Poster 1  
**Reciprocal control of corticofugal output by serotonin and acetylcholine**
Arielle L. Baker, Emily K. Stephens, and Allan T. Gulledge  
Department of Molecular and Systems Biology, Geisel School of Medicine at Dartmouth

Poster 2  
**Enduring cognitive deficits provoked by long febrile seizures are mediated by functional and structural effects of the neuronal repressive silencing factor (NRSF/REST1)**
Barry, Jeremy M4*; Patterson, Katelin P1*; Curran, Megan M1; Singh-Taylor, Akanksha1,2; Page, Matias 4, Noam, Yoav2; Holmes, Gregory L4; Baram, Tallie Z1,2,3  
1Departments of Anatomy/Neurobiology, 2Pediatrics and 3Neurology, University of California-Irvine, Irvine, California 4Department of Neurological Sciences, University of Vermont College of Medicine, Burlington, Vermont

Poster 3  
**Interactions between PACAP BNST stress system and Estrous Cycling in Non-overiectomized Female Rats**
Beniah Brumbaugh, Olivia Miles, Sayamwong Hammack  
Department of Psychological Sciences, University of Vermont

Poster 4  
**Prefrontal Cortical Activity During Typical Communication: A Functional near Infared Spectroscopy (fNIRS) Study**
Michael S. Cannizzaro1&2, Shaun Stephens1&3, Max Breidenstein4  
1Department of Communication Sciences and Disorders 2Undergraduate Neuroscience Program 3Department of Clinical and Translational Sciences 4College of Medicine, Department of Anesthesiology, University of Vermont

Poster 5  
**Neural correlates of genetic variant rs16969968 of the nicotinic receptor subunit alpha 5**
Bader Chaarani1, Matt Albaugh1, Scott Mackey1, Philip Spechler1, Kelsey Hudson1, Nicholas D’alberto1, Nicholas Allgaier1, Brittany Fair, Catherine Orr1, Stephen Higgins1, Elliot Stein2, Robert Althoff1, Stefan McDonough, Patrick L. Tierney, Rouba Kozak, Hugh Garavan1, IMAGEN Consortium3  
1Vermont Center of Behavior and Health, University of Vermont, Burlington, United States, 2NIH, Baltimore, United States, 3-, -, France
Poster 6  The adaptor protein Src Homology 2 Domain Containing Protein D (SHD) reversibly binds CrkL and is expressed in the developing zebrafish central nervous system
Brendan W. Chandler, Ashley L. Waldron, Jaye L. Weinert, James J. Vincent, Alicia M. Ebert and Bryan A. Ballif
Department of Biology, University of Vermont, Burlington, VT USA

Poster 7  Testing the effects of testosterone and age on spatial memory in male rats using an object location memory task
Christina U. Chyr, Emily C. Goins, L. Erin Miller, Valerie C. Braddick, and Mark D. Spritzer
Department of Biology and Program in Neuroscience, Middlebury College, Middlebury, Vermont, U.S.A.

Poster 8  The COBRE Imaging and Physiology Core: A Central Resource for High Resolution Live Imaging
Todd A. Clason, Cindy J. Forehand, and Rodney L. Parsons
Department of Neurological Sciences, College of Medicine The University of Vermont

Poster 9  Differential cFos expression in the presence and absence of flurothyl-induced seizures in a rodent model of malformations of cortical development
Willie J. Curry¹, Laura E. Powers¹, Amanda E. Hernan¹, & Rod C. Scott¹,²
1) Department of Neurological Sciences, University of Vermont
2) Institute of Child Health, University College London

Poster 10  Lesions of the postrhinal cortex impair extinction learning in a latent inhibition paradigm
Nicole E. DeAngeli, Travis P. Todd, David J. Bucci
Department of Psychological and Brain Science, Dartmouth College

Poster 11  A role for Neuropeptide-like precursor 3 in Drosophila ethanol tolerance
David R. Burns, Caitlin N. McCluskey, Audrey E. Phillip, Nicholas F. White, Greg Engel
Castleton University
Poster 12  
**The Distribution of Cholinergic Neurons, and their Co-localization with**  
**FMRFamide in Central and Peripheral Neurons of the Spider**  
**Cupiennius salei**  
Ruth Fabian-Fine¹, Carly M. Anderson¹, Molly A. Roush¹, Jessica A.G. Johnson², Hongxia Liu², Andrew S. French² and Päivi H. Torkkeli²  
¹Department of Biology, Saint Michael’s College, Colchester, Vermont, USA  
²Department of Physiology and Biophysics, Dalhousie University, Halifax, Nova Scotia, Canada

Poster 13  
**Structural Bain Correlates of Personality Traits and Sex Differences**  
Brittany Fair¹, Phillip Spechler¹,², Bader Chaarani¹, Robert Althoff¹,²,³, Hugh Garavan¹,²  
¹Dept. of Psychiatry, University of Vermont, Burlington, VT, USA  
²Dept. of Psychology, University of Vermont, Burlington, VT, USA  
³Dept. of Pediatrics, University of Vermont, Burlington, VT, USA

Poster 14  
**Plasticity in TRPV4 expression and function in micturition reflex pathways during postnatal rat development**  
Beatrice M. Girard, Susan Malley, Margaret A. Vizzard  
The Robert Larner, M.D. College of Medicine at The University of Vermont, Department of Neurological Sciences, Burlington, VT

Poster 15  
**Sensory Processing in Drosophila melanogaster with Alter Metabolic States**  
Jessica Gutierrez, Mackenzie Yedlin and Amanda Crocker  
Program in Neuroscience, Middlebury College

Poster 16  
**Characterization of a novel mediator of nociception in adult Drosophila melanogaster**  
Hale, M.¹, Pil, B.², Crocker, A.²  
¹Program in Molecular Biology and Biochemistry, ²Program in Neuroscience, Middlebury College

Poster 17  
**Environmental Enrichment Normalizes Hippocampal Timing Coding in a Malformed Hippocampus**  
Amanda E. Hernan¹ †, J. Matthew Mahoney¹ †, Willie Curry¹, Greg Richard¹, Marcella M. Lucas², Andrew Massey¹, Gregory L. Holmes¹; Rod C. Scott¹,³ †  
Joint first authors  
¹Department of Neurological Sciences, University of Vermont Larner College of Medicine, ²Department of Neurology, Geisel School of Medicine at Dartmouth, ³University College London, Institute of Child Health
Poster 18  **Effects of Testosterone Replacement on Spatial Memory and BDNF Expression in Aged Male Rats**  
Eliza C.B. Jaeger, John W. Lower, and Mark D. Spritzer  
Department of Biology and Program in Neuroscience, Middlebury College,  
Middlebury, Vermont, U.S.A.

Poster 19  **Prior systemic ketamine does not modify intrinsic or synaptic properties of dorsal raphe projecting neurons in the prelimbic cortex**  
Gregory Johnson¹,² and Sayamwong Hammack¹,²  
¹: University of Vermont Neuroscience Graduate Program ²: University of Vermont Department of Psychological Sciences

Poster 20  **Examining Patterns of Tobacco Product Use among Pregnant Women**  
Allison N. Kurti,a,b Ryan Redner,a,f Alexa Lopez,a Diana R. Keith,a,b Cassandra A. Stanton,g Diann E. Gaalema,a,b Janice Bunn,d Nathan J. Doogan,h Antonio Cepeda-Benito,a Megan E. Roberts,h Julie Phillipsa,e & Stephen T. Higgins  
a,b,c Vermont Center on Behavior and Health,a Departments of Psychiatry,b  
Psychological Science,c Biostatistics,d Obstetrics, Gynecology, and Reproductive Sciencesg, University of Vermont, Rehabilitation Institute,  
Southern Illinois Universityf, Westat and Center of Excellence in Tobacco Regulatory Scienceg The Ohio State Universityh

Poster 21  **Effects of TTC Treatment on Collagen IV Immunohistochemical Quantification of Rat Brains after Stroke**  
Zhaojin Li, Nicole Bishop, Siu-Lung Chan and Marilyn J. Cipolla  
Department of Neurological Sciences and Pharmacology, University of Vermont, VT 05405, USA

Poster 22  **Genome-wide mapping of ethanol sensitivity in the Diversity Outbred mouse population**  
Erick Masias¹, Dan Gatti² Troy Wilcox², Eric Busch³, Steven Kasparek¹, Drew Kreuzman¹, Benjamin Mansky¹, Sophie Masneuf², Erica Sagalyn³, Kayvon Sharif¹, Dominik Taterra¹, Walter Taylor¹, Mary Thomas¹, Elissa J. Chesler², Andrew Holmes³,Clarissa C. Parker¹  
¹Department of Psychology and Program in Neuroscience, Middlebury  
College, VT ²Center for Genome Dynamics, The Jackson Laboratory, Bar  
Harbor, ME, ³Laboratory of Behavioral and Genomic Neuroscience, NIAAA,  
NIH, Rockville MD
Poster 23  **Regulation of synaptic transmission by mTORC1 and mTORC2.**
M. McCabe, C. Barrows, B. Marsh, C. Tooke, M. Weston
Department of Neurological Sciences, University of Vermont

Poster 24  **Microglial Proliferation After Stroke is Indirectly Controlled by ETBr Signaling in Reactive Astrocytes**
John J. McInnis¹,²,³, Matthew D. LeComte²,³, Emily E. Torsney²,³, Jeffrey L. Spees¹,²,³
¹University of Vermont Neuroscience Graduate Program 2. University of Vermont Department of Medicine, Stem Cell Core 3. Department of Neurological Sciences

Poster 25  **The effect of CMT associated HARS mutations in catalytic function and neurite outgrowth in PC12 cells**
Patrick Mullen¹, Jamie Abbott¹, Alicia Ebert², Christopher Francklyn¹
¹Department of Biochemistry, ²Department of Biology, UVM

Poster 26  **Behavioral Weight Loss Treatment Enhanced with Working Memory Training: a randomized feasibility study**
Doris Ogden, Jean Harvey
Department of Nutrition and Food Science, University of Vermont

Poster 27  **Awareness and use of E-cigarettes among cardiac patients**
University of Vermont

Poster 28  **The role of melanocortins in the improvement of cognition after early life seizures**
Laura E. Powers¹, Rod C. Scott¹,², Amanda E. Hernan¹
¹Department of Neurological Sciences, University of Vermont Larner College of Medicine, ²Institute of Child Health, University College London

Poster 29  **Hippocampal Nav1.1 knockdown during development is associated with impaired spatial memory**
G. R. Richard¹, S. Sakkaki¹, R.C. Scott¹,², P.P. Lenck-Santini¹,³
¹Department of Neurological Sciences, University of Vermont College of Medicine, Burlington, Vermont, USA 05405 ²University College London, Institute of Child Health, London WC1N 1EH, UK ³Institut de Neurobiologie de la Méditerranée, INSERM, Marseille, France
**Poster 30** Biochemical characterization of the phospho-dependent interaction of Dcbld1 and 2 with the adaptor protein CrkL: Implications for a novel signaling pathway governing the development of the neural retina. Anna M. Schmoker, Jaye L. Weinert, Ryan M. Joy, Kyle J. Kellett, Marion E. Weir, Alicia M. Ebert and Bryan A. Ballif Department of Biology, University of Vermont, Burlington, VT, USA.

**Poster 31** Evidence for sex differences in habitual responding for sucrose following methamphetamine pre-exposure Hannah L. Schoenberg¹, Ellen Seyller², Sydney Trask¹, Ari P. Kirshenbaum³, Donna J. Toufexis¹ ¹Psychological Science, The University of Vermont, Burlington, VT, USA, ²Microbiology and Molecular Genetics, The University of Vermont, Burlington, VT, USA, ³The Department of Psychology, Saint Michael's College, Colchester, Vermont, USA

**Poster 32** Genome-Wide Mapping of Conditioned Fear in the Diversity Outbred Mouse Population Kayvon Sharif¹*, Dan Gatti², Troy Wilcox², Eric Busch³, Emily Funsten¹, Steven Kasparek¹, Andrew Kreuzman¹, Benjamin Mansky¹, Sophie Masneuf³, Erica Sagalyn³, Dominik Taterra¹, Walter Taylor¹, Mary Thomas¹, Erick Masias¹, Josh Yuan¹, Jocelyn Zemach¹, Elissa J. Chesler², Andrew Holmes³, Clarissa C. Parker¹,4 ¹Program in Neuroscience, Middlebury College, VT, ²Center for Genome Dynamics, The Jackson Laboratory, Bar Harbor, ME ³Laboratory of Behavioral and Genetic Neuroscience, NIAAA, NIH, Rockville, MD, ⁴Department of Psychology, Middlebury College, VT

**Poster 33** Prelimbic cortex inactivation attenuates responding of undertrained but not overtrained actions Megan L. Shipman¹, Sydney Trask², Mark E. Bouton³, John T. Green³ Neuroscience Graduate Program, University of Vermont, 2. Experimental Psychology Graduate Program, University of Vermont, 3. Department of Psychological Science, University of Vermont

**Poster 34** Dcbld2 is Essential for the Development of the Zebrafish Retina and Optic Tract Helaina Stergas, Ryan Joy, Ashely Waldran, Kyle Kellett, Bryan Ballif, Alicia Ebert Department of Biology, University of Vermont
Poster 35  **Intact renewal after extinction of conditioned suppression with lesions of either the retrosplenial cortex or dorsal hippocampus**
Travis P. Todd, Matthew Y. Jiang, Nicole E. DeAngeli, and David J. Bucci
Department of Psychological and Brain Sciences, Dartmouth College.

Poster 36  **Retrieval Cues Associated with Alternative Reinforcement Can Attenuate Resurgence of an Extinguished Instrumental Response**
Sydney Trask and Mark E Bouton
Department of Psychological Science, University of Vermont

Poster 37  **Transient receptor potential vanilloid 4 channels modulate Ca^{2+} signals in interstitial cells of Cajal at urothelial-lamina propria junction of rat pups.**
Margaret A. Vizzard, Grant W. Hennig, Mark T. Nelson and Thomas J. Heppner
The Robert Larner, M.D. College of Medicine at The University of Vermont, Department of Neurological Sciences and Department of Pharmacology

Poster 38  **Phase analysis in a reduced model of the leech heartbeat system**
Adam I. Weaver and Bryanna M. Evoy
Department of Biology, St. Michael's College

Poster 39  **Zebrafish that are “HARS” of Hearing: Auditory – Tissue Specific Expression of Histidyl t-RNA Synthetase and Phenotypic Outcome of HARS Knockdowns**
Graham H. Wright, Ashley Waldron & Alicia Ebert, PhD
Department of Biology, University of Vermont,

Poster 40  **Behavioral and genetic characterization of CFW mice for amphetamine withdrawal; a GWAS pilot study**
Joshua Yuan^{1,2} Jocelyn Zemach^{2} Erick Masias^{3} Kayvon Sharif^{3} Mary Thomas^{3} Pranav Kumar^{3} Jenny Do^{2} Kathleen Wilson^{3} Clarissa C. Parker^{3,4}
^{1}Program in Molecular Biology & Biochemistry, Middlebury College, ^{2}Department of Computer Science, Middlebury College, ^{3}Program in Neuroscience, Middlebury College, ^{4}Department of Psychology, Middlebury College
