Paper prepared for presentation at the annual meeting of the American Political Science Association, Atlanta, September 1999.

My work on this project has benefited from conversations with many colleagues over the years. I learned especially from comments and conversations with David Laitin, Alan Ware, David Collier, Nic van de Walle, and John Zaller. My thanks to Eduardo Alemán and John Londregan for help with the data analysis, to Dean Scott Waugh of UCLA, who provided the research funds that made the data collection for this project possible, and to my research assistants for the data collection, Allyson Benton, Johanna Birnir, Kimberly Niles, John Quinn, and Cathy Sweet.
