

“Bio-Burner” Demo  
Wood's Market Garden, Brandon

Monday May 16th, 1:00-4:00pm

The LEI Products' "Bio-Burner" is designed for greenhouse operations, whole-home heat and small businesses, if you're looking to heat with wood pellets, wood chips, grass pellets, shell corn, etc.

The Vermont Sustainable Jobs Fund and Wood's Market Garden are hosting the LEI Products' "Bio-Burner 100" demonstration to introduce their new line of high efficiency, multi-fuel biomass burner / boiler systems in Vermont.

The Bio-Burner 100 is a 100,000 Btu/hour system (LEI Products will soon have two larger systems available; 250k and 500k Btu). The demo day is an informal opportunity to meet with the LEI representative and others interested in biomass heat as we test a variety of fuels, including wood pellets & wood chips, and higher ash fuels like switchgrass and shell corn.

Join us anytime between 1:00 and 4:00 pm on Monday May 16th (rain or shine)

This event is free and open to all.

Wood's Market Garden is located on Route 7, two miles south of Brandon village, at 93 Wood Lane.
