Supporting and Summary Comments:

B. The unit is in a resident hall away from the Clinical Medical Center also. The Director is an LSW with a Masters in Social Service Management.

There is an MPH as Health Educator who does the Peer Program, and they will have 18 peers next semester.

There is access to health education and a lot of materials.

There is a Tobacco Grant Coordinator full-time; they have had the program for three years. There are seven peers and lots of evident of outreach.

The Marketing Coordinator is responsible for the great graphics.

There is a graduate assistant, an administrative assistant, and a number of work study students. There will be a Health and Wellness Residential Living Community starting in the fall of 2007. They will start with 100 to 150 students who will live in the same building as the Health and Wellness Center. This should be very exciting. The Assistant Director will be in charge of this program. There is a very successful tobacco program and they have a large grant from the State of Vermont, and as stated, they are doing good work.

Consultative Comments:

Suggest that a good QI study would be to look at the follow-up questionnaires at workshops, perhaps in three months, or a time to be determined after they have attended to see if any behaviors have stayed changed. This certainly would help as you plan for future programs.
