

Student Temporary Employment Opportunity Vermont Summer 2009

Student Internship:

- Soil Conservationist Summer Intern – Receive training in professional farm planning methods and procedures and the design and installation of environmental conservation practices needed to control soil erosion, improve wildlife habitat, conserve water use, restore wetland areas, and improve water quality of rivers and streams in and around farms. Gather and assemble field resource data for planning rotational grazing, nutrient management, and manure and other waste management.

Salary and Benefits:

- Approximately \$13.90 to \$14.40 per hour. Position location(s) in Vermont to be determined in early 2009.
- Housing stipend may be available, depending on student need and position location(s).

Additional Comments:

- Prefer students who have completed their sophomore or junior years and with course work in fields such as soil conservation, agronomy, soil science, wildlife biology, forestry, agricultural or environmental engineering, crop or plant science.

Application Procedure:

- Submit resume and college transcripts by February 1, 2009 to:
Judith M. Doerner
USDA Natural Resources Conservation Service
356 Mountain View Drive, Suite 105
Colchester, VT 05446
