

**Forest Management – FOR 272**  
**Class Project**  
**Management Plan for the Jericho Research Forest**

**Instructions:**

Use the Stewplan template to develop a management plan for the conservation trail area of the Jericho Research Forest. Your plan is due in class on May 2<sup>nd</sup>.

Computer files and supporting information available for this project are posted at:  
<http://www.uvm.edu/~wkeeton/FOR272/Project/Jericho>

Timber price information can be found at:  
<http://stumpage.uvm.edu/stumpage.php> and  
[http://www.northernwoodlands.com/mill\\_prices.php](http://www.northernwoodlands.com/mill_prices.php)

General guidelines:

A) Your management plan must address the following resource values:

1. Demonstrations of sustainable management for timber and forest products.
2. Wildlife
3. Riparian and wetland resources
4. Recreation and visitor interpretation

B) Your management plan must include stand level management scenarios and prescriptions for 4 of the conservation path (Jericho) stands visited in the field.

C) Your management plan must include a 50 year projection of harvest volume and net present value for at least one of the stands. These must be generated using NED-2 software. You must project development under the management scenario you are recommending.

D) You are required to fill in the information for the following tabs in Stewplan:

1. Site Information
  2. Goals
  3. Stands
  4. Plan
- Feel free to modify or add information to any of the tabs

F) Your management plan can include any other materials, goals, objectives, or ideas of your own choosing.
