POLICY STATEMENT ON NON-DISCRIMINATION

It is the policy of the University of Vermont to provide equal opportunity in admissions, programs, and activities in compliance with Title VI of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, Section 504 of the Rehabilitation Act of 1973, and the Age Discrimination Act of 1975. As such, all University sponsored programs and activities, except where limitations or restrictions are legally permissible, shall be open to all students without regard to race, sex, handicap, color, religion, age, or national origin. In addition, it is the policy of the University that any and all forms of sexual harassment are unacceptable and will not be tolerated.

Inquiries regarding compliance with the foregoing, or the affirmative action policies of the University, should be directed to: The Assistant Vice President for Human Resource Development.

The University has an on-going program to provide accessible facilities and to respond to special needs of disabled persons. Questions should be referred to the Office of Architectural Barrier Control. In addition, students with physical or learning disabilities may contact the Office of Specialized Student Services in the Counseling and Testing Center.
Correspondence

Please address all inquiries and correspondence concerning applications and admission to the Graduate College Admissions Office, University of Vermont, Burlington, Vermont 05405; telephone (802) 656-2699. For other matters concerning the Dean, telephone (802) 656-3160.

Please address requests for transcripts from the University of Vermont to the Registrar, University of Vermont, Burlington, Vermont 05405.

Please address requests for Summer Session and Evening Division information to the Office of Continuing Education, University of Vermont, Burlington, Vermont 05405; telephone (802) 656-2085.

Application Deadlines

March 1: For applications requesting financial aid.
April 1: For applications to most departments.

Exceptions:

February 1: Psychology
March 1: Historic Preservation

Details on the above exceptions are given on page 18. Applicants should also consult individual program descriptions.

Although its legal title is The University of Vermont and State Agricultural College, the University is known to its students and alumni as UVM. This popular abbreviation is derived from the Latin Universitas Viridis Montis, University of the Green Mountains.

The colors of the University are green and gold.
The mascot is the catamount.

The University of Vermont

The University of Vermont was founded in 1791, taking its place among the handful of colleges founded in this country in the eighteenth century for the higher education of young colonials and Americans of the first post-revolutionary generation. The University was the fifth New England college chartered, the second established by a state to grant the bachelor’s degree, and the twentieth in the nation to do so.

Though it has enjoyed a long tradition of substantial private support, University development has been identified closely with that of the State since 1791 when Vermont's founding General Assembly granted a charter to the University and set aside about 29,000 acres throughout the State with the intent that rents from this land would support the new educational institution. That same Vermont General Assembly established that the bylaws of the University should give no preference to any religious sect or denomination or discriminate against any, making the University of Vermont the first in this country to go on public record as supporting freedom of religion upon its campus.

The University of Vermont consists of the Colleges of Agriculture, Arts and Sciences, Engineering and Mathematics, Education and Social Services, Medicine, and the Graduate College; the Schools of Allied Health Sciences, Business Administration, Natural Resources, and Nursing; and Continuing Education.

The present physical plant is valued at more than $55,000,000, a major share made possible through the interest and support of alumni and private philanthropy.

The University and the people of the Burlington area have long enjoyed cordial relations dating from 1800 when Burlington citizens voluntarily subscribed the necessary funds to provide Vermont's first institution of higher learning with its first building.

With a population of about 38,000, Burlington is Vermont's largest city. The greater Burlington area of approximately 125,000 inhabitants is divided between pleasant suburbs and picturesque farms and woodland. Burlington enjoys magnificent views of Lake Champlain and the Adirondack Mountains to the west and Vermont's Green Mountains to the east. Easily available outdoor activities include swimming, boating, hiking, climbing, and skiing.

Some 200 miles northwest of Boston, 300 miles north of New York City, and about 100 miles south of Montreal, Burlington is served by U.S. Air, Air North, People Express, Pilgrim Airline, Provincetown/Boston Airline, United Airlines, Vermont Transit and Greyhound Bus Lines, and Amtrak, and is contiguous to Vermont's interstate highway system.

THE GRADUATE COLLEGE

The Graduate College of the University of Vermont is responsible for all advanced degree programs except the program leading to the degree of Doctor of Medicine. Accordingly, the College serves all persons seeking advanced and comprehensive knowledge of the scholarship and research in a particular field of study beyond the baccalaureate degree.

All instruction at the University of Vermont is conducted in English and students are expected to be fluent in the language. There is no intensive English as a second language program. Applicants whose native language is not English and whose formal education has been conducted in a language other than English should submit official scores from the Test of English as a Foreign Language (TOEFL) in addition to those from the Graduate Record Examination (GRE). All international students must submit TOEFL scores.

Although the Graduate College was established formally in 1952 under a full-time Dean, the University of Vermont recognized early the value of graduate education and awarded its first master's degree in 1807. Today, the Graduate College offers 57 different master's programs of study and 16 doctoral
programs. During the 1983-84 academic year, 311 master's and 23 Doctor of Philosophy degrees were awarded.

The Graduate College is served by an Executive Committee which is composed of 10 faculty and a graduate student member. The Executive Committee works closely with the Dean of the Graduate College to insure comprehensive and outstanding programs of study. Currently, the College enrolls approximately 1,000 students, with about 250 of these pursuing the doctorate.

A variety of scholarships, fellowships, assistantships, and special loan programs are available in modest number to students with solid and sustained records of academic performance. The combination of sound library holdings, laboratories, and computer facilities, along with the engaging size of the university, affords a unique opportunity to pursue high quality graduate programs in a challenging yet personable environment.

THE UNIVERSITY SCHOLARS

The University Scholars program was established by the Graduate College to recognize the outstanding contributions of selected Graduate Faculty to research and scholarship in their areas of specialization as well as their sustained contributions to graduate education at the University of Vermont. Nominations for a University Scholar Award are made by members of the faculty and are reviewed by the appropriate Study Sections of the University Committee on Research and Scholarship and the Executive Committee of the Graduate College. The University Scholars for the 1984-85 academic year follow. Biological Sciences: Professor James Welch (Animal Sciences); Medical Sciences: Professor Norman Alpert (Physiology and Biophysics); Physical Sciences: Professor Wesley Nyborg (Physics); Social Sciences and Humanities: Professor Leonidas Jones (English). Other recently selected University Scholars include:

**Biological Sciences**
Richmond J. Bartlett, Plant and Soil Science (1983-84)
Alexander H. Duthie, Animal Sciences (1981-82)
George M. Happ, Zoology (1982-83)
Robert C. Ullrich, Botany (1980-81)

**Medical Sciences**
James F. Clapp, III, Obstetrics and Gynecology (1983-84)
Thomas J. Moehring, Medical Microbiology (1982-83)
Brooke T. Mossman, Pathology (1981-82)

**Physical Sciences**
Christopher W. Allen, Chemistry (1982-83)
David B. Brown, Chemistry (1981-82)
William E. Geiger, Jr., Chemistry (1983-84)
Stanley Rush, Electrical Engineering and Computer Sciences (1980-81)

**Social Sciences and Humanities**
Robert V. Daniels, History (1981-82)
Philip S. Kitcher, Philosophy (1983-84)
Harold Leitenberg, Psychology (1982-83)
Wolfgang Mieder, German and Russian (1980-81)
RESOURCES FOR RESEARCH AND SCHOLARSHIP, AND CULTURAL ACTIVITIES

The University Libraries. The main Library (Bailey-Howe) was dedicated in 1961, and the physical facilities were doubled in size in 1979. The Bailey-Howe Library holds the largest book collection in Vermont, and acquires regularly major periodicals, scholarly journals, and indexing and abstracting services. The University collections also include books in medicine and health-related sciences, and a strong collection in medical periodical literature maintained in the Dana Medical Library of the Division of Health Sciences.

The Bailey-Howe Library is a depository for United States and Canadian government publications, and acquires newspapers, pamphlets, maps, and materials in microfilm. The Special Collections Department includes books and manuscripts from the library of George P. Marsh, and a significant Masefield poetry collection; its Wilbur Collection is rich in books and manuscripts of those associated with the State, including Ira Allen, Henry Stevens, Dorothy Canfield, Vermont Governors, and members of the State Congressional delegation.

The Physics and Chemistry Library is located in the Clinton D. Cook Physical Sciences building.

The University Archives in the Waterman Building contain the permanent official records of the University.

The Academic Computing Center. The Academic Computing Center provides computing facilities for the campus community. The Center (DEC System 2060 and Harris) services the computation needs of the varied research projects on campus; its facilities are also used as an integral part of many graduate and undergraduate courses.
The staff of the Computing Center is available to anyone who requires assistance with the use of the terminals or programming. A large up-to-date program library is maintained by the Center for use by University personnel.

The Robert Hull Fleming Museum. The Museum, which has recently undergone new construction and renovation, houses a notable University collection of Western and non-Western art, and is a center for research and museological studies as well as a place for aesthetic exploration. The Reed Collection of Plains Indian Art and the Schnackenberg Collection of 19th and 20th-century American Art, for example, are outstanding and of particular interest to students of American art and history. Exhibits are frequently rotated to serve class and seminar needs. Two galleries are given to changing exhibitions on special topics. These are frequently augmented by lectures, gallery talks, and films. Besides facilities to support the scholarly use of the collections, the Museum also houses class and seminar rooms for art history courses, and the Art Department slide library of 40,000 slides.

Sponsored and Institutional Research. The University received approximately $13.7 million exclusively for sponsored research funding during fiscal year 1983, and ranks nationally as one of the 100 leading universities in terms of sponsored research support. In addition, there are a substantial number of faculty research projects supported, in part, by institutional research committees. Graduate students frequently serve as integral parts of faculty research projects which span a wide range of disciplines.

The George Aiken Lectures. The annual George Aiken lectures, established in honor of Vermont's dean of the United States Senate, focus on issues of national and international importance. They bring together speakers of prominence, University faculty, and the University community to achieve greater understanding of significant human concerns.

The Vermont Seminars. The Vermont Seminars Program augments the focus of teaching and research at the University and enriches educational offerings by bringing to campus individuals from a variety of walks of life, including faculty, statespersons, distinguished citizens, and leaders in special fields.

The George Bishop Lane Artists Series. The George Bishop Lane Artists Series is one of the largest collegiate artists series in the country. It was inaugurated in 1955 by a gift of over $300,000 from the late Mrs. Lane, in honor of her husband, George Bishop Lane of the Class of 1883.

The Lane Series allows the University to bring annually to the campus and the Burlington area a continuing program of outstanding musical, theatrical, dance, and other artistic productions for a moderate admission fee. The Series is planned and produced by an advisory committee comprised of faculty, students, and townspeople.
Support Services for Graduate Students

GRADUATE STUDENT ADVISORY COMMITTEE

The Graduate Student Advisory Committee (GSAC) comprised of graduate student representatives from each of the colleges and schools provides a forum for discussion of graduate student concerns and assists the Dean and the Executive Committee in matters affecting graduate students. Issues considered by GSAC recently range from the academic through professional development and student life. GSAC sponsors a student research day and occasional social events, and conducts a mini-grants program to support, in part, expenses associated with student travel for professional purposes.

Minority Student Program and Center for Cultural Pluralism. The mission of the Minority Student Program is to meet the commitment expressed by the University in terms of creating a more diversified academic community.

Through the Minority Student Program, special tutorial services, as well as non-academic counseling and advising, are provided to students. A newsletter is generated to members of the academic community informing them of program information, career and job opportunities, and other important events.

The Director of MSP, whose office is located at the Center for Cultural Pluralism on Redstone Campus, is the non-academic official for students participating in this program. Personal, social, academic and other concerns are handled through the program and its staff.

The Center for Cultural Pluralism serves as a focal point on campus where students, faculty, administrators and staff can gather and share their cultural heritage through a variety of social, cultural, and educational programs.

Programs range from educational colloquia and ethnic dinners to a campus/community-wide Ethnic Heritage Faire Day in the fall and Ethnic Heritage Month in the spring.

Center for Career Development. The Center for Career Development provides assistance in establishing placement credential files, interviewing techniques, and resume writing. Center personnel also provide individual assistance in developing job searches. An extensive career library contains information on full-time positions, along with occupational briefs, job market trends, salary surveys, and company literature. In addition, the office lists limited part-time and summer job opportunities.

Counseling and Testing Center. The Counseling and Testing Center is a campus resource available to students, faculty, and staff. The Center offers confidential individual and group counseling, testing services (including the Graduate Record Examination), and workshops on topics including stress reduction, study skills, assertiveness, and life planning.

Exercise and Wellness. The University's extensive physical education plant is available for recreational use by faculty, staff, and students during hours not devoted to specific instruction. Swimming, handball, skating, tennis, squash, and many other individual and group activities are available for interested participants.

Graduate students may not enroll in physical education classes without prior approval by the Dean of the Graduate College. Graduate College tuition scholarships do not cover any fees for physical education activities.

In addition to the physical education facilities, the University has an active Outing Club. There are many opportunities in Vermont for participation on either an organized or informal level in such activities as hiking, camping, sailing, swimming, skiing, running, bicycling, and other athletic activities.
The Degree Programs of the Graduate College

The Graduate College offers the following degree programs:

**MASTER OF ARTS**
Programs are offered in the following fields:
- English
- French
- Geography
- German
- Greek and Latin
- History
- Political Science
- Psychology

**MASTER OF SCIENCE**
Programs are offered in the following fields:
- Agricultural and Resource Economics
- Animal Sciences
- Biochemistry
- Biomedical Engineering
- Biostatistics
- Botany
- Cell Biology
- Chemistry
- Civil Engineering
- Communication Disorders
- Computer Science
- Counseling
- Electrical Engineering
- Engineering Physics
- Forestry
- Geology
- Historic Preservation
- Human Nutrition and Foods
- Materials Science
- Mathematics
- Mechanical Engineering
- Medical Microbiology
- Medical Technology
- Microbiology
- Natural Resource Planning
- Pathology
- Pharmacology
- Physics
- Physiology and Biophysics
- Plant and Soil Science
- Statistics
- Wildlife and Fisheries
- Biology
- Zoology

**MASTER OF BUSINESS ADMINISTRATION**
Study leading to the MBA is designed to provide opportunity for the individual to develop knowledge and understanding in a wide range of business activities that will provide a foundation for growth and success in a business career.

**MASTER OF PUBLIC ADMINISTRATION**
The MPA provides an opportunity for in-career and prospective administrators in the public sector including service and non-profit institutions to acquire needed skills and knowledge in managing complex publicly supported systems.

**MASTER OF EDUCATION**
The Master of Education degree is designed to give those who work in education the background and professional preparation needed for leadership in teaching and related functions. Programs are planned with special attention to the following areas:
- Administration and Planning
- Foundations of Education
- Occupational and Practical Arts
- Organization and Human Resource Development
- Reading and Language (Elementary and Secondary)
- Special Education
- Student Personnel Services in Higher Education
- Teacher Education

**MASTER OF ARTS IN TEACHING**
This degree is appropriate for teachers who are interested primarily in increasing their knowledge of their subject matter fields and thereby the effectiveness of their classroom instruction. Programs are offered in the following fields:
- Botany
- Chemistry
- English
- French
- Geography
- Geology
- Historic Preservation
- Greek and Latin
- History
- Mathematics
- Occupational and Practical Arts
- Physics
- Zoology

**MASTER OF SCIENCE FOR TEACHERS**
This degree is designed primarily for secondary school teachers already certified who wish to
strengthen their backgrounds in their subject matter fields, and who desire flexibility in choosing courses at levels best suited to their needs.

Programs are offered in the following fields:
- Biology (Botany and Zoology)
- Geology
- Mathematics
- Physical Sciences (Chemistry and Physics)

Consult departmental listings for prerequisites and minimum degree requirements.

MASTER OF EXTENSION EDUCATION

This degree is for persons with educational responsibilities outside of regular school settings. Programs are individually designed to provide knowledge and competencies associated with a career field. Emphasis is placed upon preparation for educational leadership functions. Programs are planned in the following specializations:
- Agricultural Agencies and Organizations
- Business and Industry
- Youth Organizations

DOCTOR OF EDUCATION

The degree of Doctor of Education (Ed.D.) is offered in Educational Administration. The program is based upon applied research and course work, and is designed for in-place, upper level educational administrators in schools or related organizations.

DOCTOR OF PHILOSOPHY

The degree of Doctor of Philosophy (Ph.D.) is offered in:
- Anatomy and Neurobiology
- Animal Sciences
- Biochemistry
- Botany
- Cell Biology
- Chemistry
- Electrical Engineering
- Materials Science
- Mechanical Engineering
- Medical Microbiology
- Pharmacology
- Physiology and Biophysics
- Plant and Soil Science
- Psychology
- Zoology

CERTIFICATE PROGRAMS

The following certificate programs are offered for post-baccalaureate study by the College of Education and Social Services. They do not lead to a graduate degree and are not offered by the Graduate College. Interested persons are encouraged to contact directly the Dean's Office of the College of Education and Social Services for further information.

FIFTH-YEAR CERTIFICATE IN EDUCATION

A program culminating in a fifth-year certificate is offered by the College of Education and Social Services for students seeking work beyond the bachelor's degree. It is designed to meet the needs of teachers who are developing new teaching fields, advanced
students who are meeting requirements for state certification, and experienced teachers who desire flexibility in choice of courses at both graduate and undergraduate levels. Information about the certificate program may be obtained by contacting the Dean of the College of Education and Social Services.

Persons enrolled in the fifth-year certificate program transferring to Master of Education programs are subject to Graduate College policies on validation of credit outlined on page 21.

CERTIFICATE OF ADVANCED STUDY
A Certificate of Advanced Study (sixth-year certificate), a 30 to 36 graduate credit hour program beyond the master's degree, is offered by the College of Education and Social Services in the following fields:

a. Administration and Planning, which is designed to prepare administrators and planners for public schools, educational and social agencies, and middle management positions in higher education.

b. Counseling. Individuals who have completed a master's degree in counseling or a related area may apply for admission to the C.A.S. program. The program is designed to further develop skills in counseling, consultation, and program planning and coordination.

c. Integrated Studies, which is an inter-area program designed for students who have completed their master's degree and are interested in exploring a self-designed, integrated program of study drawing upon graduate level experiences currently provided by departments of Organizational, Counseling, and Foundational Studies; Special Education, Social Work, and Social Services; Professional Education and Curriculum Development; Human Development Studies of the College of Education and Social Services and other University departments. The program is under the general administration of the Dean of the College of Education and Social Services with direct supervision by a committee of representative faculty from the participating areas within the college.

d. The Consulting Teacher/Learning Specialist concentration prepares leadership personnel for special education. Applicants must possess the master's degree in special education and have at least two years of leadership experience. The course sequence is individualized according to the applicant's background and needs and leads to a Certificate of Advanced Study. The concentration includes 30 credit hours of course work selected from the following: EDSP 301, 310, 312, 322, 323, 384, and 385.

CERTIFICATE IN RUSSIAN AND EAST EUROPEAN AREA STUDIES
A specialization in the area, leading to a Graduate Certificate, may be obtained in conjunction with a master's degree program in a particular discipline. The program is designed to serve as a foundation for doctoral study with specialization in the area; for teaching in the area at the secondary level; or for employment in internationally-oriented organizations. Requirements are 30 credit hours of study in the area, of which up to 18 could simultaneously be counted toward the master's in a discipline. For details, contact the Center for Area and International Studies.

CONCURRENT DEGREE PROGRAMS: M.D./M.S. AND M.D./Ph.D.
Post-sophomore fellows in medicine who have been accepted into a Graduate College program are permitted to apply credit from appropriate medical courses in which a letter grade of A, B, or C is earned toward an M.S. or a Ph.D. degree. Such students are enrolled in the Graduate College for one or more years to pursue research and enroll in those courses that normally are not included within their medical program of study. While such persons are working toward both an M.D. and M.S. or Ph.D., completion of each degree need not occur at the same time.
Persons applying to a graduate degree program are urged to consider future employment opportunities in their proposed field of study. Specific information regarding employment prospects may be obtained on request from the appropriate department chairperson.

APPLICATION PROCEDURES AND ADMISSION

To be eligible for admission an applicant must hold a baccalaureate degree prior to the date of first enrollment or have completed work equivalent to that required for a baccalaureate. The undergraduate record must indicate a capacity for successful study at the graduate level. Satisfactory scores on the Graduate Record Examination are required for most degree programs (see departmental and program listings), from all persons applying for fellowship support, and from all international applicants. Satisfactory scores on the Graduate Management Admissions Test are required for applicants to the M.B.A. All applicants from unaccredited institutions must present satisfactory scores on the general (aptitude) and subject (advanced) portions of the GRE. International students, see special instructions on page 19.

Admission is limited to individuals who intend to become candidates for advanced degrees, other than Doctor of Medicine, and whose enrollment will include courses to be taken for graduate credit. Students who hold bachelor's degrees but whose entire enrollment will be in courses which do not carry graduate credit must enroll as non-degree students through the Division of Continuing Education.

Only applicants interested in and qualified for graduate programs will be admitted to the Graduate College. Admission to the Graduate College does not mean that a student is also accepted automatically as a candidate for the advanced degree. In many departments, acceptance to candidacy occurs only after the enrolled student has completed successfully some of the requirements of the degree program.

The Graduate College makes provision for students with a baccalaureate to take graduate level courses on a non-degree basis. Such students are generally individuals who do not desire to pursue a degree program but merely wish to expand their knowledge in certain areas. It is not necessary to make formal application for admission to the Graduate College in order to take courses. Non-degree students who have not been admitted into the Graduate College are limited to a total of six course credit hours per semester. A non-degree student who has accumulated nine credit hours of graduate study at the University must seek approval for further enrollment from the Dean of the Graduate College.

Individuals seeking formal admission to the Graduate College must make application on an official form which can be obtained from the Graduate College Admissions Office. All applications must be supported by two official transcripts from each college or university attended and by three letters of recommendation from persons qualified to assess the applicant's capacity for graduate work. Admission requirements regarding the submission of specific standardized test scores (e.g. Graduate Record Examinations and Graduate Management Admissions Test) are listed under the appropriate program requirements section beginning on page 39. Applications and associated correspondence must be sent directly to the Graduate College Admissions Office.

All applications for admission must be accompanied by a $25 application fee which is non-refundable.

When to apply. The deadline for receipt of completed applications and supporting materials for admission for the fall semester is April 1 for most departments, except that a February 1 deadline is required for the Psychology program, and a March 1 deadline for the Historic Preservation Program. The part-time program of study in Psychology is open only to Vermont residents. Most departments process applications soon after all of the supporting information is received in the Graduate College Admissions Office. Applications will not be processed after the openings in a program have been filled. Therefore, for fall admission, it is important to file applications well in advance of April 1 as some programs can accommodate only a limited number of new graduate students.
It is sometimes possible to admit new graduate students at midyear; however, such applications should be initiated at least three months in advance of the date the study is to begin. Please contact the Graduate Admissions Office to determine if a specific program will accept applications for January admission.

Students who wish to be considered for financial assistance in the form of fellowships or assistantships as well as admission must have applications with all supporting materials including GRE scores on file by March 1 of the academic year preceding that for which application is made. Applications for fellowship or assistantship assistance must include GRE General (Aptitude) Test and the appropriate Subject (Advanced) Test scores. No special forms are required to apply for Teaching, Research, or Graduate College Fellowships, and Graduate Assistantships. Applicants interested in such awards must so indicate on the appropriate section of the application form. Student Personnel Fellowships must be applied for on a separate form through the Department of Residential Life, Robinson Hall. Information on loans and/or work-study is available through the Financial Aid Office, Waterman Building.

Standard Graduate Admission Tests. Applicants for admission to most graduate programs must submit scores on the Graduate Record Examination (see specific program requirements). Business Administration applicants must submit scores on the Graduate Management Admissions Test.

Information about standard graduate admission tests may be obtained from the Counseling and Testing Center, University of Vermont, or from any college testing office. Information on the Graduate Record Examination or the Graduate Management Admissions Test may also be obtained directly from the Educational Testing Service, Box 889, Princeton, NJ 08541.

All applicants requesting fellowship or assistantship support must submit scores on the Graduate Record Examination or Graduate Management Admissions Test prior to March 1. Arrangements to take the standard graduate admission test must be made by no later than January so that test results will be available by March 1.

Health Record. The University requires that students maintain a personal health record with the Student Health Center. This is accomplished by completion of the DASH health form at the time of first enrollment. Persons with special medical problems or those wishing to submit an alternate health record must consult the Student Health Center.

Credentials submitted by the student, such as transcripts and letters of recommendation, become the property of the Graduate College and may not be returned or transferred.

INTERNATIONAL STUDENTS

The Graduate College welcomes qualified applicants from other countries. A full-time Advisor for International Students is available to provide counseling and assistance to international students (graduate and undergraduate) and international faculty on personal matters, and issues relating to compliance with the U.S. Immigration and Naturalization regulations. An active campus International Club provides an opportunity for international students and scholars to contribute to campus life and to make American friends outside the classroom.

Application Procedures

1. International applicants interested in applying to the University for a particular graduate program must request a Preliminary Application (pre-application) Form from the Graduate College Admissions Office. Upon receipt of this completed pre-application form, a formal application will be mailed if an appropriate program of graduate studies is available for the applicant's area of intended study. Early application will help compensate for the delays caused by overseas mailings.

2. Applicants from countries where English is not the principal language of instruction must submit scores from the Test of English as a Foreign Language (TOEFL) in addition to those from the Graduate Record Examination (GRE) or Graduate Management Admissions Test (GMAT) for M.B.A. applicants. Scores from both the general (verbal and quantitative) and appropriate subject (advanced) sections of the GRE must be submitted. Information on these examinations may be obtained from the Educational Testing Service, Box 889, Princeton, NJ 08541.

3. All application materials including test scores, transcripts, and letters of recommendation must be submitted as early as possible to the Graduate College, preferably by December 1 of the year prior to enrollment, to insure adequate time to process the application.

In addition to application materials, international applicants must submit evidence of independent financial support (approximately $10,000 U.S. per year) in the form of a signed statement from a bank or scholarship source. This information should be submitted to the Graduate College Office as early as possible; prospective graduate students are urged to send such information at the time of pre-application.

Financial Aid for International Students. Information on fellowships and assistantships begins on page 33. These awards are based upon academic performance. Teaching fellowships require proficiency in the English language. Fellowship, assistantship, and traineeship awards are extremely competitive, especially for first-year students. Generally, international students may be considered for these awards only after satisfactory completion of one year of graduate studies at the University of Vermont.
For information concerning eligibility criteria and application procedures for programs administered by the Institute of International Education, students may contact the U.S. Embassy, Consulate, or Information Service in their country.

Students from Africa, the Middle East, Korea, and other areas may also request information about scholarships from the following:

NEW ENGLAND REGIONAL STUDENT PROGRAM

An opportunity for qualified legal residents of New England states to enroll at reduced tuition rates (currently 125 percent of resident tuition) for programs which are not offered by the home state university but are offered in another New England state is available under an arrangement entitled the New England Regional Student Program. A list of available graduate programs may be examined in the Graduate College Dean’s Office or obtained from the New England Board of Higher Education, 45 Temple Place, Boston, MA 02111 at $2 per copy.

Applicants must indicate clearly, both in their initial inquiries and on their application forms, that they are seeking admission under the terms of the New England Regional Student Program. In cases where the program of study is clearly unique or distinctive to the out-of-state institution, the UVM Graduate College Dean’s Office will certify directly the applicant’s eligibility to apply under the New England Regional Student Program. In cases where an apparently similar program of study is available at both institutions involved, the graduate deans of the two institutions will determine whether regional student status is appropriate.

MAXIMUM TIME LIMITS FOR DEGREE COMPLETION

<table>
<thead>
<tr>
<th>MASTER'S DEGREE</th>
<th>3 Years</th>
</tr>
</thead>
<tbody>
<tr>
<td>Full-Time Student</td>
<td></td>
</tr>
<tr>
<td>Part-Time Student</td>
<td>5 Years</td>
</tr>
<tr>
<td>DOCTORAL DEGREE</td>
<td>9 Years</td>
</tr>
<tr>
<td>All Students</td>
<td></td>
</tr>
</tbody>
</table>

Individual departments may set deadlines within these time limits. It is important that students complete their programs within the time limits specified. Further educational opportunities or employment responsibilities alone will not justify delay in program completion.

NAME AND ADDRESS EXCLUSION

The Family Educational Rights and Privacy Act of 1974 grants to all University students the right not to have personal information contained in the records of the University released to any individual, agency, or organization. UVM feels that the name, address, and telephone number of a student is such personal information and therefore will not release this information to persons requesting it if a student so requests.

Often parents, friends, or fellow students call the University to find out the address or telephone number of a student. Such information has in the past been generally available in the Student Director. However, in the future the University will not release such information if requested. Students who do not wish to have name, address, and telephone number released should fill out a directory exclusion card at the Registrar’s Office.

ENROLLMENT AND COLLEGE REQUIREMENTS

Enrollment. Every student is required to enroll and register at the time and in the manner designated by the Registrar (see Academic Calendar). All charges for the ensuing semester must be paid or otherwise provided for before registration is completed.

Enrollment Guidelines. The range of normal full-time graduate enrollment for non-funded students is nine to 12 hours; maximum enrollment is 15 hours per semester. The normal range of full-time enrollment for students on fellowships or assistantships is six to 10 hours. Following completion of all credit requirements, enrollment for Continuous Registration is equivalent to full-time enrollment when the student is studying full-time at the University completing degree requirements.

Change in Enrollment. Any change in enrollment must be approved in writing in advance by the student’s advisor and authorized by the Dean of the Graduate College. Specific regulations regarding the adding, dropping, or withdrawing from courses are available from the Registrar. The exact dates may be found in the schedule of courses, available at the Graduate College Dean’s Office or from the Registrar. Course change forms may be obtained from the Department, Registrar, or Graduate College Dean’s Office.

Continuous Registration. A student who has completed satisfactorily all course work and research credit required in the degree program, but has not completed all degree requirements (for example, comprehensive exam, defense of thesis or dissertation) must enroll for Continuous Registration (see page 29, Fees). Enrollment for Continuous Registration may be accomplished by mail or in person through the Graduate College Dean’s Office.
Auditing Courses. Courses may be taken for audit; however, the credit hours are charged as usual. Under no circumstances will credit or grade be allowed for courses audited. Tuition scholarships which are funded by the Graduate College and accompany fellowship awards do not cover courses enrolled for audit.

Summer and Evening Study. Information regarding graduate course offerings and enrollment may be obtained from the Division of Continuing Education. Enrollment in such courses for graduate credit does not indicate admission to the Graduate College.

Dismissal. A graduate student whose academic progress is deemed unsatisfactory at any time may be requested by the Dean or the department concerned to withdraw from the Graduate College.

Undergraduate Enrollment for Graduate Credit. UVM senior undergraduates may enroll for graduate credit at UVM under the following circumstances: the course must be available for graduate credit; total enrollment including the graduate course must not exceed 12 credit hours in the semester in which the course is taken; the course must not be computed as part of the bachelor's degree; permission to seek such graduate credit must be requested of the Dean of the Graduate College in writing by the Dean or Director of the undergraduate college or school prior to enrollment for such credit. Such graduate credit is limited to six hours, and is not available for transfer to another institution as graduate credit. It can be used only at UVM if and when the student is admitted to a UVM graduate program and only if the course is judged appropriate by the student's advisor for the participating graduate program.

College Requirements. Each student is expected to be familiar with the requirements and procedures of the Graduate College and with the specific degree requirements in the chosen field of study. The following requirements define the parameters within which the Graduate College functions. Specific guidelines for each department must be consulted in addition to these general requirements. Upon first enrollment in the Graduate College, each student will receive the Graduate College Handbook which details further requirements define the parameters within which

Acceptance and Candidacy for Advanced Degrees. Applicants for the master's degree may be admitted to graduate studies or accepted to candidacy for the degree concurrent with admission. Acceptance to candidacy for the master's degree is granted only to those students who have met fully all undergraduate course prerequisites required for the graduate degree program and all departmental requirements for candidacy (e.g. course work, examinations, professional certification where applicable).

The approval of the department and the Dean is required for concurrent admission and acceptance to candidacy.

Candidacy for the doctoral degree requires a full year of graduate study in residence at the University of Vermont. A doctoral student is accepted to candidacy upon the approval of the student's Studies Committee, the department or departments concerned, and the Dean of the Graduate College.

PREVIOUS CREDIT
Graduate level course credit acquired at UVM and elsewhere prior to formal admission to the Graduate College may, within limits, be applied toward advanced degree requirements. The total limits apply to credit earned by transfer, validation, or examination, or any combination thereof. The maximum number permitted is nine for a master's degree or 24 for the Ph.D. No course credit acquired prior to formal admission to the Ed.D. program may be applied toward the degree requirements.

Transfer of Credit. Upon request from the department and approval by the Dean of the Graduate College, transfer of credit for appropriate courses completed at other institutions after completion of a baccalaureate degree may be accepted toward completion of degree requirements. In cases where such transfer is approved, it is the credit only and not the grade which is accepted for transfer. A maximum of nine hours credit in the case of master's candidates and 24 hours in the case of Ph.D. candidates may be accepted in transfer. Such courses must have been taken in a fully accredited college or university which offers graduate study and must be acceptable at that institution in partial fulfillment of its requirements for an advanced degree. Credit cannot be transferred for (1) courses taken prior to the completion of a baccalaureate degree, (2) courses which would not, if taken at the University of Vermont, receive graduate credit, (3) courses in which a grade lower than B (3.00) was received, (4) correspondence courses, (5) courses which are inappropriate for inclusion in any degree program offered by the Graduate College, (6) courses which were taken more than seven years prior to the date of completion of degree requirements for a master's program or nine years for a Ph.D. program, (7) thesis or dissertation credits received at another university.

Validation of Credit. To insure effective planning of a graduate program, not more than nine hours of graduate credit acquired at the University of Vermont as a non-degree student prior to admission to the Graduate College may be validated on a student's record as applicable toward the credit requirements of an advanced degree. Validation of credit is subject to the same restrictions as stated for transfer of credit. If an applicant is enrolled as a non-degree student in appropriate graduate courses during the semester in which the application is approved for admission, these credits, up to a maximum of six hours, will also be applied to the degree program.
and will not reduce the number of validation credits available.

Credit by Examination. A student may, under cer­
tain circumstances, receive credit for a course by taking an examination. A fee of $35 per credit is charged for each examination for credit.

CONCURRENT MASTER’S AND DOCTOR OF PHILOSOPHY CREDIT

Up to 24 hours of course work for which graduate credit is earned at UVM in a master’s degree pro­
gram, whether a master’s degree is received or not, may be applied toward a Ph.D. at UVM provided they are appropriate for the Ph.D. program.

No provision is made for a person to employ the same credit to satisfy two master’s degrees at the University of Vermont.

Minimum Residence Requirements. The residency requirement is completed by courses that (1) are taken for graduate credit through the University of Vermont either in the academic year or in summers on the main campus or at off-campus locations, and (2) are taken after the student has been admitted to the Graduate College. Each candidate for the master’s degree must satisfactorily complete 21 hours in residence. Each candidate for the Ph.D. degree must satisfactorily complete a minimum of 51 hours in residence. Residency requirements for candidates for the Ed.D. are detailed on page 26.

Some programs may require more than the above minimum hours in residence, and consultation with the department chairperson is advised.

Teaching Requirements. All degree candidates must acquire appropriate teaching experience in their chosen fields prior to the awarding of the degree. The nature and the amount of this teaching, for which no academic credit is allowed by the Graduate College, will be determined by the departments concerned.

Language Requirements. The language require­ments may be completed by (1) satisfactory perform­ance on the Educational Testing Service’s Foreign Language Examination which is offered three times a year on campus (All candidates will submit their registration forms and fees directly to the Graduate Schools Foreign Language Tests, Educational Testing Service, Princeton, NJ 08541. Further information may be obtained from the Counseling and Testing Center, University of Vermont.), or (2) an examination may be requested by the student’s department and administered by it or in conjunction with the appropriate language department.

If the department substitutes competence in computer literacy, it may normally be achieved by satisfactory completion of Computer Science 11 and 241 or by satisfactory completion of an examination (on a pass-fail basis) set and graded by the staff of the Academic Computing Center. Individual departments may set additional requirements.

Grade Requirements. Letter grades are used to indi­cate levels of performance in courses as follows: A, excellent; B, good; C, fair; F, failure. Designations of S, satisfactory; and U, unsatisfactory, are used to indicate levels of performance for credits received in Thesis or Dissertation Research and may be used to indicate levels of performance in Seminar. There are no quality points associated with the letter grades of S and U.

A candidate for a graduate degree must complete the program with a minimum overall grade-point average of 3.00. For the purpose of determining a grade-point average, the following applies: A+, 4.00; A, 4.00; A−, 3.67; B+, 3.33; B, 3.00; B−, 2.67; C+, 2.33; C, 2.00; C−, 1.67; F, 0.00. A course may be repeated for credit only when failed and only once; only the second grade is then con­sidered. Both grades remain on the student’s trans­cript.

A student may be dismissed from the Graduate College if two grades or more fall below a B, or the designation of U in Thesis or Dissertation Research or Seminar are received.

The designation "Inc" or "I" applies to work of ac­ceptable quality when the full amount is not com­pleted because of illness or emergency. It can be awarded only with the prior permission of the Graduate College Dean. The Dean may set the limit of time when the work of the course is to be com­pleted. In no case shall this time be set longer than the beginning of the corresponding semester of the next academic year.

Extended Course. The grade of XE is awarded at the end of the semester to a student who is enrolled in an identified course the nature of which makes it unreasonable or impossible for the student to com­plete the required work within the regular semester.

Students withdrawing from courses after the date prescribed by the Registrar will receive a grade of WP — withdrawn passing, or WF — withdrawn fail­ing, dependent upon the quality of work completed. The grade WP does not enter into the grade-point average (GPA). The grade of WF enters the GPA as an F.

Graduate students may elect to take an undergradu­ate course on a satisfactory (S)-unsatisfactory (U) basis provided permission is obtained, prior to en­rollment, from the department chairperson and the Dean of the Graduate College and a letter grade is not required by the Studies Committee for evaluation. Courses at the 200 level or above other than Seminar or Thesis/Dissertation Research may not be taken on a satisfactory (S)-unsatisfactory (U) basis for graduate credit.

Professional Ethics and Academic Honesty. Grad­uate students are required and expected to adhere to a high standard of professional responsibility. The University policy on academic honesty, applicable to graduate students, is reprinted in full in the Grad­uate College Handbook which is given to each new graduate student. Graduate students are responsible
for familiarizing themselves with this policy, and additional copies of the Graduate College Handbook are available in the Graduate Dean's Office.

Studies Committees for Master's and Doctoral Programs. Each student enrolled in either a master's or a doctoral degree program is eligible and required to have a Studies Committee or its equivalent as soon as possible after enrollment. The equivalent to the Studies Committee is permitted in those departments which employ an alternative procedure that has been approved by the Graduate College.

Master's Degree Candidates:
See this page for specific information.

Doctoral Degree Candidates:
See page 27 for specific information.

Master’s Thesis or Doctoral Defense Examination Committee. Master's degree candidates in programs requiring a thesis and those in other degree programs who elect to complete a thesis, as well as all doctoral degree candidates must prepare and submit the thesis/dissertation in compliance with the detailed “Guidelines for Writing a Thesis or Dissertation” available from the Graduate College Office. The Defense Examination Committee is responsible for evaluating the thesis or dissertation and also the candidate's performance in defending the work.

Master’s Degree Candidates:
See page 24 for specific information.

Doctoral Degree Candidates:
See page 27 for specific information.

Program Outline. Every graduate student must complete a program outline upon completion of nine credit hours of graduate work for those students pursuing a master's degree and 18 credit hours of graduate work for those students pursuing a doctoral program, regardless of whether such credits have been earned at UVM or elsewhere, as long as such credits are intended to be applied, if acceptable, to the degree requirements for a particular student. The program outline, completed on a form available from the Graduate Dean's Office, is an aid to planning and may be amended during the course of the student's studies as appropriate.

Leave of Absence. An approved leave of absence (up to a maximum of 12 months) suspends the time limit for degree completion for the duration of the leave. Students must obtain the approval of their department or program chairpersons and the Dean of the Graduate College on a form available in the Graduate Dean's Office prior to the leave of absence in order to be considered on approved leave. A leave is not permitted for those who have completed all course and research credit requirements.

Withdrawal from Degree Program. Students must notify the Graduate College in writing of their intent to withdraw from a degree program. However, if a student does not register at the University of Vermont for course work, thesis or dissertation research, or continuous registration for a period of more than one calendar year, and does not notify the department or the Graduate College in writing, the student will be considered to have withdrawn from the degree program. It will be necessary to apply for reactivation and pay a reactivation fee (page 29) if the student wishes to resume the graduate program.

Conferral of Graduate Degrees. Degrees are conferred three times annually, in October, March, and May. Diplomas are awarded only at commencement at the end of each academic year (May). If a student has completed all degree requirements prior to that time, a letter will be issued certifying that the graduate degree program has been completed and that the degree will be conferred at the next commencement.

REQUIREMENTS FOR MASTER'S DEGREES

All master's degree programs require a minimum of 30 semester hours of graduate credit. Departments and individual programs may require additional hours. In programs that require a thesis, the number of credit hours to be earned in thesis research may vary between six (minimum) and 15 (maximum); these credits are included in the minimum of 30 required for the degree.

MASTER OF ARTS AND MASTER OF SCIENCE

Field of Specialization. At least 21 hours of graduate credit, including credit for the thesis and research leading to the thesis, must be earned in the field of specialization. All course credits included in these 21 hours must have been earned in courses which have been approved for graduate credit.

Related Study. A graduate program may include advanced courses outside the field of specialization. In order to be included as part of the master's program, these courses must be approved in advance by the Studies Committee of the department in which the student is specializing.

Studies Committee. It is the responsibility of the Studies Committee to supervise the graduate student's program and to review progress at regular intervals. A Studies Committee is appointed by the department chairperson or designated departmental representative and approved by the Dean of the Graduate College as soon as possible following enrollment as a duly admitted student of the Graduate College, unless the student's department employs an alternative approved procedure. The Chairperson of the Studies Committee serves as the student's academic advisor and also as the thesis advisor or supervisor. In order to direct a master's thesis a faculty member must either be a regular member of the Graduate Faculty or obtain the approval of the chairperson and the Graduate Faculty of the depart-
ment or program to direct the specific master's thesis. In the latter case, the chairperson will notify the Graduate College Office of the particular departmental action prior to the student's beginning work on the thesis research.

A Studies Committee for a student pursuing a master's degree consists of at least three faculty members with one of the members from outside the candidate's department or program. At least two of the Committee members must be regular members of the Graduate Faculty. For master's degree programs with a thesis, the three members of the Studies Committee will usually constitute the Thesis Defense Examination Committee providing the outside member is a regular member of the Graduate Faculty. The outside member will then serve as the Chairperson of the Thesis Defense Examination. If the outside member is not a regular member of the Graduate Faculty, then such an additional person will be appointed by the Dean of the Graduate College to serve as the Chairperson of the Thesis Defense Examination Committee based upon the nomination(s) submitted by the student's advisor (see this page).

Language Requirement. Certain departments require a reading knowledge of an appropriate foreign language. The methods of satisfying the language requirement are described on page 22.

Comprehensive Examination. A written and/or oral comprehensive examination is required in the field of specialization. If both formats are used, satisfactory completion of the written examination is prerequisite to standing for the oral examination. All comprehensive examinations are taken on the University of Vermont campus in Burlington. One re-examination only is permitted for any final comprehensive examination.

Research and Thesis. If a thesis is required, the candidate will undertake a problem of original research under the supervision of a member of the Graduate Faculty in the department of specialization. At the conclusion of the investigation the student must present a thesis which embodies the results of the work and demonstrates capability for independent research.

A thesis must be prepared and submitted in compliance with the detailed "Guidelines for Writing a Thesis or Dissertation" available from the Graduate College Office. The oral Defense Examination of the thesis can be scheduled only after successful completion of the comprehensive examination and submission of an original copy of the thesis to the Graduate College Office for preliminary review of the thesis by the Dean of the Graduate College. The original copy of the thesis must be submitted to the Graduate Dean at least two weeks prior to the scheduled oral defense. Individual departments may require earlier deadlines. The student must provide copies of the thesis or dissertation to the members of the Defense Examination Committee at least two weeks before the scheduled examination.

Thesis Defense Examination Committee. Upon receipt of a completed thesis, the candidate's advisor will nominate to the Dean of the Graduate College a Thesis Defense Examination Committee for the oral Defense Examination of the thesis by the candidate. The Thesis Defense Examination Committee is usually identical in composition to the Studies Committee and consists of at least three faculty members, at least two of whom must be regular members of the Graduate Faculty. Ordinarily, two committee members will be from the candidate's department or program and the third member will be from another department or program at the University of Vermont or another person approved by the Graduate Dean based upon the nomination of the thesis advisor. If the representative from outside the candidate's department or program is not a regular member of the Graduate Faculty, a regular member of the Graduate Faculty will be added and designated as the Chairperson of the Thesis Defense Examination Committee by the Dean of the Graduate College based upon the nomination of the student's advisor. The acceptability of the thesis is determined by the Thesis Defense Examination Committee.

The Chairperson of the Defense Examination Committee has the responsibility for ensuring proper conduct of the examination, appropriate documentation of the results, and that the signatures of endorsement are added to the signature page of the thesis or dissertation following a successful defense. If the candidate's Defense Examination performance is not satisfactory, then only one examination is permitted.

Three copies of the corrected thesis must be forwarded to the Dean of the Graduate College after the successful defense of thesis, within the time period specified by the Thesis Defense Examination Committee.

MASTER OF BUSINESS ADMINISTRATION

Management is the art of applying principles of the mathematical and social sciences to decision making in an organizational environment characterized by uncertainty and limited resources. The program is designed (1) to develop the individual's ability to practice the art and (2) to build a foundation that will facilitate and encourage the continuation of this development beyond a formal university setting. Courses in the program emphasize the understanding and critical evaluation of conceptual and theoretical principles relevant to the decision process in the functional areas of business.

Upon completion of the program, students will have been exposed to each functional area, will have been required to demonstrate an ability to engage in individual and group research projects, and will have demonstrated capacity to present coherently and defend their views orally and in writing.

Examinations

A written comprehensive examination is admin-
istered as part of the Business Policy course and covers all functional areas of business.

MASTER OF PUBLIC ADMINISTRATION

The MPA degree program is designed to:

1. Provide promising public sector managers with a quality educational experience covering the theories and practices of program planning and control, and the problems of policymaking in an environment characterized by resource constraints and rapid social change;

2. Stimulate and focus scholarly research in the problems and issues of public organizations in Vermont; and

3. Facilitate mutually beneficial interaction within the community of scholars and practitioners of public administration.

A bachelor's degree with an adequate grade-point average is required for admission. Past experience as a practitioner is desired though not necessary, and persons currently employed in administrative positions are encouraged to apply. Where possible, an interview is recommended as part of the application process. Scores from the General Section of the Graduate Record Exam (GRE) are required and considered as one factor in the screening of potential candidates. Motivation for pursuing the MPA is also considered as a significant factor.

Comprehensive Examination

A written comprehensive examination is administered. The examination covers material from each of the four required core courses.

MASTER OF EDUCATION

For admission to a Master of Education program, the applicant must present satisfactory scores for the Graduate Record Examination (General portion) at the time of application for admission. Before the degree is awarded, the candidate must have completed one year of successful teaching experience or other educational service. This requirement may be fulfilled by satisfactory completion of student teaching, an internship, or a practicum.

The graduate program of each student admitted to candidacy for the degree of Master of Education is planned and supervised by an advisor in the respective program area. Program planning is based upon the student's undergraduate curriculum, professional experience, and aims and purposes in pursuing the master's degree.

Each program must include a minimum of six semester hours of graduate work in the foundations of education unless this requirement or its equivalent has been met previously. Graduate courses which currently fulfill this requirement include: EDFS 204, 205, 206, 209, 252, 302, 303, 354, and EDSS 313 and EDLS 377.

To insure effective planning of a graduate program for the degree of Master of Education, no more than nine hours credit will be accepted in partial fulfillment of degree requirements for courses taken prior to acceptance to the Graduate College. See Previous Credit, page 21.

Comprehensive Examination

A comprehensive examination is required; it may be written, oral, or both. The choice of the examination format will be made by faculty members in the area of specialization after consultation with the advisor and the candidate.

a. The written comprehensive examination will cover the field of education with emphasis on the area of specialization.

b. The oral comprehensive examination will emphasize the area of specialization.

All examinations are taken on the University campus in Burlington. Only one re-examination is permitted for any final comprehensive examination. It is the responsibility of the candidate to schedule the required examination with the College of Education and Social Services. Since each program has different options for meeting the oral and written comprehensive requirements, candidates must contact the respective program chairperson or advisor regarding program policy.

If the thesis option is elected, there must be an oral examination in defense of the thesis. (See Thesis Defense Examination Committee, page 24, listed under Master of Arts and Master of Science, for defense examination requirements.)

MASTER OF ARTS IN TEACHING

The program leading to the degree of Master of Arts in Teaching is designed primarily for teachers, with the purpose of enhancing their teaching ability and strengthening their backgrounds in their subject matter fields. Each MAT program requires close cooperation between the specialist department and the College of Education and Social Services. Students with questions regarding the education component of their program must consult with the College of Education and Social Services Dean's Office.

A minimum of 30 semester hours is required in courses numbered above 200, of which not fewer than six semester hours shall be in education courses taken at the University of Vermont. This is a nonthesis program. A student must complete at least 21 hours, in either a single department offering courses for graduate credit or in any acceptable combination of such departments. To be accepted to candidacy for this degree, a student must have completed an undergraduate major within the area of specializa-
tion, and be acceptable to the departments concerned. GRE Subject test scores are required by some departments and programs as indicated; scores on the General test are required of all applicants.

Candidates are expected to have completed the necessary courses in education to meet minimum requirements for a teaching certificate during their undergraduate programs. If candidates have not qualified for teaching certification, they cannot expect to complete the degree in one academic year.

To qualify for the degree of Master of Arts in Teaching, candidates must present at least 18 semester hours in education in their combined undergraduate and graduate programs. This requirement is specified to ensure that degree recipients can meet minimum certification requirements. Students without prior teaching experience will be required to complete satisfactorily an internship or an equivalent field experience which may be graded and which will be in addition to the minimum MAT education course requirements. This internship or field experience will be an essential prerequisite to consideration for certification.

**Comprehensive Examination**

- A written comprehensive examination in the field of education.
- A written or oral comprehensive examination in the field of specialization. The choice between written or oral examination is determined by the department after consultation with the candidate.

All examinations are taken on the University campus in Burlington. One re-examination only is permitted for any final comprehensive examination. It is the responsibility of the candidate to notify the respective department and the College of Education and Social Services to schedule the required examinations.

**MASTER OF SCIENCE FOR TEACHERS**

Refer to specific department listings for requirements for this degree program.

**MASTER OF EXTENSION EDUCATION**

A minimum of 30 semester hours in courses numbered above 200 is required. At least 12 semester hours will be completed in the College of Agriculture, including at least six semester hours in education courses offered by the College of Agriculture. A minimum of 18 additional semester hours will be selected to meet individualized program objectives. Normally, no thesis is required.

The candidate may complete the degree requirements through Summer Session, Evening Division, and/or full-time residency. A candidate will be expected to spend at least one semester or a minimum of two summers in residence at the University of Vermont campus in Burlington.

Satisfactory scores on the GRE General test are required for admission. Before the degree is awarded, the candidate must have completed the equivalent of one year of professional experience. This requirement may be completed by an internship or practicum experience approved by the candidate's studies committee.

**Comprehensive Examination**

- A written comprehensive examination in the field of specialization.
- A comprehensive oral examination in the field of specialization.

Satisfactory completion of the written examination is prerequisite to standing for the oral examination. All comprehensive examinations are taken on the University of Vermont campus in Burlington. One re-examination is permitted for any final comprehensive examination.

**REQUIREMENTS FOR DEGREE OF DOCTOR OF EDUCATION (Ed.D.)**

The Ed.D. is offered in Educational Administration only. It is an applied research-based program, primarily for professionals serving in educational management positions.

**Prerequisites for Admission to Graduate Studies.** Applicants must possess a master's degree from an accredited institution and a cumulative grade-point average of 3.00 for previous graduate study. Other requirements include satisfactory scores on the General test of the Graduate Record Examination (GRE) and a representative writing sample.

Students admitted to graduate studies must complete successfully the four core courses in Tier I. Upon such completion and submission of a qualifying paper, students will be considered for candidacy for the degree (Tier II).

**Prerequisites for Acceptance to Candidacy for the Degree of Doctor of Education.** Satisfactory completion of all requirements for Tier I and the qualifying paper will satisfy the prerequisites for acceptance to candidacy.

Requirements for the Degree of Doctor of Education include a minimum of 56 semester credit hours of doctoral studies completed at UVM following formal admission to the program with the following distribution:

- Tier I — 12 semester hours in the four core courses (year 1)
- Tier II — 24 semester hours (minimum)
- Dissertation Research — 20 semester hours (minimum)

All course credit hours beyond Tier I are distributed in administration and planning, humanities, research and statistics courses, and clinical studies. Cognate courses in other UVM departments may be included in individual programs.

**Residency Requirement.** The residency require-
ment for the Doctor of Education (Ed.D.) degree consists of the following:
1. Completion of the four core courses (12 semester hours) during the first academic year following acceptance to the program, and
2. Completion of 12 semester hours of course work (excluding dissertation research) during one academic year within Tier II.

For further requirements concerning Studies Committees, Research and Dissertation, and the Dissertation Defense Examination Committee refer to the following section, Requirements for the Degree of Doctor of Philosophy (Ph.D.).

The application deadline is April 1.

REQUIREMENTS FOR DEGREE OF DOCTOR OF PHILOSOPHY (Ph.D.)

The degree of Doctor of Philosophy requires a minimum of 75 credit hours to be earned in courses and in dissertation research.

Studies Committee. It is the responsibility of the Studies Committee to supervise the graduate student's program and to review progress at regular intervals. A Studies Committee is appointed by the department chairperson or designated departmental representative and approved by the Dean of the Graduate College as soon as possible following enrollment as a duly admitted student of the Graduate College, unless the student's department employs an alternative approved procedure. The Chairperson of the Studies Committee serves as the student's academic advisor and also as the dissertation advisor or supervisor. In all usual cases, only a regular member of the Graduate Faculty can serve as an advisor of a doctoral dissertation. On occasion, it may be appropriate for a professional other than a regular member of the Graduate Faculty to serve as a member of a Studies Committee or a Defense Examination Committee. In such cases, written approval of such a member must be obtained from the Dean of the Graduate College prior to the student's beginning dissertation research.

A Studies Committee for a student pursuing a doctoral degree will consist of at least six faculty members with two of the members from outside the candidate's department or program. Ordinarily, all committee members will hold regular membership on the Graduate Faculty. The Studies Committee will usually constitute the Dissertation Defense Examination Committee. One of the members from outside the department or program will serve as Chairperson of the Dissertation Defense Examination Committee as appointed by the Graduate Dean based upon the nomination of the student's advisor.

Courses. A minimum of 15 hours in courses used in compilation of the grade-point average must be taken in residence at the University of Vermont. The first year of each doctoral program consists almost entirely of required courses; in the following years, appropriate courses are selected by the candidate in consultation with the Studies Committee. Details of each doctoral degree program can be obtained from the appropriate department chairperson or from the Dean.

Language Requirements. The determination of language requirements is established by each individual department. Please refer to specific departmental regulations. If knowledge of a foreign language is required, the method of satisfying this requirement, including evaluation of proficiency, will be determined by each individual department.

The language requirement must be fulfilled before the written comprehensive examination is taken and before admission to candidacy.

Comprehensive Examination. A comprehensive written examination in the field of study must be passed by the candidate at least six months before the dissertation is submitted. This examination will be prepared by the department concerned, in consultation with the candidate's Studies Committee. One re-examination only will be permitted.

Success in the written comprehensive examination is prerequisite to standing for the oral Dissertation Defense Examination. All examinations are taken on the University campus in Burlington.

Research and Dissertation. While in residence at the University of Vermont, each candidate must complete an acceptable original research project which contributes new knowledge or techniques in an academic field. Each candidate must enroll in a minimum of 20 credits of dissertation research. In all usual cases, only a member of the Graduate Faculty may supervise dissertation research for the Ph.D. or the Ed.D.

A dissertation must be prepared and submitted in compliance with the detailed "Guidelines for Writing a Thesis or Dissertation" available from the Graduate College Office. The oral Defense Examination of the dissertation can be scheduled only after successful completion of the comprehensive examination and submission of an original copy of the dissertation to the Graduate College Office for preliminary review of the dissertation by the Dean of the Graduate College. The original copy of the dissertation must be submitted to the Graduate Dean at least two weeks prior to the scheduled oral defense. Individual departments may require earlier deadlines. The student must provide copies of the dissertation to the members of the Defense Examination Committee at least two weeks before the scheduled examination.

Dissertation Defense Examination Committee. Upon receipt of a completed dissertation, the Dean of the Graduate College will appoint a Dissertation Defense Examination Committee based upon nominations submitted by the candidate's advisor. The Dissertation Defense Examination Committee usually consists of at least six individuals who are regular members of the Graduate Faculty, although in exceptional cases a non-member may be approved by the Dean of the Graduate College. At least one of the two Dissertation Defense Examination Committee members from outside the candidate's department or
program must be a regular member of the Graduate Faculty and is designated Chairperson of the Dissertation Defense Examination Committee by the Graduate Dean. The acceptability of the dissertation is determined by the Dissertation Defense Examination Committee.

The Chairperson of the Defense Examination Committee has the responsibility for ensuring proper conduct of the examination, appropriate documentation of the results, and that the signatures of endorsement are added to the signature page of the thesis or dissertation following a successful defense. If the candidate's Defense Examination performance is not satisfactory, then only one examination is permitted.

Four copies of the corrected dissertation must be forwarded to the Dean of the Graduate College after the successful defense of dissertation, within the time period specified by the Dissertation Defense Examination Committee.
Educational and Living Expenses

The tuition and fee charges listed here are for 1984-85 only are are subject to change in future years.

Tuition. Rates for the 1984-85 academic year will be as follows: For Vermont residents, $107 per credit hour, $1,275 flat rate for 12 hours, and $107 per credit hour in excess of 12 hours.

For non-residents of Vermont, $282 per credit hour, $3,380 flat rate for 12 hours, and $282 per credit hour in excess of 12 hours.

The lower rates for Vermont residents are made possible by a subvention to the University from the State of Vermont.

GRADUATE STUDENT FEES

Application Fee. All applications for admission must be accompanied by a $25 application fee. This fee is non-refundable.

Continuous Registration Fee. A fee of $100 per semester is charged each graduate student who has paid tuition for all credits required in the degree program but who has not completed all degree requirements in order to maintain continuous enrollment.

Library and Athletic Bond Fees. A library fee of $17 and an athletic fee of $24 are required of each student enrolled for 12 credit hours or more in any given semester. These fees are assessed by legislative act and fund the debt retirement on the bond issues which funded construction of these facilities.

Part-Time Comprehensive Fee. Students enrolled in fewer than 12 credit hours pay a Comprehensive Fee in lieu of the library and athletic fees according to the following schedule: 0-3 (including CRF), no fee; 4, $20; 5, $24; 6, $28; 7, $32; 8, $36; 9-11, $40.

Student Health Fee. A fee of $57 per semester is charged all degree students enrolled at the University for 12 credit hours or more. Students enrolled for fewer than 12 credit hours will be eligible for University Health Services by paying this fee. Student Accident and Sickness Insurance — Through an arrangement with a commercial insurance company, students are able to procure health insurance which is designed to provide coverage for services beyond those provided by the University Health Service. There is an additional charge for this extended coverage beyond the student health fee. The estimated 1984-85 cost for one year's coverage for single students is $108. Married students may obtain coverage for their spouse and children. Further details are available from the Student Health Center. To participate in this insurance, the student health fee must be paid each semester as well as the additional insurance premium.

Reactivation Fee. Reactivation following withdrawal without an approved leave of absence requires payment of a $25 reactivation fee.

Advanced Degree Fee. The fee charged to each advanced degree recipient is as follows:

- Doctoral Degree $25
- Master's Degree (with thesis) 20
- Master's Degree (without thesis) 10

This fee may be paid at any time but must be paid prior to the deadline established for submission of doctoral dissertations or master's theses for each of the three graduation periods.

It is the responsibility of the degree candidate to pay the appropriate advanced degree fee at the Graduate College Office, 335 Waterman, in order to have a degree awarded.

Penalty Payments. Students who are allowed a payment postponement of all or a portion of their financial obligation will be charged a $50 late payment service charge. There is also a late enrollment fee of $10.

Student Housing and Living Expenses. A limited number of University-owned apartments are available for married full-time students. Located just outside Winooski on Route 15 at Fort Ethan Allen, these apartments are on a bus route five miles from the main campus. Detailed rental information may be obtained from the Ethan Allen Housing Office, 600 Dalton Drive, Winooski, VT 05404. Telephone (802) 656-3228.

A limited number of University-owned apartments for single graduate students are available at Fort Ethan Allen. These spacious apartments will each accommodate approximately eight students. Rent for the period from September 1, 1984 through May 22, 1985, will be $1,800 per person for a double room and $2,090 for a single. This includes all utilities except telephone. A nine-month lease and $50 deposit are required. Summer occupancy is available at the option of the student and at additional cost. Free and frequent transportation to and from campus is provided. Detailed rental information may be obtained from the Ethan Allen Housing Office listed above.

Up-to-date listings for available apartments,
houses, and rooms for rent in the area are maintained by the Department of Residential Life. This service allows community landlords and rental agents to make known housing opportunities to persons associated with the University. Students may also examine listings at the Billings Center or on a bulletin board just off the College Street entrance of Waterman Building on the main campus. The University is not responsible for the approval of off-campus housing facilities. A catalog of available listings is issued each May, August, and December and may be viewed at the Office of Residential Life, Robinson Hall, Redstone Campus, University of Vermont, Burlington, VT 05405. Telephone (802) 656-3434. Rents in the Burlington area vary from approximately $40 per week for a single furnished room to $400-$500 or more per month for a two-bedroom apartment. A single student should expect minimum overall living expenses of approximately $500 per month. If desired, meals may be obtained in University dining halls.

A limited number of on-campus dormitory rooms are available for single graduate students. Interested students may contact the Office of Residential Life.

Bill Adjustment. A refund of 100 percent will be processed for reductions effected prior to the start of the semester; an 80 percent refund will be in effect for reductions in enrollment taking place from the first day of classes through the end of the add/drop period (third week of classes); a refund of 40 percent will be allowed for reductions during the fourth and fifth week of classes; no refund will be processed thereafter. At the end of the semester, an audit will be made of each student's record. If the audit reveals that total credit hour enrollment is greater than at the end of the specified drop period, the student will be financially liable for the total enrollment. Students will be charged for all hours as specified in policy statements regarding tuition.

Withdrawals. A student may voluntarily withdraw from the University by notifying the Graduate Dean and the Registrar. The student will receive a refund in accordance with the bill adjustment policy. Date and time of withdrawal normally will be the date the withdrawal notice is received by the Registrar.

Dismissal. If a student is suspended or dismissed, a refund will be processed according to the bill adjustment schedule.

Death. In case of death of the student, tuition which has been paid for the semester during which the death occurs will be fully refunded.

DEFINITION OF "VERMONT RESIDENT" Adopted by the Board of Trustees, December 14, 1979; amended June 13, 1981; and effective July 1, 1981.
The Vermont Legislature has established a lower rate
of tuition for students who are Vermont residents. Such a policy appears to have as its objective the attempt to more evenly distribute the cost of operating and supporting the University of Vermont between Vermont residents whose taxes have previously supported the University and non-residents who have not done so.

The Legislature has stated that enrollment at an institution for higher learning or presence within the State for purpose of attending an institution of higher learning shall not constitute residence for tuition purposes.

The following requirements must be met by a student prior to being granted resident status for the purpose of admission, tuition, and other University charges:

1. The applicant shall be domiciled in Vermont, said domicile to be continuous for one year prior to the commencement of the semester next following the date of application. Changes in residency status shall become effective for the semester following the date of application. There shall be one date designated each year for the commencement of each semester and the summer term. A semester shall commence on the day classes begin for that semester. The summer term shall commence on the day classes begin for the summer term.

2. Domicile shall mean a person’s true, fixed and permanent home, to which he/she intends to return when absent. A residence established for the purpose of attending an educational institution or qualifying for resident status for tuition purposes shall not of itself constitute domicile. Domicile shall not be determined by the applicant’s marital status.

3. The applicant must demonstrate such attachment to the community as would be typical of a permanent resident of his/her age and education.

4. Receipt of financial support from the applicant’s family will create a rebuttable presumption that the applicant’s domicile is with his/her family. A student who is the child of divorced parents, where the non-custodial parent or joint custodial parent has been domiciled in Vermont for 12 consecutive months immediately prior to application, and such a parent has contributed in excess of 50 percent of said child’s support during at least that period, may be granted in-state status. Certified copies of such parent’s IRS returns may be required.

5. An applicant becoming a student at an institution of higher learning in Vermont within one year of first moving to the state shall have created a rebuttable presumption of residence in Vermont for the purpose of attending an educational institution.

6. Eligibility to enroll as a resident student in another state shall create a rebuttable presumption against eligibility to be enrolled at the University of Vermont as a “Vermont Resident.”

7. A student enrolling at the University of Vermont shall be classified by the Residency Officer (designated by the President), as a resident or a non-resident. The decision by the Residency Officer shall be based upon information furnished by the student and other relevant information. The Residency Officer is authorized to require such written documents, affidavits, verifications or other evidence as he/she deems necessary.

8. The burden of proof in all cases rests upon the student claiming to be a Vermont resident and shall be met upon a showing of clear and convincing evidence.

9. The decision of the Residency Officer on the classification of a student as a resident or non-resident, may be appealed in writing to the Residency Appellate Officer whose decision shall be final.
Students who wish to be considered for fellowships as well as admission must submit completed applications, with supporting materials, by March 1 of the academic year preceding that for which application is made (February 1 for Psychology). All applicants requesting fellowship, assistantship, or traineeship support must submit an official copy of the Graduate Record Examination score report.

Application for fellowships must be made by completion of the appropriate section on the application form. No separate form is required except where indicated herein.

Tuition scholarships accompanying Graduate Teaching, College, Research, and Student Personnel Fellowships do not cover physical education courses and activities and cover courses numbered below 200 only upon prior approval of the Graduate Dean.

GRADUATE COLLEGE FELLOWSHIPS

The Graduate College offers 10 fellowships in support of master’s degree programs in the social sciences and humanities. Five fellowships provide a stipend (currently $3,150) and a full tuition scholarship (36 credit hour maximum) for the degree program. The remaining five fellowships provide full-time scholarship only.

These fellowships are open to prospective students in the social sciences and humanities at the time of application. Holders of Graduate College Fellowships are required to carry full-time enrollment towards an advanced degree. The fellowships are not renewable.

GRADUATE TEACHING FELLOWSHIPS

AND GRADUATE RESEARCH FELLOWSHIPS

Graduate Teaching Fellowships are awarded in many of the departments offering graduate work. Graduate Teaching Fellows are generally appointed for nine months with stipends averaging $5,700 for 1984-1985. Normally, Teaching Fellows may enroll for a maximum of 10 hours per semester. In addition to the stipend, the fellowship award includes a tuition scholarship covering the number of credit hours specified in the award letter but not to exceed 10 credit hours per semester during the period of the fellowship.

Graduate Research Fellowships are awarded in some of the science departments offering graduate work. Research Fellows are appointed for nine or 12 months and receive stipends generally ranging from $5,700 (9 months) to $7,200 (12 months) and a tuition scholarship (see limits in Teaching Fellowship description). A maximum of half-time assistance in the department is expected of Graduate Teaching and Research Fellows, and they must expect that more than one academic year will be necessary to complete the requirements for the master’s degree. If a Teaching or Research Fellow is a candidate for the doctoral degree, at least four calendar years must be anticipated for completion of the academic program. Generally, fellows are appointed in the departments in which they are doing graduate work.

Appointments will be announced on or about the first week in April.

STUDENT PERSONNEL FELLOWSHIPS

Graduate students are also eligible to apply for Student Personnel Fellowships. The candidates selected to fill these positions will normally be assigned administrative and advisory positions in the residence halls, although limited opportunities in other student services areas are available as well. Student Personnel Fellows have the opportunity to gain valuable experience in the areas of group advising, administration, personal advising, and educational programming. Such positions are open to either married or single students who have been accepted for graduate work in any of the academic programs of the University. Selection is based upon academic record, character, recommendations, and quality of related experiences. A personal interview is required. Student Personnel Fellows receive a stipend of $5,700 plus a tuition scholarship covering a maximum of 10 credit hours per semester for a nine-month period. Room and board is deducted from this stipend for those persons holding Fellowships in
the residence halls. Requests for applications and additional information should be addressed to Office of Residential Life, Robinson Hall. Applications received after March 1 will be considered only for unanticipated openings. Appointments will be announced on or about May 1.

GRADUATE ASSISTANTSHIPS

Graduate Assistantships are generally available when a department member receives a grant from a source external to the University. The appointment may be for either nine or 12 months at a starting salary of about $7,850 and $9,400 per appointment period. Part of the salary is for tuition at the in-state rate with a maximum enrollment of 10 credit hours each semester and nine credit hours during the summer session (12-month appointments).

A maximum of one-half time assistance on the research project is expected and more than one academic year will be necessary for the completion of the master's degree and at least four calendar years for completion of the doctoral degree. For information on the availability of an assistantship, contact the chairperson of the department concerned.

GRADUATE TRAINEESHIPS

Graduate traineeships are available in certain departments through grants from various state and federal agencies. Traineeships are available currently to graduate students enrolled in the following departments: Biochemistry, Communication Science and Disorders, Pathology, and Psychology. These traineeships generally carry stipends and include payment of tuition.

GRADUATE AND PROFESSIONAL OPPORTUNITIES PROGRAM (G*POP)

In addition to the aforementioned support, American minority graduate students may be eligible for funding through the Graduate and Professional Opportunities Program (G*POP) in which UVM participates. Opportunities are available in biochemistry, cell biology, chemistry, electrical engineering, and materials science. Total support available to students through UVM's G*POP program is equivalent to Teaching Fellow/Research Fellow levels. The University encourages applications from American minority students.

GEORGE H. WALKER DAIRY FELLOWSHIP

The George H. Walker Dairy Fellowship, which is awarded periodically to a student in the Department of Animal Sciences, provides a stipend plus a full tuition scholarship. It is available to graduate students who, during their undergraduate courses, have studied "agriculture, chemistry, and bacteriology" and who desire to study the problems relating to the production of a sanitary milk supply on comparatively small plants and farms.

HUMPHREY CHEMICAL COMPANY FELLOWSHIP IN HYDROCARBON SYNTHESIS AND GEICO FELLOWSHIP

These fellowships are awarded annually to qualified students in the Chemistry Department working toward a Ph.D. The amount of the stipend is consistent with Teaching Fellowship and Research Fellowship levels.

OTHER FELLOWSHIPS

A limited number of fellowships established by private donors are available periodically in selected departments.
The University provides, through the Office of Financial Aid, long-term loans and/or work-study jobs for students based upon demonstrated need remaining after all assistantships, fellowships, traineeships, tuition grants, and any other source of financial aid are considered.

LOAN PROGRAMS

• National Direct Student Loans are administered by the University of Vermont. The amount of the loan will depend upon available funds. NDSLs are interest-free while the student is enrolled at least half-time in a degree program. The interest rate is five percent and repayment begins six months after leaving school or reducing enrollment to less than half-time.

• Guaranteed Student Loans may be obtained through private lenders, generally banks, and are not part of the financial aid award provided by the University. Students are eligible to borrow a maximum of $5,000 per year, depending upon need, up to a total of $25,000. This latter total includes any GSLs received as an undergraduate. Guaranteed Student Loans are interest-free while the student is enrolled at least half-time in a degree program. The interest rate is nine percent and repayment begins six months after leaving school or reducing enrollment to less than half-time.

• PLUS Loan Program (also known as ALAS) funds are available up to a maximum of $3,000 per year, with a total maximum of $15,000. Eligibility is based on need after all other sources of aid have been considered. Repayment of interest begins 60 days following receipt of the loan check. The interest rate is 12 percent and interest must be paid while attending school; however, principal payments may be deferred until completion of full-time studies. This loan should be considered only after all other options have been explored.

JOB PROGRAMS

• The College Work-Study Program (CWSP) provides financial assistance through employment on campus or with certain kinds of off-campus agencies. Students have the opportunity to select jobs in their field of study, interests, and skills. The amount of CWSP assistance committed reflects the degree of financial need, a reasonable projection of the amount it is possible to earn at a rate of pay commensurate with the student’s skills and experience, and the total CWSP funds available.

• The Center for Career Development assists students in locating part-time jobs. Students should contact the Career Development Office, 322 South Prospect Street, Burlington, Vermont.

APPLICATION FOR FINANCIAL AID

Application forms are available from the Office of Financial Aid, 330 Waterman Building. Only one application is needed in order to apply for aid. The aid application deadline is May 1. Applications received after that due date will be reviewed according to the date of submission. If additional information is required, the Office of Financial Aid will contact the student. Please note that any tuition grants, fellowships, or assistantships are considered a financial aid resource and must be considered before other University student aid will be awarded.

The University is unable to fund the full level of student need through the National Direct Student Loan and the College Work-Study Programs. As a result, it will be necessary for the student to meet an initial level of need through the Guaranteed Student Loan Program prior to the offer of NDSL and CWSP assistance. Therefore, students are encouraged to contact the Office of Financial Aid to obtain and complete a Guaranteed Student Loan application shortly after acceptance to a graduate degree program.

FINANCIAL AID REFUND POLICY

For students receiving financial aid, change in student status or credit hour load may result in revision or loss of that financial aid, depending on the regulations of the particular aid programs involved. Except when aid program regulations specify otherwise, any such change which reduces the student’s University charges will usually require immediate repayment of the aid so reduced.

VETERANS BENEFITS

Students who are eligible to receive educational benefits from the Veterans Administration should obtain advice from the Center for Career Development.
Courses of Instruction

Course Numbering

Courses numbered 400 or above are limited to candidates for the degrees of Doctor of Education and Doctor of Philosophy; courses numbered 300 to 399 are limited to graduate students; courses numbered 200 through 299 are advanced courses for undergraduates which may also be taken for graduate credit by graduate students. To obtain graduate credit, the graduate student generally is expected to meet higher qualitative and/or quantitative expectations than the undergraduate student. Courses numbered 100 to 199 may not be taken for graduate credit except upon recommendation of a student’s Studies Committee and with the authorization of the Dean of the Graduate College prior to enrollment. Authorization will be limited to one appropriate course (three credit hours) for a master’s program and to two appropriate courses (six credit hours) for a doctoral program. Graduate students may take additional 100-level courses beyond these values, but graduate credit will not be allowed for such courses. Graduate programs designed for the Master of Science for Teachers degree (M.S.T.) are exempted from this rule. Non-degree students are not permitted to receive graduate credit for courses numbered 100-199. Under no circumstances will graduate credit be allowed for a course numbered below 100.

The form 201, 202 indicates that two such courses may be taken independently for credit.

The form 201-202 indicates that such courses may not be taken independently for credit and, unless otherwise stated, must be taken in the sequence indicated.

The number of credit hours per semester is indicated in each course description that follows.

All prerequisites cited refer to courses as numbered at the University of Vermont.

A student who lacks the stated prerequisites for a course, but is otherwise qualified to take it, may be permitted to enroll by the instructor.

While every attempt has been made to list only courses that actually will be offered, the College necessarily must reserve the right to withdraw scheduled offerings or substitute for them should circumstances make such changes necessary.
Graduate Degree Programs and Courses of Instruction

AGRICULTURAL AND RESOURCE ECONOMICS (AREC)

Professors Sargent, Sinclair, Tremblay, Webster (Chairperson); Associate Professors Fife, Gilbert, Pelsue; Assistant Professor Bancroft; Extension Professors Bevins, Houghaboom.

The Department conducts research in agricultural production economics, marketing, and business management. It also has an active research program in the economics of recreation, regional planning and rural development, rural land use and taxation, and environmental quality and control.

The Department offers options in two areas: Agricultural Economics and Resource Economics. Students interested in rural planning may select either option. Each student selects an option and then develops, with a studies committee, an academic program.

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF MASTER OF SCIENCE

For the agricultural economics option: an undergraduate degree in agriculture, economics, business administration, or a related area. For the resource economics option: an undergraduate degree in resource use, economics, recreation, forestry, or in the natural sciences.

All students must present satisfactory scores on the general (aptitude) Graduate Record Examination. Transcripts are evaluated on an individual basis.

REQUIREMENTS FOR ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE

Students who are deficient in key subject areas or where transcript grades appear to be marginal may be required to complete satisfactorily certain courses before acceptance as a degree candidate.

MINIMUM DEGREE REQUIREMENTS

Advanced courses in agricultural and resource economics, general economics, or related fields, 21 to 24 hours, thesis research six to nine hours, for a total of 30 hours.

COURSES OFFERED

201 Farm Business Management. Organization and operation of successful farm businesses emphasizing resource allocation, production efficiency, and marginal analysis. Field trips required. Prerequisites: 61 or Economics 12; 161 or permission of instructor; junior standing. Three hours. Tremblay and Bancroft.

205 Rural Communities in Modern Society. See Sociology 205. Three hours. Schmidt.

207 Markets, Food, and Consumers. Market structure, prices, and economic forces involved in the movement of farm products from producers to consumers. Prerequisite: 61 or Economics 12. Three hours. Webster.

208 Agricultural and Food Policy. History and institutional development of agricultural policy. Price and income problems of American agriculture and alternative solutions. Prerequisite: 61 or Economics 12. Three hours. Sinclair.

210 Marketing Institutions. Agricultural marketing institutions servicing northeastern U.S. Reading, lectures, and extended field trip. Prerequisites: Six hours in agricultural economics and permission of instructor. Three hours. Webster and Tremblay.

218 Community Organization and Development. See Sociology 207. Three hours. Schmidt.

225 Economics of Outdoor Recreation and Tourism. A socioeconomic analysis of recreation and tourism as an industry. Emphasis on regional, state, and community impact. Prerequisite: 61 or Economics 12. Three hours. Bevins, Gilbert.

233 Rural Planning. Study of rural, regional, water, and natural resource planning concepts and principles. Field exercises in plan evaluation, carrying capacity, agricultural land protection, growth control, etc. Prerequisites: Senior standing and 61 or equivalent. Three hours. Sargent.

235 Legal Aspects of Planning and Zoning. See Natural Resources 235. Three hours.

234 Production Economics. Principles and application of the economics of production in agriculture; emphasis on factor use, enterprise selection and combination, and decisionmaking. Prerequisites: 61 or Economics 12, Mathematics 19, or permission of instructor. Three hours. Bancroft.

255, 256 Special Topics in Agricultural and Resource Economics. Readings and discussion of selected topics in economics, including those not encompassed in regular course offerings, at an advanced level. Prerequisite: Departmental permission. Credit as arranged.

264 Agricultural Price Analysis and Forecasting. Analysis and measurement of factors affecting supply, demand, and elasticity: their relation to the level and changes of market prices; and use of quantitative techniques in forecasting. Prerequisites: 61 or Economics 12, Mathematics 19, or permission of instructor; Computer Science 3 and Statistics 111 helpful. Three hours. Pelsue.

266 Economics of Managerial Decisions. Applying economic concepts to problems of capital budgeting, tax planning, pricing, demand analysis, and discounting cash flows. Cases. Prerequisite: Economics 12 or equivalent. Three hours. Fife.

271 Agriculture in Economic Development. The role of agriculture in development of less developed countries. Discussion of alternative economic development models. Review of various development programs, including Mexico, China, France, Yugoslavia. Prerequisite: 61 or Economics 12. Three hours. Sargent.

272 Seminar on World Food Problems and Policies. Review of recent books and periodical literature; discussion and written or oral reports on topics of contemporary interest. Prerequisite: 271 or permission. Three hours. Tremblay.

287 Spatial Analysis. See Geography 287. Three hours. Bodman.
STUDIES FOR THE DEGREE OF DOCTOR OF PHILOSOPHY

A year of advanced biology; one course in college physics. Additional courses in calculus, differential equations, statistics, computer science, and physical chemistry leading to a dissertation. A grade of B or better must be obtained in any course taken in Anatomy and Neurobiology.

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF MASTER OF SCIENCE

Students are admitted to the Ph.D. program only, not to a M.S. program. Ph.D. students may subsequently complete a M.S. degree with the permission of the Department.

REQUIREMENTS FOR ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE

Satisfactory completion of required courses and Research Rotations. Acceptance of a written report and oral presentation on the proposed thesis as approved by the Research and Dissertation Committee.

MINIMUM DEGREE REQUIREMENTS FOR THE DEGREE OF MASTER OF SCIENCE

Thirty credits of courses and research, including Anatomy and Neurobiology 301, 302, 311; comprehensive examination.

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF DOCTOR OF PHILOSOPHY

Bachelor's degree; one year of organic chemistry/biochemistry; a year of advanced biology; one course in college physics. Additional courses in calculus, differential equations, statistics, computer science, and physical chemistry are recommended. A deficiency in one prerequisite course can be made up in the summer session before entry into the program. A master's degree is not a prerequisite for the Ph.D. degree. Satisfactory scores on the general (aptitude) Graduate Record Examination.

REQUIREMENTS FOR ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF DOCTOR OF PHILOSOPHY

Satisfactory completion of required courses and Research Rotations. Approval of the written and oral portions of the qualifying comprehensive examination.

MINIMUM DEGREE REQUIREMENTS FOR THE DEGREE OF DOCTOR OF PHILOSOPHY

Anatomy 301, 302, 306, 311, 351 or 352, 395 or 396, and 491; Physiology and Biophysics 304, 305; Biochemistry 301, 302. Additional elective courses and teaching assignments as arranged with the department; departmental research rotations; dissertation research; credits as required by the Graduate College. Candidacy examination; successful completion of dissertation. A grade of B or better must be obtained in any course taken in Anatomy and Neurobiology.

COURSES OFFERED

Note: Departmental permission is required for all courses.

201 Human Gross Anatomy. Emphasizes the structure, function, and clinical correlations of the musculoskeletal, peripheral nervous, cardiovascular, and respiratory systems. Laboratory consists of detailed regional dissections. Required for Physical Therapy students. Five hours. Kriebel.

202 Neuroanatomy and Histology. Structural basis of human nervous system function, from peripheral nervous system, spinal reflex organization to detailed analysis of motor, sensory systems. Clinical examples. Laboratory. Required for physical therapy students. Three hours. Wells.

302 Neuroscience. A correlated presentation of the neuroanatomy and neurophysiology of the mammalian central nervous system. Lectures, demonstrations, laboratory, and clinical correlation workshops. Four hours. Freedman, Kromer.

306 Techniques in Neurobiology. Discussion, demonstration of techniques used to study the nervous system. Experience with light, fluorescence, electron microscopy; microsurgical procedures; electrophysiological stimulating, recording techniques; neuronal tracing techniques. Prerequisite: Neuroscience 302. Three hours. Fiekers.

311 Medical Histology. The course as presented to medical students. Microscopic study of cells, tissues, and organs emphasizing the correlation of structure and function. Three hours. Fiekers, Cornbrooks.

320 Developmental Neurobiology. Embryonic and early postnatal development of selected regions of mammalian CNS. Provides fundamental knowledge of cell-to-cell interactions necessary for proper development, organization of mammalian nervous system. Prerequisite: Neuroscience 302 or consent of instructor. Two hours. Kromer. Alternate years.
322 Neuroendocrinology. Consideration of the diencephalic regulation of hormonal activity. The major emphasis devoted to morphological features of hypothalamic mechanisms controlling pituitary hormone secretion. Prerequisite: Neuroscience 302. Two hours. Kriebel, Freedman. Alternate years.

342 Special Dissections in Gross Anatomy. A detailed and independent study of a single anatomical region, utilizing gross, microscopic, and embryologic materials. Prerequisite: 301. Credit as arranged. Krupp, Boushey, Fonda.

381, 382 Seminar in Anatomy and Neurobiology. Research presentations and critical review of the literature in various areas of anatomical and neurobiological sciences. One hour.

391 Master's Thesis Research. Credit as arranged.

395, 396 Special Topics in Neuroscience. A supplementary course to the medical neuroscience course (Neuroscience 302) designed for graduate students which will provide more detailed information concerning selected topics in neurobiology. Prerequisite: Neuroscience 302. Two hours. Parsons.

491 Doctoral Dissertation Research. Credit as arranged.

ANIMAL SCIENCES (ASCI)

Professors Atherton, Balch, Bolton, Bull (Chairperson), Carew, Duthie, Foss, Smith, Welch; Associate Professors Kunkel, Murray, Simmons; Assistant Professors Gilmore, Ryan; Extension Professors Gibson, Wadsworth; Extension Assistant Professors Saenger, Wildman; Adjunct Professors Randy, Thomas, S. Donnelly; Visiting Assistant Professor C. Donnelly; Research Professor Pankey.

Research activities in basic and applied science encompass a broad range of interests. The areas of study and research include nutrition; physiology; virology; diseases of cattle affecting reproduction; dairy plant management, chemistry, or microbiology; quality control aspects of the food industry.

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF MASTER OF SCIENCE

An acceptable undergraduate major in the animal sciences, chemistry, biology, or a related field. Satisfactory scores on the general (aptitude) Graduate Record Examination must be presented. In certain of the animal health areas, a degree of Doctor of Veterinary Medicine may be helpful.

REQUIREMENTS FOR ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE

The applicant must satisfy the requirements of the Graduate College and pass the general qualifying examination administered by the Department of Animal Sciences.

MINIMUM DEGREE REQUIREMENTS

Fifteen to 21 hours in Animal Sciences and one of several related fields; thesis research (nine to 15 hours).

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF DOCTOR OF PHILOSOPHY

Satisfactory scores on the general (aptitude) Graduate Record Examination must be presented.

REQUIREMENTS FOR ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF DOCTOR OF PHILOSOPHY

The applicant must satisfy the prerequisites of the Graduate College and pass the general qualifying examination administered by the Department of Animal Sciences.

MINIMUM DEGREE REQUIREMENTS

The Department of Animal Sciences believes each graduate program has its individual needs and must be arranged accordingly. The candidate must meet all the requirements as prescribed by the Graduate College for the degree of Doctor of Philosophy. In addition, all courses and seminars as established by the Studies Committee must be satisfactorily met, doctoral research must be completed, and an acceptable dissertation written and defended. In accord with the policy of the Animal Sciences Department, all doctoral students will be provided the opportunity to participate in the Department's undergraduate teaching program. Proficiency in a modern foreign language or computer language and programming is optional at the discretion of the Studies Committee.

COURSES OFFERED

201 Fermented Dairy Foods. Fundamental processes in the manufacture of economically important cheese varieties and other cultured dairy foods. Acquired knowledge of manufacturing procedures applied at the pilot plant level. Prerequisites: 3; junior standing. Four hours. Ryan.

202 Dairy Industry Managerial Training. Select topics dealing with the organization and management of modern dairy foods processing plants. Prerequisites: 101, 102, 103, 104, 201. Three hours. Ryan.

212 Animal Breeding. Principles of quantitative and statistical genetics studied in relation to animal breeding. Methods of selection and schemes of mating discussed. Prerequisites: An introductory course in genetics, Statistics 141 or instructor permission. Four hours. Gilmore.

215 Physiology of Reproduction and Lactation. Fundamental principles of the physiology of reproduction and lactation with the primary emphasis on farm animals. Three hours. Simmons.

216 Endocrinology. Anatomy, physiology, glandular interrelationships, and assay methods of the endocrine glands and their hormones. Prerequisite: Departmental permission. Four hours. Simmons.
242 Advanced Nutrition. See Human Nutrition and Foods
242. Three hours. Tyzbir.

281 Animal Sciences Senior Seminar. Reports and discussions of problems and special investigations in selected fields. One hour. Atherton, Simmons.

282 Animal Sciences Graduate Seminar. Reports and discussions of problems and special investigations in selected fields. One to three hours. Carew.

297, 298 Special Problems in Animal Sciences. Reading, discussion, and special laboratory investigation in the field of animal sciences. Prerequisite: Departmental permission. May enroll more than once for maximum of six hours.

391 Master's Thesis Research. Credit as arranged.

491 Doctoral Dissertation Research. Credit as arranged.

ANTHROPOLOGY  (See page 100.)

ART  (See page 100.)

BIOCHEMISTRY (BIOC)

Professors Lamden, Mann (Chairperson), Meyer, J. Thanassi, and Woodworth; Associate Professors Auletta, Chiu, Cutroneo, Hart; Research Associate Professor Ehrlich; Research Assistant Professors Brown-Mason, N. Thanassi.

Current research programs include studies of mechanisms controlling ovarian function (P. Auletta); transport of iron into cells by receptor mediated iron-binding proteins (A. Brown-Mason); nuclear protein chemistry (J.-F. Chiu); mechanisms of hormone action (K.R. Cutroneo); neurochemistry of receptor function and molecular mechanisms of neuronal plasticity (Y. H. Ehrlich); the toxicity of cadmium and its reactions in biological systems (B.A. Hart); nutritional biochemistry; vitamins A, C, E and lipid peroxidation (M.P. Lamden); proteins of the blood coagulation process (K.G. Mann); regulatory mechanisms for protein and nucleic acid processing and breakdown in muscle (W.L. Meyer); chemistry and biochemistry of vitamin B6 (J.W. Thanassi); and the nature of the binding of metals to proteins, particularly the iron-binding proteins of blood plasma (R.C. Woodworth).

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF MASTER OF SCIENCE OR FOR THE DEGREE OF DOCTOR OF PHILOSOPHY

Satisfactory score on the Graduate Record Examination including the subject (advanced) portion. In addition:

Year courses in organic chemistry, physical chemistry, and physics (equivalent to Chemistry 141, 142 or 143, 144, Chemistry 162 and Physics 15, 16); quantitative chemistry; mathematics through differential and integral calculus; a year course in a biological science.

REQUIREMENTS FOR ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE OR FOR THE DEGREE OF DOCTOR OF PHILOSOPHY

Under most circumstances, meeting the requirements for admission as stated above will allow advancement to either degree program.

MINIMUM DEGREE REQUIREMENTS FOR THE DEGREE OF MASTER OF SCIENCE

Thirty credit hours, 16 of which must be taken from graduate courses offered by the Department of Biochemistry, including Biochemistry 301, 302, 303, 381, and 391 or 392.

Thesis Option

Up to 14 credit hours of Master's Thesis Research (Biochemistry 391.)

Non-Thesis Option

Up to eight credit hours of Independent Literature Research (Biochemistry 392.)

MINIMUM DEGREE REQUIREMENTS FOR THE DEGREE OF DOCTOR OF PHILOSOPHY

A total of 75 hours, including 20 hours from graduate courses offered by the Department of Biochemistry including Biochemistry 301, 302 or 305-306, 303 and participation throughout residence in Biochemistry Seminars; three hours from graduate courses offered by the Department of Chemistry; 10 additional hours from courses in physical or biological sciences; 30 hours of Doctoral Dissertation Research.

COURSES OFFERED

Biochemistry 211-212, 301-302, 303, 305-306, and 381 are offered annually. Advanced courses are given in alternate years.

211-212 Biochemistry for Health Sciences. For medical technology students. Comprehensive study of mammalian biochemistry, particularly human. Laboratories include medically-oriented experiments utilizing modern clinical chemistry techniques. Case studies from MCHV correlate lecture, laboratory. Prerequisites: 102 or quantitative chemistry; organic chemistry. Physiology is strongly recommended. Four hours per semester. Hart.

301-302 General Biochemistry. Survey for science majors. Topics: chemistry, structure, metabolism, and function of proteins, amino acids, carbohydrates, lipids, nucleic acids; enzymes; bioenergetics; respiratory processes; cellular and physiological control mechanisms. Prerequisites: Chemistry 141, 142 or 143, 144 and departmental permission. Three hours per semester. J. Thanassi, Coordinator.

303 Biochemistry Laboratory. Experimental work designed to demonstrate important principles and to illustrate methods and techniques of modern biochemistry. Prerequisites: 301, 302 or 305-306, or concurrent registration therein, and departmental permission. One to four hours. W. Meyer, Coordinator.

305-306 Medical Biochemistry. For medical students. Survey of human physiological, molecular biochemistry; chemistry, metabolism of cellular and dietary constituents; enzymes and bioenergetics; blood, respiration, acid-base balance, mineral metabolism; metabolic controls. Prerequisites: Chemistry 141, 142 or 143, 144 and departmental permission. Given on a trimester basis in the College of Medicine calendar; equivalent to three hours per semester for two semesters. Staff.
307, 308  Special Topics in Biochemistry. Areas of biochemistry not treated in concurrent advanced course offerings. Topics include: intermediary metabolism, organic and physical biochemistry, enzymology, physiological chemistry. Two areas are usually covered each semester. Prerequisites: 301, 302 or 305-306; Chemistry 162. Two hours per semester. Staff.

320  General Enzymology. General consideration of enzyme nomenclature, purification, assay, introductory kinetics, mechanisms, cofactors, active sites, subunit structure, allosteric and regulatory properties, and control of multienzyme systems. Prerequisites: 301, 302 or 305-306; Chemistry 162. Three hours. Meyer.

340  Bioorganic Chemistry. Organic reaction mechanisms as related to substances or biochemical interest, emphasizing on catalytic mechanisms. Prerequisites: 301, 302 or 305-306. Two hours. Thanassi.

350  Biochemistry of Cell Differentiation. Biochemical basis, molecular mechanism of cell differentiation, neoplastic transformation. Specific models on cell differentiation and approaches to understanding cell differentiation, (i.e. gene cloning and DNA-mediated cell transformation). Prerequisites: 301-302 or 305-306. Three hours. Chiu.

367  Biochemical Endocrinology. Studies of biochemical mechanisms of hormonal recognition, interaction, with eukaryotic cells. Topics: detailed analysis, comparison of metabolic action, mechanisms of gene activation by hormones. Prerequisites: 301, 302 or permission. Three hours. Staff.

371  Physical Biochemistry. Protein interaction, solubility and fractionation, electrophoresis, sedimentation, phase rule study, diffusion, viscosity, spectrophotometry, and related topics. Prerequisites: 301, 302 or 306; Chemistry 160 or 162. Three hours. Woodworth.

BIOMEDICAL ENGINEERING
A cooperative program offered by the Department of Computer Science and Electrical Engineering (F.C. Evering, Chairman), the Department of Civil Engineering and Mechanical Engineering (C. Hermane, Chairman), and the Department of Physiology and Biophysics (N.R. Alpert, chairman).

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF MASTER OF SCIENCE
An accredited bachelor's degree in an appropriate field.

REQUIREMENTS FOR ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE
An accredited bachelor's degree in electrical or mechanical engineering or equivalent. Courses in biology and chemistry may be recommended as prerequisites. Applicants with backgrounds other than electrical or mechanical engineering will generally be required to make up undergraduate deficiencies.

MINIMUM DEGREE REQUIREMENTS
Physiology and Biophysics 301; 12 hours in electrical or mechanical engineering, physics and mathematics; additional approved courses; thesis research (six-12 hours) in the Department of Electrical or Mechanical Engineering. Applicants should consult the department to determine if the program offered meets their specific educational objectives.

Biomedical engineering is one of the areas of research interest in the graduate programs in electrical and mechanical engineering.

BIOSTATISTICS
This program is administered through the Statistics Program in close collaboration with the faculty and staff of the Medical Biostatistics Unit of the College of Medicine. Dr. Taka Ashikaga is the program director.

The program offers a concentration in biostatistics leading to the M.S. Degree. The curriculum takes full advantage of courses taught in the Statistics Program and includes experience in a variety of health, biomedical, and related research projects in the College of Medicine. This experience is designed to provide candidates with opportunities to use their academic training and work experience in defining research problems, formulating rational methods of inquiry, and gathering, analyzing, and interpreting data. The Medical Biostatistics research activities cover the full range of epidemiologic, clinical, and preclinical studies that take place within an academic medicine environment. These include population-based health surveys of various types, evaluations of health promotion programs and professional education activities, the design and maintenance of various computerized data bases arising from a statewide tumor registry, a long-term psychiatric follow-up study, epidemiologic studies dealing with the respiratory impacts of occupational exposures, as well as data from other clinical and preclinical studies. Emphasis is placed on learning to perform computerized data analysis.

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES AND ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE
An undergraduate major which provides a foundation for the application of statistical methodology and concepts to health and biomedical problems. In particular, premedicine majors who have delayed their application to medical school will be well suited for the program. It is anticipated that candidates will have completed three semesters of calculus including matrix algebra methods. However, provisional admission to the program can be given prior to the completion of these requirements. Computer experience is desirable. The Graduate Record Examination is strongly advised and is required of any applicant who wishes to be considered for a teaching fellowship.

MINIMUM DEGREE REQUIREMENTS FOR THE DEGREE OF MASTER OF SCIENCE
Plan A: Twenty-four semester hours of course work. This will include Biostatistics 200, 201, 211, 221, 223, 224, 241, 383, 384 and six hours of approved thesis work.

Plan B: Thirty semester hours of course work. This will include Biostatistics 200, 201, 211, 221, 223, 224, 241, 383, 384.

All students are expected to participate in the projects of the Biometry Facility and to attend the regular colloquium
series as part of their training. During the latter part of their training the students will be expected to take major responsibility for some project, including the presentation of the final report for this project.

COURSES OFFERED

200 Medical Biostatistics. Research designs, measurement concepts, and analysis methods appropriate to medical and health science applications with particular emphasis on case-control studies. Corequisite: 211. Three hours.

211,221 Statistical Methods I, II. See Statistics 211, 221.

231 Experimental Design. See Statistics 231.

261,262 Statistical Theory I, II. See Statistics 261, 262.

381 Biometry Practicum. See Statistics 281.

391 Master’s Thesis Research. Credit as arranged.

BOTANY (BOT)

Professors Etherton, Hyde, Klein, Vogelmann (Chairperson), Worley; Associate Professors Barrington, Cook, Ullrich; Research Associate Professors Laing, Morselli; Research Assistant Professor Lintilhac; Lecturer Hoffmann.

The Botany Department has ongoing research programs in: ecology including physiological ecology of aquatic plants, effects of acid depositions on forest ecosystems, physiological ecology of acid depositions, systematics and evolution of vascular plants, biogeography, bryology, limnology, phycology; physiology including morphogenesis and developmental biology of embryonic plant systems, mineral nutrition, growth and development, translocation, tissue culture, photosynthesis, cellular electrophysiology, membrane function, amino acid transport, aluminum effects on cell membranes; and cell biology including ultrastructure of cytoplasm and nucleus, molecular genetics and recombinant DNA of fungi.

The Botany Department offers a multidisciplinary program leading to the degree of Master of Science in Botany Field Naturalist Option. This is a non-thesis concentration and enrollment is limited to a small number of highly qualified students with strong academic backgrounds in basic natural sciences. Students must have demonstrable and sustained interest in the field aspects of the natural sciences. The program is designed to train general field scientists to identify, evaluate, and interpret the biotic and abiotic components of different ecosystems with a comprehensive perspective. The Botany Department also participates actively in the Cell Biology Program which provides opportunities for interdisciplinary research with other life science departments.

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF MASTER OF SCIENCE

Six semester courses in botany; supporting courses in other sciences and in mathematics. Satisfactory scores on the general (aptitude) and subject (advanced) sections of the Graduate Record Examination.

MINIMUM DEGREE REQUIREMENTS

Fifteen to 21 hours in botany and closely related fields; thesis research (nine to 15 hours). Each candidate must participate in the teaching of at least one undergraduate course.

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE FIELD NATURALIST OPTION

A baccalaureate degree in a natural science area such as botany, zoology, or geology with a strong course background in field related subjects, especially botany (systematics, soils, ecology, etc.); a demonstrated commitment and involvement in field sciences (participation in scientific, environmental, and conservation organizations, workshops, field trips, research, publications, etc.); satisfactory scores on the Graduate Record Examination including the subject (advanced) test in biology.

MINIMUM DEGREE REQUIREMENTS

Thirty-six to 60 credit hours of courses to include at least two courses in each of three core areas: (1) biota, (2) earth science, (3) ecology, the number of credits and the course selection to be determined by the student's studies committee. Enrollment in a field naturalist practicum each semester. A written and oral comprehensive examination to be completed during the third semester. A written field analysis project at the termination of the formal course of study.

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF MASTER OF ARTS IN TEACHING

The Department offers a program leading to the degree of Master of Arts in Teaching (see page 25). Satisfactory scores on the Graduate Record Examination general (aptitude) section are requirements for acceptance for this degree.

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF MASTER OF SCIENCE FOR TEACHERS (BIOLOGY)

A bachelor's degree from an accredited institution and certification as a teacher of biology or an associated field. At least three years of secondary school teaching. Satisfactory scores on the Graduate Record Examinations general (aptitude) section.

MINIMUM DEGREE REQUIREMENTS FOR THE M.S.T. (BIOLOGY)

Thirty hours of course work to include a selection of courses in the Departments of Botany and Zoology which will broaden and balance the undergraduate work in biology. At least two 200-level courses in each department. Courses in four of the five following areas: anatomy; morphology and systematics; genetics; developmental biology; and environmental biology. Up to 12 hours of 100-level courses may be used for the above requirement where approved by the advisor and the Dean. Appropriate courses in related science departments may be used to complete the required 30 hours. No thesis is required; however,
each degree recipient must complete a written and oral examination.

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF DOCTOR OF PHILOSOPHY

The following courses must have been satisfactorily completed: four semesters in botany; two semesters in zoology; a year of organic chemistry comparable to Chemistry 141, 142; two semesters of calculus comparable to Mathematics 21, 22 and in some cases a third semester of calculus comparable to Mathematics 121; a year of physics comparable to Physics 15, 16. Satisfactory scores on the Graduate Record Examination general (aptitude) and subject (advanced) sections.

REQUIREMENTS FOR ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF DOCTOR OF PHILOSOPHY

Completion of one academic year, but not more than two years, in graduate study at the University of Vermont. The specific language requirement for the candidate is to demonstrate ability to comprehend the contents of articles in the biological sciences in a modern foreign language appropriate to the student specialty and approved by the Studies Committee.

MINIMUM DEGREE REQUIREMENTS

The candidate is required to accumulate a minimum of 75 credits from course work and dissertation research. The course requirements are as follows: a total of at least 40 credit hours of which at least 20 must be taken in botany and at least 20 in other sciences. Supervised teaching to the extent of not less than six semester contact hours is also requisite.

COURSES OFFERED

205 Mineral Nutrition of Plants. Role of essential elements for plant growth including classical and modern approaches to the study of ion availability and transport. **Prerequisite:** 104. Three hours. Etherton. Alternate years, 1984-85.

209 Biology of Ferns. Evolutionary biology; a survey of New England ferns and their phyllogenetic relationships; current research emphasizing morphological, biogeographical, genetic, and phytochemical aspects of speciation. **Prerequisites:** 108; 132 or 101 recommended. Three hours. Barrington. Alternate years, 1985-86.

213 Plant Communities. Plant sociology; structure and organization of the plant community; sampling methods and analysis of data; climatic and edaphic factors; field work. **Prerequisite:** 109 or departmental permission. Three hours. Vogelmann.

229 Water Relations of Plants. See Forestry 229.

232 Botany Field Trip. Trips to selected environments outside Vermont. Led by several faculty members representing different fields of Botany. Overall, integrated approach to ecology, structure, and function. One hour. Christmas or spring vacation or end of school year.

234 Ecology of Freshwater Algae. Environmental factors influencing distribution and seasonal succession; quantitative methods for estimating standing crop productivity; kinetics of algal growth; competitive and synergistic interactions. **Prerequisite:** 160 or Biology 102. Three hours. Cook. Alternate years, 1985-86.

241 Tropical Plant Systematics. Diversity of tropical flowering plant communities; recent systematic, evolutionary angiosperm research; anatomy, morphology, ecology, geography of major families. Student presentations on an aspect of recent research. **Prerequisite:** 109. Three hours. Barrington. Alternate years, 1984-85.

250 Microtechnique. Theory and practice in the preparation of biological materials for anatomical and cytological study, including histochemistry and photomicrography. **Prerequisites:** Introductory chemistry; some knowledge of organic chemistry, anatomy, or cytology is desirable. Three hours. Cook. Alternate years, 1985-86.

252 Molecular Genetics II: Regulation of Gene Expression in Eukaryotes. Processing of information present in nucleic acids; knowledge generated from recombinant DNA techniques applied to higher cells; control in transposition, transformation, transcription, and processing transcript. **Prerequisites:** Biology 101 or Biochemistry 301, or equivalents; Medical Microbiology 211 preferred; permission of the instructor. Three hours. Ulrich.

257 Physiology of the Plant Cell. Detailed study of photosynthesis, plant cell membrane function, and plant cell growth. **Prerequisites:** 104; Chemistry 141, 142 or Chemistry 42; Physics 11, 12 or 15, 16. Four hours. Etherton. Alternate years, 1985-86.

281 Botany Seminar. Presentations of personal research by faculty, graduate students, and outside guest speakers. Attendance required of botany graduate students and seniors in botanical research programs. Without credit.

295 Special Topics. For advanced students within areas of expertise of faculty and staff. Aspects of ecology, physiology, genetics, cytology, bryology, pteridology, paleobotany, photobiology, membrane physiology, cell biology. **Prerequisite:** Permission of instructor. Credit as arranged.

301 Cell Biology. Advanced survey of cell organelles, their composition, origin and the relationship between their structure and function. Emphasis on recent literature and current controversies. **Prerequisites:** Chemistry 142, graduate standing in biology or permission of instructor. Three hours. Hyde.

311 Field Naturalist Practicum. Readings and analysis of field studies and writings of contemporary and classical naturalists; planning and designing field project. **Prerequisites:** Enrollment in the Field Naturalist program. Three hours. Worley.

381 Selected Problems in Modern Botany. Subject matter varies but will stress recent botanical inquiries, particularly where they border on mathematics, physics, and chemistry. **Prerequisite:** Departmental permission. One to three hours credit.

391 Master's Thesis Research. Credit as arranged.

491 Doctoral Dissertation Research. Credit as arranged.

BUSINESS ADMINISTRATION (BSAD)

Professors Grinnell, Laber, Severance, Thimm (Director); Associate Professors Anderson, Gatti, Jesse, Kraushaar.
Michael, Parke, Shirland, Tashman; Assistant Professors Battelle, Cats-Baril, Gurdon, Hummel, Sinkula, Woodman.

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES AND FOR ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF MASTER OF BUSINESS ADMINISTRATION

The MBA program consists of three tiers of courses. Tier I must be completed successfully before a student is admitted to candidacy for the degree. Students will be admitted to the Graduate College before Tier I is completed, and enrollment in Tier II courses is restricted to students who have applied for admission to the Graduate College.

In addition to transcripts of prior undergraduate and graduate training, the applicant is required to submit scores on the Graduate Management Admissions Test. (GMAT scores are accepted in lieu of Graduate Record Examination scores for financial assistance in this program.)

MINIMUM DEGREE REQUIREMENTS

Students must complete all of the courses listed in Tiers I, II, and III. Tier I must be completed before enrollment in any Tier II courses.

TIER I
(UVM course equivalents listed)

A minimum of 30 hours of 300-level credit must be completed at UVM for the MBA degree.

COURSES OFFERED

304 Managerial Economics. An introduction to the application of economic analysis to managerial decisions. Topics include marginal analysis, demand estimation, cost and production functions, and optimization. Prerequisites: BSAD 313, MBA standing. One and one-half hours.

305 Fundamentals of Marketing Management. Accelerated course on marketing principles and theory. Analytical approach to study of product pricing strategies; distribution, communication, and promotion; consumer behavior and development of corporate marketing strategy. Prerequisite: MBA standing. One and one-half hours.

307 Fundamentals of Management and Organizational Behavior. Accelerated study of individual, group behavior in organizational settings. A managerial perspective to examine theories of motivation, perception, communication, group dynamics, leadership, organization design, organization development. Prerequisite: MBA standing. One and one-half hours. Battelle/Grinnell.

308 Corporate Finance. An introduction to financial decision-making in the firm. Decisions related to acquisition and allocation of funds are examined, and practiced through cases and problems. Prerequisites: BSAD 306, MBA standing. Three hours. Gatti/Laber.

309 Fundamentals of Legal Environment of Business. General overview of areas of interaction between businesses and governments. Examination of governmental policy toward business and review of laws governing business-government interactions. Prerequisite: MBA standing. One and one-half hours.

340 Quantitative Methods and Production Models. Models for the design and control of production and service processes. Linear programming, production scheduling and inventory control, network models, queuing, selected mathematical programming techniques. Prerequisite: MBA standing. Three hours. Shirland.

345 Management Information Systems. An introduction to the design and implementation of management information systems. A theoretical framework is developed and applied by students to an information system. Prerequisite: MBA standing. Three hours. Kraushaar.

347 Analysis of Decision Support Systems. Normative guidelines to design, implement, and evaluate information systems that support unstructured managerial tasks. The guidelines are developed by analyzing information distortion in organizations. Prerequisites: BSAD 307, 345, and MBA standing. Three hours. Cats-Baril.
359 Marketing Policy. Concepts from quantitative methods, economics, behavioral sciences applied to marketing management. Includes: marketing opportunities, organizing for marketing, planning marketing programs, control of marketing effort. Case book method. Prerequisite: MBA standing. Three hours.

365 Management Accounting. Study of development, utilization of accounting information for product costing and pricing purposes, for routine planning and control of organizational activities, for decision-making purposes. Prerequisite: MBA standing. Three hours. Grinnell.

371 Personnel Administration. Critical examination of contemporary problems, controversies in personnel administration. Current issues, topics (affirmative action, discrimination in employment) covered with more traditional topics of wage and salary administration, etc. Prerequisite: MBA standing. Three hours. Parke.

375 Organization Theory. Organization theories examined for insights into behaviors of organizations and their members. Open systems perspective. Indentification of contingencies in organization design based on human, structural, technological, environmental variables. Prerequisite: MBA standing. Three hours. Parke.

376 The Management of Change in Organizations. Applied behavioral science perspective adopted to identify conceptual issues, develop diagnostic skills, examine alternative intervention strategies relevant to accomplishment of planned changes in organizational systems. Prerequisite: MBA standing. Three hours.

379 Strategic Management. Case studies of existing organizations are used to illustrate the intellectual, social processes of adaptation to a changing environment; strategy formulation, implementation. Not offered every year. Prerequisite: MBA standing. Three hours. Arms.

380 Managerial Finance. Focus on key financial decisions that affect the value of the firm. Topics: capital structure, leasing, mergers and acquisitions, capital market theories and evidence. Prerequisite: MBA standing. Three hours. Laber.

382 Investment and Portfolio Analysis. Examination of the investment decision process. Specific topics include operations of equity securities markets, market efficiency, capital asset pricing model, and portfolio management. Prerequisites: 308, MBA standing. Three hours. Gatti.

384 Financial Markets and Interest Rates. Study of level and structure of interest rates. Topics: flow of funds accounting, market vs. natural rate of interest, interest rate structure, behavior of interest rates over business cycle. Prerequisite: MBA standing. Three hours. Gatti.

394 Independent Readings and Research. Allows a student to pursue independent research under the direction of a faculty member. Normally, the course will include a research paper. Prerequisite: Permission of the Graduate Studies Committee. One to three hours.

395 Special Topics. Topics and material that may develop later into a regular course offering; in addition, it may include topics and material offered only once. Prerequisite: Permission of the Graduate Studies Committee. One to three hours.

396 Business Policy. A case course focusing on the resolution of complex cases involving simultaneous solutions of problems in two or more functional areas. Prerequisite: MBA standing; 21 hours of graduate credit. Three hours. Staff.

CELL BIOLOGY (Interdisciplinary)

Participating faculty are from the following departments: Anatomy and Neurobiology; Botany; Biochemistry; Medical Microbiology; Medicine; Microbiology and Biochemistry; Neurology; Pathology; Pharmacology; Physics; Physiology and Biophysics; Psychiatry; Zoology.

An interdisciplinary program leading to M.S. and Ph.D. degrees in Cell Biology is offered under the direction of a committee composed of faculty members drawn from the participating departments. The program provides the flexibility necessary for students to gain competence in the area of their choice. The extensive research facilities of the participating departments are available to all graduate students enrolled in the program. Inquiries should be directed to the Cell Biology Program Chairman, William L. Meyer, Department of Biochemistry.

Research includes: (Absher) cellular aging and cellular mechanisms of pulmonary fibrosis; (Adler) role of contractile proteins in secretion and non-muscle cells; (Albertini) human somatic cell genetic mutations, histocompatability genetics; (Ariano) cytochemistry of neurotransmitter and cyclic nucleotide interactions in the basal ganglia; (Chiu) regulation of gene activities in developing and neoplastic tissues; (Cornbrooks) development and regeneration of the peripheral nervous system; (Craighead) pulmonary disease, viral infections, carcinogenesis; (Currier) chemotaxis and root nodulation; (Cutroneo) regulation of collagen synthesis; (Ehrlich) neurochemistry of receptor function and molecular mechanisms of neuronal plasticity; (Evans) airway and pulmonary vascular smooth muscle; (Hacker) molecular pharmacology and toxicity of anticancer drugs; (Happ) hormonal control of differentiation in insects; (Hart) metal toxicity in the lung; (Heintz) control of DNA replication in mammalian cells and replicon organization throughout the cell cycle; (Huber) immunopathology; (Hyde) plant cytogenetics, nuclear ultrastructure; (Kelleher) control of protein synthesis in mammalian cells, oncodevelopmental gene products; (Kelley) connective tissue proteins and in vitro models of disease; (Kilpatrick) electrophoretic and chromosomal analysis of populations; (Kimura) factors modulating membrane protein conformation and control mechanisms regulating membrane protein density; (Krupp) dynamics of thyroid follicular cells; (Landesman) gene control and the role of morphogenic information during amphibian limb development; (Low) protein metabolism in eukaryotic systems; (Meyer) physiological control of neutral proteases, ribonucleases and esterases, relationships to muscle disease, development, tumor biology, interferon and resistance to infection; (Moehring) cell culture; mechanisms of pathogenesis of toxins; biochemical genetics; and cytogenetics; (Morselli) tissue and organ culture studies on growth and differentiation of woody plants; chemistry and microbiology of maple sap, wood and bark; (Mossman) carcinogenesis of tracheobronchial tree; (Novotny) isolation and expression of genes in the mushroom Schizophyllum; (Nyborg) biophysics of ultrasound; (Pennybacker) influence of extracellular matrix on cell behavior; (Racusen) biochemistry of plant proteins;
REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF MASTER OF SCIENCE AND FOR THE DEGREE OF DOCTOR OF PHILOSOPHY

Biology (three semesters, including genetics), chemistry through organic, mathematics through calculus, physics (two semesters). Satisfactory scores on general (aptitude) Graduate Record Examination. Students who do not have all of the courses listed but who have a good academic record will be considered for admission to the program. Deficiencies may be made up after matriculation.

REQUIREMENTS FOR ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE

Completion of any deficient admission requirements.

MINIMUM REQUIREMENTS FOR THE DEGREE OF MASTER OF SCIENCE

Thirty hours of graduate level credit including Cell Biology 301 and one course in each of the following areas: genetics, biochemistry (one year), and cell physiology; cell biology seminar each semester; thesis research.

REQUIREMENTS FOR ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF DOCTOR OF PHILOSOPHY

Minimum of one semester of Physical Chemistry, equivalent to Chemistry 160. Completion of any deficient admission requirements.

MINIMUM REQUIREMENTS FOR THE DEGREE OF DOCTOR OF PHILOSOPHY

Cell Biology 301, one course in each of the three following areas: genetics, biochemistry (one year), and cell physiology; a minimum of 20 additional hours of course work. Studies Committee will advise course selection. Dissertation research, minimum 20 credits. Regular participation in seminar program.

COURSES OFFERED

252 Molecular Genetics II. See Botany 252.
295 Special Topics. Credit as arranged.
301 Cell Biology. See Botany 301.
381 Seminar. One hour. Staff.
391 Master's Thesis Research. Credit as arranged.
491 Doctoral Dissertation Research. Credit as arranged.

CHEMISTRY (CHEM)

Professors Allen, Bushweller (Chairperson), Flanagan, Geiger, Krupcho, Kuehne, Strauss, White, Wulff; Associate Professor Weltin; Assistant Professors Carrano, Goldberg, Hubbard, Leenstra.

Current research in organic chemistry includes dynamic NMR studies of intramolecular stereodynamics, syntheses of medicinally valuable natural products, isolation and structure determination of natural products, studies of the stereochemistry of C-alkylation of a-amions, decarboxylation of geminal diesters, biomimetic syntheses, preparation of benzosomorphans and their analogues which have chemotherapeutic potential, and mechanistic studies of organic chemical reactions.

Physical chemistry research projects include hydrogen absorption by metals, alloys and intermetallic compounds with a view toward storage of hydrogen as a fuel, theoretical studies of the electronic structure of chemical bonds in small molecules using ab initio variation calculations, chemical thermodynamics, statistical mechanical modeling of chemical systems, and optically detected magnetic resonance studies of porphyrins and related compounds.

Research in inorganic chemistry includes investigations of the syntheses, structure, and spectroscopic properties of main-group ring systems and polymers with an emphasis on phosphazenes and sulfur nitrides, electrochemical control of the structure and reactivity of transition metal complexes, studies of the roles of metal ions in the modification and/or control of properties of proteins and other biologically important molecules, and dynamic NMR studies of the stereodynamics of various metal-phosphine complexes.

Research in analytical chemistry includes electrochemical studies of transition metal complexes and organometallic complexes, electron spin resonance studies of materials in unusual oxidation states, novel reactions of reactive compounds generated electrochemically under high vacuum, studies of factors influencing heterogeneous electron transfer processes in non-aqueous media, studies of transient, imploding plasmas as solid sample atomizers for atomic spectroscopy, and the development of instrumentation and techniques suitable for the direct localized and bulk trace elemental analysis of non-conducting solid samples via atomic spectrometry.

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF MASTER OF SCIENCE FOR TEACHERS (PHYSICAL SCIENCES)

An undergraduate major in an appropriate field. Satisfactory scores on the general (aptitude) Graduate Record Examination. Completion of at least one full year of teaching.

REQUIREMENTS FOR ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE FOR TEACHERS (PHYSICAL SCIENCES)

Successful completion of Physics 128, Chemistry 141 and 162, and Mathematics 121, or their equivalents. (These courses may have been taken at the undergraduate level, as part of this graduate program, or credit may be obtained by transfer or examination.)

A program is also offered leading to the degree of Master of Arts in Teaching (see page 25).

MINIMUM REQUIREMENTS FOR THE DEGREE OF MASTER OF SCIENCE FOR TEACHERS (PHYSICAL SCIENCES)

The above prerequisites for admission to candidacy must be
supplemented by: (1) Completion of 30 hours of credit, of
which at least 18 must be in Physical Sciences Option (A) or
(B) as described below. The remaining 12 credits may be
chosen, with the consent of the Joint Advisory Committee,
from appropriate courses above 100 in science, engineering,
mathematics, and education (credit in education courses is
limited to six semester hours); (2) Successful completion of
a comprehensive examination administered by the Joint
Advisory Committee.

Physical Sciences Option (A): Nine semester hours of
Physics numbered 128 and above, Chemistry 231 and six
semester hours of Chemistry chosen from Chemistry 163,
232, 201, 264 and 241. This option is primarily for teachers
of chemistry.

Physical Sciences Option (B): Nine semester hours of
Chemistry numbered 141 and above and nine hours of
Physics in courses numbered above 200. This option is
primarily for teachers of physics.

REQUIREMENTS FOR ADMISSION TO GRADUATE
STUDIES FOR THE DEGREE OF MASTER OF SCIENCE

An undergraduate major in an appropriate field. Satisfac-
tory scores on the Graduate Record Examination general
(aptitude) section for those requesting financial assistance.

REQUIREMENTS FOR ADVANCEMENT
TO CANDIDACY FOR THE DEGREE OF
MASTER OF SCIENCE

The requirements for admission to candidacy for the
Master of Science degree are: (1) proficiency in four areas
of chemistry evidenced by the biannual qualifying examina-
tions or completion of designated courses at this university;
(2) one semester of residence; (3) at least 15 hours of formal
course work including (a) six hours of graduate-level
courses in the chemical field of specialization, (b) three
hours of graduate-level chemistry courses not in the area
of concentration, (c) Chemistry 386 (only for those electing
Plan A), (d) Chemistry 381 (Seminar), and (e) Chemistry
231; and (4) maintenance of an overall point-hour ratio of
3.00. Students studying in the Master of Science degree pro-
gram are advised to take the cumulative examinations in
their specialty.

MINIMUM REQUIREMENTS FOR
THE DEGREE OF MASTER OF SCIENCE

The above prerequisites for admission to candidacy must be
supplemented in either of the following two ways:
Plan A: Completion of 12 hours of Masters Thesis
Research (Chemistry 391) and submission of a satis-
factory thesis; (2) completion of at least 30 hours of
graduate credit (courses and Masters Thesis Re-
search); and (3) two additional hours of Chemistry
381 (Seminar).

Plan B: Completion of six hours of Independent Literature
Research Project (Chemistry 395); (2) completion
of at least 30 hours of graduate credit (courses and
Literature Research Project); and (3) two additional-
hours of Chemistry 381 (Seminar).

M.S. students should decide at the beginning of their pro-
gram whether they will pursue Option A or Option B and
inform the Department and Graduate College of their
decisions.

A reading knowledge of German is also expected.

REQUIREMENTS FOR ADMISSION TO GRADUATE
STUDIES FOR THE DEGREE OF
DOCTOR OF PHILOSOPHY

An undergraduate major in an appropriate field. Satisfac-
tory scores on the Graduate Record Examination general
(aptitude) section for those requesting financial assistance.

REQUIREMENTS FOR ADVANCEMENT
TO CANDIDACY FOR THE DEGREE OF
DOCTOR OF PHILOSOPHY

It is expected that a student will ordinarily complete the fol-
lowing requirements for admission to candidacy by the end
of the second year of residence: (1) at least 15 hours of
research (Chemistry 491); (2) satisfactory performance in
the cumulative examinations in his or her specialty field;
(3) demonstration of basic competence in four fields of
chemistry (analytical, inorganic, organic, and physical)
through the biannual qualifying examinations or comple-
tion of prescribed courses at the University of Vermont;
(4) three hours of teaching; (5) one year of residence;
(6) the following courses are required: Chemistry 386 and
381 (four credits), three semester hours credit of advanced
level work in three of the four areas of chemistry (analyti-
cal, inorganic, organic, and physical). The remainder of
each student’s program will be determined by a departmental
studies committee on the basis of qualifying examination
performance, background, and research interests. In the
normal course of events a student should expect to devote
much of the first year to formal course work; (7) mainte-
nance of an overall point-hour ratio of 3.25.

MINIMUM REQUIREMENTS FOR THE
DEGREE OF DOCTOR OF PHILOSOPHY

In addition to the above requirements a student must:
(1) complete a doctoral research project, write an accept-
able dissertation, and defend it; (2) present a total of 75
hours of credit in course work and dissertation research,
and (3) make an oral and written presentation of an ori-
ginal research proposal, Chemistry 388 (at least six months
prior to the submission of the dissertation). The student
must also demonstrate a reading knowledge of scientific
German and of either French, Russian, or computer
programming.

COURSES OFFERED

201 Advanced Chemistry Laboratory (2-6). Lectures em-
phasize analytical instrumentation. Lab involves analytical,
physical, and synthetic techniques. Prerequisites: 146,
credit for or concurrent enrollment in 162 or 163. Four
hours.

202 Advanced Chemistry Laboratory (1-8). Laboratory
and discussion only. Problems require modern analytical,
physical, and synthetic techniques. Prerequisite: 146, credit
for or concurrent enrollment in 162 or 163. Note: Although
it is highly recommended that 201 be taken before 202, in
special cases this may not be necessary. Four hours.

211 Chemical Kinetics and Mechanism. Important as-
pects, applications of chemical kinetics. Theoretical,
mathematical aspects covered at introductory level. Em-
phasis: interpretation of experimental rate laws in terms of
mechanistic hypotheses for selected reactions. Prerequi-
sites: 142, 162, 163. Three hours. White.

214 Polymer Chemistry. Polymer size and weight distri-
butions. Synthesis and properties of organic and inorganic
polymers. Kinetics of polymerization. Polymer characteri-
zation. Polymer formulation. Prerequisites: 144, 162. Three
hours. Allen.

221 Advanced Analytical Chemistry. A systematic survey
of modern methods of chemical analysis. Principles and ap-

227, 228. Special Topics in Analytical Chemistry. Selected topics of current interest in the area of analytical chemistry, New techniques and methodologies, especially in chemical instrumentation. Credit as arranged. Geiger, Goldberg.

231. Inorganic Chemistry. Fundamental concepts, facts of inorganic systems. Molecular symmetry, models for structure, bonding, acid-base chemistry, descriptive chemistry of ionic, covalent compounds, introductory crystal field theory, reaction mechanisms. Prerequisite: 162. Three hours. Allen, Carrano, Hubbard.

232. Advanced Inorganic Chemistry. Selected topics include applications of group theory to vibrational spectroscopy and electronic structure, multiple bonding in main group and transition metal compounds, electron deficient bonding, bioinorganic chemistry. Prerequisite: 231. Three hours. Allen, Carrano, Hubbard.

236. Physical Inorganic Chemistry. Fundamental physical basis for spectroscopic techniques, other observable phenomena important to inorganic chemistry. Topics: ligand field theory, magnetism, magnetic resonance, Mossbauer spectroscopy, optical activity. Prerequisites: 163, 232. Three hours. Allen, Hubbard.

237, 238. Special Topics in Inorganic Chemistry. Advanced theoretical treatment of bonding and of physical properties of transition metal complexes; detailed treatment of inorganic reaction mechanisms. Credit as arranged. Allen, Carrano, Hubbard.

241. Advanced Organic Chemistry. Stereochemistry, reaction criteria, reaction mechanisms and synthetic methods are stressed. Reactive intermediates such as carbanions, carbocations, carbenes, and free radicals are used to systematize mechanistic discussions. Prerequisites: 142, 162. Three hours. Krapcho, Kuehne, Strauss, White.

242. Advanced Organic Chemistry. Mechanistic considerations of reactions which include enolates, additions (such as cycloadditions, hydroboration, etc.), annulations, oxidations, rearrangements, eliminations, and approaches to multistep syntheses. Prerequisites: 241. Three hours. Krapcho, Kuehne, Strauss.

257, 258. Special Topics in Organic Chemistry. Advanced level discussion of specific topics in organic chemistry of current interest such as photochemistry, carbenes, bioorganic chemistry, magnetic resonance, etc. Credit as arranged. Bushweller, Krapcho, Kuehne, Strauss, White.

263. Introduction to Quantum Mechanics. General consideration of quantum mechanics. Development of techniques pertinent to the application of quantum mechanics to chemical problems. Prerequisites: 162, 163. Three hours. Weltin.

267, 268. Special Topics in Physical Chemistry. Advanced level discussion of specific topics in physical chemistry and chemical physics; group theory, solid state theory; irreversible thermodynamics, solution theory. Credit as arranged. Flanagan, Leenstra, Weltin.

285, 286. Special Topics. Selected topics of an interdisciplinary nature, designed particularly for advanced undergraduate chemistry majors. Possible subjects include environmental chemistry, chemical technology, chemical economics. Offered as occasions arise. Variable credit.

342. Natural Products — The Alkaloids. The major classes of alkaloids surveyed from a biogenetic point of view. Classical and modern degradation methods, total syntheses and biosynthetic incorporation of labeled compounds. Prerequisite: Credit or concurrent enrollment in 242. Three hours. Alternate years. Kuehne.

344. Natural Products — The Terpenes. The chemistry of mono, sesqui, di and triterpenes, including degradations, structure proofs, total syntheses, rearrangement reactions and biogenesis. Prerequisite: Credit or concurrent enrollment in 242. Three hours. Alternate years. Kuehne.

363. Quantum Chemistry. Applications of quantum mechanical techniques to problems of chemical interest. Prerequisite: 263. Three hours. Offered as occasion warrants. Weltin.

386. Methods of Chemical Investigation. Introduction to advanced modern chemical methods. Prerequisite: Permission of department. Two hours.

388. Research Problem Conception and Solution. Independent origin of research problems and the methods of their solution. Required of all doctoral candidates. Prerequisite: Permission of department. This course shall be completed at least six months in advance of the Ph.D. dissertation defense, and in no case later than the end of the seventh semester of graduate studies at UVM. One hour.
Independent Literature Research Project. Reading and literature research culminating in the preparation of a comprehensive and critical review of a topic of current interest in chemistry. Credit as arranged.

Master's Thesis Research. Credit as arranged.

Doctoral Dissertation Research. Credit as arranged.

CIVIL ENGINEERING (CE)

Professors Cassell, Dawson, Hermane (Chairperson), Oppenlander; Associate Professors Downer, Hemenway, Lalonde, Olson; Assistant Professor Morris; Adjunct Professor Knight.

The Department of Civil Engineering is presently conducting research in environmental engineering, structures, transportation, and urban planning.

Requirements for Admission to Graduate Studies for the Degree of Master of Science

A bachelor's degree and the approval of this Department. Satisfactory scores on the Graduate Record Examination general (aptitude) section.

Requirements for Advancement to Candidacy for the Degree of Master of Science

Specific course work may be required of those who lack a strong science background.

Minimum Degree Requirements

The above prerequisites for acceptance to candidacy must be supplemented in either of the two following ways.

Plan A: Completion of advanced courses in civil engineering, mathematics, other approved courses and six to nine hours of thesis research for a total of 30 hours.

Plan B: Completion of 30 credit hours of advanced courses in civil engineering, mathematics, and other approved courses in lieu of the thesis.

Students should decide which option they intend to pursue at the beginning of their program.

Recommended Core Courses

It is recommended that the student's plan of study include one course in each of the following areas: advanced statistics, engineering economics, systems engineering, and computer-based numerical methods.

Courses Offered

210 Airphoto Interpretation. Aerial photographic interpretation; principles of stereoscopic viewing, identification of airphoto features related to landform, vegetation, drainage, soils, topography; use of airphoto interpretation in soil identification. Three hours. Olson.

226 Civil Engineering Systems Analysis. Graph theory, dynamic programming, linear programming, scheduling, resource allocation, simulation; applications to public works problems; comparison of solution models and selection of models for complex problems. Three hours. Dawson.

227 Discrete Simulation. Discrete simulation using monte-carlo techniques and the GPSS simulation proces-
libria, reaction kinetics, acids and bases, colloids, enzymes, bacterial physiology, pollution indicator organisms. Prerequisites: Senior standing or permission of the instructor. Four hours. Davison, Cilleland, Schlunk; Assistant Professor B.S. Rodgers; Visiting Professor R.H. Rodgers.

255 Water Renovation Processes — Chemical/Physical. Design theory of chemical/physical processes for treating waters and wastewaters; mass transfer, coagulation/precipitation, sedimentation, filtration, mixing, absorption, ion exchange, and membrane processes; and pilot plant experimentation. Prerequisites: 150, 151 or graduate standing. Three hours.

256 Water Renovation Processes — Biological. Design theory of biological processes for treating waters and wastewaters; aerobic, anaerobic, photosynthetic processes; disinfection; and pilot plant experimentation. Prerequisite: 150, 151 or graduate standing. Three hours.

257 Analysis of Aquatic Systems. Quantitative study of biological, chemical and physical phenomena in lakes, streams and estuaries; and mathematical modeling applied to management of water quality. Prerequisites: 160 and 161. Three hours.

258 Environmental Facilities Design — Air. Advanced design principles for air pollution control equipment including scrubbers, precipitators, cyclones, and filter. Prerequisites: 150 and 252 or 253. Three hours. Hemenway.

259 Measurement of Airborne Contaminants. Quantifying airborne contaminants from processes and ambient levels. Laboratories demonstrate calibration and measurement, stack sampling, and ambient air monitoring of specific contaminants. Prerequisite: 252 or 253. Three hours. Hemenway.

260 Hydrology. The basic theory of precipitation, runoff, infiltration, and ground water; precipitation and runoff data; and application of data for use in development of water resources. Prerequisite: 160 or Statistics 141. Three hours. Downer.

261 Open Channel Flow. Application of basic laws of fluid mechanics to flow in open channels; channel design, transition structures; riprap, culverts; gradually-varied flow problems including flood plain, floodway studies. Prerequisite: 160. Three hours. Downer.

263 Measurements in Applied Hydrology. Hydrologic experimental design; observational methods, equipment, problems in data reduction and handling techniques; application to instrumentation and study of the hydrology of a small watershed. Prerequisite: 160 or 260. Three hours. Downer.

265 Groundwater Hydrology. Principles of groundwater hydrodraulics, well characteristics, aquifers; and use of numerical methods to solve groundwater flow problems. Prerequisites: Math 121 or equivalent and programming experience or permission of instructor, graduate standing or senior CE standing. Olson.

270 Advanced Indeterminate Structures. Matrix analysis of framed structures; finite element theory and application in structural mechanics and hydrodynamics; emphasis on computer applications and numerical analysis techniques. Prerequisites: 171 and a basic knowledge of matrix algebra and computer programming. Three hours. Laible.

271 Prestressed Concrete Structures. Ultimate strength theory, emphasis on prestress effects; prestressed beam analysis, load balancing, column and pile design, bent analysis, yieldline theory, circular prestressing in domes, tanks; current design specifications. Prerequisite: 173. Three hours. Staff.

282 Engineering Properties of Soils. Study of soil properties influencing engineering behavior of soils; soil mineralogy, physiochemical concepts, plasticity properties, permeability, and compaction; laboratory study of soil index properties, permeability, compaction tests. Prerequisite: 180. Three hours. Olson.

290 Engineering Investigation. Independent investigation of a special topic under the guidance of a staff member. Preparation of an engineering report is required. Three hours.

333 Advanced Regional Planning. See Resource Economics 333.

360 Advanced Hydrology. Application of statistics to engineering hydrology; concept, use of instantaneous unit hydrograph; study of run-off models; flow through porous media; design techniques for water resources projects. Prerequisites: 260, Mathematics 271. Three hours. Offered as occasion warrants. Downer.

390 Advanced Topics in Civil Engineering. Special topics to intensify the programs of graduate students in civil engineering. Hours and credits to be arranged.

391 Master's Thesis Research. Credit as arranged.

CLASSICS (CLAS)

Emeritus Professors Bliss, Kidder; Professors Ambrose (Chairperson), Davison, Gilleland, Schlunk; Assistant Professor B.S. Rodgers; Visiting Professor R.H. Rodgers.

Current research interests include Early Greek Literature; the Attic orators; Greek Drama; archaeology; philosophy; Mycenaean and Homeric Greece; Cicero's rhetorical works; Vergil; lyric and elegiac poetry; Petronius; satire; Roman Imperial Families; Mythology; Etruscology; Medieval Studies.

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF MASTER OF ARTS

An undergraduate major or minor or the equivalent; a reading knowledge of French or German.

MINIMUM DEGREE REQUIREMENTS

Eighteen hours of advanced courses in Greek and Latin, six hours of which must be 381; six additional hours in Greek and Latin, History or Philosophy; thesis research (normally six hours). Comprehensive examinations in Greek and Latin translation, Greek and Roman history, and literature and philology are required. In addition to course work, students will have a reading list of authors in Greek and Latin.

Those who expect the department's recommendations to go on for a Ph.D. elsewhere must show competence in both German and French by the end of their first year of graduate study.

A program is also offered leading to the degree of Master of Arts in Teaching (see page 25). Satisfactory scores on the general (aptitude) Graduate Record Examination are prerequisite for acceptance to candidacy for this degree.
COURSES OFFERED

GREEK (GRK)

201 Greek Orators. Selected speeches of Lysias and Demosthenes. Three hours. B.S. Rodgers. Alternate years.

202 Greek Comedy. Two plays of Aristophanes. Three hours. Ambrose. Alternate years.

203 Greek Historians. Thucydides, Books I and II; selections from Herodotus and Xenophon's Hellenica. Three hours. Davison. Alternate years.

204 Greek Tragedy. Sophocles, Antigone, and Euripides, Medea, or two equivalent plays. Three hours. Ambrose. Alternate years.

206 Greek Epic. Reading in the Iliad and Odyssey. Problems of epic composition and language together with mythological and historical background. Three hours. Schlunk. Alternate years.

LATIN (LAT)

203 Republican Prose. Extensive reading in Caesar and Sallust, and in the speeches of Cicero. Three hours. B.S. Rodgers.

204 Epic Poets. Extensive reading in Lucretius, Vergil, Ovid, and others. Three hours. Ambrose, Schlunk.

227 Roman Lyric Poets. Selections from the works of Catullus, Horace, Propertius, Tibullus. Three hours. Alternate years.

252 Comedy. Two plays of Plautus and Terence. Study of the precursors of this literary form. Three hours. Ambrose. Alternate years.

253 Roman Oratory. Selections from Cicero's De Oratore, Orator, Brutus, and from his speeches. Historical development of forensic and other rhetorical canons. Three hours. Gilleland. Alternate years.

255 Historians of the Empire. Augustus, Res Gestae; Tacitus, Annals; books I-IV; selections from Suetonius and Ammianus Marcellinus. Three hours. Davison. Alternate years.

271 Silver Latin. Extensive reading of post-Augustan authors not included in other advanced courses. Three hours, R. H. Rodgers and Gilleland. Alternate years when offered.

COMMUNICATION SCIENCE AND DISORDERS (CS&D)

Professor Wilson: Associate Professor Guitar; Assistant Professor Kramer; Lecturers Houghton, Turnbaugh. Staff: Freyn Daruvala, M.A., (CCC-SP), Dinah K. Smith, M.A. (CCC-A).

The faculty does research in language development and disorders, articulation processes and disorders, fluency disorders, speech physiology and perception, biofeedback, and hearing disorders.

The Master of Science degree program in Communication Science and Disorders is accredited for speech-language pathology by the Education and Training Board of the American Speech-Language-Hearing Association (ASHA). The Eleanor M. Luse Center for Communication Disorders, which shares quarters with the Department and is a primary practicum site, holds accreditation from the Professional Services Board of ASHA in both Speech Pathology and Audiology. Students are required to fulfill academic requirements for the Certificate of Clinical Competence of the American Speech-Language-Hearing Association. Students may concentrate in either Speech-Language Pathology or Audiology. All students are supervised by clinically certified members of the faculty and staff of the E.M. Luse Center.

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF MASTER OF SCIENCE

Baccalaureate degree from an accredited institution; satisfactory performance on the general (aptitude) Graduate Record Examination. Completion of courses equivalent to CS&D 80, 90, 101, 104, a course in statistics, a course in child psychology. These courses must be completed prior to enrollment in graduate courses.

REQUIREMENTS FOR ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE

Satisfactory completion of the written comprehensive examinations. Students will not be admitted to candidacy if practicum grades are incomplete.

MINIMUM DEGREE REQUIREMENTS

Thesis Option

The student will complete 30 hours of graduate level courses and six additional credits for conducting the research leading to an M.S. thesis. All research-oriented students will be encouraged to pursue this option.

Non-Thesis Option

The student will complete 36 hours of graduate level coursework for Speech-Language Pathology, these include at least 21 credits in Speech-Language Pathology, six credits in Audiology, and three or more credits in Clinic Study. For Audiology, 21 credits in Audiology, six credits in Speech-Language Pathology, and three or more credits in Clinic Study. In lieu of the thesis, students will enroll in two additional courses in communication disorders: (1) a course in research methods which will require the completion of a research project and (2) three credits of Clinical Study (CS&D 291-292), as a part of which students are required to give a diagnostic and/or therapeutic presentation which will be critiqued by the faculty as a whole.

COURSES OFFERED

251 Disorders of Speech. In-depth survey of speech disorders: articulation, fluency, voice, etc., including those with functional as well as organic etiology will be considered. Includes one hour clinic laboratory. Prerequisite: CS&D 104. Four hours.

261 Disorders of Language. In-depth survey of language disorders including aspects in reception and expressive use of the language. Includes one hour clinic laboratory as in CS&D 251. Prerequisite: CS&D 251. Four hours.

262 Measurement and Management of Communication Disorders. Study of the construction, application, interpretation, and implementation of tests of communicative functioning. Prerequisite: CS&D 251. Three hours.
271 Audiological Assessment. Examination of basic parameters in measurement of hearing. Pure tone testing, masking, impedance, and speech evaluations. Prerequisite: CS&D 103 or permission of instructor. Three hours. Kramer.

272 Auditory Habilitation of Hearing Impaired Children. Survey of the handicapping effect of hearing disorders on the developing child and the principles of rehabilitation utilized for treatment of this disorder. Prerequisites: Fifteen credits in CS&D, including CS&D 104, 271. Three hours. Houghton.

281 Neuroanatomical Basis of Speech and Hearing. The neuroanatomical structures which underlie the formulation, production, and perception of speech are examined and related to language and speech behavior. Prerequisites: Nine credits in CS&D at the 200 level. Three hours.

287 Current Research in Normal and Disordered Language Acquisition. Recent advances in the study of child language. Prerequisites: CS&D 104. Three hours.

290 Introduction to Research in Communication Science and Disorders. Study of hypothesis formation, review of research literature, and current research topics in communication science. Research project required. Prerequisites: At least six credits in CSD at the 200 level. Three hours. (Not offered for graduate credit.) Guitar.

291, 292 Clinical Study. Supervised practicum experiences with children and adults presenting disorders of speech, hearing, and language. Prerequisites: CS&D 261, 262. Credit as arranged.

293, 294 Seminar. Prerequisite: Permission of instructor. Variable credit.

371 Hearing Aids and Amplification. Types, characteristics, and methods of hearing aid selection and fitting; acoustics of earmolds; laws and consumer issues. Prerequisite: Graduate standing and instructor’s permission. Three hours. Kramer.

372 Pathologies of the Auditory System. Disease, malformations, and lesions affecting the hearing mechanism. Learning to recognize, through case history, observation and clinical evaluation, the causes of hearing loss. Prerequisites: Graduate standing, instructor’s permission and CS&D 80 (or equivalent). Three hours. Kramer.

373 Pediatric Audiology. Methods and techniques for hearing evaluations in children. The audiologist in the school system. Prerequisite: CS&D 103, graduate standing, and instructor’s permission. Three hours. Kramer.

381, 382 Advanced Readings. Readings, with conferences, intended to contribute to the programs of graduate students in phases of communication science and disorders for which formal courses are not available. Credit as arranged, up to three hours each semester.

383 Seminar in Speech Pathology. An intensive study of selected topics in speech and pathology. Prerequisite: CS&D 251. Three hours.

384 Articulation Disorders. Etiology, diagnosis, pathology, and habilitation and rehabilitation of articulation of speech. Prerequisite: CS&D 251, (or equivalent). Three hours.

385 Voice Disorders. Study of normal and abnormal laryngeal anatomy and physiology as they relate to diagnoses and treatment of a wide variety of vocal pathologies. Prerequisite: 251. Three hours.

386 Neuromotor Disorders. Etiology, pathology, diagnosis, and principles of habilitation of cerebral palsy and other CNS pathologies. Emphasis on disorders of oral communication and associated disorders. Prerequisite: CS&D 101, 251 (or equivalent).

387 Seminar in Language Disorders. Identification, evaluation, and rehabilitation procedures for children with language disabilities. Prerequisite: CS&D 104. Three hours.

388 Seminar in Stuttering. Study of adult and child fluency disorders which focuses upon symptomatology, etiology, diagnosis, and rehabilitation of stuttering patients. Prerequisite: 104. Three hours. Guitar.

389 Seminar in Aphasia in Adults. Study of the symbolic and communicative disorders in aphasic adult patients. Rehabilitation strategies, principles, and procedures are presented. Prerequisite: 251. Three hours. Staff.

390 Advanced Audiology. Audiological procedures: site of lesion testing, electrical response testing, impedence, adaptation, recruitment, and special speech tests. Prerequisite: Permission of Instructor and CS&D 271 (or equivalent). Three credits. Kramer.

391 Master’s Thesis Research. Credit as arranged.

COMPUTER SCIENCE (CS)

Professors Absher, Dawson; Associate Professor Hegner; Assistant Professors Hartley, Margolis, Train; Lecturers Heinrich, Hill.

Research activities in Computer Science encompass a broad range of topics including formal language theory, operating systems, simulation, architecture, networking, artificial intelligence, and performance evaluation.

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF MASTER OF SCIENCE

Bachelor’s degree from an accredited institution. Satisfactory scores on the general (aptitude) portion of the Graduate Record Examination. Mathematics 21, 22, 124 or the equivalent; Computer Science 11, 12, 101 or the equivalent.

REQUIREMENTS FOR ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE

Mathematics 104; Computer Science 102, 103, 104, or their equivalent.

MINIMUM DEGREE REQUIREMENTS

Thirty semester hours of acceptable graduate credit. Thesis is optional. Students must take or have completed the equivalent of Computer Science 201, 203, 222, 224, and 243, and must take at least 15 credit hours in 300-level Computer Science courses. Up to nine hours from an area of minor concentration may be used to fulfill degree requirements. A comprehensive examination is required.

COURSES OFFERED

200 Discrete Simulation. See Civil Engineering 227. No CS graduate credit.

202 Compiler Construction (3-0). Organization of a compiler including compile and run time symbol tables, lexical scan, syntax scan and object code generation. Prerequisite: 104. Three hours.

230 Introduction to Formal Language Theory (3-0). (Same as Math 223.) Introduction to theory and applications of context-free languages. Phrase structure and context-free grammars, normal forms, pushdown automata, decision problems, power series in non-commuting variable, applications to parsing. Prerequisites: Math 104, CS 243 highly recommended. Three hours.

224 Analysis of Algorithms (3-0). (Same as Math 224.) Introduction to both analytical and experimental techniques in algorithm analysis. Basic algorithm design strategies. Introduction to complexity theory. Prerequisite: 104, Math 102 or 104, 121, and 124. Three hours.

295 Special Topics in Computer Sciences. Lectures, reports, and directed readings on advanced topics. Prerequisite: Permission of instructor. Three hours.

321 Advanced Computer Architecture (3-0). Study of advances in computer architecture. Topics may include: distributed and multi-processor systems, array and vector processors, data driven architecture, memory hierarchies, and management schemes. Prerequisite: 201. Three hours. Train, Hartley.

322 Computer Networks (3-0). Introduction to network terminology and classification methods. Topics will include switching techniques, wide area networks, network services, standards and local area networks. Prerequisite: 201. Three hours. Train, Hartley.

331 Database Management Systems (3-0). Introduction to the design and implementation of modern database management systems. Data models, query languages, concurrency control, and crash recovery. Prerequisites: 201, 203, 243. Three hours. Hegner.

361 Advanced Operating Systems (3-0). Topics covered will generally be chosen from one or more of the following areas: detailed case studies, distributed systems, real-time systems, object-oriented systems, and security. Prerequisites: 201, 243. Three hours. Hartley, Train.

391 Master's Thesis Research. Credit as arranged.

394 Independent Study. Independent readings and investigation under the direction of a faculty member. Prerequisite: Consent of instructor. Credit as arranged (three to six hours).

395 Advanced Topics in Computer Science (3-0). Subject will vary from year to year. May be repeated for credit. Prerequisite: Consent of instructor. Three hours.

EDUCATION

Professors Abruscato, Agne, Boller, Carlson, Clements, Conrad, Couard, Ducharme, Fox, Gobin, Grams, Hanley, Hunt, Leggett, McKenzie, Nash, Peterson, Kippa, Shimana, Tescon; Associate Professors Barbour, Barrell, Erb, Fitzgerald, Goldhaber, Griffin, Hasazi, Johnston, Lang, Larson, Letteri, Myers, Nerin, B. Nichols, PaoIucci-Whitcomb, Pierce, Ponzo, Rathbone, E. Rathbone-McCuan, Sandoval, Shelton, Thompson, Williams, Young; Assistant Professors Bright, Chase, Cheney, Clarke, DeWeaver, Holmes, Hood, Jameson, McEntee, O'Donnell, Roberts, Rose, Smith, Stevenson; Visiting Associate Professor Carmichael; Lecturers, Burdett, Christie, Geller, Salenbier, Watson, Wood; Extension Associate Professor E. Nichols.

The College of Education and Social Services offers numerous opportunities for graduate study in preparation for special competencies in a variety of fields which include practica, research problems, and in-service relationships with cooperating school systems and social service agencies. The programs in various areas of specialization are described below.

Satisfactory performance on the general (aptitude) section (verbal and quantitative) of the Graduate Record Examination is required for admission to the Graduate College for students pursuing the degrees of Master of Education, Master of Science, and Doctor of Education.
THE DOCTOR OF EDUCATION
IN EDUCATIONAL ADMINISTRATION

A Doctor of Education (Ed.D.) degree is offered in Educational Administration. This is an applied research based program for professionals serving in educational management positions in schools and school-related organizations; e.g. state departments of education, professional associations, higher education, and human service agencies.

Program emphases include: the design and implementation of educational research; adaptation of theoretical constructs and models to educational settings with attention to small systems; knowledge and skills in inter-organizational relationships; theory and research; conflict and resource management; budget planning and policy studies; and program and personnel evaluation.

This program has been designed to respond to the expanding demands placed on educational administrators in educational and human service organizations where they are increasingly expected to design and supervise local research and varied evaluative studies; interpret and apply recent national research findings; analyze and apply governmental regulations and court decisions; develop organizational responses to emerging social expectations; organize and lead staff development programs; understand and apply broad based economic principles and social and fiscal policy; develop and manage budgets; assess and respond to the psychological needs of educational consumers; employ effective interpersonal management and decision-making skills.

Prerequisites for admission and degree requirements are given on page 26.

The core courses required for first year students, EDAP 409, 432, 437 and EDFS 455, are described on page 59 and 63. Courses in Administration and Planning begin on page 62.

Detailed information on the course of study is available from Acting Program Director, Aubrey Pearre Johnston, Professor, Department of Organizational, Counseling, and Foundational Studies (1984-85); Program Director, Robert V. Carlson, Professor, Department of Organizational, Counseling, and Foundational Studies (1985-86).

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF MASTER OF EDUCATION

Satisfactory scores on the general (aptitude) portion of the Graduate Record Examination.

REQUIREMENTS FOR ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF MASTER OF EDUCATION

Eighteen hours of Education and related areas or appropriate professional certification. The Education course prerequisites may not apply to the student personnel services in higher education, administration and planning, or interdisciplinary major programs in OHRD. This is particularly true of persons seeking positions which do not require public school certification.

MINIMUM DEGREE REQUIREMENTS

Eighteen hours in courses in Education numbered above 200, including a minimum of six graduate hours in the foundations of education, 12 additional hours in approved courses or six additional hours and thesis research; a year of successful experience in teaching or in a related educational activity.

DEPARTMENTS

I. Professional Education and Curriculum Development

In the event of restrictions on enrollment, preference will be given to Vermont residents holding professional positions in education and social services.

Curriculum and Instruction This master's program is designed to develop leadership in such educational settings as teaching, curriculum theory, curriculum development, and related areas of research for elementary and secondary public and private school settings. The program is also appropriate for those with teaching roles in human services agencies.

Programs are developed to provide a comprehensive background in fields basic to instruction and curriculum development as well as the application of that knowledge to a specialized field. They include courses aimed at the examination and improvement of instructional practices in elementary and secondary schools, and understanding of curriculum theory and the application of curriculum theory to instruction and curriculum development. Opportunities for independent study and research are encouraged in the specializations represented in the course offerings of the Department of Professional Education and Curriculum Development.

As in the education of teachers enrolled for pre-service degrees, work at the graduate level also draws upon other divisions of the University, thus enabling the College to develop strong programs of professional education which include academic offerings in the various teaching fields in elementary and secondary education.

Degree concentrations, in addition to those listed below, can be developed on an interdisciplinary basis responding to student strengths and needs.

Courses in teacher education include 211, 217, 218, 225, 227, 228, 241, 242, 244, 248, 256, 257, 259, 270, 271, and 335.

Inquiries regarding these programs should be addressed to the Chairperson.

Within the Curriculum and Instruction Program Area, it is possible to concentrate in school library media. This satisfies the need for the practicing teacher to cope with computer-assisted instruction, programmed learning, tape cassettes, film, and video tape. The individual will pursue a specialization that allows the acquisition of a perspective that broadens that potential use of a school media-lab.

Depending upon the course work selected, the graduate could become certified as an elementary or secondary school librarian. A minimum of 18 hours of study in library and media courses is necessary for a concentration in school library-media education. Minimal, the graduate is conversant with the tools available to the classroom teacher in a school library-media center and the graduate has practical application of those skills.

Inquiries regarding this program should be addressed to Professor Helene Lang.

Reading and Language Arts The purpose of this program area is to prepare teachers and specialists in the field of reading. Classroom teachers, reading specialists or consultants, supervisors and administrators are responsible for developing programs which will enable every student to attain their maximum proficiency in the use of reading and language. To meet this end, several courses have been devised which focus on classroom reading instruction and reading difficulties. Through the Reading Center, students also have opportunities for laboratory experiences as well as for research and study in reading, literature, and language arts.
Courses in reading and language arts include 222, 223, 234, 275, 276, 378, and 379.

Inquiries regarding this program should be addressed to Professor Lyman Hunt.

II. Special Education, Social Work, and Social Services

The Special Education Graduate Program in this Department prepares special education teachers to serve children and youth with mild, moderate, and severe handicapping conditions. The following concentrations are available:

**Intensive Special Education** The Intensive Special Education concentration prepares educators of moderately, severely, and multi-handicapped school age and adult learners. Only certifiable educators or experienced mental retardation service providers are considered. The course sequence consists of 30 credit hours of work, laboratory (practicum) experience, and internship. Courses in Intensive Special Education include: EDSP 217, 228, 301, 302, 310, and 386. A six-credit summer course is followed by a full-time year or a part-time sequence of at least two years.

**Essential Early Education** The Essential Early Education concentration prepares educators of preschool handicapped children. Only certifiable educators or experienced service providers are considered. The course sequence consists of 30 credit hours of work, laboratory (practicum) experience and internship. Courses in Essential Early Education include: EDSP 217, 228, 301, 302, 310, and 386. A six-credit summer course is followed by a full-time year or a part-time sequence of at least two years.

**Elementary and Secondary Special Education** The Elementary and Secondary concentrations prepare Mainstream, Special Class, Resource Teachers, and Vocational Special Needs Educators. Only certifiable educators currently employed as service providers are considered. The course sequence consists of 30 credit hours of course work, laboratory (practicum) experience and internship. Courses include: EDSP 301, 310, 311, 312, 333, 319, and approved electives.

**Adapted Physical Education** The Adapted Physical Education concentration prepares specialists to provide direct instruction and/or consultant services in physical education for mild, moderate, and severely handicapped children. The course sequence consists of 30 to 36 credit hours of course work and laboratory (practicum) experiences. Courses include: EDSP 301, 310, EDPE 241, 260, and approved electives.

In addition, a Certificate of Advanced Study (sixth-year certificate), a 30-hour program beyond the master's degree, is offered with a Consulting Teacher/Learning Specialist concentration (see page 17).

Inquiries regarding the Special Education Graduate Program should be addressed to the Chairperson.

III. Organizational, Counseling, and Foundational Studies

This Department consists of Administration and Planning, Counseling, Student Personnel Services in Higher Education, and Foundational Studies Programs. In addition to the four previously mentioned graduate level programs, a fifth option is available: the Interdisciplinary Major in Organizational and Human Resource Development. Inquiries regarding this program and the specialization listed below should be addressed to the Chairperson.

**Administration and Planning** This program is designed to prepare administrators and planners for public schools, educational and social agencies, and middle management positions in higher education. The M.Ed. program usually requires 30 to 36 credit hours of courses including seminars, practica, and research experiences. The Certificate of Advanced Study (C.A.S.) Program usually requires 30 to 36 credit hours of study beyond the M.Ed. requirements.

Courses with an administration/planning focus include 264, 266, 268, 280, 295, 332, 333, 335, 337, 352, 353, 354, 355, 356, 358, and 386.

**Student Personnel Services in Higher Education** This program assists individuals to work within the broad field of student development in higher education. Graduates serve as administrators, advisors, and counselors in colleges and universities. Their shared mission is the improvement of educational programs, purposes, and services for students; this mission transcends any individual differences among the goals and placements of the graduates of the program.

The program offers a core curriculum enabling all students to gain an understanding of: the purposes and administration of student personnel services; theories and practices of student development; the organization and administration of colleges and universities; and the history and goals of higher education in America.

In addition to this academic core, all students partake in practical experiences which help them to integrate their conceptual knowledge with the real requirements of administration and counseling in higher education. To implement this aspect of the program, a comprehensive array of practical has been developed in offices and departments at the University of Vermont, and at near-by colleges. Students choose those experiences which best meet their needs for professional development.

The core curriculum is augmented by the selection of additional course work that meets the particular needs of students. Students can develop a particular skill area within student personnel service; for example, counseling. Or they can create general programs that enhance their ability to be successful in diverse roles. This opportunity belongs to every student — to build a unique program upon the foundation of the core curriculum.

Courses in the student personnel services program include 200, 295, 360, 362, 383, 385, and 387.

**Foundations of Education** This degree program area is designed to meet the personal-professional needs of the following students: (1) research scholars who wish to undertake protracted and intensive study of education as a disciplined, systematic field of inquiry; (2) in-service teachers and community college educators who are interested in the broad theoretical foundations of education, beyond specific specialization; (3) administrators, school-board members, and community leaders who wish a broad background in the theoretical-practical underpinnings of education; (4) laymen who wish to study broadly the field of education in order to make reasoned and critical judgments about the many educational proposals to which they are constantly exposed; (5) professionals outside the field of education (for example, journalists, writers, clergymen, businessmen) who want a general, multi-disciplinary understanding of education in all of its components; and (6) innovators who are interested in critical, in-depth studies of alternative educational structures (for example, inner-city and rural community schools), and (7) individuals concerned with international education and service to developing countries.

Courses in foundations of education include 204, 205, 206, 209, 252, 255, 302, 303, 314, 354, and EDSS 313 and EDLS 377.
Inquiries regarding this program should be addressed to Professor David A. Shiman.

**Interdisciplinary Major** This degree program is for students who wish to pursue an individually designed, integrated program of study. The program draws primarily from graduate courses in Administration and Planning, Counseling, Student Personnel Services in Higher Education, and Foundational Studies but may include courses from other departments within the College and the University. A minimum of 36 credit hours is required for completion of the program. The program is ideally suited for persons whose personal and professional development requires a combination of course work not readily available in other graduate programs, or for individuals who plan to assume new or emerging roles in the fields of education or social and human services.

Applicants should have a clear understanding of how the Interdisciplinary Program will serve their career goals. For this reason, major emphasis in admission is placed upon the applicant's Statement of Purpose. Applicants are strongly encouraged to contact the Department of Organizational, Counseling, and Foundational Studies, 228 Waterman Building, prior to making application for admission. Detailed information about the program and admissions criteria will be supplied upon request.

**Counseling Program (Master of Science)** This degree program provides preparation for the individual who intends to become a school counselor (program is state-approved for certification in school counseling); a director of pupil personnel services, or a community counselor. The program, which requires 42 to 48 credit hours of course work, covers four broad areas of study: (1) personal growth and development, self-awareness, interpersonal relations, physical and mental health; (2) the foundations and dynamics of human development and behavior; (3) theory and skill for individual, group, and family counseling; (4) administrative and planning concepts and skills as related to guidance, social service, and psychological education programs. Particular emphasis is placed upon the implementation of theory in practice with opportunities provided for student-counselors to work under supervision in schools and community agencies. Program planning is done with the assistance and approval of a faculty advisor. When relevant, the student may take courses from other areas of the University.

Courses in the counseling program include 220, 221, 258, 291, 293, 295, 350, 351, 368, 370, 374, 381, 384, 386, 388, 389, 390, 393, 394, 397.

In addition to the general admissions procedures, a personal or group interview is required for this program. For a more detailed description of the program, contact Professor Zander Ponzo, Department of Organizational, Counseling, and Foundational Studies, 228 Waterman Building.

**COURSES OFFERED**

The College of Education and Social Services offers the following courses on a program basis. Departmental permission is required for enrollment.

**200 Contemporary Issues.** Designed so that its content and structure may accommodate special issues not especially appropriate within the boundaries of an existing course. Prerequisite: Twelve hours in education and related areas. Two to six hours.

**295 Laboratory Experience in Education.** Supervised field work designed to give students experience in specialized areas for their professional development. Prerequisite: Permission of the Coordinator of Professional Laboratory Experience. Credit as arranged.

**319 Internship for Specialized Personnel in Education.** Students will undertake an approved internship in an institution which reflects the particular area of interest and needs of the student. Prerequisite: Permission of instructor. Credit as arranged.

**380 Professional Problems in Education.** Designed to cover selected educational problems in depth. The major emphasis will be on intensive and critical analysis of the literature and practice in a given area. Three hours.

**382 Teaching Internship.** Supervised teaching experiences on a full-time basis, with related seminars in teaching subject. Prerequisite: Permission of coordinator of Professional Laboratory Experiences. Three to eight hours.

**391 Master's Thesis Research.** Thesis topic must be approved by a faculty committee. Credit as arranged.

**397 Problems in Education.** Individual work on a research problem selected by the student in consultation with a staff member. Prerequisites: Twelve hours in education and related areas; endorsement by a sponsoring faculty member. Credit as arranged.

**EDSS — EDUCATION**

**211 Educational Measurements.** The essential principles of measurement in education. Topics include validity, reliability, principles of test construction, item analysis and analysis of standardized tests as they apply to the classroom. Prerequisite: Twelve hours in education and related areas. Three hours.

**238 Teaching for Global Awareness.** Ways of teaching about global issues: peace and prevention of war; social, economic justice; environmental harmony. Development of curriculum materials. Links between local and global concerns. Prerequisite: Twelve hours of education and related areas. Three hours.

**245 Applications of Microcomputers in Elementary and Secondary School Curricula.** For elementary, secondary educators with experience in simple programming. Design of instructional procedures, integrating computers into school curriculum. Use of computer software to teach basic skills, reasoning, thinking skills. Prerequisites: Computer Science 3 or equivalent and permission of instructor. Three hours. Agne, Abruscato, Erb, Watson.

**248 Educational Media.** Modern instructional aids, theory and practice; educational media related to psychology of teaching and learning. Prerequisite: Twelve hours in education and related areas. Three hours.

**313 Statistical Methods in Education and Social Services.** Basic concepts of descriptive and inferential statistics. Topics: frequency distributions; measures of central tendency, dispersion; correlation, hypothesis testing. Application of concepts to educational situations. Three hours.

**321 School Improvement: Theory and Practice.** Analysis of research and practices pertinent to improvement of American schools. Student assignments include synthesis papers and site-specific research projects derived from course studies. Prerequisite: Twelve hours of graduate study in education. Four to six hours. Ducharme, Carlson.

**333 Curriculum Concepts, Planning and Development.** Overview of conceptions of curriculum for elementary and secondary education; examination of contemporary curriculum trends, issues; processes for initiating, planning,
developing curriculum activities and programs. Prerequisite: Twelve hours of education or permission of instructor. Three hours.

336 Professional Writing. Problems in writing faced by professionals in educational and human service settings. Students write reports, critiques, reviews; analyze examples of published work; receive detailed critiques of their work. Three hours.

363 Seminar in the Analysis of Curriculum and Instruction. A case study analysis of the design, implementation, and evaluation of selected curricular and instructional improvements. Prerequisites: Graduate standing, Ed.D. students have priority. Three hours.

349 Quasi-Experimentation in Education and Social Services. Quasi-experimental designs are analyzed, compared, and contrasted with "true experiments." Strategies for addressing threats to the validity of quasi-experiments are studied. Design exemplars are evaluated. Prerequisite: EDSS 313, or Psychology 340, or Statistics 211, or equivalent. Three hours. McKenzie.

EDLS — LEARNING STUDIES

212 Child and Adolescent Psychology. Children and adults as emerging individuals. Impact of socio-cultural ethics, values, institutions on individuals. Topics: human needs, values, self concept, personal freedom, bureaucratic society, cross-cultural issues. Prerequisite: Twelve hours in education and/or related areas. Three hours.

377 Seminar in Educational Psychology. Personal values, attitudes, beliefs related to learning. Psychological research of the teaching-learning process. Research use in analysis of educational processes. Applications for educational settings. Prerequisite: Twelve hours in education and related areas. Three hours.

EDFS — FOUNDATIONS

204 Seminar in Educational History. Selected topics in history of education. Education in democratic and authoritarian social orders. Topics: education of women, black heritage, American higher education in transition. Prerequisite: Twelve hours in education and related areas or permission of the instructor. Three hours.

205 History of American Education. Educational principles and practices in the U.S. as they relate to the main currents of social history. Key ideas of historic and contemporary significance. Prerequisite: Twelve hours in education and related areas or permission of the instructor. Three hours.

206 Comparative Education. Cross-cultural examination of education and selected social services in several countries, e.g., China, U.S.S.R., England. Themes include: ideology, social class, and social change. Prerequisite: Twelve hours in education and related areas. Three hours.

252 Seminar in Aesthetic Education. A critical examination of aesthetic values in contemporary society. The aesthetic quality of natural and built environment with implications for present and future educational practice given special attention. Prerequisite: Twelve hours in education and related areas. Three hours.

255 School as a Social Institution. Examination of the school and related social institutions, focus on themes, including: social class, race, ethnicity, socialization, role of the family, social change. Prerequisite: Twelve hours of education and related areas. Three hours.

302 Philosophy of Education. Critical examination of key beliefs and values in current philosophies of helping, e.g., phenomenological, behavioral, holistic, as practiced in a variety of educational and social service institutions. Prerequisite: Twelve hours in education and related areas. Three hours.

303 The Ethics of Helping Relationships. Clarification of ethical dimensions of professional rights and obligations for educators, counselors, administrators, other helping professionals. Examination of ethical controversies currently facing the helping professions. Prerequisite: Twelve hours in education and related areas. Three hours.

314 Modes of Inquiry. A critical analysis of the various conceptual and methodological foundations of theory and practice in education and the human services. Prerequisites: Twelve hours in education and related areas. Three hours.

455 Social Processes and Educational Institutions. Relationships among ideology, social control, social class, policies, practices within educational institutions. Research related to curricular orientation, evaluation and selection, and school and classroom organization. Prerequisite: Doctoral level standing. Three hours.

EDEL — ELEMENTARY EDUCATION

222 Improvement of Reading Instruction in the Elementary School. Analysis of philosophies, program, and instructional practices for teaching reading. Examination and evaluation of basal textbook, individualized, and specialized reading programs. Prerequisites: Twelve hours in education and/or related areas including an introductory course in reading or permission of the instructor. Three hours.

234 Literature and Language for Children and Youth. Characteristics, interests, reading habits of children and youth; selection, evaluation of literature. Organizing book units for teaching literature, for content areas. Emphasis on development of oral, written expression. Prerequisite: Twelve hours in education and related areas or consent of instructor. Three hours.

241 Science for the Elementary School. Examination of elementary school science programs. Emphasis on methods and materials relating to construction, use of science units for children in grades K-6. Prerequisite: Twelve hours in education and related areas and permission of instructor. Three hours.

242 Modern Trends in Elementary Education. Modern educational principles, instructional practices in elementary schools including communication in the classroom, interaction between students and teachers, materials, emerging trends affecting the elementary school. Prerequisite: Twelve hours in education and related areas. Three hours.

244 Social Studies in the Elementary School. Study of
literature, research, and problems in teaching social studies
in the elementary school. Prerequisite: Twelve hours in
education and related areas. Three hours.

256 Methods and Materials in Elementary School Mathematics. Evolution of mathematical concepts, notations.
Meaning of numbers, number systems. Theory underlying
fundamental operations, metric measurement, analysis of
modern approach to mathematics. Manipulative approach
to teaching mathematics. Prerequisite: Twelve hours in
education and related areas. Three hours.

270 Kindergarten Methods and Organization. Objectives, organization, curriculum, methods and materials, and
relationships of kindergarten to Head Start and other pre-
school experiences. Prerequisite: Twelve hours in education
and related areas. Three hours.

271 Kindergarten Education with Laboratory Experiences. Designed to acquaint the prospective kindergarten
teacher with educational research conducted by Piaget, Bruner, Montessori, and others with experiences provided
for working with children of kindergarten age. Prerequisite:
Twelve hours in education and related areas. Three hours.

375 Analysis of Reading and Related Difficulties. Analysis and evaluation of learning difficulties with emphasis
on reading and writing; nature of difficulties; procedures and
materials for assessing reading performance. Involvement
with children is required. Prerequisite: Six hours in reading
and three hours in education or permission of instructor.
Three hours.

376 Laboratory Experiences in Reading and Related Language Instruction. Approaches for prevention, correction
of reading and written language difficulties. Supervised
teaching of individuals and/or small groups experiencing
reading and language problems. Apprenticeships in reading
instructional programs. Prerequisite: 375. Three hours.

378 Advanced Study and Research in Reading and Related Language Arts. Survey of research, comparison and
evaluation of emerging programs design and development of
projects in reading. Prerequisite: Fifteen hours in education
including nine hours in the field of reading and language
education, or permission of instructor. Three hours.

379 Seminar in Reading Instruction. Study of reading relative to total curriculum. Significant trends, concepts related to specific problems, programs in reading and language arts instruction; role of supervisor and reading consultant. Prerequisites: Fifteen hours of education including nine hours in the field of reading and language education or permission of instructor. Three hours.

EDSC — SECONDARY EDUCATION

217 Secondary School Curriculum. Principles and problems in curriculum development. An analysis of recent cur-
rricular innovations in American secondary schools. Prereq-
usite: Twelve hours of education and related areas. Three hours.

223 Reading Programs in Secondary Schools and Colleges. Relationship of reading to learning; study of organi-
zation, instructional procedures, and materials for developing
reading improvement programs for secondary and college
students; reading in content areas. Prerequisite: Twelve hours in education and/or related areas or consent of instructor. Three hours. (Also offered for undergraduates under 137.)

225 Teaching Social Studies in Secondary Schools. In-
cludes multiple teaching modes, questioning techniques, micro-teaching laboratory, analysis of historical content to
determine students' prerequisite cognitive skills and pro-
cesses for construction of historical scenarios. Prerequisite:
Twelve hours of education and related areas. Three hours.

227 Teaching Science in Secondary Schools. Consideration of science curricula for grades 7-12. Topics may in-
clude: teaching science as problem-solving, research in
science teaching, evaluation strategies, instructional tech-
niques, affective education through science. Prerequisites:
Twelve hours in education and related areas and permission
of instructor. Three hours.

228 Literature in the Junior-Senior High School Curriculum. (Literary Criticism for Teachers). Three hours.

259 Teaching Foreign Language in the School. (Secondary). Three hours.

282 Seminar for Prospective Teachers of English. See English 282.

294 Seminar for Prospective Teachers of Communications. See Communication 294.

EDMU—MUSIC EDUCATION

240 Musical Creativity in the General Music Class. Designing a course of study for the general music class. Devel-
op ing musical concepts and perception through individual
differences. Aural approach through class performance on
recorders. Prerequisite: An undergraduate major in music
education or permission of instructor. Three hours.

243 Recent Trends in Music Education. Study of recent thought and practices in music education. Examination of
current trends. Prerequisite: An undergraduate major in
music education or permission of instructor. Credit variable, one to four hours.

253 Practicum in Music Education. Current methodology in music education for music specialist and classroom
teacher. Each year emphasis in a different area of concen-
tration. Prerequisites: An undergraduate major in music
education or elementary education and teaching experience
or permission of instructor. Credit variable. Course may be
taken for one to four hours each semester and may be
repeated for a maximum of eight hours.

290 Basic Concepts in Music Education. Disciplinary backgrounds; historical and philosophical foundations; fundamen-
tal consideration of the functions of music in the
schools; development of a personal philosophy. Three hours.

390 Organization and Administration of Music Education. Study of the organization and administration of vocal
and instrumental music in the public schools. Prerequisites:
Graduate standing in music education and teaching experi-
ence or consent of instructor. Three hours.
ECHD — EARLY CHILDHOOD
AND HUMAN DEVELOPMENT
(See page 100.)

EDPE — PHYSICAL EDUCATION

201 Administration of Athletic Programs. Background for effective administration of the athletic program of schools. Including scheduling, budgeting, management, equipment, policy, public relations, and education justification. Prerequisites: Twelve hours of education and psychology. Three hours.

203 Principles of Physical Education. Principles basic to sound philosophy of physical education for appraisal of historical development; relationship to health education, recreation and other areas; foundation and functions of physical education. Prerequisites: Admission to the program and junior standing. Three hours.

240 Principles of Motor Learning and Human Performance. Nature of motor learning; factors affecting motor learning, (motivation, emotion, stress); concepts of transfer, retention; alternatives in teaching, coaching methodologies based upon applied principles in motor learning. Prerequisites: 166 and EDSS 145 or 146. Three hours.

241 Seminar in Physical Education and Athletics. Examination and analysis of contemporary issues and trends in physical education and athletics not especially appropriate within the boundaries of an existing course. Prerequisite: Twelve hours in physical education and related areas. Variable credit (two to four hours).

253 Curriculum Design in Health and Physical Education. Philosophy, techniques of curriculum innovation in health and physical education. Inter-relationships between student needs and interests, teaching methodology, evaluative procedures, community involvement, administrative organization patterns. Prerequisites: Junior standing and 104, 105, 46 or 155. Three hours.

260 Adaptive Physical Education. Recognition, prevention, correction of functional, structural deviations from normal body mechanics. Organization of programs adapted to needs of handicapped individuals in both special class and mainstreamed settings. Prerequisite: 155, 104, 105 or equivalent teaching experience. Three hours.

EDHE — HEALTH EDUCATION

208 School Health Programs. Organization of the total school health program. Problems and administration in the area of school environment, health services, health education, and school-community relationship. Prerequisite: 46 or equivalent. Three hours.

EDLI — LIBRARY SCIENCE

272 Public and School Library Services. Prerequisite: Twelve hours in education and related areas, or permission of instructor. Three hours.

273 Cataloging and Classification. Prerequisite: EDLS 272 or equivalent. Three hours.

274 Reference Materials and Teaching the Use of Libraries. Prerequisite: EDLS 272 or equivalent. Three hours.

275 Selection of Books and Materials for Young Adults. Prerequisite: EDLS 272 or equivalent. Three hours.

276 Reference Sources and Services. Prerequisite: EDLS

EDHS — HUMAN SERVICES

209 Introduction to Research Methods in Education and Social Services. Seminars and research projects will introduce the students to the methods of historical, descriptive, experimental, quasi-experimental, field studies, and survey research. Three hours.

258 Community Organizations and Resources. Introduction to the range of clients served by Human Service Agencies and response patterns typically initiated. Survey of facilities and services available. Prerequisite: Permission of instructor. Three hours.

291 Special Topics in Organizational and Human Resource Development. Special issues in counseling, administration and planning, social work, or higher education not appropriate to content of existing courses. Reflects social services orientation of OCFS. Variable hours.

EDSP — SPECIAL EDUCATION

201 Foundations of Special Education. Examination of historical, current trends in the treatment of handicapped individuals, including the effects of litigation, legislation, and economic considerations on educational and residential service delivery systems. Prerequisite: Twelve hours in education and related areas, or permission of instructor. Three hours.

207 Cooperative Learning. Theoretical and experiential instruction in procedures to increase social acceptance and academic achievement of exceptional learners in mainstream settings through cooperative learning. Prerequisite: Permission of instructor. Three hours.

216 Instruction for Mildly Handicapped Individuals. Introduction to curriculum for instruction of children with learning disabilities, mental retardation, behavior disorders. Emphasis on objectives, assessment, task analysis, curriculum, and evaluation Prerequisite: Permission of instructor. Three hours.

217 Instruction for Severely Handicapped Individuals. Individualized instruction for severely handicapped learners emphasizing objectives, assessment, task analysis, curriculum, and evaluation. Prerequisite: Permission of instructor. Three hours.

224 Instruction for Mildly Handicapped Individuals. Students apply principles of behavior analysis to improve academic and social skills of individuals with learning disabilities, mental retardation, behavior disorders. Prerequisite: Permission of instructor. Three hours.

228 Instruction for Severely Handicapped Individuals. Students apply advanced principles of behavior analysis to improve skills in learners severely handicapped in motor,
social, communication, or self-care areas. Prerequisite: Permission of instructor. Three hours.

275 Developing Vocational Instruction for Students with Special Needs. See Vocational Education and Technology 275.

290 Curriculum For Handicapped Individuals. Intensive study of curriculum aspects constituting basic skills, knowledge to be learned at a given instructional level. Instructional objectives. Development of evaluation system to measure each learner's achievement. Prerequisite: Permission of instructor. Three hours.

296 Special Education Practica for Classroom Teachers. Credit as arranged.

297 Curriculum for Handicapped Individuals. Students develop and implement an objectives-based curriculum for learners with learning disabilities, mental retardation, behavior disorders, and/or multi-handicaps. Prerequisite: Permission of instructor.

298 Special Education Practicum. Students provide direct instruction for six learners with learning disabilities, mental retardation, behavior disorders, and/or multi-handicaps. Prerequisite: Permission of instructor. Credit as arranged.

301 History and Systems of Services for Handicapped Individuals. Historical and current trends in treatment of handicapped individuals, including effects of litigation, legislation, economic consideration in education, vocational, residential service delivery systems. Prerequisite: Acceptance as candidate for M.Ed. degree in special education, or permission of instructor. Three hours.

302 Physical and Developmental Characteristics of Individuals with Multi-Handicaps. Normal development—birth through six years, developmental disorders, handicapping conditions. Medical, health considerations for multi-handicapped. Management of multi-handicapped learner through employment of appropriate handling, positioning, feeding, toileting procedures. Prerequisite: Permission of instructor. Three hours.

310, 311 Curriculum and Technology in Special Education. Curricular areas essential to education of handicapped students. Development, adaptation of curricula in early education, elementary and secondary and adult levels for mild, moderate, and severe handicapping conditions. Prerequisite: Permission of instructor. Cross listings: Vocational Education and Technology and EDPE 310, 311.

312, 313 Advanced Behavior Principles in Special Education. A survey on behavior theory and research applications for learners with learning disabilities, mental retardation, behavior disorders, and multi-handicaps. Prerequisite: Permission of instructor. Three hours.

316 Research Seminar in Special Education. Research which addresses key issues in special education is reviewed and evaluated. Students write and present a research review with attention to practitioner needs. Prerequisites: EDSP 301, 310, 312, and a course in quantitative research design. Three hours.

317 Design and Evaluation of Education for Severely Handicapped Individuals. Students analyze, adapt curricula for severely handicapped, utilizing knowledge of normal, abnormal motor development, feeding techniques, adaptive, prosthetic devices, medial aspects, parent professional partnership, socialization, normalization, legal aspects. Prerequisite: Permission of instructor. Three hours.

319 Internship for Specialized Personnel in Education. Approved internship reflecting student's interest and needs. Competency-based instruction in development, implementation of effective programs for learners eligible for special education services. Prerequisite: Permission of instructor. Credit as arranged.

320 Laboratory Experience in Education: Educational Programming for the Severely Handicapped. Students identify, evaluate severely handicapped learners, demonstrate competency in handling, positioning, feeding. Current skill levels assessed, educational programs designed, including objectives, teaching/learning procedures, evaluation, measurement. Prerequisites: Master's degree or equivalent and permission of instructor. Three hours.

322 Internship in Special Education: The Triadic Model of Consultation. Competency-based instruction in oral and written communication, consultation, and workshop level training is provided. Students apply the consultation model in an educational setting. Prerequisites: EDSP 310, 312 or permission of instructor. Three hours.

323 Internship in Special Education: Systems Development. Competency-based instruction in planning for system level development and change. Students apply systems theory in an educational setting. Prerequisites: EDSP 310, 312 or permission of instructor. Three hours.

384 Teaching-Internship in Special Education: Course Development and Implementation. Instruction in developing competency-based courses in special education for in-service teacher training. Practicum involves team teaching with University special education faculty. Prerequisites: Certification as a Consulting Teacher/Learning Specialist and permission of instructor. Six hours.

385 Teaching Internship: Advanced Systems Development and Management in Special Education. Competency-based instruction in developing and adapting technological programs for system-level change. Prerequisite: EDSP 319 (six hours) and permission of instructor. Three to six hours.

386 Teaching Internship: Management of Learning Environments for the Handicapped. Implementation of data-based individualized education in one-to-one, small group, and large group instruction for severely handicapped student(s) in special or regular classrooms. Prerequisites: EDSP 217, 290, 228 or permission of instructor. Variable credit.

EDAP — Administration and Planning

264 Evaluation in Education and Social Services. For educational and social service personnel. Overview of the state-of-the-art of evaluation, emerging concepts, related models. Potential applications to settings; systematic data analysis. Prerequisite: Twelve hours in education or permission of instructor. Three hours.

266 Educational Finance. National and State statutes, practices in educational finance and taxation; local practices in taxation; other revenue sources; methods for school budgeting; financial expenditure procedures. Prerequisite: Twelve hours in education or permission of instructor. Two to three hours.

268 Educational Law. Legal basis for education. State and Federal statutes; related court cases: Attorney General opinions; Special Education procedures; Vermont State Board and State Education Department policies; regulations. Prerequisite: Twelve hours in education or permission of instructor. Two to three hours.
280 School Business Management. An analysis of the basic concepts which provide the foundation for school business operations. Topics include finance, facilities, logistical and classified personnel administration. Prerequisite: Twelve hours in Education. Three hours.

291 Special Topics in Organizational and Human Resource Development. Special issues in counseling, administration and planning, social work, or higher education not appropriate to content of existing courses. Courses will reflect the social services orientation of OCFS. Variable hours.

332 Seminar in Administration and Planning. Opportunity for students to experience, apply selected administration and planning concepts, skills through seminar and selected simulations of public school and social service organizational settings. Three hours.

335 Staff Evaluation and Development. Supervisory roles, behavior, responsibilities, and relationships in educational and social service organizations; processes for evaluating the performance and promoting the development of staff, and increasing organization effectiveness. Three hours.

337 Political Processes in Education and Social Service Organizations. Political and operational relationships of organizations to multiple publics and governmental bodies at the local, state, and national levels. Three hours.

352 Analysis of Educational and Social Service Organizations. Organizations and open or closed systems; examinations of goals, power, conflict, leadership, decision-making, roles, communication; diagnosing causes of organizational problems; factors aiding, impeding organizational change. Three hours.

353 Seminar in Organizational Leadership. Administrative roles, functions, and responsibilities in maintaining and changing organizations; hierarchical relationships; leadership styles and behavior appropriate for managing in contemporary and future organizations. Three hours.

354 General and Social Systems Theory. General Systems Theory is analyzed in terms of its utility for examining social systems, macro-systems analysis of research, planning, and interdisciplinary dialogue. Three hours.

356, 357 Seminar in Futurism and Planning. Knowledge, values, attitudes relating to concept of the future; alternative futures, trend analysis, goal setting; planning processes applied to educational and social service organizations. Six hours (each semester can be taken independently).

358 Seminar in Community Education. The seminar participants will analyze the Community Education process, relate the process to community development, and develop strategies for the planning and implementation of Community Education. Three hours.

367 Human Behavior in Education Systems. This course will enable students in the Doctorate in Education program to understand and assess human behavior as it affects and is affected by education systems. Prerequisite: Graduate standing, Ed.D. students have priority. Three hours.

369 Ethics in Educational and Social Services Administration. Critical examination of theories of ethical decision-making. Implications for leadership in educational, social service settings. Ethical investigation utilizing research, scholarship, actual incidents, case studies, role playing. Prerequisite: Graduate standing, Ed.D. students have priority. Three hours.

372 Leadership and the Creative Imagination. Leadership in societal organizations as presented in literature, other media. Students will demonstrate abilities to integrate leadership theory, principles, personal beliefs, practices with literary and other media models. Prerequisite: Graduate standing, Ed.D. students have priority. Three hours.

386 Organization and Human Resource Development. The concept and practice of organization development, analysis of and laboratory experience in the utilization of intervention methodologies. Prerequisite: One course relating to human relations and one course relating to organizations or equivalent (e.g. 220, 332, 352, 353, 355, 374, 383), or permission of instructor. Three hours.

409 Applied Educational Research. Links educational research methodology with principles of systems change in order to provide a knowledge base for conducting applied educational research. Prerequisites: EDFS 209 or equivalent, doctoral level standing. Three hours.

432 Seminar in Small Systems Administration and Planning. Designed to familiarize participants with knowledge and research relevant to developing an applied theory of action for administering small rural educational systems. Prerequisite: Doctoral level standing. Three hours.

437 Seminar on Education Policy. An examination of the nature and function of education policy, emphasizing the structure and processes in education policy formulation and implementation. Prerequisite: Doctoral level standing. Three hours.

491 Doctoral Dissertation Research. Credit as arranged.

EDHI — Higher Education

232 Adult Development and Education. Critical examination of research on adult education, adult learning, developmental theory, reentry issues facing older students. Analysis and application of proposals for new adult-oriented educational programs. Prerequisites: Twelve credits of graduate study in education or permission of instructor. Three hours. Nash.

291 Special Topics in Organizational and Human Resource Development. Special issues in counseling, administration and planning, social work, higher education not appropriate to content of existing courses. Courses will reflect the social services orientation of OCFS. Variable credit.

362 The American College Student. Study of the American college student within his living-learning environment. Emphasis upon sociological and psychological aspects in relation to student personnel work and counseling. Prerequisite: Twelve hours in education, psychology, and sociology or related areas. Three hours.

383 Higher Education Administration and Organization. Introduction to concepts of administration and organization as applied to contemporary higher education setting. Characteristics of organizations, dynamic elements of administration and theories and processes of change. Prerequisite: Permission of instructor. Three hours. Holmes, Young.
EDCO — Counseling

220 Personality Development. Approaches to understanding human behavior in applied settings emphasizing behavior development as an interpersonal process. Prerequisite: Twelve hours in education and psychology. Three hours.

274 Counseling Theory and Practice. Theoretical and practical approach to understanding dynamics of the counseling process. Refinement of personal philosophy, theory of counseling, and implementation in practice. Prerequisites: Graduate standing, twelve hours in education and/or psychology, and permission of instructor.

291 Special Topics in Counselor Education. Special issues in counseling, administration and planning, social work, higher education not appropriate to content of existing courses. Courses will reflect the social services orientation of OCFS. Variable credit.

293 Group Dynamics: Theory and Experience. Encounter group experiences for prospective counselors providing increased awareness of self and of modes of relating to others. Theory, practice of group dynamics. Prerequisites: Twelve hours in education and psychology and permission of instructor. Three credits.

295 Laboratory Experience in Counseling. Supervised practice in counseling techniques. Students develop skills and receive feedback. Use is made of videotape facilities. Prerequisites: Counseling majors only, concurrently enrolled in EDCO 274 or consent of instructor. Three hours.

321 Consultation Skills. The consultation relationship in educational and Social Service settings. Prerequisites: EDCO 220, permission of instructor. Three hours.

350 Foundations of the Helping Process. Critical analysis of the various facets of counseling within the current cultural setting. Special emphasis upon goals of the helping process and their justification. Prerequisite: Twelve hours in education and psychology. Three hours.

351 Using Tests in Counseling. Techniques used to explore the psychology of individual differences and group assessment. Experience given in talking, administering, interpreting various tests: study project for application to any setting. Prerequisite: Twelve hours in education and psychology. Three hours.

368 Life Style Appraisal. Technique for developing, understanding an individual's subjective method of perceiving life events. Applications of the technique in various counseling modalities. Practice in use of technique. Prerequisites: EDOH 220, 374, and permission of instructor. Three hours.

370 Elementary School Guidance. Development of elementary school counseling programs. Techniques appropriate to such settings: classroom discussions, parent education, teacher consultation, appraisal techniques, etc. Enhancing development of positive self-concept. Prerequisites: 220 and 350. Three hours.

381 Counseling for Career Development. Psychology of career development emphasizing counseling for career decision-making within the current cultural context. Prerequisite: Graduate standing. Three hours.

384 Practicum in Counseling. Supervised experiences in individual and small-group counseling situations. Minimum of 30 hours in actual counseling relationships. Analysis, evaluation of verbatim samplings. For students nearing completion of degree. Prerequisites: 374 and permission of instructor. Three hours.

386 Organizational and Human Resource Development Program. The concept and practice of organization development, analysis of and laboratory experience in the utilization of intervention methodologies. Prerequisite: Permission of instructor. Three hours.

388 Procedures in Family Counseling. Theory and process of counseling with families. Live demonstrations of family counseling with opportunities for student involvement. Prerequisites: EDOH 220, 374, and permission of instructor. Three hours.

389 Advanced Practicum in Family Counseling. Supervised practice in family counseling. Prerequisites: EDOH 386, permission of instructor.

390 Advanced Counseling Seminar. Analysis and practice of advanced counseling skills with focus on new developments. Emphasis on integration of theory and technique into a consistent counseling model. Prerequisites: EDCO 274, 295, 384, and consent of instructor. Three hours. Peterson.

393 Advanced Study in the Theory and Practice of Group Counseling. Advanced study of group counseling theory as applied to group establishment and intervention strategies. A field experience in group counseling is required. Three hours.

OTHER COURSES IN EDUCATION

In addition to the courses previously described, the following courses are also offered, usually in the Summer Session and Evening Division.

209 Education of Teachers of the Mentally Retarded I — Early Years 3-6
210 Education of Teachers of the Mentally Retarded II — Later Years 3-6
214 The Slow Learner (Education of the Exceptional Child) 3-6
215 The Gifted Child 3
219 Workshop in Economic Education 1-4
250 Foundations of Rehabilitation 3
251 Case Management in Rehabilitation 3
260 Vocational Development and Placement Processes 3
261 Seminar in Business Education 3
282 Seminar for Prospective Teachers of English 3
291 Psychology of Music 3
305 Medical Information for Counselors 3
373 Individual Testing 3

ELECTRICAL ENGINEERING (EE)

Professors Absher, Anderson, Evering (Chairperson), Handelsman (Emeritus), Lai, Mirchandani, Roth, Rush, Williams; Associate Professor Bouman; Assistant Professor Titcomb; Adjunct Professors Pricer, Rideout; Adjunct
Master of Science and Doctor of Philosophy programs are offered. Candidates normally have obtained the Bachelor of Science degree in Electrical Engineering prior to application for admission but other applicants are encouraged to consider the program if they have extensive background in mathematics and the basic sciences. In such cases, it may be necessary for a student to complete the entrance qualifications without receiving credit toward graduate studies. The general requirements for admission as outlined under the “Regulations of the Graduate College” must be met. Areas of research interests are control systems, biomedical engineering, electromagnetic fields, instrumentation, solid state physical electronics, information processing, pattern recognition and communication theory, semiconductor materials, devices and integrated circuits (VLSI).

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF MASTER OF SCIENCE
An accredited bachelor’s degree in an appropriate field.

REQUIREMENTS FOR ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE
An accredited bachelor’s degree in Electrical Engineering or equivalent education.

MINIMUM DEGREE REQUIREMENTS
Advanced courses in electrical engineering, physics, and mathematics (18 to 24 hours) with at least 15 credit hours appropriately distributed in approved areas of study in the Computer Science and Electrical Engineering Department; thesis research (six to 12 hours).

Although a thesis is normally required in the program leading to the M.S. in Electrical Engineering, the thesis may be waived, with departmental approval in favor of additional courses. In such cases, the student will be expected to have considerable professional experience, or to submit high quality technical reports as evidence of professional maturity.

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF DOCTOR OF PHILOSOPHY
An accredited master’s degree in Electrical Engineering or the equivalent.

REQUIREMENTS FOR ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF DOCTOR OF PHILOSOPHY
Successful completion of Ph.D. comprehensive examinations. The majority of students will have completed the core program — comprising graduate courses in controls, fields, solid state circuits, communications, mathematics, and physics — before taking the comprehensive examination.

MINIMUM DEGREE REQUIREMENTS FOR THE DEGREE OF DOCTOR OF PHILOSOPHY
At least 42 credit hours in courses and seminars and 30 credit hours in dissertation. Normally, 12 additional credit hours in an area of specialization are found necessary. The requirements specified under the Regulations of the Graduate College must also be met.

COURSES OFFERED

201 Linear System Theory (3-0). Analysis of systems, application to problems in electrical engineering. Modeling, analysis of discrete and continuous-time linear systems. Continuous, discrete time Fourier transforms. Approximation, model reduction using state-space methods. Prerequisite: Graduate standing in EE or permission of instructor. Three hours. Mirchandani.

209 Transient Phenomena (3-0). Complex variable basis of Laplace and Fourier Transforms; applications to transient behavior of lumped and distributed parameter systems, root locus, Nyquist criterion, two-dimensional field problems. Prerequisite: 4. Three hours. Rush.

220 Electronic Instrumentation for Scientists (3-3). Electrical components, circuit theory, electrical measurements, oscilloscopes, power supplies, amplification, oscillators, measurements, servos, operational amplifiers, electronic switching, timing, digital counting circuits. No credit for students in EE. Prerequisites: College physics, calculus, or permission of instructor. Four hours.

231, 232 Digital Computer Design. Hardware components, design, organization, realization. Design concepts, procedures, design of small computer. Microprogrammed control units, memory organization, hardware realization of high-speed arithmetic operations. Interrupt, I/O systems, interfacing, inter-system communications. Prerequisite: Departmental permission. Three hours. Absher, Lai.

233, 234 Microprocessor-Based Systems and Applications (3-3). Basic principles of mini/microcomputers: A/D; D/A; channels, magnetic devices, display devices, mechanical devices; interface designs of analog systems to mini/microcomputers: principles of microprogramming; bit-slice-based microcomputers. Prerequisite: Departmental permission, Computer Science 101 desirable, 233 for 234. Four hours. Williams.

242 Theory and Applications of Time-Varying Fields (3-0). Maxwell's equations and boundary conditions for time varying systems. Propagation and reflection of electromagnetic waves, guided electromagnetic waves, and antennas. Prerequisite: 240 or departmental permission. Three hours. Rush, Evering.

266 Science and Technology of Integrated Circuits. Science and technology of silicon monolithic integrated circuit processing and interactions of the processing steps with the electrical circuit properties. Prerequisite: 163 or 261 and concurrent registration in 164 or 262. Three hours. Anderson.

281 through 284 Seminars (1-0). Presentation and discussion of advanced electrical engineering problems and current developments. Prerequisite: Senior or graduate engineering enrollment. One hour.

285 Creative Engineering (3-0). Creative techniques applied to problems in process control, biomedical engineering, communications, circuit design. Prerequisite: Graduate standing in EE or departmental permission. Three hours.

295 Special Topics. Formulation and solution of theoretical and practical problems dealing with electrical circuits, apparatus, machines, or systems. Prerequisite: 4 and permission of instructor. Three hours.

311, 312 Introduction to Optimum Control Systems. Review of conventional design methods. Introduction to optimal control problem formulation and solution; includes the calculus of variations, Pontryagin's maximum principle, Hamilton-Jacobi theory, Dynamic Programming, and other computational methods. Prerequisites: 110; 311 for 312. Three hours. Absher.

336 Introduction to VLSI Technology (3-0). Introduction to silicon gate MOSFET circuit engineering emphasizing ground rule definition, cell layout, electrical and physical design, and chip definition. Prerequisite: 262. Three hours. Rideout.

339 Computer-Aided Engineering of VLSI Circuits (2-0). Introduction to computer-automated synthesis and analysis of Very Large Scale Integrated (VLSI) circuits including layout, autorouting, symbolic design, design rule checking, and circuit extraction. Prerequisites: 121, 163, and permission of instructor. Two hours.

340, 341 Special Topics in Electromagnetic Field Theory. For advanced students in the field of electromagnetism. Topics selected from special interests of staff with lectures and readings from current literature. Three hours.

350 Bipolar Device Physics and Design (3-0). Discussion of bipolar device parameters, their characterization and their relation to process parameters. Description of bipolar process and device models. Applications to simple circuits. Prerequisite: 262. Three hours. Alternate years, spring semester. El-Kareh, Anderson.

351 VLSI Circuit Design (3-0). Design and analysis of digital integrated circuits in bipolar, FET, and CMOS technologies. Emphasis on VLSI problems and techniques, illustrated with contemporary examples. Prerequisites: 121, 163, and 266 or permission of instructor. Three hours. Fall semester. Bowman, Pricer.

373, 374 Digital Communication (3-0, 3-0). Modulation and coding in digital communication systems. Baseband pulse transmission. Linear modulation systems. Digital FM and PM. Error-correcting codes: block codes and convolution codes. Applications. Prerequisites: Graduate standing in EE or 174; 373 for 374. Three hours. Lai.

378 Special Topics in Statistical Communication and Related Fields. Coding for communication or computer systems, pattern recognition and learning machines, artificial
intelligence, etc., selected from special interests of staff with lectures and readings from current literature. Prerequisite: Graduate standing in EE. Three hours. Lai.

391 Master's Thesis Research. Credit as arranged.

491 Doctoral Dissertation Research. Credit as arranged.

The following courses are offered infrequently but may be taught where sufficient student interest is demonstrated.

235, 236 Hybrid Computers. Three hours.

251 Applications of Linear Algebra. Three hours.

272 Information Theory. Three hours.

319, 320 Special Topics in Control System Theory. Three hours.

345 Electromagnetic Antennas and Propagation. Three hours.

367 Solid State and Semiconductor Theory II. Three hours.

ENGINEERING PHYSICS

A program of advanced study in physics and engineering to prepare students for research and development positions in mission-oriented organizations. Advanced courses in both physics and engineering are required as is a comprehensive examination and a thesis based upon the application of physical principles to a real or simulated engineering problem. A non-thesis option is available to students who have already demonstrated ability to perform research and report the results in written and oral form.

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF MASTER OF SCIENCE

Students with an accredited bachelor's degree in computer science, engineering, applied mathematics, or physics are normally considered for admission to the program. Submission of scores on the general (aptitude) Graduate Record Examination is required.

REQUIREMENTS FOR ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE

The student is expected to have completed the courses required for the B.S. in Engineering Physics at the University of Vermont. These include Math 271, 272 (applied Mathematics), ME 50 or Physics 211 (intermediate mechanics), ME 101 (materials engineering), Physics 265, ME 41, or ME 115 (thermal science), Physics 213, 214 or EE 143, 144 (electromagnetism), Physics 273 (quantum mechanics), Physics 242 or EE 263, 264 (solid state physics).

Since these are prerequisites to the degree program, and not the program itself, any of these course prerequisites may be placed by a demonstration of equivalent knowledge of their content, to the satisfaction of the Studies Committee.

Demonstrated ability to program scientific or technical problems in Fortran, APL, or an equivalent language.

MINIMUM DEGREE REQUIREMENTS

Thesis option
Completion of 30 credits of study approved by the Studies Committee, which must include Physics 341, 342, and 362, not fewer than six credits in graduate engineering courses, and six credits in Physics 391 (thesis research). This option requires submission of a thesis based on an independent investigation demanding the application of physical principles to a real or simulated engineering problem approved by the Studies Committee.

Non-Thesis Option
Students who are offered the non-thesis option must elect to replace the requirement of Physics 391 with Physics 381, 382.

Examinations

All students are required to pass the regularly offered Physics Comprehensive Examination, administered annually circa the end of May. Students submitting a thesis (Physics 391) must pass the usual Thesis Examination.

ENGLISH (ENGL)

Professors Bradley, Broughton, Clark. (Chairperson) Cochran, Eschhols, House, Huddle, Jones, Long, Orth, Poger, Rosa, Rohwell, Shepherd; Associate Professors Dickerson, Edwards, Fulwiler, Gutman, Hall, Stanton (Director of Graduate Studies), Stephany, Thompson; Assistant Professors Biddle, Simone, Sweterlitsch.

The research interests of the faculty of the Department of English and library resources permit graduate students to undertake thesis subjects in virtually all the fields of the discipline.

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF MASTER OF ARTS

An undergraduate major in English or its equivalent; satisfactory scores on the general (aptitude) and subject (advanced) Graduate Record Examinations; demonstration of proficiency in writing by a detailed statement concerning the purpose in pursuing graduate study in English.

REQUIREMENTS FOR ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF MASTER OF ARTS

If admitted conditionally, the student must complete satisfactorily a stipulated number of hours (usually six) of graduate level work for advancement to candidacy for the master's degree.

MINIMUM DEGREE REQUIREMENTS

The department also offers a program leading to the degree of Master of Arts in Teaching (see page 25).

For M.A. and M.A.T.: 18 hours in English, including 302; 311 and 318, and six additional hours in English or a related field. Also for M.A.: 371; six hours of thesis research; and reading knowledge of a foreign language, normally French or German.

Note: The written comprehensive examination for the degrees of Master of Arts and Master of Arts in Teaching covers both English and American literature.
COURSES OFFERED

At the 200 level, the Department of English offers several seminars each semester which are numbered as described below. The specified topics vary each semester, depending on the instructors assigned. However, over the normal course of a graduate student's program, every member of the department's graduate faculty will offer a seminar in his/her area of special interest and expertise.

201, 202 Seminar in Language, Criticism, or Rhetoric.
211, 212 Seminar in British Literature to 1660.
221, 222 Seminar in British Literature, 1660-1900.
231, 232 Seminar in Modern British Literature.
241, 242 Seminar in American Literature to 1900.
251, 252 Seminar in Modern American Literature.
261, 262 Seminar in Literary Themes, Genres, or Folklore.

282 Seminar for Prospective Teachers of English. Grammar and language; literary interpretation and criticism; allied problems useful to teachers of English. Three hours. Biddle.

302 Graduate Seminar. Graduate students only. Topic varies from semester to semester, depending on faculty member assigned to the course. One seminar is required of all graduate students in English. Three hours.

303, 304 Problems and Research in Teaching Secondary School English. Consideration of problems, curricular materials, teaching procedures, and research methods in secondary school language, literature, and composition. Prerequisites: Twelve hours of education; acceptance as qualified to earn graduate credit in English. Three hours. Biddle.

311 Chaucer. Study of the principal works of Chaucer, emphasizing Chaucer's literary scope, talents, and position in medieval literature. Three hours. A.I. Dickerson; Stephany.

315, 316 Shakespeare. Three hours. Howe, Rothwell, Simone.

318 Milton. Study of Paradise Lost, Paradise Regained, Samson Agonistes, minor poems, and selected prose works. Three hours.

391 Master's Thesis Research. Credit as arranged.

397, 398 Special Readings and Research. Directed individual study of areas not appropriately covered by existing courses. Not to exceed three hours per semester.

EXTRA-DEPARTMENTAL COURSES
(See page 100.)

FORESTRY

For description of the M.S. Program in Forestry, see NATURAL RESOURCES, page 82.

FRENCH (FREN)

Associate Professors Carrard, Crichfield, T. Geno, Whatley (Chairperson); Assistant Professors Senecal, Van Slyke, Whitebook, Wiley-Sandier; Lecturer M. Geno.

Opportunities for thesis research in French literature are offered in all areas from the medieval through the 20th century, as well as French-Canadian literature and African literature of French expression.

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF MASTER OF ARTS

An undergraduate major in French or equivalent. Satisfactory scores on the general (aptitude) Graduate Record Examinations.

MINIMUM DEGREE REQUIREMENTS

Twenty-four hours in French, which may include six hours in a related field, and in addition:

Plan A: Thesis research (six hours).
Plan B: In lieu of a thesis, the candidate may write a series of master's essays with variable credit of up to three credits per paper (six hours).

A program is also offered leading to the degree of Master of Arts in Teaching. Satisfactory scores on the Graduate Record Examinations general and subject (Aptitude and Advanced) are requirements for admission to graduate studies for the M.A.T.

COURSES OFFERED

The following courses are available for graduate credit. They are divided into courses concerned primarily with advanced language study and those which treat literature. In literature, the 200-level courses, open to both undergraduates and graduates, cover the history of French literature from its origins to the present time by means of division into centuries and genres. Emphasis is placed on major figures and works, with a view to studying them for their intrinsic value as well as in their historical context. For more detailed information on specific courses, consult with department chairperson and the course instructor.

FRENCH LANGUAGE

209 Advanced Grammar. Comparative grammatical study centered on the specific problems encountered by Anglophones in written and spoken French. Three hours. M. Geno.

215 Methods of Text Analysis. Introduction to procedures and terminology used in analysis of texts of various genres. Three hours. Carrard.

216 Stylistics. Study of idiomatid difficulties faced by people who learn French; translation; analysis of the various "levels of speech" in French, with their stylistic features. Three hours. Carrard.

French Literature and Civilization

225 Medieval French Literature. First semester: Old French Language: 12th century epics, e.g. La Chanson de Roland, Le Pelerinage de Charlemagne. Breton lays; Marie
226 Medieval French Literature. Second semester: Romances: Chrétien de Troyes, Guillaume de Lorris and Jean de Meung; lyric poetry, Machault; Pisan; Charles d’Orléans; farces and miracles. Prerequisite: 225. Three hours. Whitebook. Alternate years, 1985-86.

236 The Developing Renaissance in France. The Renaissance as a cultural and esthetic phenomenon in the years 1530-1560, its changing influence on French thought and culture. Three hours. Wiley-Sandler. Alternate years, 1985-86.

245 The Baroque Age, 1600-1650. The literature after France’s civil wars, up to the triumph of classicism: religious, lyric, and political poetry; idealistic, picaresque and fantastic novels; baroque drama; Pascal. Three hours. Whatley. Alternate years, 1984-85.

255 18th Century Literature. Writers of the early Enlightenment. Possible topics: the impact of the new science; the literary reflection of new social types; the “pursuit of happiness.” Three hours. Alternate years, 1985-86.

256 18th Century Literature. Rousseau, Diderot, Laclos, Sade: the generation before the Revolution. Possible topics: the attempts to define “natural man;” the relationship between the arts and morality, between liberty and libertinism. Three hours. Alternate years, 1985-86.

266 Realism to Symbolism, 1850-1900. The rise of modern literary realism, Naturalism, Symbolist poetry, Decadence. Authors include Flaubert, Zola, Maupassant, Baudelaire, Verlaine, Rimbaud, Mallarme, Huysmans. Three hours. Crichfield. Alternate years, 1985-86.

275, 276 20th Century Literature. Selected topics dealing with poetry and/or narrative related either to an historical period or a literary movement. Three hours. Carrard. Alternate years, 1984-85.

277 Topics in 20th Century French Theatre. Subjects may include: le théâtre traditionnel, le théâtre “de l’absurde”, le théâtre de la marge, a combination of all the above. Each may be repeated up to six hours. Three hours. T. Geno. Alternate years, 1985-86.

291 Civilization of France. A study of the evolution of French institutions in their geographic, political, social, economic, and intellectual contexts from the Middle Ages to the Second World War. Three hours. M. Geno.

292 Contemporary Civilization of France. A study of French institutions and daily life since the Second World War, emphasizing the most recent changes. (French 291 or History 53 or 153 strongly recommended.) Alternate years, Fall 1984. Three hours. M. Geno.

295, 296 Advanced Special Topics

297, 298 Advanced Readings and Research

391 Master’s Thesis Research. Credit as arranged.

GEOGRAPHY (GEOG)

Professors Gade, Miles, VanderMaer (Chairperson); Associate Professors Barnum, Lind, Meeks; Assistant Professors Bodman, Ryerson.

Faculty research interests include most systematic aspects of geography, especially from an historical perspective. Technical interests are in cartography, remote sensing, and quantitative methods. Regional interests and field experiences are almost world-wide in scope.

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF MASTER OF ARTS

Evidence of a strong interest in geography. Satisfactory scores on the general (verbal and quantitative) portion of the Graduate Record Examination.

REQUIREMENTS FOR ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF MASTER OF ARTS

Twelve semester hours or its equivalent in geography and supporting courses in related fields or demonstrated proficiency in geography which would be assurance of success in graduate study.

MINIMUM DEGREE REQUIREMENTS

Twenty-one hours in geography courses at the 200 and 300 level, including Geography 201, Geography 287 or a reading knowledge of a foreign language, and up to six hours in Geography 391; nine additional hours at the 200- and 300-level in geography and/or related fields; a satisfactory thesis. For additional information, please write to the Graduate Program Coordinator, Department of Geography.

The Department also offers a program leading to the degree of Master of Arts in Teaching (see page 25).

COURSES OFFERED

Admission to the following courses for graduate credit requires the approval of the Graduate Program Coordinator in geography.

201 Perspectives on Geography. Geographic concepts and research methodology; the formulation, conduct, and presentation of a research effort. Three hours.
210 Special Topics in Regional Geography. Specialized study of a particular region. Prerequisite: Permission of instructor. Three hours.

216 Biogeography. Processes and patterns of distribution, domestication, and human utility of plant and animal species and communities in varying environmental and historical contexts. Prerequisite: Nine hours in geography or biology. Three hours. Gade.

233 Rural Planning. See Agricultural and Resource Economics 233.

242 Problems in Physical Geography. Three hours. Gade, Lind, Meeks, Ryerson.

261 Problems in Vermont Geography. Three hours.

270 Problems in Human Geography. Three hours. Barnum, Bodman, Gade, Meeks, Miles, VanderMeer.

281 Problems in Cartography. Special laboratory projects. Prerequisite: 81. Three hours. Barnum, Ryerson.

285 Remote Sensing and Environmental Problems. (Same as Geology 274.) Research projects in remote sensing; application of multi-spectral data for environmental studies. Prerequisite: 85, Civil Engineering 210, or Forestry 146. Three hours. Lind.

287 Spatial Analysis. (Same as Agricultural and Resource Economics 287.) Analysis of spatial pattern and interaction through quantitative models; introduction to measurement, sampling, and covariation in a spatial framework. Prerequisite: Graduate standing in geography or planning. Three hours. Bodman.

297, 298 Readings and Research. Credit as arranged.

300 Graduate Tutorial. Readings and research on topics arranged individually by students with instructors; attendance in appropriate undergraduate courses may be required. Prerequisite: Permission of instructor. Three hours.

391 Master's Thesis Research. Credit as arranged.

GEOLOGY (GEOL)

Professors Hunt, Stanley; Associate Professor Drake (Chairperson); Assistant Professors Bucke, Doolan, Hannah, Mehrtens; Adjunct Professors Ratte, Hatch.

Research programs are oriented in the following areas: sedimentary, metamorphic, igneous, and structural evolution of the northern Appalachians and western Cordillera; petrogenesis of mafic schists and ultramafic rocks; petrofabric and structural analysis of deformed rocks; selected problems in mineralogy and crystal chemistry; low temperature/pressure geochemistry; geologic history and recent sedimentation in Lake Champlain; evolution, ecology and ontogeny of invertebrate fossils. Interdisciplinary studies are available. Thesis topics should be in accord with faculty interests.

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF MASTER OF SCIENCE

An undergraduate major in an appropriate field; 12 semester hours in Geology; satisfactory scores on the general (aptitude) Graduate Record Examination. Year courses in chemistry, physics or biology, and calculus or in an approved ancillary science strongly recommended.

REQUIREMENTS FOR ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE

Satisfactory completion of one year of graduate study plus a comprehensive examination.

MINIMUM DEGREE REQUIREMENTS FOR THE DEGREE OF MASTER OF SCIENCE

Thesis and advanced courses in Geology must total at least 30 semester hours, including two out of the three courses, 340, 350, 360. Advanced courses in related sciences are encouraged and may be substituted for some selected Geology courses on approval by the departmental advisor. All students must complete successfully a course in field geology before graduation. This can be satisfied by Geology 201, a comparable course at another institution, recognized experience with a state survey, U.S. Geological Survey, an oceanographic institute, a geolimnological group or industry. Satisfactory completion will be determined by the Departmental Studies Committee.

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF MASTER OF SCIENCE FOR TEACHERS

1. A bachelor's degree from an accredited institution;
2. Certification as a teacher of a physical or natural science;
3. Satisfactory scores on the Graduate Record Examination (general portion).

REQUIREMENTS FOR ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE FOR TEACHERS

Satisfactory completion of one year of graduate study plus departmental recommendation.

MINIMUM REQUIREMENTS FOR THE DEGREE OF MASTER OF SCIENCE IN TEACHING (GEOLOGY)

Thirty hours of course work that will strengthen the student's background in earth science. Up to 12 hours of 100-level courses may be chosen if applicable. Course work may be chosen from supporting subject areas as well as from geology. Each student, in conference with his/her advisor, will develop a program suited to his/her needs and background. No thesis is required; however, each degree recipient must complete a general written or oral examination.

The program is also offered leading to the degree of Master of Arts in Teaching (see page 25).

COURSES OFFERED

211 Advanced Mineralogy (2-3): Crystallographic, chemical, and physical properties of minerals. Lab stresses advanced determinative techniques. Prerequisite: 110. Three hours. Drake.

212 Clay Mineralogy (2-3): Structure, composition, properties, occurrence, origin, distribution, and environmental significance of clay minerals. Laboratory techniques in the identification of clay minerals and measurement of their physical and chemical properties. Prerequisite: 110. Three hours. Bucke.
220 Invertebrate Paleontology (2-3): Classification, geological distribution, evolution, paleoecology, and morphology of major invertebrate fossil groups. Prerequisites: 121, Biology 1, or equivalent. Three hours. Hunt.

231 Advanced Metamorphic Petrology: An interpretation of the petrogenesis of metamorphic rocks including a discussion of phase equilibria, textural interpretations, plus spatial and temporal relationships to tectonic events. Concurrent enrollment in 233 (laboratory) recommended. Prerequisites: 131 or equivalent. Three hours. Doolan.

232 Advanced Igneous Petrology: Application of phase equilibria, major and trace element geochemistry, and isotopic data to problems in igneous petrology, stressing modern theories of mantle structure and petrogenesis. Concurrent enrollment in 234 (laboratory) recommended. Prerequisites: 131 or equivalent. Three hours. Hannah.

233 Advanced Metamorphic Petrology Laboratory. Mineralogy and textures of metamorphic rocks in thin section including quantitative models of metamorphic processes. One hour. Doolan.

234 Advanced Igneous Petrology Laboratory. Mineralogy and textures of igneous rocks in thin section, including quantitative models of igneous processes. One hour. Hannah.

235 Geochemistry: Application of basic concepts in chemistry to geological problems including solution geochemistry, mineral stability, and phase equilibria. Prerequisites: 131 and Chemistry 1, 2. Three hours. Drake.

241 Clastic Depositional Systems. Selected readings and field studies emphasizing the interpretation of clastic sedimentary deposits including transportation, processes of sedimentation, and geomorphology of ancient and recent sedimentary environments. Prerequisite: 153. Three hours. Mehrtens. Alternate years (not offered 1984-85.)

243 Clastic Petrology Laboratory. The study of clastic rocks in hand specimen and thin section. Prerequisite: Concurrent enrollment in 241. One hour. Mehrtens.

245 Carbonate Depositional Environments. Paleoenvironmental analysis of carbonate rocks including selected readings, field investigations, and petrographic studies. Prerequisite: 153. Three hours. Mehrtens. Alternate years.

247 Carbonate Petrology Laboratory. The study of carbonate rocks in hand specimen and thin section. Prerequisite: Concurrent enrollment in carbonate depositional environments (245). One hour. Mehrtens.

251 Recent Sedimentation (1-6). Investigation of recent sedimentary environments using geolimnological and oceanographic techniques. Groups and individual projects. Prerequisite: 153 or equivalent. Three hours. Hunt.

260 Structural Geology (3-3). Rock deformation, description, and geometry of structural types, and the interpretation of structures of all sizes in terms of finite strain and causal stress fields. Prerequisites: 101, 110; Physics 15. Four hours. Stanley.

270 Plate Tectonics. Development and current status of plate tectonic concepts with applications to selected parts of the globe. Prerequisite: 260. Three hours.

272a, b Regional Geology. 272a (one credit): Discussion of the geology of a selected region of North America; 272b (three credits): A four-week summer field trip to the area in question. Prerequisites: 101, 110; 272a for 272b. Four hours.

273 Geology of the Appalachians. Origin of mountain belts; the Appalachian mountain system discussed in terms of tectonics and geologic processes active in modern continental margins. Prerequisites: 101, 131. Three hours. Doolan.

291 Seminar in Geology. Selected topics of current interest. Prerequisites: Senior or graduate standing, permission of instructor. One to three hours.

331 Seminar in Metamorphic Petrology. Selected topics from modern concepts of evolution of metamorphic rocks. Emphasis directed toward application of petrologic models to the interpretation of earth history and tectonophysics. Prerequisites: 231. Three hours. Doolan.

332 Seminar in Igneous Petrology. Selected topics from modern concepts of evolution of igneous rocks. Emphasis directed toward application of petrologic models to the interpretation of earth history and tectonophysics. Prerequisites: 232. Three hours. Hannah.

340 Petrology and Tectonics. Application of igneous and metamorphic petrology to problems in tectonophysics, including petrochemistry of the earth's crust and upper mantle and the internal structure of orogenic belts. Prerequisites: 231 and/or 232, permission of instructor. Three hours. Hannah/Doolan.

350 Paleogeography. Paleopositions of continents and the distribution of land areas and ocean basins through geologic time in the context of plate tectonics. Prerequisite: permission of instructor. Three hours. Mehrtens.

360 Structural Analysis of Deformed Rocks. Mechanisms of rock deformation; fracture phenomena and analysis; fault zone characteristics; fold generation analysis. Stress and strain interpretation of deformational features in rocks and minerals. Field work. Prerequisites: 260. Four hours. Stanley.

361 Advanced Structural Geology. Selected topics in analytical structural geology. Prerequisite: permission of instructor. Three hours. Mehrtens.

371 Advanced Readings. Readings and research problems intended to contribute to the program of graduate students in areas of geology for which formal courses are not available. Prerequisite: Graduate standing in geology. One to three hours.

391 Master’s Thesis Research. Credit as arranged.

GERMAN (GERM)
Professor Mieder (Chairperson); Associate Professors Doane, Mahoney, Richel, Scrase.
Current research interests include East German literature; history of the German language; medieval literature; literature of the 18th, 19th, and 20th centuries; and folklore.
MINIMUM DEGREE REQUIREMENTS

Thirty hours of graduate level courses including German 281, 282; additional courses in German, which may include two advanced courses in a related field (six hours), thesis research (six to 12 hours).

The department also offers a program leading to the degree of Master of Arts in Teaching. Satisfactory scores on the Graduate Record Examinations general (aptitude) section.

COURSES OFFERED

201 Proseminar: Methods of Research and Bibliography. An introduction to tools and methods of research. Prerequisites: 101, 102 or the equivalent. Three hours. Mieder. Alternate years.

203 Development of German Intellectual Movements. A comprehensive survey of the history of ideas as a framework for the study of German literature. Prerequisites: 101, 102 or the equivalent. Three hours. Mieder. Alternate years.

204 Courtly Epic and Minnesang. Cultural background and major works of medieval classicism. Prerequisite: 101, 102 or the equivalent. Three hours. Mieder. Alternate years.

205, 206 Goethe and Schiller and Their Time. Origin, development, characteristics, and criticism of German Classicism. Prerequisites: 101, 102 or the equivalent. Three hours. Mahoney. Alternate years.

207 19th Century Prose. Masterpieces of narrative prose by representative authors such as Kleist, Drost-Hulslof, Stifter, Storm, and Keller. Prerequisite: 101, 102 or the equivalent. Three hours. Mieder. Alternate years.

209, 210 The 20th Century. Selected works in poetry, prose, and drama by Brecht, George, Hauptmann, Hofmannsthal, Kafka, Thomas Mann, Rilke, and others. Prerequisites: 101, 102 or the equivalent. Three hours. Doane, Scrase. Alternate years.

221, 222 Advanced Composition and Conversation. Guided conversation, discussion and advanced oral and written drill in German. Modes of expression and stylistic devices of modern German based on analysis of selected texts. Prerequisites: 121, 122 or equivalent. Three hours. Doane, Mieder.

232 History of the German Language. Introduction to Germanic linguistics, the comparative method, and linguistic reconstruction. Linguistic development of German from Indo-European to present. No knowledge of older stages of the language necessary. Prerequisites: 121, 122 or the equivalent. Three hours. Mieder. Alternate years.
MINIMUM DEGREE REQUIREMENTS FOR THE MASTER OF SCIENCE

(1) Thirty-six credit hours of course work. A minimum of 18 credit hours (including an internship or thesis) must be taken in historic preservation. Participants are urged to choose electives that will fill in gaps in their previous training. (2) A comprehensive examination given during the third semester. (3) An internship in a preservation agency, or a written thesis. This may be undertaken upon completion of two or three semesters of concentrated course work. At the conclusion of the internship, an oral presentation describing work accomplished will be given before a jury of practicing professionals for evaluation. (4) Historic Preservation 201, 301, 302 and 303 or 304 are required courses for the degree. Students will also normally take History 351 (Proseminar in American Cultural History) and Art 207 (History of American Architecture) unless they have had sufficient backgrounds in these areas.

COURSES OFFERED

201 Architecture and the Environment. (Same as Art 201.) An introduction to the basic concepts and skills necessary to identify, document, and manage the nation's historic resources. Three hours. Liebs.

202 Special Topics. Courses are offered yearly by visiting faculty under this number, in specialized areas of historic preservation, through Continuing Education. Current offerings include:

Conservation Techniques for Historic Structures. Structural systems, materials found in historic resources; methods for conservation. Preservation of brick, stone, wood, plaster, metals, paints, etc. Introducing new systems into structures without violating historical integrity. Three hours. Ferro.

301 Historic Preservation Contemporary Practice. Detailed study of current historic preservation practice through field trips, seminars with practicing professionals; technical training in architectural taxonomy, environmental impact review, funding solicitation, preservation agency administration. Six hours. Liebs, Hatch, and distinguished visiting lecturers.

302 Preservation Advocacy Project. Third-semester graduate students apply developed professional skills to actual community preservation problems. Projects include strategy development, securing and allocating funds, research, advocacy, and implementation. Three hours. Liebs.

303 Internship. Participants will devote a semester to preservation within an appropriate institution or agency. Three hours. Liebs, Stout.

304 Master's Thesis Research. Credit as arranged.

306 Special Readings and Research. Credit as arranged.

HISTORY (HIST)

Professors Andrea, Daniels, Davison, Felt, Hand, Hutton (Director of Graduate Studies), Metcalfe, (Chairperson), Overfield, Schmokel, Schultz (Emeritus), Seybolt, Spinner, Steffens, Stoler, Stout; Associate Professors Liebs, (Director, Historic Preservation Program), True; Assistant Professors Mc Govern, Rodgers; Adjunct Professor Morrissey.

Research interests include American history of the colonial, early federal, Civil War, and 20th-century periods; American social and legal history; Women in America; American foreign relations; American military history; Medieval Europe; the Renaissance and the Reformation; French history; English history (Tudor-Stuart and recent); 20th-century German, Russian, and Chinese history; the Communist movement and Soviet foreign policy; East European nationalism; Canadian history (including French Canada); Latin American history; African history; music history; history of science; and historic preservation. Two scholarly journals (The American Review of Canadian Studies and Chinese Education) are edited by members of the History Department. For ancient history, see Greek and Latin.

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF MASTER OF ARTS AND MASTER OF ARTS IN TEACHING

Applicants should have an undergraduate major in history, or in a related field of the social sciences or humanities with the equivalent of a minor in history. They must take the Graduate Record Examination, both general (aptitude) and subject (advanced) history, and submit with the application a sample of writing, such as a research paper done in the course of undergraduate study.

REQUIREMENTS FOR ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF MASTER OF ARTS

Each student's Studies Committee will certify admission to candidacy when it has approved a course of study (which may include remedial work such as courses in appropriate foreign languages) and a tentative thesis topic.

REQUIREMENTS FOR ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF MASTER OF ARTS IN TEACHING

See page 25.

MINIMUM DEGREE REQUIREMENTS FOR THE DEGREE OF MASTER OF ARTS

Twenty-four hours in History, including six hours in thesis research, and six additional hours in History or a related field. The Comprehensive Examination must normally be taken before beginning the third semester; it will include questions in at least two different historical areas. Completion and successful oral defense of a thesis.

COURSES OFFERED

210, 211 Seminar in History of Traditional Societies. Three hours.

220, 221 Seminar in Historical Methods, Historiography, History of Ideas. Three hours.

HISTORY | 73
levels; lipid metabolism in patients with renal disease and
fluences upon mitochondrial energy metabolism; food
intestinal microflora and colon cancer; food habits and

Department research encompasses both basic and applied
aspects of human nutrition. Research is being conducted on: metabolism of brown adipose tissue and dietary in-
fluences upon mitochondrial energy metabolism; food
nutrient analysis; the relationship between dietary fiber, in-
testinal microflora and colon cancer; food habits and
nutrient requirements of the aged; testing methods of nutri-
tion education for various age groups and educational
levels; lipid metabolism in patients with renal disease and
use of animal models for clinical studies; toxicants in foods
and methods employed for evaluation of the safety of foods.

REQUIREMENTS FOR ADMISSION TO GRADUATE
STUDIES FOR THE DEGREE OF
MASTER OF SCIENCE

An undergraduate major in nutrition or a science-related field. Satisfactory scores on the Graduate Record Examina-
tion, general (aptitude) portion.

MINIMUM DEGREE REQUIREMENTS

Thirty hours including thesis research (six to 15 hours). Twenty-one hours should be earned in the field of specialize-
tion; nine hours may be selected from related areas; courses in statistics and research methods are required.

COURSES OFFERED

235 Recent Advances in Foods and Nutrition. Interpreta-
tion, application of particular topics, trends in foods and
nutrition as evidenced through literature and research. May
be taken more than once for a maximum of nine hours. Prereq-
usites: Chemistry, physiology, 43 and permission of in-
structor. Three hours.

236 Introduction to Food and Nutrition Research. Intro-
duction to laboratory techniques in food and nutritional
sciences. Prerequisites: 135 and a course in biochemistry
with laboratory. Three hours. Pintauro.

237 Readings in Food Science. Critical survey of the liter-
ature on the recent developments in food research. Prereq-
usites: 135 and biochemistry. Three hours. Pintauro.

240 Methods in Nutrition Education. Observation, needs
assessment, planning and presenting of appropriate
methods and materials for an identified audience in a com-
munity, school, or institutional setting. Prerequisites: A
college course in nutrition; 130; permission based upon an
interview. Three hours. Soule.

241 Nutrition and Aging. Study of the physiologic,
psychologic, sociologic, and economic factors which influence
the nutrient requirements, nutritional status, and food
habits of older people. Prerequisite: 144. Three hours.
Schlenker.

242 Advanced Nutrition. A study of nutrients and their
specific functions in metabolic processes integrating cellular
physiology, biochemistry, and nutrition. Prerequisites:
Three hours in nutrition and a course in biochemistry and
physiology. Three hours. Tyzbir.

245 Nutritional Biochemistry I. Comprehensive study of
metabolism of carbohydrates, lipids, and protein emphasizing
hormonal control, nutritional and metabolic interrela-
tionships and dietary abnormalities (e.g. starvation and obesity). Prerequisites: 242 and permission of instructor.
Three hours. Tyzbir.

247 Diet Therapy. Adaptations of the normal diet in con-
ditions of health and disease including the physiological and
psycho-sociological implications. Prerequisites: 130,

249 Nutrition Seminar, A review of recent developments
in nutrition research. Prerequisite: 242 and permission of
instructor. One hour.

290 Introduction to Research. Research procedures with
lectures and discussions of problem selection, objectives,
bibliographical techniques, and analysis of data. Prerequi-
site: Departmental permission. Two hours.

HUMAN NUTRITION AND FOODS (HN&F)

Professor Carew; Associate Professors Livak, Schlenker
(Chairperson), Tyzbir; Assistant Professors Bartel, Pintauro, Ross, Soule; Extension Assistant Professor Wright;
Adjunct Professor Stowell.

Department research encompasses both basic and applied
aspects of human nutrition. Research is being conducted
on: metabolism of brown adipose tissue and dietary in-
fluences upon mitochondrial energy metabolism; food
nutrient analysis; the relationship between dietary fiber, in-
testinal microflora and colon cancer; food habits and
nutrient requirements of the aged; testing methods of nutri-
tion education for various age groups and educational
levels; lipid metabolism in patients with renal disease and

74 | HUMAN NUTRITION AND FOODS
291 Special Problems. Reading, discussion, and special field and/or laboratory investigations. **Prerequisite:** Departmental permission. Students may enroll more than once for a maximum of 12 hours. One to six hours.

294 History of Nutrition. Foremost investigators and methods involved in the development of present day nutritional knowledge. **Prerequisite:** Three hours in nutrition. One hour.

295 Special Topics. Lectures, laboratories, readings, or projects relating to contemporary areas of study. Enrollment may be more than once, maximum of 12 hours in 195 and 295 combined. Graduate students are limited to six hours in 295. **Prerequisite:** Departmental permission.

296 Field Experience. Professionally-oriented field experience under joint supervision by faculty and business or community representative. Hours arranged; maximum up to 15 hours in 196 and 296 combined. **Prerequisite:** Departmental permission.

307 Advanced Concepts in Nutrition. Study of chemistry and physiology of digestion, absorption, and metabolism of nutrients. Methods of estimating and meeting dietary requirements for maintenance, growth, and reproduction of several species. **Prerequisite:** One of the following: 242 or a 200-level course in biochemistry. Three hours. Alternate years, 1985-86.

391 Master’s Thesis Research. Credit as arranged.

**MATERIALS SCIENCE (Multidisciplinary)**

**Steering Committee Members:** Director R. Anderson (Electrical Engineering); T. Flanagan (Chemistry); L. Scarfone (Physics); B. von Turkovich (Mechanical Engineering). Faculty: Professors Allen, Brown, Crowell, Lambert, Williams; Assistant Professors Durham, Leenstra, Tilcomb.

Participating faculty are from the following departments: Computer Science and Electrical Engineering, Civil and Mechanical Engineering, Physics, and Chemistry.

The program in Materials Science is multidisciplinary. It is involved with the mechanical, electrical, chemical, and physical properties of materials — primarily solids — and applications of these materials. It is multidisciplinary in the sense that it combines the theoretical and experimental capabilities of a variety of disciplines and applies them to the solution of complex scientific and engineering problems. Problems such as corrosion, analysis and synthesis of electronic materials, development of bulk and thin film electronic devices and integrated circuits, optimization of mechanical properties of structural materials, and failure analysis are typical examples requiring such an interdisciplinary approach. The course program gives a broad background in materials. It also provides flexibility allowing specialization in particular areas of interest.

The program in Materials Science offers the Master of Science degree and the Doctor of Philosophy degree. Each student must meet the general requirements for admission as outlined under the Regulations of the Graduate College. Students in the program are sponsored by the participating department which best reflects the students' backgrounds and interests.

**REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF MASTER OF SCIENCE**

A bachelor's degree in physics, chemistry, metallurgy, engineering, or mathematics. Applicants with other backgrounds would be evaluated individually.

**MINIMUM DEGREE REQUIREMENTS**

The above requirements for admission must be supplemented in either of the following ways:

**Plan A: With Thesis:** 30 graduate credit hours of an approved program of study including at least 18 credit hours of course work; completion of at least one three-credit hour course in each of the following categories: solid state theory, quantum mechanics, applied mathematics, and materials properties of solids; satisfactory completion of a comprehensive examination, and satisfactory completion of an M.S. thesis including its defense at an oral examination.

**Plan B: Without Thesis:** 30 credit hours of an approved program of study; completion of at least one three-credit hour course in each of the following categories: solid state theory, quantum mechanics, applied mathematics, and materials properties of solids, and satisfactory completion of a comprehensive examination.

**REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF DOCTOR OF PHILOSOPHY**

An accredited master's degree (or equivalent) in physics, chemistry, metallurgy, engineering, mathematics, or materials science.

**REQUIREMENTS FOR ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF DOCTOR OF PHILOSOPHY**

Successful completion of a Ph.D. comprehensive examination in Materials Science and demonstrated competence in computer programming. The comprehensive examination includes the areas of quantum mechanics, solid state theory, applied mathematics, thermodynamics, and materials properties of solids.

**MINIMUM DEGREE REQUIREMENTS**

In addition to the above, the following are required:

- A minimum of 75 graduate credit hours including a minimum of 20 in dissertation research. An overall grade-point average in graduate courses of 3.25 or better. Completion of at least one three-credit hour course in each of the following categories: solid state theory, quantum mechanics, applied mathematics, thermodynamics, and kinetics, and one course in each of two categories dealing with materials properties of solids. Satisfactory completion of a Ph.D. dissertation including its defense at an oral examination.

**COURSES OFFERED**

The program of Materials Science offers no courses of its own, other than thesis or dissertation research. Courses in a student's program are offered by the individual departments — primarily Electrical Engineering, Mechanical Engineering, Mathematics, Statistics, Physics, and Chemistry.

391 Master's Thesis Research. Credit as arranged.

491 Doctoral Dissertation Research. Credit as arranged.
MATHMATICS (MATH)

Professors Chamberlain, Cooke, Moser, Wright; Associate Professors Ashikaga, Burgmeier, Foote, Haugh; Assistant Professors Archdeacon, Costanza, Divitt, Dummit, Kadas, Margolis, Pence, Teglas, Whaley, Zurich; Lecturers Almeq, Johansson, Kost, Lawlor, Morency, Puterbaugh.

The Department of Mathematics and Statistics offers master’s degree programs which are sufficiently flexible to accommodate diverse career interests of its graduate students and prepare them for further graduate study. A majority of the advanced courses and current research interests of the faculty are in applied mathematics, including differential equations, probability and statistics, numerical analysis, and discrete mathematics.

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF MASTER OF SCIENCE

Satisfactory scores on the general (aptitude) and subject (advanced) sections of the Graduate Record Examination (GRE) and either:

a. A bachelor’s degree from an accredited institution with a major in mathematics, or

b. A bachelor’s degree from an accredited institution with a major in science or engineering and with (the equivalent of) a minor in mathematics.

REQUIREMENTS FOR ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE

Math 241 and 242 (or equivalent); these courses will not count toward the degree requirements.

MINIMUM DEGREE REQUIREMENTS FOR THE DEGREE OF MASTER OF SCIENCE

Each student must complete one of the following programs:

Plan A: Twenty-four semester hours of acceptable graduate credits in advanced Mathematics courses; six semester hours of thesis research.

Plan B: Thirty semester hours of acceptable graduate credits in advanced Mathematics courses; no thesis required.

Under both Plan A and Plan B students must already have, or must acquire a knowledge of the content of the following courses: Math 251, 331, 333 and 252 or 274. Also, students must satisfactorily complete at least four 300-level Mathematics courses and the seminar 382. By approval of the student’s advisor, up to six hours from an area of minor concentration may be used to fulfill the degree requirements.

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES AND ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE FOR TEACHERS

A bachelor’s degree from an accredited institution and certification as a teacher of mathematics. Three years of experience teaching secondary school mathematics. Satisfactory scores on the Graduate Record Examination (aptitude portions).

MINIMUM DEGREE REQUIREMENTS FOR THE DEGREE OF MASTER OF SCIENCE FOR TEACHERS

Thirty hours of course work in Mathematics, Statistics, and Computer Science which will broaden and balance the undergraduate work in the mathematical sciences. Each student, in conference with his/her faculty advisor, will develop a program suited to his/her needs and background. Up to 12 hours of 100-level courses may be chosen if applicable. No thesis is required; each degree recipient must pass a written or oral comprehensive examination.

REQUIREMENTS FOR THE DEGREE MASTER OF ARTS IN TEACHING

The Department offers a program leading to the degree of Master of Arts in Teaching (see page 25).

COURSES OFFERED

207 a,b Probability Theory. See Statistics 251 a,b.

223 Introduction to Formal Language Theory. Introduction to theory and applications of context-free languages. Phrase structure and context-free grammars, normal forms, pushdown automata, decision problems, power series in non-commuting variable, applications to parsing. Prerequisites: 104. Three hours.

230 Ordinary Differential Equations. Solutions of ordinary differential equations, the Laplace transformations, series solutions of differential equations. Prerequisites: 121, corequisite 124. Credit will not be granted for more than one of 230, 271. Three hours.

237 Introduction to Numerical Analysis. Error analysis, root-finding, interpolation, least squares, quadrature, linear equations, numerical solution of ordinary differential equations. Prerequisites: 121 and 124 or 271, knowledge of computer programming. Three hours.

240 Operational Mathematics. Fourier series, orthogonal functions, transforms and boundary value problems. Prerequisite: 230 or 271. Three hours.

241 Real Analysis I. Topology of Euclidean n-space, compactness, connectedness, limits and continuity; pointwise and uniform convergence, differentiation and integration of sequences and series of functions. Prerequisites: 121, 124. Three hours.
242 Real Analysis II. Differentiation, Taylor series, Riemann integration and change of coordinates in several variables, Inverse and Implicit Function Theorems. Prerequisite: 241. Three hours.

243 Introduction to Theoretical Computer Science. (Same as Computer Science 243.) Prerequisite: Math 102 or 104, Computer Science 12. Three hours.

251 Modern Algebra. Fundamental concepts of Abstract Algebra. Sets, mappings, groups, rings, integral domains, fields, homomorphisms and isomorphisms. Prerequisites: 102 or 104; highly desirable. Three hours.

252 Advanced Linear Algebra. Linear transformations and vector spaces, including Jordan forms. Symmetric, Hermitian, orthogonal and unitary matrices, and quadratic forms. Prerequisites: 124; 251 desirable. Three hours. Alternate years, 1985-86.

253, 254 Topology. The elements of point set topology: closed sets and open sets in metric spaces, continuous mappings, connection, Peano curves, separation theorems and homotopy. Prerequisites: 102 or 104; 253 or 254. Three hours. Alternate years, 1984-85.

255 Elementary Number Theory. Divisibility, prime numbers, Diophantine equations, congruence of numbers, and methods of solving congruences. Prerequisite: 102. Three hours.

257 Theory of Groups. The study of the various kinds and structures of groups. Prerequisite: 251. Three hours. Alternate years, 1984-85.

258 Galois Theory. The study of Galois theory leading to the insolubility of general quintic equations by radicals and theorems on constructions with straightedge and compass. Prerequisite: 257. Three hours. Alternate years, 1985-86.

260 Foundations of Geometry. Geometry as an axiomatic science; various non-Euclidean geometries; relationships existing between Euclidean plane geometry and other geometries; invariant properties. Prerequisite: One year of calculus. Three hours.

261 The Development of Mathematics. Historical development of the mathematical sciences emphasizing interrelations among them. Individual assignments correspond to background and interests of students. Prerequisite: Nine hours of college mathematics. Three hours.

264 Vector Analysis. Gradient, curl and divergence, Green, Gauss and Stokes Theorems, applications to physics, tensor analysis. Prerequisite: 211. Three hours. Alternate years, 1984-85.

271 Applied Mathematics for Engineers and Scientists I. Matrix Theory, Vector Analysis, Linear Ordinary Differential Equations. Emphasis on methods of solution. No credit for mathematics majors. Credit will not be granted for more than one of 230, 271. Prerequisite: 121. Three hours.

273 Topics in Combinatorics. Topics will vary according to instructor and may include graph theory, coding theory, Latin squares, and combinatorial designs. Prerequisite: 102 or 104. Three hours. Alternate years, 1984-85.

276 Mathematics of Space Flight. Topics include orbit determination and prediction of natural and artificial satellites and projectiles. Astrodynamics, coordinate systems and their transformations. Integration schemes and perturbation theory. Attitude determination. Prerequisites: 237, either Physics 15 or 24 recommended. Three hours. Alternate years, 1984-85.

295 Special Topics. Lectures, reports, and directed readings on advanced topics as announced. Prerequisite: Permission of instructor. Credit as arranged. Offered as occasion warrants.

331 Theory of Functions of Complex Variables. Differentiation, integration, Cauchy-Riemann equations, infinite series, properties of analytic continuation, Laurent series, calculus of residues, contour integration, meromorphic functions, conformal mappings, Riemann surfaces. Prerequisite: 242. Four hours.

332 Approximation Theory. Interpolation and approximation by interpolation, uniform approximation in normed linear space, spline function, orthogonal polynomials. Least square, Chebychev approximations, rational functions. Prerequisites: 124, 238. Three hours. Alternate years, 1984-85.

335, 336 Advanced Real Analysis. Lp spaces, Lp spaces; Hilbert, Banach spaces; linear functionals, linear operators; completely continuous operators (including symmetric); Fredholm alternative; Hilbert-Schmidt theory; unitary operators; Bochner's Theorem; Fourier-Plancherel, Watson transforms. Prerequisites: 333; 335 for 336. Three hours. Alternate years, 1985-86.

342 Computability and Recursive Function Theory. (Same as Computer Science 342.) Prerequisite: Math/CS 243.

382 Seminar. Topical discussions with assigned reading. Required of MS degree candidates. One hour.

391 Master's Thesis Research. Credit as arranged.

395 Special Topics. Subject will vary from year to year. May be repeated for credit. Prerequisite: Consent of instructor. Three hours.
MECHANICAL ENGINEERING (ME)

Professors Emeriti Duchacek, Martinek, Tuthill; Professors Francis, Hermance (Chairperson), Hundal, Marshall, Outwater, Pope, von Turkovich; Associate Professors Carpenter, Tevaarwerk; Assistant Professors Durham, Ortiz; Adjunct Professor McLay.

Master of Science and Doctor of Philosophy programs are offered. Candidates holding degrees other than those in Mechanical Engineering are encouraged to apply. In such cases, it is normally necessary for students to complete the entrance qualifications without receiving credit toward their graduate studies. In all courses, general requirements for admission, as outlined under the Regulations of the Graduate College, must be met. Areas of research interest include biomechanics; combustion; continuum mechanics; fluid mechanics; heat transfer; manufacturing processes; mechanical and thermal processing of metals; physical and mechanical metallurgy; solidification; tribology; vibrations.

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF MASTER OF SCIENCE

An accredited bachelor’s degree in Mechanical Engineering or its equivalent.

REQUIREMENTS FOR ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE

One semester of satisfactory performance in graduate courses.

MINIMUM DEGREE REQUIREMENTS FOR THE DEGREE OF MASTER OF SCIENCE

The above prerequisites for acceptance to candidacy must be supplemented in either of two ways.

Plan A: Completion of advanced courses in mechanical engineering; mathematics, other approved courses and six to nine hours of thesis research for a total of 30 hours.

Plan B: Completion of 30 credit hours of advanced courses in mechanical engineering, mathematics, and other approved courses in lieu of thesis.

Students should decide which option they intend to pursue at the beginning of their program. Part-time students should normally use Plan B.

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF DOCTOR OF PHILOSOPHY

An accredited master's degree in mechanical engineering or its equivalent.

REQUIREMENT FOR ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF DOCTOR OF PHILOSOPHY

Successful completion of the Ph.D. comprehensive written examinations.

MINIMUM DEGREE REQUIREMENTS FOR THE DEGREE OF DOCTOR OF PHILOSOPHY

The degree of Doctor of Philosophy requires of candidates a minimum of 75 credit hours to be earned in course and in dissertation research. At least 40 credit hours must be earned in courses and seminars and a minimum of 25 credit hours must be earned in dissertation research. Each candidate must be able to comprehend the literature of his/her field in at least one foreign language provided it is required for his/her dissertation work. The requirements specified under Regulations of the Graduate College must also be met.

COURSES OFFERED

241 Combustion Processes. Combustion thermodynamics; chemical kinetics; laminar flames, premixed and diffusion; turbulent flames; ignition, explosion, and detonation; droplet combustion; flame spread; large scale fires; rocket combustion. Senior or graduate standing. Three hours. Pope.

243 Compressible Flow. Foundations of compressible flow; isentropic flow; normal shock waves; flow in ducts with friction and with heating or cooling; generalized solution of combined effects. Prerequisites: 143 and Mathematics 271. Three hours.

245 Advanced Heat Transfer. Transient heat conduction; integral methods; convection; formulation and solution; boiling, condensation; radiant heat exchange in enclosures and with emitting-absorbing gases, advanced view factors. Senior ME standing or permission of instructor. Three hours. Herrance/Ortiz.

272 Mechanical Behavior of Materials. Elastic and plastic behavior of single crystals, polycrystals; dislocations; approximate plastic analysis; anisotropic materials; hardness; residual stress; brittle, transitional, ductile fractures; fatigue; damping; creep; surface phenomena. Three hours. Outwater.

281, 282 Seminar. Presentation and discussion of advanced mechanical engineering problems and current developments. Prerequisite: Graduate engineering enrollment. One hour.

301 Advanced Engineering Design Analysis and Synthesis. Application of fundamental concepts, principles of advanced mathematics, physics, mechanics, electricity, thermodynamics, fluid dynamics, heat transfer, and decision-making processes to design, analysis, synthesis of complex engineering systems. Four hours. Hundal.

307 Advanced Fluid Dynamics. Stress in continuum; kinematics, dynamics; potential fields; Wing theory;
Navier-Stokes equation; hydrodynamic stability; turbulence; laminar, turbulent boundary layer theory; transient flows; free laminar, turbulent flows; mixing. Four hours. Martinek.

309 Advanced Engineering Thermodynamics. Microscopic thermodynamics; Maxwell-Boltzmann, Bose- Einstein, Fermi-Dirac statistics; kinetic theory of gases; transport properties, compressed gases, liquids, solid states; chemical systems; irreversible processes; fluctuations. Three hours. Martinek.

310 Advanced Heat Transfer. Generalized equation of heat conduction; classical integral transforms, approximate solutions; thermal boundary layers; forced and free convection; condensation, boiling, ablative cooling; radiation, statistical theory; mass transfer. Three hours. Martinek.

311 Advanced Gas Dynamics. Compressible flow in ducts; friction, heat transfer; shock waves; small perturbation theory; high speed flows; transonic, supersonic, hypersonic flows; methods of characteristics. Aerodynamic heating; rarefied gas flows. Three hours. Martinek.

320 Special Problems in Elasticity. Advanced topics in the theory of elasticity in which there is a particular student and staff interest. Three hours.

322 Special Problems in Dynamics. Advanced topics in dynamics in which there is a particular student and staff interest. Three hours. Hundal.

323 Special Problems in Thermodynamics. Advanced topics in thermodynamics in which there is a particular student and staff interest. Three hours. von Turkovich.

324 Special Problems in Heat Transfer. Advanced topics in heat transfer in which there is a particular student and staff interest. Three hours. Martinek.

325 Special Problems in Materials. Advanced topics in behavior of materials in which there is a particular student and staff interest. Three hours. Outwater, von Turkovich.

342 Advanced Combustion. Equations of reacting mixtures; modeling of steady and unsteady combustion, homogeneous/heterogeneous systems; ignition, explosions, detonations; combustion aerodynamics; turbulence, swirl, sprays. Prerequisite: 241. Three hours. Hermance/Ortiz.

391 Master's Thesis Research. Credit as arranged.

491 Doctoral Dissertation Research. Credit as arranged.

The following courses are offered infrequently but may be taught where sufficient student interest is demonstrated.

202 Dynamics II. Three hours.

232 Micromanufacturing Technologies. Three hours.

251 Technology and Society Seminar. Three hours.

262 Thermal Systems. Three hours.

303 Stress Analysis (Theory and Experiment). Three hours.

306 Continuum Mechanics. Three hours.

321 Special Problems in Fluid Mechanics. Three hours.

MEDICAL MICROBIOLOGY (MDMC)

Professors Albertini, T. Moehring, Schaeffer (Chairperson), Stinebring; Associate Professors Boraker, Fives-Taylor, Gump, Novotny; Research Professor J. Moehring; Research Assistant Professor Raper.

Research activities include: host-parasite interactions with emphasis on cellular and molecular aspects of mechanisms of pathogenesis; biochemical basis of the action of bacterial toxins; entry and replication of animal viruses; chlamydiae and mycoplasmas; non-antibody resistance mechanisms especially concerning production, storage, and mode of action of interferon; development of nonisotopic immunoadsers for detection of immune complexes and cell surface macromolecules; studies of in vitro carcinogenesis; studies of cellular aging; biochemical genetics of cultured mammalian cells; isolation and expression of adhesion genes of streptococci in E. coli; mechanisms involved in assembly of bacterial structures; transformation of fungi, and the isolation of fungal genes controlling incompatibility and development; genetic toxicology: human biomonitoring; mammalian somatic cell genetics.

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF MASTER OF SCIENCE

One year of biological science; mathematics through elementary calculus; one year course in Physics (Physics 15 and 16 equivalent); chemistry including one year of inorganic chemistry, quantitative analysis and one year of organic chemistry (equivalent of Chemistry 1, 2, 123, 131, 132). A student may be admitted pending satisfactory completion of one or two of the above courses during the first semester(s) of graduate study. Satisfactory scores on the general (aptitude) test and subject (advanced) test in biology of the Graduate Record Examination.

REQUIREMENTS FOR ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE

Completion of undergraduate course prerequisites; satisfactory performance on teaching assignments and the cumulative examination.

MINIMUM DEGREE REQUIREMENTS

Participation throughout residence in Medical Microbiology Seminars; Medical Microbiology 305 and Thesis Research 391; approved selected courses offered in the Department of Medical Microbiology; Biochemistry 301-302, 303; teaching assignments as arranged by the Department; successful completion of thesis. Twenty-four hours of course credits, 16 of which must be taken from courses offered by the Department of Medical Microbiology, and six hours of research credits are required.

MEDICAL MICROBIOLOGY | 79
REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF DOCTOR OF PHILOSOPHY

One year of biology; chemistry through physical chemistry (equivalent to Chemistry 1, 2, 123, 131, 132, 160 or 161, 162) mathematics through calculus; one year course in physics (Physics 15 and 16 equivalent); additional courses required by the Department depending on the aims of the student. A student may be admitted pending satisfactory completion of one or two of the above courses during the first semester(s) of graduate study. Satisfactory scores on the general (aptitude) test and subject (advanced) test in biology of the Graduate Record Examination.

REQUIREMENTS FOR ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF DOCTOR OF PHILOSOPHY

Completion of undergraduate course prerequisites; satisfactory performance on teaching assignments and the cumulative examination.

MINIMUM DEGREE REQUIREMENTS

Participation throughout residence in Medical Microbiology Seminars: Medical Microbiology 305 and Thesis Research 491; Biochemistry 301-302, 303; approved selected courses from programs in Medical Microbiology, Biochemistry, and other departments at the discretion of the Department and Studies Committee; teaching assignments as arranged by the Department; successful completion of dissertation. Students are expected to develop proficiency in the use of computer language and programming. Forty hours of course credits, 20 of which must be taken from courses offered by the Department of Medical Microbiology, and 35 hours of research credits are required.

COMBINED MEDICAL COLLEGE AND GRADUATE COLLEGE DEGREE PROGRAMS

Qualified students, following acceptance into the medical college, may simultaneously enroll in the Graduate College for a Master of Science or Ph.D. degree program in Medical Microbiology. The program would be developed with concurrence of the dean for student affairs in the College of Medicine.

COURSES OFFERED

203 The Mammalian Cell in Biomedical Research. Cell and molecular biology of cultured vertebrate cells; principles and techniques of cell culture. Applications to biomedical research: regulation, differentiation, cytogenetics, pathogenic mechanisms, virology, carcinogenesis, somatic cell genetics. Prerequisite: Permission of instructors. Four hours. Lecture and laboratory. T. Moehring.

211 Molecular Genetics I. Analysis of organization, replication, expression of genetic material in procaryotes. Standard methods of bacterial and bacteriophage genetics, including the fundamentals of recombinant DNA technology. Recommended prerequisite for Molecular Genetics II (see Botany 252). Prerequisite: Permission of instructor. Three hours. Novotny.

225 Virology. Introduction to the nature of viruses, their physical, chemical, and biological characteristics with special reference to cell-virus interaction, viral replication, pathogenesis, viral inhibitors, and oncogenic viruses. Prerequisite: Permission of department chairman. Three hours. Staff. Alternate years.

302 Medical Microbiology. Fundamentals of pathogenic microbiology emphasizing mechanisms of disease production and mechanisms of resistance to infection. The ecologic rather than taxonomic approach is stressed. Primarily for medical students. Prerequisite: Departmental permission. Four hours. Staff.

303 Special Problems in Medical Microbiology. Supervised investigations in microbiology. Credit as arranged. Staff.

305 Pathogenic Bacteriology. Studies of major species of pathogenic bacteria, emphasis on mechanisms of disease production, epidemiology, control measures, diagnosis. For graduate students interested in phenomenon of parasitism. Prerequisite: Permission of the instructor. Three hours. Stinebring.

391 Master's Thesis Research. Credit as arranged.

491 Doctoral Dissertation Research. Credit as arranged.

MEDICAL TECHNOLOGY (MEDT)

Associate Professors Breen, Lachapelle (Chairperson), Reed, Sullivan; Assistant Professors Baker, Chickering, Ezekiel, Souek; Instructor Czerniawski; Clinical Assistant Professor Russell.

The Department of Medical Technology offers a Master of Science degree with emphasis in the preparation of medical technology educators. Students may also concentrate in clinical chemistry, clinical microbiology, or may design a program which fulfills their needs.

Areas of research and interest: clinical enzymology; anaerobes; streptococcus identification; mycological techniques; hematological techniques; admission criteria; curriculum design.

In addition, various departments and facilities in the College of Medicine and Medical Center Hospital of Vermont offer other opportunities for research.

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF MASTER OF SCIENCE

Undergraduate major in medical technology; national certification, minimum of one year's experience as a medical technologist. GRE general (aptitude) score required.
REQUIREMENTS FOR ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE

Satisfactory completion of a two semester, graduate-level course in Biochemistry (equivalent to Biochemistry 301-302).

MINIMUM DEGREE REQUIREMENTS

Medical Technology 381 (two credits), thesis research (six credits); six credits biochemistry lecture, such as Biochemistry 301-302; six credits clinically related sciences; additional approved courses. In addition, a noncredit teaching practical is required.

COURSES OFFERED

381 Special Topics. Review and discussion of current areas of importance to students in medical technology. Seminar emphasizes administration, clinical pathophysiology and education. Selected topics presented by student with occasional supplemental discussions led by faculty members or guests. One hour per semester. Staff.

391 Master's Thesis Research. Credits as arranged. Staff.

MICROBIOLOGY AND BIOCHEMISTRY (MCBI)

Professors Racusen, Weller; Associate Professors Sjogren, Currier; Visiting Associate Professor Kent; Research Associate Professor Husted.

Research programs include the studies of the role and characteristics of potato glycoproteins (D. Racusen); identification of proteins in plant parts (D. Weller); mechanism of biorecognition between host plant and rhizobia (W. Currier); properties of Rubisco enzyme involved in photosynthesis and photorespiration (S. Kent); anaerobic microbial production of fuel supplements (G. Husted); and biomass conversion and microbial pollutants in aquatic ecosystems (R. Sjogren). Members of our faculty participate in the interdisciplinary Cell Biology Program (see separate listing in this catalogue).

BIOCHEMISTRY PROGRAM

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF MASTER OF SCIENCE

An undergraduate major in chemistry or biology including a year in organic chemistry, with laboratory. Courses in biochemistry, microbiology, and physical chemistry are strongly recommended. Satisfactory scores on the Graduate Record Examination (general).

REQUIREMENTS FOR ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE

Satisfactory completion of one year of study and completion of admission requirements.

MINIMUM DEGREE REQUIREMENTS

Microbiology and Biochemistry 201, 202, 203, 381-384; thesis research (10 to 15 hours).

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF DOCTOR OF PHILOSOPHY

Same as admission for Master of Science degree plus physical chemistry, courses in cellular and molecular biology, mathematics, and physics suitable for student’s program.

REQUIREMENTS FOR ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF DOCTOR OF PHILOSOPHY

Completion of a full year of graduate study and residency at the University of Vermont. One year of laboratory courses in molecular or cellular biology; approval of the Student’s Studies Committee and the Graduate College Dean. A reading knowledge of one foreign language, i.e. French, German, or Russian, and satisfactory completion of admission requirements.

MINIMUM DEGREE REQUIREMENTS

Biochemistry 301-302, 303: advanced courses in chemistry (six hours); additional course work as determined by Student’s Studies Committee; participation in biochemistry seminar throughout residency; doctoral dissertation research (20 to 35 hours). This Ph.D. program is co-sponsored with Biochemistry (College of Medicine).

MICROBIOLOGY PROGRAM

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF MASTER OF SCIENCE

An undergraduate major in biological science, including several courses in microbiology and a year of organic chemistry. Satisfactory scores on the GRE (aptitude). A course in biochemistry is recommended as is an indication of interest in the department program.

REQUIREMENTS FOR ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE

Based upon undergraduate record of prior experience, some individuals may be accepted to candidacy upon admission to the program. For others, one year of satisfactory graduate study in this department is required.

MINIMUM DEGREE REQUIREMENTS

Microbiology and Biochemistry 381-384, Medical Microbiology 220; thesis research (10 to 15 hours).

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF DOCTOR OF PHILOSOPHY

Same as for admission for the Master of Science degree plus mathematics and physics suitable for the student’s program.

REQUIREMENTS FOR ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF DOCTOR OF PHILOSOPHY

A full year of graduate study at the University of Vermont, approval by the Student’s Studies Committee and the Graduate College Dean. A reading knowledge of one foreign language, i.e. French, German, or Russian.
MINIMUM DEGREE REQUIREMENTS

Medical Microbiology 220: the balance of courses from medical microbiology, microbiology and biochemistry, biochemistry, botany and zoology according to student's need as determined by a studies committee; participation in microbiology seminars throughout residency; doctoral dissertation research 20 to 35 hours. This program is co-sponsored with Medical Microbiology.

COURSES OFFERED

201 General Biochemistry. Broad coverage of biochemistry including principles of analytical biochemistry. Prerequisite: Chemistry 42 or 141. Three hours and lab (one hour) as MCBI 210. Racusen, Kent.

202 Advanced Biochemistry. A study of metabolic cycles emphasizing research methods involving radioisotopes and chromatography. Prerequisite: 201 or 203 or permission of the instructor. Three hours and lab (one hour) as MCBI 211. Currier.

203 Molecular Biology. The structure and biological function of nucleic acids, proteins, and enzymes. Emphasis is on optical, electrophoretic, and ultracentrifugal methods. Prerequisite: A semester of physical chemistry or permission of instructor. Three hours and lab (one hour) as MCBI 212. Weller.

220 Environmental Microbiology. The activities of microorganisms, primarily bacteria, in air, soil, and water. Prerequisite: A previous course in microbiology. Three hours and lab (one hour) as MCBI 221. Sjogren. Alternate years, 1984-85.

254 Microbial Biochemistry. The chemical composition and metabolism of microbial cells. Prerequisites: 55, 201, or permission of instructor. Three hours and lab (one hour) as MCBI 255. Sjogren. Alternate years, 1985-86.

295 Special Topics. Lectures, readings, laboratory studies, or field trips. Format and subject matter at the instructor's discretion. Spring, summer, and fall. Prerequisite: Departmental permission. Credit to be arranged.

301 Special Problems. Prerequisite: Departmental permission. Credit as arranged.

391 Master's Thesis Research. Credit as arranged.

491 Doctor's Thesis Research. Credit as arranged.

MUSIC (See page 101.)

NATURAL RESOURCES (NR)

The School of Natural Resources administers programs leading to the Master of Science degree in Forestry, Wildlife and Fisheries Biology, and Natural Resource Planning. Programs in Forestry and Wildlife and Fisheries Biology are subdisciplinary (composed of specific fields of study), while Natural Resource Planning allows an emphasis in water resources as well as interdisciplinary study.

FORESTRY

Professors Hannah, Reidel, Whitmore; Associate Professors Armstrong, Bergdahl, DeHayes, Donnelly, Forcier, Newton; Assistant Professor Spearing; Lecturer Turner; Extension Associate Professor Bousquet; Extension Assistant Professor McEvoy.

The goal of this Master of Science Program is to provide graduate students with training as forest scientists and the opportunity to further their knowledge and proficiency in some specialized aspect of forestry. The faculty has research interests which span the broad areas of biometry, ecology, genetics, tree improvement, management, pathology, physiological ecology, policy and administration, remote sensing, and silviculture/soils. A student's thesis research is often an integral part of on-going research projects.

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF MASTER OF SCIENCE (FORESTRY)

Undergraduate degree in forestry or in a discipline related to the intended specific field of study. Satisfactory scores on the general (aptitude) portion of the Graduate Record Examination.

MINIMUM DEGREE REQUIREMENTS

Advanced forestry and related courses (15 to 24 hours); thesis research (six to 15 hours), and oral defense.

NATURAL RESOURCE PLANNING

Professor Cassel; Associate Professors DeHayes, Forcier, Hirth, Gilbert, Lindsay, Manning, Newton; Assistant Professors Hendrix, Hudspeth; Research Assistant Professor Clausen; Extension Instructor Marek.

This interdisciplinary program prepares students for professional careers with public and private organizations engaged in various aspects of natural resource planning. Theoretical and practical education is offered in planning the location, development, and coordination of resource uses, services, and related facilities. The water resources emphasis involves the analysis and research of the effects of resource management on water quantity and quality.

In addition to faculty members from the School of Natural Resources, there is participation by faculty members from other departments, including Agricultural and Resource Economics, Civil Engineering, Geography, and Sociology.

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF MASTER OF SCIENCE (NATURAL RESOURCE PLANNING)

Undergraduate degree in an appropriate field and satisfactory scores on the Graduate Record Examination, general (aptitude) section.

MINIMUM DEGREE REQUIREMENTS

Plan A: At least 24 hours in individually prescribed courses numbered above the 200 level and six hours of thesis research, for a total of 30 hours. Thesis preparation and defense required.

Plan B: Completion of 36 hours of advanced courses and independent study prescribed by the candidate's faculty studies committee. A planning project which must be defended is included in the 36 hours.

Irrespective of the plan chosen, students in the Natural Resource Planning Program usually are in residence for two years.
WILDLIFE AND FISHERIES BIOLOGY

Associate Professors Capen, Hirth, LaBar; Assistant Professor Fuller.

The Master of Science program is designed to provide a vehicle for a wildlife or fisheries biologist to develop research abilities and pursue a specialized course of study. Current areas of research emphasis include applied avian ecology; ecology of wetlands; waterfowl and furbearers; behavioral ecology; big game management; nongame bird populations; and freshwater fisheries ecology.

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF MASTER OF SCIENCE (WILDLIFE AND FISHERIES BIOLOGY)

Undergraduate degree in wildlife and fisheries biology or management or in the biological sciences. Satisfactory scores on the Graduate Record Examination, general (aptitude) section.

MINIMUM DEGREE REQUIREMENTS

At least 15 hours of course work accepted for credit in Wildlife and Fisheries Biology and related fields; thesis research carrying a maximum of 15 credits and an oral defense. The Studies Committee may require additional undergraduate preparation without credit toward the degree in instances of perceived deficiency.

COURSES OFFERED

FORESTRY (FOR)

221 Forest Soils and Site Relations. Forest soils from an ecological perspective. Profile development, physical properties, roots, water relations, nutrient cycling, topographic factors, site quality, and the potential to produce biomass. Prerequisites: 120, Plant and Soil Science 161 and permission. Three hours. Hannah. Alternate years, 1985-86.

231 Integrated Forest Protection. Integration of concepts of forest protection using a holistic ecological approach to forest pest management. Detection, population dynamics, evaluation, prediction, and pest management considerations. Prerequisites: 123, 133, 134 or permission. Three hours. Bergdahl. Alternate years, 1984-85.

242 Advanced Forest Biometry. Advanced principles of estimation, prediction, inventory, and evaluation of forest resources. Use of system analysis techniques in natural resource management. Prerequisite: 140 or permission of instructor. Three hours. Newton. Alternate years, 1985-86.

252 Forest Valuation. Appraisals of forests and associated real estate. Forest real estate principles. Prerequisites: 151 or six credit hours of economics. Two or three hours.

254 Advanced Natural Resource Policy. Advanced seminar in natural resource policy; with emphasis on current issues in forest policy. Prerequisites: Graduate or advanced undergraduate standing; 251 or permission of the instructor. Three hours. Reidel.

285 Advanced Special Topics. Advanced special topics courses or seminars in forestry beyond the scope of existing formal courses. Prerequisites: Graduate or advanced undergraduate standing and permission of instructor. Credit as arranged.

324 Advanced Forest Genetics. Discussion of the adaptive and physiological nature of genetic variation in forest trees. Analysis of procedures, results, and interpretations of selected forest genetics research. Prerequisites: Statistics 211; FOR 124 or equivalent and permission. Three hours. DeHayes. Alternate years, 1985-86.

382 Seminar in Research Planning. See Natural Resources 382. One hour.

385 Selected Problems in Forestry. Advanced readings, or a special investigation dealing with a topic beyond the scope of existing formal courses. Prerequisite: Graduate standing and permission of instructor. Credit as arranged.

391 Master's Thesis Research. Credit as arranged.

NATURAL RESOURCES (NR)

235 Legal Aspects of Planning and Zoning. Comparison of Vermont planning and zoning law with that of other states. Case studies in planning, zoning, and land use controls. Prerequisite: Senior standing. Three hours.

244 Quantitative Assessments of Natural Resources. Principles associated with inventorying selected natural resources. Survey of measurement and estimation techniques for land, timber, wildlife, fisheries, surface water, and recreation. Prerequisite: One course in statistical methods, one 200-level natural resource course, and permission of instructor. Three hours. Newton. Alternate years, 1985-86.

262 International Problems in Natural Resource Management. Discussion of problems associated with the management of natural resources which have international implications. Topics may include deforestation, desertification, fisheries, wildlife, refuses, fuelwood, pollution, etc. Prerequisites: Senior standing and permission. Three hours. LaBar. Alternate years, 1985-86.

272 Environmental Impact Assessment. Comprehensive perspective on methods and problems of assessing environmental and social impacts arising from natural resource management. Prerequisite: Senior standing. Three hours. Hendrix.

276 Water Quality Analysis and Interpretation. Study of behavior of major contaminants in rivers, streams, and groundwaters. Laboratory analysis of selected water qual-
ity parameters and data interpretation. **Prerequisites:** Chemistry 3 or equivalent. Senior standing. Three hours. Cassell.

278 Water Resources Principles. Study of basic physical and chemical principles underlying the behavior of lakes, streams, and rivers. Introduction to mathematical modeling of aquatic systems. **Prerequisites:** Math 19 and Chemistry 3 or equivalent. Senior standing. Three hours. Cassell, Clausen.

285 Advanced Special Topics in Natural Resource Planning. Advanced special topics in natural resource planning beyond the scope of existing formal courses. **Prerequisites:** Graduate or senior standing and permission of instructor. Credit as arranged.

380 Seminars in Natural Resources. Presentation and discussion of advanced problems, research, and current topics in natural resources by faculty, graduate students, and outside guest speakers. **Prerequisites:** Graduate student standing in Natural Resources. 0.5 credits/semester, maximum two credits. School of Natural Resources faculty (Chairman of Curriculum Committee).

382 Seminar in Research Planning. Discussions of the planning and activities associated with graduate student projects and research. **Prerequisites:** Graduate standing or permission. One hour.

391 Master's Thesis/Project Research. Credit as arranged.

**RECREATION MANAGEMENT (RM)**

225 Economics of Outdoor Recreation and Tourism. A socioeconomic analysis of recreation and tourism as an industry. Emphasis on regional, state, and community impact. **Prerequisites:** Economics 11, 12 or Resource Economics 61. Three hours. Gilbert, Bevins.

235 Outdoor Recreation Planning. The planning of large wildland areas for outdoor recreation. Emphasis on the planning process relative to the leisure time use of natural resources. **Prerequisites:** 150 or Forestry 140: permission or graduate standing. Three hours. Lindsay.

240 Wilderness and Wilderness Management. History, philosophy, and management of wilderness, national parks and related areas. **Prerequisites:** 235 or permission. Three hours. Manning.

**WILDLIFE AND FISHERIES BIOLOGY (WFB)**

232 Ichthyology. Biology of fishes. Study of the structure and function of systems; behavior and ecology of modern fishes. **Prerequisites:** Zoology 104 or 219 or equivalent, WFB 161. Three hours. LaBar. Alternate years, 1984-85.

264 Nongame Wildlife Management. Selected topics which emphasize nongame birds and mammals: endangered species, vertebrate pests, urban wildlife, specialized survey and management practices. **Prerequisites:** 174. Three hours. Capen.

271 Wetlands Ecology and Marsh Management. Structure and dynamics of natural and manmade marsh systems, emphasis on applied ecology, freshwater habitats and their wildlife populations. **Prerequisites:** 174 or permission. Three hours. Fuller.

273 Wetlands Ecology and Marsh Management. Qualitative and quantitative assessment of marsh habitats and wildlife populations, emphasizing management of waterfowl and fur-bearers. Technical paper required. One weekend trip. **Prerequisites:** 150; previous or concurrent enrollment in 271. One hour. Fuller.

275 Wildlife Behavior. Behavior and social organization of game and nongame species as they pertain to population management. **Prerequisites:** One year of biology, an ecology course, 74 or 174 recommended. Three hours. Hirth.

285, 286 Advanced Special Topics. Credit variable.

387, 388 Graduate Special Problems. Advanced readings or special investigation dealing with a topic beyond the scope of existing formal courses or thesis research, culminating in an acceptable paper. **Prerequisite:** Permission of instructor. Credit as arranged.

391 Master's Thesis Research. Credit as arranged.

**RECOMMENDED COURSES IN OTHER COLLEGES**

AREC 222 Natural Resources Evaluation

AREC 233 Rural Planning

AREC 234 Practicum in Rural Planning

CE 230 Urban Planning Techniques

CE 231 Urban Planning Analysis

CE 232 Community Design

GEOG 287 Spatial Analysis I

SOC 205 Rural Communities in Modern Society

SOC 207 Community Organization and Development

**OBSTETRICS AND GYNECOLOGY**

(See page 101.)

**ORTHOPAEDIC SURGERY**

(See page 101.)

**PATHOLOGY (PATH)**

Professors Clemmons, Craighead (Chairman), Howard, Korson, Perl, Stark, Trainer; Associate Professors MacPherson, E. McQuillen, J.B. McQuillen, Perl, Tindle, Winn; Assistant Professors Boutill, Hardin, Krawisz, Lee, Morrow, Mossman, Pendlebury, Sharp; Research Assistant Professors Adler, Allen, Heintz, Huber.

Research interests are in the fields of anatomic, clinical, and experimental pathology. Current studies include histochecmy, connective tissue pathology and biochemistry, electron microscopy, neoplasia, teratology, immunopathology, virology, and lung diseases.

**REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF MASTER OF SCIENCE**

Satisfactory undergraduate or graduate course work in chemistry and the biological sciences. Microbiology and immunology are also recommended but not required. Satisfactory scores on the Graduate Record Examination, general (aptitude) section. Persons interested in a Ph.D. program may wish to consider the interdisciplinary program in Cell Biology in which Pathology participates.
MINIMUM DEGREE REQUIREMENTS

Anatomy 311 (three hours), Pathology 305 (three hours), Biochemistry 301-302 (six hours); additional approved courses; thesis research (six to 15 hours).

COURSES OFFERED

301 General Pathology. A study of the processes of injury, repair, neoplasia, degeneration, etc., as they affect cells, tissues, and the human patient. For medical students. Prerequisite: Departmental permission. Three hours. Staff.

302 Systemic Pathology. Introduction to diseases, pathologic processes with particular reference to their effects on various organ systems. Instruction in clinical laboratory medicine is correlated with work in systemic pathology. Prerequisites: 301 and departmental permission. Eight hours. Staff.

305 Pathobiology of Disease. Basic state-of-the-art survey of Pathobiological Mechanisms for graduate and postdoctoral students who are not candidates for M.D. degree, advanced medical students, and pathology residents. Prerequisites: Required: Basic background in chemistry including biochemistry. Desirable: Microbiology including fundamental immunology, physiology. Three hours.

306 Pathobiology Laboratory. Basic histopathological features of fundamental disease processes. Prerequisite: Concurrent enrollment in 305. One hour.

391 Master's Thesis Research. Investigation of a research topic under the direction of an assigned staff member, culminating in an acceptable thesis. Credit as arranged.

395 Special Topics in Pathology: Immunopathology. An in-depth analysis is planned into the role of the immune system in disease processes. Discussions center on current and controversial areas of immunopathology. Prerequisites: Immunology, (Medical Microbiology 223) and PATH 305, or departmental permission. Two hours. Staff.

PHARMACOLOGY (PHRM)

Professors J. Bevan (Chairman), Gans, Iaffe, McCormack; Associate Professors R. Bevan, Neuman, Reit, Scollins; Assistant Professors Ershler, Hacker, Stewart; Visiting Professor Maxwell.

Research interests of the staff include: pharmacokinetics and pharmacodynamics of antiparasitic and anticancer drugs; synthesis, properties and structure-activity relationships of biologically active nitrogen heterocyclic compounds; mechanisms of adaptation to chemical injury in mammalian liver; regulation of cardiovascular function, pharmacological and structural differences in blood vessels, growth and development of the vasculature, neurohumoral synaptic transmission and microcirculatory regulation; derangements of vascular properties in disease states such as hypertension, diabetes, and stroke.

A pre- and post-doctoral training program in the clinical pharmacology of anticancer drugs is offered in cooperation with the Vermont Regional Cancer Center.

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREES OF MASTER OF SCIENCE AND DOCTOR OF PHILOSOPHY

Year courses in biology, organic chemistry, physics, analytic geometry and calculus; physical chemistry and/or a reading knowledge of one foreign language may be addi-

tional prerequisites, depending on the requirements of the research supervisor; acceptable scores on the general (verbal, quantitative) and subject (advanced) sections of the Graduate Record Examination.

MINIMUM REQUIREMENTS FOR THE MASTER OF SCIENCE DEGREE

Pharmacology 301-302, 303, 372, 381, 391; supporting courses in Biochemistry and Physiology.

MINIMUM REQUIREMENTS FOR THE DOCTOR OF PHILOSOPHY DEGREE

Physiology and Biophysics 301; Biochemistry 301, 302. Pharmacology 301, 302, 303, 328, 372, 381, 491; Biometrics and Applied Statistics 308.

COURSES OFFERED

301 Medical Pharmacology. The chemical and biological properties of drugs. Prerequisite: Departmental permission. Six hours. Staff.

302, 303 Pharmacological Techniques. Experiments conducted under supervision in the areas of drug metabolism, modes of drug action, physicochemical properties of drugs, bioassay, and toxicology. Prerequisite: Departmental permission. Two hours, by arrangement. Staff.

328 Introduction to Medicinal Chemistry. Important classes of drugs are surveyed. Emphasis is placed on relationships between physicochemical properties and pharmacologic activity; synthetic aspects are considered. Prerequisites: Chemistry 131-132. Open to undergraduates with permission of instructor. Three hours. McCormack.

372 Special Topics. Topics of current interest and importance in pharmacology are considered in depth through presentations by staff, students, and visiting scientists. Prerequisite: Departmental permission. Credit variable, one to three hours. Staff.

373 Readings in Pharmacology. Intensive directed reading in one area of pharmacology. Pharmacology students must choose a topic outside thesis research area. Term paper and seminar on selected topic required. Prerequisite: Departmental permission. Two hours, by arrangement. Staff.

381 Seminar. Current developments in pharmacology are presented for discussion by students. Prerequisite: Departmental permission. One hour. Staff.

391 Master’s Thesis Research. Credit as arranged.

491 Doctoral Dissertation Research. Credit as arranged.

PHILOSOPHY (See page 101.)

PHYSICS (PHYS)

Professors Aris, Brown, Crowell, Detenbeck, Krizan, Lambert (Chairperson), Nyborg, Scarfone; Associate Professors Rankin, Sachs; Assistant Professor Spartanian; Research Associate Professor Miller.

The Department of Physics offers experimental and theoretical opportunities for research in the fields of astrophysics,
biological physics, solid state physics, and the physics of materials.

Astrophysical research in the Department is in the general area of experimental radio astronomy, particularly of pulsars and of the interstellar medium. Observations are carried out using the major instruments of the U.S. National Observatories and generally involve computer analysis and interpretation.

In the field of biophysics the experimental projects are concerned with the application of Mossbauer spectroscopy, with biophysical and medical ultrasound and with light scattering. Mossbauer experiments are carried out to determine the electronic structure at the active site of iron-containing proteins and enzymes. In biophysical ultrasound the research is aimed at understanding the physical principles involved when ultrasound interacts with and perturbs living systems. Medical applications include ultrasonic tissue characterization, ultrasonic thermometry, perfusion monitoring, and analysis of the geometry of brain function. The scattering of highly coherent laser light is being applied to measurements of the mobility of single-cell organisms and to other time-dependent changes in their structures. There are theoretical research programs devoted to both the interpretation of the ultrasonic work and to the applications of statistical mechanics and quantum mechanics to fundamental properties of biomacromolecules and biomembranes.

Materials research includes experimental programs concerned with the interaction of gas molecules with metal surfaces using ultra high vacuum, radiotracer, photoelectron emission, and thin film techniques. The mechanisms of photoelectron emission, and the general area of electromagnetic interactions in metals are being investigated using vector photoelectric methods in near and far ultraviolet regions of the spectrum. Additional research involves the optical properties of solids and vapor streams as well as device physics, and the properties of semiconductor-oxide or electrolytic interfaces.

Theoretical and computational research programs in condensed matter physics are concerned with the electronic, lattice dynamical, magnetic and superconducting properties of a variety of materials including transition and rare earth metals, amorphous metals, liquid metals, ordered and disordered alloys, mixed crystals, and heavily doped elemental and compound semiconductors. The analytical and numerical methods of self-consistent band theory, multiple scattering theory, many-body theory, and Green's function formalism are some of the general approaches used in this research. In addition, theoretical work is conducted on the interactions between intense laser radiation and solids in such processes as heating, melting, vaporization, and plasma production.

Theoretical research in the statistical mechanics of plasmas, quantum field theory and particle physics, multiple-time scale perturbation theory, relativity, and many-body theory is carried on, as well.

Some of the above projects are carried out with the active cooperation of faculty in other science departments and opportunities exist for collaborative research with such other departments and groups of the University as Chemistry, Physiology and Biophysics; Cell Biology, Electrical and Mechanical Engineering, Medical Radiology, and the Academic Computer Center.

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF MASTER OF SCIENCE

Undergraduate majors in science, engineering, or mathematics are considered for admission to the program. Satisfactory scores on the Graduate Record Examination (general and subject section) are required.

REQUIREMENTS FOR ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE

Physics 211, 213, and 273; two additional semester courses in physics above the sophomore level; two semester courses in mathematics above the sophomore level.

MINIMUM DEGREE REQUIREMENTS FOR THE DEGREE OF MASTER OF SCIENCE

A total of 30 credit hours including a minimum of six hours of thesis research and at least nine hours of Physics courses numbered over 300.

The Department also offers programs leading to the degrees of Master of Science in Engineering Physics, Master of Arts in Teaching, and Master of Science for Teachers of Physical Science. As a participant in the Materials Science program, the Department sponsors candidates for the degrees of Master of Science and Doctor of Philosophy in Materials Science. Details are available elsewhere in the catalogue and also from the Physics Department.

COURSES OFFERED

201, 202 Experimental Physics. Experiments in classical and modern physics. Each student selects laboratory experiments appropriate to his/her background and interests. Prerequisites: 16 or 128, Math 121 or 123; junior standing. Three hours per semester, four semesters maximum.

211 Mechanics. Newtonian dynamics of particles and systems of particles. Extensive use is made of descriptive, analytical, and approximational techniques. Prerequisites: 16 or 24; Math 121 or 123. Three hours.

213 Electricity and Magnetism. Theory of electrostatic fields, and magnetic fields of steady currents. Electrical and magnetic properties of matter and electromagnetic energy relationships. Vector analysis developed as necessary. Prerequisites: 16 or 25; Math 121 or 123. Three hours.

222 Advanced Biological Physics. Sound and electromagnetic waves, the latter including light, micro-waves and x-rays; ionizing particles and radiation. Interaction of these physical agents with biological systems. Prerequisites: Chemistry 2; Math 121 or 123; experience in applying differential equations. Departmental permission required. Four hours. Alternate years, 1984-85.

258 Relativity. Development of Einstein's theory of special relativity. Lorentz transformation, time dilation, length contraction, mass variation, relative velocities. In-
troduction to four-dimensional space. Concepts of general
relativity. Prerequisite: 128. Three hours. Alternate years,
1985-86.

264 Introduction to Elementary Particles. Theoretical and
experimental aspects of elementary particles including their
properties, classification schemes, symmetries, conserva-
tion laws, fundamental interactions, models of particle
structure, special topics as time allows. Prerequisites: 128,
213. Three hours.

265 Thermal Physics. Basic concepts of thermodynamics
including equilibrium conditions in homogeneous and
heterogeneous systems. Introduction to kinetic theory and
statistical mechanics. Prerequisites: 128 and Math 121 or
123. Three hours. Alternate years, 1984-85.

273 Quantum Mechanics I. Introduction to nonrelativistic
quantum mechanics. Schroedinger equation and applica-
tions to simple systems. Prerequisites: 128, 211. Three
hours.

295, 296 Special Topics. Lectures, readings, or laboratory
studies. Format and subject matter at the instructor's discre-
tion. Prerequisite: Permission of instructor. One, two, or
three hours.

301 Mathematical Physics. Introduction to basic mathe-
atical methods of theoretical physics; vector and tensor
analysis, partial differential equations, orthogonal func-
tions, complex variables and variational techniques. Pre-
quisites: 211, 214. Three hours. Alternate years, 1985-86.

311 Advanced Dynamics. Classical Mechanics presented
as the basis of the concepts and methods of modern physics.
Variational, Lagrangian, and Hamiltonian formulations,
canonical transformations, continuous systems. Prereq-
usites: 211. Three hours. Alternate years, 1984-85.

313 Electromagnetic Theory. Development of Maxwell's
theory of electromagnetism emphasizing its physical basis
and the modes of mathematical description. Prerequisite:
214. Three hours. Alternate years, 1984-85.

321 Seminar in Theoretical Physics. For research students
interested in pursuing topics of general and departmental
research interest in theoretical physics. Prerequisite: Per-
mission of instructor. Offered as occasion warrants. Credit as
arranged.

323 Seminar in Contemporary Physics. Topics of current
interest in physics to be offered as student and faculty inter-
est warrants. May be repeated for credit with departmental
approval. Prerequisite: Permission of instructor. Credit as
arranged.

331 Seminar in Biological Physics. For research students
in the field of biological physics. Lectures, reports, and
directed readings related to the research of the Department
and the field generally. May be repeated for credit with de-
partmental approval. Prerequisite: Permission of instruc-
tor. Credit as arranged. Offered as occasion warrants.

341, 342 Solid State Physics. Introduction to crystal sym-
metry and the reciprocal lattice. Crystal binding and lattice
vibrations. Thermal, electrical, and magnetic properties of
solids, free electron theory of metals, and band theory. Pre-
erequisites: 214, 265, and 273 or their equivalents; permis-
sion of instructor. Three hours. Alternate years, 1985-86.

351 Seminar in Physics of Materials. For research students
in the field of the physics of materials. Lectures, reports,
and directed readings related to the research for the depart-
ment and the field generally. May be repeated for credit with
departmental approval. Prerequisite: Permission of instruc-
tor. Credit as arranged. Offered as occasion warrants.

362 Quantum Mechanics II. Mathematical and physical
foundations of nonrelativistic quantum mechanics from the
unifying point of view of Dirac: Symmetry operations and
the algebraic structure of quantum mechanics are empha-
sized. Prerequisite: 273. Four hours. Alternate years,
1984-85.

375 Kinetic Theory and Statistical Mechanics. Review of
thermodynamics. Elements of kinetic theory including the
Boltzmann equation, H Theorem and transport pheno-
mena. Introduction to equilibrium statistical mechanics,
both quantum and classical. Prerequisites: 265, 273. Three
hours. Alternate years, 1985-86.

391 Master's Thesis Research. Credit as arranged.

491 Doctoral Dissertation Research. Credit as arranged.

The following courses are offered as the occasion warrants
by members of the Department. For descriptions, see the
Department Chairperson.

314 Classical Electrodynamics
343 Advanced Solid State Physics
373 Relativistic Quantum Mechanics
374 Quantum Field Theory
376 Statistical Mechanics

PHYSIOLOGY AND BIOPHYSICS (PSLB)

Professors Alpert (Chairman), Gibbons, Hendley, Loo,
McCroy, Associate Professors Halpern, Webb; Assistant
Professors Evans, Hamrell, Kimura, McLaughlin, Patlak,
Warshaw; Research Associate Professors Maughan, Stire-
walt; Research Assistant Professors Hultgren, Litten,
Mulieri.

Specific areas of interest include mechanics and energetics
of cardiac and skeletal muscle; respiration; properties of
vascular and bronchial smooth muscle; cardiac electrophys-
iology and excitation-contraction coupling; molecular
basis of contraction of skeletal and cardiac muscle; neuro-
chemistry of brain function; effects of insulin on skeletal
muscle; reproductive physiology; protein turnover; synap-
tic physiology and pharmacology; cholinergic and adren-
ergic receptor function; changes in cation transport associ-
ated with human hypertension; and electrophysiology of
the central nervous system. Opportunities exist in the
Department of Physiology and Biophysics for multi-
disciplinary studies in neurobiology, pulmonary biology,
cardiovascular biology, cell biology, and biological motili-
ty. For example, coordinated studies are underway on:
the biochemistry, mechanics, energetics, and excitation-con-
traction coupling of muscle from hypertrophied hearts;
and, on the neurochemistry and central nervous system
regulation of the circulatory system, and vascular smooth
muscle properties in hypertensive rats.

Preference in admission and awarding financial support
will be given to Ph.D. applicants.

REQUIREMENTS FOR ADMISSION TO GRADUATE
STUDIES FOR THE DEGREE OF
MASTER OF SCIENCE

Satisfactory performance on general (aptitude) section of
Graduate Record Examination. Year courses in biology, or-
ganic chemistry, and physics. These requirements must be
completed by the end of the first year of residency.
PLANT AND SOIL SCIENCE (PSS)

Professors Bartlett, Boyce, MacCollom, and Wood; Associate Professors Magdoff, Murphy, Parker, and Pellett; Extension Professor Way; Extension Associate Pro­fessors Costante, Gotlieb (Chairman); Extension Assistant Professors Berkett, Nielsen, Perry; Lecturers Margolis, Villamil.

Current research projects are concerned with the solution of horticultural and agronomic problems with special emphasis on environmental physiology, soil chemistry, plant nutrition, and pest management. Areas of research include winter hardiness of fruits, and woody and herbaceous ornamentals; cultural and environmental interrelationships as they affect plant growth, crop adaptation, and variety; pasture renovation and marginal land utilization; crop establishment and soil productivity; soil chemistry of the rhizosphere; behavior of nitrogen in the soil; nutrient availability to plants; agricultural waste management; temperature effects on soil water retention and transmission; biological control of insect pests, disease, and weeds; integrated pest management for control of insects, diseases and weeds.

COURSES OFFERED

301 Medical Physiology and Biophysics. Function in the whole human organism, and at the cellular, tissue, and organ levels, considered biologically and physically. Prerequisite: Permission of department chairman. Eight hours. Staff.

302 Neuroscience. A correlated presentation of the neuro­anatomy and neurophysiology of mammalian CNS. Same course as Anatomy 302. Prerequisite: Permission of instructor. Four hours. Anatomy and Physiology staff.

303 Special Problems in Physiology. Various problems are covered by means of lectures, reports, and directed reading. Prerequisites: 304-305; permission of department chairman. Credit as arranged. Staff.

304 Physiology and Biophysics. Cellular Biophysics with emphasis on the underlying mechanisms of excitation, membrane transport, and muscular contraction. Current research directions discussed. Prerequisites: Permission. Four hours. Dr. Patlak. Fall.

305 Physiology and Biophysics. Organ systems and mechanisms for maintaining homeostasis. Specific areas of controversy examined. Prerequisites: Permission. Four hours. Evans, McLaughlin.

308 Biometrics and Applied Statistics. Introduction to the rational use and evaluation of statistical methods in planning experiments and interpreting biological data. Biometrics laboratory included. Course limited to 12 students. Prerequisites: Math 110 or equivalent, and permission of instructor. Five hours. McCrorey. Fall.

309 Synaptic and Conducting Membranes. The mechanisms of synaptic transmission and nerve and muscle conduction explored with particular emphasis on molecular structure and function. Prerequisites: 304-305 and 302; Biochemistry 301, 302; permission of instructor. Three hours. Webb. Alternate years.

310 Molecular Basis of Biological Motility. Molecular basis of muscle contraction, biological movement. Problems of energetics, mechanics, chemistry of biological motility. Special emphasis on contraction of skeletal mus­cle. Lectures and conferences. Prerequisites: 304-305; Biochemistry 301, 302; permission of instructor. Three hours. Alpert and/or staff. Alternate years.

313 Seminar on Endocrine Physiology. Devoted to a study of current problems in endocrine research with major emphasis on the molecular mechanism of action of hor­mones. Prerequisites: 304-305 or Endocrinology 271; Biochemistry 301-302; permission of instructor. Three hours. Low. Alternate years.

317 Advanced Neuroscience. Current multidisciplinary approaches to the study of brain and behavior, particularly neurophysiology and transmitter neuropharmacology. Students pursue areas of special interest. Prerequisite: 302, Psychology 222, or permission. Three hours. Hendley and/or staff. Alternate years.

323 Principles and Elements of Biomedical Instrumentation. Instrument methodology for biologically trained re­searchers. Topics: basic electrophysics; transducers; con­cepts and manipulation of bioelectric and other signals; physiological instrument systems. Laboratory supports theoretical ideas. Prerequisite: Permission of instructor. Five hours. Halpern, staff. Alternate years, Fall 1984, 1986.

381 Seminar. Presentation and discussion by advanced students and staff of current developments and research in the field. Prerequisite: Permission of department chairman. One hour per semester.

391 Master's Thesis Research. Credit as arranged.

491 Doctoral Dissertation Research. Credit as arranged.
A student's thesis research will be an integral part of the ongoing research efforts of the department.

**REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF MASTER OF SCIENCE**

An undergraduate major in an appropriate agricultural, environmental, biological, or physical science. Satisfactory scores on the Graduate Record Examination, general (aptitude) section.

**REQUIREMENTS FOR ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE**

Satisfactory completion of one academic year of graduate study in the Department of Plant and Soil Science, a written comprehensive examination.

**MINIMUM DEGREE REQUIREMENTS**

Eighteen to 22 hours in Plant and Soil Science and closely related fields; satisfactory participation in seminars during residency; thesis research (eight to 12 hours).

**REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF DOCTOR OF PHILOSOPHY**

An undergraduate major in an appropriate agricultural, environmental, biological, or physical science. Satisfactory scores on the Graduate Record Examination, general (aptitude) section.

**REQUIREMENTS FOR ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF DOCTOR OF PHILOSOPHY**

Satisfactory completion of two academic years of graduate study in the Department of Plant and Soil Science at the University of Vermont. With the approval of the Dean of the Graduate College and the Department of Plant and Soil Science, a master's degree may be accepted in partial fulfillment of this requirement.

Satisfactory completion of a written and oral qualifying doctoral examination as prescribed by the Department.

A reading knowledge of a modern foreign language appropriate to the student's specialty. Proficiency in other areas appropriate to the student's specialty may be substituted for the language requirement with the approval of the Studies Committee. This proficiency does not count toward course requirements for the degree.

**MINIMUM DEGREE REQUIREMENTS**

The course requirements are as follows: a total of at least 40 credit hours of which a minimum of 30 must be taken in Plant and Soil Science and closely related disciplines (e.g., Botany, Chemistry, Forestry, Microbiology and Biochemistry, Geology). Satisfactory participation in seminars during residency is required. All doctoral students must take part in the Department's undergraduate teaching program.

**COURSES OFFERED**

202 Micrometeorology. Theoretical and practical considerations of the micrometeorological factors that affect plant growth and agricultural practices. **Prerequisite:** 11. Three hours. Alternate years, 1985-86.

207 Water Relations of Plants. See Forestry 229. Alternate years, 1985-86.

210 Soil Erosion and Conservation. General hydrological processes involved in surface runoff and resultant soil erosion; land management techniques for controlling soil and sediment pollution. **Prerequisites:** 161, Math 2 or 9, Chemistry 3. Three hours.

215 Weed Science. Principles and practices of weed science, including weed identification, ecology, reproduction, control, and integrated pest management. **Prerequisites:** 11, 161. Three hours. Murphy. Alternate years, 1984-85.

221 Tree Fruit Culture. Theory and practice of modern commercial fruit science. Nutrition and cultural responses to various management practices. **Prerequisites:** 11, 61. Three hours. Boyce.

261 Soil Classification and Land Use. Classification of soils throughout the world as they relate to soil development and land use. Three Saturday field trips. **Prerequisite:** 161 or a total of six hours in ecology, geography, or geology. Three hours. Bartlett. Alternate years, 1984-85.

264 Chemistry of Soil and Water. A biologically biased study of the colloidal chemistry of soil and its interfaces with roots, water, and air. **Prerequisites:** 161, two semesters chemistry. Four hours. Bartlett.

266 Soil Physics. Mathematical and physical principles of the soil-water-plant interaction and its relationship to production and management. **Prerequisites:** 161, Physics 5-6 or Chemistry 1-2. Three hours. Bartlett. Alternate years, 1985-86.

281 Seminar. Presentation and discussion of papers on selected topics of current interest by students and staff. **Prerequisite:** Senior standing. One hour. Staff.

297 Special Topics. Lectures, laboratories, readings, field projects, surveys, or research designed to provide specialized experience in horticulture, agronomy, soils, entomology and integrated pest management. **Prerequisites:** Senior standing and/or permission. One to three hours. Staff.

301 Plant Science Colloquium. Graduate student and staff discussion of current research topics in plant science. One hour. Staff.

302 Soil Science Colloquium. Graduate student and staff discussion of current research topics in soil science. One hour. Staff.

381 Graduate Special Topics. Advanced readings and discussion of horticulture, crops, or soils research literature. Three hours. Staff.

391 Master's Thesis Research. Credit as arranged.

491 Doctoral Dissertation Research. Credit as arranged.

**POLITICAL SCIENCE (PSCI)**

Professor Emeritus Little; Professors Hilberg, Wertheimer (Chairperson); Associate Professors Bryan, Mahler, Nelson, Nicolla, Pacy; Assistant Professors Burke, Feldman, Guenslen, Haltom, Holland, Rice, Smela.
Research interests of the Department of Political Science and the various library and data processing resources available enable graduate students to undertake research in American political institutions; public law; public policy; political behavior; comparative political systems; international relations; political philosophy and empirical political theory.

**REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF MASTER OF ARTS**

Twelve hours of Political Science at the junior-senior level; supporting courses in other social sciences; satisfactory scores on the Graduate Record Examination, including the subject (advanced) examination in political science.

**MINIMUM DEGREE REQUIREMENTS**

An approved program of 24 hours in course work, including Political Science 283 and not more than six hours in related fields: thesis research (six hours).

**COURSES OFFERED**

Admission to the following courses for graduate credit requires the approval of the Department.

211, 212 History of Political Thought. First semester: political thought from Plato to Burke. Second semester: Political thought of the 19th and 20th centuries emphasizing socialist ideologies from Marx to Marcuse. Prerequisite: 31, three hours at the 100 level. Three hours. Holland, Wertheimer.

213 Justice and Equality. (Same as Philosophy 242.) An examination of contemporary normative theories of distributive justice and equality. Prerequisite: 31, and three hours at the 100 level. Three hours. Wertheimer; Kuflik, Sher (Philosophy).

216 American Political Thought. American political thought from the colonial period to recent times. Prerequisite: 21, three hours at the 100 level. Background in American history is recommended. Three hours.

221, 222 Constitutional Law. First semester: emphasis on developing skills of legal analysis. Historical origins and general principles of constitutionalism. Second semester: selected topics in constitutional law. Prerequisites: For 221, 121; 221 for 222. Three hours. Halton.

227, 228 International Law. Principles and applications of public international law. Prerequisite: For 227, 51, three hours at the 100 level; for 228, 227. Three hours. Little.

231 The Congressional Process. Organization, procedure, and behavior of the chambers of the U.S. Congress. Prerequisite: 21, three hours at the 100 level. Three hours. Nelson.

232 Public Policy Analysis. An examination of the principles for choosing between alternative public policies. A discussion of basic analytical tools, e.g. welfare economics, cost-benefit analysis, operations research. Prerequisite: 21, 31, and three-hours at the 100 level; Economics 11-12 are strongly recommended. Three hours. Nivola.

233 Issues of Public Policy. An analysis of selected problems of public policy, e.g. welfare, macroeconomic policy, regulation, energy, and housing. Prerequisite: 21, 31, and three hours at the 100 level; Economics 11-12 are strongly recommended. Three hours. Nivola.

234 The Presidency. The functions and activities of the President and his/her staff. Prerequisites: 21, and three hours at the 100 level. Three hours. Burke.

239 American Politics. The politics of decision-making in the American political system. Prerequisite: 21, three hours at the 100 level. Three hours. Rice.

241 Public Management. Analysis of major elements of management in public sector (organization, personnel, budgeting) with special attention to problems arising from political imperatives generated by a democratic society. Prerequisite: 141. Three hours. Bryan, Burke.

242 Topics in Public Administration. The political problems of the administrative state. Prerequisite: 141. Three hours. Bryan, Burke.

250 The Craft of Diplomacy. Emphasis on experiences and reflections of diplomatic personalities, supplemented by studies of specialists. Prerequisite: 51, three hours at the 100 level. Three hours. Pacy.

251, 252 American Foreign Policy. First semester: constitutional principles, institutional factors, and historic traditions in the formation of foreign policy. Second semester: contemporary policies toward specified countries. Prerequisite: For 251, 21, 51, three hours at the 100 level; for 252, 51 and three hours at the 100 level. Three hours. Hilberg.

256 International Organization. Theory and practice in supranational institutions. Prerequisite: 51, three hours at the 100 level. Three hours. Pacy.

261 Urban Government and Politics. An analysis of metropolitan areas in terms of their governments, problems, and roles. Prerequisite: 21, three hours at the 100 level. Three hours. Nivola.

264 State Administration. Problem in planning, policy development, and program coordination. Prerequisite: 141. Three hours. Bryan.

265 Intergovernmental Relations. Problems of the Federal system. National-state-local cooperative administration of selected public functions. Prerequisite: 21, three hours at the 100 level. Three hours. Bryan, Nivola.

273 Comparative Political Analysis. An intensive examination of selected topics in comparative politics. Prerequisite: 71, one course numbered 171-179. Three hours. Mahler.

278 Foreign Policy of the U.S.S.R. See History 278. Prerequisite: 51, three hours at the 100 level. Three hours. Daniels.

283 Methods of Political Science Research. An examination of advanced problems in political methods. Topics include: measurement, correlation, multiple regression, and scaling techniques. Prerequisite: 183, or equivalent with permission of instructor. Three hours.

284 Public Opinion: Theory and Research I. (Same as Sociology 241.) Prerequisite: Political Science 183 (Sociology 100). Three hours. Berkowitz, Danigelis (Sociology).

285 Public Opinion: Theory and Research II. (Same as Sociology 242.) An examination of the theories of public opinion. Topics include: attitude formation and change, political ideology, alienation and allegiance, political socialization, tolerance, and political extremism. Prerequisite:
site:Political Science 284 (Sociology 241). Three hours. Nixon, Sampson (Sociology).

295, 296  Seminar. Selected topics in political science. Prerequisite: As specified. Three hours.

297, 298  Readings and Research. For advanced undergraduate and graduate students. Three hours.

391 through 393  Master's Thesis Research. Credit as arranged.

PSYCHOLOGY (PSYC)
Professor Emeritus Anscherbach; Professors Achenbach, Albee, Burchard, Forgays, Howell, Joffe, Kapp, Lawson, Leitenberg, Musty (Chairperson); Associate Professors Bond, Gordon, Hasazi, Kessler, Leff, Rosen, Yadav; Assistant Professors Bouton, Bronstein, Compa, Lorenz, Miller, Rothblum; Adjunct Associate Professor Copeland; Adjunct Assistant Professors Diettel, Does, Schwab, Stoltenberg, Thompson; Research Assistant Professor S. Burchard; Clinical Assistant Professors Caring, Peyer, Pithers, Solomon; Adjunct Instructors Benay, Reimondi; Clinical Instructor Ciofari.

The Ph.D. program in General and Experimental Psychology began in 1964, and now includes ongoing research in a variety of areas. Details of ongoing research are available upon request from the Chairperson, Department of Psychology. Students in this program are involved early in independent research projects. Further information on specific program specialties can be obtained from the Chairperson, Department of Psychology.

The Ph.D. program in Clinical Psychology began in 1969. It places equal emphasis on research and clinical training. The clinical program is fully accredited by the American Psychological Association. Further information on the types of clinical facilities and the research interests of the clinical faculty can be obtained from the Chairperson, Department of Psychology.

Applicants should apply for the Ph.D. degree only. Students whose goal is a terminal master's degree are not accepted. The application deadline for admission is February 1. All supporting materials, including GRE scores, must be received by February 1.

In 1974, a small number of students were admitted to the Ph.D. programs on a part-time basis. The intention is to serve neglected Vermont constituencies such as full-time mental health workers with families and persons with responsibilities at home. The part-time graduate program is not otherwise possible. A justification of the necessity to attend part-time must accompany the candidate's application. To be eligible for acceptance, applicants must have fulfilled prerequisites and minimum requirements listed below.

REQUIREMENTS FOR ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF MASTER OF ARTS
A major or its equivalent in undergraduate psychology including courses in statistics and experimental psychology; satisfactory scores on the Graduate Record Examination, including the subject (advanced) sub-test in Psychology.

MINIMUM DEGREE REQUIREMENTS FOR MASTER OF ARTS DEGREE
Twenty-four hours of psychology courses and seminars, including Psychology 301, 302, 340, 341; thesis research for six credits. The requirement of the specific courses (301, 302, 340, 341) may be exempted by examination. There is no foreign language requirement.

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF DOCTOR OF PHILOSOPHY
A major or its equivalent in undergraduate psychology including courses in statistics and experimental psychology; satisfactory scores on the Graduate Record Examination, including the subject sub-test in Psychology.

REQUIREMENTS FOR ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF DOCTOR OF PHILOSOPHY
For the General/Experimental Program, satisfactory completion of minimum degree requirements for Master of Arts degree or equivalent; for the Clinical Program, satisfactory performance on the Ph.D. comprehensive examination.

MINIMUM DEGREE REQUIREMENTS FOR THE DOCTOR OF PHILOSOPHY DEGREE
Both the General/Experimental and the Clinical Program require a minimum of 75 credit hours. However, each program requires proficiency in several specific areas. In order to achieve such proficiency, most students must complete a total of 80 to 83 credit hours. A minimum of 20 credits must be accumulated in dissertation research and the remainder in course credits numbered in the 200 through 400 sequences of the psychology curriculum, or acceptable courses at the 200 or 300 level from other curricula. Detailed information on courses of study is available from the Department.

Satisfactory performance on the department final oral examination. There is no foreign language requirement.

COURSES OFFERED

210 Principles of Human Perception. Focuses upon basic sensory and perceptual mechanisms that support acquisition and processing of information through auditory, visual, chemical, and haptic somatic sensory systems of animals and humans. Prerequisite: 109. Three hours. Staff.

220 Animal Behavior. Behavior of animals under controlled experimental conditions and in their natural environments. Consideration of antecedents of behavior and of its adaptive significance, evolution, and development. Prerequisite: 109 or 121. Three hours. Bouton.

221 Physiological Psychology I. Structure and function of mammalian nervous system, emphasizing neurological correlates of sensory experience and perception. Individual laboratory experience. Prerequisite: 110. Four hours. Kapp.

222 Physiological Psychology II. Study of role of central nervous system mechanisms in determination of innate behavior arousal, motivation, learning, and memory. Individual laboratory experience. Prerequisite: 221. Four hours. Kapp.

223 Psychopharmacology. Intensive analysis of effects of drugs (medical, recreational) on behavior. Topics such as drug effects on learning, memory, motivation, perception,
emotions, (normal, abnormal) aggression in animals, men. Prerequisites: 110, 121 or 222 or permission. Three hours. Musty.

233 Psychology of Environmental Experience. Intensive examination of different ways of thinking (and feeling) about environments, including cognitive theory, research, applications to design creativity, aesthetic experience, various types of environmental awareness. Prerequisite: Advanced background in psychology or in environmental studies or education. Three hours. Leff.

234 Psychology of Social and Environmental Change. Psychological foundations of potential changes in social, physical environment that would enhance quality of life for all people. Emphasizes action strategies, projects, utopian visions. Prerequisite: Advanced background in psychology or in environmental studies or a social science. Three hours. Leff.

236 Theories of Human Communication. The study of the role of perception, human information processing, language, non-verbal codes, meaning, cognition and interpersonal and sociocultural context in human communication process. Prerequisites: 109 or 130. Three hours. Yadav.

237 Cross-Cultural Communication. Study of cultural factors, cognitive processes, communication patterns and problems in cross-cultural communication; role of communication in development and social change in third-world countries. Prerequisites: 109 or 230 or 130 or advanced background in education, or a social science.

250 Introduction to Clinical Psychology. Basic principles of interviewing, testing, assessment, report writing. Examination of common approaches to psychotherapy: client-oriented, habit change, cognitive change, emotional change, interpersonal relations, group therapy approaches. Prerequisite: 110. Three hours. Kessler, Compas, Bronstein.

251 Behavior Disorders of Childhood. An overview of psychopathological development in infancy and childhood with consideration of descriptive characteristics, models or etiology, and methods of assessment and intervention. Prerequisites: 110. Three hours. Hasazi.

253 Advanced Behavior Modification. Application of technique for the manipulation and control of human behavior in a variety of educational and social situations involving the collection and analysis of behavioral data. Prerequisites: 153, 109. Lobato, Barrera.

261 Cognitive Development. Examination of research and theory concerning developmental changes in the human processing of information from infancy to adulthood centered around the work of Piaget. Prerequisite: 161 or 109 (concurrently), or permission of instructor. Three hours. Bond.

262 Social Development. Examination of theory and research concerning interpersonal development in humans from infancy through adulthood. Relationships between language, cognition, and social development emphasized. Prerequisite: 161 or 109 (concurrently), or permission of instructor. Three hours. Staff.

264 Developmental Psychobiology. Analysis of research on development of humans, animals, emphasizing effects of events in prenatal, early neonatal periods, development of physiological systems affecting behavior, evolutionary origins of behavior. Prerequisite: 109 or 121 or 161. Three hours. Joffe.

266 Communication and Children. Study of the role of communication, especially television in cognitive and social development from preschool to adolescence. Relationship between television violence and abnormal behavior examined. Prerequisites: 109 or 161 or 163. Three hours. Yadav.

295, 296 Contemporary Topics. Three hours. Staff.

The prerequisite for all of the courses listed below is acceptance to the graduate psychology program, which involves the satisfactory completion of undergraduate courses in experimental psychology, systematic psychology, and statistics. In special cases, these prerequisites may be waived by permission of the instructor.

305 Seminar in Learning Theory. Analysis of selected topics in learning and behavior theory, such as Pavlovian and instrumental learning, acquired motivation, and biological constraints on learning. Three hours. Bouton.

315 Seminar in Alcohol and Behavior. A study of the influences of alcohol upon selected aspects of psychological processes including perception, attention, cognition, learning, motivation, and emotion. Three hours. Musty.

331 Interpersonal Processes: Modes of Interacting. Examination of interpersonal conflict, cooperation, power relations, information transfer, and persuasion. Prerequisite: Permission of instructor. Three hours. Leff.

332 Interpersonal Processes: Cognition in Social Behavior. Examination of social attribution, interpersonal set, perspectives in social encounter and the formulation of interpersonal strategies. Prerequisite: Permission of instructor. Three hours. Leff.

344 Experimental Design. Extended coverage of problems in design, analysis of behavioral experiments including repeated measures, interactions, confounding, comparisons, missing data, modeling, Latin squares, other complex designs, covariance designs, interpretations. Prerequisite: 340. Three hours. Howell, Gordon.

347 Measurement and Scaling. Traditional psychophysical methods, Thurstonian judgmental methods, recent topics in unidimensional scaling. Techniques, applications in multidimensional scaling. Relation of these to mental test theory, factor analysis, cluster analysis. Prerequisites: 340 and 341. Three hours. Gordon.

349 Special Topics in Applied Statistics. For advanced graduate students. Topics: factor analysis, discriminate function analysis, multivariate analysis of variance, ad-
350 Family Therapy. An exploration of current theories and techniques in family therapy, through readings and discussion, as well as observation of taped and live family therapy sessions. Graduate standing in Clinical Psychology, or permission of instructor. Three hours. Bronstein.

351, 352 Behavior Therapy. Review of literature relating to theory, practice, research. Emphasis on the evaluation as a variety of procedures applied to behavior disorders in adults and children. Prerequisite: Permission of the instructor. Three hours. Bronstein.

353 Introduction to Clinical Human Neuropsychology. Clinical seminar on effects on human behavior of neurological dysfunction. Review of theoretical, clinical approaches to brain function, emphasis on recent developments in diagnostic techniques, ensuing theoretical developments. Prerequisite: 221, 222 or equivalent. Three hours. Bronstein.

354 Psychopathology I. An advanced course dealing with models of classification, diagnosis, epidemiology of behavior disorders in children. Prerequisites: Graduate standing in Psychology or permission of instructor. Three hours. Hasazi.

355 Psychopathology II. An advanced course dealing with models of classification, diagnosis, epidemiology of behavior disorders in adults. Prerequisites: Graduate standing in Psychology or permission of instructor. Three hours. Rothblum.

356 Mental Retardation. Study of abnormal behavioral development in the intellectual area. Etiology, assessment, and modification of mental retardation. Prerequisite: Permission of instructor. Three hours. Hasazi.

359 Interpersonal Psychotherapy. An examination of psychotherapy as an interpersonal process. Resistance, transference, and counter-transference examined as interpersonal interactions and related to interpersonal personality theory. Prerequisite: Advanced graduate standing and permission. Three hours. Kessler.

360 Methods and Models of Clinical Prediction. Study of clinical versus actuarial problems in applied psychology. Historical antecedents, examples of problems of reliability, validity, utility models of intelligence and personality. Modern day solutions. Prerequisite: 340 or permission of instructor. Three hours. Kessler.

361 Advanced Personality Theory. Personality development from a psychoanalytic, humanistic, trait and sociocultural perspective. Also, methods of personality measurement, such as scale construction and the analysis of fantasy and projective material. Prerequisite: Permission of instructor. Three hours. Bronstein.

362 Community Clinical Psychology. Seminar in current philosophy, approach to mental health problems. Topics: history, development of community mental health and community clinical psychology, consultation methodology, research problems. Prerequisite: Permission of instructor. Three hours. Bronstein.

363 Primary Prevention. Review of research literature on prevention of psychopathology and promotion of competence; development of model prevention programs; evaluation, ethical issues, and political issues. Prerequisites: Graduate standing, permission of instructor. Three hours. Albee.

364 Professional Affairs and Ethics. The origins of professions and of psychology in particular. Accreditation, laws affecting psychology, organization of the profession, licensing certification, and the code of ethics for psychology. Prerequisites: Graduate standing, permission of instructor. Three hours. Albee.

365 Group Therapy. A comprehensive review of encounter, training, and psychotherapy group issues. Discussions focus on group composition, leadership styles, group stages, group problems, ethical issues, and research questions. Prerequisites: Graduate standing or permission of instructor. Three hours. Deitzel, Bronstein.

366 Seminar in Advanced Developmental Psychology. Critical analysis of new topics of current significance in Developmental Psychology. Research, theory, applied, professional issues including, for example, moral development, infancy, early conceptual development, professional writing. Prerequisites: Graduate standing or permission. Three hours. Staff.

367 Human Sexual Behavior. An exploration of various topics in human sexuality including sexual behavior through the life span, sexual preference, and treatment of sexual dysfunction and deviation. Graduate standing in Psychology or permission of instructor. Three hours. Leitenberg.

368 Psychology and Law. A study of mental health law (including the insanity defense, and commitment) and of legal processes (jury decision-making, jury selection, eyewitness testimony). Prerequisites: Graduate standing. Three hours. Kessler.

369 Health Psychology. Psychological aspects of the etiology, treatment, prevention of physical illness. Topics include: stress and disease, compliance health care systems, coping with illness, positive health behavior. Prerequisite: Graduate standing. Three hours. Rosen.

370, 371 Introductory Practicum: Assessment and Therapy I and II. Role of psychologist as consultant, emphasis on evaluation of mental abilities, behavioral, personality adjustment. Therapy practicum covers basic psychotherapy, case management, utilization of supervision. Prerequisites: Graduate standing. Three hours. Kessler.

372 Advanced Clinical Practicum. Supervised experience in a variety of clinical settings including the Medical Center Hospital; the State Hospital; Community Mental Health Facilities; Behavior Therapy Center; Counseling Center. Prerequisites: Graduate standing in psychology and permission of instructor. Three hours. Leitenberg, staff.

380 Contemporary Topics. Selected topics in depth, emphasis on critical analysis of original literature. Recent topics: anxiety, behavioral pharmacology, biological bases of memory, depression, psycholinguistics, psychotherapy research, primate behavior, skilled performance. Three hours.

385 Advanced Readings and Research. Readings, with conferences, to provide graduate students with backgrounds and specialized knowledge relating to an area in which an appropriate course is not offered. One to three hours.

391 Master's Thesis Research. Credit as arranged.

491 Doctoral Dissertation Research. Credit as arranged.

Not offered annually, but regular courses:

207 Thinking
261 Cognitive Development
262 Social Development
357 Research in Schizophrenia
358 Antisocial Behavior

The following courses are offered infrequently but may be taught where sufficient student interest is demonstrated.

305 Seminar in Learning Theory. Three hours.
308 Seminar in Operant Conditioning. Three hours.
310 Seminar in Perception. Three hours.
333 Interpersonal Processes: Motivation in Human Interaction. Three hours.

PUBLIC ADMINISTRATION (MPA)

Professor Carlson; Associate Professors Bryan (Program Director), Finney, Parke, Tashman.

The Master of Public Administration is an interdisciplinary program, incorporating faculty from Departments of Political Science, Sociology, and Organizational, Counseling and Foundational Studies, as well as from the School of Business Administration. The curriculum emphasizes skills in problem-solving and methodologies across four categories: (a) public institutions, politics, and law, (b) organizational theory and human resource management, (c) analytic methods for public managers, and (d) public budgeting, information, and control systems.

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF MASTER OF PUBLIC ADMINISTRATION

A bachelor's degree with an adequate grade-point average, satisfactory scores on the general (aptitude) portion of the Graduate Record Examination, motivation for pursuing the M.P.A. An interview is desirable, although not required, as is experience as a practitioner.

REQUIREMENTS FOR ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF MASTER OF PUBLIC ADMINISTRATION

Completion of the four core courses, MPA 301-304, with a grade of B (3.00) or better.

MINIMUM REQUIREMENTS FOR THE DEGREE OF MASTER OF PUBLIC ADMINISTRATION

Successful completion of 36 credit hours, including MPA 301-304, an approved sequence of field courses with a minimum of 12 credit hours (one course in each of the four core areas: public administration, organizations in modern society, quantitative methods for management, systems analysis and planning), an administrative internship, and a thesis or an equivalent paper.

COURSES OFFERED

In addition to the four core courses listed below, regular courses (200-level and above) are available in the respective academic units listed above and with prior approval may be included in a candidate's program.

301 Public Management. (Same as Political Science 241.) Analysis of major elements of management in public sector (organization, personnel, budgeting) with special attention to problems arising from political imperatives generated by a democratic society. Prerequisite: Political Science 141. Three hours. Bryan.

302 Organizations in Modern Society. (Same as Sociology 225.) Examination of basic classical and contemporary theory, research on human relations, internal structures, environments, types, general properties of complex organizations, bureaucracies. Three hours. Berkowitz, Finney, Folla, Sampson.

303 Statistical Analysis for Management. (Same as Business Administration 313.) Data analysis and communication of statistical information for management decision-making. Methods of modeling relationships, comparing strategies, and assessing probabilities. Instruction in computer use. Prerequisite: MBA or MPA standing. Three hours. Tashman.

304 System Analysis and Planning. (Same as EDAP 355.) An analysis of and experience with planning theories and techniques that derive from General Systems Theory. Three hours.

380 Internship. Supervised administrative experience culminating in a written report. Credit as arranged, one to six hours.

395 Special Topics. For advanced students within areas of expertise of faculty. Permission of instructor. One to three hours.

RELIGION (See page 102.)

SOCIOLOGY (See page 102.)

SPANISH (See page 103.)

STATISTICS (STAT)

Steering Committee Members: Professors McCrorey; Associate Professors Ashikaga (Director), Gordon, Haugh, Howell, Newton, Tashman; Assistant Professors Costanza, Whaley; Associate Research Professor Aleong; Assistant Research Professor McAuliffe; Adjunct Assistant Professor Whitmore.

The Statistics Program offers statistics and probability courses for the entire University community along with traditional degree programs and individually designed degree programs emphasizing statistics applied to other fields. The degree programs are designed primarily for students who plan careers in business, industry, and government or advanced training in disciplines that make extensive use of statistical principles and methods. The Program faculty is deeply involved in consulting and collaborative research in a wide variety of fields, especially in industry, agriculture and in the basic and clinical medical sciences. These research activities along with the research of participating faculty from psychology, natural resources, business administration, etc., offer students unique opportunities to apply their classroom training to "real world" problems. Qualified students with the goal of learning statistics to use in a specialized area of application are especially encouraged to take advantage of these cooperative arrangements.

Program faculty have active statistics research efforts in areas such as reliability, time series analysis, survival data analysis, discriminant analysis, regression diagnostics, and
experimental design. Students seeking the traditional graduate degree in statistics (along with course work in mathematics and computer science, if desired) have excellent opportunities to participate in the faculty research.

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES AND ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE

A baccalaureate degree. Three semesters of calculus, a course in matrix methods, and one semester of statistics. Provisional acceptance can be given prior to the completion of these requirements. Satisfactory scores on the general (aptitude) portion of the Graduate Record Examination are required for some sources of financial aid. Computer experience is highly recommended.

MINIMUM DEGREE REQUIREMENTS FOR THE DEGREE OF MASTER OF SCIENCE

Plan A: (Thesis) Twenty-four semester hours of approved graduate credits in statistics, mathematics, and other quantitative methods and (if appropriate) a specialized field of application, and six semester hours of thesis research.

Plan B: (Non-Thesis) Thirty semester hours of approved credits in statistics, mathematics, and other quantitative methods and (if appropriate) a specialized field of application, with no thesis required.

Under both plans, students must acquire a graduate level knowledge of 201, Statistical Methods I-IV, at least six semester hours of probability and statistical theory, and 383, 384. Additional specific courses may be required depending on the student’s background and interest. Other courses are selected with the approval of the student’s advisor from statistics, mathematics, computer science, and (if appropriate) graduate level courses from the student’s intended area of specialty application (e.g. business administration, engineering, ecology, genetics, psychology). The student is expected to participate in the Colloquium series of the Program. Plan A and Plan B require successful completion of a comprehensive examination which includes coverage of theoretical and applied aspects of advanced statistics courses taken by the student. A specialized application may be included as part of the comprehensive examination if appropriate. Under Plan B a student, in lieu of a thesis, must carry out an approved comprehensive data analysis culminating in both an oral and written report to the faculty.

COURSES OFFERED

200 Medical Biostatistics. See Biostatistics 200.

201 Statistical Analysis Via Computer. Intensive coverage of computer-based data preprocessing and analysis using statistical packages, subroutine libraries, user-supplied programs. Students analyze real data, prepare comprehensive report. Prerequisites: Statistics 111 with permission of Director, or 141, or corequisite Statistics 211 or 308. Three hours.

211 Statistical Methods I. Fundamental ideas and techniques for applied data analysis and experimental design. Descriptive and inferential statistics, including student’s t-tests, regression, correlation, and analysis of variance. Prerequisite: Junior standing, college algebra. Three hours.

221 Statistical Methods II. Experimental designs, multifactor analysis of variance, multiple regression and correlation, analysis of covariance, and nonparametric procedures. Data are analyzed using selected statistical computer programs. Prerequisite: 141 with instructor permission or any one of 211, 241, or 262; junior standing. Three hours.

223 Statistical Methods III. Analysis methods for categorical and continuous multivariate data: measures of association, loglinear models, discriminant analysis, principal components, factor analysis. Selected statistical computer programs are utilized. Prerequisites: 141 plus a second statistics course or 211. Some computer experience desirable. Three hours.

224 Statistical Methods IV. Techniques for survey sampling (including stratification and clustering methods), industrial quality control (acceptance sampling and control charts for process control), and reliability and survival analysis. Prerequisites: 141 plus a second statistics course or 211. Some computer experience desirable. Three hours.

225 Applied Regression Analysis. Nature and applications of basic regression-correlation models in investigating relationships, testing hypotheses, making predictions. Emphasis: developing appropriate models, evaluating existing research. Same as BSAD 270. Prerequisite: Any one of 111, 141, 211, 241, or 261; Economics 11, Math 19 or equivalents. No credit for graduate students in Statistics or Biostatistics. Three hours.

229 Statistical Methods for the Engineering Sciences. Multiple regression and response, surface modeling, factorial design of experiments, statistical quality control. Probability distributions used in reliability and life testing. Prerequisite: Any one of 141, 211, 241, 262, or 308. Three hours.

231 Experimental Design. Basic experimental designs, complete and incomplete blocking, factorial designs: response surface methods, fixed and random effects models. Prerequisite: Any one of 141, 211, 241 or 262. Three hours.

241 Introduction to Statistical Inference. Introduction to statistical theory: parameter estimation, hypothesis testing, chi-square tests, regression analysis, and analysis of variance. Prerequisites: Math 121. Statistics 151 or 251 and a course in statistical methods are recommended. Three hours.

251 Probability Theory. (Same as Math 207.) Distribution of random variables and functions of random variables. Expectations, stochastic independence, sampling and limiting distributions (central limit theorems). Concepts of random number generation. Prerequisite: Math 121. Statistics 151 recommended. Three hours.

252c Applied Time Series Analysis. Autoregressive-moving average (Box-Jenkins) models, autocorrelation and

cation in Education (see page 16 of this catalogue).

standing in Statistics or Biostatistics and permission of
program based upon both undergraduate and graduate
substantive area with close consultation with the project in­
vestigator. One to four credit hours. Prerequisites: One
year of statistics and elementary computer programming.

Special Topics. For advanced students. Lectures,
reports, and directed readings on advanced topics. Prereq­
usites: As listed in course schedule. One to four credit hours as
arranged.

Biometrics and Applied Statistics. See Physiology
308.

Statistical Analysis for Management. See Business
Administration 313.

Seminar I, II. Topics of current faculty,
graduate, and advanced undergraduate student interest
presented in seminar-discussion format. Special attention to
topics being covered in Statistical Methods III, IV. One
hour each. Prerequisites: 241 or 262. Co-requisites: 223 for
383, 224 for 384.

Consulting Practicum. Supervised experience,
directed reading, and discussions in statistical consulting.
Enrolled students will advise faculty and students from
other departments with statistical problems related to their
research projects. Prerequisites: Second year graduate
standing in Statistics or Biostatistics and permission of
Statistics Program Director. One to three hours each
semester.

Master’s Thesis Research. Credit as arranged.

(See page 104.)

VOCATIONAL EDUCATION
AND TECHNOLOGY (VOTC)

Professor Fuller; Associate Professors Albright, Bloom,
Ferreira, Hasazi, Kelly, Shimel; Extension Associate Pro­
fessors Harris, Moore, Patterson (Chairperson), Wells; Ex­
tension Assistant Professor Rocklin; Lecturer Zimmerman.

The department offers two areas of concentration:

a. Occupational and Practical Arts Education — which
leads to either an M.A.T. or an M.Ed. degree, and

b. Extension Education — which leads to a Master of
Extension Education degree.

Individuals seeking a maximum amount of flexibility in a
program based upon both undergraduate and graduate
courses are encouraged to consider the Fifth-Year Certifi­
cate in Education (see page 16 of this catalogue).

OCCUPATIONAL AND PRACTICAL
ARTS EDUCATION

The Master of Arts in Teaching Degree Program

The goal of this program is to strengthen an individual's
background in a teaching field. The specialized areas of in­
terest include agriculture and natural resource education,
home economics education, industrial arts, industrial
education, and vocational-special needs education.

REQUIREMENTS FOR ADMISSION TO GRADUATE
STUDIES FOR THE DEGREE OF
MASTER OF ARTS IN TEACHING

An undergraduate degree in an appropriate field of
specialization. Acceptable scores on the general (aptitude)
portion of the Graduate Record Examination.

MINIMUM DEGREE REQUIREMENTS

See page 25 for regulations of the Graduate College.

Completion of the necessary courses to meet the mini­
num requirements for a teaching certificate. Candidates
who do not qualify for a teaching certificate, but have
satisfactory teaching field preparation and Graduate
Record Examination scores will need to complete a profes­sional field experience in addition to the minimum degree
requirements. The Department expects a candidate to com­
plete at least 18 semester hours in professional education in
his or her combined undergraduate and graduate programs,
which includes preparation in the areas of Foundations of
Education, methods for teaching, and learning and human
development. Usually not more than six hours of indepen­
dent study are allowed. A candidate is expected to complete
at least one semester or two summers in residence on the
University of Vermont campus in Burlington. Inquiries
should be directed to Professor Thomas E. Patterson.

The Master of Education Degree Program

The goal of this program is to prepare the individual for
professional leadership in occupational and practical arts
education. Programs are planned jointly with the College of
Education and Social Services in guidance and counseling,
occupational education for students with special needs, or
to meet individual goals as they relate to occupational and
practical arts education.

The Department expects each candidate to include study
in one or more of the following areas as they relate to occu­
pational and practical arts education: improvement of in­
struction, principles and problems involved in curriculum
development, planning and managing educational pro­
grams, and/or research.

REQUIREMENTS FOR ADMISSION TO GRADUATE
STUDIES FOR THE DEGREE OF
MASTER OF EDUCATION

An undergraduate degree in an appropriate area. Accept­
sable scores on the general (aptitude) portion of the Graduate
Record Examination.

REQUIREMENTS FOR ADVANCEMENT TO
CANDIDACY FOR THE DEGREE OF
MASTER OF EDUCATION

Eighteen hours of education courses or appropriate certifi­
cation.

MINIMUM DEGREE REQUIREMENTS

See page 25 for regulations of the Graduate College.
A candidate is expected to complete at least one semester or two summer sessions in residence on the University of Vermont campus in Burlington. Additional information on this degree program may be found on pages 25 of this catalogue. Inquiries should be directed to Professor Thomas F. Patterson, College of Agriculture.

EXTENSION EDUCATION

The goal of this program is to improve the knowledge and competencies of the student in a career field coupled with preparation for educational leadership functions. Programs of study may be designed for educational and training responsibilities in one of the following specializations in the non-school based setting: agricultural or related agencies and organizations, business and industry, and youth programs and organizations.

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF MASTER OF EXTENSION EDUCATION

An undergraduate degree with an acceptable major area of specialization. An acceptable score on the Graduate Record Examination general (aptitude) section.

MINIMUM DEGREE REQUIREMENTS

See page 18 for regulations of the Graduate College. A candidate is expected to complete at least six semester hours in the Vocational Education and Technology Department. Usually courses in political science, sociology, and/or research will be taken. Not more than six hours of independent study are allowed in a candidate's program. One year of satisfactory professional experience. Students who do not have the professional experience must complete a field experience in addition to the minimum degree requirements. A candidate is expected to complete at least one semester or two summers in residence on the University of Vermont campus, Burlington, Vermont. Inquiries should be directed to Professor Thomas F. Patterson.

COURSES OFFERED

270 Educating Students with Special Needs in Vocational Education. (3-0) Legal, social, and economic forces affecting vocational programming for special needs students (handicapped and disadvantaged). Programs, resources, and procedures for educating special learners in vocational education. Prerequisite: Admission to an approved teacher certification program or permission of instructor. Three hours. Albright.

271 Workshop in Teaching Students with Special Needs in Vocational Settings. Intensive preparation in selecting contemporary instructional strategies and materials and in adapting and using equipment in regular and special vocational education programs. Prerequisite: Completion of 12 credits in Vocational or Special Education at the 100 or 200 level or permission. Offered during summer sessions. Variable credit; one to three hours; may enroll more than once for total of six credits. Albright.

275 Developing Vocational Instruction for Students with Special Needs (3-0). Focus on development of instructional strategies for including handicapped students in vocational education. Procedures for developing, implementing, and evaluating individualized vocational plans. Prerequisite: Admission to an approved teacher certification program or permission of instructor. Three hours. Albright, Hasazi.

283 Teaching Adults. Problems related to organizing and planning adult education programs for schools, community organizations, government agencies, or business. Techniques for teaching adults will be analyzed. Prerequisites: Senior standing, 82 or 52 and 182, or permission of instructor. Three hours. Kelly, Patterson.

292 Seminar. Reports, discussions, and investigations in selected fields. Students may enroll more than once for total of six hours. Prerequisites: Six hours 100 level and permission of instructor. One to three hours. I, II.

295 Special Topics. Lectures, laboratories, and/or readings and reports, relating to contemporary areas of study. A student may enroll more than one time and accumulate up to nine hours. Prerequisite: Six hours 100 level and departmental permission. Credit as arranged. I, II. Staff.

377 Practicum in Vocational and Extension Education. Advanced supervised practicum to provide direct involvement in vocational or extension education and training settings. Individually planned to apply course-related learning in an applied setting. Prerequisites: Completion of at least six hours in appropriate 200-level VOTC courses or permission of instructor. Variable credit; one to three hours.

ADDITIONAL GRADUATE COURSE

The following course is offered by the Vocational Education and Technology Department upon request, usually in the Summer Session and in the Evening Division.

251 Methods for Teaching Occupationally Oriented Subjects. Three hours.

WILDLIFE AND FISHERIES BIOLOGY

For description of the M.S. Program in Wildlife and Fisheries Biology see NATURAL RESOURCES, page 82.

ZOOTOLOGY (ZOO)

Professors Bell, Glade, Happ (Chairperson), Heinrich, Henson, Potash; Associate Professors Davison, Kilpatrick, Landlesman, Stevens; Assistant Professors Herbers, Pennypacker, Schall, VanHouten, Wilson.

Faculty research interests fall into two broad groupings, Developmental Biology/Cellular Biology/Physiology and Ecology/Evolution/Natural History. Current ongoing research projects include: taxonomy and natural history of insects, particularly Rhysodid beetles; aquatic ecology, wetlands ecology, limnology, running water systems; parasite-host ecology; population and community ecology of lizards; evolution of insect societies, behavioral ecology; population genetics and molecular systematics; regulation of reproduction in freshwater invertebrates; physiological energetics of insects; establishment of amphibian axiation and limb regeneration; mechanisms of growth control in amphibians; cell and matrix interactions in development; developmental genetics of juvenile hormone and oogenesis in Drosophila; cell biology of insect development; insect reproductive biology; genetics of chemoreception and chemotactic behavior of protozoa; electrophysiological basis of swimming behavior; cellular basis of immunological response.
REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF MASTER OF SCIENCE
An undergraduate major in zoology or its equivalent. Satisfactory scores on the Graduate Record Examination, general (aptitude) section. Acceptability to the faculty member with whom the candidate wishes to do thesis research.

REQUIREMENTS FOR ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE
Satisfactory completion of a qualifying examination.

MINIMUM DEGREE REQUIREMENTS
Zoology Graduate Colloquia, four hours; 11 to 18 additional hours in zoology and related fields; thesis research (eight to 15 hours). Each candidate must participate in the teaching of at least one undergraduate course.

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF MASTER OF SCIENCE FOR TEACHERS (BIOLOGY)
A bachelor's degree from an accredited institution and certification as a teacher of biology or an associated field. At least three years of secondary school teaching. Satisfactory scores on the Graduate Record Examinations, general (aptitude) section, are requirements for acceptance for this degree.

MINIMUM DEGREE REQUIREMENTS FOR THE M.S.T. (BIOLOGY)
Thirty hours of course work to include a selection of courses in the Departments of Botany and Zoology which will broaden and balance the undergraduate work in biology. At least two 200-level courses in each department. Courses in four of the five following areas: anatomy, morphology and systematics; genetics; developmental biology; and environmental biology. Up to 12 hours of 100-level courses may be used for the above requirements where approved by the advisor and the Dean. Appropriate courses in related science departments may be used to complete the required 30 hours. No thesis is required; however, each degree recipient must complete a written and oral examination.

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF DOCTOR OF PHILOSOPHY
Satisfactory completion of: a year of mathematics and one of physics (college courses of appropriate level for students majoring in science); organic chemistry; at least one year of zoology; the Graduate Record Examination, general (aptitude) section; and acceptability to the faculty member with whom the candidate wishes to do dissertation research.

REQUIREMENTS FOR ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF DOCTOR OF PHILOSOPHY
The qualifying examination; demonstrated competency in two of four areas as determined by the studies committee: (1) statistical applications, (2) computer applications, (3) a reading knowledge of an appropriate foreign language, and (4) a reading knowledge of a second appropriate foreign language; at least one but not more than two academic years of graduate study at the University of Vermont. Students whose programs are to include physical chemistry should have had, or should take, mathematics through Mathematics 121 or its equivalent.

MINIMUM DEGREE REQUIREMENTS
Of the 75 credit hours required for the degree, at least 40 hours must be earned in courses suitable for graduate credit and must include six hours of Graduate Colloquia. The selection of courses will be designated for each student by his/her Studies Committee. Of these courses, a minimum of 13 credits must be in courses other than zoology. At least 20, but not more than 35, credits must be earned in dissertation research. Each candidate must participate in the teaching of at least one undergraduate course.

COURSES OFFERED
202 Quantitative Biology. Mathematical concepts applied to biological problems such as growth, metabolism, temperature effects, kinetics, and graphic interpretation of data. Statistics will not be treated. Prerequisite: An intermediate level course in biology, Math 9, or permission of instructor. Three hours. Davison.

205 Advanced Genetics Laboratory. Laboratory experiments designed to give students experience with prokaryotic and eucaryotic systems in classical and modern molecular procedures. Gathering and analysis of genetic data emphasized. Prerequisites: Biology 101. Two hours. VanHouten.

209 Field Zoology. Collection and identification; study of local habitats, their nature, and adaptations to them; factors governing distribution; methods of preparing study specimens. Prerequisite: 104 or Biology 102. Four hours. Bell.

212 Comparative Histology. Anatomy of tissues, chiefly vertebrate. Tissue similarities and specializations of organs among the various groups of animals in relation to function. Prerequisite: 104. Four hours.

216 Human Genetics. Inheritance; population genetics; interaction of heredity and environment; application to human problems. Prerequisite: Biology 101. Three hours.

219 Comparative and Functional Vertebrate Anatomy. Structure, function, and phylogeny; evolutionary and functional trends; investigation of the structure of all chordate groups. Prerequisite: 104. Four hours. Kilpatrick. Alternate years, 1985-86.
222 Experimental Embryology. Theoretical approach based on research in embryology, genetics, physiology, bacteriology, and related fields. Prerequisites: 211 and permission of instructor. Four hours. Glade. Alternate years, 1985-86.

225 Environmental Physiology. Processes by which animals cope with moderate, changing, and extreme environments. Prerequisites: Biology 102 and 104. Three hours. Heinrich.

231 Cell Physiology. Topics of current interest in the scientific literature. Emphasis on techniques and experimental approaches utilized to derive an understanding of cell structure and function. Prerequisites: Biology 103; Chemistry 141, 142 and permission of instructor. Three hours. Pennypacker. Alternate years, 1984-85.

236 Limnology. The ecology of standing waters; the biota of lakes as related to the geological, physical, and chemical conditions of lakes. Prerequisite: Biology 102, chemistry. Four hours. Henson.

237 Ecology of Running Waters. Stream and river environments, adaptations of organisms to varying physical, chemical, and biotic conditions. Prerequisites: Biology 102, chemistry. Four hours. Potash.

240 Invertebrate Ecology of the Mountains. An intensive study of the invertebrate fauna of Camel's Hump and vicinity. Prerequisite: Biology 102 or a course in invertebrate or insect taxonomy. Four hours. Bell.

250 Invertebrate Zoology. Anatomy, physiology, and life histories of representatives of the more important phyla. Four hours. Henson.

251 Insect Structure and Function. Anatomy and physiology emphasizing growth, reproduction, and sensory physiology. Prerequisite: 104 or permission of instructor. Four hours. Happ. Alternate years. Not offered 1985-86.

255 Comparative Animal Physiology. General principles of function in invertebrates and vertebrates. Prerequisites: 104; Chemistry 141, 142; and permission of instructor. Four hours. Davison.

262 Biological Basis of Behavior. The structure and function of neural and hormonal mechanisms involved in animal behavior emphasizing phylogeny. Prerequisite: Biology 103 or permission of instructor. Three hours. Stevens.

263 Genetics of Cell Cycle Regulation. Molecular events during the cell cycle: mutants defective in cell cycling; comparison of normal and transformed (cancer) cell cycling. Prerequisite: Biology 101 or permission of instructor. Three hours. VanHouten.

281 Seminar. Review and discussion of current zoological research. Attendance required of Zoology graduate students. Seniors in zoological research programs are expected to enroll. Without credit.

295 Special Topics.

371 Graduate Colloquia. Topics of current faculty and graduate student interest presented in a seminar-discussion format. Specific titles for colloquia will be listed in the course schedule. One hour.

381 Special Topics. Readings with conferences, small seminar groups, or laboratories intended to contribute to the programs of graduate students in phases of zoology for which formal courses are not available. Prerequisite: An undergraduate major in zoology. Credit as arranged.

391 Master’s Thesis Research. Credit as arranged.

491 Doctoral Dissertation Research. Credit as arranged.
Courses of Instruction for Graduate Credit

The following courses are offered for graduate credit by departments and programs that do not offer a graduate degree program. Some of the courses below may be appropriate to satisfy a portion of the course requirements for a specific graduate degree program listed earlier.

ANTHROPOLOGY (ANTH)
200 Field Work in Archaeology. Methods and techniques of archaeological investigation in field situations and laboratory analysis of data. Prerequisites: 24, one 100-level course in anthropology. Six hours. Summers only.

210 Archaeological Theory. Development of archaeology from the 18th century to the present, including concepts of form, space and time, intellectual attitudes, current systems theory, and research strategies. Prerequisites: 24, one 100-level anthropology course; or Historic Preservation 201; or graduate standing in Historic Preservation Program; or History 105, 106, or 107. Three hours. Power. Alternate years.

225 Anthropological Theory. Schools of anthropological thought in relation to data on non-western societies and the historical and social context in which the anthropologist works. Prerequisites: 21 and one 100-level course. Three hours. C. Pastner, Mitchell.

228 Social Organization. Examination of the basic anthropological concepts and theories used in the cross-cultural analysis of kinship and marriage. Prerequisites: 21 and one 100-level course. Three hours. C. Pastner, Mitchell.

283 Culture Change. Study of socio-cultural transformations in non-western countries. Prerequisites: 21, one 100-level course, or 21, six hours in the social sciences. Three hours. Gordon. Alternate years.

290 Methods of Ethnographic Field Work. Examination of the theoretical and ethical premises of field work methodology with practical experience in participant observation, interviewing, the genealogical method, and recording of data.

295, 296 Advanced Special Topics. Prerequisites: 21 and one 100-level course.

ART (ART)

207 Studies in American Art or Architecture. Selected topics in American art and/or architecture, individual research and reports. Three hours. Janson or Lipke.

282 Directed Studies. Individual or group study in a special area. Prerequisites: Six hours advanced, three in the chosen area, and permission. Three hours.

EDUCATION—EARLY CHILDHOOD AND HUMAN DEVELOPMENT (ECHD)
260 Family Ecosystem. The family will be viewed in and as an environment for human development. The family ecological approach will be applied to practical family concerns. Prerequisite: Senior standing or permission of instructor. Three hours.

263 Advanced Child Development. A survey of the professional literature in child development with special emphasis on the influence of early life experiences throughout the life cycle. Prerequisite: 80-81 or equivalent. Three hours. Goldhaber.

264 Contemporary Issues in Parenting. Contemporary cultural factors that influence adult lifestyles and their relationship to successful parenting. Prerequisite: Nine hours in human development or permission of instructor. Three hours.

265 Teaching Human Development. Seminar designed for individuals who teach or plan to teach human development. Emphasis on group-building skills and interpersonal relationships. Prerequisite: Six hours in human development and permission of instructor. Three hours. Barbour.

266 Seminar in Human Development. Intensive study of issues in human development and their application in a wide variety of professional areas. May be taken more than once up to a maximum of 12 credits. Prerequisites: Junior standing, nine hours of human development or equivalent. Three hours.

281 Infancy. Development and rearing from conception to 18 months and their relationship to subsequent development. Prerequisites: Nine hours in human development, nutrition, and physiology or biology or permission of instructor. Three hours. Shelton.

282 Seminar in Physical Development and Health in Later Life. Physical manifestations of senescence, anatomical and physiological development, longevity, vitality, health care, nutrition, chronic conditions and disability. Prerequisite: 181 or permission. Three hours. Grams.

283 Personal and Family Development in Later Life. Cognitive development, intellectual performance, work and achievement, retirement and leisure, personal development, self-esteem, coping mechanisms, dying, couples, intergenerational and kinship issues. Prerequisite: 181 or permission. Three hours. Grams.

284 Public Policy and Programs for Elders. Demography of aging, social institutions and roles, policy and program implementation, income maintenance, housing, health care, social services, transportation, legal and political issues. Prerequisite: 181 or permission. Three hours. Grams.

291 Special Problems. Reading, discussion, and special field and/or laboratory investigations. Prerequisite: Departmental permission. Students may enroll more than once for a maximum of 12 hours. One to six hours.

295 Special Topics. Lectures, laboratories, readings, or projects relating to contemporary areas of study. Enrollment may be more than once; accumulate up to 12 hours. Prerequisite: Departmental permission.

296 Field Experience. Professionally oriented field experience under joint supervision by faculty and business or community representative. Credit arranged up to 15 hours. Prerequisite: Departmental permission.

EXTRA-DEPARTMENTAL COURSES
Area Studies 297, 298. Seminar for area studies majors and other qualified students conducted by a team of area specialists and covering selected topics through interdisciplinary and comparative approaches. Prerequisites: Permission by the executive committee of Area Studies. Three hours.

Environmental Studies 291. Special Topics. Credit as arranged.

Environmental Studies 295. Advanced Seminar. Credit as arranged.

General Literature 251, 252. Study of Movement, Genre, or Topic. Precise content of the course to be announced before the registration period, chosen from the following (or similar) topics: 1. \textit{Medieval Epic} (French, Germanic, Spanish); 2. \textit{Comedy} (Classics, English, French); 3. \textit{Enlightenment} (French, English, German); 4. \textit{European Romanticism} (English, French, German); 5. \textit{Political Literature in the 19th Century} (English, French, German); 6. \textit{Existentialism in Literature} (French, German, Spanish); 7. \textit{Avant-Garde Theater} (French, German, American); 8. \textit{Tragedy} (Classics, French, German). \textit{Prerequisite:} Any 100-level literature course in any of the cooperating departments. Three hours. Staff.

Graduate College 301 Seminar in College Teaching. Practical assistance to the beginning teacher in developing an effective, individual teaching style. Activities include analysis of approaches to teaching: discussion with faculty from various departments; micro-teaching exercises. \textit{Prerequisites:} Graduate Teaching Fellowship and selection by department. Three hours. Holmes.

Graduate College 395 Special Topics. Workshop in the Social Sciences. Staff.

Technology 201 System Dynamics Seminar. Review of system-dynamics literature. Detailed study of conceptualization, paradigms, generic structures, validation and implementation. Term project and paper in field of interest of students are required. \textit{Prerequisite:} Technology 101, Principles of System Dynamics. Three hours. Roth.

MUSIC (MUS)

211, 212, 213, 214, 215 Seminars in Music Literature. Seminars will treat in detail topics surveyed in the intermediate level music literature sequence. Subject matter will be determined by the instructor. \textit{Prerequisites:} 11, 12; 111 for 211; 112 for 212; 113 for 213; 114 for 214; 115 for 215. Three hours. Offered on irregular basis as required by major enrollment. Ambrose, Chapman.

216 Bibliography Seminar. Biographies and critical works, bibliographies, Festschriften, scholarly and performing editions of music and discography will be surveyed. \textit{Prerequisites:} Music 11, 12 and one additional music literature course at the 100 or 200 level. Three hours. Ambrose, Chapman.

235 Fugal Composition. Study of representative Baroque Classical and contemporary fugal procedures through analysis and composition. \textit{Prerequisite:} 231 or consent of instructor. Three hours. Chapman, Read.

237, 238 Composition. Creative work in free composition with instruction according to the needs and capabilities of the individual student. \textit{Prerequisites:} 232, 235 or consent of instructor. Three hours. Read.

259 Conducting. Baton technique, score reading, laboratory practice; preparation and performance of selected scores, including score reading at the piano and rehearsal procedures. \textit{Prerequisites:} 132, 134. Three hours.

297, 298 Advanced Reading and Research. Studies in composition or related special topic under the direction of assigned staff member. \textit{Prerequisite:} Senior standing as theory major. Credit as arranged.

OBSTETRICS AND GYNECOLOGY (OBGY)

295 Special Topics. Lectures, readings, or laboratory investigations for advanced students within areas of expertise of faculty and staff. \textit{Prerequisite:} Permission of instructor. Credit as arranged.

ORTHOPAEDIC SURGERY (ORTH)

291, 292 Research in Orthopaedics and Rehabilitation. Work on research problem under the direction of a faculty member. Review of literature, preparation of manuscript. \textit{Prerequisite:} Departmental permission. Three hours. Pope, Stokes. (In collaboration with clinical faculty of the Department.)

PHILOSOPHY (PHIL)

202 Metaphysics. A critical examination of such topics as the nature of space and time, the concept of change, the identity of the self, the nature of the world and our place in it. \textit{Prerequisite:} 101 or 102 or 110. Three hours. Mann, Moneta, Sher.

210 Philosophy of Mind. Major philosophical theories of the mind and its relation to the physical world, the nature of sensation, desire, and belief, and the relation between thought and action. \textit{Prerequisite:} 102 or 110. Three hours. Kornblith, Sher.

212 Philosophy of Science. A thorough investigation of one or two problems in the philosophy of science. Emphasis on modern attempts to solve them. \textit{Prerequisite:} 112 or any 100-level history of science course or junior or senior standing in a science major. Three hours.

213 Mathematical Logic. A study of important advanced results in mathematical logic, including Gödel's incompleteness Theorems and an introduction to proof theory and recursive function theory. \textit{Prerequisite:} 113. Three hours.

215 Philosophy of Mathematics. Philosophical topics connected with mathematics. What (if anything) is mathema-
102 Philosophy of Language. A philosophical study of the nature of language. Prerequisite: 113 or linguistics 100, 102. Three hours. Hansen, Kornblith, Sher.

211 Topics in Chinese Philosophy. A detailed examination of a classical chinese philosophical text or school. Prerequisite: 121 or 122. Three hours. Hansen.

240 Contemporary Ethical Theory. An analysis of the ideas of contemporary moral philosophers in normative ethics and metaethics. Prerequisites: 140, 142, or 144. Three hours. Kuflik, Sher.

241 Contemporary Social and Political Philosophy. An analysis of the ideas of contemporary philosophers in social and political philosophy. Prerequisites: 140, 142, 143, or 144. Three hours. Kuflik, Sher.

242 Justice and Equality. (Same as Political Science 213.) An examination of contemporary normative theories of distributive justice and equality. Prerequisites: 140, 142, 143, or 144. Three hours. Kuflik, Sher; Wertheimer (Political Science).

260 Phenomenology II. A critical and intensive investigation of the thought of a major 20th century phenomenonologist, e.g., Husserl, Heidegger, Merleau-Ponty, or Gadamer. Prerequisite: 160. Three hours. Moneta.

262 Existentialism. A study of existentialism as a philosophy, and an examination of its background, as displayed in the literary and philosophical writings of Pascal, Kierkegaard, Camus, Heidegger, and Sartre. Prerequisites: Any two of 101, 102, 107. Three hours. Hall.

265 American Philosophy. The thought of such leading American philosophers as Peirce, James, Royce, Santayana, Dewey, and Whitehead. Prerequisites: 101, 102. Three hours. Miller.

271, 272 Seminar: Major Philosophical Author or School. A study of the major philosophical texts by a single author or school of thought. May be repeated for credit when different authors are studied. Prerequisite: An appropriate 100-level course in philosophy. Three hours.

281, 282 Seminar: Selected Topics in Philosophy. Prerequisite: An appropriate 200-level course in philosophy. Three hours. Staff.

297, 298 Readings and Research. Independent study with an instructor on a specific philosopher or philosophical problem. Prerequisite: An appropriate 200-level course in philosophy.

RELIGION (REL)

291, 292 Topics in the History and Phenomenology of Religion. Prerequisites: Nine hours in religion; junior standing. Three hours. Staff.

SOCIOLOGY (SOC)

Courses numbered 200 to 299 require a minimum of six hours of sociology, three of which must be at the 100 or intermediate level, equivalent preparation as indicated or permission of the instructor.

202 Population Dynamics. Analysis of factors affecting human population growth, distribution; migration patterns; relationship between economic activity and population trends. Prerequisites: Six hours of sociology or Sociology 1 and an introductory course in biology, economics, geography, or zoology. Three hours. McCann.

204 Ecological Perspective on Human Communities. Analysis of relationships between social, economic, technological organization of communities and their physical and sociocultural environments. Emphasis upon community land use, settlement patterns. Prerequisites: Six hours of sociology or Anthropology/Geography 179. Three hours. Mabry, Schmidt.

208 Interpersonal Communication. Contemporary theory and research on communications in dyadic relationships. Special emphasis on verbal and nonverbal aspects of self-disclosure, listening, coping, conflict, therapeutic interaction. Prerequisites: 141 or nine hours of sociology. Three hours. W. Lewis.

209 Small Groups. Structure and dynamics of small groups and the interpersonal, informal network of relations that characterize interaction of members. Three hours. Nixon, Steffenhagen.

211 Social Movements and Collective Behavior. Examination of origins, development, structure, consequences of crowds, riots, crazes, rumors, panics. Political, religious movements and their relationships to cultural, social change. Three hours. Danigelis, Finney, Folta, Sampson, Schmidt, Stanfield.

214 Delinquency. Analysis of nature, types of juvenile behavior that violates law. Mechanisms for defining such behavior as delinquent, their causes and consequences. Three hours. Folta, McCann.

216 Criminal Justice. Analysis of social structures, processes involved in identification, labeling of individuals as criminal offenders: criminal law, its enforcement and the courts. Three hours. Fishman, Folta, Stanfield.

217 Corrections. Analysis of social structures, processes involved with individuals designated as offenders of criminal law; probation, prison, parole, programs of prevention, rehabilitation. Three hours. Fishman, Stanfield.

219 Race Relations. Examination of American racial subordination in social, historical perspective. Analysis of inter-racial contacts, racial subcultures, social structures. Responses to racial prejudice, discrimination. Three hours. Danigelis, Loewen.

225 Organizations in Modern Society. Examination of basic classical and contemporary theory, research on human relations, internal structures, environments, types, general properties of complex organizations, bureaucracies. Three hours. Berkowitz, Finney, Folta, Sampson.

228 Organizational Development and Change. Examination of basic, applied research on problems of organizational effectiveness, innovation. Presentation of organizational development, change techniques, practical class exer-
cises. Prerequisites: Six hours of sociology, or one college course on organizations, or equivalent organizational experience with permission of instructor. Three hours. Berkowitz, Finney.

229 The Family as a Social Institution. The institution of the American family in cross-cultural, historical perspective. Theories, research on family continuity, change, institutional relationships. Prerequisites: 129 or six hours of sociology. Three hours. Berkowitz, Fengler, Foltz, G. Lewis, Mabry.

237 Occupations and Professions. Analysis of social organization of economic roles in industrial societies, institutional relationships of occupations, professions, impact of work structure on the individual. Three hours. Finney, Foltz, Mintz.

240 Political Sociology. Social organization of power, authority in modern societies and dynamics, institutional relationships of political institutions, interest groups, parties, publics. Three hours. Berkowitz, Danigelis, Finney, Loewen, Mintz, Nixon.

241 Methods of Public Opinion Research. (Same as Political Science 284.) Methods in conducting public opinion research: design, sampling, questionnaire construction, administration, data control, analysis of cross-sectional, longitudinal, and time series data. Prerequisites: 100 (Political Science 183) or equivalent with permission of instructor. Three hours. Berkowitz, Danigelis.

242 Public Opinion: Theory and Research. (Same as Political Science 285.) Theories of public opinion. Topics: attitude formation and change, political ideology, alienation and allegiance, political socialization, tolerance, political extremism. Prerequisite: 241 (Political Science 284) or permission of instructor. Three hours. Berkowitz, Danigelis.

243 Mass Media in Modern Society. Intensive examination of selected topics in the structure of media organizations and their relationships to and impacts upon the major institutions and publics of contemporary society. Three hours. W. Lewis, Mintz.

274 Methods of Data Gathering in Social Research. Techniques for generating, using observational, interview, survey, existing source data to systematically test sociological ideas. Design, sampling, measurement, ethical issues. Prerequisites: Sociology 100 or equivalent with permission of instructor. Three hours. Berkowitz, Danigelis, Loewen, Finney, Foltz, Sampson, Schmidt.

275 Methods of Data Analysis in Social Research. Quantitative analysis of sociological data. Table, regression, path analysis, scaling and factor analysis, analysis of variance (emphasis on multivariate techniques). Prerequisite: Sociology 100 or equivalent with permission of instructor. Three hours. Berkowitz, Danigelis, Finney, McCann.

278 The Development of Sociological Theory. Major classical traditions in sociological theory and contemporary research relevance. Detailed critical examination of contributions of Marx, Spencer, Durkheim, Weber, Simmel, Pareto, Mead. Prerequisites: Six hours of sociology or equivalent preparation in another social science with permission of instructor. Three hours. Loewen, McCann, Schmidt, Sampson.

279 Contemporary Sociological Theory. Critical examination of contemporary functional, conflict, exchange, interactionist, structural theoretical approaches. Other theoretical approaches selected by seminar participants. Prerequisite: Sociology 278. Three hours. Foltz, McCann, Sampson.

281, 282 Seminar. Presentation, discussion of advanced problems in sociological analysis. Prerequisites: Twelve hours of sociology and permission of instructor. Three hours. Staff.

288, 289 Seminar: Research and Methods of Teaching Sociology. Development, evaluation of teaching sociology. Prerequisites: Twelve hours of sociology and permission of department. Open only to graduate students and advanced undergraduate sociology students who serve concurrently as teaching assistants in the department. Three hours. Staff.

295, 296 Special Topics.

297, 298 Readings and Research.

SPANISH (SPAN)

SPANISH LITERATURE

235, 236 Golden Age. The picaresque novel, the drama and poetry of the 16th and 17th centuries, emphasizing Lope de Vega, Calderon, Quevedo, Tirso de Molina. Three hours each course. Weiger. Alternate years, 1984-85.

245, 246 Cervantes. Don Quijote, the Novelas Ejemplares, and the theatre of Cervantes. Three hours each course. Weiger. Alternate years.

276 The Reawakening in the 20th Century. Origins and main aspects of the intellectual conflicts in modern Spain as reflected in the literary works from the "Generation of 1898" to the present. Three hours. Ugalde. Alternate years, 1985-86.

285, 286 Spanish-American Literature of Social Protest. Literature of Spanish-American peoples as a reflection of, contribution to social problems following various directions of social protest against political systems, governments, imperialism. 286 stresses the contemporary. Three hours each course. Zarate. Alternate years, 1984-85.

293 Latin American Civilization. History, culture of Latin American people from formation of Indian civilization to present ideals, problems. Pre-Hispanic civilization, colonization, modern states. Artistic, literary, musical manifestations of these periods. Three hours. Zarate. Alternate
295, 296 Advanced Special Topics.
297, 298 Advanced Readings.

TEXTILES, MERCHANDISING, AND CONSUMER STUDIES (TMCS)

223 Functional Apparel Design. Analysis and evaluation of the social and physical apparel needs of a variety of consumer groups; activities include discussion, experimentation, and design. Prerequisites: 122 or permission of instructor. Three hours. Loker.

261 Consumer Education Seminar. Survey and analysis of programs, materials, and research in consumer information and education. Prerequisites: A research methodology course or six credit hours undergraduate course work in consumer studies. Three hours. Scott.

295 Special Topics. Lectures, laboratories, directed readings, and projects on advanced topics as announced. Departmental permission. Credit as arranged.
The Board of Trustees
of the
University of Vermont and State Agricultural College

Lattie Finch Coor, A.B., M.A., Ph.D., President
Richard Arkwright Snelling, A.B., Governor

ex officio

Robert Porter Bliss
Thomas Wright McCargo
John Francis Murphy
Marion Wood Spencer, R.N.
Norman Edward Wright

St. Albans, Vermont
Sewickley, Pennsylvania
Ludlow, Vermont
Addison, Vermont
Putney, Vermont

Term Ending March 1985

Harriet Pearson Dustan, M.D.
Florence Cudworth Holden, B.A.
Harry Robert Mitiguy, B.S., M.S.
Kerry Lynn Ann Percy

Birmingham, Alabama
Bow, New Hampshire
Shelburne, Vermont
White River Junction, Vermont

Term Ending March 1986

Edwin Adolph Colvin
Gloria Ann Conant
Charles Rogers Cummings, B.A., LL.B.
John James Zampieri

Shaftsbury, Vermont
Richmond, Vermont
Brattleboro, Vermont
South Ryegate, Vermont

Term Ending March 1987

Phyllis Burke Davis, B.A.
John Theodore Fey, J.S.D.
Angelo Peter Pizzagalli, B.S.

New York, New York
New York, New York
South Burlington, Vermont

Term Ending March 1988

Gwendolyn Tibbits Bronson
William Allyn Gilbert, B.A., LL.B.
Edgar May, B.S.
Donald Alfred Moore

Shelburne, Vermont
Hinesburg, Vermont
Springfield, Vermont
Shrewsbury, Vermont

Term Ending March 1989

Ray Wallace Allen, B.S.
Frank Anderson Balch
Robert Allan Paul, A.B., J.D.

South Hero, Vermont
Burlington, Vermont
Burlington, Vermont

Term Ending March 1990
Officers of Administration

LATTIE F. COOR, Ph.D.  
ROBERT G. ARNS, Ph.D.  
ROBERT B. LAWSON, Ph.D.  
WILLIAM H. LUGINBUHL, M.D.  
ROBERT O. SINCLAIR, Ph.D.  
GERALD P. FRANCIS, Ph.D.  
JOHN G. JEWETT, Ph.D.  
CHARLES A. TESCONI, JR., Ed.D.  
LAWRENCE K. FORCIER, Ph.D.  
H. LAWRENCE McCROREY, Ph.D.  
ALFRED L. THIMM, Ph.D.

President
Vice President for Academic Affairs
Associate Vice President for Research and Dean
Graduate College
Dean, Division of Health Sciences and Dean
College of Medicine
Dean, College of Agriculture
Dean, Division of Engineering, Mathematics
and Business Administration and
Dean, College of Engineering and Mathematics
Dean, College of Arts and Sciences
Dean, College of Education and Social Services
Acting Director, School of Natural Resources
Director, School of Allied Health Sciences
Director, School of Business Administration
Executive Committee of the Graduate College

ROBERT B. LAWSON
Dean, Graduate College
ANN M. SPEARING
Associate Dean, Graduate College
DONALD H. DEHAYES
Associate Professor of Forestry; Secretary, Graduate Faculty

Term Ending June, 1985
LYNNE A. BOND
Associate Professor of Psychology
PHILIP W. COOK
Associate Professor of Botany
EDWARD R. DUCHARME
Professor of Organizational, Counseling, and Foundational Studies
PATRICIA M. HANSON
Graduate Student
JAMES M. KRAUSHAAR
Associate Professor of Business Administration
ROBERT B. LOW
Professor of Physiology and Biophysics

Term Ending June, 1986
RICHARD G. ABSHER
Professor of Electrical Engineering
PATRICK H. HUTTON
Professor of History
WILLIAM L. MEYER
Professor of Biochemistry

Term Ending June, 1987
MARTIN E. KUEHNE
Professor of Chemistry

Graduate Faculty Emeriti

HEINZ LUDWIG ANSBACHER
Professor of Psychology
BETTY BANDEL
Professor of English
SAMUEL NATHANIEL BOGORAD
Frederick M. and Fannie C.P. Corse Professor of English Language and Literature
ALFRED HAYES CHAMBERS
Professor of Physiology and Biophysics
MALCOLM D. DAGGETT
Professor of Romance Languages
CHARLES GEORGE DOLL
Professor of Geology
FRED WILLIAMS DUNIHUE
Professor of Anatomy
GEORGE DYKHUIZEN
Marsh Professor of Intellectual and Moral Philosophy
FRED WILLIAM GALLAGHER
Professor of Medical Microbiology
EDWIN CHARLES GREIF
Professor of Business Administration
MORRIS HANDELSMAN
Professor of Electrical Engineering
MURIEL JOY HUGHES
Professor of English
JOSEPH ANTHONY IZZO, JR.
Professor of Mathematics
STUART LYNDE JOHNSTON
Professor of Romance Languages
DONALD BOYES JOHNSTONE
Professor of Microbiology and Biochemistry
JOHN HUTCHINSON LOCHHEAD
Professor of Zoology
ELEANOR MERRIFIELD LUSE
Professor of Speech
FRANK MARTINEK
Professor of Mechanical Engineering
DONALD M. MELVILLE
Professor of Biochemistry
BRUCE ELWYN MESERVE
Professor of Mathematics
REGINALD VENN MILBANK
Professor of Civil Engineering
PAUL AMOS MOODY
Howard Professor of Natural History and Zoology
ELLEN HASTINGS MORSE
Professor of Home Economics
JOHN ALVIN NEWLANDER
Professor of Animal Sciences
PAPPOUTSAKIS
Professor of Music
THOMAS ALAN PHILLIPS
Professor of Medicine
WILLARD BISSELL POPE
Frederick M. and Fannie C.P. Corse Professor of English Language and Literature
HERBERT EVERTT PUTNAM
Associate Professor of History
THOMAS SPROSTON, JR.
Professor of Botany
STANISLAW JAN STARON
Professor of Political Science
TRUMAN M. WEBSTER
Professor of German
SAMUEL CLAUDE WIGGANS
Professor of Plant and Soil Science

Ex Officio Members of the Graduate Faculty

LAWRENCE K. FORCIER, Ph.D.
Associate Professor of Forestry
GERALD P. FRANCIS, Ph.D.
Professor of Mechanical Engineering
JOHN G. JEWETT, Ph.D.
Professor of Chemistry
WILLIAM H. LUGINBUHL, M.D.
Professor of Pathology
H. LAWRENCE McCROREY, Ph.D.
Professor of Physiology and Biophysics
DONALD E. MOSER, Ph.D.
Professor of Mathematics
THOMAS E. PATTERSON, M.E.Ed.
Extension Associate Professor of Vocational Education and Technology
ROBERT O. SINCLAIR, Ph.D.
Professor of Agricultural and Resource Economics
ALBERT M. SMITH, Ph.D.
Professor of Animal Sciences
ALFRED L. THIMM, Ph.D.
Professor of Business Administration
ROY A. WHITMORE, M.F.
Professor of Forestry
Members of The Graduate Faculty

JOSEPH A. ABRUSCATO,
M.A. (Trenton), Ph.D. (Ohio State)
Professor of Professional Education and Curriculum Development

P. MARLENE ABSHER
Ph.D. (North Carolina)
Research Assistant Professor of Medicine

RICHARD GAYLON ABSHER
M.S. (New Mexico), Ph.D. (Duke)
Professor of Electrical Engineering

THOMAS M. ACHENBACH
Ph.D. (Minnesota)
Professor of Psychiatry and Psychology

KENNETH BRUCE ADLER
M.S. (Adelphia), Ph.D. (Vermont)
Research Assistant Professor

RUSSELL MAYNARD AGNE
Ph.D. (Connecticut)
Professor of Professional Education and Curriculum Development

GEORGE W. ALBEE
Ph.D. (Pittsburgh)
Professor of Psychology

JOHN ALEONG, Ph.D.
M.S. (Toronto), Ph.D. (Iowa State)
Research Associate Professor of Statistics

CHRISTOPHER WHITNEY ALLEN
M.S., Ph.D. (Illinois)
Professor of Chemistry

NORMAN ROLAND ALPERT
Ph.D. (Columbia)
Professor of Physiology and Biophysics

ZUELL PHILIP AMBROSE
M.A., Ph.D. (Princeton)
Professor of Classics

RICHARD L. ANDERSON
M.S., Ph.D. (Minnesota)
Professor of Electrical Engineering

ALFRED JOHN ANDREA
Ph.D. (Cornell)
Professor of History

ALLAN A. ANDREWS
M.A., Ph.D. (Claremont)
Associate Professor of Religion

MARIORIE A. ARIANO
Ph.D. (U.C.L.A.)
Assistant Professor of Anatomy and Neurobiology

TAKAMURA ASHIKAGA
M.S., Ph.D. (U.C.L.A.)
Associate Professor of Mathematics

HENRY VERNON ATHERTON
M.S. (Vermont), Ph.D. (Pennsylvania State)
Professor of Animal Sciences

FREDERICK J. AULETTA, III
Ph.D. (Massachusetts)
Associate Professor of Biochemistry

ROBERT L. BANCROFT
M.S. (Vermont), Ph.D. (Purdue)
Assistant Professor of Agricultural and Resource Economics

HORACE GARDINER BARNUM
M.S., Ph.D. (Chicago)
Associate Professor of Geography

DAVID S. BARRINGTON
Ph.D. (Harvard)
Associate Professor of Botany; Curator, Pringle Herbarium

LAVON L. BARTEL
M.S. (Oregon State), Ph.D. (Wisconsin)
Assistant Professor of Human Nutrition and Foods

RICHMOND JAY BARTLETT
Ph.D. (Ohio State)
Professor of Plant and Soil Science

TIMOTHY M. BATES
Ph.D. (Wisconsin)
Associate Professor of Economics

DALE R. BERGDAHL
M.S., Ph.D. (Minnesota)
Associate Professor of Forestry

THOMAS K. BLOOM
M.A. (California State at Long Beach), Ed.D. (Illinois)
Associate Professor of Vocational Education and Technology

ANDREW R. BODMAN
M.A., Ph.D. (Ohio State)
Assistant Professor of Geography

BETTY MACHTEL BOLLER
M.Ed. (Louisville), Ed.D. (Harvard)
Professor of Organizational, Counseling, and Foundational Studies

LYNNE A. BOND
M.S., Ph.D. (Tufts)
Associate Professor of Psychology

DAVID KENNETH BORAKER
Ph.D. (U.C.L.A.)
Associate Professor of Medical Microbiology

MARK E. BOUTON
Ph.D. (U. of Washington)
Visiting Assistant Professor of Psychology

BERTIE REYNOLD BOYCE
M.S. (Vermont), Ph.D. (Harvard)
Professor of Plant and Soil Science

ANTHONY G. BRADLEY
Ph.D. (SUNY at Buffalo)
Professor of English

MARY E. BREEN
M.S. (Vermont)
Associate Professor of Medical Technology

PHYLIS BRONSTEIN-BURROWS
M.A., (Boston), Ph.D. (Harvard)
Assistant Professor of Psychology

JOHN STEWART BROWN, JR.
M.S., Ph.D. (Rutgers)
Professor of Physics

FRANK M. BRYAN
M.A. (Vermont), Ph.D. (Connecticut)
Associate Professor of Political Science

LEONARD S. BULL
M.S. (Oklahoma State), Ph.D. (Cornell)
Professor of Animal Sciences

SARA N. BURCHARD
Ph.D. (Vermont)
Research Assistant Professor of Psychology

C. HACKETT BUSHWELLER
M.S. (Middlebury), Ph.D. (California at Berkeley)
Professor of Chemistry

DAVID E. CAPEN
M.S. (Maine), Ph.D. (Utah State)
Associate Professor of Wildlife and Fisheries Biology

LYNDON B. CAREW, JR.
Ph.D. (Cornell)
Professor of Animal Sciences and Human Nutrition and Foods

108 | THE GRADUATE FACULTY
JOHN N. EVANS
Ph.D. (Florida)
Assistant Professor of Physiology and Biophysics

SAMUEL B. FEITELBERG
M.A. (Columbia)
Professor of Physical Therapy

JEREMY P. FELT
M.A. (Duke), Ph.D. (Syracuse)
Professor of History

JEROME FRANCIS FIEKERS
M.S. (Massachusetts College of Pharmacy), Ph.D. (Connecticut)
Assistant Professor of Anatomy and Neurobiology

HENRY C. FINNEY
M.A. (Michigan), Ph.D. (California at Berkeley)
Associate Professor of Sociology

MARK GIBSON
M.D. (Case Western Reserve)
Assistant Professor of Obstetrics and Gynecology

ALPHONSE HENRY GILBERT
M.S. (Michigan), Ph.D. (Colorado)
Associate Professor of Resource Economics

BRADY BLACKFORD GILLELAND
M.A. (Oklahoma), Ph.D. (North Carolina)
Professor of Classical Languages

ROBERT JOHN GOBIN
M.Ed. (Bowling Green), Ph.D. (Ohio State)
Professor of Human Development Studies

JOEL M. GOLDBERG
Ph.D. (Michigan)
Assistant Professor of Chemistry

D. JACQUE GRINNELL
M.B.A. (Cornell), D.B.A. (Indiana)
Professor of Business Administration

BARRY E. GUITAR
M.A. (Western Michigan), Ph.D. (Wisconsin)
Associate Professor of Communication Science and Disorders

MARK GIBSON
M.D. (Case Western Reserve)
Assistant Professor of Obstetrics and Gynecology

ALPHONSE HENRY GILBERT
M.S. (Michigan), Ph.D. (Colorado)
Associate Professor of Resource Economics

BRADY BLACKFORD GILLELAND
M.A. (Oklahoma), Ph.D. (North Carolina)
Professor of Classical Languages

ROBERT JOHN GOBIN
M.Ed. (Bowling Green), Ph.D. (Ohio State)
Professor of Human Development Studies

JOEL M. GOLDBERG
Ph.D. (Michigan)
Assistant Professor of Chemistry

D. JACQUE GRINNELL
M.B.A. (Cornell), D.B.A. (Indiana)
Professor of Business Administration

BARRY E. GUITAR
M.A. (Western Michigan), Ph.D. (Wisconsin)
Associate Professor of Communication Science and Disorders
ANDREW PAUL KRAPCHO
M.A., Ph.D. (Harvard)
Professor of Chemistry

JAMES M. KRAUSHAAR
M.S., Ph.D. (Syracuse)
Associate Professor of Business Administration

RICHARD M. KRIESEL
Ph.D. (Temple)
Associate Professor of Anatomy and Neurobiology

JOHN ERNEST KRIZAN
M.S., Ph.D. (Lehigh)
Professor of Physics

LAWRENCE FREDERICK KROMER
Ph.D. (Chicago)
Associate Professor of Anatomy and Neurobiology

PATRICIA P. KRUPP
Ph.D. (Hahnemann)
Associate Professor of Anatomy and Neurobiology

MARTIN ERIC KUEHNE
M.A. (Harvard), Ph.D. (Columbia)
Professor of Chemistry

ARTHUR KUFLIK
Ph.D. (Princeton)
Associate Professor of Philosophy

GEORGE W. LaBAR
M.S. (Idaho), Ph.D. (Montana State)
Associate Professor of Wildlife and Fisheries Biology

GENE EARL LABER
Ph.D. (Maryland)
Professor of Business Administration

RENE CHARLES LACHAPELLE
M.D., Ph.D. (Syracuse)
Associate Professor of Medical Technology

DAVID CHIN LAI
D. Eng. (Johns Hopkins)
Professor of Electrical Engineering

LLOYD MILTON LAMBERT, JR.
M.S.E.E., M.A., Ph.D. (California at Berkeley)
Professor of Physics

MERTON PHILIP LAMDEN
Ph.D. (M.I.T.)
Professor of Biochemistry

RICHARD H. LANDESMAN
M.S. (N.Y.U.), Ph.D. (British Columbia)
Associate Professor of Zoology

HELENE WANDA LANG
M.Ed., Ed.D. (Boston)
Associate Professor of Professional Education and Curriculum Development

ROBERT LOWELL LARSON
M.Ed. (Bridgewater State), Ed.D. (Boston)
Associate Professor of Organizational, Counseling, and Foundational Studies

ROBERT BERNARD LAWSON
Ph.D. (Delaware)
Professor of Psychology

WILMER R. LEENSTRA
Ph.D. (U. of Washington)
Associate Professor of Chemistry

HERBERT LEROY LEFF
Ph.D. (Harvard)
Associate Professor of Psychology

HAROLD LEITENBERG
Ph.D. (Indiana)
Professor of Psychology

ROBERT HOWARD LENOX
M.D. (Vermont)
Professor of Psychiatry

WILLIAM J. LEWIS
M.A. (Northwestern), Ph.D. (Florida)
Professor of Sociology

CHESTER H. LIEBS
M.S. (Columbia)
Associate Professor of History

AULIS LIND
M.A. (S. Illinois), Ph.D. (Wisconsin)
Associate Professor of Geography

JOHN J. LINDSAY
M.S. (Massachusetts), Ph.D. (Utah State)
Associate Professor of Forestry

WILLIAM C. LIPKE
M.A. (Wayne State), Ph.D. (Wisconsin)
Associate Professor of Art

SUZANNE LOKER
M.A. (Syracuse), Ph.D. (Kansas State)
Assistant Professor of Textiles, Merchandising, and Consumer Studies

LITTLETON LONG
M.A., Ph.D. (Yale)
Professor of English

ROBERT B. LOW
Ph.D. (Chicago)
Professor of Physiology and Biophysics

JOHN HAMILTON MARBY
M.A., Ph.D. (Iowa)
Professor of Sociology

GEORGE B. MacCOLLOM
Ph.D. (Cornell)
Professor of Plant and Soil Science

BRUCE R. MacPHerson
M.S., M.D. (Vermont)
Associate Professor of Pathology

FREDERICK R. MAGDOFF
M.S., Ph.D. (Cornell)
Associate Professor of Plant and Soil Science

GREGORY S. MAHLER
A.M., Ph.D. (Duke)
Associate Professor of Political Science

FRANK MANCHEL
M.A. (Hunter), Ed.D. (Columbia)
Professor of English

WILLIAM MANN
A.M. (Stanford), Ph.D. (Minnesota)
Professor of Philosophy

ROBERT E. MANNING
M.S., Ph.D. (Michigan State)
Associate Professor of Recreation Management

TIMOTHY L. Mcauliffe
M.S. (Southern Illinois), Ph.D. (U.C.L.A.)
Research Assistant Professor of Mathematics

JOHN JOSEPH MCCORMACK, JR.
Ph.D. (Yale)
Professor of Pharmacology

CONSTANCE M. McGOVERN
M.A., Ph.D. (Massachusetts)
Assistant Professor of History

HUGH STRATTON McKENZIE
Ph.D. (Arizona)
Professor of Special Education, Social Work, and Social Services

MARGARET KREMER McLAUGHLIN
M.S. (Rutgers), Ph.D. (Maryland)
Assistant Professor of Obstetrics and Gynecology and Physiology

RICHARD WARREN McLay
M.S., Ph.D. (Wisconsin)
Professor of Mechanical Engineering
HAROLD AUSTIN MEEKS  
M.A. Ph.D. (Minnesota)  
Associate Professor of Geography

CHARLOTTE J. MEHRTENS  
M.S., Ph.D. (Chicago)  
Assistant Professor of Geology

WILLIAM CRAIG METCALFE  
M.S., Ph.D. (Minnesota)  
Professor of History

WILLIAM LAROS MEYER  
Ph.D. (U. of Washington)  
Professor of Biochemistry

HERMAN W. MEYERS, JR.  
M.A., Ph.D. (Connecticut)  
Associate Professor of Organizational, Counseling, and Foundation Studies

WOLFGANG MIEDER  
M.A. (Michigan), Ph.D. (Michigan State)  
Professor of German

EDWARD JERVIS MILES  
M.A., Ph.D. (Syracuse)  
Professor of Geography

CAROL T. MILLER  
M.S., Ph.D. (Purdue)  
Assistant Professor of Psychology

DOUGLAS L. MILLER  
M.S. (Ohio State), Ph.D. (Vermont)  
Research Associate Professor of Physics

GAGAN MIRCHANDANI  
M.S. (Syracuse), Ph.D. (Cornell)  
Professor of Electrical Engineering

WILLIAM E. MITCHELL  
M.A., Ph.D. (Columbia)  
Professor of Anthropology

THOMAS JOHN MOEHRING  
M.S., Ph.D. (Rutgers)  
Professor of Medical Microbiology

MARY T. MOFFROID  
M.S. (Colorado), Ph.D. (New York)  
Associate Professor of Physical Therapy

JAMES W. MORRIS  
M.S. (Tennessee Tech.), Ph.D. (Cornell)  
Assistant Professor of Civil Engineering

MARIARANCA MORSCELLI  
Ph.D. (Milano)  
Research Associate Professor of Botany

BROOKE T. MOSSMAN  
M.S., Ph.D. (Vermont)  
Research Associate Professor of Pathology

WILLIAM M. MURPHY  
M.S., Ph.D. (Wisconsin)  
Associate Professor of Plant and Soil Science

RICHARD E. MUSTY  
M.A., Ph.D. (McGill)  
Professor of Psychology

ROBERT J. NASH  
M.S. (Northeastern), Ed.D. (Boston)  
Professor of Organizational, Counseling, and Foundational Studies

ANN NEVIN  
M.Ed. (Vermont), Ph.D. (Minnesota)  
Associate Professor of Special Education, Social Work, and Social Services

ROBERT A. NEWMAN  
M.S., Ph.D. (Connecticut)  
Associate Professor of Pharmacology

CARLTON M. NEWTON  
Ph.D. (SUNY/Coll. of Forestry)  
Associate Professor of Forestry

PIETRO S. NIVOLA  
Ph.D. (Harvard)  
Associate Professor of Political Science

CHARLES FRYOR NOVOTNY  
Ph.D. (Pittsburgh)  
Associate Professor of Medical Microbiology

WESLEY LEMARS NYBORG  
M.S., Ph.D. (Pennsylvania State)  
Professor of Physics

JANICE L. O'DONNELL  
M.A., Ph.D. (Colorado)  
Assistant Professor of Organizational, Counseling, and Foundational Studies

JOSEPH CLARENCE OPPENLANDER  
M.S.C.E. (Purdue)  
Professor of Civil Engineering

RALPH HARRY ORTH  
Ph.D. (Rochester)  
Professor of English

MARCOS C. ORTIZ  
M.S., Ph.D. (M.I.T.)  
Assistant Professor of Mechanical Engineering

JAMES HARRIS OVERFIELD  
M.A. (Chicago), Ph.D. (Princeton)  
Associate Professor of History

ALMA JEAN OWEN  
M.S., Ph.D. (Missouri)  
Assistant Professor of Textiles, Merchandising, and Consumer Studies

WILLIAM EDWARD PADEN  
M.A., Ph.D. (Claremont)  
Associate Professor of Religion

PHYLLIS PAOLUCCI-WHITCOMB  
M.Ed. (Vermont), Ed.D. (Boston)  
Associate Professor of Special Education, Social Work, and Social Services

E. LAUCK PARKE  
M.B.A. (Pennsylvania State), Ph.D. (Massachusetts)  
Associate Professor of Business Administration

BRUCE L. PARKER  
M.S., Ph.D. (Cornell)  
Professor of Plant and Soil Science

RODNEY LAWRENCE PARSONS  
Ph.D. (Stanford)  
Professor of Anatomy and Neurobiology

JOSEPH BURTON PATLAK  
Ph.D. (U.C.L.A.)  
Assistant Professor of Physiology and Biophysics

NORMAN EUGENE PELLETT  
M.S., Ph.D. (Minnesota)  
Associate Professor of Plant and Soil Science

NEIL H. PELSUE, JR.  
M.S. (Massachusetts), Ph.D. (Purdue)  
Associate Professor of Agricultural and Resource Economics

JOHN P. PENNYPACKER  
Ph.D. (Connecticut)  
Professor of Zoology

DANIEL PETER PERL  
M.D. (SUNY)  
Professor of Pathology

LEONARD J. PERRY  
M.S. (Virginia Polytechnic Institute)  
Professor of Botany

ANN FRANCES PEYSER  
Ph.D. (Vermont)  
Clinical Assistant Professor of Psychology

PIETRO S. NIVOLA  
Ph.D. (Harvard)  
Associate Professor of Political Science

CHARLES FRYOR NOVOTNY  
Ph.D. (Pittsburgh)  
Associate Professor of Medical Microbiology

WESLEY LEMARS NYBORG  
M.S., Ph.D. (Pennsylvania State)  
Professor of Physics

JANICE L. O'DONNELL  
M.A., Ph.D. (Colorado)  
Assistant Professor of Organizational, Counseling, and Foundational Studies

JOSEPH CLARENCE OPPENLANDER  
M.S.C.E. (Purdue)  
Professor of Civil Engineering

RALPH HARRY ORTH  
Ph.D. (Rochester)  
Professor of English

MARCOS C. ORTIZ  
M.S., Ph.D. (M.I.T.)  
Assistant Professor of Mechanical Engineering

JAMES HARRIS OVERFIELD  
M.A. (Chicago), Ph.D. (Princeton)  
Associate Professor of History

ALMA JEAN OWEN  
M.S., Ph.D. (Missouri)  
Assistant Professor of Textiles, Merchandising, and Consumer Studies

WILLIAM EDWARD PADEN  
M.A., Ph.D. (Claremont)  
Associate Professor of Religion

PHYLLIS PAOLUCCI-WHITCOMB  
M.Ed. (Vermont), Ed.D. (Boston)  
Associate Professor of Special Education, Social Work, and Social Services

E. LAUCK PARKE  
M.B.A. (Pennsylvania State), Ph.D. (Massachusetts)  
Associate Professor of Business Administration

BRUCE L. PARKER  
M.S., Ph.D. (Cornell)  
Professor of Plant and Soil Science

RODNEY LAWRENCE PARSONS  
Ph.D. (Stanford)  
Professor of Anatomy and Neurobiology

JOSEPH BURTON PATLAK  
Ph.D. (U.C.L.A.)  
Assistant Professor of Physiology and Biophysics

NORMAN EUGENE PELLETT  
M.S., Ph.D. (Minnesota)  
Associate Professor of Plant and Soil Science

NEIL H. PELSUE, JR.  
M.S. (Massachusetts), Ph.D. (Purdue)  
Associate Professor of Agricultural and Resource Economics

JOHN P. PENNYPACKER  
Ph.D. (Connecticut)  
Professor of Zoology

DANIEL PETER PERL  
M.D. (SUNY)  
Professor of Pathology

LEONARD J. PERRY  
M.S. (Virginia Polytechnic Institute)  
Professor of Botany

ANN FRANCES PEYSER  
Ph.D. (Vermont)  
Clinical Assistant Professor of Psychology
JAMES ALLAN PETERSON  
M.Ed. (South Dakota State), Ed.D. (Boston)  
Professor of Organizational, Counseling, and Foundational Studies

MARY McNEIL PIERCE  
M.Ed. (Vermont), Ed.D. (Boston)  
Associate Professor of Professional Education and Curriculum Development

STEPHEN J. PINTAURO  
M.S., Ph.D. (Rhode Island)  
Assistant Professor of Human Nutrition and Foods

WILLIAM DOUGLAS PITHERS  
M.A., Ph.D. (Kent State)  
Clinical Assistant Professor of Psychology

ZANDER PONZO  
M.S. (Illinois), Ph.D. (Wisconsin)  
Associate Professor of Organizational, Counseling, and Foundational Studies

MALCOLM H. POPE  
M.S. (Bridgeport), Ph.D. (Vermont)  
Professor of Orthopaedic Surgery and Professor of Mechanical Engineering

MARGORY W. POWER  
Ph.D. (Indiana)  
Associate Professor of Anthropology

DAVID WILLIAM RACUSEN  
Ph.D. (Iowa State)  
Professor of Microbiology and Biochemistry

JOANNA MARIE RANKIN  
M.S. (Tulane), Ph.D. (Iowa)  
Associate Professor of Physics

ELOISE E. RATHBONE-McCUAN  
Ph.D. (Pittsburgh)  
Associate Professor of Special Education, Social Work, and Social Services

J. PATRICK REED  
M.S. (Vermont)  
Assistant Professor of Medical Technology

CARL HUBERT REIDEL  
MPA (Harvard), Ph.D. (Minnesota)  
Professor of Forestry and Daniel Clarke Sanders  
Professor of Environmental Studies

S. ALEXANDER RIPPA  
Professor of Organizational, Counseling, and Foundational Studies

STEVEN HENRY ROBINSON  
Ph.D. (Thomas Jefferson)  
Research Assistant Professor of Neurology

BARBARA SAYLOR RODGERS  
M.A., Ph.D. (California at Berkeley)  
Assistant Professor of Classics

ROBERT HOWARD RODGERS  
Ph.D. (Harvard)  
Visiting Professor of Classics

ALFRED F. ROSA  
M.A., Ph.D. (Massachusetts)  
Professor of English

STEVEN R. ROSE  
Ph.D. (Wisconsin)  
Assistant Professor of Special Education, Social Work, and Social Services

JAMES CARL ROSEN  
Ph.D. (Nevada)  
Associate Professor of Psychology

JANE K. ROSS  
M.S. (Purdue), Ph.D. (Oregon State)  
Assistant Professor of Human Nutrition and Foods

WILFRED ROTH  
Ph.D. (M.I.T.)  
Professor of Electrical Engineering

ESTHER D. ROTHBLUM  
M.S., Ph.D. (Rutgers)  
Assistant Professor of Psychology

KENNETH S. ROTHWELL  
M.A., Ph.D. (Columbia)  
Professor of English

STANLEY RUSH  
M.S., Ph.D. (Syracuse)  
Professor of Electrical Engineering

CHARLES CURTIS RYERSON  
M.S. (Utah), Ph.D. (Southern Illinois)  
Assistant Professor of Geography

THOMAS D. SACHS  
Ph.D. (Innsbruck)  
Associate Professor of Physics

SAMUEL F. SAMPSON  
M.A. (Oklahoma), Ph.D. (Cornell)  
Professor of Sociology

KAREN WILEY Sandler  
M.A. (Pennsylvania State), Ph.D. (Pennsylvania)  
Assistant Professor of Romance Languages

FREDERIC OBERLIN SARGENT  
Ph.D. (Wisconsin)  
Professor of Resource Economics

LEONARD MICHAEL SCARFONE  
M.A. (Williams), Ph.D. (R.P.I.)  
Professor of Physics

WARREN IRA SCHAEFFER  
M.S., Ph.D. (Rutgers)  
Professor of Medical Microbiology

JOSEPH J. SCHALL  
M.S. (Rhode Island), Ph.D. (Texas)  
Assistant Professor of Zoology

ELEANOR D. SCHLENKER  
M.S., Ph.D. (Cornell)  
Associate Professor of Human Nutrition and Foods

ROBIN RUDOLF SCHLUNK  
Ph.D. (Cincinnati)  
Professor of Classics

FREDERICK EBERHARD SCHMIDT  
M.S., Ph.D. (Cornell)  
Associate Professor of Sociology

WOLFE WILHELM SCHMOKEL  
M.A., Ph.D. (Yale)  
Professor of History

HERBERT LEWIS SCHULTZ  
M.A., Ed.D. (Columbia)  
Associate Professor of Music

DAVID A. SCRACE  
Ph.D. (Indiana)  
Associate Professor of German

PETER JORDAN SEYBOLT  
Ph.D. (Harvard)  
Professor of History

LAWRENCE G. SHELTON  
M.A., Ph.D. (Minnesota)  
Associate Professor of Human Development Studies

ALLEN CLASS SHEPHERD III  
M.A. (Brown), Ph.D. (Pennsylvania)  
Professor of English

GEORGE SHER  
Ph.D. (Columbia)  
Professor of Philosophy
DAVID A. SHIMAN
M.A., Ph.D. (California at Berkeley)
Professor of Organizational, Counseling, and Foundational Studies

LARRY E. SHIRLAND
M.S., Ph.D. (Oregon State)
Associate Professor of Business Administration

KENNETH ROGERS SIMMONS
M.S., Ph.D. (Cornell)
Associate Professor of Animal Sciences

R. THOMAS SIMONE
M.A., Ph.D. (Claremont)
Assistant Professor of English

ROBERT ERIK SJOGREN
M.S., Ph.D. (Cincinnati)
Associate Professor of Microbiology and Biochemistry

CAROL J. SMITH
Ph.D. (Vermont)
Research Associate Professor of Medicine

MARKLEY E. SMITH
M.Ed. (Vermont), Ed.D. (Boston)
Assistant Professor of Human Development and Family Studies

LAURA J. SOLOMON
M.S., Ph.D. (Virginia Polytechnic Institute)
Visiting Assistant Professor of Psychology

KEVORK SPARTALIAN
M.A. (Columbia), Ph.D. (Rochester)
Professor of History

ROLFE SEATON STANLEY
M.S., Ph.D. (Yale)
Professor of Geology

MICHAEL N. STANTON
Ph.D. (Rochester)
Associate Professor of English

RONALD ALBERT STEFFENHAGEN
M.S.A. (Wayne State), Ph.D. (SUNY Buffalo)
Professor of Sociology

HENRY JOHN STEFFENS
M.A., Ph.D. (Cornell)
Professor of History

WILLIAM A. STEPHAN
M.A., Ph.D. (Delaware)
Associate Professor of English

DEAN FINLEY STEVENS
A.M. (Boston), Ph.D. (Clark)
Associate Professor of Zoology

S. CHRISTOPHER STEVENSON
M.A. (Fairham), Ph.D. (Connecticut)
Assistant Professor of Professional Education and Curriculum Development

WARREN R. STINEBRING
M.S., Ph.D. (Pennsylvania)
Professor of Medical Microbiology

MARK A. STOLER
M.A., Ph.D. (Wisconsin)
Professor of History

NEIL RALPH STOUT
M.S., Ph.D. (Wisconsin)
Professor of History

MICHAEL JOHN STRAUSS
Ph.D. (California at Berkeley)
Professor of Chemistry

ANNE M. SULLIVAN
M.S. (Vermont)
Associate Professor of Medical Technology

RICHARD SWETERLITSCH
M.A. (Duquesne), Ph.D. (Indiana)
Assistant Professor of English

LEONARD J. TASHMAN
Ph.D. (Brown)
Associate Professor of Business Administration

CHARLES A. TESCONI, JR.
M.Ed., Ed.D. (Cincinnati)
Professor of Organizational, Counseling, and Foundational Studies

JOHN WALTER THANASSI
Ph.D. (Yale)
Professor of Biochemistry

ANN M. SPEARING
M.S. (SUNY/Coll. of Forestry), Ph.D. (Maryland)
Assistant Professor of Pathology

THOMAS JOHN SPINNER
M.S., Ph.D. (Cornell)
Professor of History

MARSHALL TRUE
M.A., Ph.D. (Virginia)
Associate Professor of History

RICHARD SWETERLITSCH
M.A. (Duquesne), Ph.D. (Indiana)
Assistant Professor of English

HELENE W. TOOLAN
Ph.D. (Cornell)
Associate Professor of Pathology

DAVID ALAN TRAIN
M.S., Ph.D. (Manchester)
Assistant Professor of Computer Science

RAYMOND HERMAN TREMBLAY
M.S. (Vermont), Ph.D. (Cornell)
Professor of Agricultural and Resource Economics

ROBERT S. TYZBIR
Ph.D. (Rhode Island)
Assistant Professor of Human Nutrition and Foods

HUBERT WALTER VOGELMANN
M.A., Ph.D. (Michigan)
Professor of Botany

ROSS TIMM VOGELSBERG
M.S. (Utah), Ph.D. (Illinois)
Visiting Assistant Professor of Special Education, Social Work, and Social Services

BRANIMIR F. VON TURKOVICH
M.S. (Madrid), Ph.D. (Illinois)
Professor of Mechanical Engineering

GEORGE DAYTON WEBB
M.A.T. (Yale), Ph.D. (Colorado)
Associate Professor of Zoology and Biophysics

FRED CLARENCE WEBSTER
M.S. (Vermont), Ph.D. (Cornell)
Professor of Agricultural and Resource Economics

JOHN GEORGE WEIGER
M.A. (Colorado), Ph.D. (Indiana)
Professor of Romance Languages

JAMES GRAHAM WELCH
M.S., Ph.D. (Wisconsin)
Professor of Animal Sciences

DAVID LLOYD WELLER
Ph.D. (Iowa State)
Professor of Microbiology and Biochemistry
