

Greenhouse Pest Management Workshop

Friday, June 12, 5-7pm

Killdeer Farm • 55 Butternut Rd • Norwich

Cosponsored by NOFA-VT, the VT Vegetable & Berry Growers Association and University of Vermont Extension, and USDA Risk Management Agency.

Free for: VV&BGA Members and VOF Certified Farmers

Others: \$10 for NOFA members, \$15 for non-members

Jake and Liz Guest have been growing crops at Killdeer Farm for 29 years. Their 12 greenhouses produce their own vegetable transplants, as well as bedding plants, hanging baskets, and greenhouse tomatoes for retail sale at their farm stand. Jake relies on biological controls and cultural practices to manage pests like aphids, white flies, spider mites, and thrips.

Please join Jake and Liz, Margaret Skinner, UVM Entomology Lab, and Vern Grubinger, UVM Vegetable and Berry Specialist, for a discussion of scouting procedures, pest identification, and use of biorational greenhouse IPM strategies for managing pests.

Directions: Take exit 13 (Norwich) off I-91 onto route 5 north. Stay on route 5 for about 2 ½ miles. Just after the vet clinic on left, turn left onto Butternut Road. The farm is at end of road. For more information contact NOFA-VT at (802) 434-4122
