Start Your Plants in the UVM Greenhouse

If you dream of starting your own seedlings for your home garden, we can make it happen. We provide soil, containers, and labels. We water, fertilize, and protect your plants from insects and diseases.

Why?

We make growing fun and easy. You can grow your favorite, new, hard-to-find or heirloom varieties. We like working with people who have never gardened before.

How?

Sign up by contacting us at greenhouses@uvm.edu. We provide the space (10 ft² that's enough for ninety small pots or thirty 6 packs); you provide the seed. \$50 for the first month; \$25 each 2 week period afterward. Share the space with a friend to save even more!

Pat Downer of the College of Ag. and Life Sciences Dean's Office says of her experience last year, "It's just so pleasant and cheerful in the greenhouse. Everything grows so much faster there. I can't start seeds at home and have them grow so quickly and robust. The greenhouse staff was especially helpful."
