

# TFT Quick Start Sheet

# Recording Your Voice with Sound Recorder

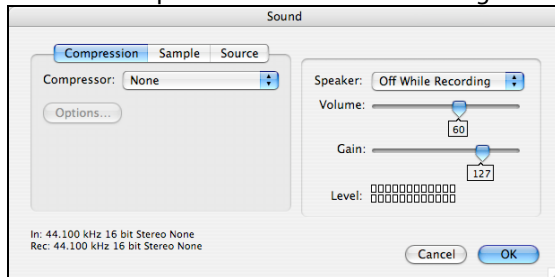

You would like to record a sound byte for your multimedia project, but you don't know how to record the sound.

## SET UP

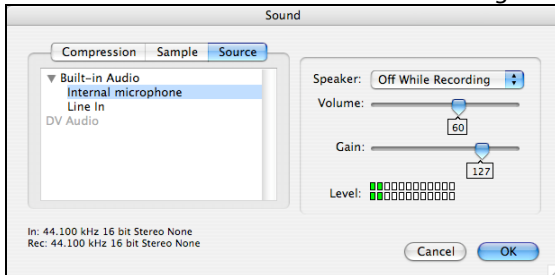

1. Open Sound Recorder Mac OS X by clicking on the  icon in the dock.

## SETTING THE RECORDING OPTIONS

2. Go to FILE > SOUND SETTINGS...
3. Click on Compression and set the following settings:

4. Click on the Source tab and set the following settings:

MAKE SURE YOU CHOOSE THE APPROPRIATE AUDIO SOURCE. IF YOU HAVE A MICROPHONE PLUGGED IN, CHOOSE "LINE IN".

5. Click OK.

## STARTING THE RECORDING SESSION

6. Go to FILE > RECORD MOVIE...
7. Fill out the appropriate name for your sound byte in the pop-up window and save your file.
8. You should see this window on your desktop.

9. Start talking.

## STOPPING THE RECORDING SESSION

10. When you are finished, go to FILE > STOP RECORDING.
11. Quit out of the application.
