

Erratum for Fisher et al. 2011, <http://onlinelibrary.wiley.com/doi/10.1111/j.1755-263X.2011.00198.x/abstract>

doi: 10.1111/j.1755-263X.2012.00246.x

In the Fisher et al. article “Cost effective conservation: calculating biodiversity and logging tradeoffs in Southeast Asia,” only the first half on Table 1 was published. Below, please find the entirety of Table 1. We apologize for the error.

Table 1 Total number of individuals of IUCN Red-listed bird species recorded in each forest type—unlogged (UL), once-logged (1L), and twice-logged (2L)—using point counts and mist netting. Species in **bold** are endemic to Borneo. IUCN status: NT = Near-threatened; VU = Vulnerable

Species	IUCN	Point counts			Mist nets		
		UL	1L	2L	UL	1L	2L
<i>Arborophila charltonii</i>	NT	10	14	21			
<i>Rollulus roulroul</i>	NT	1	0	0			
<i>Lophura ignita</i>	NT	0	2	3			
<i>Argusianus argus</i>	NT	36	13	6			
<i>Ichthyophaga humilis</i>	NT	1	0	0			
<i>Spizaetus nanus</i>	VU	1	1	1			
<i>Treron capellei</i>	VU	3	0	0			
<i>Psittinus cyanurus</i>	NT	2	0	13			
<i>Psittacula longicauda</i>	NT	1	0	0			
<i>Cuculus vagans</i>	NT	4	5	0	1	0	0
<i>Carpococcyx radiatus</i>	NT	2	2	0			
<i>Centropus rectunguis</i>	VU	15	9	15			
<i>Batrachostomus auritus</i>	NT	1	0	0			
<i>Harpactes kasumba</i>	NT	10	5	0			
<i>Harpactes diardii</i>	NT	22	17	6	0	1	2
<i>Harpactes orrhophaeus</i>	NT	1	0	0			
<i>Harpactes duvaucelii</i>	NT	13	3	12	0	0	3
<i>Actenoides concretus</i>	NT				5	0	1
<i>Alcedo euryzona</i>	VU				0	6	0
<i>Anthraceros malayanus</i>	NT	14	7	16			
<i>Buceros rhinoceros</i>	NT	42	24	11			
<i>Rhinoplax vigil</i>	NT	24	8	3			
<i>Aceros comatus</i>	NT	7	2	0			
<i>Megalaima mystacophanos</i>	NT	19	17	31			
<i>Megalaima henrici</i>	NT	18	2	1			
<i>Indicator archipelagicus</i>	NT				1	0	0
<i>Dinopium rafflesii</i>	NT	0	0	1			
<i>Meiglyptes tukki</i>	NT	16	10	9	1	2	3
<i>Calyptomena viridis</i>	NT	3	4	3	5	0	1
