Brandon Tracy
2017-2018 SGA Election Platform

During my two years on the Student Government senate, I have developed and extensive knowledge of how the body works and how students can best effect change in the UVM and Burlington communities. I am running for reelection because I believe that the job of empowering students and improving our university is never over. As a senator who has played a role in many key SGA projects such as the creation of a mental health awareness week (now known as Treat Yourself Week) and Reading Days reinstatement, I understand how to be actively engaged and fully utilize the platform Student Government provides. My main goal has been, and will continue to be giving students the same platform to address issues they are passionate about.

With a new incoming President and Vice President, and half of SGA senators not running for reelection, it is imperative to have senators with the insight and wisdom that only experience can provide. If reelected, I will spend my third year on senate working to assure that the progress that has been made during the previous administration is maintained and built upon. I plan to reinvigorate SGA’s marketing strategy by completely rethinking the Public Relations committee role in publicizing the valuable work done by our student body and its representatives.

A vote for Brandon Tracy is a vote for experience and a sustained commitment to the betterment of our community.
