The University of Vermont Campus Recreation Program and staff is committed to making student participation in recreational activities an essential component of their UVM experience. By providing outstanding leadership, programming, and facilities, we meet the diverse recreation needs of the student body. Our efforts are focused on activities that create positive social interaction and promote healthy lifestyles among students, faculty, and staff.

This practicum provides an opportunity for a HESA student to work alongside the Senior Associate Director of Campus Recreation, Programs in the implementation of an innovative and comprehensive student development program that focuses on the ongoing professional and personal development of all campus recreation student staff. Additionally, the student will be expected to think critically regarding the role and value of recreation in higher education institutions as it relates to participation, wellness and professional development among undergraduate students. Toward this goal, the student will be required to meet regularly with the site supervisor and work closely and consistently with professional program staff. The scope and range of the student’s experience will be determined by the student’s goals with the guidance of the site supervisor.
