How To Find Your MAC Address:

On a Windows computer:
1) Open your "Start menu"
2) On Windows XP click "Run", on Windows Vista or 7 click in the search box on the bottom of the menu.
3) Type in "cmd" (without the quotes).
4) Press the "Enter" key.
5) You should see a screen like this:

6) Enter “ipconfig –all” (without quotes) and use the scroll bar to go back to the top of the window. You will see a screen like this:

7) Your MAC address is the number to the right of where it says “Physical Address”
In this example it is 08-00-27-BA-90-D1

On A Macintosh Computer or Device:
Go to the following site and follow apple’s detailed directions.
http://support.apple.com/kb/ht1349
