2015 FIRE SAFETY REPORT

TABLE OF CONTENTS

Introduction.....	3
Description of Fire Safety Systems in Student Housing.....	4
Fire Statistics for Student Housing.....	9
Housing Fire Safety Policies and Procedures.....	15
Fire Safety Education and Training.....	17
Current Information for the Campus Community.....	18
Plans for Future Fire Safety Improvements.....	18

INTRODUCTION

On August 14, 2008 the Higher Education Opportunity Act (HEOA) was signed into law. The HEOA requires institutions maintaining on-campus student housing facilities to publish annual fire safety reports containing information about campus fire safety practices and standards.

The University of Vermont is committed to fire and life safety. UVM has a full-time Fire Marshal in the Department of Risk Management and Safety, dedicated to fire safety for students, faculty, staff, and visitors. UVM works closely with the local municipal fire department (Burlington Fire Department) and the Vermont Division of Fire Safety to meet or exceed applicable local and state code requirements in UVM buildings. UVM has received two awards from FM Global, a leader in property protection, for campus fire protection programs.

All on-campus residence halls are equipped with automatic fire sprinkler systems, automatic fire and carbon monoxide alarm systems that notify occupants and initiate a fire department and police response, and portable fire extinguishers for use by trained persons. Cooking equipment, including kitchens designated for student use, are protected by automatic cooking fire suppression systems. All fire protection systems are inspected regularly by UVM staff and inspected and tested by qualified contractors.

The Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act or “Clery Act” requires disclosure of information regarding crime on or near the campus. This report is compiled by University of Vermont Police Services and can be accessed at:

<http://www.uvm.edu/police/reports/clery/public-safety-report.pdf>

Paper copies may be obtained from Police Services by calling (802) 656-2027 or writing to UVM Police Services, 284 East Avenue, Burlington, VT 05405.

Questions about fire safety at UVM should be directed to:

John Marcus, Certified Fire Protection Specialist, University Fire Marshal
284 East Avenue, Burlington, VT 05405

(802) 656-3242

firesafe@uvm.edu

DESCRIPTIONS OF FIRE SAFETY SYSTEMS IN STUDENT HOUSING FACILITIES

On-Campus Residence Halls:

Harris Millis Complex, 67 Spear Street, Burlington Vermont

Fire safety systems: fire and carbon monoxide alarm system, automatic sprinkler system, fire department standpipe system, portable fire extinguishers, commercial and residential cooking fire suppression systems, fire department master radio call box.

Living Learning Complex, 633 Main Street, Burlington Vermont

Fire safety systems: fire and carbon monoxide alarm system, automatic sprinkler system, fire department standpipe system, portable fire extinguishers, commercial and residential cooking fire suppression systems, fire department master radio call box.

Marsh Austin Tupper Complex, 31 Spear Street, Burlington Vermont

Fire safety systems: fire and carbon monoxide alarm system, automatic sprinkler system, fire department standpipe system, portable fire extinguishers, commercial and residential cooking fire suppression systems, fire department master radio call box.

University Heights North and South Complexes, 30, 50, 70, 90 University Heights, Burlington Vermont

266,322 square foot masonry with metal studding 756 bed residence hall and office complex. Fire safety systems: fire and carbon monoxide alarm system, automatic sprinkler system, fire department standpipe system, fire pump, portable fire extinguishers, residential cooking fire suppression systems, fire department master radio call box.

Chittenden Buckham Wills Complex***, 71, 73, 79 Colchester Avenue, Burlington Vermont

Fire safety systems: fire and carbon monoxide alarm system, automatic sprinkler system, fire department standpipe system, fire pump, portable fire extinguishers, residential cooking fire suppression systems, fire department master radio call box.

*****NOTE: This complex was demolished in May and June of 2015 as part of a construction project and no longer exists. Included for fire statistics reporting.**

Converse Hall, 75 Colchester Avenue, Burlington Vermont

Fire safety systems: fire and carbon monoxide alarm system, automatic sprinkler system, fire department standpipe system, fire pump, portable fire extinguishers, residential cooking fire suppression systems, fire department master radio call box.

Christie Wright Patterson Complex, 436 South Prospect Street, Burlington Vermont

Fire safety systems: fire and carbon monoxide alarm system, automatic sprinkler system, fire department standpipe system, portable fire extinguishers, residential cooking fire suppression systems, fire department master radio call box.

Coolidge Hall, 402 South Prospect Street, Burlington Vermont

Fire safety systems: fire and carbon monoxide alarm system, automatic sprinkler system, portable fire extinguishers, residential cooking fire suppression systems, fire department master radio call box.

Mason Simpson Hamilton Complex, 438 South Prospect Street, Burlington Vermont

Fire safety systems: fire and carbon monoxide alarm system, automatic sprinkler system, fire department standpipe system, portable fire extinguishers, commercial and residential cooking fire suppression systems, fire department master radio call box.

Redstone Hall, 376 South Prospect Street, Burlington Vermont

Fire safety systems: fire and carbon monoxide alarm system, automatic sprinkler system, portable fire extinguishers, residential cooking fire suppression systems, fire department master radio call box.

Slade Hall**, 420 South Prospect Street, Burlington Vermont

Fire safety systems: fire and carbon monoxide alarm system, automatic sprinkler system, portable fire extinguishers, residential cooking fire suppression systems, fire department master radio call box.

****NOTE: Slade Hall has been unoccupied since May 2014 pending a major renovation project. Expected opening in fall of 2017. Included for 2013-14 statistics reporting.**

Wing Davis Wilks Complex, 486 South Prospect Street, Burlington Vermont

Fire safety systems: fire and carbon monoxide alarm system, automatic sprinkler system, fire department standpipe system, portable fire extinguishers, residential cooking fire suppression systems, fire department master radio call box.

Jeanne Mance Hall, 394 Pearl Street, Burlington Vermont

Fire safety systems: fire and carbon monoxide alarm system, automatic sprinkler system, fire department standpipe system, portable fire extinguishers, residential cooking fire suppression systems, fire department master radio call box.

Mercy Hall, 230 Colchester Avenue, Burlington Vermont

Fire safety systems: fire and carbon monoxide alarm system, automatic sprinkler system, fire department standpipe system, fire pump, portable fire extinguishers, residential cooking fire suppression systems, fire department master radio call box.

McAuley Hall, 250 Colchester Avenue, Burlington Vermont

Fire safety systems: fire and carbon monoxide alarm system, automatic sprinkler system, fire department standpipe system, portable fire extinguishers, residential cooking fire suppression systems, fire department master radio call box.

Hunt Hall, 248 Colchester Avenue, Burlington Vermont

Fire safety systems: fire and carbon monoxide alarm system, automatic sprinkler system, portable fire extinguishers, residential cooking fire suppression systems, fire department master radio call box.

McCann Hall, 240 Colchester Avenue, Burlington Vermont

Fire safety systems: fire and carbon monoxide alarm system, automatic sprinkler system, portable fire extinguishers, residential cooking fire suppression systems, fire department master radio call box.

Ready Hall, 246 Colchester Avenue, Burlington Vermont

Fire safety systems: fire and carbon monoxide alarm system, automatic sprinkler system, portable fire extinguishers, residential cooking fire suppression systems, fire department master radio call box.

Richardson Hall, 242 Colchester Avenue, Burlington Vermont

Fire safety systems: fire and carbon monoxide alarm system, automatic sprinkler system, portable fire extinguishers, residential cooking fire suppression systems, fire department master radio call box.

Sichel Hall, 244 Colchester Avenue, Burlington Vermont

Fire safety systems: fire and carbon monoxide alarm system, automatic sprinkler system, portable fire extinguishers, residential cooking fire suppression systems, fire department master radio call box.

The Cottages

252 Colchester Avenue, Burlington Vermont Fire safety systems: automatic sprinkler system, fire and carbon monoxide alarms, portable fire extinguishers.

254 Colchester Avenue, Burlington Vermont Fire safety systems: automatic sprinkler system, fire and carbon monoxide alarms, portable fire extinguishers.

256 Colchester Avenue, Burlington Vermont Fire safety systems: automatic sprinkler system, fire and carbon monoxide alarms, portable fire extinguishers.

258 Colchester Avenue, Burlington Vermont Fire safety systems: automatic sprinkler system, fire and carbon monoxide alarms, portable fire extinguishers.

439 College Street, Burlington Vermont Fire safety systems: fire and carbon monoxide alarm system, automatic sprinkler system, fire pump, portable fire extinguishers, residential cooking fire suppression systems, fire department master radio call box.

UVM purchased building with several students residing there July 2014, in use as a residence hall beginning August 2015.

Leased and Other Student Housing:

The Higher Education Opportunity Act also requires inclusion in this report of any student housing facility that “is located on property that is owned or controlled by the institution, and is within the reasonably contiguous geographic area that makes up the campus.” Fire statistics for these properties are included below.

Redstone Apartments, 500 South Prospect Street, Burlington Vermont were financed, constructed and are managed by a private developer. The project was built on land owned by the University of Vermont, under a long-term ground lease to the developer. Fire safety systems: automatic sprinkler system, portable fire extinguishers, and a residential fire detection system, which includes smoke detectors and carbon monoxide detectors.

Redstone Lofts, 165 Davis Road, Burlington Vermont were financed, constructed and are managed by a private developer. The project was built on land owned by the University of Vermont, under a long-term ground lease to the developer and opened in 2012. Fire safety systems: automatic sprinkler system, portable fire extinguishers, fire alarm system including smoke and carbon monoxide detection, fire department master radio call box.

Centennial Court Apartments, 14 Centennial Court, Burlington Vermont are apartments on University of Vermont land, financed, constructed and managed by a private developer. University of Vermont graduate students rent some of the units. Fire safety systems: portable fire extinguishers, smoke and carbon monoxide alarms and an automatic sprinkler system.

50 Fletcher Place, Burlington Vermont was used to house several UVM continuing education students from May to November 2014. Fire safety systems: smoke and carbon monoxide alarms, portable fire extinguishers.

Sheraton Hotel, 870 Williston Road, South Burlington Vermont is being used to house 114 UVM undergraduate students as of August 2015 pending construction of a new on campus residence hall. Fire safety systems: automatic sprinkler systems, portable fire extinguishers, fire alarm system including smoke and carbon monoxide detection.

Quarry Hill Apartments, 326 Quarry Hill Road, South Burlington Vermont are being used to house 120 UVM undergraduate students as of August 2015 pending construction of a new on campus residence hall. Fire safety systems: automatic sprinkler systems, portable fire extinguishers, fire alarm system including smoke and carbon monoxide detection

FIRE STATISTICS FOR STUDENT HOUSING FOR THREE MOST RECENT CALENDAR YEARS

FIRE STATISTICS FOR UVM STUDENT HOUSING CALENDAR YEAR 2015¹

LOCATION	FIRES	CAUSE	DEATHS	INJURIES	DAMAGE	FIRE DRILLS
HARRIS MILLIS 67 Spear St Burlington VT	0		0	0		1
LIVING/LEARNING 633 Main St Burlington VT	1	Intentional- toilet paper set on fire	0	0	\$0-99	1

HOUSING FIRE SAFETY POLICIES AND PROCEDURES

The following information is reprinted from the University of Vermont Department of Residential Life Housing and Meal Plan Contract Terms and Conditions. A copy of the current year terms and conditions can be found online at https://reslife.uvm.edu/files/reslife_contract.pdf

During the year, residence hall students will be informed about emergency evacuation of residence halls, and alarm systems will be tested periodically to ensure proper functioning.

Evacuation Procedures

Residents are required to evacuate the building immediately when a fire alarm sounds. Failure to evacuate residence hall facilities is a federal offense and will result in educational sanctions and fines. The following fines will be levied for first, second and third time offenders:

- First offense: \$25
- Second offense: \$75
- Third offense: \$500

All fines will be posted to the student's account and must be paid prior to course registration or room selection.

Abuse, Tampering, and/or Misuse of Fire and Carbon Monoxide Safety Equipment

Abuse or tampering with any life safety equipment or misuse of fire extinguishing equipment is strictly prohibited and will not be tolerated. Life safety equipment includes fire and carbon monoxide alarm systems and any of their components, exit signs, emergency lights, fire and exit doors and hardware, and identification signs used by emergency responders. Offenders are subject to disciplinary action and **fines up to \$500**.

For additional information refer to the University Fire Safety policy at: <http://www.uvm.edu/policies/riskmgm/firesafety.pdf>

Tobacco-Free Campus

All residence halls in all locations, including student rooms, are smoke and tobacco-free. As of August 2015 the entire UVM campus is tobacco-free.

Fire Hazards and Other Prohibited Items

1. Students may not use cooking appliances or grills (including “George Foreman” electric grills) in their rooms, suites, common spaces, or in the vicinity of the residence halls. Exceptions are coffee pots with automatic shut-offs, 4.0 cubic foot refrigerators that are no more than 34” in height, 700 watt or lower microwaves, all of which are ULA listed.
2. No decorative covering or other flammable items, including but not limited to tapestries, should cover any doorway or be suspended from lofts, bunks, ceilings, exposed piping, or heating units.
3. Students may not remove screens from any residence hall windows. Hanging items outside of windows is prohibited.
4. Students may not install air conditioners.
5. Waterbeds are not permitted in the residence halls.
6. Unauthorized use of or tampering with elevators is prohibited.
7. Due to extreme risk of fire and the danger of electrical overload, the use of certain types of electrical equipment is prohibited, including: multi-plug adapters, halogen light bulbs (such as those found in most torchiere style lamps), sun lamps, immersion heaters, hot plates and other high wattage equipment, and space heaters.
8. Propping open or otherwise interfering with the closure of any entrance, exterior, or security door is prohibited.
9. Possession/use of candles, oil lamps, incense, storage of charcoal, flammable liquids such as gasoline, kerosene, “Coleman” fuels, or other items which create fire danger as a result of open flame or smoldering is prohibited.
10. Mercury thermometers, neon signs, and other items that may contain hazardous materials are prohibited.
11. Removal of University furniture, fixtures, or other property from residence hall rooms, suites, or common areas is prohibited.
12. Students may not install personal locks on any residence hall door.
13. Cinder blocks, bricks and/or other unauthorized bed risers are prohibited.
14. Extension cords are prohibited.

FIRE SAFETY EDUCATION AND TRAINING

Annual fire safety education and training is provided for the Resident Advisors (RA's.) RA's conduct mandatory meetings for their communities and are the first line of defense in residence hall fire safety. Each fall the UVM Fire Marshal attends RA training and participates in the Campus Partners Fair, speaking with RA's about fire behavior, fire prevention, and what to do in case of fire emergency.

During the year, residence hall students are informed about emergency evacuation of residence halls, and alarm systems are tested periodically to ensure proper functioning. Residents are required to evacuate the building immediately when a fire alarm sounds. Supervised fire drills are conducted during the first several weeks of the fall semester in all on-campus residence halls.

Fire safety events are held periodically on various locations around campus. These are open to the entire campus community. These events include demonstrations of common fire hazards, hands-on fire extinguisher training, and burn prevention. Annual training is also provided to Greek organizations affiliated with the University, although their housing is not university owned or controlled. Fire safety workshops are conducted for students who will be moving off campus into privately owned apartments.

University policy requires all staff, students and visitors to evacuate a building whenever a fire alarm sounds. The Fire Safety policy can be found at:
<http://www.uvm.edu/policies/riskmgm/firesafety.pdf>

Effective August 1, 2015, the University of Vermont is tobacco-free. This initiative should help cut down on nuisance fires in mulch beds and cigarette disposal containers.

Staff involved in welding or other hot work operations receive mandatory fire prevention and fire extinguisher training. All custodial services staff members receive fire prevention, fire safety, and hands-on fire extinguisher training. Staff members involved in crowd management receive training. Faculty, staff, and student groups periodically receive fire safety training customized for their situation.

The University of Vermont is currently implementing a campus wide program called "CatWatch." CatWatch coordinators in each department are provided with training materials to help them respond to emergencies, including assisting during building evacuations. Evacuation drills are conducted after the training takes place.

CURRENT INFORMATION FOR THE CAMPUS COMMUNITY

All fires should be reported to UVM Police Services by calling 911 or (802) 656-3473. Federal law requires the University of Vermont to report fire statistics. If you become aware of a fire, even after it has been extinguished, please report it to UVM Police Services at (802) 656-3473. When calling, please provide as much information as possible about the location, date, time and cause of the fire.

All on-campus fire alarms and fire incidents are recorded on the Crime and Fire Log. The log can be viewed on the UVM Police Services web site at:

<http://www.uvm.edu/~police/?Page=reports/index.php&SM=reports/nav.html>

PLANS FOR FUTURE FIRE SAFETY IMPROVEMENTS

Residence hall fire alarm systems are periodically upgraded (replaced by newer models) as needed and to utilize newer technology. All fire alarm systems, fire sprinkler systems and fire pumps are tested and inspected by third party contractors in accordance with the current Vermont Building and Fire Safety Code. Renovations to residence halls are reviewed by the University Fire Marshal as well as municipal authorities to ensure resident safety, proper functioning of fire protection systems, and satisfactory egress.
