Limits to what's possible:

Universality (田):

- ▶ The property that the macroscopic aspects of a system do not depend sensitively on the system's details.
- ▶ Key figure: Leo Kadanoff (田).

Examples:

- ▶ The Central Limit Theorem:

$$P(x; \mu, \sigma)dx = \frac{1}{\sqrt{2\pi}\sigma} e^{-(x-\mu)^2/2\sigma^2} dx.$$

- ▶ Navier Stokes equation for fluids.
- ▶ Nature of phase transitions in statistical mechanics.

Whimsical but great example of real science:

Why Complexity?

“How Cats Lap: Water Uptake by *Felis catus*” (田)

Reis et al., *Science*, 2010.

A Study of Cat Lapping

Adult cats and dogs are unable to create suction in their mouths and must use their tongues to drink. A dog will scoop up liquid with the back of its tongue, but a cat will only touch the surface with the smooth tip of its tongue and pull a column of liquid into its mouth.
