The Miami University Geography Department is inviting applications for graduate study <http://www.units.muohio.edu/geography/academic-programs/graduate-program/>. We offer a rigorous and flexible MA program, international research opportunities, and small faculty-student ratios that provide a compelling choice for students interested in going on to subsequent work in the professional world, or further study in PhD programs.

We have a number of fellowships available, and are particularly encouraging applications from students interested in working on urban, environment or development issues covering US, European, Middle Eastern, African or Asian contexts. I am interested in working with students on cultural, population, and tourism issues in China or Central Asia. If you know of a student who might be interested, please have them contact us ASAP.

Bruce D’Arcus  
Associate Professor, Graduate Director  
Department of Geography
