

Michael Tully

I found an article off of [www.education.com](http://www.education.com) which was provided by the National Institute of Child Health and Development and discusses the Autism spectrum. I found this article to be very informational. The article gives an overview of what autism is, what an autism spectrum disorder is, symptoms, and treatment of Autism. This is great for anyone who works or may work with an Autistic child and needs more information.

To access the article, go to:
