Forage and Grain Crop Codes

(use Garden/Hort form for vegetables, fruits, lawn/turf, trees, shrubs, and flowers)

Lime and nutrient recommendations are provided on your test report specifically for the crop code(s) you identify when you submit your soil sample. Select the crop code below that best describes your management objectives. Nutrient recommendations (e.g., N and K₂O) for several forage and grain crops are adjusted based on expected yield to account for difference in nutrient demand and removal. For these crops the yield range and default are indicated below. Providing information about your expected yield, where appropriate, will improve your recommendations. If you do not supply an expected yield value, the **default** will be used.
