UVM 2017 Summer

Zach Hurwitz
OSI Pi Project

- Goal of creating real time displays
- All data organization to easily create these displays
PI ProcessBook

- Allows for the creation of workbooks and displays
Pi Asset Framework (AF)

- Grouping of Pi Points based on elements
- Tree structure to easily find points
- Ability of searching for elements
Pi Asset Framework (AF)
Pi Builder

- Manipulation of Pi Points and AF elements using Excel tools
- Name, Location, and Property changes

Pi Data Link

- Allows for Pi Point data to be imported to an Excel spreadsheet
Pi Vision

- Pi Vision allows for the creation of displays
- Displays are easily able to be shared
- Set security on displays as well as favorites
Pi Vision

• Dashboards with real time or archived data
• Additional symbols, images and graph types for better visualization
• Access to certain displays can be set
  • This applies to both who can edit and who can view them.
UVM Refrigerant Inventory

- EPA’s new rule requires more stringent record keeping
- This meant finding all active units around campus
### UVM Refrigerant

- End list of all active units
Thanks to all who Helped

... Good luck with Pi Mike...
