

# Frederic Sansoz, Ph.D., ASME Fellow

---

Department of Mechanical Engineering  
The University of Vermont  
Burlington, VT 05405  
United States

frederic.sansoz@uvm.edu  
<http://www.uvm.edu/~fsansoz>  
Twitter: @SansozGroup

## GENERAL INTERESTS

---

Materials Science and Engineering  
Nanomaterials  
Small-scale Mechanics  
Atomistic and Multiscale Modeling

## EDUCATION

---

Ph.D. in Materials Science and Engineering with Honors, 2000  
Ecole des Mines, Paris, France. Advisor: Prof. Andre Pineau.

M.S. in Materials Science and Engineering, 1996  
Ecole Nationale Supérieure de Mécanique et Aérotechnique, Poitiers, France.

Engineer Diploma in Mechanical and Aerospace Engineering, 1996  
Ecole Nationale Supérieure de Mécanique et Aérotechnique (ISAE-ENSMA), Poitiers, France.

## APPOINTMENTS

---

**2015-present** Professor  
Department of Mechanical Engineering, University of Vermont  
Materials Science Program, University of Vermont

**2019-2020** Acting Chair, Department of Mechanical Engineering, University of Vermont

**2013-2014** Head, Mechanical Engineering Program, School of Engineering, University of Vermont

**2010-2015** Associate Professor, School of Engineering, University of Vermont

**2004-2010** Assistant Professor, School of Engineering, University of Vermont

**2002-2003** Postdoctoral Fellow, Dept. of Mechanical Engineering, The Johns Hopkins University

**2001-2002** Postdoctoral Fellow, Dept. of Mechanical Engineering and Appl. Mech., Univ. of Rhode Island

**2000-2001** Military Service, Overseas Research Fellow, SNECMA/ French Ministry of Foreign Affairs

**1996-2000** Graduate Research Assistant, Centre des Matériaux, Ecole des Mines de Paris, Evry, France

**1996** Graduate Research Assistant, Dept. of Physics and Mechanics of Materials, ENSMA, France

## HONORS AND AWARDS

---

**2019** Fellow of the American Society of Mechanical Engineers

**2017** CEMS Faculty Award for Excellence in Research

**2011** Named "World's Nanotechnology Thought Leader" by AzoNano.com

**2010** Kroepsch-Maurice Excellence in Teaching Award Nominee

**2010** Invited Visiting Professor, University of Bordeaux, France

**2009** CEMS Milt Silveira Junior Faculty Award

**2008** National Science Foundation CAREER Award

**2007** TMS Early Career Faculty Award – Honorable mention

**2005-17** Four times nominee for Best Poster Award at Materials Research Society Meetings

**2005** 2<sup>nd</sup> Prize, "Science as Art" competition, Materials Research Society Spring Meeting

## PUBLICATIONS

---

### Most Significant Publications:

1. Xing Ke, Jianchao Ye, Zhiliang Pan, Jie Geng, Matt F Besser, Dongxia Qu, Alfredo Caro, Jaime Marian, Ryan T Ott, Y Morris Wang, Frederic Sansoz, "Ideal Maximum Strengths and Defect-induced Softening in Nanocrystalline-Nanotwinned Metals", *Nature Materials* 18, 1207–1214 (2019)
2. Li Zhong, Frederic Sansoz, Yang He, Chongmin Wang, Ze Zhang, Scott X. Mao, "Slip-activated surface creep with room-temperature super-elongation in metallic nanocrystals", *Nature Materials* 16, 439-445 (2017)
3. Y.M. Wang, F. Sansoz, T.B. LaGrange, R.T. Ott, T.W. Barbee Jr, A.V. Hamza, "Defective Twin Boundaries in Nanotwinned Metals", *Nature Materials* 12, 697 - 702 (2013)
4. J. Wang, F. Sansoz, J. Huang, Y. Liu, S. Sun, Z. Zhang, S.X. Mao, "Near Ideal Theoretical Strength in Gold Nanowires containing Angstrom Scale Twins", *Nature Communications* 4, 1742 (2013)
5. K. A. Afanasyev and F. Sansoz, "Strengthening in Gold Nanopillars with Nanoscale Twins", *Nano Letters* 7, 2056-2062 (2007)

### Published Peer-reviewed Journal Articles:

6. Rodrigo Penide-Fernandez and Frederic Sansoz, "Microscale Knudsen Effect over the Transverse Thermal Conductivity of Woven Ceramic Fabrics Under Compression", *International Journal of Heat and Mass Transfer* 171, 121085 (2021)

## PRESENTATIONS

---

### Invited Presentations and Seminars

1. Frederic Sansoz (invited speaker), “Small-scale Mechanics of Super-strong Silver Nanostructures”, **2018 Materials Science & Technology conference**, Columbus, Ohio (October 2018). Symposium: Small-scale Properties of Materials and Length-scale Phenomena.
2. Frederic Sansoz (invited speaker), “Small-scale Mechanics of Super-strong Silver Nanostructures”, **2018 European MRS Spring Meeting**, Strasbourg, France (April 2018). Symposium AA— Strength, plasticity, fracture and fatigue behaviour controlled by interfaces and grain boundaries
3. F. Sansoz, “Small-scale Mechanics of Super-strong Silver Nanostructures”, **Materials Science and Engineering Department Seminar, University of Connecticut**, seminar speaker (April 2018)
4. Frederic Sansoz (invited speaker), “Exploring the Limit of Strength in Nanocrystalline-Nanotwinned Silver”, **2018 MRS Spring Meeting**, Phoenix, AZ (April 2018). Symposium NM10—Nano-Metallic Materials by Design
5. Frederic Sansoz (invited speaker), Xing Ke, Qiongjiali Fang, “Intrinsic Twin Boundary Defects and Strength in Nanotwinned Ag and Ag-Cu Alloys”, **2017 TMS Annual Meeting**, San Diego, CA (February 2017)
6. F. Sansoz, “Small-scale Mechanics of Nanoscale Metals”, **Jones Seminar, Dartmouth College**, seminar speaker (January 2017)
7. F. Sansoz, “Enabling Superplastic Extensibility in Silver Nanocrystals at Room Temperature”, **University of Vermont’s ANGEL Symposium** (October 2016)
8. F. Sansoz, “Plasticity and Heat Transport in Nanowires Strengthened by Nanoscale Twins”, **2016 Society of Engineering Science (SES) Annual Meeting**, Symposium E-2: Mechanics of One-dimensional Nanomaterials: Experiment and Modeling, Invited speaker (October 2016)
9. F. Sansoz, “Role of Intrinsic Defects in Plasticity of Nanotwinned Metals”, **University of Vermont’s Advanced Materials for Energy and Biomedical Applications Symposium** (December 2015)
10. F. Sansoz, “Role of Intrinsic Defects in Plasticity of Nanotwinned Metals”, *Symposium U - Microstructure Evolution and Mechanical Properties in Interface-dominated Metallic Materials*, **2015 MRS Fall Meeting**, Boston, MA, invited speaker (December 2015)
11. F. Sansoz, “From Bimetallic Nanowires to Nanotwinned Metals: Controlling Nanoscale Plasticity with the Stacking-fault Energy”, *Symposium RR: Scaling Effects in Plasticity-Synergy between Simulations and Experiments*, **2014 MRS Fall Meeting**, Boston, MA, invited speaker (December 2014)
12. F. Sansoz, “Nanotwinned Materials: Weird Kinks and Strength at the Nanoscale”, **The George Washington University**, Department of Civil and Environmental Engineering Seminar, Washington, DC, invited seminar (November 2014)
13. F. Sansoz, “Plasticity and Heat Conduction in Nanotwinned Materials by Atomistic Simulation”, **The University of Houston**, Mechanical Engineering Department Seminar, Houston, TX, invited seminar (October 2014)
14. F. Sansoz, “Nanotwinned Materials: Weird Kinks and Strength at the Nanoscale”, **Engineering Leadership Seminar Series - Northeastern University**, Department of Mechanical & Industrial Engineering, Boston, MA, invited seminar (September 2014)
15. F. Sansoz, “From Defective Twin Boundaries to Angstrom-scaled Twins: Understanding the Plasticity and Fracture of Nanotwinned Metals”, *Symposium: Mechanical Behavior at the Nanoscale II*, **2014 TMS Annual Meeting**, San Diego, CA, invited speaker (February 2014)
16. F. Sansoz, “Nanotwinned Materials: Weird Kinks and Strong Gold at the Nanoscale”, **Mechanical Engineering Department Seminar - Johns Hopkins University**, Baltimore, MD, invited seminar (September 2013)
17. F. Sansoz, “Nanoscale Crystal Plasticity from Atomistic Simulations”, Department of Mechanical Engineering, **Université de Paris-Est**, Paris, France, invited seminar (April 2011)
18. F. Sansoz and C. Deng, “Size-Dependent Plasticity in Twinned Metal Nanowires”, **2010 US National Congress on Theoretical and Applied Mechanics** (USNCTAM 2010), State College, PA, invited talk (June 2010)

19. F. Sansoz and C. Deng, "Influences of Surface Facets and Microstructure on Plasticity in Gold Nanowires", **2010 European Conference on Computational Mechanics (ECCM 2010)**, Paris, France, invited talk (May 2010)
20. F. Sansoz, "Size-dependent Strength and Fracture of Twinned Metal Nanowires through Surface Engineering and Microstructural Design", **DFG-NSF Joint Research Conference on Sustainable Use of Nanomaterials for Engineering Solutions**, New York City, NY, invited poster presentation (October 2009)
21. F. Sansoz and C. Deng, "Size-Dependent Plasticity in Twinned Metal Nanowires" in **12<sup>th</sup> International Conference on Fracture (ICF12) - Symposium: Atomistic Plastic Deformation and Fracture**, invited Keynote Lecture (July 2009)
22. F. Sansoz, "Nanoscale Plasticity from Atomistic Simulations", Materials Science and Engineering Seminar Series, **Texas A&M University**, College Station, TX, invited seminar (Nov. 2008)
23. F. Sansoz, "Nanocrystalline Metal Indentation", Center for Nanomaterials Research, **Dartmouth College**, Hanover, NH, invited seminar (May 2006)
24. F. Sansoz, "Deformation at the Nanometer Length Scale: Why Should We Be Interested in Crystalline Interfaces?", Mechanical and Aerospace Engineering Department Seminar, **Clarkson University**, Potsdam, NY, invited seminar (April 2005)
25. F. Sansoz, "Why is Nanomechanics so Important to Polymer and Composites Research?" Vermont EPSCoR Annual Meeting, **University of Vermont**, Burlington, VT, invited seminar (February 2005)
26. F. Sansoz, "Why Should We Be Interested in the Atomic Structure of Interfaces?", Department of Mechanical Engineering, **University of Vermont**, Burlington, VT, invited seminar (May 2003)

#### Oral Presentations

27. Frederic Sansoz, "Defect-induced Hall-Petch Softening in Nanocrystalline-Nanotwinned Metals", **2020 MRS Fall Meeting**, Boston, MA (December 2020). Symposium SF08—Defect-Dominated Plasticity and Chemistry in Metals and Alloys
28. Rodrigo Penide-Fernandez (speaker) and Frederic Sansoz, "Computational and Experimental Study of Heat Transfer through Flexible Ceramic-fiber Thermal Protection Systems", **2019 MS&T conference**, Portland, Oregon (October 2019). Symposium: Thermal Protection Materials and Systems
29. Rodrigo Penide-Fernandez (speaker) and Frederic Sansoz. Anisotropic Thermal Conductivity in Flexible Woven Ceramic Fibers for Hypersonic Atmospheric Entry. Symposium: Advanced MAX/MXene Phases and UHTC Materials for Extreme and High Temperature Environment; Track B: Ultra-high-temperature ceramics (UHTCs). **43<sup>rd</sup> International Conference of Advance Ceramics and Composites**, Daytona Beach, FL (Jan. 2019).
30. Xing Ke (speaker) and Frederic Sansoz, "Mechanical Properties of Nanocrystalline-Nanotwinned Silver Strengthened by Copper Impurity Segregation. **2018 MS&T conference**, Columbus, Ohio (October 2018). Symposium "Deformation and Transitions at Grain Boundaries VI".
31. Rodrigo Penide-Fernandez (speaker) and Frederic Sansoz, "Anisotropic Heat Conduction in Flexible 2-D Woven Ceramic Fibers for Extreme Atmospheric Entry Environments", **2018 MS&T conference**, Columbus, Ohio (October 2018). Symposium: Thermal Protection Materials and Systems
32. Zhiliang Pan (speaker), Xing Ke, Qiongjiali Fang, Frederic Sansoz: Segregation-mediated Strengthening Mechanisms in Nanotwinned Metals, **18th International Conference on the Strength of Materials (ICSMA 18)**. The Ohio State University, Columbus, Ohio (July 2018)
33. M.I. Mendelev (speaker), V. Borovikov, Z. Pan, F. Sansoz. Development of a Semi-empirical Potential For Simulation of Ni Solutes Segregated in Ag Grain Boundaries, **2018 TMS Annual Meeting**, Phoenix (Mar. 2018)
34. F. Sansoz (speaker), Li Zhong and Scott X. Mao: Small-scale Mechanics of Super-Strong and Stretchy Silver Nanowires, in Symposium TC6—Mechanical Behavior at the Micro and Nanoscale—Bridging Between Computer Simulations and Experiments, **2017 MRS Fall Meeting**, Boston, MA (November 2017)
35. Q. Fang (speaker) and F. Sansoz: Influence of intrinsic kink-like defects on screw dislocation - coherent twin boundary interactions, *Symposium S: Mechanical Behavior at the Nanoscale*, **2015 MRS Fall Meeting**, Boston, MA, invited speaker (December 2015)
36. F. Sansoz (speaker), A. Porter and S. Kessler: Anomalous Heat Conduction in Silicon Materials Containing Nanoscale Twins, in Symposium CC: Advanced Materials and Devices for Thermoelectric Energy Conversion, **2014 MRS Fall Meeting**, Boston, MA (December 2014)

37. F. Sansoz (speaker): Ductile-to-Brittle Transition in Gold Nanowires with Angstrom-Scaled Twins, in Symposium JJ: Materials Fundamentals of Fatigue and Fracture, **2013 MRS Fall Meeting**, Boston, MA (December 2013)
38. F. Sansoz (speaker): Nanotwinned Materials: Weird Kinks and Strong Gold at the Nanoscale, in symposium Structure-Property Relationships in Low-dimensional Metallic Nanostructures, **Materials Science & Technology (MS&T) 2013 conference**, Montreal, Quebec, Canada (October 2013)
39. F. Sansoz (speaker): Effects of Surface Faceting and Twinning on Thermal Transport Characteristics of Silicon Nanowires, in Symposium: Energy Nanomaterials, **2012 TMS Annual Meeting**, Orlando, FL (March 2012)
40. F. Sansoz (speaker): Effects of Size and Microstructure in Compression of Nanoscale Metallic Pillars by Molecular Dynamics Simulation, in Symposium: Mechanical Behavior at Nanoscale I, **2012 TMS Annual Meeting**, Orlando, FL (March 2012)
41. F. Sansoz (speaker): Effects of Surface Faceting and Twinning on Thermal Transport Characteristics of Silicon Nanowires, in Symposium W: Phonons in Nanomaterials—Theory, Experiments, and Applications, **2011 MRS Fall Meeting**, Boston, MA (December 2011)
42. J. Gu (speaker) and F. Sansoz: Atomistic Simulation Study of Mechanical Properties in Cone-stacked Carbon Nanofibers under Uniform Deformation, **2010 MS&T conference**, in Symposium Mechanical Behavior of Low Dimensional, Houston, TX (October 2010)
43. F. Sansoz (speaker) and T. Gang: Fundamental Mechanisms at the Very Onset of Plasticity in Nanocrystalline Ni Coatings under Nanoindentation, **2010 MS&T conference**, in Symposium Mechanical Behavior of Low Dimensional, Houston, TX (October 2010)
44. V. Péron-Lühns (speaker), F. Sansoz, L. Noels: Calibration of direct numerical simulation based on quasicontinuum model of grain boundary sliding, **9<sup>th</sup> World Congress on Computational Mechanics**, Sydney, Australia (July 2010)
45. F. Sansoz (speaker), V. Dupont, T. Gang and K. D. Stevenson: Local Plasticity during Nanoindentation of Nanocrystalline FCC Metals using Quasicontinuum Simulation and Nanomechanical Experiment, in Symposium HH: Multiscale Polycrystal Mechanics of Complex Microstructures, **2009 MRS Fall Meeting**, Boston, MA (December 2009)
46. F. Sansoz (speaker): Size Effects on the Yielding and Plasticity of Nanotwinned Gold: From Bulk to Nanowires, in Symposium GG: Plasticity in Confined Volumes, **2009 MRS Fall Meeting**, Boston, MA (December 2009)
47. C. Deng (speaker) and F. Sansoz: Yielding and Plasticity of Periodically-twinned Nanowires in FCC Metals from Molecular Dynamics Simulations, in Symposium FF: Mechanical Behavior of Nanomaterials--Experiments and Modeling, **2009 MRS Fall Meeting**, Boston, MA (December 2009)
48. C. Deng (speaker) and F. Sansoz: Nanoscale plasticity and size effects in twinned gold nanowires from molecular dynamics simulations" in Symposium: Recent Advances in Computational Study of Nanostructures, **10<sup>th</sup> US National Congress on Computational Mechanics**, Columbus, OH (July 2009)
49. C. Deng (speaker) and F. Sansoz: Size-Dependence of Yield Stress in Twinned Gold Nanowires under Uniaxial Tension, **TMS 2009 Annual Meeting & Exhibition**, San Francisco, CA (Feb. 2009)
50. F. Sansoz (speaker) and C. Deng: Strengthening Mechanisms in Nanotwinned Gold: From Bulk to Nanowires, **PLASTICITY 2009** – Symposium “Plasticity and Fracture of Nano-Materials”, St Thomas, US Virgin Islands (Jan. 2009)
51. F. Sansoz (speaker), C. Deng and K. Afanasyev: Atomistic Simulations of Strengthening Mechanisms in Nanotwinned Gold: From Bulk to Nanowires, **American Society of Mechanical Engineers IMECE**, track 12-12: Modeling and Experiments in Nanomechanics and Nanomaterials, Boston, MA (November 2008)
52. F. Sansoz (speaker), and V. Dupont: Quasicontinuum and Molecular Dynamics Simulations of Contact Plasticity in Nanocrystalline Metals, **American Society of Mechanical Engineers IMECE**, track 13-3: Recent Advances in Computational Study of Nanostructures, Boston, MA (November 2008)
53. C. Deng (speaker) and F. Sansoz: Molecular Dynamics Simulations of Size Effects on Yielding Phenomena in Twinned and Single Crystal Au Nanowires, **American Society of Mechanical Engineers IMECE**, track 13-3: Recent Advances in Computational Study of Nanostructures (November 2008)
54. F. Sansoz (speaker), C. Deng and K.A. Afanasyev: Size-dependent strengthening in bulk and nano-sized gold with nanoscale growth twins, in Symposium U: Mechanics of Nanoscale Materials, **2008 MRS Spring Meeting**, San Francisco, CA (March 2008)

55. R.L. Headrick (speaker), S. Wo, F. Sansoz, J.E. Anthony: Control of Grain Structure and Interface Structure in Solvent Deposited Organic Semiconductor Thin Films. **3<sup>rd</sup> Annual Organic Microelectronics Workshop**, Seattle, Washington (July 2007)
56. J. Frolik (speaker), F. Sansoz, D. Rizzo, A. Sadek: A Multidisciplinary Curricular Effort Incorporating Wireless Sensors, **2007 American Society of Engineering Education (ASEE) Annual Conference & Exposition**, Honolulu, Hawaii (June 2007)
57. F. Sansoz (speaker) and V. Dupont: Atomic mechanism of stress-assisted grain coarsening during indentation of a nanostructured metal, Symposium on Mechanical Behavior of Nanostructured Materials, in Honor of Carl Koch, **TMS 2007 Annual Meeting & Exhibition**, Orlando, FL (Feb. 2007)
58. F. Sansoz (speaker) and K. Afanasyev: Effects of Twin boundaries on the Slip Activity of Nanosized FCC Metallic Pillars, Symposium on Plasticity from the Atomic Scale to Constitutive Laws, **TMS 2007 Annual Meeting & Exhibition**, Orlando, FL (Feb. 2007)
59. V. Dupont (speaker) and F. Sansoz: Contact-Induced Shear Localization in Nanocrystalline Al by Atomistic Simulation, Symposium on Plasticity from the Atomic Scale to Constitutive Laws, **TMS 2007 Annual Meeting & Exhibition**, Orlando, FL (Feb. 2007)
60. N.S. Murthy (speaker), F. Bedoui, F. Sansoz and D.T. Grubb: Recent Observations on the Structure and their Influence on Properties in Semicrystalline Polymers, **MACRO2006 – Polymer for Advanced Technologies**, Pune, India (December 2006)
61. F. Sansoz (speaker) and V. Dupont: An atomistic model of grain coarsening during nanocrystalline metal indentation, in Symposium EE: Size Effects in the Deformation of Materials -- Experiments and Modeling, **2006 MRS Fall Meeting**, Boston, MA (December 2006)
62. F. Sansoz (speaker), V. Dupont and K.D. Stevenson: AFM Contact Studies of Metallic Nanostructures: Direct Insight from Atomistic Simulations, in Symposium A: Trends in Nanoscience - From Materials to Applications, **E-MRS 2006 Spring Meeting**, Nice, France (June 2006)
63. K. Stevenson (speaker) and F. Sansoz, AFM Characterization and Surface Modification of Nanocrystalline Ni Films, **TMS 2006 Annual Meeting**, San Antonio, TX (March 2006)
64. V. Dupont (speaker) and F. Sansoz, Atomistic Simulation of Metal Surface Indentation Including Interface Friction and Surface Energy, **TMS 2006 Annual Meeting**, San Antonio, TX (March 2006)
65. F. Sansoz (speaker) and H. Ghonem, Investigation of Ductility Loss in a Thermally Exposed Near-Beta Ti Alloy, **TMS 2006 Annual Meeting**, San Antonio, TX (March 2006)
66. V. Dupont and F. Sansoz (speaker): Grain Boundary Structure Evolution in Nanocrystalline Al by Nanoindentation Simulations, **2005 MRS Fall Meeting** - Symposium Z - Amorphous and Nanocrystalline Metals for Structural Applications, Boston, MA (December 2005)
67. V. Dupont (speaker) and F. Sansoz: Nanoindentation of Single Crystals: Effects of Interface Friction and Adhesion Energy, **2005 MRS Fall Meeting** - Symposium AA - Micro- and Nanomechanics of Structural Material, Boston, MA (December 2005)
68. T.C. Hufnagel (speaker), R.T. Ott, F. Sansoz, J.F. Molinari, K.T. Ramesh, J. Almer: Micromechanics of Deformation in Metallic-Glass-Matrix Composites, **4th International Conference on Bulk Metallic Glasses** (BMG IV), Gatlinburg, TN (May 2005)
69. F. Sansoz, Mechanical Engineering Department Seminar, **University of Vermont** (April 2005)
70. F. Sansoz (speaker) and R.E. Miller: Concurrent Multiscale Modeling of Contact and Friction with Multiple Asperities, **2005 MRS Spring Meeting**, Symposium EE: Linking Length Scales in the Mechanical Behavior of Materials, San Francisco, CA (March 2005)
71. H. Ghonem (speaker), C. Sarrazin-Baudoux, and F. Sansoz: Influence of Environment, Loading Frequency and Temperature on Fatigue Crack Growth Mechanisms in Titanium Lamellar Microstructures, **11th International Conference on Fracture** (ICF11), Turin, Italy (March 2005)
72. F. Sansoz (speaker) and E. Buchovecky: Contact-Induced Plasticity of Rough Surfaces Under Nanoindentation, **2005 TMS Annual Meeting & Exhibition**, San Francisco, CA (February 2005)
73. F. Sansoz (speaker) and J.F. Molinari: Investigation of Size Effects in the Mechanical Behavior of FCC Bicrystals by Quasicontinuum Method, **2005 TMS Annual Meeting & Exhibition**, San Francisco, CA (February 2005)

74. R.T. Ott (speaker), F. Sansoz, J.F. Molinari, J. Almer, T.C. Hufnagel: Micromechanics and Macroscopic Mechanical Behavior of In Situ Formed Metallic Glass Matrix Composites, **2005 TMS Annual Meeting & Exhibition**, San Francisco, CA (February 2005)
75. D. Warren, F. Sansoz, and J.F. Molinari (speaker): A Continuum Mechanics Model For Grain Boundary Sliding In Nanocrystalline Materials, **International Conference on Experimental Mechanics (ICEM12)**, Bari, Italy (August 2004)
76. D. Warner (speaker), F. Sansoz and J.F. Molinari: Deformation of Polycrystals with Micro to Nanoscale Grain Size using Atomistic-based Continuum Modeling, in **2003 ASME International Mechanical Engineering Congress**, Washington, DC, (November 2003)
77. F. Sansoz (speaker), M. Shazly and H. Ghonem: Time-Dependent Damage Mechanisms at Elevated Temperature in Fully Lamellar Ti6242 Alloy, **9th SF2M Spring Meeting on Temperature-Fatigue Interaction**, Paris, France (2001)
78. F. Sansoz (speaker), B. Brethes and A. Pineau: Propagation des petites fissures de fatigue dans les zones de concentration de contraintes dans un superalliage base Ni, **42e Colloque de métallurgie de l'INSTN: Matériaux pour les machines thermiques**, CEA Saclay, France (2000)
79. F. Sansoz (speaker) and S. Ponnelle: Fatigue Crack Propagation at High Temperature in Ni base Superalloys for HP Turbine Disks, **SF2M Workshop on High Temperature**, Paris, France (1999)
80. F. Sansoz (speaker), B. Brethes and A. Pineau: Short Fatigue Crack Propagation from Notches in N18 Ni based Superalloy, **European Conference on Fracture (ECF) 12**, Sheffield, UK (1998)
81. F. Sansoz (speaker), Seminar of the Centre des Matériaux, **Ecole des Mines de Paris**, Evry, France (1998)

#### Poster Presentations

82. X. Ke and F. Sansoz: Copper Segregation Affected Yielding in Nanotwinned Silver, **2017 MRS Fall Meeting**, in Symposium PM3—Interfaces and Interface Engineering in Inorganic Materials, Boston, MA (November 2017). **Nominee for best poster award**
83. Q. Fang and F. Sansoz, Atomistic mechanisms of dislocation nucleation and interactions with perfect and imperfect twin boundaries, **2016 Dislocation Conference**, Purdue University, IA (September 2016)
84. A. Porter and F. Sansoz: Role of Twin Boundaries on Thermal Conductivity in Silicon Nanowires, in Symposium BB: Thermoelectric Materials—From Basic Science to Applications, **2013 MRS Fall Meeting**, Boston, MA (December 2013)
85. D. Merkel and F. Sansoz: Flexible Thermoelectric Materials using InSb Nanowire Networks, in Symposium BB: Thermoelectric Materials—From Basic Science to Applications, **2013 MRS Fall Meeting**, Boston, MA (December 2013)
86. F. Sansoz: Atomistic Simulation Study of Size Effects in Compression of Nanoscale Cu Pillars Containing Complex Dislocation Networks, in Symposium SS: Properties and Processes at the Nanoscale—Nanomechanics of Material Behavior, **2011 MRS Fall Meeting**, Boston, MA (December 2011)
87. F. Sansoz: Size-dependent Strength and Fracture of Twinned Metal Nanowires through Surface Engineering and Microstructural Design, **DFG-NSF Joint Research Conference on Sustainable Use of Nanomaterials**, New York City, NY, (October 2009)
88. J. Gu and F. Sansoz: Mechanical Properties in Individual Carbon Nanofibers at High Temperature and High Pressure by Molecular Dynamics Simulations, **2008 MRS Fall Meeting**, in Symposium EE: Nano- and Microscale Materials—Mechanical Properties and Behavior under Extreme Environments, Boston, MA (December 2008)
89. C. Deng, K. A. Afanasyev and F. Sansoz: Gold nanopillar compression: Strengthening mechanisms with nanoscale growth twins, **2007 MRS Fall Meeting**, in Symposium AA: Fundamentals of Nanoindentation and Nanotribology IV, Boston, MA (December 2007). **Nominee for best poster award**
90. K. Afanasyev and F. Sansoz: Atomic mechanisms of plasticity in twin-dominated metal nanopillars, **2006 MRS Fall Meeting**, in Symposium EE: Size Effects in the Deformation of Materials -- Experiments and Modeling, Boston, MA (December 2006). **Nominee for best poster award**
91. V. Dupont and F. Sansoz: Deformation of Nanocrystalline Metals under Nanoscale Contact, **NSTI Nanotech 2006**, Boston, MA (May 2006)

92. F. Sansoz and J.F. Molinari: The Relation between Sliding and Structure at Grain Boundaries in Nanoscale FCC Bicrystals, *2005 MRS Spring Meeting*, Symposium BB: Mechanical Properties of Nanostructured Materials: Experiments and Modeling, San Francisco, CA (March 2005). **Nominee for best poster award**
93. C.V. Wolf, G. Gary and F. Sansoz: Bio-Transport in Nanoporous Synthetic Membranes: Synthesis, Testing, and Molecular Modeling, *Vermont EPSCoR Annual Meeting*, University of Vermont, Burlington, VT (February 2005)
94. D. L. Languerand, N.S. Murthy, and F. Sansoz: Multiscale Investigation of Mechanical Properties in High-Strength Polymeric Fibers, *Vermont EPSCoR Annual Meeting*, University of Vermont (February 2005)
95. K.D. Stevenson and F. Sansoz: Electrodeposition of Nanocrystalline Ni Thin Films for MEMS Technology, *Vermont EPSCoR Annual Meeting*, University of Vermont, Burlington, VT (February 2005)
96. F. Sansoz and J.F. Molinari: Mechanical Behavior of Tilt Grain Boundaries in FCC Metals from Quasicontinuum Simulations, *Gordon Research Conference on Physical Metallurgy*, Plymouth, NH (July 2004)
97. C. Sarrazin-Baudoux, F. Sansoz and H. Ghonem: Microstructure-Environment Interactions in Fatigue Crack Growth Mechanisms of Alpha/Beta Titanium Alloys at High Temperature, *Euromat 2003*, Lausanne, Switzerland (2003)
98. D.H. Warner, F. Sansoz and J.F. Molinari: Modeling of Deformation in Nanocrystalline Copper using an Atomistic-Based Continuum Approach, *2003 MRS Fall Meeting*, Symposium Q: Mechanical Properties of Nanostructured Materials and Nanocomposites, Boston, MA (2003)
99. R.T. Ott, F. Sansoz, J.F. Molinari, J. Almer, C. Fan and T.C. Hufnagel: Synchrotron Strain Measurements for in-situ Formed Metallic Glass Matrix Composite, *2003 MRS Fall Meeting*, Symposium MM: Amorphous and Nanocrystalline Metals, Boston, MA (Dec. 2003)
100. F. Sansoz, B. Brethes and A. Pineau: Growth of Short Fatigue Cracks from Stress Concentrations in N18 Superalloy, *9th SF2M Spring Meeting on Temperature-Fatigue Interaction*, Paris, France (2001)
101. F. Sansoz: The Propagation of Short Fatigue Cracks from Notches in a Ni based Superalloy, *Junior Euromat 98*, Swiss Federal Institute of Technology, Lausanne, Switzerland (1998)

## MENTORED STUDENTS AND SCHOLARS

---

### Graduate Students (current & past)

#### Ph.D. Students:

1. Dr. Qiongjiali (Lily) Fang, Ph.D. Mechanical Engineering 2020. Research: Understanding Grain Boundary and Stress Concentration Effects on Strengthening Mechanisms in Nanotwinned Metals
2. Dr. Rodrigo Penide-Fernandez, Ph.D. Mechanical Engineering 2020. Research: Multiscale Modeling of Heat-transfer in two-dimensional woven fiber ceramic materials for flexible thermal protection systems
3. Dr. Xing Ke, Ph.D. Materials Science 2018, Research: Atomistic Simulation Studies of Grain-Boundary Segregation and Strengthening Mechanisms in Nanocrystalline Nanotwinned Silver-Copper Alloys
4. Dr. Erin Wood, Ph.D. Mechanical Engineering 2014. An Atomic Force Microscopy Nanoindentation Study of Size Effects in Face-Centered Cubic Metal and Bimetallic Nanowires. Now NRC Postdoctoral Fellow at the National Institute of Standards and Technology (NIST), Gaithersburg, MD.
5. Dr. Jingjun (Jessie) Gu, Ph.D. Mechanical Engineering 2013. Elucidating the Complex Role of Microstructure on Mechanical Properties in Carbon Nanofibers by Atomistic Simulations. Now lecturer at Miami University.
6. Dr. Chuang Deng, Ph.D. Materials Science, 2009. Yielding and Plasticity in Twinned FCC Metal Nanowires Studied by Atomistic Simulations. Now Assistant Professor in Mechanical Engineering at Univ. of Manitoba, Canada.
7. Dr. Virginie Rollin (Dupont), Ph.D. Mechanical Engineering, 2008. Multiscale Modeling of Contact Plasticity and Nanoindentation in Nanostructured FCC Metals. Now Assistant Professor in Aerospace Engineering at Embry Riddle Aeronautical University, Daytona Beach, Florida.

#### M.S. Students:

8. Akiva Gopalkrishnan, Mechanical Engineering M.S. student. Research: Finite-element modeling of random nanowire networks

9. Jacob Williams, Mechanical Engineering M.S. student. Research: Peridynamics simulation study of repeated projectile impact on a steel plate
10. Tara Nenner, Mechanical Engineering M.S. student. Research: Atomic-scale analysis of solute segregation energy into grain boundaries and polycrystals
11. Ryan Pringle, Mechanical Engineering M.S. student, Strengthening mechanisms in nanocrystalline Ag-Ni nanolayers
12. Eve-Audrey Picard, Mechanical Engineering M.S. student. Research: Ni solute segregation and mechanical behavior in nanocrystalline FCC, BCC and HCP alloys
13. Cory Arcovitch, M.S. Mechanical Engineering 2017. Research: Design and performance of stretchable InSb nanowire-based nanocomposites for energy harvesting
14. Qiongjiali (Lily) Fang, M.S. Mechanical Engineering 2015. The interaction mechanisms of a screw dislocation with a defective coherent twin boundary in copper
15. Daniel Merkel, M.S. Mechanical Engineering 2014. Fabrication and Testing of Flexible Indium Antimonide Nanowire Networks.
16. Aaron Porter, M.S. Mechanical Engineering 2013. Atomistic Simulation Study of Thermal Transport in Nanotwinned Silicon. Now engineer at Global Foundries.
17. Shiqi Zhang, Graduate Teaching Assistant. Now graduate student at Arizona State University.
18. Evan Malina, M.S. Mechanical Engineering 2011. Mechanical Behavior of Atomically-thin Graphene Sheets using Atomic Force Microscopy Nanoindentation. Now structural engineer at Boeing.
19. Konstantin Afanasyev, M.S. Physics, 2007. Atomistic Simulations of Twin Boundary Effects on Deformation in Gold Nanobeams and Nanopillars. Now at engineer for GE Health Care.
20. Dulcie Languerand, M.S. Mechanical Engineering, 2007. Multiscale Investigations of Deformation in High-Strength Polymeric Fibers. (co-advised with Prof. Sanjeeva Murthy, Physics Department, UVM)
21. Carl Wolf, Graduate Research Assistant, 2004-2006. Multiscale Modeling of Thermal Transport in Molecular Systems. Now Assistant Professor at Vermont Technical College, Randolph, VT.
22. Kevin Stevenson, M.S. Mechanical Engineering, 2006. Electrochemical Synthesis and Mechanical Properties of Ni Nanostructures. Now Structural Engineer for Concept2, Morrisville, VT.
23. Eric Buchovecky, Graduate Research Assistant (Jan 04-to Aug. 04). Quasicontinuum Simulations of Single Crystal Nanoindentation.
24. Jose Arteiro, M.S. Mechanical Engineering 2002 (University of Rhode Island, co-advised with Prof. Hamouda Ghonem). Effects of Heat Treatment on Microstructure and Fatigue Crack Growth in Near-alpha Titanium Alloy IMI 834 at Elevated Temperature.

#### **Visiting Scholars/Postdoctoral Research Associates (current & past)**

1. Dr. Rodrigo Penide-Fernandez, Postdoctoral Research associates, Research: Strain localization studies in nanocrystalline metals using in-situ tensile testing, September 2020 – present.
2. Dr. Zhiliang Pan, Postdoctoral Fellow, Research: Ab-initio and molecular dynamics simulation study of nanotwinned Ag-Ni alloys, October 2016 – October 2019.
3. Dr. Xia Zhou, Visiting Professor, Director of Biomechanics and Nanomechanics Laboratory at Dalian University, China. January 2015 – July 2015. Research: Atomistic Simulation of Mg-based Nanocomposites
4. Dr. Vincent Peron-Luhrs, Visiting graduate student from University of Liege, Belgium, September 2009. Research: Quasicontinuum Modeling and Simulation of Sigma Tilt Grain Boundaries in Metals.
5. Dr. Fahmi Bedoui, Postdoctoral researcher, July 06-Dec. 06 (in collaboration with UVM Physics Department). Research: AFM-Based Nanoindentation of Micro- and Nano-structured Polymers.

#### **Undergraduate Research Assistants (current & past)**

1. Luc Capaldi, 2020 NASA ESPCoR REU, Research: ReaxFF atomistic simulation study of oxidation in SiC
2. Eve-Audrey Picard, Barrett Scholar, 2019. Deposition of metallic nanocomposites for wind turbines.
3. Isabella Barbera, Barrett Scholar, 2017 – 2018. Fabrication of stretchable Ag nanowire elastomer composites

4. Ena Ibrimovic, REU and Barrett Scholar, 2016 – 2017. Ice-templated Electrodeposition of Ag and Cu Nanowires.
5. Rodrigo Penide Fernandez, International Student Exchange Program (2015) - Senior Thesis: Modeling of 3-D Woven SiC Fabrics for Flexible Thermal Protection Systems.
6. Cory Arcovitch, Honors Thesis in Mechanical Engineering (2015). Thesis title: Performance of Flexible Thermoelectric Nanowire Composites under Reversible Deformation.
7. Samuel Kessler, Honors Thesis in Mechanical Engineering 2013. Thesis title: Thermal Conductivity Simulations in Heterostructure Nanowires.
8. Chan Tran, Summer 2013 REU student, Physics and Computer Science at Siena College.
9. Khrystyna Dilai, Summer 2012 REU student, Chemical Engineering student at Clarkson University.
10. Jake Brutman, UVM Chemistry Department. Now graduate student at Univ. of Minnesota.
11. Trevor Avant, Honors College Thesis. UVM Mechanical Engineering. Thesis title: Mechanics of Indentation in Nanowires from Atomistic Simulations.
12. Evan Malina, Undergraduate Research Endeavor Competitive Award (URECA) (Spring 09-Fall 09). Determination of Mechanical Properties by Indentation in Nanoscale Metallic Wires using AFM
13. Zach Burchman, Honors College Senior Thesis (Fall 07-Spring 08). Growth, Structure and Mechanical Properties of Single Crystal and Polycrystalline Nickel Nanowires
14. Travis Gang, (1) Undergraduate Research Endeavor Competitive Award (URECA) (Spring 07-Fall 07). Determination of atomic force microscope cantilever spring constants via finite element modeling for nanomechanical analysis; (2) Helix Summer Intern (Summer 07) Effects of Surface Morphology on Elastic and Plastic Properties in Nanocrystalline Ni Electrodeposits.
15. Grant Gary, Undergraduate Research Endeavor Competitive Award (URECA) (Spring 05-Spring 06). Synthesis of Ni Nanowires by Template-Assisted Electrodeposition.
16. Virginie Rollin (Dupont), Senior thesis, Ecole Supérieure de Mécanique et Aérotechnique (ENSMA), Atomistic Studies of Plasticity in Nanomaterials.
17. John B. Marking, ME Undergraduate Research Assistant (Summer 04). Fabrication of ultra sharp scanning tunneling tips.

## TEACHING

---

### University of Vermont

- ME350 – Multiscale Modeling. Credits: 3. Level: Graduate  
Student enrollment: 10 (Spring 07), 10 (Spring 2017), 16 (Fall 2020).
- ME259 – Computational Solid Mechanics. Credits: 3. Level: Graduate/senior elective  
Student enrollment: 23 (Fall 12), 14 (Spring 14), 29 (Spring 15), 29 (Spring 16), 27 (Spring 17), 14 (Spring 18), 15 (Spring 2019).
- ME255 – Advanced Engineering Materials. Credits: 3. Level: Graduate/senior elective  
Student enrollment: 27 (Fall 08), 23 (Fall 09), 32 (Fall 14), 36 (Spring 2021).
- ME252 – Mechanical Behavior of Materials. Credits: 3. Level: Graduate/senior elective  
Student enrollment: 11 (Fall 04), 16 (Fall 05), 10 (Fall 06), 14 (Spring 08), 11 (Spring 09), 12 (Spring 10), 14 (Spring 12), 26 (Fall 13), 27 (Fall 15), 6 (Spring 18), 14 (Spring 2019), 23 (Spring 2020).
- ME124 – Mechanics and Materials Lab (Mechanical Engineering Lab III). Credits: 2. Level: Junior  
Student Enrollment: 40 (Spring 06), 34 (Spring 07), 40 (Spring 08), 66 (Spring 09), 90 (Spring 2010), 88 (Spring 2015), 36 (Fall 2019), 47 (Spring 2020).
- ME101 – Materials Engineering. Credits: 3. Level: Junior  
Student enrollment: 39 (Fall 05), 41 (Fall 06), 44 (Fall 07), 39 (Fall 11), 30 (Spring 13), 49 (Fall 13), 50 (Fall 14), 55 (Fall 2015), 56 (Fall 2016), 47 (Fall 2018), 55 (Fall 2019), 61 (Fall 2020).
- ME014 – Mechanics of Solids. Credits: 3. Level: Sophomore;  
Student enrollment: 36 (Spring 04), 38 (Spring 05), 42 (Spring 06), 39 (Spring 12), 59 (Spring 13).

## Other Teaching Experience

- Ecole des Mines, Paris, Centre des Materiaux P.M. Fourt (1998-1999): Undergraduate and MS students advising for research projects in the Mechanics and Materials Master program.
- University of Evry, Department of Engineering (1997-1999): Graduate teaching assistant. Lecture and grading. Atom Diffusion and Mechanics of Materials.

## FUNDED RESEARCH AWARDS

---

1. Title: "Role of Heterogeneous Segregation on Shear Localization Mechanisms in Nanocrystalline Alloys"  
Source: **U.S. Department of Energy/Basic Energy Sciences**  
Role: **PI**, 100% effort  
Amount awarded: **\$584,936**  
Project duration: 08/15/19-08/14/22
2. Title: "MRI: Acquisition of a Variable-Pressure, Field-Emission Scanning Electron Microscope for Materials Research and Education"  
Source: **National Science Foundation - MRI**  
Role: **co-PI**, 20% effort  
Amount awarded: **\$480,000**  
Project duration: 10/01/18-09/30/21
3. Title: "Strengthening Nanotwinned Metals Beyond the Hall-Petch Limit"  
Source: **U.S. Department of Energy/Basic Energy Sciences**  
Role: **PI**, 100% effort  
Amount awarded: **\$586,000**  
Project duration: 08/15/16-08/14/19
4. Title: "Role of Defects and Stacking-Fault Energy in Deformation and Fracture of Nanotwinned Metals"  
Source: **National Science Foundation**  
Role: **PI**, 100% effort  
Amount awarded: **\$285,000**  
Project duration: 09/01/14-08/31/17
5. Title: "Flexible Thermal Protection Systems: Materials Characterization and Performance in Hypersonic Atmospheric Entry"  
Source: **NASA EPSCoR Faculty Research Team Competition**  
Role: **PI**, 30% effort (Co-PI's: D. Fletcher, Y. Dubief, D. Huston, T. Tan)  
Award: **\$749,999** (+ additional **\$376,966** in University of Vermont matching fund)  
Project duration: 08/01/14-07/31/17
6. Title: "Undergraduate Research in Complex Materials"  
Source: **National Science Foundation** – Division of Materials Research  
Program: **Research Experience for Undergraduates (REU) Program**  
Role: **co-I/Faculty Mentor** (PI: Dennis Clougherty, co-PI: Madalina Furis); 10% effort  
Award: **\$286,000**  
Project duration: 03/01/11-02/28/14
7. Title: "CAREER: Microstructure and Size Effects on Metal Plasticity at Limited Length Scale"  
Source: **National Science Foundation** – Division of Materials Research – Metals Program  
Program: **National Science Foundation CAREER award**  
Role: **PI**, 100% effort  
Award: **\$400,000**  
Project duration: 04/01/08-03/31/14
8. Title: "Investigation of Critical Aerothermodynamic Phenomena for Hypersonic Vehicles"  
Source: **NASA** Experimental Program to Stimulate Competitive Research (EPSCoR)  
Program: Faculty Research Team Competition  
Role: **Co-I** (PD/PI: Douglas Fletcher; other Co-Is: Y. Dubief, D. Huston, D. Hitt); **20% effort**  
Award: **\$750,000** (+ \$761,028 from in-kind UVM matching funds);  
Project duration: 09/01/07-08/31/10

## Other Funded Research Awards

---

9. Title: " Heat Conduction in Flexible 2-D Woven Ceramic Fibers for Extreme Atmospheric-entry Environments "  
Source: VT NASA EPSCoR Small-scale grant  
Role: **PI; 100% effort**  
Amount awarded: **\$16,250**; Project duration: 10/01/19-09/30/20
10. Title: " Heat Conduction in Flexible 2-D Woven Ceramic Fibers for Extreme Atmospheric-entry Environments "  
Source: VT NASA EPSCoR Small-scale grant  
Role: **PI; 100% effort**  
Amount awarded: **\$24,983**; Project duration: 08/01/18-07/30/19
11. Title: "Atomistic Simulation Studies of Nanotwinned Alloys"  
Source: National Energy Research Scientific Computing Center (NERSC)  
Role: **PI**  
Award: **9 Million CPU hours** on supercomputers; Project duration: 09/01/16 – present
12. Title: "Hybrid Monte-Carlo/Molecular Dynamics Simulation Studies on the Mechanical and Thermal Transport Behavior of Nanotwinned Materials"  
Source: NSF - Extreme Science and Engineering Discovery Environment (XSEDE)  
Role: **PI**  
Award: **2.8 Million CPU hours** on supercomputers; Project duration: 10/01/13 - present
13. Title: "Thermoelectric Performance of Stretchable Nanowire-based Composite Materials"  
Source: NASA/Vermont Space Grant Consortium - Graduate Research Assistantship  
Role: **PI/Faculty mentor** Amount awarded: **\$25,000**; Project duration: 08/01/16-07/31/17
14. Title: "Thermoelectric Performance of Stretchable Nanowire-based Composite Materials"  
Source: NASA/Vermont Space Grant Consortium - Graduate Research Assistantship  
Role: **PI/Faculty mentor** Amount awarded: **\$27,500**; Project duration: 09/01/15-06/30/16
15. Title: " Performance of Flexible Thermoelectric Nanowire Composites under Reversible Deformation"  
Program: UVM Summer Award for Undergraduate Research  
Role: **PI/Faculty Mentor** Award: **\$5,000**; Period: 06/01/2014-08/31-2014
16. Title: "Flexible Thermal Protection Systems: Materials Characterization and Performance in Hypersonic Atmospheric Entry"  
Source: VT NASA EPSCoR Small-scale grant  
Role: **PI** (with Douglas Fletcher as co-PI); **66% effort**  
Amount awarded: **\$25,000**; Project duration: 05/01/13-04/30/14
17. Title: "Study of Thermal Transport in High-ZT Nanoengineered Thermoelectrics"  
Source: NASA/Vermont Space Grant Consortium - Graduate Research Assistantship  
Role: **PI/Faculty mentor** Amount awarded: **\$27,500**; Project duration: 09/01/12-08/30/13
18. Title: "*In-situ* mechanical characterization of microparticles by atomic force microscopy"  
Source: NASA/Vermont Space Grant Consortium - Graduate Research Assistantship  
Role: **PI/Faculty mentor**; Award: **\$27,000**; Project duration: 07/01/10-06/30/11
19. Title: "Atomistic simulation study of indentation of nickel nanowires"  
Source: University of Vermont – Vermont Space Grant Consortium  
Program: Undergraduate Research Endeavor Competitive Award (URECA!)  
Role: **PI/Faculty Mentor**  
Amount awarded: **\$3,000**; Project duration: 07/01/10-06/30/11
20. Title: "Determination of mechanical properties by indentation of nanoscale metallic wires using atomic force microscopy"  
Source: University of Vermont – Vermont Space Grant Consortium  
Program: Undergraduate Research Endeavor Competitive Award (URECA!)  
Role: **PI/Faculty Mentor**  
Amount awarded: **\$3,000**; Project duration: 05/01/09-04/30/10
21. Title: "Self-healing H<sub>2</sub> Storage"  
Source: Vermont EPSCoR Innovation Fund  
Role: **Co-PI** (PI: Dryver Huston); **33% effort**.  
Amount awarded: **\$5,000**; Project duration: 03/01/08-09/31/08

22. Title: "Determination of atomic force microscope cantilever spring constants via finite element modeling for nanomechanical analysis"  
Source: University of Vermont Undergraduate Research Endeavor Competitive Award (URECA)  
Role: **PI/Faculty Mentor**; Amount awarded: **\$3,000**; Project duration: 01/01/07-09/30/07
23. Title: "Computer Simulation of Thermal Phenomena and Energy Conversion in Molecular Scale Devices"  
Source: Vermont Space Grant Consortium Graduate Research Assistantship  
Role: **PI/Faculty Mentor**; Amount awarded: **\$20,000**; Project duration: 09/01/06-08/31/07
24. Title: "Computation in Mechanical Engineering and the Physical Sciences: Calculation and simulation from the mesoscale to the nanoscale"  
Source: Vermont Advanced Computing Center Planning Proposal  
Role: **Co-PI** (PI: Kelvin Chu); Amount awarded: **\$5,000**; Project duration: 01/01/06-12/31/06
25. Title: "Acquisition of a metal sputtering system"  
Source: NSF - Vermont EPSCOR Polymer/Composites Group Fund – Small equipment grant  
Role: **PI**; Amount awarded: **\$8,445**; Project duration: 02/01/06-12/31/06
26. Title: "Enabling *In-Situ* AFM-Based Indentation"  
Source: College of Engineering and Mathematical Sciences - Outwater Funding Award  
Role: **PI**; Amount awarded: **\$6,900**; Project duration: 02/01/06-12/31/06
27. Title: "Enabling Advanced AFM Probe Positioning For Nanomaterials and Nanofluidics Research"  
Source: National Science Foundation – Vermont EPSCOR Small Equipment Acquisition  
Role: **PI**; Amount awarded: **\$16,125**; Project duration: 10/01/05-3/31/06
28. Title: "Mechanosensing in Nanopores: A Massively-Parallel Molecular Dynamics Study"  
Source: Vermont Space Grant Consortium Graduate Research Assistantship  
Role: **PI/Faculty Mentor**; Amount awarded: **\$19,000**; Project duration: 09/01/05-08/31/06
29. Title: "Nanoporous Polymeric Membranes: Molecular Templating and Testing"  
Source: University of Vermont Undergraduate Research Endeavor Competitive Award (URECA)  
Role: **PI/Faculty Mentor**; Amount awarded: **\$3,000**; Project duration: 01/01/05-09/30/05
30. Title: "Advanced Materials Initiatives using Scanning Electron Microscopy in Engineering Research"  
Source: National Science Foundation – Vermont EPSCOR Small Equipment Acquisition  
Role: **PI**; Amount awarded: **\$18,000**; Project duration: 03/31/04-3/31/05
31. Title: "Enabling Technology for High Speed Computing"  
Source: National Science Foundation – Vermont EPSCOR Small Equipment Acquisition  
Role: **co-PI** (PI: Prof. Georges Pinder)  
Amount awarded: **\$20,000**; Project duration: 03/31/04-3/31/05

## **PROFESSIONAL ACTIVITIES**

---

### **Professional Memberships**

American Society of Mechanical Engineers (ASME), member  
Materials Research Society (MRS), member  
The Minerals, Metals and Materials Society (TMS), member  
Société Française de Métallurgie et Matériaux (SF2M), member

### **Professional Service**

#### **Conference Symposium Organization:**

- a. **Lead-organizer** (with G. Cross, J. Lou and D. Kiener), Symposium S – Mechanical Behavior at the Nanoscale, 2015 MRS Fall Meeting, Boston, MA.
- b. **Co-organizer** (with X. Zhang, H. Wang, N. Li and X. Li), Symposium “Mechanical Behavior of Nanostructured Materials”, 2015 Society of Engineering Science (SES) Annual Meeting, College Station, TX.
- c. **Lead-organizer** (with J. Lou, R. Miller and Y.M. Wang), Symposium “Structure-Property Relationships in Low-dimensional Metallic Nanostructures”, Materials Science & Technology 2013, Montreal, QC.
- d. **Co-organizer** (with J. Lou, X. Zhang, J. Huang, C. Eberl and V. Tomar), Symposium “Mechanical Behavior of Low Dimensional Materials”, Materials Science & Technology 2010, Houston, TX.

### Conference Session Chair:

1. Symposium NM10. 2018 MRS Spring Meeting, Phoenix, AZ
2. Symposium TC6. 2017 MRS Fall Meeting, Boston, MA
3. Symposium S. 2015 MRS Fall Meeting, Boston, MA
4. Symposium RR: Scaling Effects in Plasticity-Synergy between Simulations and Experiments, 2014 MRS Fall Meeting, Boston, MA
5. 2013 MS&T conference, Symposium on Structure-Property Relationships in Low-dimensional Metallic Nanostructures.
6. 2010 MS&T conference, Symposium on Mechanical Behavior of Low Dimensional Materials.
7. 2010 European Congress on Computational Mechanics, Symposium on Crystalline Nanostructures.
8. 2009 International Conference on Fracture, Symposium: Atomistic Deformation and Fracture.
9. 2008 ASME/IMECE congress, track 12-12: Modeling and Experiments in Nanomechanics and Nanomaterials
10. 2008 ASME/IMECE congress, track 13-3: Recent Advances in Computational Study of Nanostructures
11. 2005 MRS Fall meeting, symposium Z: Amorphous and Nanocrystalline Metals for Structural Applications

**Editorial Board Membership:** Journal of Nanoscience Letters (2010-2013), ISRN Nanomaterials (2011-2014), ISRN Nanotechnology (2013-2014)

**Book Reviews:** Oxford University Press, Cambridge University Press.

### Reviewer for 54 Referred Journals:

ACS Applied Nano Materials	Journal of Physics D: Applied Physics
ACS Nano	Journal of Virtual Experiments (JOVE)
Acta Materialia	Journal of Micromechanics and Microengineering
Applied Physics Letters	JOM
ASME Journal of Applied Mechanics	Materialia
ASME Journal of Tribology	Materials Research Letters
Carbon	Materials Science and Engineering A
Computational Materials Science	Mechanics of Materials
Current Nanoscience	Metals
Electrochimica Acta	Multiscale Modeling in Materials and Structures
Experimental Mechanics	Modeling and Simulation in Materials Sci. and Engng.
Extreme Mechanics Letters	Nanoscale
International Journal of Plasticity	Nanotechnology
Int. Journal of Smart and Nano Materials	Nano Letters
ISRN Nanomaterials	Nature
Journal of Alloys and Compounds	Nature Communications
Journal of Applied Physics	Nature Materials
Journal of Applied Crystallography	Nature Materials Reviews
Journal of the Electrochemical Society	Physical Review B & E
Journal of the European Ceramic Society	Physical Review Letters
Journal of Materials Research	Philosophical Magazine
Journal of Materials Science	Surface and Coatings Technology
Journal of the Mechanics and Physics of Solids	Surface Science
Journal of Nanoscience Letters	Semiconductor Science & Technology
Journal of Physical Chemistry	Scripta Materialia
Journal of Physics: Cond. Matter Physics	Scientific Reports (Nature)
	The Open Electrochemistry Journal
	Tribology Transactions

### Reviewer for Funding Agencies:

ACS – Petroleum Research Fund  
Air Force Office of Scientific Research  
Center for the Advancement of Science in Space (CASIS)  
Quebec Research Foundation for Nature and Technologies  
Samsung Electronics  
US Department of Energy – Basic Energy Science  
US National Science Foundation  
Vermont EPSCoR

## **Proposal Review Panels:**

Spring 2019: US National Science Foundation - Division of Engineering  
Spring 2016: US National Science Foundation - Division of Engineering  
Spring 2016: US National Science Foundation - Division of Materials Research  
Fall 2014: US National Science Foundation - Division of Materials Research  
Spring 2014: US National Science Foundation - Division of Engineering  
Spring 2013: US National Science Foundation - Division of Materials Research  
Spring 2013: Center for the Advancement of Science in Space (CASIS)  
Spring 2012: US National Science Foundation - Division of Materials Research  
Spring 2009: US National Science Foundation - Division of Materials Research

## **Service for the University of Vermont:**

**2011-present** Director, Mechanical Engineering Graduate Program  
**2016 – present** Executive Committee Member, UVM Materials Science Graduate Program  
**2014-present** Faculty Mentor, University of Vermont MRS Student Chapter  
**2019-2020** Acting Chair of the Department of Mechanical Engineering

### ***Regular Faculty Committees***

Mar. 14 – May 15 Honors College Representative for the College of Engineering & Mathematical Sciences  
Fall 06 – Fall 10 Member, Materials Science Program Steering Committee  
Fall 06 – Fall 10 Member, College of Engineering & Mathematical Sci. Faculty Advisory Council  
Fall 09 – Fall 10 Chair, Mechanical Engineering Laboratory Planning Committee  
Spring 07 – Fall 07 Point Person, Multiscale System Focus Group, School of Engineering  
Fall 05 - Spring 06 Chair, Mechanical Engineering Curriculum Committee  
Fall 04 - Spring 05 Information Technology Committee, Mechanical Eng. Representative  
Spring 04 - Present UVM Graduate Faculty

### ***Faculty/Staff Searches***

Fall 18 – Spring 19 Chairperson, Computational Mechanics Tenure-Track Faculty Search  
Fall 16 Chairperson, Coordinator for Graduate Programs in CEMS (staff) search  
Fall 14 – Spring 15 Committee Member, Lecturer Search in Mechanical Engineering  
Fall 13 – Spring 14 Chairperson, Tenure-track Faculty Search in Mechanical Engineering  
Fall 12 - Spring 13 Chairperson, Tenure-track Faculty Search in Mechanical Engineering  
Summer 10 Chairperson, Lecturer Search in Mechanical Engineering  
Summer 09 Committee Member, Lecturer Search in Mechanical Engineering  
Fall 08 – Spring 09 Committee Member, School of Engineering Director Search  
Fall 08 – Spring 09 Committee Member, Faculty Search in Condensed Matter Physics  
Fall 07 – Spring 08 Committee Member, Bioengineering Faculty Search  
Summer 07 Committee Member, Electrical Engineering Laboratory Technician Search  
Fall 06 – Spring 07 Committee Member, Tenure-Faculty Faculty Search in Mechanical Engineering  
Spring 05 Committee Member, Tenure-Faculty Faculty Search in Mechanical Engineering

### ***Graduate Student Doctoral Thesis Defense***

Spring 2021 Member, Dan Orfeo (Mechanical Engineering), Doctoral defense  
Fall 2020 Member, Zhuang Liu (Mechanical Engineering), Doctoral defense  
Spring 2020 Chairperson, Brandon Ackley (Chemistry), Doctoral defense  
Summer 2019 Member, Jason Pearl (Mechanical Engineering), Doctoral Defense  
Spring 2019 Chairperson, Saleh Alghamdi (Civil and Environmental Engineering), Doctoral Defense  
Fall 2018 Member, Yujie Li (Civil and Environmental Engineering), Doctoral defense  
Fall 15 Member, Nestor Polanco (Civil and Environmental Engineering), Thesis proposal  
Spring 15 Member, Walt Owens (Mechanical Engineering), Doctoral defense  
Spring 14 Member, Vincent Peron-Luhrs (Univ. of Liege, Mechanics), Doctoral defense  
Spring 13 Member, Ishviene Cour (Materials Science), Doctoral defense  
Fall 11 Chairperson, Adam Richardson (Chemistry), Doctoral defense  
Fall 09 Member, Wenjie Wang (Materials Science), Doctoral defense  
Fall 09 Member, Lan Zhou (Materials Science), Thesis proposal  
Fall 09 Member, Ana Barbir (Mechanical Engineering), thesis proposal  
Summer 09 Member, Songtao Wo (Materials Science), thesis proposal  
Summer 09 Member, Art Michalek (Mechanical Engineering), Doctoral defense  
Spring 09 Member, Sredhar Manchu (Mechanical Engineering), thesis proposal  
Fall 04 Member, Matt McGarry (Mechanical Engineering), Doctoral defense

**Graduate Student M.S. Thesis Defense**

Summer 20 Member, TJ Heffernan (Mechanical Engineering), MS defense  
Spring 18 Member, Taylor Ducharme (Mechanical Engineering), MS proposal  
Spring 17 Chairperson, John Gilbert (Geology), M.S. defense  
Spring 15 Chairperson, Brian Ribbans (Civil Engineering), M.S. defense  
Summer 14 Member, Max Graves (Materials Science), M.S. defense  
Summer 14 Chairperson, Peter Hornish (Physics), M.S. defense  
Summer 14 Member, Meredith Koch (Mechanical Engineering), M.S. defense  
Summer 13 Chairperson, Patrick Dyess (Geology), M.S. defense  
Fall 12 Chairperson, Yijian Zheng (Biomedical Engineering), M.S. defense  
Spring 09 Chairperson, Shay Romine (Geology), M.S. proposal  
Spring 08 Chairperson, Christopher Massa (Bioengineering), M.S. defense
