

Geol 007: Earth Hazards

Climate Change Assignment 2014

For this assignment you will **create a work of art** depicting a theme or themes of your choice related to DEALING WITH human-induced climate change.

You may depict facts, opinions, activities, or any other relevant theme you wish but they must show ways in which **we can reduce human impact on the climate system.**

The style depends on your interests and abilities, and may range from painting or drawing to a collage of headlines, photographs, quotes, and/or other printed items. The only requirements are that your work fit on an 8 1/2" by 11" area, and that it be in good taste.

Along with your artwork **you should turn in a 1- to 2-paragraph description & discussion** of your work, being sure to cite sources for any information or quotes you use. At the end of this essay include a complete list of sources you used in both the essay and artwork. You can find lots of related climate change links at the class web site:

http://www.uvm.edu/~pbierman/classes/ehaz/climate_change.html

You MUST bring your completed artwork to CLASS on TUESDAY APRIL 15, 2014 as HARDCOPY, no electronic submissions accepted.

All essays must be typed so as to be easily readable.

VERY IMPORTANT: your artwork *and* the description must be stapled together and handed in as ONE ASSIGNMENT.

We will collect your work, so be sure to put your name on it. Your grade on this assignment will be based on the creativity, quality, and thought put into your work.
