, environment, ethnicity, race and gender, and employment and work.
60 Capitalism and Human Welfare Investigates theories of growth of the capitalist economy and the historical process of the ascendance, domination, and recent relative decline of the U.S. economy.

95, 96 Introductory Special Topics See Schedule of Courses for specific titles.

Courses numbered 110-196 are intermediate-level courses. They have 11 and 12 as prerequisites. However, students with the appropriate interdisciplinary background may be admitted into 110, 113, 116, 153, and 156 by permission of the instructor. Economics 170, 171, and 172 also presuppose Math 19. Prerequisites noted in the following descriptions are in addition to these.

110 American Economic History Survey of the economic history of the U.S. from colonial origins through early 20th century, emphasizing economic and institutional changes and events promoting economic growth and development.

113 Evolution of Capitalism Origins and development of capitalism; their social-economic institutions and their transference from Western Europe to North America.

116 Comparative Economic Systems Major economic systems of mixed capitalist and socialist variety, their theoretical models, basic institutions, and policies from a comparative point of view.

120 Money and Banking Commercial and central banking with special attention given to the Federal Reserve system, monetary theory, and policy.

130 Public Policy Revenues and expenditures of federal, state, and local governments and intergovernmental relationships; the effects of expenditures and taxation upon individuals, business institutions, and the national economy.

133 Economics of Environmental Policy Investigation of the relationship of markets and government regulation to environmental quality. Alternative public policies to improve efficiency and equity will be evaluated.

140 Economic Development Theories of economic growth applied to developing countries of the contemporary world including the political and social determinants of economic progress.

143 International Economics I: Trade Theory, policy, and history of international trade patterns, terms of trade, protectionism, competitiveness, structural adjustment, and international aspects of micro-economics.

146 International Economics II: Finance Theory, policy, and history of foreign-exchange markets, balance of payments, world monetary arrangements, and international aspects of macroeconomics and capital markets.

150 Labor Economics The economics of work, including wage determination, unemployment, productivity, discrimination, unions, and policy issues.

153 Race, Ethnicity, and the Economy Courses investigating the economic status and significance of racial and ethnic divisions in historical and contemporary U.S. society. Content varies by instructor. Prerequisite: Sophomore standing.

156 Women in the U.S. Economy Historical and theoretical overview of women's participation in the U.S. economy, emphasizing economic controversies surrounding family structure and pay equity issues.

160 Industrial Organization The structure, conduct, and performance of U.S. industry and appraisal of its economic efficiency and social impact, including governmental policies.

170 Economic Methods Introduces statistical and mathematical methods for understanding economic literature including probability distributions, data sources, statistical concepts, and simple regression, taught using economic examples and applications. Prerequisites: Math 19. Credit not given for both EC170 and any of the following STAT courses: 111, 140, 141, 143. Three hours.

172 Microeconomic Theory Analysis of consumer demand, supply, market price under competitive conditions and monopolistic influences, and the theory of income distribution. Prerequisite: Math 19.

194 ISSP Thesis Design, research, and writing of a thesis on an economic topic for students in the Integrated Social Sciences Program.

195, 196 Intermediate Special Topics See Schedule of Courses for specific titles. Courses numbered 200-298 are advanced courses and all have 170, 171, and 172 as prerequisites. The courses numbered 210 through 260 are seminars whose topics are drawn from broad areas within economics. The precise content of these seminars varies from semester to semester and a given seminar may be repeated if its content differs. Consult the Schedule of Courses or departmental brochure for details. Economics courses are not offered for graduate credit.

210 Seminar A: Economic History, Systems, and Ideas Topics on the evolution of economic systems and ideas.

220 Seminar B: Macroeconomics and Finance Topics such as national economic policies, income, wealth and welfare, financial markets and the macroeconomy, central banking, and other issues concerning macroeconomics and money.

230 Seminar C: Microeconomics and its Applications Topics from microeconomics and fields applying it, such as game theory, health economics, environmental economics, the Vermont economy, urban and regional economics.

240 Seminar D: International and Development Economics Topics such as the economies of countries or regions, international trade agreements, international debts, deficits and structural adjustment, and aspects of development economics.

250 Seminar E: Labor, Race, and Gender Topics such as labor-management relations, aspects of contemporary labor markets, discrimination, economics of education, and other aspects of the economics of gender and race.

260 Seminar F: Firms, Institutions, and Growth Topics such as antitrust and regulation, decision making and the firm, technological change and industrial policies, and the economics of growth.

270 Econometrics and Applications A combination of economic theory, mathematics, and statistics for testing economic hypotheses and developing economic models. Conceptual development and applications.

295, 296 Advanced Special Topics See Schedule of Courses for specific titles.

297, 298 Readings and Research Independent study with permission of supervising professor prior to registration.

HONORS — ARTS AND SCIENCES

218, 219 Honors/Economics Contact Department for specific requirements.
COLLEGE OF EDUCATION AND SOCIAL SERVICES

Any information concerning course instructor may be obtained from department chairperson at the beginning of each semester.

The College of Education and Social Services offers the following courses on a program basis. Departmental permission is required for enrollment. Individual courses may require a lab fee.

55 Special Topics I

Designed so that its content and structure may accommodate special issues not especially appropriate within the boundaries of an existing course. Open to first-year students. Two to six hours.

181 Student Teaching

Teaching in elementary or secondary schools under guidance of cooperating teachers, principals, and college supervisors. A full-time, full-semester, 12-credit experience. Prerequisite: Acceptance into the teacher education program; must meet criteria for student teaching. Variable credit, three to 12 hours.

197 Readings and Research

Individual research problem or directed reading in an area of special interest to the student. Prerequisite: Instructor’s permission. Variable credit, one to four hours. May be repeated up to eight hours.

200 Contemporary Issues

Designed so that content and structure may accommodate special issues not especially appropriate within boundaries of an existing course. Prerequisite: Twelve hours in education and related areas. One to six hours.

295 Laboratory Experience in Education

Supervised field work designed to give students experience in specialized areas for their professional development. Prerequisite: Instructor’s permission. Credit as arranged.

ART EDUCATION — EDAR

140 Foundation Studio for Elementary Education Majors

Students select a foundation studio course (Art 2, 3 or 4) from those sections designated each semester on the course schedule. See course descriptions listed under Art. Three hours.

177 Curriculum and Practice in Elementary Art

Study and implementation of curriculum in elementary school. Students work directly in an elementary classroom. Lectures and discussions. Prerequisite: Eighteen hours studio art, junior standing. Four hours.

178 Curriculum and Practice in Middle and High School Art

Study and implementation of curriculum in middle and high school. Students work directly in a middle or high school. Lectures and discussions. Prerequisite: Eighteen hours studio, junior standing. Four hours.

283 Seminar: Current Issues in Art and Education/Stu- dent Teaching

Research and discussion of issues relevant to contemporary art and the teaching of art. Prerequisite: Senior standing or permission. Three hours.

284 Seminar: Current Issues in Art and Education/Alternative Sites

Research, discussions, and field work relevant to contemporary art and the teaching of art. Prerequisite: Junior standing or permission. Three hours.

COUNSELING — EDCO

220 Developmental Perspectives in Counseling

Approaches to understanding human behavior in applied settings. Emphasis on behavior development as an interpersonal process. Prerequisite: Twelve hours in education and psychology. Three hours.

291 Special Topics in Counseling

Special issues in counseling not appropriate to content of an existing course. Variable hours.

EARLY CHILDHOOD EDUCATION PreK-3 — EDEC

1 Infant/Toddler Curriculum Block

Study of infant/toddler development through a combination of lecture, discussion, observation, and participation in an infant/toddler group setting. Prerequisite: Majors only or permission. Four hours. Offered spring semester only.

63 Child Development

The biological, psychological, and social growth and development of children and their relationships with family, peers, and institutions. Three hours.

100 Preschool Curriculum Block

Examines the development and education of children three to five years of age through lecture, discussion, observation and participation in an early childhood preschool setting. Prerequisite: EDEC 1. Ten hours. Offered fall semester only.

187 Field Practicum

Full semester student teaching internship in a primary (K-3) setting. Prerequisite: EDEC 189; permission. Twelve hours.

189 Early Childhood Practices

Supervised planning and conducting the Early Childhood Laboratory Center. Integrated Readings and Research, Early Childhood Seminar, and Curriculum Workshop. Prerequisite: Permission. Variable credit, up to 15 hours.

195 Special Topics

Lectures, laboratories, readings, or projects relating to contemporary areas of study. Enrollment may be more than once, accumulation up to 12 hours. Prerequisite: Varies with course.

291 Special Problems

Reading, discussion, and special field and/or laboratory investigation. Prerequisite: Departmental permission. Students may enroll more than once up to 12 hours. One to six hours.

295 Special Topics

Lectures, laboratories, readings, or projects relating to contemporary areas of study. Enrollment may be more than once, accumulation up to 12 hours. Prerequisite: Departmental permission.

296 Field Experience

Professionally-oriented field experience under joint supervision by faculty and community representative, credit arranged up to 15 hours. Prerequisite: Departmental permission.

ELEMENTARY EDUCATION — EDEL

10 Introduction to Teaching and Learning as Meaningful Enterprise

Orientation to professional program. Introduction to research base for meaningful teaching and learning. Analysis of teaching autobiographies by successful teachers. One credit each semester for two consecutive semesters.

11 Computers in the Elementary Education Classroom

Students use the University’s network and internet, exchange e-mail, construct electronic portfolios, and examine software to help them in their studies and future classrooms. Three hours.

24 Learners and the Learning Process

Distinctions
among dominant theories of learning and development. Learning theories applied to selected issues derived from context of schools. Students work with individual learners in appropriate settings. Three hours.

56 Teachers and the Teaching Process Students examine lives of teachers, demands of the profession, and selected models of teaching. Student observation of teachers in appropriate settings and knowledge of learning and development. Prerequisites: 10, 24; concurrent with EDEL 177, EDSP 5. Three hours.

155 Laboratory Experience in Inquiry Supervised practicum in field sites. Implementation of teaching methods from Inquiry Block. Documentation of classroom work, child study, and development of portfolio. Prerequisites: Admission to Elementary Teacher Education Program; concurrent with EDEL 157, 158, 159. Three hours.

156 Teaching Mathematics for Meaning Methods of teaching mathematics in elementary school. Research base for how children learn mathematics and how math curriculum is organized. Special focus on teaching diverse groupings of learners. Prerequisites: Admission to Elementary Teacher Education Program; concurrent with EDEL 155, 158, 159. Three hours.

157 Social Education and Social Studies Methods of social education for elementary-aged school children. Promoting children’s efficacy by nurturing personal interests. Development of folio of developmentally-sound examples of social studies learning. Prerequisites: Admission to Elementary Teacher Education Program; concurrent with EDEL 155, 158, 159. Two hours.

158 Teaching Science for Meaning Methods of science education for elementary-aged school children. Translating science content into meaningful science inquiry. Preparation of demonstration teaching lessons. Prerequisites: Admission to the Elementary Teacher Education Program; concurrent with EDEL 155, 157, 158. Two hours.

159 The Visual and Performing Arts, K-6 Incorporation of the visual and performing arts in elementary school curriculum. Focus on artistic expression as a way of learning. Emphasis on cross-cultural art, music, drama. Prerequisites: Admission to Elementary Teacher Education Program; concurrent with EDEL 155, 157, 158. Two hours.

175 Laboratory Experience in Literacy Supervised practicum in a field site. Implementation of teaching methods from Literacy Block. Documentation of classroom work, child study, and development of portfolio. Prerequisites: Admission to Elementary Teacher Education Program; concurrent with EDEL 156, 157, 158. Three hours.

176 Language Arts and Literacy Skills Cognitive research base for the social context of children’s learning. Methods of language arts as literate activity. Emphasis on emergence of literacy in the child of special need. Prerequisites: Admission to Elementary Teacher Education Program; concurrent with EDEL 156, 157, 175. Two hours.

177 Children’s Literature and Literacy Learning about the breadth of literature available for use in elementary school. Developing the ability to evaluate and use literature in reading and writing activities. Emphasis on bias-free methods. Prerequisites: Admission to Elementary Teacher Education Program; concurrent with EDEL 56, EDSP 5. Two hours.

178 Meeting Individual Needs: Assessment and Instruction Methods of responding to individual differences within a heterogeneous classroom. Sources of student variability, developing settings of least restriction, and appropriate assessment strategies. Prerequisites: Admission to Elementary Teacher Education Program; concurrent with EDEL 156, 157, 176. Two hours.

185 Student Teaching Internship Supervised student teaching internship in field site. Fifteen-week total immersion as a beginning teacher. Responsibilities specified in internship handbook. Documentation of activities for professional portfolio. Concurrent with EDEL 187 and 188. Prerequisite: Method Blocks in Inquiry and Literacy. Variable credit: Three to 12 hours.

187 Planning, Adapting, and Delivering Reading Instruction in Meaningful Contexts Methods of diagnostic teaching in reading and writing. Identifying components of effective programs and use of research findings to deliver instruction in meaningful contexts. Documentation of personal model of literacy for professional portfolio. Prerequisite: Method Block in Literacy. Three hours.

188 Principles of Classroom Management Application of basic learning principles to classroom management. Creation of behavior management plans with emphasis on social and academic behavior of diverse groupings of children. Concurrent with 185 and 187. Prerequisite: Method Blocks in Inquiry and Literacy. Two hours.

189 Portfolio Development and the Reflective Practitioner This course develops candidates’ critical reflectivity on their knowledge and expertise of classroom teaching through the construction of a professional portfolio. Prerequisites: Concurrent with EDEL 185 and 188. One hour.

222 Cultivating Children’s Literacy in the Elementary/ Middle School Classroom Contemporary research and practice related to the development of strategic, motivated, and independent readers and writers. Emphasis on integrating reading and writing with collaborative environments.

234 Literature and Language for Children and Youth Characteristics, interest, and reading habits of children and young people; criteria for selection and evaluation of literature; organizing book unit for teaching literature and for content areas emphasizing development of oral and written expression. Prerequisite: Twelve hours in education and related areas or instructor’s permission. Three hours.

241 Science for the Elementary School Examines a number of elementary school science programs. Emphasis on methods and materials relating to construction and use of science units for children in grades K-6. Prerequisite: Twelve hours in education and related areas and instructor’s permission. Three hours.

244 Social Studies in the Elementary School Study of literature, research, and problems in teaching social studies in the elementary school. Prerequisite: Twelve hours in education and related areas. Three hours.

FAMILY AND CONSUMER SCIENCES EDUCATION — EDFC

123 Methods in Nutrition Education (3-0) Planning and presenting of appropriate methods, media, and materials for audiences in community, school, and institutional settings emphasizing interpersonal communication and group process skills. Prerequisite: 43. Three hours. Fall.

220 Observation and Participation in Public Schools Required for licensure. Exploration of education careers in a variety of Family and Consumer Sciences related areas and in different types of schools and programs.

221 Management of School Youth Organizations (2-0) The role of a youth organization advisor, particularly FHA/ HERO. Emphasis on service learning and use of advisory councils. Includes observation and participation in school-related activities. Two hours. Fall/Spring. Not offered for graduate credit.

222 Curriculum Development in the Human Sciences (3-0) Basic principles of curriculum development applied to human sciences education. Unique characteristics and contributions of human science education as related to
educational, economic, and sociological trends. Three hours. Spring (odd number years).

224 Evaluation Techniques in the Human Sciences (3-0) Test, questionnaire, and interview schedule construction and other non-testing means of evaluation. Usability, objectivity, validity, reliability, and discrimination of evaluation instruments. Selected sociometric techniques and evaluation in affective domain. Three hours. Spring (even numbered years).

225 Teaching Practicum in the Human Sciences Teaching in middle or secondary schools under guidance of cooperating teachers and college supervisor. Credits variable up to 15 hours per semester. Fall/Spring. (Not offered for graduate credit.)

FOUNDATIONS — EDFS

203 Social, Historical, and Philosophical Foundations of Education Critical examination of central educational/social issues and values with special emphasis on the struggle for justice and equality. Themes include schooling and social class, race, and gender; the purposes of education; and the responsibilities of teachers. Prerequisite: Licensure programs only. Junior standing. Three hours.

204 Seminar in Educational History Struggles for Freedom and Equality. Selected topics in history of education. Education in democratic and authoritarian social orders. Discussions and research around such topics as education of women, black heritage, American higher education in transition. Prerequisite: Twelve hours in education and related areas or instructor’s permission. Three hours.

205 History of American Education Educational principles and practices in the U.S. as they relate to main currents of social history. Discussions focus on key ideas of historic and contemporary significance. Prerequisite: Twelve hours in education and related areas or instructor’s permission. Three hours.

206 Comparative Education Examines educational challenges confronting countries around the world. Explores issues related to sustainable development, diversity, citizenship, and justice in formal and nonformal educational contexts. Prerequisite: Twelve hours in education and related areas. Three hours.

209 Introduction to Research Methods in Education and Social Services Seminars and research projects introduce students to methods of historical, descriptive, experimental, quasi-experimental, field studies, and survey research. Three hours.

255 School as a Social Institution Examination of the school and related social institutions, with particular focus on: social class, race, and ethnicity, socialization, role of the family, management of knowledge, and social change. Prerequisite: Twelve hours in education and related areas. Three hours.

HEALTH EDUCATION — EDHE

46 Personal Health Concepts of personal health related to problems of daily living. Mental health, sex education, nutrition and weight control, fatigue and relaxation, chronic and communicable disease, stimulants and depressants. Three hours.

150 Seminar in Health Education Research, discussion, and critical examination of selected topics and special issues in health not currently covered in existing courses. Prerequisite: Six hours in health education or instructor’s permission. Variable credit, one to four hours.

173 Practicum in Field Experience Individually prescribed teaching experience involving work with health agencies, both public and private. Responsibilities approximate those commonly associated with student teaching. Prerequisite: Permission. Variable credit, one to four hours.

182 Health Methods and Materials Fundamental methods of teaching health as applied to school and public health education. Consideration of materials applicable to health education, evaluation techniques, preparation of teaching units and bibliographies. Prerequisite: 46. Three hours.

208 School Health Programs Organization of total school health program. Problems and administration in area of school environment, health services, health education, and school-community relationship. Prerequisite: 46 or equivalent. Three hours.

211 Community Health Education Governmental and voluntary agencies’ sociological, historical, educational, environmental, and medical influences. Role of community health educator in these influences and major American health concerns. Prerequisite: 46. Three hours.

220 Stress Management for Health Professionals Physiological, psychological, and sociological aspects of stress. Theory, practices, teaching techniques, and application relevant to teaching students and/or clients. Prerequisite: 46. Three hours.

HIGHER EDUCATION—EDHI

202 Human Relations in University Residence Halls Emphasis on human relations, group dynamics, advising models, student development theory, organizational development, and contemporary student issues in a residential environment. Prerequisite: Residence hall staff. One hour. (Not offered for graduate credit.)

213 Leadership: Theories, Styles, and Realities Introductory course in leadership development designed for student leaders. Includes study of planning, time management, organizational theory, communication skills, group process, team building. Two hours. (Not offered for graduate credit.)

214 Advanced Seminar in Leadership Focuses on student leaders’ experiences and how those experiences relate to activities beyond the University setting. Two hours.

MIDDLE LEVEL EDUCATION—EDML

10 Introduction to Teaching Orientation to teaching at middle level. Examination of young adolescent students, teachers’ roles, middle schooling and the middle school concept. Prerequisite: Admission to Pre-professional teaching education. One hour.

24 Learners, Development and Learning Students learn about the interrelated processes of development and learning throughout childhood but with special emphasis on the approximate ages of ten to fourteen. Prerequisites: EDML 10. Three Hours.

56 Teachers and the Teaching Process Students examine professional responsibilities of middle level teachers as defined by Vermont and national standards via classroom observations. Prerequisites: EDML 10, 24. Three hours.

160 Teaching Young Adolescents Focus on teaching adolescents with an emphasis on learning interrelationships of classroom organization, pedagogy and assessment. Students will plan, teach, and assess mathematics and literacy lessons. Prerequisites: Admission to Middle Level Professional Program. Six hours.

161 Teaching Practicum Teaching practicum on a middle level team to learn policy, curriculum, exemplary pedagogy and assessment in one of two academic concentrations defined by student’s IDMC plan. Prerequisites: Ad-
mission to Middle Level Professional Program. Three hours.

170 Middle School Organization and Pedagogy Students learn additional theory and practice in responsive school organization and pedagogy for young adolescents, also teaching and assessing lessons in their area of specialization. Prerequisites: EDML 160, 161. Six hours.

171 Teaching Practicum II Second teaching practicum on a middle level team to learn policy, curriculum, exemplary pedagogy, assessment in second of two academic concentrations defined by student’s IDIMC plan. Prerequisites: Admission to Middle Level Professional Program. Three hours.

185 Student Teaching Internship Full-time supervised student teaching internship as a member of a middle school team. Development of a professional portfolio as stipulated in the Middle Level Program Handbook. Prerequisites: Successful completion of EDML 160, 161, 170, 171 and permission of program faculty. Twelve hours.

186 Internship Support Seminar Seminar addresses and responds to internship experiences including planning, classroom management, team work, and assessment of learning. Guidance in development of Professional Teaching Portfolio. Prerequisites: Successful completion of EDML 160, 161, 170, 171 and permission of program faculty. One hour.

187 Literacy & Mathematics All middle level teachers are expected to teach reading, writing, literature and mathematics. This course is the capstone for work previously done in these pedagogies. Prerequisites: Successful completion of EDML 160, 161, 170, 171. Three hours.

MUSIC EDUCATION — EDMU/MUS

The Music Department offers a number of pedagogy courses in specific musical areas. All are open to nonmajors by permission of the instructor. See EDMU/Music course listings.

55 Special Topics I Designed so that its content and structure may accommodate special issues not especially appropriate within the boundaries of an existing course. Open to first-year students. Two to six hours.

181 Music for Elementary Teachers Development of musical skills, understandings, and attitudes pertinent to the teaching of music in elementary classroom. Prerequisite: Elementary majors, acceptance into teacher education program. Three hours.

197 Readings and Research Individual research problem or directed reading in an area of special interest to the student. Prerequisite: Instructor’s permission. Variable credit, one to four hours. May be repeated up to eight hours.

240 Musical Creativity in the General Music Class Designing a course of study for the general music class. Developing musical concepts and perception through individual differences. Prerequisite: Undergraduate major in Music Ed. or instructor’s permission. Three hours. Not offered every semester.

243 Recent Trends in Music Education Study of recent thought and practices in music education. Examination of current trends. Prerequisite: Undergraduate major in Music Ed. or instructor’s permission. Credit variable, one to four hours. Not offered every semester.

281 Elementary Music Education Methods Methods and materials for teaching music in elementary schools. Five hours classroom observation per week required. Prerequisite: Junior standing in Music Ed. Three hours. Cosenza.

282 Secondary Music Education Methods Methods and materials in the teaching of vocal and instrumental music in secondary schools. Five hours classroom observation per week required. Prerequisite: Junior standing in Music Education. Three hours.

290 Basic Concepts in Music Education Disciplinary backgrounds; historical and philosophical foundations; fundamental considerations of the functions of music in the schools; development of a personal philosophy. Three hours. Not offered every semester.

295 Laboratory Experience in Education Supervised field work designed to give students experience in specialized areas for their professional development. Prerequisite: Instructor’s permission. Credit as arranged.

PHYSICAL EDUCATION — EDPE

21 Foundations of Physical Education Examination of the development of physical education as an academic discipline and profession, its current trends, issues and career opportunities. Prerequisites: Physical Education majors; others by instructor’s permission. Three hours.

23 American Red Cross Emergency Response To meet the needs of individuals who are in a position to provide first aid and emergency care frequently. Red Cross certification for successful performance in Advanced First Aid Emergency Care. Prerequisite: PE, HDS, and Health majors; others by instructor’s permission. Three hours.

26 Water Safety Instructor Advanced performance skills in swimming, diving, survival, and rescue techniques. Theory and practice in techniques of teaching aquatic skills. Red Cross certification as Water Safety Instructor or Instructor for Beginning Swimming. Prerequisite: Current Red Cross Lifesaving Certificate. Two hours.

32 Recreational Sports Officiating Basic techniques and skills of rule interpretation for officiating recreational sport competition. Two hours.

54 History, Philosophy, and Trends in Recreation Review of chronological history of evolution of recreation movement; examination of past and emerging theories and philosophies of recreation and leisure; exploration of trends in recreation and leisure and probable impact on our life styles. Three hours.

100 Integrating Movement across the Elementary School Curriculum Planning and implementing movement-based lessons and integrating movement across the curriculum for children aged 5-12. Two hours.

104, 105 Physical Education Teaching Experience (Petex) Experience-based course sequence emphasizing relationship of motor development to learning. Includes age level needs and appropriate physical education activity sequences. First semester: grades K-3; second semester (105): grades 4-6. Prerequisites: 23 or 157, junior standing. Five hours.

121 Coaching Baseball Theory and technique of coaching interscholastic baseball. Includes practice, game, and schedule organizations. Prerequisites: Skill competency in baseball, sophomore standing or permission. Two hours.

122 Coaching Basketball Experiences include theory and technique in coaching basketball, as well as the organization and conduct of a basketball program, defensive and offensive strategies. Prerequisite: Skill competency in basketball, sophomore standing; PE majors, coaching minors, others by instructor’s permission. Three hours.

123 Coaching Softball Theory and technique of coaching interscholastic softball. Includes practice, game, and schedule organizations. Prerequisites: Skill competency in softball, sophomore standing or permission. Two hours.

124 Coaching Track Analysis and practice of the skills, techniques, and knowledge involved in coaching interscholastic track. Prerequisites: Skill competency in track, sopho-
more standing or instructor’s permission. Two hours.

125 Coaching Soccer Theory and technique of coaching interscholastic soccer. Includes practice, game and schedule organization. Prerequisites: Skill competency in soccer, sophomore standing or instructor’s permission. Two hours.

126 Coaching Gymnastics Analysis and practice of skills, techniques, and knowledge involved in teaching and coaching gymnastics. Prerequisites: Skill competency in gymnastics, sophomore standing. Two hours.

127 Coaching Swimming Knowledge, analysis, and practice of skills and techniques involved in coaching swimming. Prerequisite: Skill competency in swimming, sophomore standing or instructor’s permission. Two hours.

128 Coaching Field Hockey Theory and technique of coaching interscholastic field hockey. Includes skill and game analysis; practice, game, and schedule organization; and development of a coaching philosophy. Prerequisite: Skill competency in field hockey. Two hours.

129 Coaching Volleyball Theory and techniques of coaching volleyball. Includes skill and game analysis, practice, game and schedule organization. Prerequisite: Skill competency in volleyball, sophomore standing or instructor’s permission. Two hours.

130 Coaching Tennis Analysis and practice of skills, techniques, and knowledge essential for teaching/coaching tennis. Methodology for individual and large group instruction. Prerequisite: Skill competency in tennis, sophomore standing or instructor’s permission. Two hours.

131 Coaching Lacrosse Theory and techniques of coaching lacrosse. Includes skill and game analysis, practice, game and schedule organization. Prerequisite: Skill competency in lacrosse, sophomore standing or instructor’s permission. Two hours.

135 Aquatics Planning and implementing aquatic programs for individuals with disabling conditions. Emphasizes the modification of instructional techniques to effectively teach individuals with varied abilities in an aquatic setting. Prerequisites: EDPE 26 or instructor’s permission. Two hours.

145 Seminar in Athletics Contemporary issues, strategy, analysis, and problem areas related to selected comparative sports. Variable credit, one to four hours.

155 Physical Education in the Secondary School Theories of teaching which include unit plan development, classification, and grouping of students for instruction, and a variety of teaching methods. Laboratory experience in teaching activity skills to youth aged 12-18. Prerequisite: Junior standing, PE majors only. Three hours.

157 Care and Prevention of Athletic Injuries Prevention, recognition, and care of injuries related to school physical education and athletic programs. Three hours.

158, 159 Directed Observation Experience in Athletic Training A laboratory sequence offered for those students seeking admission into the Athletic Training Education Program. Includes training room procedures and basic injury assessment skills. 158, emergency protocols; 159, basic injury assessment. Must be taken with EDPE 157. One hour.

166 Kinesiology Designed for the teacher/coach to analyze factors of peak physical performance. Muscle actions, mechanical principles, related factors enhancing movement are emphasized. Prerequisite: One year of biological science; PE majors, coaching minors, students enrolled in Athletic Training Concentration, Sports Nutrition; others by instructor’s permission. Three hours.

167 Exercise Physiology Investigates physiological responses during exercise. Laboratory, classroom experiences enable understanding of bodily responses during exercise. Content includes energy metabolism, muscular, cardiovascular, pulmonary responses, and temperature regulation. Prerequisite. PE majors, coaching minors, sports nutrition, Athletic Training; others by instructor’s permission. Three hours.

168 Measurement & Data Analysis in Exercise and Sport Science Introductory statistics and research design class. Covers basic statistics—t-tests, measurement scales, ANOVA, correlations, etc. Application in physical education and exercise science are specifically discussed. Prerequisites: EXSS majors only, others by instructor’s permission. Three hours.

172 Psychology of Coaching Application of psychological subdisciplines to coaching. Learning, motivation, transfer, retention, emotion, and personality variables discussed with implications for the coach. Prerequisites: Psychology 1, junior standing. Three hours.

173 Practicum in Field Experience Individually prescribed teaching experience involving work with youth groups in activities related to physical education, health, or recreation. Responsibilities approximate those commonly associated with student teaching. Prerequisite: 104, 105, or 155, instructor’s permission. Variable credit, two to four hours.

181 Student Teaching Teaching in elementary or secondary schools under guidance of cooperating teachers, principals and college supervisors. A full-time, full semester, 12-credit experience. Prerequisites: Acceptance into the teacher education program; must meet criteria for student teaching. Variable credit, three to 12 hours.

182 Student Teacher Seminar Provides students opportunities to discuss, process, give and receive input and to receive materials to support and enhance their experience, and develop licensure portfolio. Prerequisites: Concurrent with EDPE 181. Two hours.

185 Injury Evaluation and Recognition in Athletic Training Course is integrative and clinical in nature, consisting of injury evaluation and recognition skills. Injury mechanisms, etiology, pathology, clinical signs and symptoms. Prerequisites: 157, 158. Four hours.

186 Therapeutic Modalities in Athletic Training Practical use of therapeutic modalities in treatment and rehabilitation of musculoskeletal injuries. Physiological effects, indications, and contraindications of treatment are addressed. Prerequisites: EDPE 157, 158, 185. Three hours.

187 Rehabilitation Techniques in Athletic Training Post-injury and post-operative rehabilitation and conditioning techniques involved in returning an active individual to normal and athletic activity. Prerequisites: EDPE 157, 158, 185, 187. Three hours.

188 Administration in Athletic Training An examination of topics related to administration, budget management, health insurance issues, and policies/procedures in the profession of athletic training. Prerequisites: EDPE 157, 158. Two hours.

195 Health/Fitness Leadership and Programming Practical approach to significance, theories, and characteristics of leadership content, and methods of program planning. Field work practice in planning and leadership techniques. Prerequisite: EDPE 21. Three hours.

201 Administration of Athletic Programs Designed to provide athletic director, school administrator, and teacher-coach with background for effective administration of athletic program of schools. Scheduling, budgeting, management, equipment, policy, public relations, and educational justification. Prerequisite: Twelve hours in education and psychology. Three hours.

220 Sport in Society Examines sport as a social institu-
tion, emphasizing interrelationships between sport and the social context in which it exists; analyzes functions and dysfunctions of sport in contemporary society. Prerequisite: Sociology 1 or 19, or equivalent. Three hours.

230 Philosophy of Coaching In-depth study of over 100 major philosophical coaching considerations. Lectures by visiting coaches. Study in areas of need and interest. Prerequisite: Junior standing. Three hours.

240 Motor Skill Learning and Control Examines theoretical perspectives and current principles associated with the control and learning of movement skills. Practical application of concepts to instructional and clinical settings emphasized. Prerequisites: EDPE 104 or instructor permission. Three hours.

241 Seminar in Physical Education and Athletics Examination and analysis of contemporary issues and trends in physical education and athletics not especially appropriate within boundaries of an existing course. Prerequisite: Twelve hours in physical education and related areas. Variable credit, two to four hours.

253 Curriculum Design in Health and Physical Education Philosophy and techniques of curriculum innovation in health and physical education. Emphasis upon interrelationships between student needs and interests, teaching methodology, evaluative procedures, community involvement, and administrative organization patterns. Prerequisites: Junior standing, 104, 105, 46 or 155. Three hours.

260 Adapted Physical Activity Examines current issues surrounding physical activity programming for individuals with disabilities. Emphasizes instructional strategies and modifications for effectively including students with diverse abilities into physical activity. Prerequisites: 155, 104, 105 or equivalent teaching experience. Three hours.

265 Exercise and Sport Science Discussion and integration of topics related to exercise physiology, kinesiology, motor learning, and sociocultural aspects of sport. Prerequisites: 166, 167, 220, 240; senior standing, or permission. Three hours.

SECONDARY EDUCATION — EDSC

11 Educational Technology in the Secondary Education Classroom Students are introduced to a variety of uses for information technology in education with particular applications to stimulate and manage a student-centered classroom. Three hours.

50 Exploring Education Introduction to philosophical, psychological, sociological questions basic to teaching and learning. Exploration of beliefs and understandings about personal learning and the field of education. Three hours.

207 Adolescent Learning from a Behavioral and Cognitive Perspective An indepth examination of cognitive learning theory and its background in behavioral and other learning theories, with application to teaching in a secondary setting. Three hours.

209 Practicum in Teaching Working with teachers and students in a secondary school, licensing candidates will assess the needs of students, document effects of direct service and the need for new curriculum. Prerequisite: EDPS 203, EDSC 207 or concurrent enrollment. Three hours.

215 Reading in the Secondary Schools Design of methods and materials for integrating reading and learning skills in content instruction. Focus on learning support for at risk learners. Prerequisites: Acceptance into licensure program. Three hours.

216 General Methods for Secondary Teachers Development of teaching methods for secondary instruction, adaptation to learning styles, models of teaching with design, lesson planning and assessment, with focus on cross-disciplinary collaboration. Prerequisites: Sociological 1 or 19, or equivalent. Three hours.

225 Teaching Social Studies in Secondary Schools Multiple teaching modes, questioning techniques, microteaching laboratory, analysis of historical content to determine students’ prerequisite cognitive skills and processes for construction of historical scenarios for grades 7–12. Prerequisite: Acceptance into licensure program. Three hours.

226 Teaching Internship Collaboration with professional teachers in design and implementation of effective instruction, with special focus on developing programs in a high school setting. Prerequisites: EDPS 203, EDSC 207, 209, 215, 216, Special Methods. Variable credit, eight to twelve hours (nine hrs. for graduate students, twelve hrs. for undergraduate and post-bac. students).

227 Teaching Science in Secondary Schools Consideration of science curricula for grades 7–12. Teaching science as problem solving, research in science teaching, evaluation strategies, instructional techniques, and affective education through science. Prerequisites: Acceptance into licensure program. Three hours.

230 Teaching for Results Analysis of planning, curriculum, design, teaching, evaluation, and classroom management from perspective of research and practice. Special focus on the student with special needs. Prerequisite: Concurrent enrollment in 226. Three hours.

257 Teaching Mathematics in Secondary Schools Contemporary secondary school mathematics curricula and instructional strategies for grades 7–12. Topics may include problem solving, research in mathematics education, use of calculators and computers, manipulatives, and evaluation. Prerequisites: Acceptance into licensure program. Three hours.

259 Teaching Foreign Language in Secondary Schools An overview of language teaching methodology. The learning/teaching process as it relates to language learning; techniques used in the teaching and testing of second language skills and culture. Prerequisite: Acceptance into licensure program. Three hours.

SPECIAL EDUCATION — EDSP

5 Issues Affecting Persons With Disabilities Students explore the effects of severe disabilities. Best service practices, current legislation, advocacy, and family issues for children and adults are emphasized. Three hours.

201 Foundations of Special Education Examination of historical and current trends in treatment of handicapped individuals, including effects of litigation, legislation, and economic considerations on educational and residential service delivery systems. Prerequisite: Twelve hours in education and related areas or instructor’s permission. Three hours.

216 Meeting the Curriculum and Instructional Needs of All Students Introduction to curriculum and instruction for all students with a focus on individuals who present academic and behavioral challenges. Emphasis on assessment, evaluation, curriculum, instruction, theories of learning, and social development. Prerequisite: Permission. Three hours.

217 Instruction for Individuals with Severe Disabilities Individualized instruction for learners with severe disabilities emphasizing objectives, assessment, task analysis, and behavior analysis. Prerequisite: Permission. Three hours.

224 Meeting the Instructional Needs of All Students Students apply principles of learning and social development to improve academic and social skills of all individuals with a focus on those who present academic and behavioral challenges. Prerequisite: Permission. Three hours.
275 Developing Vocational Instruction for Students With Special Needs Development of instructional strategies for including handicapped students in vocational education. Procedures for developing, implementing, and evaluating individualized vocational plans. Prerequisite: Admission to an approved teacher certification program or permission. Three hours.

280 Assessment in Special Education Assessment knowledge and skills essential for special educators, including test selection, administration and scoring, and legal issues related to special education assessment. Prerequisite: Admission to Graduate Program in Special Education or permission of instructor. Three hours.

290 Meeting the Curriculum Needs of All Students Intensive study of essential curriculum and technology areas related to the development, adaptation, and assessment of all students with a focus on those who present academic and behavioral challenges. Prerequisite: Permission. Three hours.

296 Special Education Practica for Classroom Teachers Credit as arranged.

EDUCATION — EDSS

1 Schooling, Learning, and Society Introduction to issues and problems in American education: schools and learning, professional careers, individuals in systems, characteristics of learners. Required readings and papers. Three hours.

11 Race & Culture Introduction to issues of diversity, multiculturalism and cultural pluralism in our different communities and in our country as a whole. One hour.

60 An Introduction to Helping Skills for the Educator Examines phenomenon of “helping” in American society within its sociological, cultural, economic, political, and educational contexts. Emphasis on how helping professionals function both to help and to hinder clients in society. Three hours.

193 Environmental Education Philosophy, concepts, and teaching-learning strategies of environmental education. Prerequisite: Three hours in education or instructor’s permission.

207 The University and Third World Development Examination of the role of educational policies on urbanization vs. ruralization in the human capital formation process of Third World countries. Prerequisites: Six hours of political science, history, geography, or economics, or instructor’s permission. Three hours. (Not offered for graduate credit.)

211 Educational Measurements Essential principles of measurement in education. Topics include validity, reliability, principles of test construction, item analysis, and analysis of standardized tests as they apply to classroom. Prerequisite: Twelve hours in education and related areas. Three hours.

238 Teaching with a Global Perspective Approaches to teaching global and multicultural issues: justice and human rights, peace, and the environment. Development of curriculum materials. Links between local and global concerns. Prerequisite: Twelve hours of education and related areas. Three hours.

239 Service-Learning Internships/Field Studies Professional education course designed to facilitate student’s integration of academic, social, personal, and career objectives through seminar or project syllabus method of support for internship experience in the community. Prerequisite: Instructor’s permission, junior standing. Variable credit, one to 12 hours.

248 Educational Media Modern instructional aids, theory and practice; educational media related to psychology of teaching and learning. Prerequisite: Twelve hours in education and related areas. Three hours.

PHYSICAL EDUCATION — PEAC

Physical Education Activities. Two hours weekly for a half or whole semester. One-half or one credit.

Two hours of physical education activities are required of undergraduate students. The program is centered around the physical needs, abilities, and interests of young adults. The aims are to help all to improve and maintain physical fitness; to provide opportunity to establish skills in a variety of movement activities; to bring performance in elected physical activities to a high level of satisfying proficiency; to find enjoyment in physical activity and lasting interest in continuing voluntary participation. Classes are coeducational unless indicated for men or women only.

The following activities, co-offered by the Physical Education and Military Studies Departments, may be counted toward the physical education requirements:

- Backpacking
- Military Fitness
- Orienteering

One credit per sport per year may be earned for participation in Varsity Sports and Approved Club Sports. The athlete must enroll for PEAC 000, Varsity Sports, or PEAC 003, Club Sports, during the year of participation. No retroactive credit will be granted. The list of Approved Club Sports is available in the Physical Education Activity Office each year.

Activities are offered at various levels of instruction and numbered as follows:
- Level 1. Beginner, very first experience with an activity.
- Level 2. Beginning mastery of basic skills and knowledge, equivalent to seven weeks of previous instruction.
- Level 3. Intermediate; equivalent of 14 weeks of instruction.
- Level 4. Intermediate-Advanced; introduction to more complex skills and strategy.
- Level 5. Advanced.
**Electrical Engineering (EE)**

**COLLEGE OF ENGINEERING AND MATHEMATICS**

Professors: Absher (Interim Chairperson), Varma, Williams; Associate Professors: Titcomb, Assistant Professor Lecky; Lecturer Clark.

**UNDERGRADUATE COURSES**

**94 Bioengineering Applications of Physical Principles II (3-3)**  Application of principles of electromagnetism and electrical engineering to understanding the structure and function of the human body and to diagnostic and therapeutic instrumentation. Four hours.

**95 Special Topics**  *Prerequisite:* Departmental permission. Variable credit.

100 **Electrical Engineering Concepts I (3-3)**  Introduction to analog and digital electrical measurements and circuits; introduction to microprocessors. No credit for EE majors. *Prerequisite:* Physics 42 with 22 or 125. Four hours.

101 **Electrical Engineering Concepts II (3–3)**  Microcontroller applications: design and implementation of motor, lamp, home environmental systems; music synthesis. Assembly programming of microprocessors. No credit for CS or EE majors. *Prerequisite:* 100. Four hours.

120 **Electronics I (3-0)**  DC and low frequency operation of MOS and bipolar transistors. Analysis and design of single-stage circuits. Circuit design with operational amplifiers. Use of circuit simulation software. *Prerequisite:* 4. Three hours.

131 **Fundamentals of Digital Design (3-0)**  Combinatorial logic simplification and design, MSI and PLD components, synchronous and asynchronous sequential design, algorithmic state machines, registers, counters, memory units, testing and testable design. *Prerequisite:* Computer Science 16 or 21. Three hours.

134 **Fundamentals of Microcomputer Based Systems (3-3)**  In-depth study and applications of a modern microprocessor in embedded digital systems for real-time control and data acquisition. Assembly language and the design of interfaces. *Prerequisites:* 3 or 100, and Computer Science 16 or 21; EE 131 and Computer Science 101 desirable. Four hours.

141 **Electromagnetic Field Theory I (3-0)**  Basic laws and elementary applications of electromagnetic fields; vector analysis, steady-state electric and magnetic fields, boundary value problems, circuit transmission lines. No credit may be received for both EE 140 (offered in prior years) and the current EE 141. *Prerequisites:* EE 4, Math. 271, Physics 42. Three hours.

142 **Electromagnetic Field Theory II (3-0)**  Basic laws and elementary applications of electromagnetic fields, waves and radiation; Maxwell’s equations, Poynting’s theorem, plane wave propagation, wave guides, antennas. *Prerequisite:* 141. Three hours.

146 **Wave and Diffusion Analogies (3-0)**  Electromagnetic waves on lines and in space. Vibration of strings and membranes. Mechanical waves in fluids and solids. Electromechanical transducers. Thermal waves. Diffusion process. *Prerequisite:* 141. Three hours.

163 **Solid State Physical Electronics I (4-0)**  Physical principles required to understand the operation of common semiconductor devices. Physical models of p-n junctions, Schottky barriers, bipolar junction, and field-effect transistors. *Prerequisite:* Physics 42 with 22. Four hours.

195 **Special Topics**  *Prerequisite:* Departmental permission. Variable credit.

**LABORATORIES**

81 **Sophomore Laboratory I (1-3)**  Electrical instruments; oscilloscope measurements; resistive, capacitive, and inductive components; nonlinear resistive elements; binary concepts and digital logic; transient response of RC circuits; three terminal networks. *Prerequisite:* Sophomore standing in EE. Two hours.

82 **Sophomore Laboratory II (1-3)**  Transients in RLC circuits; steady state response in RLC circuits; network theorems, bridge measurement circuits; mutual inductance; spectrum analysis; diode circuits; DC power supply design. *Prerequisite:* 81. Two hours.

183 **Junior Laboratory I (1-3)**  Characteristics of active devices; BJT and JFET amplifiers; MOSFET, UJT, and SCR applications; applications of operational amplifiers; semiconductor diode characteristics. *Prerequisite:* Junior standing in EE. Two hours.

184 **Junior Laboratory II (1-3)**  Dielectric materials; current flow in volume conductors; photovoltaic cells; passive, active, and digital filters. *Prerequisite:* 183. Two hours.

185 **Senior Laboratory I (0-3)**  AC and DC machines; power transformers; A/D and D/A conversion; design and construction of multivibrator and Schmitt trigger circuits; design project. *Prerequisite:* Senior standing in EE. One hour.

186 **Senior Laboratory II (0-3)**  Open and closed loop control systems; electromagnetic waves on transmission lines; time domain reflectometry; microwaves; special topics; design project. *Prerequisite:* 185. One hour.
187 Senior Project: Experimental or theoretical design project conducted under faculty supervision. Variable credit, usually three hours.

189 Digital Signal Processing Laboratory (0-3) PC-based evaluation model and associated development tools. High-level graphical and interactive design tools. Application in real-time implementation of signal processing algorithms. Same lab as in 275. May not be taken after 275. Prerequisite: 171. One hour.

193, 194 College Honors

ADVANCED UNDERGRADUATE AND GRADUATE COURSES

201 Linear System Theory (3-0) Basic concepts in system theory; linear algebra; state space representation; stability; controllability and observability. Applications of these concepts. Prerequisite: 171 or graduate standing. Three hours.

209 Transient Phenomena (3-0) Study of complex variable basis of Laplace and Fourier Transforms; applications to transient behavior of lumped and distributed parameter systems, root locus. Nyquist criterion and two-dimensional field problems. Prerequisite: 4. Three hours.

210 Introduction to Control Systems (3-0) Analysis and design of continuous and discrete-time control systems; stability, signal flow, performance criteria, classical and state variable methods, simulation design tools, computer-based realizations. Prerequisite: 171. Three hours.

221 Principles of VLSI Digital Circuit Design (2-3) The design, layout, and simulation of VLSI digital circuits. Emphasis on custom, laboratory design; typical topics will include memory, PLA, ALU, and elemental arithmetic circuits. Prerequisites: 131, 163, 121. Three hours.

222 Principles of VLSI Analog Circuit Design (3-0) The design, layout, and simulation of VLSI analog circuits. Emphasis on small signal models and circuits used in operational amplifiers. Prerequisites: 163, 121, instructor’s permission. Three hours.

224 Principles of VLSI System Design (2-3) Survey of VLSI design. Architecture and partitioning of functions. Design for testability. Simulation including timing, synthesis, design verification; manufacturing interface. Required team project and report. Prerequisite: 221 or instructor’s permission. Alternate years.

227 Biomedical Measurements, Instrumentation, and Systems (3-0) Biomedical and clinical engineering in research, industry, and health care institutions. Measurement techniques and instrumentation. Integrated biomedical monitoring, diagnostic, and therapeutic systems. Three hours. Corequisites: 121, ANPS 20, instructor’s permission. Alternate years.

228 Sensors (3-0) Sensor design, interrogation, and implementation. A wide variety of electrical, electronic, optical, mechanical, and cross-disciplinary devices. System designs, measurement techniques, and methodologies. Prerequisite: Senior standing in engineering or physics. Three hours.

231 Digital Computer Design I (3-0) Hardware organization and realization, hard-wired and microprogrammed control units, interrupt and I/O systems. Hardware design language introduced and used for computer design. Prerequisites: 131; either 134 or Computer Science 101. Three hours.

232 Digital Computer Design II (3-0) Memory designs, error control, high-speed addition, multiplication, and division, floating-point arithmetic, CPU enhancements, testing and design for testability. Prerequisite: 231. Three hours.

233 Microprocessor-Based Systems and Applications (3-3) Basic principles of mini/microcomputers; A/D; D/A; channels, magnetic devices, display devices, mechanical devices; interface designs of analog systems to mini/microcomputers; principles of microprogramming; bit-slice-based microcomputers. Prerequisites: Departmental permission, Computer Science 101 desirable. Four hours.

241 Electromagnetic Theory I (3-0) Maxwell-Lorentz theory emphasizing uniqueness and conservation laws. Potential theory with applications to boundary value problems, Green’s function techniques, multipole expansions, and numerical methods. Prerequisites: 141; Math. 272 recommended. Three hours.

242 Electromagnetic Theory II (3-0) Macroscopic Maxwell theory, boundary conditions and dispersion relations for spatio-temporal fields. Electromagnetic wave propagation, reflection and transmission, guided waves, radiation, scattering and diffraction phenomena. Prerequisite: 241 or instructor’s permission. Three hours.

245 Lasers and Electro-Optical Devices (3-0) A theoretical description of light-matter interactions in photon emitting resonant cavities. A practical understanding of laser design and operation. Prerequisite: 142. Three hours.

246 Engineering Optics (3-0) Applications of optics to the solution of engineering problems. Optical signal processing, fiber optic sensors, integrated optics. Prerequisite: 245 or instructor’s permission. Three hours.

248 Physical Optics II Partially coherent light and the Van-Cittert Zernike theorem. Rigorous diffraction theory, the optics of metals and crystal optics. Prerequisite: 247. Three hours.

250 Test Engineering (3-0) Parametric, structural, functional, characterization and stress testing of components and subsystems. Test methods, strategies, planning, and economics. Test equipment hardware and software. Prerequisites: 141, 131. Three hours. Alternate years.

251 Digital System Testing and Testable Design (3-0) Circuit failures, fault models, testing and test pattern generation, logic and fault simulation, design for testability, scan design, test interfaces, design for built-in self-test. Prerequisite: 131. Three hours. Alternate years.

266 Science and Technology of Integrated Circuits (3-0) Science and technology of integrated circuit fabrication. Interaction of processing with material properties, electrical performance, economy, and manufacturability. Prerequisites: 163 or 261, concurrent registration in 164 or 262. Three hours.

270 Probability Theory and Stochastic Processes (3-0) (Same as Statistics 270) Probability theory, random variables, and stochastic processes. Response of linear systems to random inputs. Applications in electrical engineering. Three hours. Prerequisite: 171 or equivalent.
Engineering Management (EMGT)

ENGINEERING, MATHEMATICS, AND BUSINESS ADMINISTRATION

175 The Management of Technology (Same as Business Administration 175.) Role of technology in industry, the nature of technological change, strategies, management, research and development, forecasting, product service/project selection, development, management, transition to market, and evaluation. Prerequisite: Senior standing in engineering or business administration. Three hours.

176 Plant Planning and Design Analysis of facilities and services requirements, material handling, office and clean room layout, mathematical and computer techniques, safety and plant conservation. Prerequisites: Junior standing in engineering or business administration, or instructor’s permission. Four hours.

185 Senior Project (0–9) Individual management engineering study designed to the particular interest of the student, utilizing and synthesizing the student’s engineering management education experience. Prerequisite: Senior standing in EMBA. Three hours.

195 Special Topics Specialized or experimental course offered as resources permit.

English (ENG)

COLLEGE OF ARTS AND SCIENCES

English (ENG)

COLLEGE OF ENGINEERING AND MATHEMATICS

1 Introduction to Engineering An introduction to engineering and what engineers do. Design projects, guest lecturers and visits to engineering enterprises. S/U grading. One hour.

2 Graphical Communication Principles of computer-aided drafting/design; production of engineering drawings including: orthographic, auxiliary, section, pictorials and dimensioning, graphics and charts; applications in specific engineering disciplines. Two hours.

Engineering (ENGR)

COLLEGE OF ENGINEERING AND MATHEMATICS

1 Introduction to Engineering An introduction to engineering and what engineers do. Design projects, guest lecturers and visits to engineering enterprises. S/U grading. One hour.

2 Graphical Communication Principles of computer-aided drafting/design; production of engineering drawings including: orthographic, auxiliary, section, pictorials and dimensioning, graphics and charts; applications in specific engineering disciplines. Two hours.
14 Introduction to Poetry Examination of the forms of poetry, past and present, British and American. Provides a wide variety of perspectives on the poem.

21, 22 British Literature Survey of major figures in British literature such as Chaucer, Milton, Swift, Wordsworth, and Woolf.

23, 24 American Literature Survey of major American writers from the beginning of the 19th century to the present, such as Hawthorne, Melville, Dickinson, Twain, Hemingway, and Faulkner.

25, 26 World Literature Survey in comparative literature dealing with the great writers of the world, to include Virgil, Dante, Goethe, and similar major figures. Students may not take for credit both English 25 and 27; or both English 26 and 28.

27, 28 Literature of Western Tradition: Integrated Humanities Study of primary authors in the Western cultural tradition from Homer to the modern period with particular reference to history, religion, and philosophy. Students may not take for credit both English 25 and 27; or both English 26 and 28.

102 History of the English Language Principles of historical linguistics and their application to English.

103 Old English The sounds, works, and structure of Old English; simple prose texts and selections from Beowulf.

104 Language Awareness Topics will include considerations of language as part of human behavior, history of the language, dialects of American English, lexicography, language acquisition, gender differences, and cultural diversity. Prerequisites: Sophomore standing, three hours of English. Three hours.

105 American English Dialects Class will examine dialects of American English and the methodology of dialectology with focus on Vermont speech and the social meaning of dialect variation. Three hours. (Same as CMSI 102.)

106 Critical Theories Topics vary by semester and by professor. Representative topic: "Feminist Criticism." May be repeated for credit with departmental permission.

108 Tutoring Writing Explores ways of responding to writers one-on-one, for students who will be tutoring at the Writing Center. Three hours.

109 Exploring Writing Centers Explores theoretical frameworks for writing centers and ways tutors can respond to student writers. Prerequisite: 108. Two hours.

110 Writing Literary Criticism Introduction to theory and practice of literary criticism. Students read and write about literary theories representing various approaches to selected works of literature.

111 Studies in Composition and Rhetoric Topics vary by semester and by professor. Representative topic: "The Composing Process." May be repeated for credit with departmental permission.

112 Personal Voice Examination of the authorial voice in nonfiction writing. Reading and writing assignments include work with both traditional and experimental styles, forms, and genres. Portfolio assessment. Prerequisite: 100 or 50.

114 Reading and Writing Autobiography Study of the autobiographical literary tradition as well as practice writing within this tradition. Prerequisites: 50, permission of instructor.

115 The Art of Nonfiction Theory, readings, and practice in literary nonfiction, including the essay and/or literary journalism. Prerequisites: 50, permission of instructor.

117* Advanced Writing: Non-Fiction Students follow their own interests in the writing of non-fiction. Prerequisites: 50; instructor's permission.

118* Advanced Writing: Fiction Students follow their own interests in the writing of fiction. Prerequisites: 50; instructor's permission.

119* Advanced Writing: Poetry Students follow their own interests in the writing of poetry. Prerequisites: 53; instructor's permission.

120* Writers' Workshop An intensive two-week workshop with assignments designed to emphasize autobiographical aspects of poetry and fiction writing. Summer only.

(A) Language, Critical Theory, Writing

101 Structure of the English Language Descriptive study of modern American English.

110 Writing Literary Criticism Introduction to theory and practice of literary criticism. Students read and write about literary theories representing various approaches to selected works of literature.

111 Studies in Composition and Rhetoric Topics vary by semester and by professor. Representative topic: "The Composing Process." May be repeated for credit with departmental permission.

114 Reading and Writing Autobiography Study of the autobiographical literary tradition as well as practice writing within this tradition. Prerequisites: 50, permission of instructor.

115 The Art of Nonfiction Theory, readings, and practice in literary nonfiction, including the essay and/or literary journalism. Prerequisites: 50, permission of instructor.

117* Advanced Writing: Non-Fiction Students follow their own interests in the writing of non-fiction. Prerequisites: 50; instructor's permission.

118* Advanced Writing: Fiction Students follow their own interests in the writing of fiction. Prerequisites: 50; instructor's permission.

119* Advanced Writing: Poetry Students follow their own interests in the writing of poetry. Prerequisites: 53; instructor's permission.

120* Writers' Workshop An intensive two-week workshop with assignments designed to emphasize autobiographical aspects of poetry and fiction writing. Summer only.

Courses numbered 117, 118, 119, 120 may be repeated for credit; no more than nine credit hours total in these courses will count toward fulfillment of major requirements.
121 Bible as Literature Jewish and Christian scripture analyzed as literary documents.

122 Dante’s Comedy (Same as World Literature 173.) A study of Dante’s Comedy in Modern English translation.

124 Chaucer Study of the principal works of Chaucer, emphasizing Chaucer’s literary scope, talents, and position in medieval literature.

125 Medieval Literature Major works of medieval literature in translation, with some principal non-Chaucerian works in Middle English. Works by Dante and works in the Arthurian tradition will be included.

127 Shakespeare A survey of plays in all genres (comedy, history, tragedy, romance) covering the early, middle, and late stages of Shakespeare’s career.

128 Shakespeare and Renaissance Drama A survey of drama, including the work of William Shakespeare, from the 16th and early 17th centuries in England.

129 Survey of Renaissance Literature English poetry, prose, and/or drama from the late 16th and 17th centuries.

130 The Age of Milton Paradise Lost, Paradise Regained, Samson Agonistes, some minor poems, and selected prose works.

133 Restoration and 18th Century Prose, Poetry, and Drama Significant writers and dramatists from Dryden to Sheridan and Johnson.

134 18th Century British Novel Fiction from its origin through the 18th century.

(C) 19th Century Literature

141 Romantics Late 18th and early 19th century English literature including, for example, works by Wordsworth, the Shelleys, Keats. Occasional special topics.

142 Victorian Prose, Poetry, and Drama Literature from 1832 to 1900, including, for example, Tennyson, Browning, Darwin, Wilde. Occasional special topics.

143 19th Century American Poetry The poetry of Walt Whitman, Emily Dickinson, and their contemporaries.

144 19th Century American Non-Fiction Essay, biography, autobiography, history, journals, and letters by such writers as Emerson, Thoreau, Douglass, Chestnut, Twain, Fuller, Parkman, Kete.

145 19th Century American Fiction Short stories, novels, and novels by such writers as Cooper, Poe, Hawthorne, Melville, Stowe, James, Chopin, Crane, Gilman.

147 19th Century Women’s Writing Novels, short stories, and poetry by 19th century women from multiple cultures.

(D) 20th Century Literature

151 Modern Poetry Survey of poetry from beginning of modern period to end of World War II, emphasizing poetry of Yeats, Eliot, Stevens, Auden, Frost, Williams, and others.

152 Modern British Drama British and continental plays of the 19th and 20th centuries, including plays by Ibsen, Pinter, and Beckett.

153 Modern British Novel British novelists since 1900, including Forster, Conrad, Lawrence, Woolf, and other more recent writers.

154 Modern Irish Literature Irish literature from 1890 to the present, emphasizing Joyce and Yeats.

157 Canadian Literature The development of a national literature. Thompson.

158 Contemporary Canadian Literature Post-World War II Canadian poetry and fiction in English, including Awood and Laurence.

160 Literature of Vermont An exploration of Vermont writing from the narratives of the Allen brothers to the poetry and fiction of today.

161 Modern Short Fiction Late 19th and 20th century short fiction by such European and American writers as Chekhov, Kafka, Joyce, Lawrence, Hemingway, Faulkner, O’Connor, Welty, Cheever, and Carver.

162 Modern American Novel American novelists from 1915 to 1945.

163 Modern American Drama Recent and contemporary, including plays by O’Neill, Miller, and Williams.

166 Slavery and American Literature Examines connections between storytelling, bondage, and freedom. Focuses on the struggles of enslaved people to author free stories and free selves.

167 African American Literature Through the Harlem Renaissance A survey of the writing of African Americans from the early poetry and prose of Phillis Wheatley, Frederick Douglass, and Frances Harper through the works of such writers as Nella Larsen, Countee Cullen, and Jean Toomer.

168 African American Literature Since the Harlem Renaissance A survey of the writing of African Americans from the poetry and prose of Langston Hughes and Zora Neale Hurston through the works of such contemporaries as Amiri Baraka, Toni Morrison, and Audre Lorde.

170 Race and Ethnicity in Literary Studies: Intermediate Courses addressing “race” in literature and/or the contributions of ethnically diverse writers to American culture. Focus and readings vary by instructor. May be repeated for credit. Topics for 1999-00: African Indian Literature.

172 Colonial and Post-Colonial World Literature Topics vary by semester and by professor. Representative topics: “African Theater” and “Contemporary Writing from the Non-Western World.” May be repeated for credit with departmental permission.

175 Contemporary American Poetry American poetry since 1950.

Literary and Cultural Topics

In courses numbered 181-190, topics vary by semester and by professor, and may be repeated for credit if the subject matter is different. Sections that satisfy major requirements A, B, or C will be coded with the appropriate letter each semester in the department’s extended course description booklet.

182 Historical Periods Representative topics: Literature of Civil Rights.

183 Major Writers The works of one or two writers. Representative topics: “Mark Twain,” “Toni Morrison.”

184 Popular Literature and Culture Representative topics: “Poe’s Children: Detective Fiction and Horror;” “Having a Good Cry: The Sentimental Tradition in Literature, Film, and Television;” “Children’s Literature.”

186 Studies in Folklore Representative topics: “American Folklore;” “Folklore and Ballad.”

187 American Studies Interdisciplinary approaches to American literature and culture. Representative topics:
“American Literature and American Law; “The Vietnam War in Literature; “Jewish-American Literature.”

190 Buckham Honors Seminar Topic and instructor varies. Each seminar includes the participation of a distinguished visiting scholar or writer, such as Stephen Greenblatt, Barbara Johnson, Houston Baker, James Clifford, William Kennedy, and Stephen King.

191, 192 Internship Prerequisites: Departmental permission, junior or senior standing. One to six hours.

195, 196 Intermediate Special Topics See schedule of courses for specific titles.

197, 198 Reading and Research Departmental permission required. Not to exceed three hours per semester.

Senior Seminars

Topics vary by semester and by professor and may be repeated for credit if the subject matter is different.

The prerequisites for courses numbered 200–298 are 85, 86, six hours at the intermediate level (100–199), and instructor’s permission.

201, 202 Seminar in the English Language or Critical Theory Recent topics: “Origins and Development of the English Language; “Re-disciplining the History of Literature and the Literature of History; “Women’s Texts.”

211, 212 Seminar in Composition and Rhetoric Recent topics: “Writing the New Yorker; “Writing Vermont Life; “Editing and Publishing.”

221, 222 Seminar in Literature to 1800 Recent topics: “Women in 17th Century English Poetry; “Dante and the Experience of Reading; “Orality and Textuality in Middle English Literature.”

290 Seminar for Prospective Teachers of English Approaches to teaching composition, literature, and the English language in secondary school. This course does not logical, artistic, economic, and sociological history of the cinema from its inception through the 1920s.

297, 298 Reading and Research Departmental permission required. Not to exceed three hours per semester.

Film (FILM)

5 Development of the Motion Picture I An overview of the technological, artistic, economic, and sociological history of the cinema from its inception through the 1920s.

6 Development of the Motion Picture II An overview of the cinema’s technological, artistic, economic, and sociological history from 1929–1960.

95, 96 Introductory Special Topics See Schedule of Courses for specific titles.

107 Film Criticism Intensive analysis of films to develop appropriate critical methods and standards. Possible approaches are sociological, psychological, aesthetic, and journalistic. Organized either historically or topically. Prerequisite: 5 or 6.

161 Contemporary Cinema A survey of the artistic trends, important personalities, economic and social factors that have shaped the past 25 years of narrative feature film history. Prerequisite: 5 or 6.

162 American Film Genres An investigation of the circumstances surrounding the production of American film genres, especially between the years 1930–1960. Prerequisite: 5 or 6.

195, 196 Intermediate Special Topics See Schedule of Courses for specific titles.

HONORS – ARTS AND SCIENCES

220, 221 Honors/English Contact Department for specific requirements. Three hours each.

Environmental Sciences (ENSC)

COLLEGE OF AGRICULTURE AND LIFE SCIENCES

SCHOOL OF NATURAL RESOURCES

Practicum Faculty: Barrington (Botany), Hayden (Civil and Environmental Engineering), Hession (Civil and Environmental Engineering), Keeton (Natural Resources), Lewis (Microbiology and Molecular Genetics), Mcintosh (Natural Resources), Olson (Civil and Environmental Engineering), Morrissey (Natural Resources), Ross (Plant and Soil Science), and Watzin (Natural Resources).

1 Introduction to Environmental Sciences Emphasizes the impacts of human activity on the environment. Attention to resources at risk and pollutant fate and effects on ecosystems. Three hours.

101 Pollutant Movement Through Air, Land, and Water Physical, chemical, and biological aspects of pollutant behavior from source to ultimate fate. Laboratory methodologies for measuring pollutants and predicting their transport, behavior, and fate. Prerequisites: 1; Biology 1, 2; Chemistry 31, 32; Math. 19, 20; co-requisite Chemistry 42. Four hours.

130 Global Environmental Assessment Assessment of human impacts on the global environment. Hands-on application of satellite remote sensing and geographic information systems to address key environmental issues. Prerequisites: Biology 1 or Botany 4; Chemistry 23 (or equivalent); Math. 19. Three hours.

185 Special Topics See Schedule of Courses for specific titles. Variable credit.

195 Internship Professionally-oriented field experience under joint supervision of faculty and business or community representative. Prerequisites: Proposal and permission of ENSC Director; junior standing; good academic standing. Maximum of six hours; three can be applied to elected concentration with Director’s permission.

196 Independent Research Special study and research activity under the director of a faculty member. Prerequisite: Proposal and permission of ENSC Director; junior standing; good academic standing. Up to six hours; three can be applied to elected concentration with Director’s permission.

201 Recovery and Restoration of Altered Ecosystems Role of stress and disturbance and the natural process of recovery in aquatic and terrestrial ecosystems. Human efforts to modify, restore, and remediate altered eco-
tems. **Prerequisites:** Natural Resources 103 or an intermediate-level ecology course; or instructor’s permission. Environmental Sciences 101 strongly recommended. Three hours.

### 202 Ecological Risk Assessment
Approaches used to identify, measure, and manage ecological risk. Problem formulation, characterization, uncertainty analysis, and risk management. Case studies. **Prerequisites:** 201; Natural Resources 140 or Statistics 141; senior standing or instructor’s permission. Three hours.

### 222 Pollution Ecology
Impacts of pollutants on the structure and function of ecosystems. Examination of how air, land, and water influence ecological fate and effects of pollutants. **Prerequisites:** Biology 1; Chemistry 24, Natural Resources 103 or equivalent ecology course. Three hours. (Not offered for graduate credit.)

### 285 Advanced Special Topics in Environmental Science
See Schedule of Courses for specific titles. **Prerequisites:** Senior standing or instructor’s permission. Variable credit. (Not offered for graduate credit.)

### 290 Environmental Sciences Honors
Honors project dealing with environmental sciences. **Prerequisites:** By application only, see program chair. Three to six credit hours.

---

**Environmental Studies (ENVS)**

**COLLEGE OF AGRICULTURE AND LIFE SCIENCES**

**COLLEGE OF ARTS AND SCIENCES**

**COLLEGE OF EDUCATION AND SOCIAL SERVICES**

**SCHOOL OF NATURAL RESOURCES**

Professor Ware; Associate Professors Hudspeth, Kara; Assistant Professor Ali, Dranks. Saez; Lecturers Davis, Libby, Paradis, Poleman, Quinney, TeSelle.

### 1 Introduction to Environmental Studies
Survey of environmental studies examining ecological, socioeconomic, aesthetic, and technological influences determining quality of life on earth. **Prerequisite:** First-year or sophomore standing, or instructor’s permission. Four hours.

### 2 International Environmental Studies
A multidisciplinary analysis of the interaction of global and local variables in understanding and solving pervasive environmental problems. **Prerequisite:** First-year or sophomore standing. Four hours.

### 7 Environmental Awareness
Selected current environmental issues from evolving political, religious, scientific, and social perspectives. For non-majors. Cannot receive credit for both 1 and 7. Three hours.

### 95 Introductory Special Topics
Introductory courses of current areas of interest which vary each semester. Topics have included environmental health, energy, regional planning, international studies, literature, ethics, and natural areas management.

### 100 Environmental Theory
Comparative analysis of emerging concepts of human/environment relationships; the history, philosophy, and theoretical framework of environmental studies. **Prerequisites:** 1, 2. Three hours.

### 151 Intermediate Environmental Studies
Individual investigation of interdisciplinary areas of environmental studies with emphasis on academic and career choices and preparation for senior thesis/project. **Prerequisites:** Major in Environmental Studies; 1, 2, permission. Three hours.

### 152 Environmental Information Skills
This course focuses on the complexities of conducting environmental research in a networked information age by teaching information concepts, skills, and broad ranging resources. **Prerequisites:** ENVS 151, or concurrently enrolled in ENVS 151 One hour.

### 156 Permaculture
(See Plant and Soil Science 156.) Design of agriculturally productive environments that have the diversity, stability, and resilience of the natural biosphere to harmoniously integrate landscape and people. **Prerequisites:** Three hours basic biological or ecological science, or permission. Two hours.

### 173 Landscape Natural History
This field-based course examines patterns and processes on local landscapes from an interdisciplinary perspective, with an emphasis on geology, soil science, plant ecology, and ecosystem geography. **Prerequisites:** ENVS 1, sophomore standing. Three hours.

### 174 Natural Areas Conservation and Stewardship
Examines land protection and stewardship efforts of conservation organizations and public agencies. Builds on principles of conservation biology to understand issues in conserving and managing natural areas. **Prerequisites:** ENVS 1 or NR 1 or permission. Three hours.

### 177 Introduction to Landscape Restoration
Introduction to the history, philosophical foundations, and approaches to restoration of natural landscapes damaged by human activity and neglect. Case studies of selected local sites. **Prerequisites:** 1, Natural Resources 1, or permission. Three hours.

### 178 Environmental Ethics
Current approaches and problems in environmental ethics drawing on philosophy and case studies in animal rights, land ethics, deep ecology, wilderness protection, and human rights. **Prerequisites:** One environmental course, junior standing. Three hours.

### 179 Ecofeminism
(See Women’s Studies 179.) Investigation of the parallel dominations of women and nature, through analysis and reflection on ecofeminist theory, activism, and spirituality. **Prerequisites:** 1, 2 or Women’s Studies 73, sophomore standing. Three hours.

### 180 Radical Environmentalism
Survey of radical environmental philosophy and activism from a liberation ethics perspective. Includes deep ecology, ecofeminism, environmental justice, and ecological resistance movements around the world. **Prerequisites:** 1, 2, sophomore standing. Three hours.

### 182 Religion and Ecology
Exploration of the greening of major world religious traditions in both practice and philosophy. Includes institutional, activist, and lifestyle initiatives in ecological spirituality. **Prerequisites:** ENVS 1 or 2, or NR 2, REL 20 or 21 preferred, sophomore standing. Three hours.

### 190 Workshops in Environmental Skills
Workshops to develop applied skills useful for environmental work and/or research. Topics vary by semester. **Prerequisites:** 1, 2. One to three hours.

### 191 Environmental Practicum
Individual readings and research, internship, or field-based learning experience under direction of a faculty member or environmental practitioner. **Prerequisite:** Permission of course coordinator. Credit arranged.

### 195, 196 Special Topics
Intermediate courses of current areas of interest which vary each semester. Topics have included environmental health, energy, regional planning, international studies, literature, ethics, and natural area management. **Prerequisites:** One environmental course, sophomore standing.

### 197 Student-Designed Course
Student-taught courses beyond the scope of existing formal courses in environmental studies. Developed according to Program guidelines, with sponsorship by interested faculty. **Prerequisites:** 1, 2, permission. One to three hours.

### 201 Research Methods
Planning, design, and methods for the required senior thesis or project. Includes literature review and proposal writing. **Prerequisites:** 151, junior standing. Three hours. (Not offered for graduate credit.)
202 Senior Project and Thesis  
Senior level project or thesis under faculty direction. Prerequisites: 201, permission of Environmental Program. Credits arranged. (Not offered for graduate credit.)

203 Senior Project and Thesis (Honors)

204 Seminar in Environmental Studies  
Review and discussion of current environmental research and literature. Prerequisites: 1, 2, junior or senior standing. One to three hours. (Not offered for graduate credit.)

284 Teaching Assistantship  
Students gain practical teaching experience through assisting with instruction, evaluation, and reflection. Tasks may include: leading discussion sessions, grading, and developing course materials. Prerequisites: Senior standing or permission of instructor, concurrent teaching assistant in ENVS course. Variable credit, one to two hours. May be repeated.

289 Environmental Economics  
Application of economic theory and methods to environmental problems and policies. Includes cost-benefit analysis and economic incentives as tools for environmental problem solving. Prerequisites: 1; three hours intermediate economics. For students in Arts and Sciences Economics 11-12, intermediate course in ENVS. Three hours.

290 Environmental Policy  
Public policy dimensions of natural resource management and environmental protection; U.S. historical context; policy analyses of contemporary issues; administration of environmental resource institutions. Prerequisites: Six hours of intermediate or advanced courses in ENVS or related areas. Three hours.

291 Advanced Environmental Practicum  
Individual readings and research, internship, or field-based learning experience at the advanced level, under direction of faculty member or environmental practitioner. Prerequisite: 1, 2; senior or graduate standing.

293 Environmental Law  
Principles of environmental law, including legal research methods, threshold issues, case law, trial procedure, and international comparisons in aspects of air, land, and water law. Prerequisite: Junior standing. Three hours.

294 Environmental Education  
Philosophy, concepts, and strategies of environmental education, emphasizing integration of environmental concerns into formal and nonformal educational programs for youth and adults. Prerequisite: Six hours of intermediate or advanced courses in environmental studies or related areas. Three hours.

295, 296 Advanced Special Topics  
Advanced courses of current areas of interest which may vary each semester. Topics have included environmental health, energy, regional planning, international studies, literature, ethics, and natural area management. Prerequisite: One environmental course at 100 level, junior standing.

HONORS – ARTS AND SCIENCES

260, 261 Honors/Environmental Studies  
Contact Department for specific requirements. Three hours each.

European Studies

COLLEGE OF ARTS AND SCIENCES

Prof. Dennis Mahoney, Director.

The following courses are among the course offerings; see department for specific course description. Also see Area and International Studies for special topics listings.

Area and International Studies 291 (European Studies Seminar); Art: 5, 6, 148, 149, 155, 158, 161, 164, 165, 170, 172, 174, 177, and 179 or 282 when the content is European; Classics: 24, 35, 37, 42, 153-159; Economics: 170, 275, 281; English: 21, 22, 25-28, 85, 86, 102, 103, 121, 122, 124, 125, 127, 128, 129, 130, 133, 134, 141, 142, 146, 152, 153, 154, 221, 222; Film: 5, 6, 107, 161; French: 155, 156, 225, 226, 235, 245, 246, 247, 255, 256, 265, 266, 275, 276, 290, 291, 292; Geography: 55, 155; German: 104, 121, 122, 155, 156, 201, 213, 214, 223, 226, 237, 238, 247, 248, 251, 252, 263, 264, 271, 273, 275, 276, 278, 280, 281, 282; Greek: all courses above 100 level; History: 13, 14, 21-27, 85, 86, 90, 120-126, 128-136, 139, 185, 186, 190, 191, 221, 222, 224-228, 283; Italian: 121, 122, 157, 158; Latin: all courses above 100 level; Music: 11, 12, 111-114; Philosophy: 101, 102, 105, 107, 133, 140, 151, 160, 260; Political Science: 141, 142, 146, 171, 257, 276, 287; Religion: 22, 111, 116, 122, 124, 173, 224, 226, 228, 280; Spanish: 141, 235, 256, 237, 245, 246, 265, 276, 277, 291, 292; Theatre: 136, 137, 138; World Literature 11, 14, 17, 18, 24, 35, 37, 95, 96, 111, 114, 117, 118, 153-156, 173, 195, 196.

Forestry (FOR)

SCHOOL OF NATURAL RESOURCES

Professors Bergdahl, DeHays, Newton; Associate Professors Forier, Hughes, Wing; Assistant Professors Danks, Keaton; Extension Associate Professors McEvoy; Research Associate Professor Livingston; Lecturers Shane (Program Chair), Snyder; Adjunct Assistant Professor Schaberg.

1 Forest Conservation  
Introduction to the ecology and management of American forests: forest distribution, ownership, and ecological factors, species interactions, multi-resource management goals, and silvicultural practices. Cannot be taken by junior- or senior-level SNR students. Three hours.

21 Dendrology (3-4)  
Classification, silvical characteristics, and identification features of native and introduced trees and shrubs. Four hours.

73 Small Woodland Management (2-4)  
Concepts of forest ecology, resource inventory, cultural practices, and multiple use management for small woodland areas. Three hours.

81 Forestry Seminar  
Readings and discussions introducing current issues in forestry. Prerequisite: First or second year standing in Natural Resources. One hour.

120 Forest Ecology  
Forest environment and its effects on the development and distribution of forest communities. Introduction to population dynamics, systems and analysis, diversity, stability, ecosystem disturbances, and succession. Prerequisite: Natural Resources 1, or another introductory biological science course. Three hours.

121 Forest Ecology Laboratory  
Application of ecological principles in the analysis of forest communities. Prerequisite: Natural Resources 25, a course in tree identification, and previous or concurrent enrollment in Natural Resources 103. Two hours.

122 Forest Ecosystem Analysis  
An integrated field course to investigate, through quantification and interpretation, the flora, fauna, and abiotic components (soils, physiography, water, and microclimate) of a selected forest ecosystem. Prerequisites: FOR 121, NR 140. Four hours.

126 Forest Ecology Field Trip  
Assessment of southeastern forest ecosystems including Smoky Mountain communities, and upland and bottomland forests of the Georgia Piedmont and South Carolina Coastal Plain. Field trip at end of spring semester. Prerequisites: A course in plant identification, a course in ecology, instructor’s permission. Two hours.
132 Forest Fire Behavior and Management  Forest fire ecology, behavior, effects, weather relationships, danger rating, prevention, detection, management, prescribed fire, smoke management, wildland/urban interface, and multi-resource perspectives. Prerequisite: A course in plant ecology or concurrent enrollment. Knowledge of plant identification. Three hours. Alternate years.

133 Forest Entomology (See Plant and Soil Science 107.) Three hours.

146 Remote Sensing of Natural Resources  (Same as Natural Resources 146.) Identification, interpretation, measurement, and mapping of natural resources from aerial photographs and satellite imagery. Labs include air photo interpretation and digital image analysis. Prerequisites: Junior standing. Three hours. Alternate years.

152 Forest Resources Values  (Same as Recreation Management 152, Resource Economics 152.) History, methods, and current issues associated with the nonmarket and market values of forest-based resources, including aesthetics, wildlife, recreation, water, and timber. Prerequisites: Economics 12 or Community Development and Applied Economics 61. Three hours.

158 Stewardship of Private Woodlands  Basic financial, legal and operational aspects for long-term ownership and stewardship of woodlands; appraisals, taxation, land trusts, conservation easements, estate planning; Vermont focus. Prerequisite: Course in economics. Three hours.

163 Timber Harvesting, Planning, and Management  Private forest emphasis; impacts of alternative techniques on cultural and natural resources; preharvest inventory, prescription, layout, contracts, bookkeeping; postharvest operations. Three hours. Alternate years.

182 Advanced Forestry Seminar  In-depth examination of contemporary issues in forestry. Prerequisite: Junior or senior standing in Forestry. Credit arranged.

185 Special Topics  Readings, investigations, and lectures in selected forest resource subjects. Prerequisite: Instructor’s permission. Credit arranged.

191 Forestry Internship  Supervised work experience in forest resource area. Prerequisite: Instructor’s permission. Credit arranged.

205 Mineral Nutrition of Plants  (See Botany 205.) Three hours.

222 Advanced Silviculture (2-4) Scientific basis and contemporary status of silviculture practices. Prerequisites: 223, permission. Three hours. Alternate years.

223 Multi-Resource Silviculture  Theory and application of forest stand maintenance/manipulation for forest ecosystem sustainability. Topics: Silvics, regeneration, tree improvement, protection, stand structure/dynamics/tending, and multi-resource perspectives. Prerequisites: NR 25, 103, FOR 121 (FOR 122–Forestry majors). Four hours.

225 Tree Structure and Function (2-3) Basic anatomy and physiology of trees and other woody plants, emphasizing their unique structural and physiological adaptations to the environment. Prerequisites: Permission. Three hours.

228 Ecosystem Ecology  Examination of the structure and function of terrestrial ecosystems using a systems approach. Laboratory sessions involve modeling and data analysis. Prerequisites: Biology 1, 2, Chemistry 23, an intermediate ecology course, Natural Resources 140, Math. 19, Physics 11 or equivalent. Two hours. Alternate years.

231 Integrated Forest Protection  Integration of concepts of forest protection using a holistic ecological approach to forest pest management. Detection, population dynamics, evaluation, prediction, and pest management considerations. Prerequisites: 133, 234 or instructor’s permission. Three hours. Alternate years.

234 Forest Pathology  An in-depth survey of diseases of forest and shade trees emphasizing identification, morphology, physiology, ecology, epidemiology, genetic relationships, integrated disease management, and multi-resource perspectives. Prerequisites: Biology 1 & 2, knowledge of plant identification and ecology. Four hours.

272 Sustainable Management of Forest Ecosystems  Principles of long-term planning and plan implementation in support of sustainable forestry; Adaptive management; biodiversity and ecosystem health; major management planning project. Prerequisites: FOR 122, NR 205, concurrent or prior enrollment in 223; or graduate standing. Four hours.

275 Forest Watershed Management (2-4) Concepts of forest hydrology and forest watershed management; emphasis on natural processes and impacts of quantity, quality, and seasonal distribution of flow from watersheds. Prerequisite: Natural Resources 102, junior standing or permission. Three hours. (Not offered for graduate credit.)

285 Advanced Special Topics  Advanced special topics courses or seminars in forestry beyond the scope of existing formal courses. Prerequisites: Graduate or advanced undergraduate standing, instructor’s permission. Credit as arranged.

291, 292 Senior Research  Work on research problem under direction of a staff member. Findings submitted in written form as prescribed by department. Prerequisites: Senior standing, permission. Three hours. (Not offered for graduate credit.)

299 Forestry Honors  Honors project dealing with the biology and/or management of forest ecosystems. Prerequisite: By application only; see program chair. Three to six hours.

French (FREN)

COLLEGE OF ARTS AND SCIENCES

Professors Kuizenga, Senecal, van Slyke, Whatley; Associate Professor Crichfield; Assistant Professor Emery, Lecturers Borra, Drolet, Letibert, Rubaud.

The sequence for the beginning levels of French is 1-2-51-52. Students should enter the sequence at the course level most suitable to their previous training and degree of proficiency. In order to determine that, they should take the placement exam and consult with departmental advisors regarding the course level most appropriate for them. For placement in language courses at the level of 100 or above, first-year students should consult with the Department of Romance Languages. Students may not take a language course lower than the level most recently attained, except with permission of the Department. This stricture does not apply to literature or culture courses.

The first two semesters of a foreign language are excluded from the 45-hour limit on courses from a single department that can be counted toward the 122 hours for the Bachelor of Arts degree.

Native speakers of French may not take courses numbered in the sequence 1 to 52 in French without departmental permission.
FRENCH LANGUAGE

1  Elementary I  Fundamentals of French composition, comprehension, pronunciation, speaking, reading, writing. Structure of the basic French sentence. No prior knowledge expected. Four hours.

2  Elementary II  Continuation of 1. Prerequisite: 1 or equivalent. Four hours.

51  Intermediate Reading and Conversation I  Designed to help students move from a basic knowledge of French to the ability to read, speak, and understand French better. Some grammar review and short compositions. Prerequisite: 2 or 9 or equivalent. Three hours.

52  Intermediate Reading and Conversation II  Continues building on skills developed in 51. Less stress on grammar review. Reading selections and compositions are longer and more sophisticated than in 51. Prerequisite: 51 or equivalent. Three hours.

95, 96  Introductory Special Topics  See Schedule of Courses for specific titles. Three hours.

101  Writing Workshop  Improvement of functional skills: writing, listening, and speaking. Development of techniques to explain, elaborate, support opinions, convince, and persuade in both writing and speaking. Prerequisite: French 52 or equivalent. Three hours.

107  Focus on Oral Expression  Guided practice of oralaural skills through vocabulary and pronunciation exercises, readings, and oral presentations. Writing exercises reinforce oral work. Prerequisite: French 52 or equivalent. Three hours.

210  Advanced Composition and Conversation  Course activities (discussions, expositions, written work, etc.) designed to lead to mastery of French oral and written expression. Prerequisite: French 52 or equivalent. Three hours.

209  Advanced Grammar  Comparative grammatical study centered on the specific problems encountered by Anglophones in written and spoken French. Prerequisite: 101. Three hours.

211  History of the French Language  The development of French through sound and structure, from Latin through the 12th century. Prerequisite: 101. Three hours.

215  Methods of Text Analysis  Introduction to procedures and terminology used in analysis of texts of various genres. Prerequisite: 101. Three hours.

216  Stylistics  Study of idiomatic difficulties faced by people who learn French; translation; analysis of the various "levels of speech" in French, with their stylistic features. Prerequisite: 101. Three hours.

FRENCH LITERATURE AND CULTURE

While French literature and culture courses are divided chronologically, it is not essential that students adhere strictly to this order. In general, a 100-level literature course or its equivalent is the prerequisite for all more advanced literature courses: exceptions can be made with the approval of the Department. All 200 level literature courses will have either French 111 or French 112 as prerequisite; both are recommended.

Unless otherwise stated, all courses above the intermediate level will be conducted in the foreign language in question. Questions about the precise content of any course should be referred to the instructor listed for the course or to the department chairperson.

111  French Literature in Context I  A study of significant texts in the history of French literature from the Middle Ages through the 18th century, in their historical and cultural contexts. Senior French majors may take this course only with permission of the department. Prerequisite: 101, senior French majors with permission only. Three hours.

112  French Literature in Context II  A study of significant texts in the history of French literature from the French Revolution to the present, in their historical and cultural contexts. Senior French majors with permission only. Three hours.

195, 196  Intermediate Special Topics  See Schedule of Courses for specific titles.

197, 198  Readings and Research  Permission of chair required.

All 200 level literature courses will have either French 111 or French 112 as prerequisite; both are recommended.

225  Medieval French Literature  First semester: Old French language; 12th century epics, e.g. La Chanson de Roland, Le Pelerinage de Charlemagne, Breton lays; Marie de France. Three hours.

226  Medieval French Literature  Second semester: Romances: Chrétien de Troyes, Guillaume de Lorris and Jean de Meung; lyric poetry, Machaut; Pisan; Charles d’Orléans; farces and miracles. Three hours.

225  Medieval French Literature  First semester: Old French language; 12th century epics, e.g. La Chanson de Roland, Le Pelerinage de Charlemagne, Breton lays; Marie de France. Three hours.

226  Medieval French Literature  Second semester: Romances: Chrétien de Troyes, Guillaume de Lorris and Jean de Meung; lyric poetry, Machaut; Pisan; Charles d’Orléans; farces and miracles. Three hours.

245  The Baroque Age 1600-1650  The literature after France’s civil wars up to the triumph of classicism: religious, lyric, baroque drama; Pascal. Three hours.

246  17th Century Prose  Creation of the modern novel, evolution of psychological and ethical writing. Topics include women writers, the moralistes, memoirs, relationships between sociopolitical structures and literary production. Three hours.

247  17th Century Theatre  Works of Corneille, Molière, and Racine studied in the context of the evolution of 17th century thought. Three hours.

255  18th Century Literature  Writers of the early Enlightenment. Possible topics: the impact of the new science; the literary reflection of new social types; the “pursuit of happiness.” Three hours.

256  18th Century Literature  Rousseau, Diderot, Laclos, Sade: the generation before the Revolution. Possible topics: the attempts to define “natural man;” the relationship between the arts and morality, between liberty and libertinism. Three hours.

265  Romanticism, Symbolism, Decadence in 19th Century Literature  Evolution of the idealist tradition: the Romantic movement (Staël, Chateaubriand, Sand, Hugo, Musset, Flaubert); the Symbolists (Baudelaire, Verlaine, Rimbaud, Mallarmé); fin de siècle Decadents (Huysmans). Three hours.

266  Revolution and Reaction in 19th Century Narrative  Study of the representations of major social issues of the period, such as power, class, money, and women. Representative authors: Balzac, Flaubert, Sand, Stendhal, Zola. Three hours.

275, 276  20th Century Literature  Selected topics dealing with poetry and/or narrative related either to an historical period or a literary movement. Three hours.

279  Women’s Autobiography  Study of several autobiographies written by contemporary French/Francophone
women. Representative authors include Colette, de Beauvoir, Sarraute, Duras, Ernaux, Martin. Three hours.

285 Quebec Literature A study of contemporary (1960-1985) major works of fiction, poetry, and drama. Authors studied include Anne Hébert, Michel Tremblay, Jacques Godbout, Gaston Miron. Three hours.

290 Contemporary French Thought: The Linguistic Model Study of the model of structural analysis established by Saussure and its adaptation to other domains of contemporary thought such as anthropology, psychoanalysis, and philosophy. Three hours.

295, 296 Advanced Special Topics Advanced courses or seminars on topics beyond the scope of existing departmental offerings. See Schedule of Courses for specific titles.

297, 298 Advanced Readings and Research Permission of chair required.

Culture

104 Contemporary France Study of selected aspects of France today. Improvement of language skills; emphasis on reading, writing, and analysis of a variety of materials (literature, journalism, images). Prerequisite or Corequisite: 101. Three hours.

105 French Culture Study of the fundamentals of French culture from historical and structural perspectives, including a review of socio-political institutions. Prerequisite or Corequisite: 101. Three hours.

292 Topics in French Culture In-depth study of a major aspect of French culture. See Schedule of Courses for specific offering. Prerequisite: 104 or 105 or permission. Three hours.

293 Quebec Culture Sociocultural study of the Francophone culture of Canada. Prerequisite: One 100-level French course. Three hours.

The following extra-departmental courses may not be taken for credit toward a major in French except by special agreement with the department chair.

WLIT 95, 96 Special Topics in World Literature
WLIT 11, 111 French Literature in Translation
WLIT 12, 112 Francophone Literature in Translation
LING 101, 102 Linguistics

HONORS – ARTS AND SCIENCES

222, 223 Honors/French Contact Department for specific requirements. Three hours each.

Geography (GEOG)

COLLEGE OF ARTS AND SCIENCES

Professor Seager, Associate Professor Elder, Hannah (Chairperson); Assistant Professors Carmody, Dupigny-Giroux, Wemple, Vanderbeck.

1 World Regional Geography Basic introduction to Geography by way of a regional approach to human and environmental topics. Three hours.

2 World Natural Environments The patterns of the natural environment with particular attention to landforms, climate, soil, vegetation, and water resources. Three hours.

43 Weather and Climate Introduction to the fundamentals of the weather, as well as midlatitude and tropical climates. Topics include cloud formation, hurricanes, tornadoes, winter weather, climate change. Three hours.

51 to 58 The regional courses numbered 51 to 58 listed below each concern the character and development of the contemporary cultural, economic, and political patterns of the area against the background of its physical and resource base. Three hours each.

51 Africa

52 Canada

55 Europe

56 Latin America

57 The United States

60 Geography of Race and Ethnicity in the U.S. Examination of the ways in which spatial and locational processes shape and are shaped by ethnic and racial identities, struggles, and relationships. Three hours.

73 Geography of Global Economy Distribution of global economic activity and power. Processes of uneven development and globalization including industrialization, the "global assembly line," trade, investment, and migration. Three hours.

81 Geotechniques Introduction to cartography, geographic information systems (GIS), and remote sensing. Map design and analysis using topographic/satellite data, air photo interpretation, digitizing, and Internet resources. Three hours.

85 Introduction to Remote Sensing Geographic analysis and evaluation of aerial imagery produced by remote sensors and its relationship to environmental problems in the social and physical sciences. Three hours.

90 International Field Studies Field course abroad (e.g. South Africa or England). Intensive study of the geography of a country or region, with attention to related issues. Three hours.

92 Vermont Field Studies (Same as Vermont Studies 92.) Field course on a geographical theme (e.g. physical or regional geography) in the Burlington area or surrounding region. Three hours.

95, 96 Introductory Special Topics See Schedule of Courses for specific titles.

143 Climatology Analysis of regional and local climatic data with special reference to climatic controls; special laboratory projects. Prerequisite: 45 or instructor permission. Three hours.

144 Geomorphology (3-3) Prerequisite: Geology 1 or 55. Four hours. Crosslisting: GEOL 151.

145 Geography of Water Examination of the spatial dimensions of water distribution from local to global scales, and the social, political, and economic dimensions of its use. Three hours. Crosslisting: NR 102.

146 Watershed Ecosystems of North America Examines the influence of climate, geomorphic processes, and biogeography on ecosystems at the scale of the watershed. Explores the role of social dynamics in the management and restoration of watersheds. Three hours.

151 Southern Africa A regionally focused course. Topics will include: information economy, legacy of apartheid, impacts of HIV/AIDS, race, class, gender, land, governance and social justice. Prerequisite: 51. Three hours.

155 Historical Geography of Europe (Same as History 120) European geography within a framework of past times; the historical development and distribution of settlement, economic, and political patterns. Prerequisite: 55. Three hours.
162 Geography of Place Names Investigation and interpretation of the names found on maps of Vermont, North America, and Europe. Prerequisite: Three hours in geography. Three hours.

170 Historical Geography (Same as History 170.) Examination of the tools, techniques, and perspectives used in studying the historic development of places and landscapes. Vermont and other North American case studies. Prerequisites: 57 recommended or History 11 or 12 or instructor permission. Three hours.

171 Cultural Geography Distribution of race, ethnicity, language, and religion at different geographical scales and how these factors contribute to world and regional events. Prerequisites: 1 or Anthropology 21 or Sociology 1. Three hours.

175 Urban Geography Analysis of the morphology, function and social structure of cities. Consideration of the nature, history and theories of urban growth and development. Prerequisites: 1 or 73 or instructor permission. Three hours.

177 Political Geography (Same as Political Science 161.) Examines the relationships between nation states and political identity. Other political-spatial constructs are also examined, including the private and public dichotomy, cyberspace, and borders. Prerequisites: Recommended 1 or 73 or Political Science 51 or 71. Three hours.

178 Gender, Space, and Environment (Same as Women’s Studies 170.) Examination of the ways in which human relationships to both the built and the natural environment are mediated by gender. Prerequisites: Six hours in geography or women’s studies, or instructor’s permission. Three hours.

179 Cultural Ecology (Same as Anthropology 179.) Interrelationships of social groups and their natural environments and resource bases, with primary emphasis on nonindustrial cultures, examined from the perspectives of anthropology and geography. Prerequisite: 1 or Anthropology 21. Three hours.

182 Introduction to Geographic Information Systems Crosslisting; NR 143.

190 International Field Studies Field course abroad (e.g. South Africa or England). Intensive study of the geography of a country or region, with attention to related issues. Prerequisite: Three hours in geography. Three hours.

191 Geography Internship Supervised internship in applied geography working with a local public agency or private firm. Individually arranged. Prerequisites: Junior or senior standing; departmental permission. One to six hours.

192 Vermont Field Studies (same as Vermont Studies 192.) Field course on a geographical theme (e.g. physical or regional geography) in the Burlington area or surrounding region. Prerequisite: Three hours in geography. Three hours.

195, 196 Intermediate Special Topics See Schedule of Courses for specific titles.

197, 198 Readings and Research

202 Research Methods A systematic overview of the art and science of geographical inquiry. Examination of key research and methodological approaches in the discipline. Prerequisite: Junior or senior standing; nine hours in geography. Three hours.

203 Contemporary Geographic Thought in Context A survey of paradigms and issues in contemporary geography. Attention paid to the social and historical contexts of geographic thought. Prerequisites: Nine hours in geography or permission of instructor. Three hours.

204 Spatial Analysis Analysis of spatial pattern and interaction through quantitative models; introduction to measurement, sampling, and covariation in a spatial framework. Prerequisite: Senior or graduate standing with at least nine hours in geography or instructor permission. Three hours.

245 Advanced Topics in Human-Environment Interactions Advanced offerings on various manifestations of social-environmental relationships. Possible topics include sustainable development, environmental justice, and urban ecology. Prerequisites: Senior or graduate standing with nine hours in Geography; or instructor permission. Three hours.

246 Advanced Topics in Climate and Water Resources Advanced analysis of regional climatology, hydroclimatological hazards, or fluvial geomorphology. Special topics might include droughts, severe weather, floods and floodplain management, mountain and lowland rivers. Prerequisites: Senior or graduate standing with nine hours in Geography, or instructor permission. Three hours.

200 Field course on a geographical theme (e.g. physical or social science of geographical inquiry. Examination of key re-

218, 219, 220 Advanced Research Projects Two one- or two-term research projects in remote sensing; application of multispectral data for environmental studies. Prerequisite: 85, Civil Engineering 210, or Forestry 146. Three hours.

256 Advanced Special Topics See schedule of courses for specific titles. Three hours.

297, 298 Readings and Research

HONORS – ARTS AND SCIENCES

224, 225 Honors Geography Contact Department for specific requirements. Three hours each.

Geology (GEOL)

COLLEGE OF ARTS AND SCIENCES

Professor Bierman, Mehrten; Associate Professor Doolan (Chairperson), Drake; Assistant Professors Klepeis, Lini, Rushmer; Lecturer Wright; Adjunct Lecturers Massey, Mona Klepeis.
1 Introductory Geology (3-3) Process, agents, and their effects on materials, structures, and morphology of earth’s rust. Laboratory includes field trips, study and interpretation of rocks, minerals, and maps. Four hours.

3 Fire and Ice Introduction to volcanoes/plate tectonics (“fire”) and glaciers/climate change (“ice”) using lectures, slides, discussion, and field trips. Considers Vermont and world-wide geological examples. Three hours.

4 Dynamic Earth Plate Tectonics and paleoclimate are the foci in this activity-based lecture/lab introductory earth science course. Prerequisites: First and second year students only. Four hours.

5 Ecology and Geology of the Lake Champlain Basin Introduction to the principles and processes of ecology and geology applicable to the Lake Champlain basin. A topical, project-oriented format rather than a comprehensive overview. Priority to first-year students. Four hours.

7 Earth Hazards Understand geological and societal causes of death and destruction by earthquakes, landslides, floods, volcanoes, storms, and avalanches around the world. Three hours.

10 Oceanography (2–2) Characteristics and development of the oceans, their basins and shorelines, including plate tectonic history and basic physical, chemical, and biological processes. Prerequisite: GEOL 1 or introductory science course. Three hours.

53 Planetary Geology Characterizes the differences and similarities between the Terrestrial and Jovian Planets, the dynamic processes that shape our home planet and compares the geologic processes active in our Solar System. Prerequisites: Introductory science course or ASTR 5. Three hours. Crosslisting: ASTR 55.

55 Environmental Geology (3-3) Introduction to geologic processes and materials pertinent to environmental problems: ground water movement, supply, and contamination, waste disposal, flooding, subsidence, and landslides. Local field trips. Designed for intended natural science majors. Four hours.

62 Earth Environments and Life through Time This course presents an overview of how the Earth has changed over time and how this has influenced the history of life. Prerequisites: GEOL 1, 3, 4, 5, or 55. Four hours.

95, 96 Introductory Special Topics See Schedule of Courses for specific titles.

101 Field Geology (0-12) Geological evolution of western Vermont as seen through actual field mapping in the Burlington area. Specifically designed for sophomores majoring or minoring in geology or related sciences. Prerequisite: GEOL 1, 5, or instructor’s permission. Four hours.

102 Plate Tectonics and the Evolution of Earth Tectonic processes on Earth related to the origins of continents and oceans following concepts of Plate Tectonics. Laboratory sessions examine earth materials and geologic processes. Prerequisite: Any introductory Geology course. Four hours.

116 Glacial Geology Examines the Dynamics of glacier flow and landforms glaciers produce. Lectures, labs, and field trips emphasize processes in both modern and ancient glaciers. Prerequisites: GEOL 1, 5, 7, or 55. Three hours.

131 Igneous, Metamorphic, and Sedimentary Petrology (3-3) Description, classification, and genesis of igneous and metamorphic rocks. Introduction to petrogenetic models of the earth’s crust and mantle. Prerequisites: 112. Four hours.

151 Geomorphology (3-3) Examines, using lectures, labs, and field-based independent study research projects, processes which change Earth’s surface and the history of landscape development. Considers fundamental geologic constraints on environmental problems. Prerequisite: 1 or 55. Four hours. Crosslisting: GEG 144.

153 Stratigraphy and Sedimentology (3-3) Properties of physical sedimentation, principles of stratigraphy and basin analysis, and comparison of modern and ancient environments. Lab includes description and classification of sedimentary rocks. Prerequisite: 131. Four hours.

155 Fluvial Geology A discussion of fluvial systems including hydrology, sedimentation, geomorphology, water chemistry, and human impacts. Prerequisite: Instructor’s permission. Four hours.

172 Regional Geology Discussion of the geology of a selected region of North America. A four-week summer field trip to the area in question. Prerequisites: One other Geology course or permission.

195, 196 Intermediate Special Topics See Schedule of Courses for specific titles.

197, 198 Research in Geology Supervised research and readings in a selected field of geology. Students from allied sciences, mathematics, and engineering may elect a research project that combines their major field of study and geology. Prerequisite: Departmental permission. Three hours.

201 Advanced Field Geology (1-6) Advanced field mapping techniques, analysis of field data, preparation of geological maps and reports. Prerequisite: 260. Three hours.

210 Systems Dynamics and Earth Science Analysis of generic systems with examples from physical and natural sciences. Geodetic systems emphasized. Laboratories involve computer analysis of system structure and behavior over time. Prerequisites: A major or minor in science, mathematics, natural resources, engineering, or permission of instructor. Three hours.

230 Advanced Igneous and Metamorphic Petrology (3-3) Application of phase equilibria, elemental and isotopic data, and textural interpretations in problems in igneous and metamorphic petrology, stressing modern theories of tectonics and petrogenesis. Prerequisite: 131. Four hours.

233 Environmental Isotope Geochemistry Course focuses on stable isotope geochemistry of low temperature processes occurring on and near the earth surface through lecture, laboratory, and seminar. Prerequisite: Introductory chemistry. Three hours.

234 Global Biogeochemical Cycles Integrated perspective on biogeochemical cycles describing the transformation and movement of chemical substances in the natural environment, as seen on the global context. Prerequisite: Introductory chemistry. Three hours.

235 Geochemistry of Natural Waters Basic concepts of chemical equilibria applied to natural waters, including thermodynamics, pH, oxidation-reduction, weathering, and solution equilibria. Prerequisites: Chemistry 1, 2. Three hours.

240 Tectonics Applications of igneous and metamorphic petrology to problems in tectonophysics, including petrochemistry of the earth’s crust and upper mantle and the internal structure of orogenic belts. Prerequisite: 101, 102. Three hours.

241 Clastic Depositional Systems Selected readings and field studies emphasizing the interpretation of clastic sedimentary deposits including transportation, processes of sedimentation, and geomorphology of ancient and recent sedimentary environments. Prerequisites: 153. Three hours. Alternate years.

243 Clastic Petrology Laboratory Study of clastic rocks in hand specimen and thin section. Prerequisite: Concurrent enrollment in 241. One hour.
245 Carbonate Depositional Environments Paleoenvironmental analysis of carbonate rocks including selected readings, field investigations, and petrographic studies. Prerequisite: 153. Three hours. Alternate years.

247 Carbonate Petrology Laboratory Study of carbonate rocks in hand specimen and thin section. Prerequisite: Concurrent enrollment in 245. One hour.

255 Geohydrology (3–3) Field-based projects address hydrologic processes in geological context; precipitation, runoff, ground water flow, river behavior, and hillslope stability. Stresses data analysis, writing, and practical approaches to water-related environmental problems. Prerequisite: Major in science or engineering or permission. Four hours.

260 Structural Geology (3-3) Examines processes and problems concerning the mechanical behavior of the Earth’s crust and surface. Includes rock deformation stress, strain, and the interpretation of geological structures. Prerequisites: 101, 102, Physics 11 or permission. Four hours.

261 Geodynamics Examines physical evolution of the Earth on regional to global scale. Project oriented, focusing on analysis and interpretation of geologic and geophysical data. Prerequisites: GEO 101 and 102 or permission. Four hours.

273 Geology of the Appalachians Origin of mountain belts; the Appalachian mountain system discussed in terms of tectonics and geologic processes active in modern continental margins. Prerequisites: 101, 102, or permission. Three hours.

278 Principles of Aquatic Systems (See Natural Resources 278.) Three hours.

295, 296 Advanced Special Topics See Schedule of Courses for specific titles.

HONORS – ARTS AND SCIENCES

226, 227 Honors/Geology Contact Department for specific requirements. Three hours each.

German (GERM)

COLLEGE OF ARTS AND SCIENCES

Professors Mieder (Chairperson), Mahoney, Schreckenberger, Sease; Lecturers Horch, Wood.

The first two semesters of a foreign language are excluded from the 45-hour limit on courses from a single department that can be counted toward the 122 hours required for the Bachelor of Arts degree.

1, 2 Elementary German An introduction to all aspects of contemporary standard German: Speaking, listening, reading, writing. Cultural components include topics such as: music, art, literature, and current events. No previous knowledge of German needed for 1. Four hours each course.

51, 52 Intermediate German Comprehensive review of German grammar, vocabulary-building skills, development of reading strategies and compositional abilities, study of contemporary German culture through literary texts. Prerequisite: 1, 2 or equivalent for 51; 51 for 52. Three hours.

95, 96 Introductory Special Topics See Schedule of Courses for specific titles.

103 Composition and Conversation An intensive language course concentrating on more advanced syntax, vocabulary building, and idiomatic expression through written compositions, translations, and oral presentations. Prerequisite: 52 or equivalent. Three hours.

104 German News Media Analysis of journalistic style and content in news coverage of contemporary events as reported in newspapers, magazines, radio, and television in German-speaking countries. Prerequisite: 52 or equivalent. Three hours.

121 Culture and Civilization to 1900 Historical, intellectual, and artistic developments of German culture and civilization from Roman times through the 19th century, stressing written and oral work. Prerequisite: 52 or equivalent. Three hours.

122 20th-Century Culture and Civilization Social, cultural, and political developments in the German-speaking countries since the turn of the century, stressing written and oral components. Prerequisite: 52 or equivalent. Three hours.

155 Survey of German Literature to 1830 Selected prose, drama, and poetry from Medieval through Baroque literature, in-depth readings and analyses of major works by Lessing, Goethe, Schiller, and the Romantics. Prerequisite: 52 or equivalent. Three hours.

156 Survey of German Literature from 1830 Major literary and intellectual movements and figures of the period through in-depth analyses of works by Büchner, Mann, Kafka, and Brecht. Prerequisite: 52 or equivalent. Three hours.

195, 196 Intermediate Special Topics See Schedule of Courses for specific titles.

197, 198 Readings and Research

201 Methods of Research and Bibliography Introduction to tools and methods of research, including major bibliographical sources, reference works, dictionaries, editions, and journals concerned with German literature, language, and folklore. Prerequisite: Two 100-level courses. Three hours.

202 Expository Writing Improvement of writing skills through work with authentic texts from different content areas (literature, media, science, business). Emphasis on stylistic development and sophisticated vocabulary-building. Prerequisite: Two 100-level courses. Three hours.

For all courses numbered 213 to 296 the prerequisite is 155 or 156 and one other 100-level course.

213 History of the German Language Historical and linguistic development of the German language from Indo-European to the present, emphasizing sound shifts, the 16th century, and the modern age. Three hours.

214 Middle Ages Analysis and discussion of several “Minnesang” poets (esp. Walther and Neidhart), the “Nibelungenlied,” the courtly epics Erec, Parzival, and Tristan, and the satirical epic Helnwein. Three hours.

226 Schiller Major attention will be paid to Schiller’s development as a dramatist (from Die Räuber to Wilhelm Tell) as well as to his contributions to German Classicism. Three hours.

237 19th-Century Prose Literary and stylistic analysis of prose works by Tieck, Kleist, Stifter, Gotthelf, Droste-Hülshoff, Storm, Keller, and Hauptmann with emphasis on Romanticism, Poetic Realism, and Naturalism. Three hours.

238 19th-Century Drama Analysis of plays by Tieck, Kotzebue, Kleist, Büchner, Grillparzer, Nestrov, Hebbel, and Hauptmann. Consideration of traditional Viennese “Volkstheater” and the period’s major literary movements. Three hours.

247 German Literature from 1890 to 1945 Naturalism, Symbolism, Expressionism and subsequent trends through readings of authors such as Hauptmann, Rilke, Kaiser, Kafka, Mann, and Brecht. Three hours.

248 Contemporary German Literature Literary movements and their major representatives from 1945 to the present, including relevant sociopolitical, intellectual, and cultural aspects. Three hours.
251 German Folklore  Verbal folklore genres (fairy tales, legends, folk songs, and proverbs) treated in their relation to literature, mass media, and popular culture. Three hours.

252 Faust  Focus on one of the major themes of world literature. Readings include the "Volkbuch" of 1587, and works by Marlowe, Goethe, and Thomas Mann. Three hours.

263 German Romanticism  Study of major works by authors such as Friedrich Schlegel, Novalis, Brentano, Hoffmann, and Eichendorff in their literary, artistic, philosophical, and sociopolitical contexts. Three hours.

264 German Lyric Poetry  The lyric genre and the historical development of German poetry from the age of Goethe to the present. Three hours.

271 Proverbs  Diachronic and synchronic survey of German proverbs, proverbial expressions, and witticisms, emphasizing their use and function in literature, art, mass media, advertisements and oral communication. Three hours.

273 German Intellectual Movements  A survey of developments in art, music, philosophy, and social thought from the Enlightenment to 1945, with particular attention to their impact on German literature. Three hours.

275 Fin-de-Siècle  Prevalent literary and intellectual movements at the turn of the 20th century in their historical, sociopolitical, and cultural contexts. Study of Nietzsche, Freud, Rilke, Hofmannsthal, Schnitzler, and Mann. Three hours.

276 Brecht and the Modern Drama  Brecht’s revolutionary concept of "epic theatre" in theory and practice and its influence on subsequent dramatists, including Dürrenmatt, Frisch, Handke, Hochhuth, Müller, and Weiss. Three hours.

278 GDR Fiction  Aesthetic and thematic evolution of the short story and its relation to historical, political, and cultural developments from 1945 to the present. Three hours.

281 Seminar on Literary Genre, Period, or Theme  Study of a literary genre, period, or theme through close readings of representative texts supplemented by lectures and reports on sociocultural context. May be repeated. Three hours.

282 Seminar on a Particular Author or Authors  Study of author(s) through close readings of representative texts supplemented by lectures and reports on the works’ sociocultural context. May be repeated. Three hours.

295, 296 HELIX/EPSCOR High School Summer Outreach  Teams of a high school science teacher and two students apprentice with UVM faculty in research in preparation for an academic year of research. Prerequisites: Permission of HELIX/EPSCOR coordinator 656-0706. One-three hours.

Hebrew (HEBR)

COLLEGE OF ARTS AND SCIENCES
Associate Professor Visser (Interim Director); Lecturer McCullough.

1, 2 Elementary Hebrew  The spoken language of everyday use with oral, aural, and written practice in speaking, reading, and comprehension. Four hours.

51, 52 Intermediate Hebrew  Reading, translation, and discussion in Hebrew of texts selected to show the development of Hebrew culture from Biblical times to the present. Prerequisites: 1, 2 or equivalent for 51; 51 for 52. Three hours.

Historic Preservation (HP)

COLLEGE OF ARTS AND SCIENCES
Associate Professor Visser (Interim Director); Lecturer McCullough.

200 History of American Architecture  Study of architectural history to gain fluency in the stylistic terms so essential to historic preservation and to public support for conserving our architectural heritage. Prerequisites: Open to non-HP majors by permission. Three hours.

201 History on the Land  Identifying and interpreting evidence of the cultural forces – early settlement patterns, transportation, industry, agriculture, planning, conservation – that have shaped our land, buildings, towns and cities. Three hours. Cross listings: HST 201, ENVS 295.

202 Special Topics. Courses are offered under this number in specialized areas of historic preservation through Continuing Education. Three hours.

204 Historic Preservation: Development Economics  Survey of economic, financial aspects of real estate development pertaining to preservation and adaptive use of historic buildings (market studies, pro-formas). Field trips. Actual proposal development for underutilized properties. Prerequisite: 201. Three hours.

206 Researching Historic Structures and Sites  Methods for researching historic structures and sites using archival and physical evidence, deciphering archeaic building technologies, and documenting structures through professional reports, architectural photography, measured drawings. Prerequisite: HP majors or by permission. Three hours.

History (HST)

COLLEGE OF ARTS AND SCIENCES

Professors Grinde, Hutton, Overfield, B. Saylor Rodgers, Steffens, Stoler, Youngblood (Chairperson); Associate Professors Brown, Coleman, Gustafson, Visser; Assistant Professors Dungy, Ergene, Huener, Massell, Stilwell; Lecturer McCullough.

History course numbers are designed to indicate method of instruction and expected preparation level of students, as follows:
9–96 Introductory Courses Open to all students, but
designed primarily for first-year students and students
beginning the study of history. The courses teach skills and
methods as well as subject matter.

120–199 Intermediate Courses Intended primarily for
juniors and seniors, these courses all have prerequisites.
Requirements include independent research projects.

200–299 Advanced (Seminar) Courses Advanced work
in interpretation, research, and writing. Seminar format,
limited enrollment. Primarily for students majoring in his-
tory (or related disciplines) and graduate students. Sub-
stantial prerequisites.

9 Global History to 1500 The development and cross-
fertilization of civilizations in Eurasia, Africa, and the
Americas from about 3500 B.C.E. to A.D. 1500. Three
hours.

10 Global History Since 1500 Character, development,
and emerging interdependence of the world’s major civil-
vizations since 1500. Three hours.

11, 12 History of the U.S. Survey from the pre-Revolution-
tary period to the present. First semester: to 1876; sec-
ond semester: 1876 to present. Three hours.

13, 14 Ideas in the Western Tradition: Integrated Human-
ities Great books of Western civilization in their historical
setting. First semester: Greece and Rome. Second semes-
ter: Renaissance to Existentialism. Credit will not be given
for History 14 and History 25 or 26. Prerequisites: Concur-
rent enrollment in English 27, 28; Religion 27, 28; Inte-
grated Humanities Program. Three hours.

19 Western World since 1945 Comparative history of
European nations and the United States since 1945. Three
hours.

21 Classical Greek Civilization (See Classics 21.)

22 Classical Roman Civilization (See Classics 23.)

23 The Birth of Europe Survey of history of Western
Europe from the late Roman Empire to the stabilization of
Medieval Civilization around A.D. 1000. Three hours.

24 High and Later Middle Ages: A.D. 1000–1500 The
stabilization and expansion of Western European civiliza-
tion in the Age of the Crusades; the crisis of the 14th cen-
tury; 15th century recovery. Three hours.

25 European Civilization to 1815 Introduction to politi-
cal, social, and intellectual movements which have shaped
the foundations of Western civilization from the Renais-
sance to the French Revolution. Three hours.

26 Europe, 1815–1945 Europe from the fall of Napo-
leon to the end of World War II, focusing on political,
social, economic, and intellectual developments. Three
hours.

27 Modern Eastern Europe Eastern Europe since 1772,
especially areas comprising present-day states of Bosnia-
Herzegovina, Croatia, the Czech Republic, Hungary,
Macedonia, Poland, Slovakia, Slovenia, and Yugoslavia.
Focus on politics and culture of nationalism. Three hours.

40 African History to C-1870 Introduction to the politi-
cal, social and economic history of Africa, focusing on the
major events and forces that shaped the continent before
the colonial period. Three hours.

41 African History from C-1870 to the Present
Introduction to African history from European conquest to
the present, with special attention paid to African resist-
tance, the nature of colonialism, and African independ-
ence movements. Three hours.

45 History of Islam and the Middle East to 1258
Introduction to the major institutions evolved in the Middle
East from the advent of Islam to the Mongol conquest of
Baghdad in 1258. Three hours.

46 History of Islam and the Middle East Since 1258
Introduction to the major institutions evolved in the Islamic
Middle East since the Mongol conquest of Baghdad in 1258
to the present. Three hours.

50 China and Japan to 1800 Historical development of
the politics, economics, social structure, philosophy, reli-
gion, and the arts in East Asia from neolithic times to 1800.
Three hours.

51 China and Japan since 1800 Continuity and change in
the politics, economics, society, and culture of China and
Japan in the 19th and 20th centuries. Three hours.

62 Colonial Latin American History Comparative survey
concentrating on the complex cultural, economic, and po-
litical development of Spanish and Portuguese America
from pre-Conquest to 1820. Three hours.

63 Modern Latin American History Comparative survey
concentrating on Latin America from the independence
movements to the present with emphasis on cultural, politi-
cal, and economic development and U.S. intervention.
Three hours.

65 History of Canada Survey of Canadian history from
aboriginal settlement to the present. Themes include In-
dian-White relations, colonial societies, national identities,
American influence. Field trip to Canada. Three hours.

68 History of U.S. Peoples of Color Comparative survey
of historical experiences of African-Americans, Latinos,
Asian-Americans, and Native Americans in U.S. Racism,
conquest, slavery, exploitation, civil rights, militancy, libera-
tion movements, and cultural renaissance. Three hours.

85, 86 History of Science Survey of the history of the
physical and biological sciences from antiquity to the
present. Stresses science as an intellectual activity within the
contemporary context of philosophy, religion, and social
organization. Three hours.

95, 96 Introductory Special Topics See Schedule of
Courses for specific titles.

120 Historical Geography of Europe (Same as Geogra-
phy 155.) Three hours.

121 History of Greece (See Classics 121.)

122 History of Rome (See Classics 122.)

125 The Renaissance European society from the 14th to
early 16th century, emphasizing the transition from medie-
vial to “modern” society and the roots of Renaissance Italy’s
cultural and artistic brilliance. Prerequisite: 9 or 10 or 14 or
25 or 26. Three hours.

126 The Reformation European society from the Ren-
naissance to mid-17th century. Emphasis on religious
struggles growing out of Protestant Reformation and their
impact on the social, political, economic, and cultural
movements of the era. Prerequisites: 10 or 14 or 25.
Three hours.

127 European Society and Culture, 1914–1945 Survey of
European high modernism, focusing on the avant-garde,
Stalinism, fascism, and popular culture. Prerequisite: 26 or
128 or three hours history. Three hours.

128 European Society and Culture, 1880–1920 European
society and culture before and during “The Great War.” Transitions in the arts, philosophy, science and tech-
nology, industry, dance, theatre, attitudes, and diplomacy.
Prerequisite: 26. Three hours.

130 European Intellectual History The history of ideas in
Europe from the 15th to the 20th centuries. Topics vary ac-
cording to instructor. Prerequisites: 25 or 26. Three hours.

132 Modern Irish History Ireland 1600 to present. Eng-
lish subjugation of Ireland, Anglo-Irish, emergence of Irish nationalism, Irish Literary Renaissance, Irish Free State, and ongoing problem of Northern Ireland. Prerequisite: 25 or 26. Three hours.

136 Topics in the History of France Varying themes on the political, cultural, and intellectual history of France from the French Revolution to the present. Prerequisite: Three hours history. Three hours.

137 History of Russia Russian political, social, and intellectual history from Kievan Rus’ to the Revolutions of 1917, focusing on the Imperial period (1790–1917). Prerequisite: 10 or 26. Three hours.

138 History of the Soviet Union Soviet political and social history, 1917–1991, centering on the Stalin era and on efforts of post-Stalin regimes to deal with the Stalinist legacy. Prerequisite: 10, 26 or 137. Three hours.

139 Modern Germany Political, cultural, and social history of Germany from unification in 1871 through the Wilhelmine empire, Weimar Republic, Nazi era, and post-war period. Prerequisites: 10 or 14 or 26 or work in German. Three hours.

140 History of West Africa from Holy War to Colonialism Lecture survey. Topics include: Sudanic states, Islamic revolution, slavery and the slave trade, European scramble and the African resistance, colonialism and the colonial state, African nationalism. Prerequisite: 40 or 41. Three hours.

141 History of Southern Africa Lecture survey, covering the history of Southern Africa from the Bantu Migrations to the end of Apartheid. Prerequisites: 40 or 41. Three hours.

149 History of the Ancient Near East (See Classics 149.)

150 China: The 19th and 20th Centuries China from the late Qing Dynasty to the present, with particular attention to the influence of Western imperialism, the process of revolution, and the Communist era. Prerequisite: Six hours of history, 50 recommended. Three hours.

151 Modern Japan Transition from tradition to modernity in Japan from the Meiji Restoration, 1868 to the present. Prerequisite: Six hours of history, 50 recommended. Three hours.

152 The Chinese Revolution Examination of the ongoing process and significance of the Chinese Revolution of the 20th century, emphasizing the socio-economic and cultural aspects of the changes it wrought. Prerequisites: Six hours of history, 51 recommended. Three hours.

157 Greek Feminism (See Classics 157.)

161 Topics in Caribbean and Latin American History Topics include colonialism, plantation economy, slavery, race relations, gender issues, economic development, and U.S. influence. Prerequisites: 62 or 63 or permission. Three hours.

163 Early Caribbean History: Swashbucklers, Slaves, and Servants Exploration of the economic, political and cultural developments in the Caribbean, pre-Conquest to the 19th century. Prerequisites: Three hours history, 62 or 63 recommended. Three hours.

164 Modern Caribbean History: Cannons to Cricket Exploration of the economic, political and cultural developments in the Caribbean, 19th century to the present. Prerequisites: Three hours history, 62 or 63 recommended. Three hours.

165 Canadian-American Relations Canada’s relationship with the U.S. from the Revolutionary War to the present, emphasizing diplomatic, economic, social, and environmental relations in the 19th and 20th centuries. Prerequisite: Three hours in U.S. or Canadian history. Three hours.

168 Native American History A survey of North American Indian history from European contact to the present. Cultural and military conflicts, resistance movements, accommodation, and cultural adaptation within the U.S. Prerequisite: Three hours history. Three hours.

169 History of Native American Thought An examination of Native American philosophies, spiritualities, political theories, and ecological perspectives. Traditional Native American thought, intellectuals and intellectual movements, and contemporary resistance and reform movements. Prerequisite: Three hours. Three hours.

170 Historical Geography of the U.S. (Same as Geography 170.) Three hours.

171, 172 Social History of the U.S. Selected topics in history of American society, including community structures, family life, work patterns, value systems, social class, and mobility. Prerequisites: For 171: 11 or 182; for 172: 12 or 182. Three hours.

177 American Revolution Survey of the Revolutionary Era, 1760–1791, Causes of the Revolution, War for Independence, establishment of the Constitution. Prerequisite: Six hours of history or other social sciences of which History 25 is highly recommended. Three hours.

179 U.S. History Since 1960 Topical review of U.S. history since 1960, emphasizing problems of interpreting and reconstructing the recent past. Prerequisite: 12. Three hours.

181 Film and History Topics in the history of American and European cinema and society, focusing on the filmmaker as historian and the film as historical artifact. Prerequisite: Three hours history or film.

182 History of Women in the U.S. Survey of the origins and changes in images, status, and roles of women in American society since the colonial period. Prerequisite: Three hours in history (11 or 12 recommended), or Women’s Studies minor. Three hours. Crosslisting: WST 161.

183 U.S. Military History Development of the U.S. military establishment within the framework of U.S. history from the Colonial era to the present. Prerequisite: 10 or 11 or 12. Three hours.

184 Vermont History Survey of Vermont history from early times to the present. Prerequisite: 11 or 12. Three hours.

185 Science and Culture Science as an integral part of 20th-century culture, emphasizing works of leading scientists, mathematicians, and humanists. Prerequisite: 86 or six hours of European history, or science major. Three hours.

186 The Scientific Revolution Interrelationship between European scientific activity and social change during 16th and 17th centuries. Emphasis on philosophical, religious, artistic, and social context of the times. Prerequisite: 85 or six hours of European history or science major. Three hours.

187, 188 African American History Economic, social, political, and intellectual developments in U.S. history as they have affected and been affected by African-Americans. First semester: 1619 to Civil War. Second semester: Civil War to present. Prerequisite: Three hours history. Three hours each.

189 History of African-American Women An exploration of the experiences of women of African descent from their arrival in America to contemporary times. Prerequisites: Any one of the following: History 11; 12; 182, 187, 188; Women’s Studies 73; 174, 235, 273. Three hours.

190 The Holocaust Study of the background, events, and aftermath of the Holocaust in Nazi Germany and
Europe under German control. Prerequisite: 10 or 26 or 27 or instructor's permission. Three hours.

197 World War II Causes, conduct, and consequences of global war from 1931–1945, including social, economic, political, and diplomatic as well as military aspects. Prerequisite: 10 or 12 or 26 or 51. Three hours.

192 Special Methods in Secondary Education for the Social Studies (Same as Education 179.) Social studies curricula and selected social studies topics. (Not acceptable toward fulfilling Arts and Sciences College major requirements.) Prerequisite: Acceptance in teacher certification program. Three hours.

195, 196 Intermediate Special Topics See Schedule of Courses for specific titles. Prerequisites: Junior or senior standing, six hours of history. Three hours.

197, 198 Readings and Research Prerequisites: May be prescribed by an individual instructor; junior or senior standing. Three hours.

199 Internship in History Supervised cooperative internship work in history in archives, museums, libraries, etc. To be individually arranged for each student. Prerequisite: Junior or senior standing, department permission. Three to six hours.

Prerequisites for Seminar Courses (all following courses): Enrollment limited to juniors, seniors, and graduate students who have taken at least 12 hours of work in History. Individual instructors will prescribe specific prerequisites appropriate for their seminars. Students who wish to enroll in seminars should check the current Schedule of Courses for these prerequisites.

201 Architecture, Landscape, and History (Same as Historic Preservation 201; Art 201.)

209, 210 Seminar in Global History Selected topics on the nature and results of interactions among the world’s peoples. 209: to 1500. 210: since 1500. Prerequisites: Junior, senior, or graduate standing; 12 hours of history including 9 or 10. Three hours.

221, 222 Seminar in Ancient History (See Classics 221, 222.)

224 Seminar in Medieval Europe Selected topics on Europe from the Fall of Rome to the Renaissance. Prerequisites: Twelve hours of history including 23 or 24; junior, senior, or graduate standing. Three hours.

225 Seminar in Early Modern Europe Selected topics on European history from the Renaissance to the French Revolution. Prerequisites: Junior, senior, or graduate standing and 12 hours of history. Three hours.

226, 227 Seminar in Modern Europe Selected topics on European history from 1815 to present. Prerequisites: Junior, senior, or graduate standing; 12 hours history. Three hours.

228 Seminar in Popular Culture History of the attitudes of ordinary people towards everyday life in European society from the Middle Ages to the present. Prerequisites: Junior, senior, or graduate standing, 12 hours of history. Three hours.

237 Seminar in Russian History before 1917 Selected topics in Russian intellectual, social, and cultural history focusing on the period 1825–1917. Prerequisites: Junior, senior, or graduate standing, 12 hours of history including 137. Three hours.

238 Seminar in Soviet History Selected topics in Soviet social and cultural history from the Bolshevik Revolution to the death of Stalin (1917–53). Prerequisites: Junior, senior, or graduate standing, 12 hours of history including 138. Three hours.

240 Comparative Slavery: An Historical Perspective History of slavery from a comparative perspective, including Classical Antiquity, Islam and the Middle East, Africa, Latin America, and the Southern United States. Prerequisite: Junior, Senior, or graduate standing. Three hours.

241 Seminar in African History Topics in African history. Generally, the seminar will focus on one of three themes: Islam, slavery or urbanism. Prerequisite: Junior, senior, or graduate standing; 12 hours history. Three hours.

250 Seminar in East Asian History Topics in the history of East Asia. Prerequisites: Junior, senior, or graduate standing, 12 hours of history. Three hours.

252 Seminar on China Selected topics on the history of China. Prerequisites: Junior, senior, or graduate standing; 12 hours of history, including 150 or equivalent. Three hours.

262 Seminar in Caribbean and Latin American History Selected topics in Caribbean and Latin American history. Prerequisites: Junior, senior, or graduate standing, including 62 or 63 or permission. Three hours.

265 Seminar in Canadian History Topics in 19th and 20th century Canadian history: national development, regionalism, multiculturalism, and international relations. Prerequisites: Junior, senior, or graduate standing. Three hours.

271, 272 Seminar in U.S. Social History Topics in U.S. Social History. 271: to the Civil War; 272: Civil War to the present. Prerequisites: Junior, senior, or graduate standing, 12 hours of history. Three hours.

273, 274 Seminar in Modern U.S. History Selected topics in U.S. history, among them foreign relations, the role of the presidency, World War II, and the Cold War. Prerequisites: Junior, senior, or graduate standing; 12 hours of history. Three hours.

278 Colonial Origins of U.S. Government (Same as Political Science 231). Evolution of government (local to national levels) from English background through establishment of the U.S. Constitution, emphasizing political and constitutional aspects of the American Revolution. Prerequisites: Two courses in the social sciences, one political science course, two courses in history (at least one course above 100; 177 recommended). Three hours.

284 Seminar in Vermont History Topical approach to Vermont history through original research utilizing primary sources available at UVM, the Vermont Historical Society, and the Vermont State Archives. Prerequisites: Junior, senior, or graduate standing; 12 hours history, including 184 or permission. Three hours.

285 Seminar in History of Science Selected topics in the history of science. Prerequisites: Junior, senior, or graduate standing, 12 hours of history. Three hours.

287 Colonial Origins of U.S. Government Topics and methods in contemporary historical writing. Prerequisites: Junior, senior, or graduate standing, 12 hours of history. Three hours.

HONORS – ARTS AND SCIENCES

232, 233 Honors/History Contact Department for specific requirements. Three hours.

Honors – Arts and Sciences (HON)

COLLEGE OF ARTS AND SCIENCES

Students enrolled in the College of Arts and Sciences who wish to undertake a College Honors project must contact the specific academic department for criteria and admission requirements. College Honors credit will
be counted toward the 45-hour limit (50-hour limit for B.S. candidates) in the major. Additional information may be found on page 61.

93, 94 Introductory Special Topics Seminars restricted to first-year John Dewey Honors Program Students. Prerequisite: Admission to the John Dewey Honors Program. Three hours.

95 Spring Seminar This seminar accompanies the visit of the Carol G. Simon Speaker to the John Dewey Honors Program each spring. Prerequisite: Admission to the John Dewey Honors Program. One hour. Satisfactory/Unsatisfactory.

100 Knowledge and Theory Using selected examples of knowledge from across the arts and sciences, this course inquires into the production of knowledge and theoretical models in different fields. Prerequisite: Admission to the John Dewey Honors Program. Three hours.

195 Intermediate Special Topics This seminar is usually taken by John Dewey Honors Program students in their junior year. See schedule of courses for specific titles. Prerequisite: Admission to the John Dewey Honors Program. Three hours.

201 John Dewey Honors Program Thesis Seminar This seminar brings John Dewey Honors Program students writing their college honors theses together in semi-monthly meetings to share their research problems, concerns and findings. Zero hours. Satisfactory/Unsatisfactory.

Human Development and Family Studies (HDFS)

COLLEGE OF EDUCATION AND SOCIAL SERVICES
Associate Professors D. Goldhaber, Shelton; Assistant Professors Smith, Winslock.

1 Introduction to Human Development and Family Studies and Academic Service-Learning Seminar designed to introduce concepts and practices of Human Development and Family Studies through integrating academic service-learning in developmental settings with critical thinking about development. Prerequisite: Majors only. Three hours.

5 Human Development A comprehensive survey of life span individual and family development within social and historical context. Three hours.

20 Aging: Change and Adaptation (Same as Nursing 20 and Sociology 20.) Individual and social meanings of aging and old age; physical, physiological, psychological, and sociological changes accompanying aging; individual, family, community, and societal adaptations to aging. Three hours.

50 The Context of Human Development The impact of the family, community, and various agencies, systems, and conditions within society upon the developing individual. Three hours.

65 Human Relationships and Sexuality Sexual responsibility and the biological, social, psychological growth, and development of human beings in terms of sex role identity. Three hours.

152 Biology of Aging (Same as Nursing 100.) Three hours.

167 Sexual Identities Exploration of diverse lesbian, gay, bisexual, and/or transgender identities, families, and communities, and their current personal, social, and cultural meanings and contexts. Prerequisites: Three hours in Human Development or related field; sophomore standing. Three hours.

195 Special Topics Lectures, laboratories, readings, or projects relating to contemporary areas of study. Enrollment may be more than once, accumulation up to 12 hours. Prerequisite: Varies with course.

260 Family Ecosystem Family viewed in and as an environment for human development. The family ecological approach applied to practical family concerns. Prerequisites: Senior standing or instructor’s permission. Three hours.

263 Advanced Child Development Survey of professional literature in child development with special emphasis on influence of early life experiences throughout the life cycle. Three hours.

264 Contemporary Issues in Parenting Contemporary cultural factors that influence adult lifestyles and their relationship to successful parenting. Prerequisites: Nine hours in Human Development or instructor’s permission. May be taken more than once. Three hours.

266 Seminar in Human Development Intensive study of issues in human development and their application in a wide variety of professional areas. May be taken more than once up to a maximum of 12 hours. Prerequisites: Junior standing, nine hours in Human Development or instructor’s permission. Three hours.

267 Advanced Seminar in Sexual Identities Intensive study of lesbian, gay, bisexual, and/or transgender identities, families, and communities in diverse individual, social, political, and cultural contexts. Prerequisites: Junior standing, nine hours in Human Development or instructor’s permission. Three hours.

268 Seminar in Close Relationships Causal conditions influencing formation, maintenance, and dissolution of intimate adult relationships. Draws on theory and students’ personal experiences to explicate the nature of close relationships in contemporary American society. Prerequisites: Junior standing, nine hours in Human Development or instructor’s permission. Three hours. Offered in alternate years.

291 Special Problems Reading, discussion, and special field and/or laboratory investigations. Prerequisite: Departmental permission. Students may enroll more than once up to 12 hours. One to six hours.

295 Special Topics Lectures, laboratories, readings, or projects relating to contemporary areas of study. Enrollment may be more than once, accumulation up to 12 hours. Prerequisite: Departmental permission.

296 Field Experience Professionally-oriented field experience under joint supervision by faculty and community representative, credit arranged up to 15 hours. Prerequisite: Departmental permission.

Individually Designed Majors (IDM)

COLLEGE OF ARTS AND SCIENCES

264, 265 Honors/Individually Designed Majors Contact program for specific requirements. Three hours each.

Integrated Humanities (HUMN)

COLLEGE OF ARTS AND SCIENCES

Professors Dickerson, Hutton, Martin, Rodgers, Simone, Sugarman (Director).
195 Intermediate Special Topics  Intermediate courses or seminars on topics beyond the scope of existing offerings. See Schedule of Courses for specific titles.

Also see course descriptions for English 27, 28, History 13, 14, and Religion 27, 28.

**Italian (ITAL)**

COLLEGE OF ARTS AND SCIENCES
Associate Professor Mazzioli; Assistant Professor Borra; Lecturer Jamieson.

The sequence for the beginning levels of Italian is 1-2-51-52. Students should enter the sequence at the course level most suitable to their previous training and degree of proficiency. In order to determine that, they should take the placement exam and consult with departmental advisors regarding the course level most appropriate for them. For placement in language courses at the level of 100 or above, first-year students should consult with the Department of Romance Languages. Students may not take a language course lower than the level most recently attained, except with permission of the Department. This stricture does not apply to literature or civilization courses.

The first two semesters of a foreign language are excluded from the 45-hour limit on courses from a single department that can be counted toward the 122 hours for the Bachelor of Arts degree.

Native speakers of Italian may not take courses numbered in the sequence 1 to 52 in Italian without departmental permission.

**ITALIAN LANGUAGE**

1 Elementary I  Fundamentals of Italian composition, comprehension, pronunciation, speaking, reading, writing. Structure of the basic Italian sentence. No prior knowledge expected. Four hours.

2 Elementary II  Continuation of 1. Prerequisite: 1 or equivalent. Four hours.

51 Intermediate Reading and Conversation I  Designed to help students move from a basic knowledge of Italian to the ability to read, speak, and understand Italian better. Some grammar review and short compositions. Prerequisite: 2 or equivalent. Three hours.

52 Intermediate Reading and Conversation II  Continues building on the skills developed in 51. Less stress on grammar review. Reading selections and compositions are longer and more sophisticated than in 51. Prerequisite: 51 or equivalent. Three hours.

95, 96 Introductory Special Topics  See Schedule of Courses for specific titles. Three hours.

**ITALIAN LITERATURE AND CIVILIZATION**

While literature and civilization courses are divided chronologically, it is not essential that students adhere strictly to this order. In general, a 100-level literature course or its equivalent is the prerequisite for all more advanced literature courses: exceptions can be made with the approval of the department.

Unless otherwise stated, all courses above the intermediate level will be conducted in the foreign language in question. Questions about the precise content of any course should be referred to the instructor listed for the course or to the department chairperson.

121 Issues in Italian Culture  An introduction to the cultural realities of Italy, from politics to pop music, food to fashion. Emphasis on improving linguistic fluency. Prerequisites: 52 or equivalent. Three hours.

122 Italian Literature and Film  A study of the multiple relationships between literary and cinematic texts and their role as a window on Italian culture. Emphasis on improving linguistic fluency. Prerequisites: 52 or equivalent. Three hours.

157 Modern Italian Fictions  An introduction to Italian literature from the 18th century to today, with attention to art, music, cinema, and the Internet. Emphasis on improving linguistic fluency. Prerequisites: 52 or equivalent. Three hours.

158 Early Italian Literature in Context  An introduction to Italian literature from its beginnings through the early-modern period. Authors may include Dante, Boccaccio, Machiavelli. Emphasis on improving linguistic fluency. Prerequisites: 52 or equivalent. Three hours.

195, 196 Intermediate Special Topics  See Schedule of Courses for specific titles. Three hours each.

197, 198 Readings and Research  Permission of department chair required. One to three hours.

**Japanese (JAPN)**

COLLEGE OF ARTS AND SCIENCES
Assistant Professor Hayashi; Lecturer Corson.

1, 2 Elementary Japanese  An introduction to spoken and written Japanese through aural-oral drills and grammar presentation. The three writing systems of Japanese (hiragana, katakana, and kanji) are introduced. Prerequisite: No prior knowledge for 1; 1 or equivalent for 2. Four hours each.

51, 52 Intermediate Japanese  A continuation of 2 designed to enable the student to converse in everyday Japanese and to read and write simple texts. Prerequisites: 2 or equivalent for 51; 51 or equivalent for 52. Four hours each.

95, 96 Introductory Special Topics  See Schedule of Courses for specific titles. Variable hours.

101, 102 Advanced Japanese  Further development of oral proficiency and advanced study of grammatical structure of modern Japanese, supplemented by audiovisual materials and authentic written texts of several kinds. Prerequisites: 52 or equivalent for 101; 101 or equivalent for 102. Three hours each.

121 Japanese Conversation I  Development of speaking and listening skills related to concrete topics through total immersion in Japanese. Prerequisites: 52 or equivalent. One to three hours.

122 Japanese Conversation II  Development of functional skills to carry out daily conversation in varied social contexts. Prerequisites: 52 or equivalent. One to three hours.

195, 196 Intermediate Special Topics  See Schedule of Courses for special titles. Prerequisite: 52 or equivalent. Variable hours.

197, 198 Readings and Research  Independent study of a specific area, subject, or theme with an approved instructor. Variable hours.

201, 202 Studies of Japanese Texts  Directed reading of authentic texts and guided practice of conversational skills in multiple social contexts. Courses can be repeated with different content. Prerequisites: 102 or equivalent. Three hours.
Variable hours.

297, 298  Advanced Readings and Research  Advanced independent study of a specific area, subject, or theme with details. Variable credit hours.

295, 296  Advanced Special Topics  Contact department for details. Variable hours.

221  Japanese for Communication I  Training in skills to communicate on concrete and abstract topics. Repeatable with different content. Prerequisites: 102 or equivalent. Variable credit hours.

222  Japanese for Communication II  Development of skills to present information and view points in varied social contexts. Repeatable with different content. Prerequisites: 102 or equivalent. Variable credit hours.

Latinate American Studies

The following courses are among the course offerings; see department for specific course description. Also see Area and International Studies for special topics listings.

Anthropology 161; Area and International Studies 195, 196, 197, 198; Geography 56; History 62, 63, 161, 163, 164, 262; Political Science 174; Spanish 279, 281, 286, 287, 293, 294.

Mathematics (MATH)

The Mathematics and Statistics Department provides instruction for students throughout the University. The following lists of courses, grouped according to their prerequisites, are provided for the information of students seeking a first course in mathematics. Consultation is available at the Department office.

Minimal background one year of high school algebra:

Math. 1, Elementary College Algebra (evenings and summers only)

Two years of high school algebra and one year of geometry:

Math. 2, Plane Trigonometry

Math. 9, College Algebra

Math. 10, Precalculus Mathematics

Math. 13, Calculus via Modeling I

Math. 17, Applied Finite Mathematics

Math. 19, Fundamentals of Calculus I

Four years or more of college preparatory mathematics in high school:

Math. 13, Calculus via Modeling I

Math. 17, Applied Finite Mathematics

Math. 19, Fundamentals of Calculus I

Math. 21, Analytic Geometry and Calculus I

Students entering with Advanced Placement in Calculus may take Math. 20, 22, or 121 as their first mathematics course at UVM.

1  Elementary College Algebra  Review of fundamental operations and a more extensive study of fractions, exponents, radicals, linear and quadratic equations, ratio, proportion, variation, progressions, and the binomial theorem. Topics normally included in intermediate algebra in high school. Students who have satisfactorily completed two years of high school algebra, or the equivalent, receive no credit for this course. Offered only in Evening Division and Summer Session. Prerequisite: One year of high school algebra. Three hours.

2  Plane Trigonometry  Trigonometric functions, their graphs and other properties, solution of triangles, trigonometric equations and identities, and inverse trigonometric functions. May not be taken for credit concurrently with, or following receipt of, credit for any mathematics course numbered 19 or above. Prerequisite: One or 9. Three hours. Offered only in Evening Division and Summer Session.

9  College Algebra  Sets, relations, and functions with particular attention to properties of algebraic, exponential, and logarithmic functions, their graphs and applications. May not be taken for credit concurrently with, or following receipt of, credit for any mathematics course numbered 19 or above. Prerequisites: Two years of secondary school algebra, one year of secondary school geometry. Three hours.

10  Precalculus Mathematics  Skills in working with numerical, algebraic, and trigonometric expressions are developed in preparation for 21. May not be taken for credit concurrently with, or following receipt of, credit for any mathematics course numbered 19 or above. Prerequisites: Two years of secondary school algebra, one of secondary school geometry. Three hours.

11  Technical Calculus 1  Introduction to calculus of functions of one variable, emphasizing techniques and applications of differentiation and integration. Prerequisites: 10, 9 and 2, or strong background in secondary school algebra and trigonometry and an associate degree in engineering. Dual credit not given for 11 and 21. Three hours.

12  Technical Calculus II  Transcendental functions, techniques of integration, polar coordinates, sequences, series and vectors. Prerequisites: 11 or 21; associates degree in engineering. Dual credit not given for 12 and 22. Three hours.

13  Calculus Via Modeling I  Introduction to mathematical modeling and differential calculus with a graphical, problem-solving approach. Requires graphing calculator. Prerequisite: Three years high school math, or Math. 9. Credit not given for both Math. 13 and 19. Three hours.

14  Calculus Via Modeling II  Further modeling and an introduction to integral and multivariate calculus with a graphical, problem-solving approach. Requires graphing calculator. Credit not given for both 14 and 20. Prerequisite: 13. Three hours.

15, 16  Fundamental Concepts of Elementary School Mathematics  Comprehension of operations with real numbers, measurements, and informal geometry provide background for algebra, number theory, statistics, probability, compass and ruler constructions, and problem solving. Prerequisite: 15 for 16. Open only to students in elementary education. Three hours.

17  Applications of Finite Mathematics  Introduction to mathematics of finite systems with applications, such as probability, statistics, growth and symmetry, graph theory, fair division and apportionment problems, voting systems. Prerequisite: Two years of secondary school algebra or 9 or 10. Three hours.

18  Basic Mathematics  Data, statistics, modeling, algebra, word problems, calculus. Students who do well in the algebra section may continue with MATH 19 or MATH 21. Prerequisites: 3 years high school math. No credit for EM students. Three hours.
19 **Fundamentals of Calculus I** Introduction to limits and differential calculus with a wide variety of applications. Students interested in intensive use of mathematics should take 21. Credit not given for more than one of the courses 19, 21 unless followed by 22. Credit not given for both Math. 13 and 19. Prerequisite: 9, 10, or sufficiently strong background in secondary school algebra and geometry. Three hours.

20** Fundamentals of Calculus II** Introduction to integral calculus with a wide variety of applications. A student who completes 20 may be admitted to 22; however 19, 21, 22 is preferable to 19, 20, 22. Credit not given for both MATH 14 and 20. Prerequisite: 19.* Three hours.

21** Calculus I** Introduction to calculus of functions of one variable including: limits, continuity, techniques, and applications of differentiation and integration. Credit not given for more than one course in the pair 19, 21. Prerequisite: 10; or 9 and 2; or strong background in secondary school algebra and trigonometry. Four hours.

22 Calculus II† Techniques and applications of integration. Polar coordinates, Taylor polynomials, sequences and series, power series. Prerequisite: 21. Four hours.

52 **Fundamentals of Mathematics** Fundamental mathematical concepts and techniques, emphasizing proofs and algorithms, are investigated within the context of topics such as number theory and graph theory. Credit not given for both 52 and 54. Prerequisite: None. Corequisite: Math. 21. Three hours.

54 **Fundamentals of Mathematics of Computation** Introduction to mathematical theory and techniques underlying computer science. Corequisite: 19 or 21. Three hours.

95 **Introductory Special Topics** Introductory courses or seminars on topics beyond the scope of existing departmental offerings. See Schedule of Courses for specific titles. Prerequisite: Instructor's consent. Hours variable.

111 **Technical Calculus III** Calculus of functions of several variables, partial derivatives, gradient, divergence, curl, multiple integrals. Prerequisites: 12 or 22; associates degree in engineering. Dual credit not given for 111 and 121. Three hours.

121 **Calculus III** Vectors, vector-valued functions. Calculus of functions of several variables: partial derivatives, gradient, divergence, curl, multiple integrals. Prerequisites: 12 or 22; associates degree in engineering. Dual credit not given for 111 and 121. Three hours.

124 **Linear Algebra** Matrices, linear dependence, vector spaces, linear transformations, characteristic equations and applications. Prerequisite: 22 or instructor's permission. Corequisite: Math. 121 recommended but not required. Three hours.

141 **Real Analysis in One Variable** Principles of analysis in one variable. Heine-Borel and Bolzano-Weierstrass theorems; rigorous development of differential and integral calculus: infinite sequences and series of functions. Prerequisite: 52. Three hours.

151 **Groups and Rings** An introduction to the basic concepts of abstract algebra emphasizing examples, including modular arithmetic, symmetric groups, cyclic groups, polynomial rings, homomorphisms, and isomorphisms. Prerequisite: 52. Three hours.

161 **The Development of Mathematics** Historical development of mathematical sciences emphasizing interrelations among them. Individual assignments correspond to background and interests of students. Prerequisite: Nine hours of college mathematics. Three hours.

162 **Geometry for Elementary and Middle School Teachers** An informal, investigative approach to geometry. Extensive use of discovery experiences through inductive procedures as opposed to the traditional emphasis on deductive process found in high school geometry. Credit not given for Math. majors in EM. Prerequisite: 15 or a teaching certificate. Three hours.

167 **Physical Chemistry Preparation** Review of relevant mathematical and physical concepts as applied to physical chemistry. Credit cannot be obtained for both MATH 167 and MATH 121. Not available for credit for E&M students. Prerequisites: 22; CHEM 32 or 36. (Cross-listing: Chem. 167.) One hour.

173 **Basic Combinatorial Theory** Introduction to basic combinatorial principles emphasizing problem-solving techniques. Enumeration, Generating Functions, Fibonacci Numbers, Pigeonhole Principle, Inclusion-Exclusion, and Graph Theory. Prerequisite: 52 or 54. Three hours.

179 **Teaching Secondary School Mathematics** Contemporary secondary school mathematics curricula, their content from an advanced standpoint, unifying mathematical concepts and their implications at various levels, and introduction of selected mathematical topics. Intended only for students with an interest in teaching secondary school mathematics. Not acceptable as part of any mathematics requirement for a degree. Prerequisites: Education 178, acceptance to teacher education, or instructor's permission. Three hours.

191, 192 **Special Topics** An approved project under guidance of a staff member and culminating in a written report. Involvement with off-campus groups permitted. Prerequisites: Junior or senior standing, approval of department chairperson. One to three hours as arranged.

193, 194 **College Honors**

195 **Special Topics**

207 **Probability Theory** (Same as Statistics 251.)

222 **Stochastic Models in Operations Research** Development and solution of some typical stochastic models. Markov chains, queuing problems, inventory models, and dynamic programming under uncertainty. Prerequisite: 207 or Statistics 151, or instructor's permission. Three hours.

224 **Analysis of Algorithms** (Same as Computer Science 224.)

230 **Ordinary Differential Equations** Solutions of linear ordinary differential equations, the Laplace transformation, and series solutions of differential equations. Prerequisite: 121. Corequisite: 124 or instructor's permission. Credit not granted for more than one of the courses Math. 230 or 271. Three hours.

236 **Calculus of Variations** Necessary conditions of Euler, Legendre, Weierstrass, and Jacobi for minimizing integrals. Sufficiency proofs. Variation and eigenvalue problems, Hamilton-Jacobi equations. Prerequisite: 230. Three hours. Alternate years, 1997–98.

237 **Introduction to Numerical Analysis** Error analysis, root-finding, interpolation, least squares, quadrature, linear equations, numerical solution of ordinary differential equations. Prerequisites: 121; 124 or 271; knowledge of computer programming. Three hours.

238 **Numerical Differential Equations** Numerical solution of differential equations: initial-value and boundary-value problems; finite difference and finite element
methods. Prerequisite: 237, either 230 or 271 recommended. Three hours.

240 Fourier Series and Integral Transforms Fourier series, orthogonal functions, integral transforms and boundary value problems. Prerequisite: 230 or 271. Three hours.

241 Analysis in Several Real Variables I Properties of the real numbers, metric spaces, infinite sequences and series, continuity. Prerequisites: 52, 121, 124 or instructor’s permission. Three hours.

242 Analysis in Several Real Variables II Differentiation in $\mathbb{R}^n$. Riemann-Stieltjes integral, uniform convergence of functions, Inverse and Implicit Function Theorems. Prerequisite: 241. Three hours.

243 Theory of Computation (Same as Computer Science 243.)

251 Abstract Algebra I Basic theory of groups, rings, fields, homomorphisms, and isomorphisms. Prerequisites: 52, 124 or instructor’s permission. Three hours.

252 Abstract Algebra II Modules, vector spaces, linear transformations, rational and Jordan canonical forms. Finite fields, field extensions, and Galois theory leading to the insolvability of quintic equations. Prerequisite: 251. Three hours.

255 Elementary Number Theory Divisibility, prime numbers, Diophantine equations, congruence of numbers, and methods of solving congruences. Prerequisite: 52 or 54. Three hours.

257 Topics in Group Theory Topics may include abstract group theory, representation theory, classical groups, Lie groups. Prerequisite: 251. Three hours. Alternate years.

260 Foundations of Geometry Geometry as an axiomatic science. Various non-Euclidean geometries; relationships existing between Euclidean plane geometry and other geometries; invariant properties. Prerequisite: 52 or 54. Three hours.

264 Vector Analysis Gradient, curl and divergence, Green, Gauss, and Stokes Theorems, applications to physics, tensor analysis. Prerequisite: 121, 124 or 271. Three hours.

266 Chaos, Fractals, and Dynamic Systems Discrete and continuous dynamical systems, Julia sets, the Mandelbrot set, period doubling, renormalization, Henon map, phase plane analysis and Lorenz equations. Corequisite: 271 or 230 or instructor’s permission. Three hours.

268 Mathematical Biology and Ecology Mathematical modeling in the life sciences. Topics include population modeling, dynamics of infectious diseases, reaction kinetics, wave phenomena in biology, and biological pattern formation. Prerequisites: 124, 230; or instructor’s permission. Three hours.

271 Applied Mathematics for Engineers and Scientists Matrix theory, linear ordinary differential equations. Emphasis on methods of solution, including numerical methods. Corequisite: 121. Three hours. No credit for mathematics majors. Credit not granted for more than one of the courses Math 230 and Math 271.

273 Combinatorial Graph Theory Paths and trees, connectivity, Eulerian and Hamiltonian cycles, matchings, edge and vertex colorings, planar graphs, Euler’s formula and the Four Color Theorem, networks. Prerequisite: 52 or 54 or instructor’s permission. Three hours.

274 Numerical Linear Algebra Direct and iterative methods for solving linear equations, least square factorization methods, eigenvalue computations, ill-conditioning and stability. Prerequisite: 237. Three hours.

275, 276 Advanced Engineering Analysis I, II (Same as Mechanical Engineering 304, 305; Civil Engineering 304, 305.) Prerequisites: 271 or 230; 275 for 276.

283 Junior-Senior Seminar Students required to give presentations on selected topics. Prerequisite: Instructor’s permission. One hour.

293, 294 Undergraduate Honors Thesis Program of reading and research culminating in written thesis and oral presentation. Honors notation appears on transcript and Commencement Program. Contact department chairperson for procedures. Six to eight hours. (Not offered for graduate credit.)

295 Special Topics For advanced students in the indicated fields. Lectures, reports, and directed readings on advanced topics. Prerequisite: Instructor’s permission. Credit as arranged. Offered as occasion warrants.

HONORS – ARTS AND SCIENCES

288, 289 Honors/Mathematics Contact Department for specific requirements. Three hours each.

Mechanical Engineering (ME)

COLLEGE OF ENGINEERING AND MATHEMATICS

Professors Huston, Keller (Interim Chairperson), von Turkovich; Associate Professor Campo; Assistant Professors Hitt, Intrada; Adjunct Professor Jajakse; Adjunct Assistant Professor Golnazarian; Lecturer Rossi; Adjunct Instructors Josefaizk, Manoow; Visiting Assistant Professor Davila.

12 Dynamics (3-0) Kinematics and kinetics of particles and rigid bodies in two and three dimensions. Computer-aided analysis. Prerequisites: Civil Engineering 1, Math. 121. Three hours.

14 Mechanics of Solids (3-0) (Same as Civil Engineering 100.) Stress, strain, temperature relationships, torsion, bending stresses and deflections. Columns, joints, thin-walled cylinders. Combined stresses and Mohr’s circle. Prerequisites: Civil Engineering 1, Math. 121, ME 12 or concurrent enrollment. Three hours.

40 Thermodynamics (3-0) Principles of engineering thermodynamics; applications of these principles to thermodynamic cycles. Credit not allowed for both 40 and 41. Prerequisite: Math 22, Physics 31 with 21. Three hours.

42 Engineering Thermodynamics (3-0) Properties and processes of fluids; perfect gases, and approximate relationships for real gases; applications of thermodynamics, principles of combustion, mixtures, power cycles, gas compression, and refrigeration. Prerequisite: 40. Three hours.

82 Mechanical Engineering Laboratory I (0–3) Computational and experimental solids laboratory, parametric CADD, stress analysis, and measurement. Prerequisite: Civil Engineering 1. One hour.

95 Special Topics (1–3) One to three hours with instructor’s approval.

101 Engineering Materials (3-0) Atomic structure, crystalline structure, mechanical properties of metals; testing of materials, multicomponent systems, phase equilibrium, processing metals, polymers, composite materials, ceramics and glass corrosion. Prerequisite: 14. Three hours.

114 Introduction to Engineering Mechanics (3-0) Introduction to statics, dynamics, fluid mechanics, strength of materials, thermodynamics. Prerequisite: Junior standing in engineering or physical sciences. Three hours.

123, 124 Mechanical Engineering Laboratory II, III (0-3), (0-3) Engineering measurements, data analysis and theory of experimentation. Experiments with fluids and material testing machines and instrumentation for dynamic measurements. Conquisite: 143. Two hours.

143 Fluid Mechanics (3-0) Fluid pressure distributions; integral control volume systems; differential relations for a fluid particle; dimensional similarity; viscous flow in ducts; boundary layer flows; inviscid incompressible flows. Prerequisites: 12, 42. Three hours.

144 Heat Transfer One- and two-dimensional steady and unsteady thermal conduction; natural and forced internal and external convection; thermal radiation; heat exchangers; boiling and condensation heat transfer. Prerequisite: 143. Three hours.

150 The Engineering Profession (3-0) Professional practice of engineering. Laws, ethics, engineering economy, liability, insurance, and contracts. Prerequisite: Senior standing or instructor’s permission. Three hours.

161 Manufacturing Engineering I (3-0) Mechanical and thermal processing of metallic and nonmetallic materials; casting, forming, cutting, grinding, joining, high energy forming, EDM, ECM, Laser, and ultrasonic. Prerequisite: Senior ME standing. Three hours.

162 Manufacturing Engineering II (3-0) Machine tools engineering, flexible manufacturing systems, robotics in manufacturing, automatic factory, computer-aided manufacturing. Three hours.

170 Mechanical Design (4-0) Advanced mechanics of materials, stress strain, bending and torsion of slender members, energy methods, finite element modeling, and CAD topics including parametric and solid modeling. Prerequisite: 101. Four hours.

171 Design of Elements (3-0) Mechanical fatigue criteria, fatigue analysis and design of springs, bolted/welded joints, gearing, shafts, bearings, power transmission. Computer-aided design and analysis. Prerequisites: Junior standing. 14. Three hours.

172 Design of Systems (3-0) Design synthesis and optimization; probabilistic aspects in design; expert systems in design. Prerequisite: 171. Three hours.

174 Industrial Design Project (0-1) Design projects from industry. Prerequisite: 171. One hour.

183 Mechanical Engineering Laboratory IV (2, 1) Advanced engineering experimentation, data collection and reduction techniques applied to areas of mechanical engineering; projects involving “design for manufacturing” of a specified product. Prerequisites: Senior standing in Mechanical Engineering. Three hours.

185, 186 Senior Project (0-6), (0-3) An individual engineering study designed to particular interest of the student, utilizing and synthesizing the student’s total mechanical engineering educational experience. Prerequisite: Senior standing. Fall: one hour. Spring: two hours.

191 Thesis (0-9) Investigation of a research or design project under supervision of assigned staff member culminating in acceptable thesis. Prerequisite: Senior standing, departmental permission. Three hours.

193, 194 College Honors

195 Special Topics Prerequisite: Senior standing in Civil or Mechanical Engineering. One to three hours with instructor approval.

203 Machinery Analysis and Synthesis (3-0) Kinematic and kinetic analysis of two- and three-dimensional machines; kinematic synthesis, electromechanical and servo mechanisms; application to robotic mechanisms. Prerequisite: Senior standing in ME. Three hours.

207 Biomechanics I Introduction to the structure and mechanics of the musculoskeletal system. Application of mechanics to bone, tendon, ligaments, and other biological materials. Prerequisite: Senior or graduate standing in ME, or instructor permission. Three hours.

208 Biomechanics II Introduction to biomaterials and the mechanical behavior of bioviscoelastic fluids or solids. Prerequisite: 207 or instructor permission. Three hours.

209 Biofluid Dynamics (3-0) Fluid dynamics of human physiology. Circulatory and respiratory mechanics, steady and unsteady laminar flow, pulse wave reflections, curved and collapsible tube flow, turbulence. Prerequisite: 143 or equivalent. Three hours.

234 Mechanical Vibrations Analysis, measurement, and control of mechanical vibrations; SDOF, MDOF, and rotating systems, forced, free, and random vibrations. Prerequisites: 111, or senior or graduate standing in engineering or physical sciences. Three hours.

235 Turbomachinery Vibration Analysis and Testing Vibration in rotating machines; vibration measurement techniques; machinery condition and degradation; condition monitoring and predictive maintenance; industrial vibration techniques including proximity probes, accelerometers, FFT analyzer. Prerequisite: 241. Two hours.

241 Combustion Processes (3-0) Combustion thermodynamics; chemical kinetics; laminar flames, premixed and diffusion; turbulent flames; ignition, explosion, and detonation; droplet combustion; flame spread; large scale fires; rocket combustion. Prerequisite: Senior or graduate standing. Three hours.

242 Advanced Engineering Thermodynamics I (3-0) Foundations of statistical mechanics. Gases and crystals. Chemical equilibrium. Irreversible processes. Prerequisites: Senior or graduate standing or permission. Three hours.

244 Introduction to Turbomachinery Analysis Fundamental turbomachinery principles of fluid mechanics, thermodynamics, and structural analysis; basic equations and computational techniques for analysis and design to model and evaluate turbomachinery. Prerequisite: 243, Math. 271. Two hours.

245 Advanced Heat Transfer I (3-0) Transient heat conduction; integral methods; convection; formulation and solution; boiling, condensation; radiant heat exchange in enclosures and with emitting-absorbing gases, advanced view factors. Prerequisite: Senior standing in ME or instructor’s permission. Three hours.

246 Centrifugal Compressors Fluid dynamic and thermodynamic principles of centrifugal compressor design and design practice; limits of stable operation and instability prediction and control. Prerequisite: 244. Two hours.

247 Centrifugal Pumps Centrifugal pump design principles and practice; performance limits; cavitation; design tools and pump design optimization. Prerequisite: 244. Two hours.

248 Turbomachinery Special Topics Content in axial fans/compressors; axial, radial, or steam turbines; CFD,
dynamics/rotordynamics, or materials for turbo-machinery; power plant or refrigeration cycle developments; turbocharged and compound IC-engines. Prerequisite: 244. One or two hours.

249 Computational Fluids Engineering Computational methods for solving the Navier-Stokes equations and combined thermo-fluid flows; finite-differences and finite-volume techniques; use of standard commercial CFD software. Prerequisites: 143 or equivalent. Three hours. Undergraduate/graduate credit.

252 Mechanical Behavior of Materials (3-0) Elastic and plastic behavior of single crystals; dislocations; approximate plastic analysis; anisotropic materials; hardness; fractures; fatigue; damping; creep and surface phenomena. Prerequisite: 101, permission. Three hours. Credit given for 252 or 272, not both.

255 Advanced Engineering Materials (3-0) Phase diagrams. Thermodynamics of crystals, alloys. Defects. Phase transformations. Heat treatment of steels. Prerequisites: Senior or graduate standing, or instructor’s permission. Three hours.

257 Composite Materials Fibers, matrices. Unidirectional and short fiber composites. Experimental characterization. Prerequisite: 101. Three hours. Credit given for 257 or 277, not both.

265 Integrated Product Development (See Business Administration 293.) Prerequisite: Senior standing. Three hours.

272 Structural Dynamics Crosslisting: CE 272.

281, 282 Seminar (1-0) Presentation and discussion of advanced mechanical engineering problems and current developments. Prerequisite: Senior or graduate engineering enrollment. One hour.

283 Laboratory Techniques for Turbomachinery Development Instruments and transducers for performance, flow, and structural measurements in turbo-machinery; the role of test data in design and development; experimental data acquisition and processing. Prerequisite: 244. Two hours.

295 Special Topics Content is dictated by expanding professional interest in newly developing, or recently developed, technical areas in which there is particular need or opportunity. Prerequisite: Senior or graduate standing. One to three hours with instructor approval.

Medical Laboratory Science

See Biomedical Technologies.

Microbiology and Molecular Genetics (MMG)

COLLEGE OF AGRICULTURE AND LIFE SCIENCES AND COLLEGE OF MEDICINE

Professors Albertini, Bramley, Burke, Fives-Taylor, Heints, Johnson, Novotny, Scharffen, Wallace (Chairperson); Associate Professors Finette, Franchlyn, Gelman, Merriell, Pederson, Torney, Ward; Assistant Professors Doublé, Evans, Stein, Thal, C. Wesley; Research Associate Professors Bateham, Napper; Research Assistant Professors Bond, Hohman, Mintz, U. Wesley, Leiters Silverstein, Tessmann.

65 Microbiology and Pathogenesis Overview of microbiology, emphasizing the relationships between the structure, metabolism, and genetics of microorganisms and their roles in nature and in pathogenesis. Prerequisite: One semester chemistry. Not intended for students who have completed Biology 1 and 2 or equivalent. Four hours. Fall.

101 Biology of Microorganisms An introduction to the biology of microorganisms, encompassing their diversity, metabolism, pathogenesis, and ecology. Prerequisites: One semester of chemistry and biology, or equivalent, or instructor’s permission. Four hours. Fall.

102 Molecular Genetics Modern molecular genetics. Topics include: mechanisms of gene expression in prokaryotes and eukaryotes; retroviruses; cancer biology; human genetic diseases. Emphasis on experimental and conceptual aspects. Prerequisite: 101, Botany 132, or instructor’s permission. Four hours. Spring.

195, 196 Special Topics Prerequisite: Instructor’s permission. Credits negotiable.

197, 198 Undergraduate Research Undergraduate honors students accommodated in individual research projects sponsored by department member. Arrangement with individual department member and department chairperson approval. Credits negotiable.

201 Molecular Cloning Lab Intensive advanced laboratory course in the fundamentals of recombinant DNA technology through the isolation and characterization of a unique gene. Prerequisite: 102 or equivalent. Three hours. Fall.

203 Mammalian Cell Culture in Molecular Biology The basic principles and techniques of mammalian cell culture, as well as cell and mammalian molecular genetics. Prerequisite: Permission of coordinator. Four hours. Alternate years, spring 2003.

205 Chemistry of Biomolecules Crosslisting: BIOC 205; CHEM 205.

211 Prokaryotic Molecular Genetics The organization, replication, and expression of genes in prokaryotes, focusing on the genetics of Escherichia coli and its viruses. Prerequisite: Introductory microbiology, biochemistry, genetics, and/or cell biology courses. Three hours. Fall.

220 Environmental Microbiology The activities of microorganisms, primarily bacteria, in air, soil, and water. Prerequisite: A previous course in microbiology. Three hours. Alternate years, spring 2003.

222 Clinical Microbiology Comprehensive study of human pathogenic microorganisms and their disease states in humans, which includes pathogenic bacteriology, medical mycology, and virology. Laboratory sessions provide practical experience in handling and identifying these pathogens. Prerequisite: 65 or 101 or equivalent. Four hours. Spring.

223 Immunology Analysis of the immune response with respect to structure and function of immunoglobulins and the T-cell receptor, tolerance, innate and adaptive immunity, the Major Histocompatibility Complex, hypersensitivity states, transplantation, cancer, and AIDS. Prerequisite: Instructor’s permission. Three hours. Alternate years, fall 2001.

225 Eukaryotic Virology An in-depth analysis of eukaryotic virus-mammalian cell interactions emphasizing mechanisms by which viruses modulate gene expression in infected cells. Prerequisite: 101 or 102 or equivalent. Three hours. Alternate years.

231 Bioinformatics Introduction to current topics in bioinformatics. Applications may include sequence alignment, dynamic programming, hidden Markov models, phylogenetics trees, microarray data analysis, genomics, and proteomics. Prerequisites: Instructor’s permission; STAT 151,
240 Introduction to Macromolecular Structure of Proteins and Nucleic Acid  Introduction to structural biology and macromolecular structure with an emphasis on protein-protein and protein-nucleic acids interactions. Prerequisites: Biology 1, 2; Organic Chemistry; Junior standing recommended; concentration in Physics. Three hours. (Cross-listed with BIOC 240.) Alternate years. Not approved for graduate credit.

295, 296 Special Topics  Supervised investigations in microbiology or molecular genetics. Prerequisite: Instructor’s permission. Credit as arranged.

Middle East Studies

COLLEGE OF ARTS AND SCIENCES

Professor Gause, Director.

See Area and International Studies for special topics course listings.

Military Studies (MSTD)

Professor: LTC Targus (Chairperson)

Note: Total allowable credit for Military Studies varies with college/school.

Military Studies courses are open to all students, regardless of major or intention to complete the full cadet program. A two-hour weekly leadership laboratory is required for all students enrolled in any MS course. Students interested in pursuing an officer’s commission through ROTC should contact the Department of Military Studies.

The Basic Course  Open to all first-year and sophomore students, the course introduces interested students to the Army, the role of an Army officer, and basic military skills. Other than for Army ROTC scholarship students, the Basic Course incurs no military obligation. Students survey Army opportunities and decide whether to continue on to the Advanced Course and an Army commission as a second lieutenant.

11 Introduction to ROTC and the U.S. Army  Discussion of the customs, traditions, branches, organization, as well as the many changes in the roles and missions of the Army of the 21st century. One hour. Fall.

12 Introduction to Military Skills and Followship  Development of basic skills of an Army officer, including navigation and communications. Students are exposed to leadership development exercises during leadership laboratories. One hour. Spring.

21 Leadership and Team Development  Learning and application of ethics-based leadership skills that develop individual abilities and contribute to effective team building. Development of oral presentations, writing, and coordination of group efforts. Two hours. Fall.

22 Individual and Team Leading  Techniques for training/counseling others as an aspect of continued leadership development. Includes safety and risk management assessments, and planning for individual and team safety. Two hours. Spring.

11L, 12L, 21L, 22L Basic Course Leadership Laboratories  Students develop, practice, and refine leadership skills and responsibilities by serving and being evaluated in a variety of responsible positions within a cadet battalion structure during a monthly two-hour and four-hour lab. Open to all students in the associated Military Studies courses. No credit. Fall/spring.

23 Basic Camp “Camp Challenge”  Five weeks at an Army post after the sophomore year. Students receive pay, travel, lodging, and meal costs. Similar to Army Basic Training. No military obligation is incurred. Open only to students without ROTC Basic Course credits. Qualifies a student for entry in the Advanced Course. Pass/Fail only. Summer.

The Advanced Course  Open to qualified junior and senior students who have either successfully completed the Army ROTC basic course, the Army ROTC Basic Camp, or Army Basic Training and Advanced Individual Training. The course is designed to prepare students for a career as an Army officer. Students are required to successfully complete a 35-day Army ROTC Advanced Camp the summer following the junior year. Upon completion of the Advanced Course and the requirements for the bachelor’s degree, graduates are commissioned as Second lieutenants in the U.S. Army, Army Reserves, or Army National Guard.

131 Leading and Training Small Organizations  Series of opportunities to lead small groups, receive personal assessments, and lead in complex situations. Plan and conduct training to develop leadership skills. Prerequisite: Completion of basic course program or basic camp. Three hours. Fall.

132 Leading and Managing Small Organizations  Plan for and adapt to the unexpected in organizations under stress. Examine importance of ethical decisions in a positive climate that enhances team performance. Prerequisite: 131. Three hours. Spring.

133 ROTC Advanced Camp  A five-week camp conducted at an Army post. Students receive pay, travel, lodging, and meal costs. Highly structured and demanding, stressing leadership with performance evaluations. Prerequisite: Open only to (and required of) contracted students who have completed MS 131 and 132. Evaluations at camp weigh heavily in the subsequent selection process to determine type of commission and job opportunities upon graduation. No credit. Pass/Fail only. Summer.

134 ROTC Nurse Summer Training Program  A five-week leadership experience with a 120-hour clinic at an Army hospital in U.S. or overseas. Experience enhances performance in nursing curriculum and ROTC. Prerequisite: Open only to nursing students with at least one clinical nursing course and completion of MS 133. Pass/Fail grading used in determining commission and job opportunities upon graduation. No credit. Summer.

241 Leadership Challenges and Goal Setting  Plan, conduct, and evaluate activities. Assess organizational cohesion and develop strategies for improvement. Develop confidence in skills to lead people and manage resources. Prerequisite: 132. Three hours. Fall.

242 Leading Organizations Ethically and Competently  Identify and resolve ethical dilemmas. Refine counseling and motivating techniques. Examine aspects of tradition and law related to leading as an officer in the Army. Prerequisite: 241. Three hours. Spring.

131L, 132L, 241L, 242L Advanced Course Leadership Laboratories  Develop, practice, and refine leadership skills in a variety of positions. Involves responsibilities for planning, coordination, execution, and evaluation of various training and activities. Open only to students in the associated Military Studies courses. No credit. Fall/spring.

14 Orienteering  Basic practical skills such as maps, compass, and environmental awareness. Classroom participation, written exams, and completion of an orienteering course determine student grades. Open to all first-year and sophomore students. Cross-listed as PEAC 14. One hour. Fall/spring.

17 Military Fitness  Develop individual potential to achieve physical and mental health. Vigorous workout three days a week designed to build both upper body strength and aerobic ability. Classroom participation and a final Army Physical Fitness Test determine student grades. Open to all first-year and sophomore students. Cross-listed as PEAC 17. One hour. Fall/spring.
19 Backpacking Techniques of planning and organizing a backpacking trip. Basic instruction includes clothing, equipment, and environmental awareness. Includes one overnight backcountry trek. Student grades determined by class participation and participation in the practical exercise. Open to all first-year and sophomore students. Cross-listed as PEAC 19. One hour. Fall, Spring.

Molecular Physiology and Biophysics (MPBP)

COLLEGE OF MEDICINE

Professors Alpert, Evans, Irwin, Low, Lower, Nelson, Ood, Parsons, Patil, Trybus, Warshaw (Chair); Associate Professors Bentil, Berger, Haebler, Radermacher, Vigoreaux; Assistant Professors Dostmann, Ruiz, Schneider, Segal, VanBuren; Research Professors Bates, Maughan; Research Assistant Professors Roul, Ravner, Toth.

19-20 Undergraduate Human Anatomy and Physiology Two-semester course with credit given only upon completion of both semesters. Structure and function of human body using cadaver projections, histological material, and physiological experiments. Required of Medical Technology, Nursing, Nutritional Sciences, Dental Hygiene, Radiologic Technology, and Physical Education; others with instructor’s permission. Prerequisite: 19 for 20. Four hours.

191, 192 Undergraduate Research Individual laboratory research under guidance of faculty member. Prerequisite: Departmental permission. Three or six hours.

201-202 Human Physiology & Exercise (5-3) A comprehensive, in-depth presentation of the scientific basis of human function. Primarily for Physical Therapy students; a limited number of others may be admitted with permission. Prerequisites: Chemistry 23 and 42 or equivalent, two semesters general physics, one semester mathematics, permission. Three hours.

Music (MUS)

COLLEGE OF ARTS AND SCIENCES

Professors Neurem (Chairperson), T. Read; Associate Professor W. Schneider; Assistant Professors Hopkins, Julian, G. Reynolds, Strood, Toner; Lecturer S. Parker; Affiliate Artists Bouchard, Boyer, M. Brown, Brubaker, Capps, Cleary, Geoghegan, Janson, Jordan, Klimowski, Morningstar, Ogel, Parsley, E. Read, Salisbury, Soons, Stots, Sutherland, C. Toner, Wager.

Students in all music courses are required to attend a designated portion of major ensemble concerts, faculty recitals, and formal student recitals as part of the course requirements. Music majors in all degree programs are expected to participate regularly in ensembles. A reasonable division between large and small ensembles should be observed.

THEORY AND COMPOSITION

3 Introductory Music Theory Rudiments of notation, rhythm, melody, harmony, scales, form, and terminology. Non-majors only. Three hours.*

31, 32 Basic Musicianship Study of melody and elementary harmony, melodic and rhythmic dictation, sight singing. Prerequisites: Basic piano facility or concurrent enrollment in Music 5-6, Group Piano; 31 for 32 or instructor’s permission. Three hours.

41 Basic Electronic Music Emphasis on understanding and working with digital electronic sounds through MIDI, using synthesizers, computers, sequencing software and tape recorders, including a history of electronic music. Prerequisite: Basic music literacy. Three hours.

123 Theory and Practice of Jazz Improvisation I Repertoire, idiomatic usage, aural skills, theoretical constructs, and strategies for the jazz improvisor. Prerequisites: Intermediate instrumental skill, ability to read music, previous study of traditional music theory. Three hours.

131, 132 Intermediate Theory: Music of the Tonal Era Contrapuntal and harmonic dictation; counterpoint, harmony, and form analysis. Prerequisites: 31, 32; 131 for 132, or instructor’s permission. Three hours. Concurrent enrollment in 133, 134.

231 Advanced Theory: 20th Century Music Techniques and form analysis of post-tonal contemporary music. Prerequisites: 132, 134, or instructor’s permission. Three hours.

232 Advanced Theory: Counterpoint Analysis of contrapuntal forms and techniques. Music principally of 16th–18th centuries. Prerequisites: 132, 134, or instructor’s permission. Three hours.

233 Arranging Characteristics of instruments; arranging for ensembles. Prerequisite: 132 or instructor’s permission. Three hours.

234 Orchestration Studies in orchestral scoring. Prerequisite: 233 or instructor’s permission. Three hours.

235 Fugal Composition Study of representative baroque, classical, and contemporary fugal procedures through analysis and composition. Prerequisites: 231 or instructor’s permission. Three hours.

237 Composition Creative work in free composition with instruction according to needs and capabilities of individual student. Prerequisite: 231, 235, or instructor’s permission. Three hours. May be repeated for credit.

240 Seminar in Musical Analysis Advanced study of musical forms. Comparison of standard approaches to harmonic, motivic, and rhythmic analysis. Prerequisites: 235, instructor’s permission. Three hours.

241 Senior Project in Music Theory Advanced study focusing on a theoretical topic under direction of assigned staff member. Prerequisite: Senior standing as Theory major. Three hours.

297, 298 Advanced Reading and Research Studies in comparison or related special topic under direction of assigned staff member.

HISTORY AND LITERATURE

1 Introductory Music Listening A concise view of Western music from plainsong to the present. Involves both classroom and outside listening. Non-majors only. Three hours.*

4 The Experience of Music Explores the phenomenon “music” through aural examination of its composite elements: melody, rhythm, harmony, texture, form. Musical examples drawn from Western and non-Western folk, art, and popular musical repertoires. Prerequisite: Non-majors only. Three hours.*

11, 12 Survey of Western Music Historical study of development of Western music. First semester: Earliest times through the baroque. Second semester: Classical period to the present. Involves both classroom and outside listening. Three hours.

15 World Music Cultures Survey of non-Western and non-European music primarily of the geographic areas of Australia, Indonesia, China, Japan, India, Black Africa, and Native American Indians. Three hours.*

42 Introduction to the History of Jazz Survey of New Orleans, Chicago, Swing, bebop, cool, funky, and free jazz styles through the work of important soloists and bands,
1915-1965. Three hours.*

44 Introduction to the Blues and Related Traditions Survey of performers, musical procedures, technical means, and traditional lyrics of songsters, jug bands, gospel, barrel house piano, and important blues styles to about 1955. Three hours.*

*Courses may not be used to fulfill the major or minor requirements.

111 Classical, Romantic Chronological, analytical study of representative examples of music literature from approximately 1750-1900; Mozart, Haydn, Beethoven, Schubert, Berlioz, Schumann, Chopin, Liszt, Brahms. Prerequisite: 1, 3, 11, 12 or permission, ability to read music. Three hours. Offered in alternate years.

112 Contemporary Music Development and style characteristics of 20th century music from the late romanticists to the experimentalists. Both European and American composers presented. Prerequisites: 1, 3, 11, 12, or permission, ability to read music. Three hours. Offered in alternate years.

113 Medieval, Renaissance Chronological, analytical study of music literature from approximately 600-1600: Gregorian chant, Notre Dame, Burgundian, English, and Netherlands schools. Prerequisites: 1, 3, 11, 12, or permission, ability to read music. Three hours. Offered in alternate years.

114 Baroque Music Chronological, analytical study of music literature from approximately 1600-1750: Roman and Venetian schools, beginnings of opera, culminating in works of Handel and J.S. Bach. Prerequisites: 1, 3, 11, 12, or permission, ability to read music. Three hours. Offered in alternate years.

115 Genre or Specific Area Courses American music; ethnomusicology. Prerequisites: Three hours from 1, 3, 4, 11, 12, or permission. Three hours.

195, 196 Special Topics

195 Prerequisites: Junior or senior standing; Music 11, 12, 131, 132, 133, 134. Three hours.

196 Prerequisites: Three hours from 1, 3, 4, 11, 12, or permission. Three hours.

211, 212, 213, 214, 215 Seminars in Music Literature Seminars will treat in detail topics surveyed in intermediate level music literature sequence. Subject matter determined by instructor. Prerequisites: 11, 12; 111 for 211, 112 for 212, 113 for 213, 114 for 214; 115 for 215. Three hours. Offered on irregular basis as required by major enrollment.

216 Bibliography Seminar Biographies and critical works, bibliographies, Festschriften, scholarly and performing editions of music and discography surveyed. Prerequisites: 11, 12, one additional music literature course at 100 or 200 level. Three hours.

221 Senior Project For the advanced music history student — an opportunity to work with a faculty member on a topic of mutual interest. All topics subject to departmental approval. Prerequisites: 11, 12, six hours of intermediate and/or advanced courses in music literature. Three hours.

PERFORMANCE

For the fees for instruction, see section titled “Student Expenses.”

For B.A. students with a concentration in performance and B.M. students, except theory majors, a senior recital is required. See repertoire lists in department office for differences in expectations for B.A. and B.M. students. Regular appearances in departmental recitals are required of all performance students. All students taking lessons for credit are required to take jury examinations at the end of each semester. At the end of the sophomore year, all prospective performance majors are required to pass a junior standing examination by faculty jury to determine whether they will be accepted as majors and may enroll in performance study at the 200 level.

All music majors in any curriculum are required to pass a piano proficiency examination before certification of graduation. Prospective music majors who lack sufficient background to pass this examination must enroll in Group Piano (Music 5–8, First- and Second-Year Piano) at the appropriate level as determined after consultation with the instructor. Majors with little or no facility in piano are strongly advised to begin piano studies as soon as possible. For the exam, students will be required to:

1. Play one piano piece prepared in advance of the exam.
2. Sight-read a hymn and transpose it at sight.
3. Harmonize simple folk songs with a variety of accompaniment styles. Examples will include songs with no harmonization provided, those with chord symbols given, and those with accompaniment already provided. All must be accompanied and transposed at sight.
4. Sight-read a simple four-part SATB open score.
5. Sight-read a simple piano piece.

B.A. students electing a concentration in piano must take two semesters of accompanying (171); B.M. students majoring in piano will take four semesters of accompanying (171).

Each hour of credit in performance study requires a minimum of one hour’s practice per day.

2 Introductions to Performance Study Group lessons at elementary level in various instruments and voice. Lab fee. One hour. May be repeated for credit.

58 Performance Study Group lessons in piano. Prerequisites: Ability to read music or proficiency on another instrument or voice. One hour. Metcalfe, Parker.

51-58 Performance Study Private instruction in an instrument or voice for nonmajors. Subject to availability of staff. Lab fee required. Contact department office for placement. Not open for credit to music majors or minors. One or two hours.

151-158 Performance Study Private instruction in an instrument or voice for music majors and minors at the first-year and sophomore levels. Lab fee required. Variable hours.

251-253 Performance Study Private instruction in an instrument or voice for majors at junior and senior levels. Lab fee required. Variable hours.

256 Performance Study Private instruction in voice or an instrument in the semester of senior recital. Lab fee required. Variable hours.

257 Performance Pedagogy Methods of teaching voice, strings, woodwinds, brass, percussion, or keyboard instruments including repertoire suitable for use at various levels of ability. Significant literature of all historical periods in major field. Prerequisites: Senior standing in performance, consent of instructor. Variable hours. (Not offered for graduate credit.)

259 Conducting Technique of the baton, score reading, laboratory practice. Preparation and performance of selected scores, including rehearsal procedures. Selected students may conduct University major ensembles. Prerequisites: 192, 193. Three hours.

PERFORMING ENSEMBLES

Large Ensembles Attendance at all rehearsals and public performances is required. Prerequisite: Audition. One hour. May be repeated for credit.

161 Band
162 Concert Choir
163 Choral Union
164 Orchestra
165 Vermont Wind Ensemble  

Small Ensembles  
Study and performance of masterworks for small groups. Attendance at all rehearsals and public performances required. Outside practice required.  
Prerequisite: Audition. Variable hours. May be repeated for credit.

171 Accompanying

172 Brass Ensemble

173 Contemporary Ensemble

174 Catamount Singers

175 Opera Workshop

176 Percussion Ensemble

177 Small Ensemble

178 Jazz Ensemble

179 Trombone Choir

Pedagogy Classes  
Primarily for Education majors; others accepted with departmental permission. One hour.

81, 82 Brass Class

83, 84 String Class

85, 86 Voice Class

87, 88 Woodwind Class

89 Percussion Class

181 Music for Elementary Teachers  
Development of musical skills, understandings, and attitudes pertinent to teaching of music in elementary classroom.  
Prerequisite: Junior standing. Three hours.

184 Instrument Repair  
Laboratory for music education students in minor repair and adjustment of string, woodwind, brass, and percussion instruments. Prerequisites: String, woodwind, brass, and percussion classes or concurrent enrollment, departmental permission. One hour. Offered on occasional basis only.

186 Piano Repair—Tuning  
Basic knowledge of piano construction, tuning, and repairing. Departmental permission. One hour. Offered on occasional basis only.

265 Vermont Wind Ensemble  
Study and performance of masterworks for wind ensemble and concert band. Attendance at all rehearsals and concerts required.  
Prerequisite: Audition. May be repeated for credit.

281 Elementary Music Education Methods  
(Same as Education EDMU 281).  
Prerequisite: Junior standing in Music Education. Three hours.

282 Secondary Music Education Methods  
Methods and materials in the teaching of vocal and instrumental music in secondary schools. Five hours classroom observation per week required. Prerequisite: Junior standing in Music Education. Three hours.

HONORS – ARTS AND SCIENCES

240, 241 Honors/Music  
Contact Department for specific requirements. Three hours each.

Natural Resources (NR)

SCHOOL OF NATURAL RESOURCES

Professors Bowden, Costanza, DeHayes, Donnelly, Manning, McIntosh, Newton; Associate Professors Forcier, Ginger, Hudspeth, Hughes, Levine, Morrissey, Wang, Watzin; Research Associate Professor Livingston; Assistant Professors Keeton, Marsden; Lecturer Shane.

1 Natural History and Field Ecology  
Introduction to the dynamics of the natural world. Basic concepts of biological, chemical, physical, and ecological sciences and the application and interpretation of quantitative measurements are presented within a natural history context. Four hours.

2 Nature and Culture  
Introduction to natural resources and the environment from a social/cultural perspective. Emphasis on environmental history, values, and ethics with application to natural resource and environmental policy. Three hours.

3a Educational/Career Planning for First-year SNR Students  
Interactive course between SNR first-year students and their academic advisor; the course is designed to assist students in formulating and achieving their educational, career and lifelong goals. .05 hours.

3b Educational/Career Planning for Sophomore SNR Students  
Interactive course between SNR sophomores and their academic advisor; the course is designed to assist students in formulating and achieving their educational, career and lifelong goals. .05 hours.

3c Educational/Career Planning for Junior SNR Students  
Interactive course between SNR juniors and their academic advisor; the course is designed to assist students in formulating and achieving their educational, career and lifelong goals. .05 hours.

3d Educational/Career Planning for Senior SNR Students  
Interactive course between SNR seniors and their academic advisor; the course is designed to assist students in formulating and achieving their educational, career and lifelong goals. .05 hours.

6 Race and Culture in Natural Resources  
Introduces the first-year student to issues of race and culture from a variety of disciplinary perspectives. One hour.

25 Elementary Natural Resource Measurements and Mapping  
Introduction to surveying, mapping, aerial photo measurement, and interpretation for natural resource planning and management. Prerequisites: A course in high school or college trigonometry; permission required for nonmajors. Four hours.

51 Environmental Aesthetics and Planning  
Examines historical changes in perceptions of natural and built landscapes, the issues involved in the appearance of landscapes today, and techniques for enhancing landscape beauty. Three hours. Not offered 2002-03.

73 Understanding Water Quality  
Introduction to water quality and water pollution in streams, lakes, wetlands, and ground water. Provides foundation for knowledgeable citizen participation in management of public waters. Credit not allowed for both 73 and 102. Three hours.

99 Aiken Scholars Seminar  
Seminar discussions on current environment issues. Guest speakers and field trips. Prerequisites: Open only to first-year Aiken Scholars. One hour.

102 Water as a Natural Resource  
Characteristics of watersheds, lakes, rivers, and wetlands; discussion of the management of these ecosystems; effects of society on the water resource. Prerequisites: Biology 1; Zoology 9 or Botany 4 or equivalent; Chemistry 31, 23, 26, or 42 or equivalent. Three hours.

103 Ecology, Ecosystems, and Environment  
Major ecological concepts and their application. Analysis of form, structure, and function of organisms, populations, communities, ecosystems, and landscapes. Prerequisites: 1; concurrent enrollment in 104 and 105 required. Three hours.

104 Social Processes and the Environment  
Social science theories and their application to environmental issues. Analysis of issues using theories of government, economics, and social movements. Emphasis on integrating frame-
works to analyze environmental issues. *Prerequisite:* 2 and concurrent enrollment in 103 and 105 required. Three hours.

**105 Environmental Problem Analysis** Examination of interdisciplinary dimensions of natural resource and environmental problems. Emphasis on social and ecological aspects of environmental issues and interdisciplinary teamwork. *Prerequisites:* 1, 2 and concurrent enrollment in 103 and 104. One hour.

**130 Global Environmental Assessment** (See Environmental Sciences 130.) Three hours.

**140 Natural Resources Biostatistics** Introduction to applied statistical methods for typical natural resources biological problems. Descriptive statistics, hypothesis testing, regression, and sampling design. Emphasis on problem formulation and solution. *Prerequisites:* Sophomore standing, two years of high school algebra. Four hours.

**143 Introduction to Geographic Information Systems** Understanding and application of computer-based, graphically-referenced information systems. *Prerequisites:* Junior standing; Computer Science 3 or 11. Three hours.

**146 Remote Sensing of Natural Resources** (See Forestry 146.) Three hours.

**155 Fluvial Geology** (See Geology 155.) Three hours.

**170 Introduction to Dynamic Simulation** Elementary principles of dynamic simulation modeling and use of the STELLA II dynamic simulation software. Example simulations of natural environmental systems. *Prerequisite:* Sophomore standing. One hour.

**176 Water Quality Analysis** Selected aspects of elementary water chemistry and bioassay as related to surface and ground waters. Five laboratory experiences. *Prerequisite:* 176. Three hours. (2.5 hours lecture per week and 20 hours lab per semester.)

**185 Special Topics** Special topics in natural resources beyond the scope of existing formal courses. Variable credit.

**189 Student-Designed Course Work in Natural Resources** Student-taught course work beyond the scope of formal courses in natural resources. Developed according to SNR guidelines with sponsorship by interested faculty. Variable credit, one–three hours.

**199 Honors Seminar** A discussion and readings seminar that features guest speakers, and is part of the SNR Spring Seminar Series. Focus of the seminars change annually. Can be repeated. *Prerequisites:* Sophomore standing; open only to SNR Honors Students. One hour.

**205 Ecosystem Management: Integrating Science, Society, and Policy** Integration of natural and social science into ecosystem management and policy. Consideration of ecosystem integrity, ecosystem degradation, human needs and values, and the application of management principles within a holistic context. *Prerequisites:* 1, 2, 103, 104. Three hours. (Not offered for graduate credit.)

**206 Environmental Problem Solving and Impact Assessment** Group dynamics, impact assessment, risk assessment, and decision making. Emphasis on the process of solving complex environmental problems, interdisciplinary teamwork, and the National Environmental Policy Act. *Prerequisites:* 1, 2, 103, 104, 205, and statistics. Four hours. (Not offered for graduate credit.)

**220 Landscape Ecology** Study of pattern, process, and dynamics in the landscape. Considers the role of landscape pattern in determining habitat quality and ecosystem function. *Prerequisite:* One biology, one ecology course; senior standing. Two hours. Alternate years, 2002-03.

**222 Pollution Ecology** (See Environmental Sciences 222.) Three hours.

**224 Conservation Biology** Conservation of biological diversity at generic, species, ecosystem, and landscape levels. Emphasis on genetic diversity, population viability, endangered species, critical habitats, international implications. *Prerequisites:* Biology 1, 2; a 100-level ecology course. Three hours. (Not offered for graduate credit.)

**228 Ecosystem Ecology** (See Forestry 228.)

**235 Legal Aspects of Planning and Zoning** Comparison of Vermont planning and zoning law with that of other states. Case studies in planning, zoning, and land use controls. *Prerequisite:* Senior standing. Three hours. Not offered 2002-03.

**250 Limnology** Ecology of lakes and reservoirs, including their origin, physics, chemistry and biology, and the effects of anthropogenic perturbations. Field and laboratory experience. *Prerequisites:* One year biology, one year chemistry, and ecology course. Four hours.

**252 Visual Resource Planning and Management** Investigates the theories and principles of aesthetics related to landscape perception, and their applications to visual impact assessment and scenic resource planning. *Prerequisite:* Senior standing. Three hours.

**254 Advanced Natural Resource Policy** Advanced seminar in natural resource policy, emphasizing current issues in forest policy. *Prerequisites:* Graduate or advanced undergraduate standing; instructor’s permission. Three hours.

**255 Field Methods in Water Resources** Techniques used in field assessment of water quality in rivers and lakes. Case studies on the LaPlatte River and Lake Champlain. Sampling strategies, field measurements, and data evaluation. Extensive field work. *Prerequisite:* 102 or equivalent basic course in water. Three hours.

**256 Ecology of a Large Lake** A field exploration of the littoral zone and deep lake environments and human impacts on large lakes using Lake Champlain as the class laboratory. *Prerequisite:* 100-level ecology course. Four hours.

**260 Wetlands Ecology and Management** Structure, dynamics and values of natural and artificial wetlands; wetlands management and issues. *Prerequisites:* Biology 1 and 2, and an upper-level ecology course. Three hours.

**262 International Problems in Natural Resource Management** Discussion of problems associated with the management of natural resources which have international implications. Topics may include deforestation, desertification, fisheries, wildlife, refuges, fuelwood, pollution. *Prerequisite:* Senior standing; permission. Three hours.

**270 Toxic and Hazardous Substances in Surface Waters** The fate of toxic and hazardous pollutants, including trace elements and organics, in surface waters; effects on human health and aquatic biota. *Prerequisites:* Biology 1, Chemistry 23, 42; 102 or equivalent; senior standing. Three hours.

**275 Natural Resource Planning: Theory and Methods** Investigates theoretical development of natural resource planning. Studies planning methods appropriate to protection and use of scenic, recreational, forest, agriculture, and historic resources and ecologically sensitive areas. *Prerequisite:* Senior standing. Three hours.

**276 Water Quality Analysis and Interpretation** Selected aspects of water chemistry and bioassay as related to surface and ground waters. Laboratory analysis of water quality parameters and data interpretation. *Prerequisite:* One course in chemistry, calculus, statistics; senior standing. Three hours.
278 Principles of Aquatic Systems Study of physical, chemical and biological principles as related to natural aquatic systems. Modelling dynamic behavior of aquatic systems using system simulation techniques. Prerequisites: Math. 19, Physics 11, Chemistry 23, 26 or equivalent, 170 or equivalent (or as a co-requisite) senior standing. Three hours (two hours lecture and three hours laboratory per week).

279 Watershed Management Hydrology Fundamental elements of hydrology and contaminant transport in watersheds. Application of dynamic simulation techniques. Discussion of new technologies for watershed management. Prerequisites: 170 or equivalent (or as a co-requisite), Math. 20, Physics 11, Chemistry 23, 26 or equivalent, senior standing. Three hours.

280 Stream Ecology Ecology of streams including hydrodynamics, morphology, sediment transport, chemistry, biology and human impacts. Field and laboratory experience. Prerequisites: One year biology, one year chemistry, an ecology course. Four hours. Undergraduate/graduate credit.

285 Advanced Special Topics in Natural Resource Planning Advanced special topics in natural resource planning beyond the scope of existing formal courses. Prerequisites: Graduate or senior standing, instructor’s permission.

298 Honors ‘Project’ Planning Discussions leading to the development of an individual or group Senior Honors Project Proposal. Prerequisites: Junior standing; open only to SNR Honors Students. One hour.

299 Natural Resources Honors Honors project dealing with aquatic resources, terrestrial ecology, or integrated natural resources. Prerequisite: By application only; see program chair. Three to six hours.

Nuclear Medicine Technology

See Biomedical Technologies.

Nursing (NURS)

Professors Hamel-Bisell, Rambar (Dean); Associate Professors Carr, Cohen, Green-Hernandez, Havens (Chair), Maldy, Morris, Sowan; Assistants Professors Abrams, Anderson, Canales, Keprosin, Lukowski; Lecturers Bongiorno, Sande, Whitney; Clinical Assistant Professors Buck-Rolland, Hunter, Melvin, Whitney; Visiting Assistants Professor Beuton.

FOR NONMAJORS

15 Personal Power in Health Explores consumer power in health care. Addresses how an individual can influence personal health as well as health of community. Three hours.

20 Aging: Change and Adaptation (Same as Early Childhood and Human Development 20; Home Economics 20 and Sociology 20). Individual and social meanings of aging and old age; physical, physiological, psychological, and sociological changes accompanying aging; individual family, community, and societal adaptations to aging. Three hours.

100 Biology of Aging (Same as Early Childhood and Human Development 152) Human aging examined emphasizing biological and nonpathological physiological changes and their effects on the functioning of elders. Prerequisites: Biology 4 or Anatomy and Physiology 9, 10 or 19–20 or permission. Three hours.

115 Women’s Health and Advocacy Aims to de-mystify women’s health care issues through understanding options/choices concerning sexuality, contraception, reproductive health, sexually transmitted diseases, relationships, additive disorders, anxiety/depression and more. Three hours. Fall semester. Cross-listed: Allied Health.

135 Health Issues in Developing Countries Discussion of status and practice issues in developing countries including several Black African countries and Peoples’ Republic of China. Historical, sociocultural, religious, political perspectives. Three hours.

138 Critical Care Nursing

140 Issues in Women’s Health A holistic exploration of the health care needs of women. This course will consider the stereotypical, theoretical, and clinical approaches of care used in treating women. Prerequisites: PSYC 1, HDFS 5, Sociology course below 100. Three hours.

195, 196 Special Topics One to six hours.

PROFESSIONAL NURSING MAJOR (PRNU)

Note: All courses limited to students majoring in Nursing.

110 The Art and Science of Nursing (3–0) Exploration of ways of knowing in nursing that lead to understanding of the human experience of health. Content includes: theory, professional role development, ethics, and legal aspects of nursing practice. Prerequisites: Sociology, Psychology 1; English 1. Recommended: ENVS 1, 2 or 7 or ENSC 1 or NR 185. Three hours.

111 Research in Nursing (2–0) An introduction to the research process and its relationship to theory and nursing practice. Knowledge and skills essential for understanding and utilization of research are presented. Prerequisites: Math. 110, 112, Statistics 111 or 141. Two hours.

112 Introduction to Nursing Informatics (3–1) An introduction to the knowledge and skills necessary for the areas of Informatics and information management that are an important part of effective practice and research in nursing. Prerequisites: PRNU 110. One hour.

113 Assessment of Health of Individuals and Families within Communities (3–4) Through classroom and practicum, students learn to holistically assess and differentiate healthy from at-risk findings of clients in a variety of settings. Prerequisites: 110, 111, 112; Anatomy and Physiology 20; Prerequisites: Anatomy and Physiology 19, Micro and Mol. Gen. 65, Nutritional Sci. 43, Human Development 5. Four hours.

127 Health Promotion Across the Lifespan (3–4.5) This course focuses on health promotion and disease prevention across the lifespan. Varied practicum experiences provide students the opportunity to assess, plan, implement and evaluate care. Prerequisites: 113, ENVS. Prerequisites: 128. Four and one-half hours.

128 Nursing Implications of Drug Therapy (3–2) Examination and application of knowledge of pharmacotherapeutic principles to nursing practice. Prerequisites: 113, Chem 26. Four hours.

129 Family Centered Care for Childbearing Women and Newborns This course focuses on the human experiences of childbearing. Students will have opportunities to care for childbearing women, neonates and their families in a variety of settings. Prerequisite. PRNU 113. Pre/corequisites: PRNU 128, PATH 101. Three hours.

130 Professional Nursing and the Health Care System (2–0) This course focuses on the historic and contemporary role of the professional nurse within the health care system. The organization and financing of health care is examined from multiple perspectives. Prerequisites: 113. Two hours.

131 Experiences of Alterations in Health (3–0) Focus on the human experience of alterations in health for individuals and their families. Content addresses individual and family responses to disease processes from a holistic perspective. Prerequisites: 127, 129; Pathology 101. Three hours.
132 Caring for Children with Alterations in Health (2–3) Focus on children experiencing alterations in health. Through classroom and practicum students learn to holistically care for children experiencing alterations within the context of family, in a variety of settings. Prerequisite: PRNU 131. Three and one-half hours.

134 Caring for Adults and Elders with Alterations in Health I (2–9) Focus on adults and elders experiencing alterations in health. Through classroom and practicum students learn to holistically care for adults and elders experiencing alterations within the context of family, in a variety of settings. Prerequisite: PRNU 131. Five hours.

196 Special Topics Refer to course schedule for specific title. Prerequisite: Majors only; senior standing. One to six hours.

197 Independent Study An independent study is an educational experience taken for credit that occurs separate from a group class. The student develops a plan specific to their learning needs and interests and works under the guidance of a faculty member to achieve the predetermined objectives. Prerequisites: Agreement from a faculty sponsor and approval by the Baccalaureate Education Committee. One to three hours.

231 Experiences in Alterations in Health II This course focuses on individual and family responses to alterations in health. A holistic and lifespan approach will be used in examining the nursing care of these clients. Prerequisites: PRNU 132, 134. Two hours.

254 Caring for Adults and Elders with Alterations in Health II (2–9) The second course of a two-course sequence focusing on adults and elders experiencing alterations in health. Through classroom and practicum students learn to holistically care for adults and elders experiencing alterations within the context of family, in a variety of settings. Prerequisite: PRNU 231. Five hours.

255 Caring for Individuals with Alterations in Mental Health (2–6) Focus on individuals experiencing alterations in mental health. Through classroom and practicum students learn to holistically care for individuals experiencing alterations in mental health in a variety of settings. Prerequisite: PRNU 254. Four hours.

261 Clients and Populations at Risk (4–0) Focus on roles of the nurse in community and public health within a multidisciplinary context. Students will explore factors that place populations at risk. Prerequisite: PRNU 152. Four hours.

262 Caring for Clients and Populations at Risk in the Community (12 hours practicum) Focus on the roles of nursing that emphasize community care. Students will engage in a practice situation involving aggregate care of populations at risk. Prerequisite: PRNU 261. Four hours.

The graduate level courses (GRNU 310 and 315) required for this program are described in the Graduate College Catalog.

Nutrition and Food Sciences (NFS)

COLLEGE OF AGRICULTURE AND LIFE SCIENCES

43 Fundamentals of Nutrition (3-0) Comprehensive study of specific nutrients in terms of their availability, function, and utilization in mammalian species. Prerequisites: High school chemistry and biology. Three hours. Fall /Spring.

44 Survey of the Field: Nutrition and Food Sciences (1-0) Introduction to the professional field and career opportunities in dietetics, nutrition and food science. Required of all first-year and transfer students. One hour. Fall.

53 Basic Concepts of Foods (3-0) Study of the scientific aspects of food with emphasis on reasons for procedures used and phenomena occurring in food preparation. Three hours. Spring.

54 Basics Concepts of Foods Laboratory (0-3) Developing comprehension of scientific principles of food preparation through modification of standard recipes, manipulation of ingredients and techniques, and evaluation using sensory and objective methods. Prerequisite: 53 or concurrent registration in 53 or permission. One hour. Spring. Department majors only.
143 Nutrition in the Life Cycle (3-0) Nutritional needs of people throughout the life cycle. Physiological and environmental factors which affect nutritional status. Designed for nutrition majors. **Prerequisites:** Nutrition 43. Three hours. Fall.

150 Quantity Food Production and Service (3-4) Principles and techniques of food accounting, recipe and menu planning/costing, preparation and service including equipment, sanitation, and time motion studies. **Prerequisite:** Nutrition 53. Four hours. Fall.

153 Principals of Food Technology (3-0) Food processing technologies and underlining principles of changes in microbiological quality and safety, chemical composition and nutritional value, and interaction of functional additives and ingredients. **Prerequisites:** 43, 53, organic chemistry. Three hours. Spring.

154 Principals of Food Technology Laboratory (0-3) Experiential learning of principles of major modern food processing and preservation technologies, essential skills of food quality and safety assurance, and new product development. **Prerequisites:** 54, 153 or concurrent enrollment in 153, organic chemistry. One hour. Spring. Department majors only.

165 Management of Eating Disorders (3-0) Examines the causes, diagnosis, and treatment of body image disorder, anorexia nervosa, bulimia nervosa, binge eating, and obesity. Information is provided through readings, lecture, discussion, and speakers. Three hours. Spring.

195 Special Topics Lectures, laboratories, readings, or projects relating to contemporary areas of study. Credits negotiable. Enrollment may be more than once, maximum of 12 hours in 195 and 295 combined. **Prerequisite:** Instructor’s permission. Departmental permission.

196 Field Experience Professionally-oriented field experience under joint supervision by faculty and business or community representative. Credits negotiable, maximum of 15 hours in 196 and 296 combined. **Prerequisite:** Instructor’s permission. Departmental permission.

197, 198 Undergraduate Research Individual laboratory or community research in food or nutritional sciences under the guidance of a faculty member. Arrangement with faculty member and department chairperson permission. Credits negotiable up to three hours per semester.

201 Fermented Dairy Foods (3-3) Fundamental processes involved in the manufacture of domestic and imported cheese varieties and other cultured dairy foods. Acquired knowledge of manufacturing procedures applied at pilot plant level. **Prerequisites:** A course in organic chemistry, AGBI 201, or permission. Four hours. Alternate years.

203 Food Microbiology (3-3) Desirable and undesirable activities of bacteria in foods. Mechanisms of food-borne infection and intoxication. Laboratory methods to enumerate and identify microorganisms associated with food. **Prerequisites:** A course in biochemistry. Four hours. Fall.

208 Sensory Evaluation of Foods (3-3) Nature of sensory responses to aroma, taste, and texture of foods; relation of sensory data to instrumental measurements; statistical analysis and interpretation of sensory data. **Prerequisite:** A course in Statistics. Three hours. Alternate years, Fall 2004.

243 Advance Nutrition (3-0) Study of nutrients and their specific functions in metabolic process integrating cellular physiology, biochemistry, and nutrition. **Prerequisites:** 43, AGBI 201 or equivalent, ANPS 19 or equivalent; Junior standing. Three hours. Spring.

250 Food Service Systems Management (3-0) Organization and administration of food service systems including principles of production, accounting management decisions, communications, and legal responsibilities specific to quantity food production. Emphasis on problem solving. **Prerequisites:** 150, BSAD 120, or permission. Three hours. Spring. (Not offered for graduate credit.)

253 Food Safety and Regulation (3-0) Comprehensive study of the relationships between food processing and preservation, food toxicology, and the scope, applicability, and limitations of U.S. food laws. **Prerequisites:** AGBI 201 or equivalent. Three hours. Spring.

260 Diet and Disease (3-2) Examination of the physiologic, biochemical, and psychosocial basis of several disease states with application of the normal and therapeutic food and nutrition principles associated with treatment. **Prerequisites:** 53, 123, 143, 243. Four hours. Fall.

261 Clinical Nutrition (3-0) Applications of clinical nutrition including practice experiences in interviewing, nutritional assessment and counseling, case studies, and in-depth discussions of current controversies in the dietary management of specific diseases. **Prerequisites:** 260 or concurrently enrolled. Three hours. Fall.

262 Community Nutrition (3-0) Study of U.S. public health nutrition policies, programs and practices. Emphasis on community nutrition program planning including needs assessment, intervention development and evaluation. **Prerequisites:** 260 and senior standing. Three hours. Spring.

263 Nutritional Biochemistry (3-0) Comprehensive study of metabolism of carbohydrates, lipids, and protein emphasizing diet induced, hormone mediated alterations in metabolism (e.g. starvation and obesity). **Prerequisites:** 245 or instructor’s permission. Three hours. Spring.

273 Nutrition Counseling Professional field experience providing preventive and therapeutic nutritional information and education to individuals or groups under the direct supervision of a Registered Dietitian. Credit negotiable but not to exceed three per semester. Enrollment may be more than once. Maximum of six credits. **Prerequisite:** Instructor’s permission. Fall/Spring. (Not offered for graduate credit.)

274 Community Practicum Professional field experience in a community nutrition organization. Credit negotiable but not to exceed three per semester. Enrollment may be more than once, maximum of 6 credits. **Prerequisite:** Instructor’s permission. Fall/Spring. (Not offered for graduate credit.)

290 Research Methods in Nutritional and Food Sciences (1–6) Advanced research methods, including grant preparation, Institutional Review Board requirements, data analysis and presentation, and selected techniques in advanced nutritional biochemistry. **Prerequisites:** AGBI 201, 202, or equivalent. Four hours. Fall.

295 Special Topics Lectures, laboratories, readings, or projects relating to contemporary areas of study. Credits negotiable. Enrollment may be more than once, maximum of 12 hours in 195 and 295 combined. **Prerequisite:** Departmental permission.
296 Field Experience  Professionally-oriented field experience under joint supervision of faculty and business or community representative. Credit negotiable. Maximum of 15 hours in 196 and 296 combined. Prerequisite: Departmental permission.

**Pathology (PATH)**

COLLEGE OF MEDICINE

Professors Borell (Chairperson), Cooper, Hardin, Heintz, Howard, Huber, Leiman, Masson, Pendeley, Tracy, Wan, Yandell; Associate Professors Beatty, Kida, Lunde, MacPherson, Mount, Taatjes, Tindle, van der Vliet, Waters, Weaver; Assistant Professors Allen, Rosenberg Cook, Gibson, Harmon, Jansen-Heiningen, Sharp Tam, Tang; Research Assistant Professors Evans, Scott, Shukla.

101 Introduction to Human Disease (2-3) Elementary course in human pathology designed for Allied Health students. First portion deals with general mechanisms of disease, followed by disorders of specific organs. Prerequisites: College biology, anatomy, and physiology. Three hours.

305 Molecular Mechanisms of Disease Introductory course on molecular and cellular pathways of disease induction and development. Emphasis on environmental diseases. For graduate students and postdoctoral fellows and undergraduates with permission of course director (Mossman). Alternate years. Three hours.

306 Pathology Environmental Disease Computer-assisted basic pathology series with emphasis on skin, lung, brain, and digestive tract. Alternate years with 305. One hour.

375 Special Topics in Molecular Pathobiology Five independent, rotating one-semester modules concerning: Atherosclerosis (Dr. R. Tracy), DNA Replication (Dr. Heintz), Human Genetics (Dr. Yandell), Cell Imaging Techniques (Dr. Taatjes), Cell Signalling in Differentiation and Apoptosis (Dr. Janssen) and Cancer Genetics (Dr. Koh). Each course based on critical review of the primary literature. Prerequisites: Biochemistry 301, 302 or instructor’s permission. Open to undergraduates with instructor’s permission. Three hours.

395 Special Topics in Pathology: Immunopathology In-depth analysis of the role of the immune system in disease processes. Discussions center on current and controversial areas of immunopathology. Prerequisites: Immunology (Microbiology 225) desirable. Two hours. Alternate year course with 305.

**Pharmacology (PHRM)**

COLLEGE OF MEDICINE

Professors Branda, Brayden, Grauberg, Mave, May, McCormach, Nelson (Chair), Oot, Paluk, Scott; Associate Professors Lidosky, Mischler, Penar; Assistant Professors Cipolla, Damon, Dostmann, Lounsbury, Morello, Segal, Wellman; Research Assistant Professors Bonex, Eckman, Helpner, Honda, Petkov; Visiting Professors Ledens, Standen; Visiting Associate Professor Heschler; Visiting Assistant Professors Luber, Santana; Adjunct Professors Hadar; Adjunct Assistant Professor Beiss.

190 Pharmacology for Physical Therapy  Basic pharmacology and classes of drugs which may alter the responsiveness of patients to physical therapy. Prerequisites: Physiology and Biophysics 101-102, Pathology 101. Two hours.

272 Toxicology The biology of environmental intoxicants and of drug abuse. Ecologic and physiologic consequences of the dissemination of agricultural, industrial, and medicinal chemicals. Prerequisite: Organic chemistry, background in biology. Three hours.

290 Topics in Molecular and Cellular Pharmacology Focuses on basic principles, drug interactions with receptors, membranes, synapses, neurotransmitters, macromolecules, cytoskeleton, ion channels and pumps, and mechanisms of drug resistance. Prerequisites: Introductory course in organic chemistry, background in physiology or health sciences. Three hours.

302, 303 Pharmaceutical Techniques  Experiments conducted under supervision in the areas of drug metabolism, modes of drug action, physicochemical properties of drugs, bioassay, and toxicology. Open to undergraduates with instructor’s permission. Two hours, by arrangement.

328 Introduction to Medicinal Chemistry  Important classes of drugs are surveyed. Emphasis on relationships between physicochemical properties and pharmacologic activity; synthetic aspects considered. Prerequisites: Chemistry 131-132. Open to undergraduates with instructor’s permission. Three hours.

**Philosophy (PHIL)**

COLLEGE OF ARTS AND SCIENCES

Professors Christensen, Guignon, Kornblith, Mawn, Perelboom (Chairperson); Associate Professors Chan, Kuflik, Loeb; Assistant Professors Miller, Moyer.

Indications about the frequencies with which courses are offered are in some cases only estimates. Students should consult the department for further information.

1 Introduction to Philosophy: Selected Problems  Introduction to philosophy through such fundamental problems as the existence of God, the basis of morality, and the possibility of knowledge. Contemporary and historical readings. Credit not given for more than one of 1, 3, and 4. Three hours. Offered every semester.

3 Introduction to Philosophy: East and West  Introduction to the historical dialectic of philosophy by comparisons and contrasts between Chinese and Western traditions of philosophy. Credit not given for more than one of 1, 3, and 4. Three hours. Offered every semester.

4 Introduction to Philosophy: Ethics  Introduction to philosophy through an analysis of the principal problems and theories of ethics. Credit not given for more than one of 1, 3, and 4. Three hours. Offered every semester.

13 Introduction to Logic  Study of the basic principles of deductive inference. Three hours.

95, 96 Introductory Special Topics  See Schedule of Courses for specific titles. Three hours.

101 History of Ancient Philosophy  Study of the works of the Pre-Socratics, Plato, Aristotle, and their successors. Prerequisite: 1, 3, 4, 95, 96. Three hours. Fall.

102 History of Modern Philosophy  Study of works of the major philosophers of the 17th and 18th centuries: Descartes, Spinoza, Leibniz, Locke, Berkeley, Hume, Kant, and others. Prerequisite: 1, 3, 4, 95, 96. Three hours. Spring.

105 History of Medieval Philosophy  Study of works of such major philosophical figures as Augustine, Anselm, Abelard, Aquinas, Duns Scotus, and William of Ockham. Prerequisite: 101 is recommended. Three hours.

107 19th Century Philosophy  Study of works of such philosophers as Hegel, Fichte, Schopenhauer, J. S. Mill, Kierkegaard, Nietzsche, and Marx. Prerequisite: 102 is recommended. Three hours.
108 **Plato** (See Classics 161.) *Prerequisite:* 1 course in Philosophy or in Classics (Greek Culture or Greek). Three hours.

110 **Nature of Mind** Examination of philosophical issues raised by influential psychological views of the nature of the human mind. *Prerequisite:* 1, 3, 4, 95, 96 or one course in psychology. Three hours. Fall.

112 **Philosophy of Science** Introduction to major philosophical problems raised by science. Typical topics: the nature of scientific inference, the structure of theories, causation, explanation, and scientific change. *Prerequisite:* One course in philosophy or one course in history of science or six hours in any natural science. Three hours. Fall.

121 **Chinese Philosophy I** Study of the Classical Schools of Chinese thought, including Confucianism, Taoism, Mohism, and Legalism. *Prerequisite:* One course in philosophy, religion, or Asian studies. Three hours. Offered two out of every three semesters.

122 **Chinese Philosophy II** Chinese thought from the Han Dynasty to Mao Zedong’s thought. *Prerequisite:* 121. Three hours. Alternate years.

130 **Philosophical Foundations of Education** Critical examination of the aims of education and the most appropriate means of achieving those aims. Readings from historical and contemporary sources. *Prerequisite:* 1, 3, 4, 95, 96. Three hours. Alternate years.

133 **Marxism** Survey of the philosophy of Karl Marx and the Marxist tradition on such topics as historical materialism, human nature, alienation, freedom, social change, and revolution. *Prerequisite:* 1, 3, 4, 95, 96. Three hours. Alternate years.

135 **Philosophy of Religion** Typical topics: the nature of religion, the concept of God, the grounds for belief in God, mortality, truth, and revelation. Historical and contemporary sources. *Prerequisite:* 1, 3, 4, 95, 96. Three hours. Offered once a year.

140 **Social and Political Philosophy** Analysis of such fundamental theories and problems in social and political thought as political obligation, rights, and justice. *Prerequisite:* 1, 3, 4, 95, 96. Three hours. Offered once a year.

142 **Philosophy of Law I** (Same as Political Science 143.) Analysis of the nature of law, the relation between law and morality, obligation to obey the law, the judicial decision, responsibility in law, legal ethics. *Prerequisite:* 1, 3, 4, 95, 96 or Political Science 41. Three hours. Offered once a year.

143 **Philosophy of Law II** (Same as Political Science 144.) Problems of liberty, e.g. freedom of expression, privacy, paternalism; scope and limits of the criminal law; philosophy of punishment; selected problems in criminal justice, e.g. plea bargaining; preventive detention. *Prerequisite:* 1, 3, 4, 95, 96 or Political Science 41. Three hours. Offered once a year.

144 **Philosophical Problems in Medicine** Critical and intensive examination of such problems as abortion, euthanasia, dying and death, the ethics of organ transplantation, and the ethics of genetic engineering. *Prerequisite:* 1, 3, 4, 95, 96. Three hours. Offered once a year.

151 **Philosophical Ideas in Literature** Philosophical themes as exemplified in literature. *Prerequisite:* 1, 3, 4, 95, 96. Three hours. Alternate years.

152 **Philosophy of Art** A consideration of some leading theories of art, and their application to problems of art as they appear in music, literature, painting, and in the general criticism of the arts. *Prerequisite:* 1, 3, 4, 95, 96. Three hours. Offered once a year.

153 **Philosophy and Film** An examination of style in film from the perspective of philosophical aesthetics, and of the ways film style can be used to express philosophical themes. *Prerequisite:* 1, 3, 4, 95, 96. Three hours.

160 **Recent Continental Philosophy** Survey of 20th century continental philosophy, including phenomenology, hermeneutics, critical theory, structuralism, and poststructuralism. Readings from Husserl, Heidegger, Sartre, Saussure, Wittgenstein, Habermas, and Foucault. *Prerequisite:* 1, 3, 4, 95, 96 or instructor’s permission. Three hours.

170 **Feminism: Theories and Issues** Theories of libertarianism, liberalism, and egalitarianism; application to the analysis and evaluation of social issues of contemporary interest, such as abortion and affirmative action. *Prerequisite:* One course in philosophy. Three hours.

195, 196 **Intermediate Special Topics** See Schedule of Courses for specific titles.

197, 198 **Readings and Research**

201 **Theory of Knowledge** Critical examination of nature and sources of knowledge; belief, truth, evidence, perception, memory, and induction. *Prerequisite:* 102 or 112. Three hours. Offered every fall semester.

202 **Metaphysics** Critical examination of such topics as the nature of space and time, the concept of change, the identity of the self, the nature of the world and man’s place in it. *Prerequisite:* 101, 102 or 110. Three hours. Alternate years.

210 **Philosophy of Mind** Major philosophical theories of the mind and its relation to the physical world, the nature of sensation, desire, and belief, and the relation between thought and action. *Prerequisite:* 102 or 110. Three hours. Alternate years.

217 **Philosophy of Language** Philosophical study of the nature of language. *Prerequisite:* Linguistics 101, 102. Three hours. Alternate years.

221 **Topics in Chinese Philosophy** Detailed examination of a classical Chinese philosophical text or school. *Prerequisite:* 121 or 122. Three hours. Alternate years.

225 **Topics in the Philosophy of Religion** Advanced study of such issues as the metaphysics of religion, the epistemology of religious belief, philosophy and faith, religion and science, and religion and ethics. (May be repeated for credit when topic is significantly different and with departmental approval.) *Prerequisite:* 101 or 135. Three hours.

240 **Contemporary Ethical Theory** Analysis of the ideas of contemporary moral philosophers in normative ethics and metaethics. *Prerequisite:* 140, 142, 143 or 144. Three hours. Alternate years.

241 **Contemporary Social and Political Philosophy** An analysis of the ideas of contemporary philosophers in social and political philosophy. *Prerequisite:* 140, 142, 143, or 144. Three hours. Alternate years.

242 **Justice and Equality** (Same as Political Science 241.) An examination of contemporary normative theories of distributive justice and equality. *Prerequisite:* 140, 142, 143, or 144. Three hours. Offered once a year.

260 **Topics in Continental Philosophy** Study of a central issue in current continental philosophy, e.g. social theory, psychoanalysis, or aesthetics. Readings from Nietzsche, Heidegger, Gadamer, Ricoeur, Habermas, Derrida, and Foucault. *Prerequisite:* Any course in philosophy at the 100 level or above, or instructor’s permission. Three hours. (May be repeated for credit when topic is significantly different.) Alternate years.

265 **American Philosophy** The thought of such leading American philosophers as Peirce, James, Royce, Santayana, Dewey, and Whitehead. *Prerequisite:* 101, 102. Three hours. Alternate years.
211 Mechanics
Newtonian dynamics of particles and systems of particles, with applications to problems of special importance, such as driven and coupled harmonic oscillators and central field trajectories. **Prerequisite:** 42, Math. 121. Three hours.

213 Electricity and Magnetism
Fundamental principles of electricity and magnetism; electrostatic fields, and magnetic fields of steady currents. Electric and magnetic properties of matter and electromagnetic energy. **Prerequisites:** 42, Math. 121. Credit not given for more than one of 213 or Electrical Engineering 141. Three hours.

214 Electromagnetism
Introduction to time dependent electromagnetic fields. Maxwell’s equations in vacuum and in matter. Electromagnetic waves and radiation. **Prerequisite:** 213. Credit not given for more than one of 214 or Electrical Engineering 142. Three hours.

222 Biological Physics
Physical laws, processes, and interactions pertaining to biological systems. **Prerequisites:** 12 or 42, Math. 121. Three hours.

242 Introduction to Solid State Physics
Introduction to crystal structures, reciprocal lattices, lattice vibrations. Thermal properties of solids and free electron theory of metals and semiconductors. Elementary band theory and introduction to electronic transport theory. **Prerequisite:** 128. Three hours.

257 Modern Astrophysics
(Same as ASTR 257.) Stellar structure and evolution, compact objects, the interstellar medium, galactic structure, gravitational theory, and cosmology, the formation of our solar system and terrestrial life. **Prerequisite:** One 100-level course in physical science or engineering. Three hours.

258 Relativity
Development of Einstein’s theory of special relativity. Lorentz transformation, time dilation, length contraction, mass variation, relative velocities. Introduction to four-dimensional space. Concepts of general relativity. Applications selected from astrophysics, elementary particles, etc. **Prerequisite:** 128. Three hours.

264 Nuclear and Elementary Particle Physics
Introduction to theoretical and experimental aspects of nuclear and elementary particle physics. **Prerequisites:** 128, junior standing. Three hours.

265 Thermal Physics
Thermodynamics, kinetic theory, statistical mechanics. **Prerequisites:** 42, Math. 121. Three hours.

273 Quantum Mechanics I
Introduction to nonrelativistic quantum mechanics. Schrödinger equation and applications to simple systems. **Prerequisites:** 128, 211. Three hours.

295, 296 Advanced Special Topics
See Schedule of Courses for specific titles.

**HONORS – ARTS AND SCIENCES**

224, 245 Honors/Physics
Contact Department for specific requirements. Three hours each.

**Physics (PHYS)**

*COLLEGE OF ARTS AND SCIENCES*

**Professors** Rankin, Wu (Chairperson); **Associate Professors** Clougherty, Spartanian, Yang; **Assistant Professors** Chu, Hendrick; Lecturers Brueckner, Sanders.

9 Energy and the Environment (2–3)
Forms of energy as defined in physics; sources, uses, and transformations of energy; introductory seminar and laboratory will place emphasis on environmental issues. Limited use of algebra. Three hours.

11, 12 Elementary Physics (4-0)
Survey of principles of classical and modern physics without calculus, appropriate for students concentrating in life or health sciences. Accompanying labs: Physics 21, 22. **Prerequisites:** 11 or 31 for 12; secondary school algebra and trigonometry. Four hours.

21 Introductory Laboratory I (0.3)
**Prerequisite:** Concurrent enrollment or credit in 11 or 31. One hour.

22 Introductory Laboratory II (0.3)
**Prerequisite:** Concurrent enrollment or credit in 12 or 42. One hour.

31 Introductory Physics (4-0)
Mechanics including oscillations, waves, heat, and kinetic theory. Recommended for students in engineering, natural sciences, premedical programs. Accompanying lab: 21. **Prerequisites:** Math. 21, secondary school trigonometry. Four hours.

42 Electromagnetism and Modern Physics (4-0)
Electricity, magnetism, optics, modern physics. Recommended for students in engineering, natural sciences, premedical programs. Accompanying lab: 22. **Prerequisite:** 31, Math. 22. Four hours.

128 Waves and Quanta (3-0)
Classical and electromagnetic waves, physical optics, wave-particle phenomenology, wave mechanics, and applications of the Schrödinger equation. **Prerequisites:** 42, Math. 121. Three hours.

130 Introductory Laboratory III (0.2)
**Prerequisite:** Concurrent enrollment or credit in 128. One hour.

195, 196 Intermediate Special Topics
See Schedule of Courses for specific titles. **Prerequisite:** 128, department permission.

197, 198 Readings and Research
**Prerequisite:** 128, department permission.

201, 202 Experimental Physics (1-3)
Experiments in classical and modern physics. May be entered at beginning of either semester and repeated for credit up to a maximum of four semesters. **Prerequisites:** 42 or 128, Math. 121, junior standing. Three hours.

211 Mechanics
Newtonian dynamics of particles and systems of particles, with applications to problems of special importance, such as driven and coupled harmonic oscillators and central field trajectories. **Prerequisites:** 42, Math. 121. Three hours.

**HONORS – ARTS AND SCIENCES**

**242, 243 Honors/Philosophy** Contact Department for specific requirements. Three hours each.

**Philosophy (PHIL)**

*COLLEGE OF ARTS AND SCIENCES*

**Professors** Burchfield, Grubinger, Jokela; **Extension Associate Professor** Garcia: Lecturer Turmel; **Research Associate** Gouli.

9, 10 Home and Garden Horticulture
Planning, selecting, and maintaining shrubs, trees, flowers, lawns, fruits, and vegetables around the home. Designed primarily for non-agricultural students. Three hours.

**Plant and Soil Science (PSS)**

*COLLEGE OF AGRICULTURE AND LIFE SCIENCES*

**Professors** Aung, Magoff, Murphy, Parker; Associate Professor Pertillo; Assistant Professors Starrett, Tignor; Extension Professors Betke, Galab (Chairperson), Perry; Extension Associate Professors Boushore, Grubinger, Jokela; Extension Assistant Professor Garcia; Research Associate Professors Brownbridge, Skinner; Research Assistant Professor Ross; Lecturers Harper, Hazlebridge: Adjunct Lecturers Turmel; Research Associate Gouli.

10 Home and Garden Horticulture
Planning, selecting, and maintaining shrubs, trees, flowers, lawns, fruits, and vegetables around the home. Designed primarily for non-agricultural students. Three hours.
11 Principles of Plant Science Principles and practices involved in the culture, management, and utilization of economically important horticulture and agronomic crops. Three hours.

106 Entomology and Pest Management Survey of the major insect orders, and methods for controlling injurious species. Prerequisite: 11. Four hours.

107 Forest Entomology Ecology and population dynamics of insects affecting forests and forest products. Insect control by biological, cultural, and chemical means. Prerequisite: Junior standing in Forestry or Urban Forestry and Landscape Horticulture. Three hours.

121 Indoor Plants Indoor flowers, culture, related topics. Prerequisite: PSS 10 or 11 or Botany 4 or permission. One hour. Alternate years.

122 Small Fruit Crops Principles of small fruit production, including propagation, culture, management, and harvesting. Prerequisite: 11 or permission. Two hours. Alternate years.

123 Garden Flowers Outdoor flowers, culture, related topics. Prerequisite: PSS 10 or 11 or Botany 4 or permission. Two hours. Alternate years.

124 Vegetable Fruit Crops Principles and practices of commercial vegetable fruit production, including seed production, tillage, cultural practices, and nutrition value. Prerequisite: PSS 11. Two hours. Alternate years.

125 Woody Landscape Plants Identification, climatic requirements, cultural management, and use of ornamental plant materials in landscape planting. Prerequisite: 11 or Botany 4 or permission. Four hours.

126 Vegetable Root Crops Principles and practices of commercial vegetable root crop production, including propagation, tillage, cultural practices, and nutrition value. Prerequisite: PSS 11. Two hours. Alternate years.

127 Greenhouse Operations and Management Principles and practices of commercial greenhouse management including construction, heating, cooling, container media, watering, fertilization, light and temperature, growth regulators, integrated pest management and disease control. Prerequisite: PSS 11. Two hours. Alternate years.

131 Landscape Design I A studio course emphasizing theory of landscape design and its application to actual landscape design problems. Graphic communication techniques included. Prerequisite: PSS 11 or permission. Three hours.

132 Landscape Design II Advanced techniques in landscape design. Grading, construction details, graphic techniques, site analysis as well as various design problems. Prerequisite: PSS 125 or 131, or Recreation Management 138 or permission. Three hours.

138 Commercial Plant Propagation Principles and practices involved in propagating herbaceous and woody plants by seeds, division, layering, cuttings, budding, grafting, and aseptic culture. Prerequisite: PSS 11 or permission. Four hours.

143 Forage Crop Management Identification, establishment, and management of crops grown for hay, pasture, and silage. Prerequisite: PSS 11 or permission. Two hours. (Cross-Listed with ASCI 143.) Alternate years.

145 Turfgrass Management Establishment, maintenance, and utilization of turf for lawns, parks, athletic fields, airports, cemeteries, roadsides, golf courses, and ski slopes. Prerequisite: PSS 11 or Botany 4 or permission. Two hours. Alternate years.

152 Agroecology An ecosystem approach to agriculture. Ecological thinking in agriculture, plant/soil ecosystems, ecological design principles and specific sustainable systems (permaculture, biodynamics, agroforestry, organic). Prerequisite: Three credits in a basic biological or ecological science or permission. Three hours. Alternate years.

154 Composting Ecology and Management Examines ecological, physical and chemical principles, the practical management of the composting process, and benefits of using compost in plant and soil ecosystems. Prerequisite: 3 credits in basic biological or ecological science or permission. Two hours. Alternate years.

156 Permaculture Design of agriculturally productive environments that have the diversity, stability, and resilience of the natural biosphere to harmoniously integrate landscape and people. Prerequisite: Three credits in a basic biological or ecological science, or permission. Two hours. Cross-listing: ENV 156.

161 Fundamentals of Soil Science Biological, chemical, and physical properties of the dynamic soil system as related to plant growth and environmental problems. Prerequisite: Inorganic chemistry or permission. Four hours.

162 Soil Fertility and Management An agroecological analysis of soil fertility management including nutrient supply and uptake, rhizosphere-microbial interactions, fertility evaluations, and management techniques. Prerequisite: PSS 161 or permission. Three hours.

165 Undergraduate Special Topics Courses or seminars on topics beyond the scope of existing department offerings. Prerequisite: permission. One to four hours.

197, 198 Undergraduate Independent Study Individual projects under direction of a faculty member. Project may involve original research, readings, internship, or assisting in teaching. Prerequisite: permission. One to six hours; more than a total of 6 credits per semester requires the chair’s permission.

205 Mineral Nutrition of Plants (See Botany 205). Alternate years.

210 Ecological Soil Management Applying basic ecological concepts and principles to practical soil management. Will cover integrated strategies for building healthy soils, including management of biological, physical, and chemical properties. Prerequisite: PSS 161 or permission. Three hours. Alternate years.

215 Weed/Crop Ecology Weed identification, reproduction, ecological relationships with crops, and integrated management. Prerequisites: PSS 11, 161 or permission. Two hours. Alternate years.

217 Pasture Production and Management Physiological and ecological relationships of pasture plants, effects of grazing livestock on them; grazing management effects on livestock and pastures; emphasis on French Voisin system. Prerequisites: PSS 11 or 161 or permission. Two hours. Alternate years.

221 Tree Fruit Culture Theory and practice of modern commercial fruit science. Nutrition and cultural responses to various management practices. Prerequisites: PSS 11, 161 or permission. Two hours. Alternate years.

232 Biological Control Describes the role of biological control agents in the regulation of insects, related arthropods and weeds, and their application and limitations. Prerequisite: Intermediate course in entomology or relevant experience. Three hours. Alternate years.

261 Soil Morphology Classification and Land Use Field techniques that describe soil properties, formation, and classification. The principles and processes of soil genesis, land use classification systems, and land use challenges. Prerequisite: PSS 161 or permission. Three hours. Alternate years.

264 Chemistry of Soil and Water An environmentally oriented study of the colloidal chemistry of soil and its interfaces with roots, water, and air. Prerequisites: PSS 161,
two semesters chemistry or permission. Four hours. Alternate years.

266  Soil Water Movement  Mathematical modeling and physical principles of the soil-water-plant interaction and its relationship to environmental and agricultural issues.  Prerequisites: PSS 161, one semester of physics or permission. Three hours. Alternate years.

269  Soil and Water Pollution and Bioremediation  Examines key issues in pollution of soil and water. Topics include type of pollutants, their reactions in soil and water, pollution prevention and bioremediation. Three hours. Alternate years.

281  Seminar  Presentation and discussion of papers on selected topics of current interest by students and staff. Spring semester. Prerequisite: Senior standing. One hour.

297  Special Topics  Lectures, laboratories, readings, field projects, surveys, or research designed to provide specialized experience in horticulture, agronomy, soils, entomology, and integrated pest management. Prerequisite: Senior standing and/or permission. One to three hours.

Political Science (POLS)

COLLEGE OF ARTS AND SCIENCES

Professors Bryan, Burke, Cooper, Elliott, Kaufman, Mayer (Chairperson), Nelson, Taylor, Ventris, Wertheimer; Associate Professors Burgin, Feldman, Forrest, Gause, Gierzynski, Neal, Stavrakis, Zheng; Assistant Professors Beer, Gabel, Holmes.

The following courses (21, 41, 51, 71) may all be taken without prerequisite. Each course introduces students to a different subfield of political science.

21  American Political System  Institutions, processes, and problems of American government. Three hours.

29  American Civil Rights Movements  Examination of American racial discrimination; emphasis on strategies and actions of NAACP, SCLC, SNCC, Black Panthers, Nation of Islam, to end racial discrimination. Three hours.

41  Introduction to the Problems of Political Thought  Examination of basic problems in political philosophy, e.g. morality and law; punishment; freedom; equality; obligation and disobedience. Three hours.

51  Introduction to International Relations  Examination of the basic theoretical concepts in international relations. Introduces the student to systemic, domestic, and individual levels of analysis for assessing foreign policy decisions. Three hours.

71  Comparative Political Systems  Examination of political behavior, political structures, and political processes from a cross-national perspective. Three hours.

95, 96  Introductory Special Topics  Introductory courses or seminars on topics beyond the scope of existing departmental offerings. See Schedule of Courses for specific titles. Three hours.

All courses numbered 121–198 require sophomore standing and the appropriate core course.

121  Law and Politics  Examination of the U.S. courts focusing on the legal and political factors that influence court action, and judicial action that affects public policy. Prerequisite: 21. Three hours.

123  The Vermont Political System  Analysis of the political processes and institutions of governance in Vermont in the context of the federal system and other American states. Prerequisite: 21. Three hours.

124  The Presidency  The functions and activities of the president and staff. Prerequisite: 21. Three hours.

125  Political Parties  Analysis of political parties with special emphasis upon party realignment and reform, campaign techniques for nomination and election, and comparative party systems. Prerequisite: 21. Three hours.

126  Introduction to Public Administration  Introduction to study of public administration emphasizing such matters as organization, management, personnel, financial administration, and policy making in modern bureaucracies. Prerequisite: 21. Three hours.

127  The Congressional Process  Organization, procedure, and behavior of the chambers of the U.S. Congress. Prerequisite: 21. Three hours.

128  Issues of Public Policy  Analysis of selected problems of public policy, e.g. welfare, macroeconomic policy, regulation, energy, and housing. Prerequisite: 21, 41; Economics 11-12 strongly recommended. Three hours.

130  Political Leadership  Methods of identifying leaders, their relationships with nonleaders and with one another, their impact on public policy, and their personalities and social backgrounds. Prerequisite: 21. Three hours.

131  The U.S. Supreme Court: Process and Policy  The U.S. Supreme Court as one of the three major political institutions, including the selection process, intracourt politics, and dynamics of court decision making. Prerequisite: 21. Three hours.

132  Public Opinion and Political Participation  Theories and the empirical study of public opinion and political participation. Topics include: public opinion polling methodology, the origins of political outlooks, ideology, authoritarianism, generational politics, public opinion on race, voting behavior. Prerequisite: 21. Three hours.

133  Women in American Politics  Examines the intersections of race, gender, and class in shaping women’s participation in American politics and their approaches to public policy issues dealing with sex and gender. Prerequisite: 21 or one course in Women’s Studies. Three hours.

137  Politics and the Media  The role of the media in politics, including how media presentation and interpretation of events affect public opinion, political institutions, and public policy. Prerequisites: 21. Three hours.

138  Constitutional Law: Civil Liberties  Investigation of the Supreme Court’s interpretation of the First Amendment, rights of the accused, and the right to privacy. Prerequisite: 21. Three hours.

141, 142  History of Political Thought  First semester: Development of Western political thought from Plato to Aquinas. Second semester: Modern political thought from Machiavelli to Nietzsche. Prerequisite: 41. Three hours.

143  Philosophy of Law I  (Same as Philosophy 142.) Analysis of the nature of law, the relation between law and morality, obligation to obey the law, the judicial decision, responsibility in law, legal ethics. Prerequisite: 41 or Philosophy 1 or 3 or 4. Three hours.

144  Philosophy of Law II  (Same as Philosophy 143.) Problems of liberty, e.g. freedom of expression, privacy, paternalism; scope and limits of the criminal law; philosophy of punishment; selected problems in criminal justice. Prerequisite: 41 or Philosophy 1 or 3 or 4. Three hours.
146 Marxist Political Theory  Intellectual foundations of Marx’s thought, the development of Marx’s social and political theory, and the major strains and developments in Marxist political thought. Prerequisite: 41. Three hours.

149 Intermediate Political Theory  Intermediate courses on topics in political theory beyond the scope of existing departmental offerings. See Schedule of Courses for specific titles. Prerequisite: 41 or instructor’s permission. Three hours.

151 American Foreign Policy  Overview of the United States’ involvement with the world. Focuses on the domestic political, institutional, and ideological influences on the formation of policy. Prerequisite: 51. Three hours.

154 International Political Economy  Examination of the major theories in international political economy. Specific topics include trade, finance, development, foreign direct investment, and the multinational corporation. Prerequisite: 51 or Economics 11. Three hours.

155 Theories of International Relations  Examination of current debates in international relations: domestic/international interactions, conflict between the goals of security and the pursuit of wealth; coping with a changing world. Prerequisite: 51. Three hours.

156 War, Ethics, and Social Change  Examination of views of war and the conduct of war over time. State practices analyzed in light of international legal/normative perspectives and technological changes. Prerequisite: 51. Three hours.

Courses numbered 157–179 may be taken by Area and International Studies majors without political science prerequisite if the student has the appropriate area studies background.

157 International Politics of the Middle East  Formation and operation of the state system in the 20th century Middle East. Emphasis on Great Power involvement, Arab-Israeli issues, regional conflict, transitional ideologies. Prerequisite: 51. Three hours.

158 International Law: Conduct of War, War Crimes, and Genocide  Examination of international law’s applicability to conduct during war and whether it can be employed effectively. Prerequisite: 51. Three hours.

161 Political Geography  (See Geography 177.) Prerequisite: 51 or 71 or Geography 1 or 73.) Three hours.

168 Middle East Politics  State formation in the Middle East and problems it has occasioned. Review of modern history and examination of contemporary politics of several countries. Prerequisite: 71. Three hours.

170 Politics and Social Change in India  The evolution of democratic government in India and its capacity to address problems arising from colonialism, social diversity, and economic inequality. Prerequisite: 71. Three hours.

171 Western European Political Systems  A comparative examination of the British, German, and French political systems. Prerequisite: 71. Three hours.

172 Politics and Society in the Russian Federation  Examines the nature of politics and the development of post-Soviet social and economic institutions in Russia. Prerequisite: 71. Three hours.

173 Canadian Political System  Institutions, process, and problems of the Canadian polity. Prerequisite: 71. Three hours.

174 Latin American Politics  Comparative examination of selected Latin American political systems. Prerequisite: 71. Three hours.

175 Government and Politics of China  Institutions, processes, and problems of government of China. Prerequisite: 71. Three hours.

177 Political Systems of Tropical Africa  Development of differing political systems in African countries located south of the Sahara and north of South Africa. Prerequisite: 71, or one course in African Studies. Three hours.

179 Women, the State and Development  An examination of the impact of national development on women in Third World countries with attention to the relationship between class and gender. Prerequisite: 71. Three hours.

181 Fundamentals of Social Research  (Same as Sociology 100.) Introduction to research methods in social science. Includes examination of research design, measurement, data collection, data analysis, and the presentation and theoretical interpretation of research findings. Prerequisite: One core course. Four hours.

191, 192 Internships

195, 196 Intermediate Special Topics  See Schedule of Courses for specific titles.

197, 198 Readings and Research

All courses numbered 222–298 require: (1) junior or senior standing, (2) completion of at least three core courses including the specified core course; (3) completion of three hours at the 100 level or a specified 100-level course, or instructor’s permission.

222 Constitutional Law II  Selected topics in constitutional law. Prerequisite: 221. Three hours.

223 The American Bureaucracy  An examination of the history, current structure, politics, behavior, reform, and accountability of the American federal bureaucracy. Prerequisite: 126. Three hours.

224 State Administration  Problems in planning, policy development, and program coordination. Prerequisite: 126. Three hours.

225 Intergovernmental Relations  Problems of the federal system. National-state-local cooperative administration of selected public functions. Prerequisites: 21, three hours at 100 level. Three hours.

226 Topics on the Presidency  Further study of the executive branch and its operations. Selected topics, e.g. presidential decision making; White House staffing and operations, congressional-executive relations. Prerequisite: 124. Three hours.

227 Topics in Public Administration  The political problems of the administrative state. Prerequisite: 126. Three hours.

228 Congress and Foreign Policy  Congress’s role in foreign policy making, emphasizing congressional action in the post-Vietnam period. Prerequisites: 21, three hours at 100 level. Three hours.

229 Seminar in American Politics  Three hours.

232 Comparative State Politics  Politics, policy, and institutions of state governments of the U.S.; techniques for comparative analysis of these aspects of politics. Prerequisite: 21, three hours at 100 level. Three hours.

233 Big Business and Democracy  The role of big business in American democracy. Reading of great works in democratic theory and works on business politics. Prerequisite: 21, 100-level course in Political Science. Three hours.

241 Justice and Equality  (Same as Philosophy 242.) Examination of contemporary normative theories of distributive justice and equality. Prerequisites: 41, or Philosophy 1 or 3 or 4, three hours at 100 level. Three hours.

242 American Political Thought  American political thought from the colonial period to recent times. Prerequisites: 41, three hours at 100 level. Background in American history recommended. Three hours.

243 Democratic Theory  The nature of democracy. Both contemporary debates within democratic theory and the classical sources of democratic theory are examined. Prereq-
249 Seminar in Political Theory Three hours.

250 Evolution of the International System Examines the effects of technological changes on both economic and security issues leading to the evolution of the structure of the international system over time. Prerequisites: 51 or three hours at the 100 level. Three hours.

251 Foreign Policy of the Newly Independent States Examines the development of foreign relations of post-Soviet states, with a special focus on Russia and the post-Communist era. Prerequisites: 51, or three hours at 100 level. Three hours.

257 Politics of European Integration Survey of the European Union including historical development, public opinion, governmental institutions, internal policies, external relations, and future prospects. Prerequisites: 51, or 71 plus three hours at the 100 level; or appropriate International Studies background. Three hours.

258 Causes of War Examination of various theories explaining the outbreak of war, with applications to historical cases. Prerequisites: 51, three hours at the 150 level. Three hours.

259 Seminar in International Relations Three hours.

260 War, Strategy, and Politics The domestic, international, and geopolitical factors determining states’ choice of strategies and tactics in interstate conflicts and confrontations. Contemporary and historical examples. Prerequisites: 51, three hours at the 150 level. Three hours.

261 Topics in American Foreign Policy In-depth examination of selected topics related to the making and implementation of U.S. foreign policy. Prerequisites: 51, three hours at the 150 level. Three hours.

263 Third World Foreign Policy The particular security and political economic challenges facing states in the process of nation-building in Latin America, Africa, Middle East, South Asia, Southeast Asia. Prerequisites: 51, three hours at the 150 level. Three hours.

264 U.S.-China Relations Examination of the historical context and various causes of the recurring tensions and unresolved issues in U.S.-China relations since 1945. Prerequisites: 51, one 100-level course. Three hours.

265 East Asian Political Economy Examination of the historical, political, economic, and international factors for the rise of East Asia since the Second World War. Prerequisites: 51 or 71, one 100-level course. Three hours.

272 Eastern European Political Systems Examination of Eastern European political systems with emphasis on the role of ethnic conflict and Marxist-Leninist ideology. Prerequisites: 71, three hours at 100 level. Three hours.

276 British Politics Topics include the role of the citizenry; the character of political and governmental institutions; and policy making in particular fields. Northern Ireland is also covered. Prerequisites: 71 plus three hours at the 100 level; or appropriate International Studies background. Three hours.

277 Comparative Ethno-Nationalism Ethnicity and nationalism in Europe, Asia, and Africa. Political, historical, social, and economic factors are examined comparatively. Prerequisites: 71, three hours at the 100 level. Three hours.

278 The Politics of Church and State Relationships between church and state in the western Christian tradition. Case studies from Europe and North America are examined to analyze different constitutional-political patterns. Prerequisite: 71, a 100-level Political Science course. Three hours.

279 Seminar in Comparative Politics Three hours.

284 Public Opinion: Theory and Research I (Same as Sociology 241). Prerequisite: 181 or Sociology 100. Three hours.

285 Public Opinion: Theory and Research II (Same as Sociology 242). Prerequisite: 284 (Sociology 241). Three hours.

*Credit not given for both 284 and Sociology 241 or both 285 and Sociology 242.

293 Senior Honors Seminar I Examination of major contemporary research topics in political science. Prerequisites: Admission by invitation only. Three hours. (Not offered for graduate credit.)

294 Senior Honors Seminar II Tutorial format centered on individual student research projects and a comprehensive examination. Prerequisite: 293. Three hours. (Not offered for graduate credit.)

295, 296 Advanced Special Topics Advanced courses or seminars on topics beyond the scope of existing departmental offerings. See Schedule of Courses for specific titles.

297, 298 Readings and Research For advanced undergraduate and graduate students. Three hours.
121 Biopsychology. Biological bases of behavior: classical and contemporary issues, including introduction to nervous system, behavioral effects of drugs, chemical bases of behavioral disorders. Prerequisite: 1 or Biology 1. Three hours.
130 Social Psychology. An introduction to concepts and methods used to study the behavior of individuals in various social situations. Prerequisite: 1. Three hours.
132 Environment and Behavior. Introduction to Environmental Psychology. Major subareas of this field are discussed as they relate to the interaction between the behavior of individuals and the environment. Prerequisite: 1 or course in environmental studies. Three hours. Summer only.
139 Social Psychology Application and Facilitation. Explores and builds on cognitive, motivational, and group process foundations of the approach used in 130 for applying academic content. Prerequisite: 130, permission of department. Intended for group facilitators for 130. Three hours.
152 Abnormal Psychology. Describing and defining abnormal behavior; models of etiology; research evidence for biological and social models; methods of intervention and prevention. Prerequisite: 1. Three hours.
161 Developmental Psychology: Childhood. Survey of research and theories on child development from conception to adolescence emphasizing experimental analyses of early social and cognitive development. Prerequisite: 1. Three hours.
163 Psychology of Mass Communication. Survey of theory and research concerning mass media effects in children's socialization, information diffusion, and in shaping values, behaviors regarding health, politics, consumer choices, and environment. Prerequisite: 1 or instructor's permission. Three hours.
195, 196 Intermediate Special Topics. Intermediate courses or seminars on topics beyond the scope of existing departmental offerings. See Schedule of Courses for specific titles.
197, 198 Research. Individual research under staff direction. Prerequisite: Departmental permission. Three to six hours.
205 Learning. Analysis of theory and research on the basic learning process and behavior. Prerequisite: 109. Three hours.
206 Motivation. Theory and research on motives, including hunger, fear, sex drive, and addiction, their influence on behavior, relationship to other psychological processes, and biological correlates. Prerequisite: 109. Three hours.
207 Thinking. Survey of cognitive psychology, examining theory and research on perception, memory, language, cognition, and their interactions. Prerequisites: 109. Three hours.
208 Cognition and Language. (See Communication Sciences 208.)
215 Cognition and Aging. (See Communication Sciences 215.)
220 Animal Behavior. Behavior of animals under controlled experimental conditions and in their natural environments. Consideration of evolution, development, function, and control of behavior. Prerequisite: 109 or Biology 102. Three hours.
221 Physiological Psychology I. Structure and function of mammalian nervous system, emphasizing neurological correlates of sensory experience and perception. Individual laboratory experience. Prerequisite: 109. Four hours.
222 Selected Topics in Behavioral Neuroscience. Selected topics examining the role of the central nervous system in determining behavior, including innate behaviors, arousal, motivation, learning, and memory. Prerequisite: 121 or 221. Three hours.
223 Psychopharmacology. Effects of drugs (both medical and recreational) on behavior. Topics such as drug effects on learning, memory, motivation, perception, emotions, and aggression. Prerequisites: 109, 121 or 222. Three hours.
230 Advanced Social Psychology. Advanced survey of current research on the behavior of individuals in social situations. Prerequisite: 109 or 130. Three hours.
231 Psychology of Women. Psychological theories about women and research on women's roles. Biological, personal- ity, cognitive, and developmental factors considered. Prerequisite: One psychology course at the 100 level. Three hours.
233 Psychology of Experience and Creativity Enhancement. Explores psychological processes for developing creative thinking and for enhancing the quality of conscious experience. Emphasizes personal growth as well as theoretical understanding. Prerequisite: Advanced background in at least one relevant field (such as psychology, environmental studies, art, or education). Three hours.
234 Psychology of Social and Environmental Change. Examines psychological foundations for beneficial changes in social and physical environments. Emphasizes action strategies and projects as well as utopian visions. Prerequisite: Advanced background in psychology or in environmental studies or a social science. Three hours.
235 Psychology of Art. Exploration of key psychological processes involved in creating and experiencing all forms of art; participants also conduct a research project in an area of interest. Prerequisite: Strong background in Psychology and/ or Art. Three hours.
236 Theories of Human Communication. Study of the role of perception, human information processing, language, nonverbal codes, meaning, cognition, and interpersonal and sociocultural context in human communication process. Prerequisite: 109 or 130. Three hours.
237 Cross-Cultural Communication. Study of cultural factors, cognitive processes, communication patterns, and problems in cross-cultural communication; role of communication in development and social change in third world countries. Prerequisites: 109 or 130 or 230; other advanced background in education or a social science. Three hours.
239 Advanced Social Psychology Application and Facilitation. Explores psychological foundations of approach used in 130 for applying academic content. Involves research and readings beyond work for 139. Prerequisite: 139, or 12 hours of psychology and department permission. Intended for 130 group facilitators with advanced psychology background. Three hours. (Not offered for graduate credit.)
240 Organizational Psychology. Study of the psychological impact of macro and micro features of organizations upon leadership, decision making, workforce diversity, group process, conflict, and organizational performances. Prerequisite: 109, or instructor’s permission. Three hours.
241 Organizational Psychology: Global, Cultural, and Local Forces. Study of global, cultural, and local dynamics upon organizational culture, leadership, workforce diversity, ethics and justice at work, and conflict resolution. Conducts applied organizational cultural analysis. Prerequisites: 109, or instructor’s permission. Three hours.
250 Introduction to Clinical Psychology. Study of basic principles of interviewing, testing, assessment from life situations, and report writing. Examination of the most common approaches to psychotherapy. Prerequisites: 109, 152. Three hours.
251 Behavioral Disorders of Childhood. An overview of theory, research, and practice in developmental psychopathology from infancy through adolescence. The major disorders of social and emotional development reviewed.
252 Psychology of Group Interaction Participants meet as an interactive group that examines its own dynamics and relationships through discussion, readings, and written assignments. Prerequisites: 152 or 250, junior or senior standing, and instructor’s permission. Three hours.

253 Advanced Behavior Modification Application of techniques for the modification of human behavior in a variety of educational and social situations involving the collection and analysis of behavioral data. Prerequisites: 109, 152. Three hours.

254 Primary Prevention and Mental Health Promotion An examination of empirical approaches to prevention of mental and emotional disorders; history of public health methods; sources of support and opposition to prevention efforts. Prerequisites: 109, 152. Three hours.

255 Introduction to Health Psychology Psychology of the cause, treatment, and prevention of physical illness and disability. Topics include: stress, health behavior, medical compliance, patient-provider relationships, coping with illness. Prerequisite: 109 or advanced standing in Allied Health Sciences. Three hours.

257 Personality The understanding of personality development and human behavior from a psychoanalytic, humanistic, trait measurement, and sociocultural perspective. Prerequisites: 109. Three hours.

258 Workshop in Primary Prevention Meet with specialists in primary prevention of psychological problems and promotion of mental health to examine research, theory, and preventive interventions promoting psychological well being. Prerequisites: Three psychology courses at 100 level or higher or related advanced professional training by permission of instructor. Three hours. Summer only.

259 Chemical Dependency: Etiology and Treatment Development (self, family, trauma) and resolution of chemical dependency. Cognitive-behavioral, psychoanalytic, systemic, and eclectic orientations. Experiential psychotherapy techniques and project required. Prerequisites: Senior or graduate status or degree in clinical fields. Three hours.

261 Cognitive Development Examination of research and theory concerning developmental changes in the human processing of information from infancy to adulthood centered around the work of Piaget. Prerequisite: 109 or 161 (109 may be taken concurrently). Three hours.

262 Social Development Examination of theory and research concerning interpersonal development in humans from infancy through adulthood. Relationships between language, cognition, and social development emphasized. Prerequisite: 109 or 161 (109 may be taken concurrently). Three hours.

263 Disabilities of Learning and Development Seminar in etiology, treatments, prevention of developmental and learning disabilities within framework of current service and educational practices. Effectiveness, ethical, legal, psychological issues examined. Prerequisite: One 100-level psychology course or advanced standing in Psychology, Education, or Physical Therapy. Three hours.

265 Infant Development Biological, cognitive, and social aspects of infant development in context; opportunities to evaluate and design research and apply knowledge to parenting, prevention, and social policy. Prerequisites: 109, 161 (may be taken concurrently), or comparable. Three hours.

266 Communication and Children Study of the role of communication, especially television, in cognitive and social development from preschool to adolescence. Relationship between television violence and abnormal behavior examined. Prerequisite: 109 or 161 or 163. Three hours.

268 Psychology of Adult Development and Aging Psychological development in the final third of the life span emphasizing theory and research concerning social, cognitive, perceptual, and mental health transitions and support interventions. Prerequisites: 1, and Sociology/Nursing/Early Childhood and Human Dev. 20 or Early Childhood and Human Dev. 195/295 or permission. Three hours.

269 Cross-Cultural Psychology: A Clinical Perspective Introduction to issues posed for psychologists in their work with ALANA (African, Latino/a, Native and Asian American) and international populations. Critical appraisal of readings, research and case studies. Prerequisites: PSYC 1, 109. Three hours. Crosslisting: ALANA 269.

295, 296 Advanced Special Topics See Schedule of Courses for specific titles.

HONORS – ARTS AND SCIENCES

248, 249 Honors/Psychology Contact Department for specific requirements. Three hours each.

Public Administration (PA)

COLLEGE OF ARTS AND SCIENCES / DEPARTMENT OF POLITICAL SCIENCE / MASTER OF PUBLIC ADMINISTRATION PROGRAM

Primary Program Faculty: Professors Lawson, Cooper, Venti; Affiliated Program Faculty – UVM: Professors Bryant, Burke, Hindes, Meyer (ex officio), Patterson, Wolff; Affiliated Program Faculty – Adjunct – Professors Meier, Salmon; Affiliated Program Faculty – Visiting Professors Campbell, Lane.

Contact the MPA Office, (802) 656-2606, for information on the Accelerated Masters Program in Public Administration (AMP-PA).

206 Introduction to Contemporary Public Affairs Contemporary policy issues including government and the economy, the role of leadership, ethical and moral issues in public policy, and other contemporary issues impacting society. Prerequisites: Economics 11, 12, or equivalent recommended. Three hours.

Radiation Therapy

See Biomedical Technologies.

Recreation Management (RM)

SCHOOL OF NATURAL RESOURCES

Professor Manning (Program Chair); Associate Professors Hudspeth, Kuentzel, Stokowski; Lecturer Kaufman; Adjunct Assistant Professor Mitchell.

1 Introduction to Recreation Management Introduction to the broad field of outdoor recreation and tourism, including history, philosophy, current issues, career opportunities, and the Recreation Management Program. One hour.

30 National Parks of the U.S. The natural beauty and unique phenomena of our National Parks are emphasized. Historical development and current problems are cited. Credit not granted for both 30 and Natural Resources 2.

50 Tourism Planning Examination of tourism including its economic, environmental, and social effects. Emphasis on planning to maintain the integrity of tourist regions. Three hours.
138 Park and Recreation Design Recreation design methodology applied to the design of public and private recreational facilities. Four hours.

152 Forest Resources Values (See Forestry 152, Resource Economics 152.)

153 Recreation Administration and Operations Administration and operation of outdoor recreation agencies and businesses. Special emphasis on recreation administrative structures, personnel management, and maintenance of parks and outdoor recreation areas. Prerequisites: Junior or senior standing. Three hours.

157 Ski Area Management An analysis of current management problems affecting private ski areas in Vermont and the Northeast. Prerequisites: Junior or senior standing. Three hours. Alternate years.

158 Resort Marketing and Management Study of the management of year-round resort facilities. Emphasis on resort marketing, internal support functions, and associated recreational facilities. Prerequisites: Junior or senior standing. Three hours.

160–161 Parks and People I, II A Living/Learning Center Program. Consideration of impacts of recreation on the environment. Discussion of the operation of the Vermont State Park System. Credit for 160 will not be granted until 161 has been successfully completed. Two hours.

181 Junior Recreation Seminar Seminars on current issues in the field of public and private outdoor recreation management. Prerequisites: Junior standing in Recreation Management. One hour.

188 Special Topics Independent study. Prerequisites: Junior standing, permission. One-half to three hours.

191 Recreation Management Practicum Supervised field experience in national, state, urban, or private park and recreation operations. Prerequisite: Junior or senior standing in Recreation Management. One to six hours.

230 Ecotourism Study of nature-based travel emphasizing international destinations. Examination of ecotourism as a tool for preservation and economic development. Prerequisites: Junior or senior standing. Three hours. (Not offered for graduate credit.)

235 Outdoor Recreation Planning Planning large land areas for outdoor recreation use. Emphasis on the planning process relative to the leisure time use of natural resources. Prerequisites: Advanced standing in Recreation Management or permission. Three hours.

240 Park and Wilderness Management History, philosophy, and management of wilderness, national parks, and related areas. Prerequisite: Junior or senior standing in Recreation Management. Three hours.

255 Environmental Interpretation Philosophy, principles, and techniques of communicating environmental values, natural history processes, and cultural features to recreation visitors through the use of interpretive media. Prerequisite: Advanced standing in Recreation Management or permission. Four hours.

258 Entrepreneurship in Recreation and Tourism Study of entrepreneurial theories, concepts, and practices and their application to recreation and tourism. Emphasis on preparation of individual business plans. Prerequisites: Junior or senior standing in Recreation Management or permission. Three hours. (Not offered for graduate credit.)

282 Senior Recreation Seminar Seminars on current issues in the field of public and private outdoor recreation management. Prerequisites: 182, senior standing in Recreation Management. One hour. (Not offered for graduate credit.)

299 Recreation Management Honors Honors project dealing with management of outdoor recreation and tourism. Prerequisite: By application only; see program chair. Three to six hours.

Religion (REL)

COLLEGE OF ARTS AND SCIENCES
Professors Martin, Paden (Chairperson), Sugarmann; Associate Professors Clark, Trainor; Assistant Professors Chen, Uddin.
Religion 20, 21, 22, 23, and 27 all address basic questions about the nature and interpretation of religion and about ways of understanding the religious expressions of other historical and cultural worlds. Credit will be given only for two courses at the introductory level (20–27). Credit will be given for only one from Religion 22, 23, 27.

20 Introduction to the Study of Religion: Comparative Study of patterns and differences in religious life; selected comparisons of Asian, Western, and tribal religions. Three hours.

21 Introduction to the Study of Religion: Asian Traditions Study of the Hindu, Buddhist, and East Asian religious traditions as expressed in their basic symbolism, writings, practices, and cultural forms. Three hours.

22 Introduction to the Study of Religion: Western Traditions Study of the basic motifs, mythic patterns, and historical transformations in religious life from the ancient Near East to the modern West. Three hours.

23 Introduction to the Study of Religion: Bible Study of religious expressions as exemplified in biblical and related texts. Three hours.

27, 28 Introduction to the Study of Religion: Integrated Humanities Study of religious and philosophical thought in Western culture from Hebraic and Greek antiquity to the present. Prerequisites: Concurrent enrollment in Integrated Humanities Program, English 27, 28 and History 27, 28. Three hours.

80 Religion and Race in America Historical survey of forms of African-American religion in the U.S. in their relation to slavery, segregation, and civil rights; current issues in education and cultural diversity. Three hours.

95, 96 Introductory Special Topics See Schedule of Courses for specific titles.

100 The Interpretation of Religion Examination of major theories and methods used in studying and interpreting religious phenomena. Prerequisite: Three hours in religion. Three hours.

101 The Social Dimension of Religious Life Comparative study of communal forms of religious life, such as cosmic state, monasticism, sect, caste and denomination, from a variety of cultures—Eastern, Western, tribal, and modern—with a concern for their meanings as fundamental forms of religious expression. Prerequisite: Three hours in religion or sociology. Three hours.

104 Mysticism, Shamanism, and Possession Comparative study of ways in which the inward dimension of religious life finds expression. Prerequisite: Three hours in religion. Three hours.

108 Myth, Symbol, and Ritual Study of patterns and significance of myth and ritual as they appear in cross-cultural perspective, with reference to contemporary interpretations of symbol and language. Prerequisite: Three hours in religion. Three hours.

109 Ritualization: Religion, Body, and Culture A cross-cultural examination of ritual strategies for integrating personal and social experience, with attention to various theories and types of religious ritual. Prerequisites: Three hours in religion. Three hours.
111 Foundations of Western Religious Thought  Study of ways in which Western religious thinkers—in both Greek and Biblical traditions—have expressed and responded to philosophical-theological questions about human existence, world, and God. Prerequisite: Three hours in religion. Three hours.

114 Hebrew Scriptures  Study of the history and writings of the Hebraic-Judaic religion to the first century B.C. Prerequisite: Three hours in religion. Three hours.

116 Judaism  Investigation of sustaining rituals, customs, institutions, and beliefs of normative Judaism. Prerequisite: Three hours in religion. Three hours.

122 Christian Origins  Historical study of the first four centuries of Christianity in its sociocultural context, including consideration of New Testament texts. Prerequisite: Three hours in religion. Three hours.

124 Christianity  Historical study of the Christian tradition examining major religious movements of early, medieval, and Reformation Christianity, and the spirituality of Christians during these periods. Prerequisite: Three hours in religion. Three hours.

128 Religion in America  Study of the relationship between religion, the cultural ethos, and identity in America. Prerequisite: Three hours in religion. Three hours.

130 Islam  Overview examining doctrines and practices of Muslims and their religious institutions from the rise of Islam to the present. Prerequisite: Three hours in Religion. Three hours.

131 Studies in the Hindu Tradition  Selected writings, rituals, and developments in the Hindu tradition with reference to cultural assumptions of India. Prerequisite: Three hours in religion. Three hours.

132 Buddhism in India and East Asia: Classical and Mahayana Texts and Teachings  A study of early and Mahayana Buddhist thought and of some developments of Mayahana in China and Japan. Prerequisite: Three hours in religion. May be taken for credit after Religion 134 only with prior permission of instructor. Three hours.

134 Buddhism in Sri Lanka: Elite and Popular Interactions  An examination of Theravada Buddhist belief and practice in the context of Sri Lankan culture, with attention to lay and monastic interaction. Prerequisite: Three hours in religion. May be taken for credit after Religion 132 only with prior permission of instructor. Three hours.

141 Religion in Japan  An examination of Japanese values as expressed in folk, Shinto, and Buddhist traditions, and in social structures, aesthetic pursuits, or business practices. Prerequisite: Three hours in religion. Three hours.

145 Religion in China  Examination of Classical, Confucian and Taoist thought through texts in translation, developments in these traditions, and interactions with folk religion and Buddhism in the premodern period. Prerequisite: Three hours in religion. Three hours.

148 Contemporary Spiritual Life  Study of human involvement with the spiritual as manifested in contemporary religious groups, or in modern theory and practice of meditation. Prerequisite: Three hours in religion. Three hours.

173 Studies in Gender and Religion  Selected topics focusing on the social and religious construction of gender and the shape of women’s religious lives. Religious traditions studied vary by semester. Prerequisite: Three hours in religion. Three hours. May be repeated up to six hours.

180 Moral and Religious Perspectives on the Holocaust  A study of the Holocaust in relation to questions of moral responsibility, justice, guilt, and human suffering, focusing on Jewish responses. Prerequisites: 3 hours in REL or HIST 190 or permission of instructor. Three hours.

195, 196 Intermediate Special Topics  Intermediate courses or seminars on topics beyond the scope of existing departmental offerings. See Schedule of Courses for specific titles.

197, 198 Readings and Research  Variable credit.

201 Senior Seminar  Selected contemporary issues in theory and interpretation; preparation and presentation of individual senior projects. Prerequisites: Twelve hours in religion, including 100 and six hours at the intermediate level, senior standing. Three hours. Spring.

214 Studies in Judaica  Selected topics of concentration emerging out of and related to the study of normative Judaism, e.g. the prophetic faith, Rabbinic Judaism, Hasidism, and Jewish mysticism. Prerequisite: Nine hours in religion, with three hours at the intermediate level (116 recommended). Three hours. May be repeated up to six hours. (Not offered for graduate credit.)

224 Studies in Christianity  Examination of selected issues, movements, periods, or individuals within the Christian tradition. Prerequisite: Nine hours in religion (122, 124, or 173 recommended). Three hours. May be repeated up to six hours. Three hours.

226 Studies in Hellenistic Religion  Study of religion in the Mediterranean area during the period from the 4th century B.C. though the 4th century A.D. including Christian origins. Prerequisite: Nine hours in religion, with three hours at the intermediate level. (Not offered for graduate credit.)

228 Studies in Western Religious Thought  Important figures, issues, movements, or texts examined. Prerequisite: Nine hours in religion, with three hours at the intermediate level. Three hours. May be repeated up to six hours. (Not offered for graduate credit.)

230 Studies in Islam  Topics varying by semester such as Women and Islam, Sufi (mystical) traditions, Shi’ite Islam, Islam and the West, and South Asian Muslim Cultures. Prerequisites: Nine hours in Religion, with three hours at the intermediate level (130 recommended). Three hours.

240 Studies in Asian Religions  Concentrated studies in the history, life, or thought of a selected Asian religious tradition. Prerequisite: Three hours in religion at intermediate level in the same religious traditions. Three hours.

259 Religion and Secular Culture  Comparison of religious and secular systems of meaning, value, and practice. Prerequisite: Nine hours in religion, with three hours at the intermediate level. Three hours. (Not offered for graduate credit.)

280 Symbol and Archetype  Study of the work of C.G. Jung and the Jungian circle as it bears upon the interpretation of religion and as it represents a 20th century religious quest. Prerequisite: Nine hours in religion, with six hours at the intermediate level. Three hours. (Not offered for graduate credit.)

291, 292 Topics in the History and Phenomenology of Religion  Prerequisites: Nine hours in religion, with six hours at the intermediate level, junior standing. Three hours. May be repeated up to six hours.

297, 298 Interdisciplinary Seminar  Student-faculty workshop on a topic of current interest, employing resources from various disciplines. Prerequisites: Nine hours in religion, with six hours at the intermediate level, junior standing, instructor’s permission. Three hours. (Not offered for graduate credit.)

HONORS – ARTS AND SCIENCES

250, 251 Honors/Religion  Contact Department for specific requirements. Three hours each.
Romance Languages

See French, Italian, Spanish.

Russian (RUSS)

COLLEGE OF ARTS AND SCIENCES
Prof. McKenna; Associate Prof. Nalibov; Lecturer Nazarov.

The first two semesters of a foreign language are excluded from the 45-hour limit on courses from a single department that can be counted toward the 122 hours required for the Bachelor of Arts degree.

1, 2 Elementary Russian An introduction to all aspects of contemporary standard Russian: speaking, listening, reading, writing. Cultural components include topics such as music, art, literature, and current events. No previous knowledge of Russian needed for 1. Four hours each course.

51, 52 Intermediate Russian Continued practical work in all language skills (speaking, listening, reading, writing), with more analysis of the structure of Russian. Continuation of cultural components. Prerequisite: 1, 2. Four hours each course.

95, 96 Introductory Special Topics See Schedule of Courses for specific titles.

101 Phonology Practical work on Russian intonation, element order, and phonetics, using primarily Russian materials. Classroom and language laboratory work. May be taken together with 52. Prerequisite: 52 or concurrent enrollment in 52. Three hours.

121, 122 Composition and Conversation Continued practical work on all four language skills. Emphasis on oral and written self-expression. Presentations and compositions based on Russian-language media and literature. Prerequisite: 52. Three hours.

141 Reading Comprehension Development of contextual strategies for reading authentic texts on a number of content areas, primarily expository texts from Russian newspapers, magazines, historical and scientific documents. Prerequisite: 52. Three hours.

142 Listening Comprehension Intensive directed aural work with authentic Russian-language media (especially television, radio, and films), supplemented by work on vocabulary development and listening strategies. Prerequisite: 52.

161 Russian Lexicology Study of Russian word roots and derivational morphology to increase vocabulary recognition and retention, building on correspondences with English/Latinic equivalent roots where possible. Prerequisite: 52. Three hours.

195, 196 Intermediate Special Topics See Schedule of Courses for specific titles.

197, 198 Readings and Research

201 Survey of Russian Literature Readings and discussions about Russian literature to the rise of modernism. Particular attention to the social and historical context of the 19th century novel. Prerequisites: 52, WLIT 118 recommended. Three hours.

202 Survey of 20th Century Russian Literature Readings and discussions about Russian literature from the rise of modernism to present. Particular attention to function of literature in Soviet society. Prerequisites: 52, WLIT 118 recommended.

221 Culture and Civilization to the 1905 Revolution Social, cultural, and political institutions from the time of Peter the Great to the 1905 revolution. Particular attention to Russian music, art, and literature. Prerequisite: 52. Three hours.

222 Culture and Civilization in the 20th Century Social, cultural, and political institutions from the 1905 revolution to the present. Particular attention to tensions between official and unofficial culture during the Soviet period. Prerequisite: 52. Three hours.

251 Russian News Media Analysis of journalistic style and content in news coverage of contemporary events as reported in Russian newspapers and radio and television broadcasts. Prerequisites: 52, 141 or 142 recommended. Three hours.

271 Slavic Linguistics The linguistic prehistory of Slavic. Linguistic history of the Russian language: introduction to Old Church Slavic and Old Russian, tracing Slavic declensional development. Prerequisite: One 100-level Russian course or instructor’s permission. Three hours.

281 Seminar on a Selected Literary Genre or Period Study of a literary genre or period through close readings of representative texts supplemented by lectures and reports on sociocultural context. May be repeated. Prerequisite: One 100-level Russian course. Three hours.

282 Seminar on a Selected Author or Authors Study of author(s) through close readings of representative texts supplemented by lectures and reports on the works’ sociocultural context. May be repeated. Prerequisite: One 100-level Russian course. Three hours.

WORLD LITERATURE

18 Russian Literature in Translation Topics such as Russian author(s) (e.g. Dostoevsky, Tolstoy), genre (e.g. the Russian novel), literary school (e.g. Russian Formalism), or period (19th or 20th century literature). Three hours.

118 Russian Literature in Translation Topics such as Russian author(s) (e.g. Dostoevsky, Tolstoy), genre (e.g. the Russian novel), literary school (e.g. Russian Formalism), or period (19th or 20th century literature). Prerequisite: Sophomore standing. Three hours.

HONORS – ARTS AND SCIENCES

252, 253 Honors/Russian Contact Department for specific requirements. Three hours each.

Russian and East European Studies

COLLEGE OF ARTS AND SCIENCES
Prof. Nalibov, Director.

The following courses are among the course offerings: Economics 11, 12, 185, 277, 281; History 27, 137, 138, 237, 238; Political Science 172, 272; Russian 52; World Literature 18, 118.

Social Work (SWSS)

COLLEGE OF EDUCATION AND SOCIAL SERVICES
Professors Barford, Prodaci-Whitcomb, Within; Associate Professor Dewees, Roche; Assistant Professors Comerford, Patterson, Solomon; Lecturers Barna, Heading-Grant, Larson, More, Pugh, Richards, Shidmore-Taylor, Widrick.

2 Foundations of Social Work An introduction to the profession of social work, its functions, values, knowledge, and the problems it addresses. Three hours.
3 Human Needs and Social Services  Students provide volunteer service in a human service agency, relate observations to theory about clients, agency structure, programs, and operations, and assess their commitment to the profession of social work.  Prerequisite: 2 or instructor’s permission. Three hours.

5 Biosociopolitical Issues in Social Work  Outlines human body organ systems and extrapolates to the sociopolitical. Bioethical dilemmas, environmental racism, and multiple chemical sensitivity studied from a social work perspective. Three hours.

7 Quantitative Methods in Social Work Research  Introduction to statistics and social work research methods. This course introduces students to quantitative methodology in research and practice. Three hours.

47 Human Behavior in the Social Environment I  Introduction to life-span development from birth to death. There is a primary focus on the individual. Prerequisites: 2, 3, or instructor’s permission. Three hours.

48 Human Behavior in the Social Environment II  A systems approach to understanding various levels of social organization; for example, families, groups, organizations, and communities.  Prerequisite: 47. Three hours.

55 Special Topics  Designed so that its content and structure may accommodate special issues not especially appropriate within the boundaries of an existing course. Open to first-year students. Two to six hours.

164 Introduction to Social Work Research  Introduction to models and methods of social research from a social work perspective. Prerequisites: 2, 3, 47, 48 or permission. Three hours.

165 Issues and Policy in Social Welfare I  An introduction to economic, political, historical, and social forces that influence the development and implementation of social welfare policy. Prerequisites: 2, 3, 47, 48 or permission. Three hours.

166 Issues and Policy in Social Welfare II  In-depth examination of social welfare policy and accompanying social services in the U.S.; major policy analysis models presented and used. Prerequisites: 165 or permission. Three hours.

167 Racism and Contemporary Issues  Study of perception, conceptualization, and comprehension of racism. Strategies, techniques, and procedures to identify and decrease many facets of racism. Three hours.

168 Social Work Intervention I  Social work theory and practice methods employed by social workers in providing services to individuals and small groups. Prerequisite: Social Work major, senior standing or permission. Three hours.

169 Social Work Intervention II  Social work theory and practice methods employed by social workers in providing services to families, organizations, and communities. Prerequisites: Social Work major, 168, senior standing or permission. Three hours.

171,172 Field Experience Seminar  Weekly integrative seminar; discussion of practice within field agency. Prerequisite: Concurrent enrollment in 173/174. Three hours each.

173,174 Field Experience  Field experience under BSW or MSW supervision in social service agencies four days each week. Taken concurrently with 171/172. Prerequisites: Social Work majors, senior standing. Six hours each.

197 Readings and Research  Prerequisite: Social Work major. Pre-arrangement only. Variable credit, one to four hours.

228 Aging: A Strengths & Human Rights Perspective  An examination of aging for social work policy and practice from the perspectives of strengths, social justice, human rights and critical social constructionism. Three hours. Undergraduate/graduate credit.

295 Laboratory Experience in Social Work  Supervised field work designed to give students experience in specialized areas for their professional development. Pre-arrangement only. Credit as arranged.

296 Social Work in a Global Context  Study of social work issues in different parts of the world. Located at the University of Lapland in Finland. Prerequisites: Background in human services or social work major or MSW standing and permission of instructor. Three hours. Undergraduate/graduate credit.

Sociology (SOC)

COLLEGE OF ARTS AND SCIENCES

Professors Culler, Danigelis, Mintz (Chairperson), Smith; Associate Professors Drouf, Fengler, Fiskman, Fox, Kahn, Krymkowski, McCann, Schmidt (CALS), Streeter; Assistant Professors Jones, Kuebler, Moore, Strickler; Lecturer Cowan.

1 Introduction to Sociology  Fundamental principles and problems in the sociological analysis of the structure and dynamics of modern society. Three hours.

11 Social Problems  Introduction to sociology through detailed examination of a selected number of major structural problems characteristic of contemporary societies. Problems treated may vary. Three hours.

14 Deviance and Social Control  Analysis of the causes and consequences of social behavior that violates norms. Examines patterns of deviant socialization and social organization and forms of deviance control. Three hours.

19 Race Relations in the U.S.  Analysis of racial prejudice, discrimination, and other dominant group practices directed toward Native, Asian-, and African-Americans and their social movements for integration, accommodation, and separatism. Three hours.

20 Aging: Change and Adaptation  (Same as Nursing 20 and Early Childhood and Human Development 20/Education) Individual and social meanings of aging and old age; physical, physiological, psychological, and sociological changes accompanying aging; individual, family, community, and societal adaptations to aging. Three hours.

29 Sex, Marriage, and the Family  Description and analysis of contemporary patterns in American sexual, marital, and familial behavior; their historical development, variants, and the evolving alternatives to traditional normative forms. Three hours.

31 Race and Ethnicity in Canada and the United States  Comparison of Canadian and U.S. responses to issues of race and ethnicity for people of native, African, or Asian origin and for Spanish- or French-speaking people. Three hours.

32 Social Inequality  Introduction to structured class inequality in the U.S., causes and consequences. Focus on wealth, prestige, and power. Inequalities of age, gender, and ethnicity also examined. Three hours.

43 Survey of Mass Communication  The historical development of the socioeconomic, political, educational, and religious impacts of the press, film, radio, and television in American society. Three hours.

57 Drugs and Society  Patterns of illicit drug distribution,
use, abuse, and control in contemporary society. Examines the interaction of cultural, social, psychological, and physiological factors in prohibited drug-taking. Three hours.

95, 96 Introductory Special Topics See Schedule of Courses for specific titles.

All courses numbered 100–199 require three hours of sociology, preferably Sociology 1, specified experience or work in another discipline as indicated, or the instructor’s permission.

100 Fundamentals of Social Research (Same as Political Science 181.) Introduction to research methods in social science. Includes examination of research design, measurement, data collection, data analysis, and the presentation and theoretical interpretation of research findings. Prerequisite: Three hours of sociology or six hours in a related social science. Four hours.

101 The Development of Sociological Theory Classical sociological theory including Marx, Weber, Durkheim, and Mead, as well as Du Bois and early female theorists such as Martineau. Reading and writing intensive. Prerequisites: Six hours of sociology or equivalent preparation in another social science with instructor’s permission. Three hours.

102 Population, Environment, and Society Analysis of the causes and consequences of varying relationships among population size, distribution and composition, social organization, technology, and resource base. Prerequisite: Three hours of sociology. Three hours.

103 Environmental Crises in Modern Society Examines global, national, and local ecological crises both empirically and theoretically. Emphasis on economic processes, political/legal aspects, and social activism. Prerequisite: Three hours of sociology. Three hours.

105 The Community Comparative examination of patterns of social interaction in social groups with common territorial bases in contemporary societies and the analysis of community structure and dynamics. Prerequisite: Three hours of sociology. Three hours.

109 The Self and Social Interaction Analysis of the roles of sociocultural and situational factors in individual behavior and experience and the social genesis, development, and functioning of human personality. Prerequisite: Three hours of sociology or Psychology 1. Three hours.

115 Crime Analysis of the nature and types of behavior that violates law, the mechanisms for defining such behaviors as criminal and their causes and consequences. Prerequisite: Three hours of sociology. Three hours.

118 Race, Crime, and Criminal Justice A comprehensive examination of race, gender, and class on racial minorities’ participation in criminal activities and how individuals are treated by the criminal justice system. Prerequisite: Three hours of sociology or equivalent. Three hours.

119 Race and Ethnicity (Same as Anthropology 187.) Description and analysis of ethnic, racial, and religious groups in the U.S. Examination of social/cultural patterns in the larger society and in these groups themselves. Prerequisite: Three hours of sociology. Three hours.

120 Aging in Modern Society Analysis of contemporary needs and problems of the elderly, including discrimination, poverty, health care, and loneliness, and the evaluation of services and programs for the elderly. Prerequisite: Three hours of sociology or professional experience working with the elderly. Three hours.

122 Women and Society Analysis of the changes in the role of women in contemporary society and their consequences for female socialization, the family, and the other major social institutions. Prerequisite: Three hours of sociology. Three hours.

128 Affluence and Poverty in Modern Society Examination of structured social inequality in contemporary American society with special attention to the distribution of wealth and its relationship to power, prestige, and opportunity. Prerequisite: Three hours of sociology. Three hours.

141 Language and Society Examination of the relationship between languages, perception, thought, and the sociocultural contexts of meaning and communication. Prerequisite: Three hours of sociology. Three hours.

150 Popular Culture Analysis of social significance of a selected range of contemporary non-elite cultural forms in the U.S., such as rock music, television programming, and popular literature. Prerequisite: Three hours of sociology. Three hours.

151 Sociology of Religion Analysis of the sociocultural organization of religions with special attention to the changing forms of religions in contemporary society and their relationships to other institutions. Prerequisite: Three hours of sociology or six hours of religion. Three hours.

154 Social Organization and Death and Dying Comparative examination of sociocultural adaptations to mortality with special attention to family, medical, legal, religious, and economic responses to fatal illness and death in contemporary society. Prerequisite: Three hours of sociology. Three hours.

161 Sociology of Leisure Analysis of the sociocultural organization of nonwork activity, emphasizing the relationships of class, life style, education, and work to contemporary recreation and leisure use patterns. Prerequisite: Three hours of sociology. Three hours.

171 Social Change and Development Perspectives in the Third World The causes, functions, and consequences of social change: perspectives on development in the Third World. Prerequisite: Three hours in sociology. Three hours.

195, 196 Intermediate Special Topics See Schedule of Courses for specific titles.

197, 198 Readings and Research All courses numbered 200–299 are seminars or individual tutorials and require 1 and 100, or 1 and 101, or instructor’s permission.

202 Population Dynamics Analysis of the factors affecting human population growth and distribution, migration patterns, and the relationship between economic activity and population trends. Prerequisite: Six hours of sociology or 1; an introductory course in biology, economics, geography, or zoology. Three hours.

203 Advanced Environmental Sociology Examination of theoretical interpretations of environmental problems, sources, and solutions, focusing on the social conditions under which problems arise. Emphasis on writing and individual research projects. Prerequisite: Six hours of sociology. Three hours.

205 Rural Communities in Modern Society The changing structure and dynamics of rural social organization in context of modernization and urbanization. Emphasis on rural communities in the U.S. Prerequisite: Six hours of sociology. Three hours.

206 Urban Communities in Modern Society The changing structure and dynamics of urban social organization in context of modernization and urbanization. Emphasis on cities and metropolitan areas in the U.S. Prerequisite: Six hours of sociology. Three hours.

207 Community Organization and Development Communities as changing sociocultural organizational complexes within modern society. Special attention given to problems
of formulation and implementation of alternative change strategies. Prerequisite: Six hours of sociology. Three hours.

209 Small Groups Examination of the structure and dynamics of small groups and the interpersonal, informal network of relations that characterize the interaction of members. Prerequisite: Six hours of sociology. Three hours.

211 Social Movements and Collective Behavior Examination of origins, development, structure, and consequences of crowds, riots, crazes, rumors, panics, and political and religious movements and their relationships to cultural and social change. Prerequisite: Six hours of sociology. Three hours.

213 Women in Development in Third World Countries An examination of the meaning and measurement of development, sociodemographic characteristics, sex stratification, and effects of Colonialism and Westernization on women’s issues in the third world. Prerequisite: Six hours of sociology. Three hours.

214 Delinquency Analysis of the nature and type of juvenile behavior that violates law, the mechanisms for defining such behaviors as delinquent, and their causes and consequences. Prerequisite: Six hours of sociology. Three hours.

216 Criminal Justice Analysis of the social structures and processes involved in the identification and labeling of individuals as criminal offenders: criminal law, its enforcement and the courts. Prerequisite: Six hours of sociology. Three hours.

217 Corrections Analysis of the social structures and processes involved with individuals designated as offenders of criminal law: probation, prison, parole, and programs of prevention and rehabilitation. Prerequisite: Six hours of sociology. Three hours.

219 Race Relations Examination of American racial subordination in social and historical perspective. Analysis of interracial contacts, racial subcultures and social structures, and responses to racial prejudice and discrimination. Prerequisite: Six hours of sociology. Three hours.

220 Internship in Gerontology Supervised service or research internship integrating theoretical and practical gerontological issues. Prerequisites: 20, 120, 221 or 222; or equivalent gerontological preparation. Three hours. (Not offered for graduate credit.)

221 Aging and Social Change Examines effects of social changes on older persons on the aging process. Also analyzes how an increasing proportion of older persons in the population leads to social change. Prerequisite: Six hours of sociology. Three hours.

222 Aging and Ethical Issues Analysis of selected ethical issues posed by an aging society and faced by older persons, their families, health care and service providers, and researchers. Prerequisite: Six hours of sociology. Three hours.

223 Sociology of Reproduction Examines reproduction of cultural values in relation to social conduct of reproduction of human life (childbearing) under advanced capitalism. Prerequisite: Six hours of Sociology to include one of 29, 122, or 229. Three hours.

225 Organizations in Modern Society Examination of basic classical and contemporary theory and research on the human relations, internal structures, environments, types, and general properties of complex organizations and bureaucracies. Prerequisite: Six hours of sociology. Three hours.

229 The Family As a Social Institution Examination of the institution of the American family in cross-cultural and historical perspective. Theories and research on family continuity, change, and institutional relationships explored. Prerequisite: Six hours of sociology. Three hours.

232 Social Class and Mobility Comparative and historical analysis of causes, forms, and consequences of structured social inequality in societies. Examination of selected problems in contemporary stratification theory and research. Prerequisite: Six hours of sociology. Three hours.

239 Women and Public Policy in Vermont A detailed analysis of the social processes involved in public policy formation in Vermont, and the consequences for women. Prerequisite: Six hours of sociology. Three hours.

240 Political Sociology Examination of the social organizations of power and authority in modern societies and the dynamics and institutional relationships of political institutions, interest groups, parties, and publics. Prerequisite: Six hours of sociology. Three hours.

243 Mass Media in Modern Society Intensive examination of selected topics in the structure of media organizations and their relationships to and impacts upon the major institutions and publics of contemporary issues. Prerequisite: Six hours of sociology. Three hours.

252 Sociology of Emotions Studies the theoretical premises of a sociocultural explanation of emotions; examines specific emotions such as respect, shame, hatred, love and compassion in humans; and explores the existence of emotions in non-human animals. Prerequisite: Three hours of Sociology. Three hours.

254 Sociology of Health and Medicine The social organization and institutional relationships of medicine in society and the role of sociocultural factors in the etiology, definition, identification, and treatment of illness. Prerequisite: Six hours of sociology. Three hours.

255 Sociology of Mental Health Analysis of the social structures and processes involved in the identification, definition, and treatment of mental illness and its sociocultural etiology and consequences. Prerequisite: Six hours of sociology. Three hours.

258 Sociology of Law Analysis of the sociocultural structure of the legal institution and its relationships to other institutions: the social organization of the legal profession, lawmaking, and the courts. Prerequisite: Six hours of sociology. Three hours.

272 Sociology of African Societies Current social, cultural, political, and economic changes occurring in African societies, including issues of development, the state and civil society, social class, ethnonationalism, and democratization. Prerequisite: Six hours of sociology. Three hours.

274 Research Seminar Principles of research design, data gathering, ethics, measurement, data analysis, and data presentation. Students will complete a research project. Prerequisites: 100 or equivalent with instructor’s permission. Three hours.

275 Methods of Data Analysis in Social Research Quantitative analysis of sociological data; includes table, regression, and path analysis, scaling and factor analysis, and the analysis of variance emphasizing multivariate techniques. Prerequisite: 100 or equivalent with instructor’s permission. Three hours.

279 Contemporary Sociological Theory Critical examination of contemporary functional, conflict, exchange, interactionist, and structural theoretical approaches. A number of other theoretical approaches selected by seminar participants also examined. Prerequisite: 101. Three hours.
281, 282 Seminar  Presentation and discussion of advanced problems in sociological analysis. \textit{Prerequisites:} Twelve hours of sociology, instructor's permission. Three hours.

285, 286 Internship  \textit{Prerequisite:} Twelve hours of sociology including at least one 200-level course in substantive area relevant to field placement, departmental permission.

288, 289 Seminar: Research and Methods of Teaching Sociology  The development and evaluation of the teaching of sociology. \textit{Prerequisites:} Twelve hours of sociology, permission of department. Open only to students who serve concurrently as teaching assistants in the Department. Three hours.

295, 296 Advanced Special Topics  See Schedule of Courses for specific titles.

297, 298 Readings and Research

\textbf{HONORS – ARTS AND SCIENCES}

254, 255 Honors/Sociology  Contact Department for specific requirements. Three hours each.

\textbf{Spanish}

\textbf{COLLEGE OF ARTS AND SCIENCES}

Professor Connor (Chairperson); Associate Professors Escaja, Maura, T. Murad, Nanley; Assistant Professors Flores, Waldron; Lecturers Byerly, Green, J. Murad, Valeriano.

The sequence for the beginning levels of Spanish is 1-2-51-52. Students should enter the sequence at the course level most suitable to their previous training and degree of proficiency. In order to determine that, they should take the placement exam and consult with departmental advisors regarding the course level most appropriate for them. For placement in language courses at the level of 100 or above, first-year students should consult with the Department of Romance Languages. Students may not take a language course lower than the level most recently attained, except with permission of the Department. This stricture does not apply to literature or civilization courses.

The first two semesters of a foreign language are excluded from the 45-hour limit on courses from a single department that can be counted toward the 122 hours for the Bachelor of Arts degree.

Native speakers of Spanish may not take courses numbered in the sequence 1 to 52 in Spanish without departmental permission.

\textbf{SPANISH LANGUAGE}

1 \textbf{Elementary I}  Fundamentals of Spanish composition, comprehension, pronunciation, speaking, reading, writing. Structure of the basic Spanish sentence. No prior knowledge expected. Four hours.

2 \textbf{Elementary II}  Continuation of 1. \textit{Prerequisite:} 1 or equivalent. Four hours.

9 \textbf{Basic Spanish Grammar Review}  Thorough review of Spanish grammar in preparation for intermediate level. Considerable emphasis on written exercises. Three hours.

51 \textbf{Intermediate Language Study I}  Significant review of grammar, proceeding from basic knowledge of Spanish to increased proficiency in understanding, speaking, reading and writing. Compositions, oral practice, reading. \textit{Prerequisites:} 2 or 09 or equivalent (Placement Exam, 2-3 years in high school, consultation). Three hours.

52 \textbf{Intermediate Language Study II}  Continues building on the skills developed in Spanish 51. More emphasis on accurate language usage and more extensive readings. \textit{Prerequisite:} 51 or equivalent (Placement Exam, 3-4 years in high school, consultation). Three hours.

95, 96 \textbf{Introductory Special Topics}  Introductory courses or seminars on topics beyond the scope of existing departmental offerings. See Schedule of Courses for specific titles.

101 \textbf{Composition and Conversation}  Writing practice, sentence structure, correct expression, and guided discussions in Spanish of assigned topics. A good command of basic grammar expected. \textit{Prerequisite:} 52 or permission. Three hours.

105 \textbf{Phonetics and Phonology}  The sound system of Spanish: Spanish/English pronunciation contrasted; vowels, consonants, rhythms, intonation. Counts as major/minor elective, not for A&S language requirement. \textit{Prerequisite:} 52 or permission. Three hours.

109 \textbf{Spanish Grammar}  An intensive study of Spanish grammar. Topical approach. \textit{Prerequisite:} 52 or permission. Three hours.

201 \textbf{Advanced Composition and Conversation}  To improve both written and oral proficiency. Textbook supplemented by panel discussions, debates, translation, and a weekly composition. \textit{Prerequisite:} 101 or permission. Three hours. (Not offered for graduate credit.)

202 \textbf{Topics in Spanish Language Study}  Varied topics devoted to a special area such as translation, creative writing, Spanish for the professions (medicine, business, journalism, law), etc. \textit{Prerequisite:} 101 or permission. Three hours. (Not offered for graduate credit.)

211 \textbf{History of the Spanish Language}  The evolution of the Spanish language from its origins to the present. \textit{Prerequisites:} One 100-level literature course or equivalent. Three hours.

\textbf{SPANISH LITERATURE AND CULTURE}

While literature and culture courses are divided chronologically, it is not essential that students adhere strictly to this order. In general, a 100-level literature course (Spanish 140) or its equivalent is the prerequisite for all more advanced literature courses: exceptions can be made with the approval of the Department.

Unless otherwise stated, all courses above the intermediate level will be conducted in Spanish. Questions about the precise content of any course should be referred to the instructor listed for the course or to the department chairperson.

\textbf{LITERATURE}

140 \textbf{Analyzing Hispanic Literatures}  Introduction to basic genres of Hispanic literatures (narrative, poetry, drama, essay); development of analytical and critical reading/discussion skills. Short analytical papers and ample class discussion. \textit{Prerequisite:} 101 or concurrent enrollment (with permission). Three hours.

141 \textbf{Introduction to the Literature of Spain}  An introductory survey of major developments in Spanish peninsular literature. Readings and discussions focus on textual analysis, and historical and cultural contexts. Senior majors by permission only. \textit{Prerequisites:} 140 pre- or co-requisite. Three hours.

142 \textbf{Introduction to Literature of Spanish America}  An introductory survey of major developments in Spanish American literature. Readings and discussion focus on textual analysis, and historical and cultural contexts. Seniors by permission only. \textit{Prerequisites:} 140 pre- or co-requisite. Three hours.

195, 196 \textbf{Intermediate Special Topics}  See Schedule of Courses for specific titles. \textit{Prerequisite:} 140.

197, 198 \textbf{Readings and Research}  Permission of chair required. \textit{Prerequisite:} 140.

235 \textbf{Performing Early Cultural Identities}  A study of the
most popular entertainment in Spain before 1700: theater. Classic plays explore cultural and personal identities in times of conflict and change. *Prerequisite:* 140. Three hours.

236 *Poetic Voices/Cultural Change* A topical approach to exploration of self and society in Spain’s poetic voices before 1700. Verses range from humorous to amorous, from satirical to political. *Prerequisite:* 140. Three hours.

237 *Tricksters, Knights, and “Wayward” Women* A topical approach to Spain’s diverse cultural panorama before 1700. Adventures in prose about knights, picaros, plotting wives, nuns, priests and Jewish and Moorish figures. *Prerequisite:* 140. Three hours.

245 *Cervantes’ Voices and Portraits* Cervantes’ innovative short fiction and theater are the media for exploring cultural change and the literary legacies of 16th-century Spain. *Prerequisite:* 140. Three hours.

246 *Cervantes’ Don Quixote* Study of the world’s most widely published novel. Don Quixote’s crazy adventures with the sword and the pen explore fiction, reality, and life itself. *Prerequisite:* 140. Three hours.

250 *Dilemmas of Modernity in 19th-century Spain* Spain’s turbulent 19th century, focusing on the bitter struggle for and against modernization both in literature and in society. *Prerequisite:* 140. Three hours.

251 *Personal and National Identity in Modern Spanish Literature* Exploration of how 20th-century Spanish writers have sought to define themselves and their nation, including regionalism, gender relations, and ethnicity. *Prerequisite:* 140. Three hours.

252 *Spanish Literature from Dictatorship to Democracy* Literature in Spain from the Franco dictatorship to the present. Topics to include censorship and dissidence, writing-in-exile, and contemporary trends. *Prerequisite:* 140. Three hours.

279 *Acting out: Performing Cultural Politics in Latin America* A study of the relationship between Latin American performance and its political contexts. Emphasis is placed on works particularly concerned with reshaping culture, politics, and aesthetics. *Prerequisite:* 140. Three hours.

281 *Contemporary Spanish-American Fiction* A study of representative works by major authors tracing the development of narrative forms from their roots in the last century to the present. *Prerequisite:* 140. Three hours.

286 *Spanish-American Literature of Social Protest* Readings of major texts. Topics might range from early protests against Spain, to resistance by repressed groups, to contemporary protests against imperialism. *Prerequisite:* 140. Three hours.

287 *Early Spanish Narratives of the Americas* Readings and analysis of late 15th and 16th century narratives. Discussion of European and Native American perspectives, religious disputes, and the “Leyenda Negra” (Black Legend). *Prerequisite:* 140. Three hours.

290 *Hispanic Films in Context* Approaching film as reflection and shaper of Hispanic cultures through comparison with texts relevant to cultural context. Includes study of film terminology and analysis. *Prerequisite:* 140. Three hours.

291 *Early Cultures of Spain* A study of the Spanish cultures from earliest times through 1700, emphasizing major intellectual, political, and artistic developments. *Prerequisite:* 140. Three hours.

292 *Modern Cultures of Spain* A study of the cultures of Spain from the Enlightenment to the present, emphasizing the major intellectual, political, and artistic developments. *Prerequisite:* 140. Three hours.

293 *Early Latin American Cultures* A study of colonial Latin American cultures from pre-Hispanic times through Independence. Emphasis on major intellectual, artistic, and cultural developments. *Prerequisite:* 140. Three hours.

294 *Modern Latin American Cultures* An overview of the cultures of Latin America with a multidisciplinary approach to understanding cultural constructions. Themes included: the city, nationhood, subjectivity, marginality. *Prerequisite:* 140. Three hours.

295 296 *Advanced Special Topics* See Schedule of Courses for specific titles. *Prerequisite:* 140.

297 298 *Advanced Readings and Research* Permission of chair required. *Prerequisite:* 140.

299 *Topics in Hispanic Cultures* Focus on a particular cultural topic in the Hispanic world. Study might emphasize regional studies, current conflicts on ecology, ethnicity, and gender. *Prerequisite:* 140. Three hours.

The following extra-departmental courses may not be taken for credit toward a major in Spanish except by special agreement with the department chair:

- WLI 14, 114 *Spanish Literature in Translation*
- WLI 15, 115 *Spanish-American Literature in Translation*
- WLI 16, 116 *Latino Writers in the U.S.: Contemporary Perspectives*
- LING 101, 102 *Linguistics*
- WLI 95, 96, 195, 196 *Special Topics in World Literature*

**HONORS – ARTS AND SCIENCES**

256, 257 *Honors/Spanish* Contact Department for specific requirements. Three hours each.

## Statistics (STAT)

**Statistics Program Steering Committee:** Professors Aloup, Ashbaugh, Bouchey, Gordon, Haugh (Director), Mickey, Newton, Son; Associate Professor Buzas; Research Assistant Professors Bunn, Caillee, Single; Lecturers Badger, Low, MacPherson, Weaver.

11 *Introduction to Statistics via Microcomputers* Various study designs considered. Graphical and analytic techniques for presenting results. Wide variety of applications surveyed. PC-based software used. Experience gained in sample survey work. *Prerequisite:* High school algebra. Three hours.

51 *Probability with Statistics* Introduction to probabilistic and statistical reasoning, including probability distribution models and applications to current scientific/social issues. Roles of probability, study design, and exploratory/confirmary data analysis. *Prerequisites:* Two years H.S. algebra. Three hours. No credit for sophomores, juniors, or seniors in the mathematical and engineering sciences.

95 *Topics in Statistics* Lectures, reports, and directed readings at an introductory level. *Prerequisite:* As listed in course schedule. One to three hours as announced.

111 *Elements of Statistics* Basic statistical concepts, methods, and applications, including correlation, regression, confidence intervals, and hypothesis tests. *Prerequisites:* Two years of high school algebra, sophomore standing. Three hours.

A student may receive credit for only one of 11 and 111, unless special permission has been given by the Statistics Program.

140 *Natural Resource Biostatistics* (See Natural Resources 140.) Four hours.

141 *Basic Statistical Methods* Foundational course for
students taking further quantitative courses. Exploratory data analysis, probability distributions, estimation, hypothesis testing. Introductory regression, experimentation, contingency tables, and nonparametrics. Computer software used. Prerequisites: Math. 11, 13, 19 or 21, sophomore standing. Three hours.

*A student may receive credit for only one of 111, 140, 141, 143, and EC 170 unless special permission has been given by the Statistics Program.

143 Statistics for Engineering Data analysis, probability models, parameter estimation, hypothesis testing. Multifactor experimental design and regression analysis. Quality control, SPC, reliability. Engineering cases and project. Statistical analysis software. Prerequisites: Math. 12, 14, 20 or 22, sophomore standing. Three hours.

191 Special Projects Student-designed special project under supervision of a staff member culminating in a report. Prerequisites: Junior standing, permission of Program Director. One to four hours as arranged.

195 Special Topics For Undergraduate Students Lectures, reports, and directed readings. Prerequisite: As listed in course schedule. One to three hours as arranged.

200 Medical Biostatistics and Epidemiology (Same as Biostatistics 200.) Introductory design and analysis of medical studies. Epidemiological concepts, case-control and cohort studies. Clinical trials. Students evaluate statistical aspects of published health science studies. Prerequisite: 141 or 143; or 211. Three hours.

201 Statistical Analysis Via Computer (Same as Biostatistics 201.) Intensive coverage of computer-based data processing and analysis using statistical packages, subroutine libraries, and user-supplied programs. Students analyze real data and prepare a comprehensive report. Prerequisites: 111 with instructor’s permission, or 141, or corequisite 211. Three hours.

211 Statistical Methods I (Same as Biostatistics 211.) Fundamental concepts for data analysis and experimental design. Descriptive and inferential statistics, including classical and nonparametric methods, regression, correlation, and analysis of variance. Statistical software. Prerequisite: Junior standing. Three hours.

221 Statistical Methods II (Same as Biostatistics 221.) Multiple regression and correlation. Basic experimental design. Analysis of variance (fixed, random, and mixed models). Analysis of covariance. Computer software usage. Prerequisites: 141 or 143; or 211. Three hours.

223 Applied Multivariate Analysis (Same as Biostatistics 223.) Multivariate normal distribution. Inference for mean vectors and covariance matrices. Multivariate analysis of variance (MANOVA), discrimination and classification, principal components, factor analysis. Prerequisites: Any 200-level Statistics course, 221 or 225 recommended, matrix algebra recommended. Three hours.

224 Statistics for Quality and Productivity (Same as Biostatistics 224.) Statistical process control; Shewhart, cusum and other control charts; process capability studies. Total Quality Management. Acceptance, continuous, sequential sampling. Process design and improvement. Case studies. Prerequisites: 141 or 143; or 211. Three hours.

225 Applied Regression Analysis (Same as Biostatistics 225.) Simple linear and multiple regression models; least squares estimates, correlation, prediction, forecasting. Problems of multicollinearity and influential data (outliers). Selected statistical computer programs utilized. Prerequisite: 141 or 143 or 211; or 111 with instructor’s permission. Three hours.

227 Statistical Methods for the Behavioral Sciences (Same as Psychology 341.) Prerequisite: 211 with computer experience or Psychology 340.

229 Survival Analysis (Same as Biostatistics 229.) Probabilistic models and inference for time-to-event data. Censored data, life tables, Kaplan-Meier estimation, logrank tests, proportional hazards regression, specialized applications (e.g. clinical trials, reliability). Prerequisites: Any 200-level Statistics course, one year of calculus. Three hours.

231 Experimental Design (Same as Biostatistics 231.) Randomization, complete and incomplete blocks, crossover, Latin squares, covariance analysis, factorial experiments, confounding, fractional factorials, nesting, split plots, repeated measures, mixed models, response surface optimization. Prerequisites: 211; 221 recommended. Three hours.

233 Survey Sampling (Same as Biostatistics 233.) Design and data analysis for sample surveys. Simple random, stratified, systematic, cluster, multistage sampling. Practical issues in planning and conducting surveys. Prerequisites: 211; or 141 or 143 with instructor’s permission. Three hours.

235 Categorical Data Analysis (Same as Biostatistics 235.) Measures of association and inference for categorical and ordinal data in multiway contingency tables. Loglinear and logistic regression models. Prerequisite: 211. Three hours.

252a Applied Discrete Stochastic Process Models Markov chain models for biological, social, and behavioral systems models. Random walks, transition and steady-state probabilities, passage and recurrence times. Prerequisite: 151 or 251; or 141 or equivalent; Math. 121. Three hours.

253 Applied Time Series and Forecasting (Same as Biostatistics 253.) Autoregressive moving average (Box-Jenkins) models, autocorrelation, partial correlation, differencing for nonstationarity, computer modeling. Forecasting, seasonal or cyclic variation, transfer function and intervention analysis, spectral analysis. Prerequisite: 211 or 225; or 141 or 143 with instructor’s permission. Three hours.

256 Neural Computation (See Computer Science 256.)

261, 262 Statistical Theory I, II (Same as Biostatistics 261, 262.) Point and interval estimation, hypothesis testing,
and decision theory. Application of general statistical principles to areas such as nonparametric tests, sequential analysis, and linear models. Prerequisites: For 261: 151 with instructor permission or 251; for 262: 241 with instructor permission or 261. Three hours each.

265 Integrated Product Development (Same as Business Administration 293.)

270 Stochastic Theory in Electrical Engineering (See Electrical Engineering 270.)

271 Least Squares Estimation and Filtering of Time Series (See Electrical Engineering 271.)

281 Statistics Practicum Intensive experience in carrying out a complete statistical analysis for a research project in substantive area with close consultation with a project investigator. Prerequisites: Any one of 200, 201, 221 through 257; or 253; some statistical software experience. No credit for graduate students in Statistics or Biostatistics. One to four hours.

293, 294 Undergraduate Honors Thesis A program of reading, research, design, and analysis culminating in a written thesis and oral defense. Honors notation appears on transcript and Commencement Program. Contact Statistics Program Director for procedures. Six to eight hours.

295 Special Topics in Statistics For advanced students. Lectures, reports, and directed readings on advanced topics. Prerequisite: As listed in course schedule. One to four hours as arranged.

**Theatre (THE)**

COLLEGE OF ARTS AND SCIENCES

Professors Schenk, Thaler; Associate Professors Moederger (Chairperson), Snider, Tkatch; Assistant Professors Carrollton, Greeley.

1 Introduction to Theatre Overview of general theatre practices and theories, emphasizing history, script analysis, character development, and communicative skills directed toward a modern audience. Three hours.

5 Oral Interpretation of Literature Performance of literature that is traditionally nondramatic. Three hours. Summer.

10 Acting I: Introduction to Acting Exercises to increase self-awareness and heighten perceptions of human behavior. Basics of script analysis and development of vocal and physical skills through practice and performance. Three hours.

20 Fundamentals of Lighting Primary course in the area of stage lighting design and execution. Four hours.

30 Fundamentals of Scenery A hands-on introduction to the theory and practical application of the scenic elements involved in play production (drawing, building, and painting techniques). Four hours.

40 Fundamentals of Costuming Primary course in area of costume design and construction. Four hours. Fall.

41 History of Costume (Same as Community Development and Applied Economics 117 and Womens Studies 78,) Overview of period costume and its adaptation for the stage. Three hours. Alternating fall semesters.

42 Fundamentals of Theatrical Make-up Focus on the development of drawing, painting, and sculpture skills as they relate to the creation of a dramatic character for the stage. Prerequisite: 40. Three hours. Alternating fall semesters.

50 Dramatic Analysis Examination of structural characteristics of the basic forms and styles of drama and the manner in which they affect theatrical representation. Three hours.

110 Acting II: Contemporary Scene Study Continuation of Acting I. Development of acting techniques through intensive scene work: refining script analysis and performance skills using contemporary scenes. Prerequisites: 10, permission for non-theatre majors and minors. Three hours.

111 Acting III: Voice and Speech for the Actor Study of the basics of voice production and Standard American Speech; exercises and practice focusing on freeing the voice and developing good vocal habits. Prerequisites: 10 or permission for non-theatre majors and minors. Three hours. Spring.

112 Acting IV: Stage Movement Development of physical freedom and articulate physical expression through techniques promoting relaxation, flexibility, strength, creative spontaneity, and purposeful movement. Techniques applied to short movement performances. Prerequisite: 10, or permission for non-theatre majors and minors. Three hours.

120 Lighting Design Explores, through classroom instruction and projects, the development of lighting designs for a variety of live performance situations. Prerequisite: 20. Three hours. Fall.

130 Scene Design A practical application of the elements, principles, and styles of theatrical stage design through research, sketching, and rendering techniques. Prerequisite: 30. Three hours.

131 Scene Painting Lab course to study practical application of painting technique used in theatre, trompe l’oeil. Develops skills introduced in 30. Prerequisites: 30, 130, and either 20 or 40. Three hours.

140 Costume Design Elements, principles, and styles of design applied to the visual creation of a dramatic character. Prerequisites: 40; 41 highly recommended. Three hours. Spring.

141 Advanced Costume Construction: Draping and Flat Pattern Explores the methods of creating period shapes. Students develop a sloper, fit it to a human body, create a researched and completed period costume. Prerequisite: 40. Three hours. Spring, every fourth year.

142 Advanced Costume Construction: Period Undergarments Focuses on techniques for creating artificial understructures that support period silhouettes. Corsets, hoop skirts, petticoats, etc., are researched, fit on the human body, and constructed. Prerequisite: 40. Three hours. Spring, every fourth year.

143 Advanced Costume Construction: Millinery Explores methods of hat construction, including work in various media. Methods of shaping, covering, and trimming are researched, leading to the completion of hats. Prerequisite: 40. Three hours. Spring, every fourth year.

144 Advanced Costume Construction: Tailoring Explores traditional methods of tailoring as well as practical adaptations for the stage. Research, discussion, and demonstration lead to completion of a period suit. Prerequisite: 40. Three hours. Spring, every fourth year.

150 Theatre History I: Classical, Medieval, and Renaissance Theatre A study of the theatrical rituals of Greece, Rome, and the Middle Ages leading to the reinvention of theatre in Renaissance Italy, England, and Spain. Prerequisites: 50 or English 95, Dramatic Analysis. Three hours.

151 Theatre History II: Renaissance France to 20th Century Europe and the USA A study of the historical context, theatrical conventions, and the plays representations of Neoclassicism, Romanticism, Realism, and the revolts against Realism. Prerequisite: 150. Three hours.
160 Stage Management  Theoretical and practical principles of stage managing in the non-commercial theatre. Prerequisites: 10; two of 20, 30, 40, 50. Three hours. Spring.

190 Theatre Practicum  Students actively involved in current department productions may earn credit for work on stage or backstage. Project proposals must be approved by department faculty and be of significant scope to qualify for credit. Prerequisite: Variable, see department chair or advisors. Variable hours, one-half to three.

195, 196 Intermediate Special Topics  See Schedule of Courses for specific titles.

197, 198 Readings and Research

Note: 200-level Theatre courses are not offered for graduate credit.

200 Professional Preparation  Topics include preparing for auditions, portfolio reviews, interviews, and research papers for entrance into graduate schools or professional theatre venues. Prerequisite: Junior or senior standing and by permission only. One to three hours.

210 Acting V: Shakespeare Scene Study  Refining and developing script analysis and performance skills using Shakespeare, ancient Greek, Molière, or other stylized texts. Prerequisite: 10. Three hours. Fall.

230 Advanced Scene Design  An in-depth study of the realization process for a stage design. A combination of script analysis, sketching, model making, rendering, and paint elevations, all as forms of communication. Prerequisites: 30, 130. Three hours. Alternating fall semesters.

250 Directing I  Theory of theatrical directing, including script analysis; approaches to audition, rehearsal, and performance; coaching actors. Prerequisites: 10, 20, 30, 40, 50; either 130 or 140, either 150 or 151. Three hours. Fall.

251 Directing II  Development of skills and aesthetic values through the direction of a complete one act play. Not offered as performance opportunity. Enrolled students may not perform as actors in their own projects. Prerequisites: 250, and declared senior Theatre majors only. Three hours. Spring.

283, 284 Seminar

297, 298 Senior Readings and Research

SPEECH (SPCH)

Speech credits will not count toward a Theatre major or toward fulfillment of the College of Arts and Sciences fine arts distribution requirement.

11 Effective Speaking  Fundamentals course in effective, informative, and persuasive public speaking and critical listening. Includes theory and practice. Three hours.

95, 96 Introductory Special Topics  See Schedule of Courses for specific titles.

111 Persuasion  Human motivation, attitudes, emotion, stereotypes, attention and audience psychology as applied in the speaking situation. Prerequisite: 11. Three hours.

112 Argument and Decision  Inductive, deductive, causal, and analogical reasoning as applied to the speaking situation. Prerequisite: 11. Three hours.

214 Issues in Public Address  Each semester emphasizes analysis of specific speakers, movements, theses, and strategies encompassed by a selected topic of public address. Prerequisite: Nine hours of related courses, of which three must be at the 100 level. Three hours.

283, 284 Seminar  Seminar topics include: Nonverbal Communication, Rhetorical Criticism, Advanced Argumentation, Advanced Persuasion, Debate, Interpersonal Communication in Group Interaction, Communication in Conflict Management. Prerequisite: Six hours of speech, of which at least three hours must be at the 100 level. Three hours.

HONORS – ARTS AND SCIENCES

258, 259 Honors/Theatre  Contact Department for specific requirements. Three hours each.

Vermont Studies (VS)

COLLEGE OF ARTS AND SCIENCES

Professor P. Eschholz (Director); Associate Professors D. Brown, F. Bryan, J. Petersen, A. Woolf; Lecturer S. Wright.

52 Introduction to Vermont  Survey of Vermont’s geography, history, politics, social issues, ethnic populations, culture, and environment. Special emphasis on interdisciplinary approach to the study of Vermont. Three hours.

55 Environmental Geology  (See Geology 55.) Four hours.

64 Native Americans of Vermont  (See Anthropology 64.) Three hours.

92 Vermont Field Studies  (See Geography 92.) Three hours.

95, 96 Introductory Special Topics  See Geography 92.) Three hours.

123 The Vermont Political System  (See Political Science 123.) Prerequisite: POLS 21. Three hours.

160 The Literature of Vermont  (See English 160.) Three hours.

162 The Geography of Place Names  (See Geography 162.) Prerequisite: three hours in Geography. Three hours.

184 Vermont History  (See History 184.) Prerequisite: Three hours in history (11 or 12 recommended). Three hours.

191 Internships  Prerequisites: Nine hours of Vermont Studies, permission of Director of Vermont Studies, junior or senior standing. Three hours.

192 Vermont Field Studies  (See Geography 192.) Prerequisite: Three hours in geography. Three hours.

195, 196 Intermediate Special Topics  See schedule of courses for specific titles. Three hours.

197, 198 Readings and Research  Prerequisite: Declared minor in Vermont Studies. One-three hours as arranged.

230 The Vermont Economy  (See Economics 230, Seminar C.) Prerequisites: EC 170, 171, 172. Three hours.

284 Seminar in Vermont History  Topical approach to Vermont history through original research utilizing primary sources available at UVM, the Vermont Historical Society, and the Vermont State Archives. Prerequisites: Junior or senior standing, 12 hours of history, including 184 or permission. Three hours. Crosslisting: HIST 284.

295, 296 Advanced Special Topics  See schedule of courses for specific titles. Prerequisite: Advanced undergraduate or graduate standing. One-three hours as arranged.

297, 298 Readings and Research  Prerequisite: Declared minor in Vermont Studies. One-three hours as arranged.
Wildlife and Fisheries Biology (WFB)

SCHOOL OF NATURAL RESOURCES
Associate Professors Hirth (Program Chair), Watzan; Assistant Professor Marsden; Research Professor Capen; Research Associate Professor Parrish; Research Assistant Professor Donovan; Visiting Assistant Professor Strong.

74 Wildlife Conservation Historical and contemporary values of wildlife; impacts on habitats and populations; strategies for conservation, allocation, and use. Nonmajors only. Prerequisite: Basic understanding of biological terms and concepts. Three hours.

130 Ornithology Taxonomy, classification, identification, morphology, physiology, behavior, and ecology of birds. Prerequisites: Biology 1, 2 or equivalent. Three hours.

131 Field Ornithology Identification and field studies of birds, emphasizing resident species. Two weeks in summer. Prerequisite: 130; preference to WFB majors. Two hours.

150 Wildlife Habitat and Population Measurements Field methods for measuring habitat variables and estimating population parameters. One week in summer. Prerequisites: 131, Forestry 21 or Botany 109, Natural Resources 140. One hour.

161 Fisheries Biology and Management Introduction to freshwater fish, habitats, and life histories. Overview of fishery management techniques and principles, including sampling and assessment methods, stockping, population and habitat manipulation, and regulations. Prerequisites: Biology 1, 2 or equivalent. Four hours.

174 Principles of Wildlife Management Application of ecology and sociology to the management of wildlife populations and habitat; integration of wildlife management with demands for other resources; consideration of game species, endangered species, and biological diversity. Prerequisites: Natural Resources 103 or Biology 102 or Botany 160. Three hours.

175 Wildlife and Society Investigates how people’s attitudes, institutions, policies, and behaviors have affected wildlife across the North American landscape. Three hours. Alternate years.

176 Florida Ecology Field Trip Major ecosystems and associated wildlife, ranging from northern Florida flatwoods to south Florida Everglades. Field trip over spring recess. Prerequisites: 130, 174; permission. Two hours. Alternate years.

177 Texas Wildlife Field Trip Major ecosystems and associated wildlife of south Texas, including Gulf coast, coastal prairies, lower Rio Grande Valley, and Chihuahuan desert. Field trip over spring recess. Prerequisites: 130, permission. Two hours. Alternate years.

185, 186 Special Topics

187, 188 Undergraduate Special Projects Individual projects supervised by a faculty member. Projects may involve independent field, laboratory, or library investigations. Formal report required. Prerequisites: Junior standing, submission of a project prospectus for permission. One to five hours.

191 Wildlife and Fisheries Practicum Supervised work experience in the wildlife and fisheries area. Prerequisite: Instructor’s permission. Credit as arranged.

232 Ichthyology Biology of fishes. Focus is on form and function, morphology, physiology, behavior, life history, and ecology of modern fishes. Prerequisites: Biology 1, 2 or equivalent; junior standing. Three hours. Alternate years.

271 Wetlands Wildlife Breeding biology, behavior, habitat management, and population ecology of wetland wildlife with emphasis on waterfowl. Prerequisites: WFB 174, NR 103. Two hours. Undergraduate/graduate credit

272 Wetlands Wildlife Laboratory Laboratory and field assessment of the ecology and management of wetland habitats and their associated wildlife populations. Prerequisites: Previous or concurrent enrollment in WFB 271 or NR 260. One hour. Undergraduate/graduate credit.

274 Terrestrial Wildlife Laboratory Laboratory and field experience related to terrestrial species and management of their habitat. Field project required. Prerequisite: Previous or concurrent enrollment in 273. One hour.

275 Wildlife Behavior Behavior and social organization of game and nongame species as they pertain to population management. Prerequisites: One year of biology, an ecology course, 74 or 174 recommended. Three hours.

279 Marine Ecology Structure and function of major marine communities, including open ocean, benthos, coral reefs, and estuaries. Emphasis on unique ecological insights gained in the marine environment. Prerequisites: Biology 1 and 2, an ecology course, or instructor permission. Three hours.

285, 286 Advanced Special Topics

287, 288 Advanced Special Projects Advanced readings and discussions or special field and/or laboratory investigations dealing with a topic beyond the scope of existing formal courses. Prerequisite: Senior standing or permission. Credit arranged. (Not offered for graduate credit.)

299 Wildlife and Fisheries Biology Honors Honors project dealing with wildlife or fisheries biology. Prerequisite: By application only; see program chair. Three to six hours.

Women’s Studies (WST)

COLLEGE OF ARTS AND SCIENCES

73 Introduction to Women’s Studies Survey of feminist theory and its application to specific areas of inquiry, including analysis of the intersections among race, class, and gender. Three hours.

76 Women in Literature (See English 42.) Three hours.

78 History of Costume (See Theatre 41.) Three hours. Thaler.

95, 96 Introductory Special Topics See Schedule of Courses for specific titles.

84 Mothers and Daughters Interdisciplinary exploration of historical, social, and cultural definitions of the mother/daughter experience informed by contemporary feminist perspectives. Three hours.

101 Women and Society (See Sociology 122.) Prerequisite: 73 or three hours of sociology. Three hours.
111 Women’s Spirituality: A Challenge to Institutional Religion Women’s experience of the sacred and the self in Eastern and Western religious traditions. Analysis of political and cultural structures alienating women from their experience. Three hours.

115 Studies in Gender and Religion (See Religion 173.) Prerequisite: Three hours in religion or instructor’s permission.

121 Literary Genre: Women Writing Autobiography (See English 181.) Prerequisite: Three hours in English or Women’s Studies. Three hours.

122 19th Century Women’s Writing (See English 147.) Prerequisite: Three hours in English or Women’s Studies. Three hours.

141 Gender and Law Feminist jurisprudence and legal theory. Topics include economic consequences of reproduction, sexuality, divorce, custody; sexual harassment, employment discrimination; surrogate motherhood, domestic violence, rape, pornography, prostitution. Three hours.

151 Feminism: Theories and Issues (See Philosophy 170.) Prerequisite: One course in philosophy or instructor’s permission. Three hours.

157 Greek Feminism (See Classics 157.)

161 History of Women in the U.S. (See History 182.) Prerequisite: History 11 or 12, or three hours in Women’s Studies. Three hours.

165 Women, Society, and Culture (See Anthropology 172.) Prerequisite: Anthropology 21 or instructor’s permission. Three hours.

170 Gender, Space, and Environment (See Geography 178.) Prerequisite: Six hours in geography or Women’s Studies, or instructor’s permission. Three hours.

172 Women and Depression The exploration of the impact of gender socialization, sexual oppression, discrimination, self-esteem, and body image on women’s mental health in our society. Three hours.

174 Women, Science, and Nature The position of women in relation both to science and nature is considered historically, culturally, and in terms of current feminist perspectives. Three hours.

179 Ecofeminism (See Environmental Studies 179.) Prerequisite: 75 or Environmental Studies 1, 2. Sophomore standing.

181 Women in American Politics (See Political Science 135.) Prerequisite: Political Science 21 or three hours in Women’s Studies. Three hours.

182 Women and Development (See Political Science 179.) Prerequisite: Political Science 71 or Women’s Studies 73. Three hours.

185 Women in the U.S. Economy (See Economics 156.) Prerequisite: EC 11, 12 or instructor’s permission. Three hours.

191, 192 Internship Approved programs of learning outside the classroom. Students work at local women’s agencies, in consultation with faculty sponsors. Prerequisites: A contract must be obtained from and returned to the Women’s Studies Program office during registration; permission of Director of Women’s Studies. Three to six hours.

195, 196 Intermediate Special Topics See Schedule of Courses for specific titles.

201 Sociology of Reproduction (See Sociology 223.) Prerequisite: Six hours of sociology to include one of 29, 122, or 129; or instructor’s permission. Three hours.

205 Women in Development in Third World Countries (See Sociology 213.) Prerequisite: Six hours of sociology or instructor’s permission. Three hours.

271 Psychology of Women (See Psychology 231.) Prerequisite: One psychology course at the 100 level or instructor’s permission. Three hours.

273 Seminar in Feminist Theory An interdisciplinary examination of theories accounting for women’s position in culture and society. Special emphasis on the relationship between gender, race, class, ethnicity, and sexuality. Prerequisites: 75, six additional hours in Women’s Studies, and admission to the Women’s Studies major or minor program. Three hours.

295, 296 Advanced Special Topics See Schedule of Courses for specific titles.

297, 298 Independent Study in Women’s Studies Selection and development of topic for investigation using assigned faculty member as preceptor. Prerequisites: 73, approval of Director of Women’s Studies. Three hours.

HONORS – ARTS AND SCIENCES

262, 263 Honors/Women’s Studies Contact program for specific requirements. Three hours each.

Additional Women’s Studies courses are offered through individual departments. See Schedule of Courses for specific titles.

World Literature (WLIT)

COLLEGE OF ARTS AND SCIENCES

World Literature courses can be used to fulfill the Literature distribution requirement. They are taught in English and require no previous knowledge of a foreign language. Courses numbered below 100 are considered introductory and are open to first-year students. Although sophomore status is recommended for courses beyond that level, first-year students may enroll with instructor permission.

11 French Literature in Translation Selected topics in French literature. Readings and discussion of representative works in English translation. No knowledge of French required. Three hours.

12 Francophone Literature in Translation Selected topics in the literature of the French-speaking world (excluding France). Readings and discussion of representative works in English translation. No knowledge of French required. Three hours.

13 Italian Literature in Translation Selected topics in the literature of Italy. Readings and discussion of representative works in English translation. No knowledge of Italian is necessary. Three hours.

14 Spanish Literature in Translation Selected topics in Spanish literature. Readings and discussion of representative works in English translation. No knowledge of Spanish required. Three hours.

15 Spanish-American Literature in Translation Selected topics in Spanish-American literature. Readings and discussion of representative works in English translation. No knowledge of Spanish required. Three hours.

17 German Literature in Translation Topics such as German author(s), genre, literary movement, or theme such as Goethe, proverbs, Expressionism, Faust, Holocaust, or the German film. Three hours.
18 Russian Literature in Translation Topics such as Russian author(s) (e.g. Dostoevsky, Tolstoy), genre (e.g. the Russian novel), literary school (e.g. Russian Formalism), or period (19th or 20th century literature). Three hours.

24 Myths and Legends of the Trojan War (See Classics 24.) Three hours.

35 The End of the Roman Republic (See Classics 35.) Three hours.

37 Early Roman Empire: Literature in Translation (See Classics 37.) Three hours.

42 Mythology (See Classics 42.) Three hours.

95, 96 Special Topics in World Literature Special topics in literary studies. Individual courses might include comparative study of particular literary genres, periods, authors or works from varied international literatures. Three hours.

110 Chinese Literature in Translation Selected topics in Chinese literature. Reading and discussion are in English. No knowledge of Chinese language is required. Three hours.

111 French Literature in Translation Selected topics in French literature. Readings and discussion of representative works in English translation. No knowledge of French required. Prerequisite: Sophomore standing or instructor permission. Three hours.

112 Francophone Literature in Translation Selected topics in the literature of the French-speaking world (excluding France). Readings and discussion of representative works in English translation. No knowledge of French required. Prerequisite: Sophomore standing or instructor permission. Three hours.

113 Italian Literature in Translation Selected topics in the literature of Italy. Readings and discussion of representative work in English translation. No knowledge of Italian is necessary. Prerequisite: Sophomore standing or instructor permission. Three hours.

114 Spanish Literature in Translation Selected topics in Spanish literature. Readings and discussion of representative works in English translation. No knowledge of Spanish required. Prerequisite: Sophomore standing or instructor permission. Three hours.

115 Spanish-American Literature in Translation Selected topics in Spanish-American literature. Readings and discussion of representative works in English translation. No knowledge of Spanish required. Prerequisite: Sophomore standing or instructor permission. Three hours.

116 Latino Writers in the U.S.: Contemporary Perspectives Study of texts written by Latinos since the 1960s. Topics: construction of "ethnic identities," representation of race/gender relations; writers and their communities. Prerequisite: Sophomore standing or instructor permission. Three hours.

117 German Literature in Translation Topics such as German author(s), genre, literary movement, or theme such as Goethe, proverbs, Expressionism, Faust, Holocaust, or the German film. Prerequisite: Sophomore standing or instructor permission. Three hours.

118 Russian Literature in Translation Topics such as Russian author(s) (e.g. Dostoevsky, Tolstoy), genre (e.g. the Russian novel), literary school (e.g. Russian Formalism), or period (19th or 20th century literature). Prerequisite: Sophomore standing. Three hours.

122 Dante's Comedy A study of Dante's Comedy in Modern English translation. (Same as English 122.) Three hours.

145 Comparative Epic (See Classics 145) Prerequisite: Sophomore standing. Three hours.

153 Greek Drama (See Classics 153.) Three hours.

154 Stories and Histories (See Classics 154.) Prerequisite: Sophomore standing, three hours in Classics. Three hours.

155 Ancient Epic (See Classics 155.) Three hours.

156 Greek and Roman Satire (See Classics 156.) Three hours.

157 Greek Feminism (See Classics 157.) Three hours.

195, 196 Special Topics in World Literature Special topics in literary studies. Individual courses might include comparative study of particular literary genres, periods, authors or works from varied international literatures. Prerequisite: Sophomore standing or instructor permission. Three hours.

Zoology (ZOOL)

See Biology.
