College of Engineering and Mathematical Sciences
Summer Internship Program 2015

Internship Position/Title:
Environmental Engineering Intern

Company Name:
Casella Waste Systems, Inc.

Location of internship:
25 Greens Hill Lane, Rutland, VT

Company Overview:
Casella Waste Systems, Inc. is an integrated regional solid waste services company that provides collection, transfer, disposal, recycling, and resource management services to residential, industrial, and commercial customers, primarily throughout the northeastern United States. Founded in Rutland, Vermont in 1975 with a single truck, Casella has grown by anticipating and meeting changing cultural and public policy expectations about how our environment and natural resources are managed.

Job/Project Description:
The Environmental Engineering Intern will support the corporate engineering department in the development and maintenance of several initiatives:
• Construction cost database based on historical project information;
• Task Management system for environmental and regulatory compliance;
Specific activities will include research, information collection and summarization, data entry, and quality control review of deliverables. The Engineering Intern will also have the opportunity to assist regional engineering and compliance staff with project-specific tasks such as environmental sample collection, site inspections, report preparation, and construction management.

Required Skills & Qualifications:
• Must be enrolled in a civil engineering, environmental engineering, or similar degree program.
• Must have good driving record and reliable transportation.
• Ability and interest to work in both office and field settings.
• Proficiency with MS Word and Excel.

Additional Preferred Skills & Qualifications:
• Interest in sustainability, recycling, and waste management industries.
• Familiarity with construction and project management principles and practices.

Start & End Dates:
May 2015 through September 2015
Hours/week:
Up to 40

Salary/Compensation:
$15.00/hr or commensurate with experience

Company Supervisor Name:
Samuel C. Nicolai, PE, Director of Engineering
