10/17/2016 Andreas Ertl, Institute of Mineralogy and Crystallography, University of Vienna, Austria:
“Tourmaline: not only beautiful, but also scientifically interesting”

10/24/2016 Ronald Hellmann, Institute for Earth Sciences, University of Grenoble, France:
“Fluid-mineral and fluid-glass interactions at the nanometer scale”

10/31/2016 Ashley Dere, Department of Geography and Geology, University of Nebraska at Omaha, NE:
"Climate controls on shale weathering."

11/07/2016 Thomas Johnson, Large Lakes Observatory, University of Minnesota at Duluth, MN:
"A 1.3 million year history of rainfall and temperature from the southern tropics of East Africa: Implications for early human migration and evolution."

11/14/2016 Alain Tremblay, Department of Earth and Atmospheric Sciences, University of Quebec Montreal, Canada:
"Structural correlations and comparative tectonic evolution of the Quebec-New England Appalachians"

Sponsored by the Department of Geology Visiting Lecture Series
