Immerse yourself as an active participant in the Greater Burlington area at GreenHouse, one of UVM's Residential Learning Communities. GreenHouse provides sustainability themed programming for over 200 students from a range of majors and is located within University Heights South, a LEED-certified building designed to be energy efficient and incorporate local and recycled construction materials. GreenHouse takes an inclusive approach to sustainability that involves students, faculty, staff, and mentors from across campus and the greater Burlington area. We seek to deepen and celebrate our sense of place, fostering an atmosphere of connection to community, the built environments that we inhabit, and the natural landscape that surrounds us.

Ecology of Place
All first-year GreenHouse students must enroll in Ecology of Place (NR 15, one credit). In this self-paced course, students select from a suite of field-based introductions to the environmental attributes of UVM, the surrounding landscapes of Vermont, and the ecological principles that shape those landscapes.

Ecological Citizenship
Second-year GreenHouse students enroll in their choice of Ecological Citizenship seminars (NR 16, one credit), which are skills-based and enhance students’ abilities to live, cook, repair, recreate, and advocate using principles of sustainability.

Housing
Students in GreenHouse live together by program in suite-style triple and double-occupancy rooms in the University Heights South complex.

More Information on Next Page ▼
GreenHouse and its programs sponsor dozens of events and activities each semester. Here are some recent examples:

**NR15 Ecology of Place Events and Topics**
- Fall hikes and canoe trips
- Environmental art
- Harvest Celebration
- Cooking with medicinal plants
- Field Walks
- Ecological Design

**NR16 Ecological Citizenship Seminars**
- Maple Sugaring
- Winter Hiking
- Woodworking
- Nature Photography
- Yoga
- Cooking with Local Ingredients

**GreenHouse Guilds**
- Knitting
- Hiking
- Baking
- Photography
- Documentary Film
- Geocaching

**Nested Programs**: Four academic units at UVM have specialized courses of study nested within GreenHouse
- CALS - [LEAF Program](#)
- CAS - [Integrated Study of Earth & Environment](#)
- CEMS - [Ecological Engineers](#)
- RSENR - [Aiken Scholars Program](#)
