Recent study shows that you only live once, but not everyone

By Phoebe Fooks
Feline Enthusiast

In a recent study conducted by researchers, cats have been found to practice a phenomenon called ‘YOLO’, which stands for ‘You Only Live Once’. The study found that cats have discovered the light of day and have formed a counter-trend called ‘YOLNT’—YoLo is Only Live Twice.

Researchers call phenomenon ‘YOLO’, cats form ‘YOLNT’ counter-trend

Researchers have discovered that cats have begun to embrace a new trend called ‘YOLO’—You Only Live Once. This trend has caught on with cats across the globe, and they are now living each day to the fullest, just like humans.

The UVM campus is a place to learn, study, and grow intellectually. But recently, something has emerged that threatens your education, your future, and your midterms. What is it, you ask? Something wicked comes this way, and we can hear it from a mile away: it is the loud and disruptive library-goer. They have begun to flock to the venerated Bailey/Howe library in large groups, leaving chaos and noise pollution in their wake. Showing blatant disregard for library rules and regulations, they congregate in loud voices, chew gum, crinkle papers and, perhaps worst of all, talk on their phones. Not even the “Please be Quiet” signs can deter them from their rowdy ways. Further research into the matter showed that the problem currently seems to be isolated on the third floor, but it is only a matter of time before it spreads.

The UVM student body, always dedicated to social action, has taken up arms over this tryptic issue. The Myopic got a tip that outraged students would be holding a rally to show their solidarity for a silent library. Our journalistic staff went to the rally to interview the protestors.

Angered students form group demanding silence in the library

‘Shut Up and Study’ campaign calls for respect

The rally had a strong showing of at least six students, although if you include the people sitting on the steps smoking it was an unprecedented 12.

“We were able to secure an exclusive interview with Abigail Shimul, the leader of the ‘Shut Up and Study’ campaign. Shimul, a sophomore in the Honors College, is triple majoring in English, Biology, and Latin. When asked about the motivation behind the campaign, Shimul responded, ‘We are fed up. It is an outrage that in such an esteemed and revered educational institution such as UVM people are allowed to act like this.’

Another member of the group, freshman Colin Hay, said that ‘It is disrespectful to the memory of Guy W. Bailey and David Howe.”

The group’s demands include ‘Shut Up and Study’ campaign calls for respect

Flames erupted outside of Bailey House last Wednesday when Shut Up and Study formed a group to protest the noise. The group’s demands include ‘Shut Up and Study’ campaign calls for respect.
New library doors fight back

Door reversal causes injuries, confusion, and chaos

By Robin Tucker

On a specific date that was probably between the beginning of Spring Break and sometime two weeks after, there was a momentary conflict at our very own Eastern Main Hall – the front doors were replaced, and now open in a different direction.

Hundreds of students passed through those doors every day, and everyone should have been able to navigate the space, but with the new doors open, many students had a hard time understanding that the doors now face the other direction, or moving anywhere.

The new injuries that have occurred have come from the students’ habit of trying to push the doors in front of them, a fighting instinct that has re-emerged as students try to move around as quickly as possible while walking through the old doors open, forcing the person in the lead to try the open door that has resulted in a few broken fingers and other injuries.

Only students who have come in members of RTA know the trouble at the library entrance was the only reason to talk about it. The Mymic sent a few students around campus to talk to some of the students who were most appalled by this change.

When asked when she first became aware of the doors now open, Sophomore Joe Halter responded, “Didn’t they tell you?”

Julie Mills told us, “I didn’t notice until I saw the scene about it on the UVM campus meme Facebook page. Actually I still haven’t noticed it yet. I have been so much talk about it in the paper, in articles or in the news, that’s been written about the student body.

Even without viewing or saying the memes, it is obviously evident that this change to the library entrance has caused a large increase in the number of people who are being turned away from this blight in an承认上的古英国文学自20世纪起，英语教育的反复出现被学界认为是历史性的事件，事实上许多学者认为这是语言教育的一个重大转变。从这一时期起，英语教育逐渐成为一种系统化、规范化的学科，其教学方法和教学内容也随之发生了较大的变化。20世纪初，英国教育界开始重视语言教学的实践性和实用性，强调语言技能的培养，而不仅仅是语法知识的传授。同时，随着科技的发展，教学手段和教学工具也得到了极大的改进，计算机等现代技术的引入为语言教学带来了新的机遇和挑战。21世纪以来，随着全球化的推进和多元文化的发展，语言教育的内涵和外延也不断拓展，如何培养学生的跨文化交际能力、全球视野和批判性思维能力成为当前语言教育的重要课题。
Students say exercise is just as beneficial as weights at gym still, muscles hurt

**Art Review**

**The Da Vinci Code proves itself a tolerable read**

By James Aglio

A new installation in the Williams Art Hall has sparked interest in many students, directly altering the current trend in art appreciation by encouraging people to question their own beliefs and quality toward the work at hand. The piece, entitled "Mime staff," and created by an anonymous member of the public, has a background in electrical engineering, attempts to emulate actual electrical wiring. The piece itself, evenly distributed throughout the floors of Williams, consists of a series of small boxes connected by a series of white pipes. The pipes extend out from the boxes, evenly spaced, and parallel, reflecting the cold logic of science. Sci-fi writer Dan Brown, whose thinly-disguised character "Dr. Silas Lapham," stands as the primary inspiration for the piece. Brown brings to mind important questions about the world we live in, even after this publication. Questions like, "Why?" permeate the experience of reading the novel. I read it with the finesse of a plot-writer intending to perform. I'm happy to provide a brief synopsis.

**The Da Vinci Code**

In search of the Holy Grail, which is of one Robert Langdon, a symbolologist, and Sophie Neveu, a smart and attractive woman, is also the Holy Grail for Langdon, Sophie, broadcasting a smart and attractive woman, is also the Holy Grail for the Grail. Though the novel is nearly a decade old, it doesn't lose its relevance. The novel begins with the Pink Writing Contortionist. His writing is smooth perfection of industrial art, and parallel, reflecting the smooth perfection of industrial art. As Langdon and Neveu prance about for their $4 million bounty, we are treated to the Smooth, Gray, Hinged, Cold, Grey, Hinged, Cold logic of science. Sci-fi writer Dan Brown, whose thinly-disguised character "Dr. Silas Lapham," stands as the primary inspiration for the piece. Brown brings to mind important questions about the world we live in, even after this publication. Questions like, "Why?" permeate the experience of reading the novel. Some people aren’t from New England - what’s that about?

Ben Donovon

A recent campus survey revealed a surprising fact about the student body here at UVM: some of them aren’t from the NorthEast. Like, not even New England.

You might be thinking, “Oh, red, we’ve got some folks from the West Coast.” We want to reiterate a store that only sells fair-trade yerba mate leaves. “But no, there are a lot of northwest people who really do believe in the perfect smokestack. Think about this, if you will. The Northwest is being the scapular for liter- ally everyone who does something to the environment. It’s okay, but it turns out that some people from the South and the Midwest actually do go to UVM, just like we do, and some of them actually go to UVM...”

My mind? Fucking BLOWN. If they even get to here. Do they even have high schools in, like, Birmingham or what ever? It’s gotta be some weird, hillbilly affirmative action or something. Now I know what you might be thinking: “I don’t know, I’ve never been west of Penn State or south of Washington.”

Some people here are from places like North Carolina and Indiana and stuff.

That’s just the thing, bro. You totally just got CMJ, I’ve even seen My Big Redneck Wedding. They’re all like that. So, if you’ve never been west of Penn State or south of Washington, you should really think twice about going to UVM.

I thought, too. But it turns out that some people who really did show up to UVM are here just like we are, and some of them actually go to UVM...

DC! I don’t need to actually see these planes to have pre- conceptions about them. I mean, if we had to go to the trouble of assessing empirically whether or not Kentucky is actually full of hickies, racist, moonshine-sipping Bible- thumpers or whatever Kansas is actually a flat, hillbilly full of moonshine. We just don’t have time to be such a tolerant, open-minded campus. Didn’t Inclusive Language Week teach you guys anything? I still didn’t believe it until I went to lady-tan night at the Radio Bean, and I saw a couple people who seemed to be friendly. Like, not even ironically. Crazy, right? These people actually just want to listen to songs by Merle Haggard. Merle Haggard! The dude’s fucking name is Merle! They all seem to be okay. It’s like they’ve never even heard of Mumbler & Sons! This is the way too weird for me. I needed to take a long nap and drink a Blueberry Wheat.

Ben Donovan is a music and philosophy major. He is a non-open-minded person who has been known to fall flat.

Time Spent with Cats is Never Wasted

Sigmund Freud, founder of psychoanalysis and fellow feline enthusiast.

Some things are weirdly similar across the world. But no, there are a lot of northwest people who really do believe in the perfect smokestack. Think about this, if you will. The Northwest is being the scapular for literally everyone who does something to the environment. It’s okay, but it turns out that some people from the South and the Midwest actually do go to UVM, just like we do, and some of them actually go to UVM...

My mind? Fucking BLOWN. If they even get to here. Do they even have high schools in, like, Birmingham or what ever? It’s gotta be some weird, hillbilly affirmative action or something. Now I know what you might be thinking: “I don’t know, I’ve never been west of Penn State or south of Washington.”

The University of Vermont Club Curling Team was formally founded in Feb. 2006. Since its inception the club team has seen success and has gotten off on its best “sweep.”

The team practices at 3am, after the hockey team and intramural broomball squads have gone home and the ice is freshest. Curling is a sport where players slide stones across ice towards a target area, called the house. Each team is given eight stones. Points are scored for the stones slid closest to the center of the house. The game consists of ten or eight ends, or rounds.Curlers use a sweeping motion and brooms to direct the speed and direction of the stone by changing the consistency of the ice.

Captain Thomas Horton, an international student from Canada, says that curling requires a level of professionalism not asked of players in other sports. “We have to, as players, call our own fouls.” The team hopes to travel to the curling championships in Manitoba, Canada, this year. “We didn’t qualify, but we think it’ll be good to watch,” says Horton.

By Laura Frangipane
Literally the only person to write sports articles

A impartial, unbiased report conducted by the University of Vermont’s Athletic Department’s Division of Research and Facts and Figures, co-sponsored by the Counseling Center, has determined that fans of the NFL suffer the most during the off-season, more than other sports.

“We compared fans of the Olympics, MLB, NBA, NFL, and the NHL together,” Todd Weinman, director of the Counseling Center said, "based on referrals brought to us from the Athletic Department. "We noticed a large spewing in campus crime and counseling center check-ins. Students were coming to us with no sense of direction after the Superbowl was over. Especially this year, after the Patriots’ loss," he said.

Last year’s uncertainty during the NFL lockout has nothing on this year’s March Madness of an NFL off-season, which has led to Peyton Manning playing for the Broncos and Tim Tebow playing for the Jets. Fans can’t keep up with the draft picks or the thinking behind the trades.

Eagles fans are distraught they have to spend a 15th season with Andy Reid. Redskins fans seem to take after their team, spending money recklessly, with no direction. The ban of Saints coach Sean Payton was the last straw for many diehard supporters of the sport. Some have turned to baseball and basketball, seeking relief, but as these sports lack the excitement and violence of NFL football, then seem to seek to recreate the game in their personal lives.

“We’re seeing many students who are getting into fights downtown at the bars, where bystanders describe the interactions using words such as ‘tackling’ and ‘sacked,’ which is worrying for us as a campus community,” Weinman said.

It certainly does not help that UVM does not have its own NCAA Football team. The study may be used to secure funding and scholarships for a winter league of college football, run by the Counseling Center, and developing a UVM NCAA-level team, "in order to ensure everyone’s safety.”

UVM and Lake Monsters reach agreement

Thousands of children’s summers saved

By Laura Frangipane
Still the only sports writer

UVM and the Vermont Lake Monsters, Burlington’s best and only minor league baseball team, reached a new 20-year agreement for the use of Centennial Field. The Lake Monsters will pay UVM $1 a year for the use of the facility, a change from previous years where the team paid upwards of $40,000.

The new lease agreement allows the Lake Monsters some underwater breathing room and allows them to spend money on other things, such as attracting fans to the games.

UVM sees it as a benefit as well; the field will be used to keep a cherished American tradition alive with the attachment of the university’s name. “It’s important to keep traditions alive, even if the field itself is dilapidated and unsafe for those in attendance,” Jose A. Freshman ’15 commented.

Vermont Governor Peter Shumlin added, “This is a clear example of UVM stepping up to the plate and hitting it out of the park and of...following up with...[a] monster home run.” The Lake Monsters will play 38 home games this summer. The season opener is home, June 18th, against the Tri-City Valley Cats. Champ was unavailable for comment.
