

EDITORIALS & CHAPTERS IN BOOKS:

1. DE Matthews & JM Hayes. Isotope-ratio-monitoring gas chromatography mass spectrometry. In: *Stable Isotopes: Proc. Third Internatl. Conf.*, ER Klein & PD Klein, eds. N.Y.: Academic Press, 1979, 95-100.
2. DM Bier, KJ Motil, DE Matthews, JF Burke & VR Young. Energy intake and whole body protein dynamics in man. In: *Nutrition and Child Health: Perspectives for the 1980's*, RC Tsang & BL Nichols, eds. Inc., N.Y.: Alan R. Liss, 1981, 161-180.
3. DE Matthews, MJ Rennie, D Halliday, DJ Millward, GA Clugston, RHT Edwards & DM Bier. Modeling leucine metabolism in man. In: *Metabolism and Clinical Implications of Branched Chain Amino and Ketoacids*, M Walser & JR Williamson, eds. N.Y.: Elsevier, 1981, 313-316.
4. DM Bier, KJ Motil, DE Matthews, JF Burke & VR Young. Leucine flux and oxidation in man. In: *Metabolism and Clinical Implications of Branched Chain Amino and Ketoacids*, M Walser & JR Williamson, eds. N.Y.: Elsevier, 1981, 337-340.
5. MJ Rennie, D Halliday, CTM Davies, RHT Edwards, S Krywawych, DJ Millward & DE Matthews. Exercise induced increase in leucine oxidation in man and the effect of glucose. In: *Metabolism and Clinical Implications of Branched Chain Amino and Ketoacids*, M Walser & JR Williamson, eds. N.Y.: Elsevier, 1981, 361-366.
6. DE Matthews, MJ Rennie & DM Bier. A model for leucine metabolism in the human. In: *Nitrogen Metabolism in Man*, JC Waterlow & JML Stephen, eds. Englewood, New Jersey: Applied Science Publishers, 1981, 117-123.
7. VR Young, M Meguid, C Meredith, DE Matthews & DM Bier. Recent developments in knowledge of human amino acid requirements. In: *Nitrogen Metabolism in Man*, JC Waterlow & JML Stephen, eds. Englewood, New Jersey: Applied Science Publishers, 1981, 133-153.
8. DM Bier, DE Matthews & VR Young. Practical advantages of gas chromatography-mass spectrometry for stable isotope measurement in biological samples. In: *Nitrogen Metabolism in Man*, JC Waterlow & JML Stephen, eds. Englewood, New Jersey: Applied Science Publishers, 1981, 289-294.
9. VR Young, JJ Robert, KJ Motil, DE Matthews & DM Bier. Protein and energy intake in relation to protein turnover in man. In: *Nitrogen Metabolism in Man*, JC Waterlow & JML Stephen, eds. Englewood, New Jersey: Applied Science Publishers, 1981, 419-447.
10. MJ Rennie, RHT Edwards, D Halliday, CTM Davies, DE Matthews & DJ Millward. Protein metabolism during exercise. In: *Nitrogen Metabolism in Man*, JC Waterlow & JML Stephen, eds. Englewood, New Jersey: Applied Science Publishers, 1981, 509-523.
11. MJ Rennie, P Babij, D Halliday, DE Matthews, S Wolman & DJ Millward. Protein metabolism during exercise. In: *Clinical Nutrition '81*, RIC Wesdorp & PB Soeters, eds. Edinburgh: Churchill Livingstone, 1982, 18-34.
12. C Meredith, DM Bier, MM Meguid, DE Matthews, Z-M Wen & VR Young. Whole body amino acid turnover with ¹³C tracers: A new approach for estimation of human amino acid requirements. In: *Clinical Nutrition '81*, RIC Wesdorp & PB Soeters, eds. Edinburgh: Churchill Livingstone, 1982, 42-59.
13. D Halliday, WWC Read, DJ Millward, MJ Rennie & DE Matthews. Comparison of 3-methyl histidine and other measures of muscle protein turnover. In: *Clinical Nutrition '81*, RIC Wesdorp & PB Soeters, eds. Edinburgh: Churchill Livingstone, 1982, 204-212.
14. VR Young, HN Munro, DE Matthews & DM Bier. Relationship of energy metabolism to protein metabolism. In: *New Aspects of Clinical Nutrition*, G Kleinberger & E Deutsch, eds. Basel, Switzerland: Karger, 1983, 43-73.
15. DE Matthews. Stable isotope applications in human metabolism research. In: *Synthesis and Applications of Isotopically Labeled Compounds*, WP Ducan & AB Susan, eds. Amsterdam: Elsevier Scientific, 1983, 279-284.
16. VR Young, RD Yang, C Meredith, DE Matthews & DM Bier. Modulation of amino acid metabolism by protein and energy intakes. In: *Amino Acids: Metabolism and Medical Applications*, GL Blackburn, JP Grant & VR Young, eds. Boston: John Wright-PSG, 1983, 13-28.
17. MM Meguid, H Schwarz, DE Matthews, IE Karl, VR Young & DM Bier. In vivo and in vitro branched-chain amino acid interactions. In: *Amino Acids: Metabolism and Medical Applications*, GL Blackburn, JP Grant & VR Young, eds. Boston: John Wright-PSG, 1983, 147-154.

EDITORIALS & CHAPTERS IN BOOKS:

18. DE Matthews, H Schwarz, RD Yang, KJ Motil, VR Young & DM Bier. Relationship of plasma leucine and α -ketoisocaproate ^{13}C enrichment during a L-[1- ^{13}C]leucine infusion in man. In: *Amino Acids: Metabolism and Medical Applications*, GL Blackburn, JP Grant & VR Young, eds. Boston: John Wright-PSG, 1983, 159-165.
19. VR Young, CN Meredith, DE Matthews & DM Bier. Some aspects of amino acid metabolism and needs in the postoperative patient. In: *Nutritional Support of the Seriously Ill Patient*, RW Winters & HL Greene, eds. New York: Academic Press, 1983, 195-206.
20. DE Matthews & DM Bier. Stable isotope methods for nutritional investigation. *Annu. Rev. Nutr.* 3: 309-339, 1983.
21. DM Bier, DE Matthews & VR Young. Interpretation of amino acid kinetic studies in the context of whole body protein metabolism. In: *Substrate and Energy Metabolism in Man*, JS Garrow & D Halliday, eds. London: John Libbey, 1985, 27-36.
22. VR Young, C Meredith, R Hoerr, DM Bier & DE Matthews. Amino acid kinetics in relation to protein and amino acid requirements: The primary importance of amino acid oxidation. In: *Substrate and Energy Metabolism in Man*, JS Garrow & D Halliday, eds. London: John Libbey, 1985, 119-134.
23. DE Matthews, RD Yang, DM Bier & VR Young. What is whole body alanine metabolism when studied with labeled alanine tracers? In: *Substrate and Energy Metabolism in Man*, JS Garrow & D Halliday, eds. London: John Libbey, 1985, 187-194.
24. DE Matthews. Amino acid and substrate turnover in man using GCMS. In: *Clinical Nutrition and Metabolic Research*, G Dietze, A Grunert, G Kleinberger & G Wolfram, eds. Basel: Karger, 1986, 208-222.
25. DE Matthews. Fundamentals of stable isotope tracers: Hormonal regulation of amino acid metabolism. In: *Nutr. Clin. Pract.*, W Hartig, G Dietze, R Weiner & P Fürst, eds. Munich: Karger, 1989, 153-163.
26. MP Saccomani, C Cobelli, L Luzi, DE Matthews, G Biolo & P Tessari. Leucine metabolism in man: Insight from compartmental modeling. In: *Modelling and Control in Biomedical Systems*, C Cobelli & L Mariani, eds. Oxford: Pergamon Press, 1989, 377-383.
27. DE Matthews & SB Heymsfield. ASPEN 1990 research workshop on energy metabolism. *JPEN J. Parenter. Enteral Nutr.* 15: 3-14, 1991.
28. DE Matthews. General concepts of protein metabolism. In: *Fetal and Neonatal Physiology*, RA Polin & WW Fox, eds. Philadelphia: W.B. Saunders, 1991, 420-428.
29. DE Matthews. Methods for assessing protein metabolism in vivo. In: *Diabetes 1991: Proceedings of the 14th International Diabetes Federation Congress*, H Rifkin, JA Colwell & SI Taylor, eds. Amsterdam: Excerpta Medica, 1991, 334-338.
30. C Cobelli, MP Saccomani & DE Matthews. Evolution of models of leucine kinetics for measuring protein turnover. In: *Protein Metabolism in Diabetes Mellitus*, KS Nair, ed. London: Smith-Gordon, 1992, 69-77.
31. DE Matthews. Action of substrates and counterregulatory hormones on protein metabolism: Introduction. In: *Protein Metabolism in Diabetes Mellitus*, KS Nair, ed. London: Smith-Gordon, 1992, 195-197.
32. DE Matthews. Leucine as a tracer for studying protein metabolism in humans. In: *Branched-Chain Amino Acids: Biochemistry, Physiology, and Clinical Science*, P Schauder, J Wahren, R Paoletti, R Bernardi & M Rinetti, eds. New York: Raven Press, 1992, 55-61.
33. DE Matthews & A Battezzati. Regulation of protein metabolism during stress. *Curr. Opin. Gen. Surg.*: 72-77, 1993.
34. DE Matthews & Y Fong. Amino acid and protein metabolism. In: *Clinical Nutrition: Parenteral Nutrition*, JL Rombeau & MD Caldwell, eds. 2 ed. Philadelphia: Saunders, 1993, 75-112.
35. SB Heymsfield & DE Matthews. Body composition: Research and clinical advances - 1993 A.S.P.E.N. research workshop. *JPEN J. Parenter. Enteral Nutr.* 18: 91-103, 1994.
36. SB Heymsfield, DE Matthews & S Heshka. Doubly labeled water measures energy use. *Sci. Am. Sci. Med.* 1: 74-83, 1994.
37. DE Matthews & A Battezzati. Substrate kinetics and catabolic hormones. In: *Organ Metabolism and Nutrition: Ideas for Future Critical Care*, JM Kinney & HN Tucker, eds. New York: Raven Press, 1994, 1-22.
38. DE Matthews. Glutamine and glutamate kinetics in humans. In: *Pharmacological Nutrition Immune Nutrition*, L Cynober, P Fürst & P Lawin, eds. Munich: W. Zuckschwerdt Verlag, 1995, 68-76.

EDITORIALS & CHAPTERS IN BOOKS:

39. DE Matthews. Isotope dilution methods: Caveats through experience. In: *Amino Acid/Protein Metabolism in Health and Disease: Nutritional Implications*, P Tessari, PB Soeters, G Pittoni & A Tiengo, eds. London: Smith-Gordon, 1997, 13-21.
40. DE Matthews. General concepts of protein metabolism. In: *Fetal and Neonatal Physiology*, RA Polin & WW Fox, eds. 2nd ed, vol. 1. Philadelphia: W.B. Saunders, 1998, 609-619.
41. DE Matthews. Proteins and Amino Acids. In: *Modern Nutrition in Health and Disease*, ME Shils, JA Olson, M Shike & AC Ross, eds. 9th ed. Baltimore: Williams and Wilkins, 1999, 11-48.
42. DE Matthews. The methods to measure stable isotope tracers and their applications to clinical nutrition problems keep getting better. *Curr. Opin. Clin. Nutr. Metab. Care* 2: 439-440, 1999.
43. DE Matthews. Methods to measure key sulfur-containing compounds: Homocysteine and glutathione. *Curr. Opin. Clin. Nutr. Metab. Care* 3: 367-369, 2000.
44. DE Matthews. What is more exciting than 'genomics'? 'Proteomics'. *Curr. Opin. Clin. Nutr. Metab. Care* 4: 339-339, 2001.
45. DE Matthews. Evidence-based medicine: Sifting through the literature to reach conclusions is not a simple task. *Curr. Opin. Clin. Nutr. Metab. Care* 5: 463-464, 2002.
46. DE Matthews. MRS and NMR: short abbreviations for powerful techniques, but what can they do for you? *Curr. Opin. Clin. Nutr. Metab. Care* 6: 497-498, 2003.
47. DE Matthews & JB van Goudoever. General concepts of protein metabolism. In: *Fetal and Neonatal Physiology*, RA Polin, WW Fox & SH Abmans, eds. 3rd ed, vol. 1. Philadelphia: W.B. Saunders, 2004, 501-509.
48. EJ Parks & DE Matthews. A.S.P.E.N. 2003 Research Workshop on using tracers to measure carbohydrate, fat, and amino acid metabolism in humans. *JPEN J. Parenter. Enteral Nutr.* 28: 38-53, 2004.
49. DE Matthews. Techniques to assess in-vivo tissue metabolism directly in humans without biopsy samples. *Curr. Opin. Clin. Nutr. Metab. Care* 7: 513-514, 2004.
50. DE Matthews. Proteins and Amino Acids. In: *Modern Nutrition in Health and Disease*, ME Shils, M Shike, JA Olson, AC Ross, B Caballero & RJ Cousins, eds. 10th ed. Philadelphia: Lippincott, Williams & Wilkins, 2006, 23-60.
51. DE Matthews. Stable isotopes to measure in vivo metabolism and kinetics. In: *Biological Applications Part B: Carbohydrates, Nucleic Acids and other Biological Compounds*, ML Gross & RM Caprioli, eds. *The Encyclopedia of Mass Spectrometry*, vol. 3. Oxford, UK: Elsevier, 2006, 347-356.
52. DE Matthews & ME Jennings, II. Measurement of in vivo glucose metabolism using stable isotope labels. In: *Biological Applications Part B: Carbohydrates, Nucleic Acids and other Biological Compounds*, ML Gross & RM Caprioli, eds. *The Encyclopedia of Mass Spectrometry*, vol. 3. Oxford, UK: Elsevier, 2006, 356-367.
53. D Beauchemin & DE Matthews. *Elemental and Isotope Ratio Mass Spectrometry*. *The Encyclopedia of Mass Spectrometry*, vol. 5, ML Gross & RM Caprioli, eds. Oxford, UK: Elsevier, 2010, 1-1088.
54. DE Matthews. Gas chromatography-combustion-IRMS (GC-C-IRMS) for carbon and nitrogen. In: *Elemental and Isotope Ratio Mass Spectrometry*, D Beauchemin & DE Matthews, eds. *The Encyclopedia of Mass Spectrometry*, vol. 5, ML Gross & RM Caprioli, eds. Oxford, UK: Elsevier, 2010, 774-783.
55. DE Matthews. Gas chromatography-pyrolysis-IRMS (GC-P-IRMS) for hydrogen and oxygen. In: *Elemental and Isotope Ratio Mass Spectrometry*, D Beauchemin & DE Matthews, eds. *The Encyclopedia of Mass Spectrometry*, vol. 5, ML Gross & RM Caprioli, eds. Oxford, UK: Elsevier, 2010, 784-789.
56. DE Matthews. Gas chromatography-combustion-isotope ratio mass spectrometry applied to measuring nitrogen-15 in biomedicine. In: *Elemental and Isotope Ratio Mass Spectrometry*, D Beauchemin & DE Matthews, eds. *The Encyclopedia of Mass Spectrometry*, vol. 5, ML Gross & RM Caprioli, eds. Oxford, UK: Elsevier, 2010, 954-961.
57. DA Schoeller, N Racine, TC Shriver & DE Matthews. Doubly labeled water method in IRMS to measure free living energy expenditure. In: *Elemental and Isotope Ratio Mass Spectrometry*, D Beauchemin & DE Matthews, eds. *The Encyclopedia of Mass Spectrometry*, vol. 5, ML Gross & RM Caprioli, eds. Oxford, UK: Elsevier, 2010, 962-967.
58. DE Matthews & M Elia. Assessment of nutritional status and analytical methods. *Curr. Opin. Clin. Nutr. Metab. Care* 15: 411-412, 2012.

EDITORIALS & CHAPTERS IN BOOKS:

59. DE Matthews. Proteins and Amino Acids. In: *Modern Nutrition in Health and Disease*, AC Ross, B Caballero, RJ Cousins, KL Tucker & TR Ziegler, eds. 11th ed. Philadelphia: Lippincott, Williams & Wilkins, 2014, 3-35.
60. DE Matthews & K Norman. Editorial comment: Technology bridges the gap. *Curr. Opin. Clin. Nutr. Metab. Care* 17: 387-388, 2014.
61. K Norman & DE Matthews. The diversity of methods and instruments in nutrition reflects the broad scope of the discipline. *Curr. Opin. Clin. Nutr. Metab. Care* 18: 435-436, 2015.
62. JB van Goudoever & DE Matthews. General concepts of protein metabolism. In: *Fetal and Neonatal Physiology*, RA Polin, SH Abman, DH Rowitch & WE Benitz, eds. 5th ed, vol. 1. Elsevier, 2016, 436-444.
63. JA Loo, DE Matthews & JR Yates, 3rd. Focus on bioinformatics, software, and MS-based "omics," Honoring Dr. Michael J. MacCoss, recipient of the 2015 ASMS Biemann Medal. *J. Am. Soc. Mass Spectrom.* 27: 1715-1718, 2016.
