

TFT Quick Start Sheet

Creating a Web Page with Dreamweaver MX

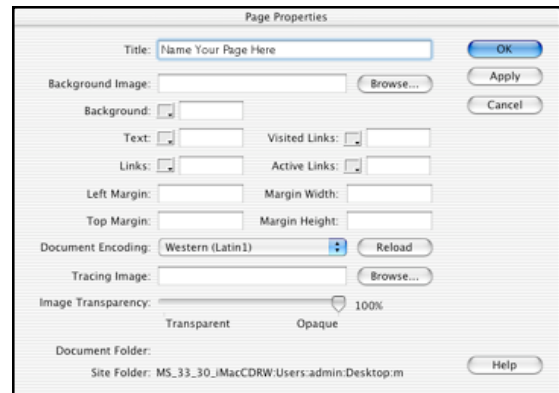

You would like to make a web site for a class project. You have all of your information, but you don't know how to make the web site.

CREATE A BLANK PAGE

1. Open the program Dreamweaver.
2. Go to the File > New
3. When a window pops up, click OK.

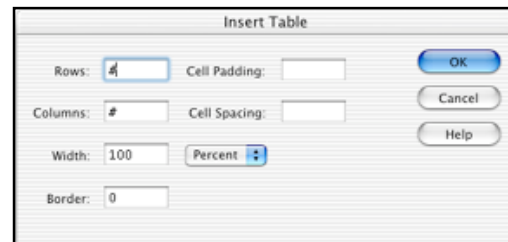

SET THE GENERAL PROPERTIES FOR YOUR PAGE

4. Go to Modify > Page Properties.
5. When a window pops up, fill in both the title, and the colors that will be used for your page.
6. Click OK when you are finished.

INSERTING A TABLE

7. Go to Insert > Table
8. Choose and enter the number of Rows that you would like. (Remember, Rows go across.)
9. Choose and enter the number of Columns that you would like. (Remember, Columns go up and down.)
10. Choose whether or not you would like a border, and if so, specify how thick you would like it. (The greater the number you enter into the box, the larger the border will be.)
11. Click "OK" when you are finished.

INSERTING AN IMAGE

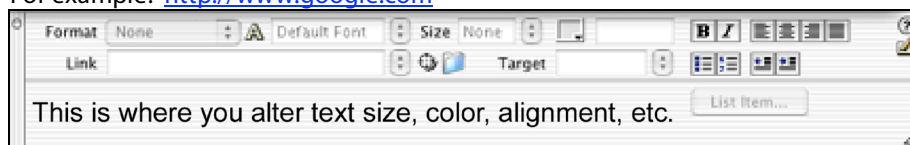

12. Go to Insert > Image
13. Find your file on the computer.
NOTE-YOUR FILE MUST BE IN .JPEG, .GIF, OR .PNG FORMAT IN ORDER FOR IT TO BE UPLOADED TO THE WEB
14. Click "OK" to select your file.

INSERTING TEXT

15. Inserting text is simple. To type in normal font, just click on your page where you would like your text to be. Type away!

CREATING A LINK

16. Highlight the text or image that you would like to act as a link.
17. Go to Window > Properties to show the Properties Window.
18. Enter the full URL of the page that you would like to link to where it says 'Link'

SAVING YOUR FILE

19. Save your file in your home folder.
20. Save all pages with lower-case titles, without spaces, and with the extension ".html"
