

Special thanks to our participants,
contributors and volunteers!

Second Annual

VERMONT REGIONAL BRAIN BEE

February 12, 2011

Welcome!

About the Brain Bee

Thank you for participating in the Second Annual Vermont Regional Brain Bee!

We are proud to host over 25 high school students from all over the state. The winner of the event will participate in the National Brain Bee held in Baltimore, Maryland on March 18th and 19th, during Brain Awareness Week.

How the Competition Works

The written test includes 50 short answer questions and 10 brain anatomy identification questions. The top half of competitors (as determined by written tests) will participate in an oral questioning round. After breaking for lunch and the keynote address, students with the best performances in the oral questioning round will participate in a live competition to determine the Vermont Brain Bee Winner.

VT Regional Brain Bee Committee Members:
Dr. Diane Jaworski, UVM, Dr. Rae Nishi, UVM, Holly Stradecki, UVM, Dr. Mark Stephani, Middlebury College, and Lisa Bernardin, Coordinator.
