Pursuing Employment in Student’s Current Assigned Field Placement

Students may not accept or pursue employment in the same agency in which he/she is a field practicum student or is planning to be a field practicum student without the documented permission of the field education coordinator. The rationale for this policy is similar to that of the policy, “Placement Within a Student’s Current Place of Employment”, in that the student role is to be protected so that the educational goals of the student are preserved. It is noteworthy that it isn’t unusual for students to gain employment in their previously assigned filed placement after their educational hours are completed.
