Tri-state Greenhouse IPM
Program

WELCOME!

The Tri-state Greenhouse IPM Program is a collaboration among growers and specialists from Maine, New Hampshire and Vermont. This year's workshops offer sessions on IPM tactics at the soil level, including how to test your soil and water, use of fungi against fungi, and nematodes for thrips control. We will continue to gather input on grower needs and update participants on IPM research and outreach initiatives in our area.

These workshops are for greenhouse growers of all types, extension specialists and professional pest managers. Growers of all experience levels and from any state are welcome and will learn something new.
