Verification form for Chronic Health Conditions

The University of Vermont (UVM) supports students seeking accommodation for disabilities, including disabilities resulting from Chronic Health Conditions.

Student Accessibility Services at UVM strives to insure that qualified students with disabling chronic health conditions are accommodated in a manner that supports therapeutic treatment. Student Accessibility Services does not modify requirements that are essential to the program of instruction or provide accommodations for persons whose impairments do not substantially limit one or more major life functions. Students whose conditions create a substantial or severe limitation to learning or to other major life activities may request modifications or accommodations to courses and activities at UVM.

Students who wish to receive academic adjustments due to a chronic health condition must have this form completed by a qualified health care provider, which may be a certified physician, other diagnosing medical professional, or specialist (such as, but not limited to: an MD, audiologist, neurologist, endocrinologist). The individual completing this form must have first-hand knowledge of the student’s condition and will be an impartial professional who is not related to the student.

Once this completed form is received, the student will have a meeting with a Student Accessibility Services staff member who will assist in making determination of reasonable and appropriate academic accommodations.

If you have any questions regarding the nature of the information needed for students with Chronic Health Conditions, please contact Student Accessibility Services. This form should be returned to Student Accessibility Services via mail, email or fax.

1. What are limitations that this student will encounter in taking exams and participating in other classroom activities, which are caused by his/her chronic health condition or the medications that he/she is taking?
Please be specific as to exact nature of the limitations and how severe they are:

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

2. Recommended accommodations (Final determination of reasonable and appropriate accommodations will be determined by Student Accessibility Services). Each recommended accommodation should include an explanation of its relevance to the disability. Providers are encouraged to include an assessment of the functional limitation, including severity, caused by the disability.
