## OSETS PROJECT \#060508 - UVM DELEHANTY GEOLOGY LAB AIR-HANDLER PERFORMANCE TESTING FINAL REPORT

CLEANROOM CERTIFICATION REPORT<br>Conducted by:<br>One Source Environmental Testing Services<br>PO Box 64941<br>Burlington, Vermont 05406-4941

DATA CONTAINED WITHIN THIS REPORT REPRESENTS A PRECISE ACCOUNT OF CLEANROOM PERFORMANCE. THE RESULTS AND INFORMATION PRESENTED ARE CERTIFIED TO BE ACCURATE, AND COMPLETE TO THE EXTENT POSSIBLE BASED ON EQUIPMENT AND PROCEDURES USED DURING PERFORMANCE TESTING.

CLEANROOM EVALUATION WAS CONDUCTED IN COMPLETE ACCORDANCE WITH NEBB PROCEDURAL STANDARDS, IEST PROCEDURAL STANDARDS AND ISO 14644-1 \& 2.

ONE SOURCE ENVIRONMENTAL TESTING SERVICES WARRANTS THAT THE CLEANROOM EVALUATED DURING THIS CERTIFICATION PROCESS WAS OPERATING AT THE LEVELS DOCUMENTED WITHIN THIS REPORT, AT AND ONLY AT THE TIME OF DATA ACQUISION. WE MAKE NO OTHER WARRANTIES, STATED OR IMPLIED, CONCERNING THE CONTINUED PERFORMANCE OR SAFE OPERATION OF THE CLEANROOM DESCRIBED HEREIN.

Attention: Mr. Mike Stevens<br>Project Manager

## Reference: OSETS PROJECT \#060508 - UVM DELEHANTY GEOLOGY LAB AIR-HANDLER PERFORMANCE TESTING FINAL REPORT

Dear Mr. Stevens:
We are pleased to submit to you our Final Report associated with the project listed above at the UVM Delehanty Geology Lab located in Burlington Vermont. One Source Environmental Testing Services (OSETS) performed Air-Handler Particle Removal Efficiency Performance Testing. All of the tests were conducted during an "At Rest" Facility operating mode.

OSETS was tasked with testing the filter efficiency within the Air Handling system located at the UVM Trinity Campus Delehanty Hall facility. We did this by sampling the incoming air at the Air Handler Intake and then sampling the Air supply exiting the ducts at the two Diffusers within the lab area proper. This raw data accompanied with our efficiency calculations are presented herein. Note: A 100/1 diluter (calibrated orifice) was used to prevent over concentration of the laser particle counter used to acquire the samples. Because of the relatively small populations at the larger particle sizes, combined with the dilution factor, resultant efficiency percentages for the 1.0 and 5.0 micrometer particle sizes appear skewed.

# Source Environmental OSETS Project \#060508 UVM Delehanty Hall Lab Testing 

Larger particle sizes scewed
Outside conditions were windy which affected particle populations

## SUMMARY

We have enjoyed this opportunity to be of service and look forward to future opportunities to support the UVM Delehanty Geology Lab in Burlington, Vermont. It is our sincere hope that the data contained within this report is informative and useful in assessing overall equipment performance. Comments included in this report regarding test blanking plates, etc. are intended to help facilitate future testing. Should you have specific questions regarding any of the test results discussed in this report or if we may be of further assistance please don't hesitate to contact us.

Sincerely,

## A. One Source Environmental Testing Services

## Report Of Calibration

## Model :

Sensor ID :
Serial Number :

## Solair 1100+

Calibration has been accomplished by comparison with standards maintained by LIGHTHOUSE WORLDWIDE SOLUTIONS. The accuracy and stability of standards maintained by LIGHTHOUSE WORLDWIDE SOLUTIONS are traceable to the National Institute of Standards and Technology, or have been derived from acceptable values of natural physical constants. A record of all work performed is maintained by LIGHTHOUSE WORLDWIDE SOLUTIONS, INC.

Calibration has been accomplished by size calibration as defined by ASTM F328-98 and applicable sections of JIS B 9921

## Test Equipment:

Flow Meter s/n: 101501
DMM s/n: 91110178

Calibration Due: January 24, 2008
Calibration Due: April 11, 2008

Calibration was performed under the following controlled conditions:
Temperature: $\quad \mathbf{7 4 . 1}{ }^{\circ} \mathrm{F} \quad$ Relative Humidity: $\quad \mathbf{3 1 . 1} \% \quad$ Flow Rate: $\quad \mathbf{1 . 0 0 2} \mathbf{C F M}$
This certifies the above named instrument conforms to the original specifications in effect at time of manufacture.
Final Test Date: November 12, 2007
