

Soil and Soil Health

Wednesday, September 2, 5-7pm
Wellspring Farm CSA • 182 LaFirira Pl • Marshfield

Cosponsored by NOFA-VT, the VT Vegetable & Berry Growers Association, University of Vermont Extension, and USDA Risk Management Agency.

Free for: VV&BGA Members and VOF Certified Farmers
Others: \$10 for NOFA members, \$15 for non-members

Soil health is important for vegetable production, but what does that mean? We'll look at soil structure, explore the profile of a soil pit to identify compaction or root limiting layers, examine soil health tests, and discuss how they can be valuable to farmers.

Join Vern Grubinger, Heather Darby, Karen Hills, and Erica Cummings of UVM Extension, and Wendy Sue Harper of NOFA Vermont in a session designed to focus on soil health. Wellspring Farm CSA is a certified organic farm, producing mixed vegetables, herbs and flowers for its 130 member CSA in Marshfield.

Directions:

From the west: take Rte 2 east. Turn right onto Patty's Crossing after signs for Meadowcrest Campground (~4mi beyond Plainfield). Turn right to LaFirira Place. The farm is at the dead end.
From the east: Take Rte 2 west past Marshfield. Turn left onto Patty's Crossing (approx. 3 miles from Marshfield village). Follow directions above.
