

## Farm Biosecurity Risk Assessment Scorecard

Print this form and use it to keep track of your answers as you go through the Farm Biosecurity Risk Assessment questions. Your responses are between you and whomever you would like to go over the assessment with.

The questions in this assessment are grouped by the three main ways diseases could be introduced to a farm—through animal additions, visitors, or wildlife. Circle the letter corresponding to your answer for each question. If none of the options describe your management practices, choose the one that is closest or mark the question as not applicable.

Take this opportunity to think about your management practices and ways to reduce the risk of introducing (or reintroducing) diseases to your livestock.

If you circled any letters in the high risk column, look back over these answers. The practices described are considered highly risky in terms of their potential to allow diseases to enter or spread. What steps can you take to move toward the lower risk practices?
