Application deadline: February 1
Medical laboratory scientists are integral members of the healthcare team. They are experts who manage, oversee, and perform a full range of laboratory tests providing critical information in healthcare settings. Whether it is the flu, heart disease, or cancer, making a clinical diagnosis or treating a disease requires laboratory testing. Medical laboratory scientists with advanced practice skills educate other health care professionals and patients about utilization and clinical significance of laboratory tests. They also conduct evidence-based research and develop emerging technologies to advance the field and patient outcomes.

"LEARNING IN A TEACHING HOSPITAL ENVIRONMENT WAS A HUGE BENEFIT IN BOTH THE ACADEMIC AND PRACTICAL SIDES OF TRAINING TO BECOME A MEDICAL LABORATORY SCIENTIST. I ENCOUNTERED A MULTITUDE OF LEARNING OPPORTUNITIES THAT YOU COULD NOT FIND ANYWHERE ELSE."

— TIM SLUITER '16

UVM HEALTH NETWORK
UVM’s Medical Laboratory Science Master’s Program is affiliated with The University of Vermont Health Network, five partner hospitals serving the residents of Vermont and northern New York.
