November 1, 2018

Dear Garden Space grower,

It is with great regret and sadness that we have to announce that we have had to **suspend the Garden Space Program indefinitely**.

We have had an influx of research and teaching projects due to some recent faculty hiring. The upcoming 2018-2019 winter-spring season is looking even more active with large research projects, more than we have hosted in the last ten years. The increased activity will impact all of the Greenhouse Facilities. With available space predicted to be critically low during the majority of the spring growing season we have reluctantly decided to suspend the Garden Space Program.

The Main Campus Greenhouse is always open to visitors. We hope to see you soon.

Sincerely,

Colleen Armstrong, Tom Doubleday, and David Heleba
UVM Greenhouse Staff
