The Art of the Kite in China

Kites are yet another Chinese invention and can be traced back over 2800 years. The earliest known kites were flat, not bowed, and often rectangular. Later, kites became uniquely Chinese, taking the shape of any and every living creature.

Bring this workshop to your classroom or school and let your students explore the cultural history and beauty of this art form.

- make a kite
- learn about its history
- see kites of paper and of silk
