Using iPhoto to Make a Slideshow

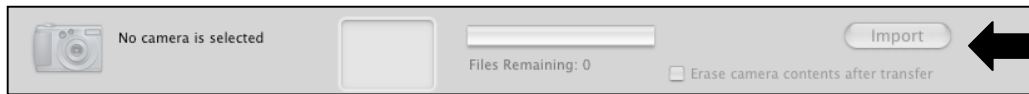

You would like to make a slideshow. You have all of your pictures on a digital camera, but you don't know where to start.

STEP ONE: Importing Files from a camera

- Connect your camera with the USB cable to the computer by:
- Plugging one end of the cord into the camera and the other end into any USB port on the computer 
- Click on the IMPORT BUTTON on the bar near the bottom of the screen

- Once your camera model shows on the bottom of the screen, click the IMPORT BUTTON AT THE BOTTOM OF THE SCREEN.

STEP TWO: Making an album

- Go to the FILE > NEW ALBUM (found at the top of the screen)
- Type in the name of your album and click OK.
- Click on "Last Import" which can be found at the top left of the screen.
- Select all of the pictures that you would like to use in your slide show.
- Once they are all selected, click and drag them over onto the name of your album. (Your album will become highlighted and the number of photos you are moving will show up in the color red.)

STEP THREE: Arranging photos in an album

- Click on your photo album name in the top left side of the screen.
- Click on each photo and drag them into the order that you prefer.

STEP FOUR: Choosing music / Ripping music from a CD

- Import a song from a CD using iTunes.  (See end of page)
- Click on the SLIDE SHOW SETTINGS button at the bottom of your screen. 
- Choose your desired song choice from the iTunes library.
- Change all of the settings to your liking.
