Be part of the solution!  
Become a Master Composter! Take the course!

Anyone with a garden, lawn, trees or house plants has a use for compost! Composting is about recycling organic material back to the soil in a usable form. It’s also about reawakening our awareness of the value of healthy soil in the food web. Composting is practical, convenient, inexpensive, and will soon be required by Act 148.

September 26 – October 31, 2017
