About Me:

What's up y'all, my name is Jack Badeer, and I'm a first year student from Connecticut. I'm currently studying Political Science and Environmental Studies. I have 2 cats and a dog.

Goals:

- Further cultivate a positive community outlook towards sustainability initiatives, more access to recreational opportunities.
- Provide a positive atmosphere for constructive criticism in order to act on community desires.
- Learn from senators the responsibilities of office

Qualifications:

My background in team sports, where I played prominent roles and many times held captaincy positions, prepared me to collaborate and fight for a group of people I love, believe in, and work hard to support. UVM has become that group of people for me. Other collaborative activities such as playing/producing music have prepared me well to handle both creative and personal differences and thrive in an environment like SGA. As a New-Englander, I feel that it is my responsibility to provide all students with the best possible experience in the region that molded me as a person. (Also as you can see from the picture below I am all about that paper and will preform my duties with the utmost diligence.)

which will allow me to return next year with a more concrete and bolder vision about what I want to accomplish for the school.

Why I'm Running:

I want to join SGA to work on the issues that all of you feel passionately about. UVM's focus on sustainability, the pursuit of intellectual growth, and fostering a community that shares these ideals are the reason I came in the first place. To be given the chance to protect and strengthen these values while simultaneously getting the chance to be involved in the community, to understand the issues needed to be addressed in order to create a positive and wholesome environment, and to do this with a committed team of bright and talented individuals would be an absolutely incredible experience that I would be very fortunate to take part in.
