If you want to learn about clinical data quality issues related to the EHR and wireless systems...

- What are the quality issues with installed wireless systems—reliability, security and performance?
- What is the value proposition for wireless enhancement?
- What wireless solutions provide the required quality for clinical data—design, costs, testing, and support?
- What quality measures are needed to insure the integrity of the electronic health record and clinical data?
- What patient safety measurements lead to improved patient care?
- You should attend...

Clinical Data Quality within the Convergence of Technologies

Invited Faculty

David H. Hoglund is the Principal and Founder of Integra Systems. Integra Systems, Inc. provides strategic planning for mobility communications, work flow and automation process, coupled to productivity through all the aspects of wireless technologies to ensure that the business requirements are met. David has over 28 years of experience in the medical device and wireless environment, to include both the enterprise, clinical, and the point of care areas.
