***** SECTION 1 - Product and Company Identification *****

Manufacturer: E.I. DuPont de Nemours & Co.
Fluoroproducts
Wilmington, DE, 19898

Telephone: Product Information: (800) 441-7515
Medical Emergency: (800) 441-3637
Transportation Emergency: (800) 424-9300 (CHEMTREC)

PRODUCT NAME: TOPCOAT CLEAR

PRODUCT CODE: 456N-41350 *hev*

Chemical Family: No Information Available

Copyright 2003 E.I. duPont de Nemours and Company. All rights reserved. Copies may be made only for those using DuPont products.

***** SECTION 2 - Composition, Information on Ingredients *****

CAS #	Ingredient	Concentration/ Range (%)	Exposure Limits**
60828-78-6	POLYETHYLENE GLYCOL TRIM-ETHYLNONYLETER		A None O None
60828-78-6	POLYETHYLENE GLYCOL TRIM-ETHYLNONYL ETHER		A None O None
90C2-84-0	POLYTETRAFLUOROETHYLENE		O 15.0 mg/m3 Total Dust PNOR O 5.0 mg/m3 Respirable Dust PNOR D 10.0 mg/m3 Total Dust D 5.0 mg/m3 Respirable Dust A None
26655-00-5	PERFLUOROALKOXY RESIN		A None C None
7732-18-5	WATER		A None O None
Not Avail	ACRYLIC POLYMER		A None O None

***** SECTION 2 - Composition, Information on Ingredients ***** Cont'd

112-34-5	ETHANOL, 2-(2-BUTOXYETHOXY)-	2	D	5.0 ppm
			A	None
			O	None
102-71-6	TRIETHANOLAMINE		A	None
			O	None

OSHA HAZARDOUS? Yes

* A = ACGIH, O = OSHA, D = Dupont, S = Supplier (For additional definition of terms, see Section 16). Limits are 8-hour TWA unless otherwise specified.

***** SECTION 3 - Hazards Information *****

Emergency Overview:

WARNING! VAPORS AND SPRAY MIST HARMFUL IF INHALED. MAY CAUSE NOSE, THROAT, EYE AND SKIN IRRITATION.

Potential Health Effects:

Inhalation:

May cause nose and throat irritation.

Ingestion:

May result in gastrointestinal distress.

Skin or eye contact:

May cause irritation or burning of the eyes. Repeated or prolonged liquid contact may cause skin irritation with discomfort and dermatitis.

Other Potential Health Effects in addition to those listed above:

POLYETHYLENE GLYCOL TRIMETHYLNONYL ETHER

Eye contact may cause any of the following: severe irritation
corneal injury

POLYTETRAFLUOROCETHYLENE

Inhalation of fluoropolymer dust may cause irritation of the nose, throat and lungs with cough, difficulty breathing or shortness of breath. Inhalation of fumes (fine particulates) and gases produced from overheated fluoropolymer may result in delayed or immediate respiratory effects. The severity of these effects depends on the extent of overheating and the quantity inhaled. Mild exposure may result in polymer fume fever, a temporary (24-48 hrs) flu-like condition characterized by fever, chills, and/or cough. These symptoms are not immediate and typically occur after a delay of approximately 4-24 hours following exposure. However, exposure to decomposition products (fume and fluorinated gases) from fluoropolymer heated to temperatures above the typical processing temperature, especially in poorly ventilated or confined spaces, may

***** SECTION 3 - Hazards Information *****
Cont'd

cause extensive and potentially life-threatening lung damage. These decomposition products may produce progressive breathing difficulty and later develop into severe pulmonary edema. Edema may be delayed and unlike polymer fume fever, requires medical intervention.

Do not exceed recommended baking temperatures. Baking ovens must be properly ventilated. At temperatures above 400 C (750 F), small amounts of hydrogen fluoride can be evolved; amounts increase as temperatures increase. Hydrogen fluoride is toxic and can cause skin and eye irritation. (3ppm - ceiling ACGIH-TLV). High concentrations can cause lung damage, pulmonary edema, burns. Some vegetation is particularly sensitive to damage by hydrogen fluoride and attention must be given to exhaust ventilation. Explosive reaction may occur above 800 degrees F with finely divided fluorocarbon and metal powder (aluminum or magnesium). Operations such as grinding, buffing or grit blasting may generate such mixtures. Avoid any dust buildup with fluorocarbons and metal mixtures.

WARNING: This chemical contains Tetrafluoroethylene which is known to the State of California to cause cancer.

PERFLUOROALKOXY RESIN

Inhalation of fluoropolymer dust may cause irritation of the nose, throat and lungs with cough, difficulty breathing or shortness of breath. Inhalation of fumes (fine particulates) and gases produced from overheated fluoropolymer may result in delayed or immediate respiratory effects. The severity of these effects depends on the extent of overheating and the quantity inhaled. Mild exposure may result in polymer fume fever, a temporary (24-48 hrs) flu-like condition characterized by fever, chills, and/or cough.

These symptoms are not immediate and typically occur after a delay of approximately 4-24 hours following exposure. However, exposure to decomposition products (fume and fluorinated gases) from fluoropolymer heated to temperatures above the typical processing temperature, especially in poorly ventilated or confined spaces, may cause extensive and potentially life-threatening lung damage. These decomposition products may produce progressive breathing difficulty and later develop into severe pulmonary edema. Edema may be delayed and unlike polymer fume fever, requires medical intervention.

Do not exceed recommended baking temperatures. Baking ovens must be properly ventilated. At temperatures above 400 C (750 F), small amounts of hydrogen fluoride can be evolved; amounts increase as temperatures increase. Hydrogen fluoride is toxic and can cause skin and eye irritation. (3ppm - ceiling ACGIH-TLV). High concentrations can cause lung damage, pulmonary edema, burns. Some vegetation is particularly sensitive to damage by hydrogen fluoride and attention must be given to exhaust ventilation. Explosive reaction may occur above 800 degrees F with finely divided fluorocarbon and metal powder (aluminum or magnesium). Operations such as grinding, buffing or grit blasting may generate such mixtures. Avoid any dust buildup with fluorocarbons and metal mixtures.

***** SECTION 3 - Hazards Information ***** Cont'd

Do not exceed recommended baking temperatures. Baking ovens must be properly ventilated. At temperatures above 400 C (750 F), small amounts of carbonyl fluoride can be evolved. This substance irritates the eyes, the skin and respiratory tract. Inhalation of high concentrations may cause lung edema. The effects may be delayed. Individuals with preexisting diseases of the lungs may have increased susceptibility to the toxicity of excessive exposures from thermal decomposition products.

WARNING: This chemical contains Tetrafluoroethylene which is known to the State of California to cause cancer.

ACRYLIC POLYMER

Increased susceptibility to the effects of this material may be observed in people with preexisting disease of any of the following: skin

ETERNOL, 2-(2-BUTOXYETHOXY)-

Increased susceptibility to the effects of this material may be observed in people with preexisting disease of any of the following: central nervous system eyes kidneys liver skin

Tests in laboratory animals have shown effects on any of the following organs/systems: blood kidneys liver

Recurrent overexposure may result in liver and kidney injury.

High doses in laboratory animals have shown non specific effects such as irritation, weight loss, moderate blood changes.

Eye contact may cause any of the following: severe irritation burns corneal injury

TRIETHANOLAMINE

Can be absorbed through the skin in harmful amounts.

Recurrent overexposure may result in liver and kidney injury.

Liquid splashes in the eye may result in chemical burns.

NOTE:

If a chemical listed above is not identified as a carcinogen it is not an "IARC, NTP, or OSHA carcinogen".

***** SECTION 4 - First Aid Measures *****

First Aid Procedures:

Inhalation:

If affected by inhalation of vapor or spray mist, move to fresh air.

If not breathing, give artificial respiration, preferably mouth-to-mouth. If breathing difficulty persists, or occurs later, consult a physician.

Ingestion:

In the unlikely event of ingestion, DO NOT INDUCE VOMITING. Call a physician immediately and have names of ingredients available.

Skin or eye:

***** SECTION 4 - First Aid Measures *****

Cont'd

In case of eye contact, immediately flush with plenty of water for at least 15 minutes; call a physician. In case of skin contact, wash thoroughly with soap and water. If irritation occurs, contact a physician.

***** SECTION 5 - Firefighting Measures *****

Flash Point (Method)	Above 200 deg F	Closed Cup
Approx. flammable limits	No Information Available	
Auto ignition temperature	No Information Available	

Hazardous Combustion Products:

CO, CO2, smoke, and oxides of any heavy metals that are reported in "Composition, Information on Ingredients" section.

Extinguishing media:

Universal aqueous film-forming foam, carbon dioxide, dry chemical.

Special fire fighting procedures:

Full protective equipment, including self-contained breathing apparatus, is recommended. Water from fog nozzles may be used to prevent pressure build-up.

Fire & explosion hazards:

Combustible liquid. When heated above the flashpoint, emits vapors which, when mixed with air, will burn if an ignition source is present. Fine mist or sprays could ignite at temperatures below the flashpoint.

***** SECTION 6 - Accidental Release Measures *****

Procedures for cleaning up spills or leaks:

Ventilate area. If heated above the flashpoint, remove sources of ignition. Prevent skin and eye contact and breathing of vapor.

Wear a properly fitted air-purifying respirator with organic vapor cartridges (NIOSH approved TC-23C), eye protection, gloves and protective clothing. Confine, remove with inert absorbent, and dispose of properly.

***** SECTION 7 - Handling and Storage *****

Precautions to be taken in handling and storing:

Observe label precautions. Close container after each use. If heated above its flash point, this must be handled as if it were a flammable liquid. Do not transfer contents to bottles or unlabeled containers. Wash thoroughly after handling and before eating or smoking. Do not

OSHA/NIOSH Storage Classification:

III

Other precautions:

If material is a coating: do not sand, flame cut, braze or weld dry coating without a NIOSH approved respirator or appropriate ventilation, and gloves.

DUPONT MATERIAL SAFETY DATA SHEET

Page: 6
03/07/2006

***** SECTION 8 - Exposure Controls or Personal Protection *****

Engineering controls and work practices:

Ventilation:

Provide sufficient ventilation in volume and pattern to keep contaminants below applicable exposure limits.

Personal Protective Equipment:

Personal protective equipment should be worn to prevent contact with eyes, skin or clothing.

Respiratory:

Do not breathe vapors or mists. Wear an appropriate, properly fitted NIOSH approved respirator during application and until all vapors and spray mists are exhausted unless air monitoring demonstrates vapor/mist levels are below applicable limits. If respirators are required, use a properly fitted air-purifying respirator with organic vapor cartridges (NIOSH approved TC-23C) and particulate filter (NIOSH TC-84A). In confined spaces, or in situations where continuous spray operations are typical, or if proper air-purifying respirator fit is not possible, wear a positive pressure, supplied-air respirator (NIOSH TC-19C). In all cases, follow respirator manufacturer's directions for respirator use.

Protective clothing:

Neoprene gloves and coveralls are recommended.

Eye protection:

Desirable in all industrial situations. Goggles are preferred to prevent eye irritation. If safety glasses are substituted, include splash guard or side shields.

***** SECTION 9 - Physical and Chemical Properties *****

Evaporation Rate	Slower than Ether
Vapor Pressure of principal solvent	0.01 mm @ 20 Deg C
Solubility of solvent in water	NIL
Vapor density of principal solvent (Air = 1)	5.10
Approx. Boiling range	100 - 365 DEG (C)
Approx. Freezing range	327 - 342 DEG (C)
Gallon weight (lbs/gal)	11.28
Specific gravity	1.35
Percent volatile by volume	37.81
Percent volatile by weight	45.66
Percent solids by volume	62.19
Percent solids by weight	54.34
Physical state	Liquid
pH (waterborne systems only)	No Data Available
VOC* less exempt (lbs/gal)	2.1
VOC* as packaged (lbs/gal)	1.0

* VOC less exempt (theoretical) and VOC as packaged (theoretical) are based upon the VOC of the packaged material at the point of manufacture.

Key:

AC EPCRA: Emergency Planning and Community Right-to-Know Act (aka Title III, SARA)

HP 302: Extremely hazardous substances

HP 311/312 Categories: F = Fire Hazard A = Acute Hazard
R = Reactivity Hazard C = Chronic Hazard
P = Pressure Related Hazard

HP 313 Information: Section 313 Supplier Notification - The chemicals listed above with a 'Y' in the 313 column are subject to reporting requirements of Section 313 of the Emergency Planning and Community Right-to-Know act of 1986 and of 40 CFR 372.

CERCLA: Comprehensive Emergency Response, Compensation and Liability Act of 1980.

HAP = Listed as a Clean Air Act Hazardous Air Pollutant

TPQ = Threshold planning quantity

RQ = Reportable quantity

NA = not available

NR = not regulated

***** SECTION 16 - Additional Information *****

HMIS Rating: H: 1 F: 1 R: 0

Glossary of Terms:

- ACGIH - American Conference of Governmental Industrial Hygienists
- IARC - International Agency for Research on Cancer
- NTP - National Toxicology Program
- OSHA - Occupational Safety and Health Administration
- STEL - Short term exposure limit
- TWA - Time-weighted average
- PNOR - Particles not otherwise regulated
- PNOC - Particles not otherwise classified

Caution: Do not use in medical applications involving permanent or temporary implantation in the human body. For further information, see "DuPont Medical Caution Statement." H-50102.
