

Take this quick and easy **SELF-SCREENING QUIZ**

- ☐ When you are in a group or in a crowded restaurant, is it difficult for you to follow the conversation?
- ☐ Does it sound like people mumble?
- ☐ Do you often need to turn up the volume on your TV?
- ☐ Is talking on the phone difficult?
- ☐ Do you have difficulty understanding women and children?
- ☐ Has someone close to you mentioned you might have a problem with your hearing?
- ☐ Do you ask people to repeat themselves often?

How did you do?

If you answered “yes” to any of these questions or are experiencing hearing difficulties, it is highly recommended you see one of our experienced audiologists for an accurate diagnosis and evaluation of treatment options.

Driving Directions

From I-89 North or South

- Take **Exit 14W** into Burlington. Head west on US 2/ Williston Road toward UVM and Lake Champlain. US Route 2/Williston Road turns into Main Street.
- The University of Vermont Campus Green will appear on your **right**.
- The intersection of Main Street and South Prospect Street and a traffic signal will appear just ahead.
- **Turn left** at the intersection of Main Street and South Prospect Street.
- **Turn left** into the first driveway off South Prospect Street.
- Pomeroy Hall is the fourth building at the **end of the parking lot**. You will see a 4-story red brick building.

From Route 7 North

- Follow **Shelburne Road/Route 7** into Burlington.
- At the rotary, **bear right** onto South Willard Street/Route 7 until you reach the intersection of Maple and South Willard Streets.
- **Turn right** at Maple Street and continue on to the end of Maple Street, then **take a left** onto South Prospect Street.
- The entrance to the E.M. Luse Center parking lot is one block on the right just before the busy intersection of Main and South Prospect Streets.

Parking & Entrance to the Luse Center

Parking is available behind the building. Entrance to the lobby is through the side door and is accessible from the parking lot. Please request a parking permit from the receptionist in the lobby.

Mission / Vision

The Eleanor M. Luse Center's Audiology Clinic is part of the Communication Sciences and Disorders (CSD) program at the University of Vermont. The CSD mission is to serve society at state, national and global levels through the education of communication sciences and disorders professionals, development of new knowledge, and management of communication disorders through healthcare/education advocacy.

Quality Services in an Academic Environment

The Eleanor M. Luse Center is a non-profit entity and teaching facility for UVM's Communication Sciences and Disorders program, training student clinicians to be the next generation of professionals. Students are directly and indirectly involved in the care provided, and teaching activities take place during most visits. Because of the focus on education during all sessions, individuals who receive services at our Center leave with a deeper understanding of their own hearing profile, maximizing treatment outcomes.

About Audiology at the Eleanor M. Luse Center for Communication

Our team includes two licensed Doctors of Audiology and a dedicated front office staff. We are located in the heart of campus with parking located right next to the building.

Services

Our Center offers a wide range of audiology services for both children and adults, including:

- Comprehensive hearing evaluations
- Functional communication assessments
- Hearing aid consultation, selection and fitting
- Hearing aid repair and service
- Aural rehabilitation and counseling
- Communication strategies training
- Assistive listening devices
- Tinnitus assessment and treatment
- Hyperacusis and decreased sound tolerance assessment and treatment
- Custom hearing protection, including musician's ear molds
- Custom digital hearing protection for hunters and recreational shooting
- Custom swim molds

Our Doctors of Audiology

Dr. Elizabeth Adams is a clinical professor and VT licensed audiologist who teaches coursework and provides clinical instruction within the Communication Sciences & Disorders program. She is dedicated to maximizing communication through

evidence-based hearing loss treatment using a variety of technological options. Dr. Adams has a special interest in the adult and geriatric populations, specifically reducing the effects of hearing loss on quality of life.

Dr. Stephanie Hollop is a VT licensed audiologist with extensive experience working with adults and children in a medical setting. Her priority is improving overall health and quality of life through better hearing and communication with others. She enjoys working

collaboratively with individuals to develop creative and effective treatment plans. Along with fitting hearing aids, Dr. Hollop has a special interest in tinnitus management.
