

# MAGDALENA KEPPEL

## FOR UVM SENATE

- **Promote Equity and Inclusion**
- **Facilitate easy access to resources**
- **Create a safer and healthier campus community**

\* \* \*

Hi everyone! My name is Magdalena, and I'm a first-year College of Nursing major with a minor in Theater! I'm running for a position in the UVM Student Government Association because I love to communicate with people and problem-solve. I consider myself an extreme extrovert. I never shy away from a tough conversation and seek to find the best solution for everyone involved. When I see something that needs to be changed I believe it's important to find avenues to create change from within.

In high school I was Treasurer of the Student Council, Vice President of our NHS chapter, and a founding member of a club called the Feminist Collective, which tackled gender equity related issues that students experienced on campus (e.g., making period products freely available and spreading awareness about sexual violence). Equity issues are extremely important to me, and I plan to continue being involved with these at UVM and on SGA if elected. Since I will be involved in two areas of study at UVM, I believe I can help more broadly represent the class of 2027, sharing our ideas with the SGA in a meaningful way.

As a first-year student experiencing the change of living on her own, I believe access to resources should be a priority. UVM has so many amazing resources, but making them more accessible and clearly communicated is the most important part of creating an engaged student body. If elected to SGA, I will work toward helping us all create the most healthy and happy community we can be.
