ANPS 095 Introduction to Medical Imaging Medical imaging allows physicians to see inside the human body to diagnose disease and guide treatment. In this course, we will describe the imaging techniques used in a modern radiology department and their importance to healthcare.

EDFS/EDSP 200 Exploring Eating Disorders Eating Disorders provide the perfect opportunity to examine the intersections of culture, mind and body.

HLTH 095 Dismantling Rape Culture One in five women and one in 71 men in the United States have been raped in their lifetime. This course will examine the public health issue of rape culture and what contributes to it.

HLTH 095D2 LGBTQ Health Disparities The course promotes an understanding and appreciation of backgrounds and/or orientations related to sex, gender identity or expression, and sexual orientation.

HLTH 101 Introduction to Integrative Health This course examines views and techniques of specific integrative modalities, and the challenges to implementation of IHC.

HLTH 195 (Formerly HLTH 102) Science and Evidence in Complementary and Alternative Therapies Is there an invisible energy force flowing inside of our bodies? Can the state of our mind and spirit either cause or heal our physical ailment? These questions may sound irrational because they seem to be out of alignment with modern medicine. Yet, they are the fundamental principles of a group of therapies in Complementary and Alternative Medicine (CAM).

HLTH 195A Obesity Obesity is a biopsychosocial condition, often caused by a combination of cognition and affect (thinking and feeling) which leads to a behavior (overeating) which occurs in a home life which is affected by a culture. Understanding more about these can help individuals lose weight and keep it off, and can also help medical, nursing, nutrition, psychology and social work professionals gain more empathy for these patients and become more effective health care providers for them.

HSCI 195 INTRODUCTION TO HEALTH COMMUNICATION This survey course will explore health communication as an emerging and exciting specialty in communication studies and health sciences.
