

Fall 2014

Geology Seminar Series

Mondays @ 4:15 pm in Delehanty 219

Refreshments @ 4:00 pm in Delehanty 316

09/15/2014 **John Hughes**, Department of Geology, University of Vermont
"The Many Facets of Apatite"

10/13/2014 **Laurel Goodwin**, Department of Geosciences, University of Wisconsin-Madison
"Quantifying the Mechanical Behavior of Shear Zones"

10/27/2014 **Frank Magilligan**, Department of Geography, Dartmouth College NH
"Lessons Learned from Hurricane Irene: Going from Field Impacts to Fluvial Theory and River Management"

11/03/2014 **Marjorie Gale**, Vermont Geological Survey
"The 2011 Bedrock Geologic Map of Vermont: Highlights, Transitions and Notes About the Journey".

11/10/2014 **David Singer**, Department of Geology, Kent State University, OH
"Speciation and Distribution of Trace Metals Associated With Iron Sulfides in the Marcellus Shale".

11/17/2014 **Ken Ridgway**, Department of Earth, Atmospheric and Planetary Sciences, Purdue University, IN
"TBD Cenozoic flat-slab subduction processes and the tectonic development of southern Alaska".

Sponsored by the Department of Geology Visiting Lecture Series
