Washington	59,379	59,132	-247	-0.4%
Windham	44,438	43,858	-580	-1.3%
Windsor	56,891	56,150	-741	-1.3%

This report provides estimates of population change between Decennial Census years using two, independent ACS 5-year estimate periods.

- Vermont's population grew by 2,346 or 0.4% between the two ACS time periods.
- The county with the greatest percent increase in population was Lamoille County with 4.1%, or nearly 1,000 additional residents.
- Rutland County experienced the greatest percent and absolute population losses with a 2.8% decrease, representing a loss of around 1,748 residents.
- The county with the greatest absolute change was Chittenden County with an increase of 4,982 people, or 3.2%.

The Vermont State Data Center is designated by the Governor, with funding provided through the Agency of Commerce and Community Development, to:

- Coordinate with the U.S. Census Bureau on local data collection and feedback processes to ensure efficient and accurate VT data production;
- Represent Vermont data producers and users at the Federal level;
- Provide technical assistance to VT data users in accessing and using Census data, and;
- Conduct outreach and education that facilitates data-driven research, administration, planning and decision making.
