The Women's Center supports all facets of women's lives -- the social, professional, spiritual, physical, intellectual & emotional. We empower women and their allies to become active leaders and global citizens in their communities. The Center advocates, educates and provides direct service and resources in support of gender equity and safety.

This practicum will introduce the intern(s) to the mission and role of the Women's Center within the UVM community. The HESA student will have the opportunity to work as an integral part of the Women's Center staff attending weekly staff meetings and shadowing professional staff in division, campus-wide and institutional committee meetings. There are opportunities to participate in the development and implementation of Women's Center programs (such as Women of Color Leadership Retreat, Women@Noon & Domestic Violence Awareness Month in the Fall and Women’s HerStory Month, Dismantling Rape Culture Conference and Sexual Violence Awareness Month in the Spring, among others).

Interns may also suggest or participate in new projects and/or research and also explore their own gender identity development, as well as other intersections of identity. All genders are welcome!
